There is some excuse for a secretary of a large fair to have such a man as you around, but when a race meeting only is given, what has the secretary to do if he has a "Speed Superintendent"? It only gives him a chance to get a lot of publicity and to pose before admiring (?) crowds, because everybody will ask who he is, if he appears too often in the limelight. They are told that he is the secretary and if the race meeting is a success he is given all the credit, while the poor goat of a super, who has done all the work, is kept in the background and his only chance to be mentioned at all is for something to go wrong; then the S. S. is blamed for it all, so don't figure on any medals being handed you for the work you are doing.

The original superintendents of speed were appointed because of their knowledge and acquaintance with complaining horsemen, and in many cases because the secretary of the association had been elected on account of his standing in the community and not because of his ability to run a fair or race meeting. His presence on a racetrack soliciting entries would be a flat failure, or his ability to draw up a set of racing conditions would also result in trouble, and so to do away with this drawback and make the racing a success, the office of "Superintendent of Speed" was created and met with much success in many instances, but is now being overworked, as you can readily see by reading some racing programs, where six races are carded for a three-day meeting and the association has both a secretary and S. S.

Now that we have explained to you the reason you are going to work at this job, we will endeavor to lead your faltering footsteps along a rosy path that will be well supplied with thorns before you reach the end of your meeting and if you ever undertake the job again, we will know that all wood does not grow on trees, but is sometimes perched on the shoulders of an outfit that looks like a man, although we feel that your heart is in better place than the man's who appointed you to the office.

To start with, you must draw up a set of conditions for your meeting, make them as difficult to understand as you can, because the more complicated they appear the more your work will be appreciated. The regular rules of both the American and National Trotting Associations are hard enough for the more than average man to understand, but you can do good by adding special conditions of your own; thus, with the regular conditions and your own, you will have something that will resemble the boarding house vegetable soup. Pick out any one of the systems to divide your money, then add something original to it, and you will have the drivers queered as the problem will be too great for their minds to fathom and they will be satisfied with any money you may hand them.

Be sure that when you have your entry blanks printed that the president's, secretary's and treasurer's names are in larger type than your own, as these gentlemen are as jealous of their prominence as a leading lady in a burlesque show. Another thing, insist that the entries close with the secretary and not with you, although you may be doing all the work and he does not care to his his importance belittled, so humor him if you do not want black looks and unpleasant remarks.

When mailing the entry blanks send them to all your friends whether they have horses or not, so that they can see your name in print; never mind the postage bill. Then ask all you meet if they know anyone who owns race horses; jot these names down and mail them blanks. If you can get hold of entry lists from other tracks, mail every name on the list a blank and if the same name appears a number of times, mail a blank to the same party each time you see his name, as we said before, never mind the stamp expense.

Several weeks before your entries close, visit the various tracks nearby or farther away, if the association will stand the expense. Tackle every driver or owner you meet on these tracks for an entry to your races. Promise them anything to get their signature to your entry blanks. Tell the drivers they can start a half dozen horses in each race if they want to, for one entrance fee, or else let them enter in every race and promise to charge them only one entrance fee and also tell them you will not hold them, if they do not start. Of course you have their signature and if they do not toe the mark you can suspend them, but to make this suspension stand good with the parent associations you should provide yourself with a number of envelopes and enclose each man's entries, then mail them to yourself; this makes the postmark stand good.

Hustle very hard at the race meeting, where your entries close, and you can be more than liberal with your promises here, as it is your last chance. You must take all kinds of conditional entries, even if your published conditions forbid it. You want to make a big showing of entries. But hold every man to his entrance fee as he will like you better when he is far away.

After this your work is practically done, as you need not bother about stabling the horses that are to race at your meeting. Do not even see if there are enough stalls to hold them, the drivers can hustle for quarters when they arrive. Let the stalls on the ground be as dirty as they can be, do not think of having them clean, neither must you make any arrangements for bedding or feeding; it will give the drivers and caretakers good exercise to hustle around for feed and bedding. Try and have the water supply for the stables as far away as possible because the caretakers like to carry water from a distance, it gives them a chance to look the country over.

If anybody asks questions, answer them in a gruff voice and say you know nothing about anything they ask. If a driver kicks about his accommodations tell him he has the privilege of moving. Do not give the caretakers any answer at all, because some of them are rough handlers when they become riled. If a driver wants to be released from paying on a very sick horse, hold him to his entrance fee by saying that you "did not get the horse sick."

Fit up for yourself a nice, cozy office near the stables, so that you will be handy to any trouble that may start. Have a sign over the door reading "Speed Department," but bear in mind never to be in the office, make the horsemen hunt for you over the grounds, they will be in a good humor when they find you. Do not give anyone the satisfaction of knowing the order of the next day's program, keep them in suspense until late in the morning; this gives the horse a longer time to rest. If there is a kick for overcharging for feed, pass on serenely. Why should you bother about the price of feed when possibly you are getting your bit out of every pound of feed delivered at the grounds? Another thing, do not be too liberal with badges, it always creates a good feeling when you charge an owner or driver for his wife's entrance to the grounds, then again he will still further like you if you only allow him half enough tickets for his caretakers. Give him an argument but no tickets.

You have a lot of data here, which should prove useful and we hope you do not meet an early death in following out the instructions we have given you. So, "over-the-river."—W. H. Shields, in The Horseman.

THE CAVALRY HORSE QUESTION.

In a very interesting article from the pen of F. K. Sturgis, vice chairman of the Jockey Club, and which has been published in some turf journals and in many dailies throughout the country, much valuable information is furnished concerning the destruction of the horse in the war now raging in Europe. Mr. Sturgis, by reason of his connection with racing the thoroughbred, and possibly on account of his lack of information in regard to the American trotter, favors the blood horse over all others as the foundation in the production of cavalry remounts. While it is yet to be demonstrated which of the various types is most valuauble for this purpose, the fact remains that the Breeding Bureau, which has, during the past decade, introduced throughout the country many thoroughbreds, has not been instrumental in furnishing a type of horse suitable for carrying weight or covering a distance of ground through a rough country.

There is no question that the thoroughbred, built on proper lines, possessing substance, muscular development, strength, constitution and intelligence, is the equal if indeed he is not superior, to any other type intended for saddle purposes, yet it cannot be said that the stallions selected by the Breeding Bureau have been fitted for the uses to which they have been put because of any excellence in conformation they may have possessed. A large percentage of the thoroughbred stallions located in various places throughout the country have been weeds, and even those which possessed size and substance have not by any means filled the bill, if one can judge by the appearance of their offspring. That the thoroughbred, crossed on the standard-bred, saddle and Morgan types, furnishes courage, quality and a desirable texture of bone is known to all whose experienc breeding has shown them the results of cros different types, yet, unless the thoroughbred sta is exceptionally well made, is unusually strong, more size than the average horse of his breed begets a type that is too light. The thoroughl himself is unsuitable as a cavalry remount, for w he has been bred for a century and a half to c weight he has not, in recent years, been produ with a view of covering a distance of ground o enduring the hardships incident to a sever campa

The thoroughbred of today, as represented by type found in this country, is deficient both in stitution and in strength, and as he cannot as a take up 125 pounds and gallop a mile and a creditably, it is not reasonable to suppose that could take up 265 pounds, the average weight trooper and his accoutrement, and travel even a slow pace through the obstacles so frequently fo in modern warfare. It then appears that the t oughbred, to be useful in the production of cav remounts, must be crossed on types possess greater substance, constitution, muscular deve ment and power. These are certainly to be foun the standard bred, rarely in the saddle horse, and casionally in what is known as the Morgan t

The so-called light harness horse, or in other wo the American trotter, while he has been produ with very little judgment, represents a type sessed of more strength, size and constitution t is found in any other breed. There are today th sands of stallions of the trotting breed averag sixteen hands, weighing eleven hundred pounds, heavy bone and tremendous muscular developme with strength, power and endurance enough to t up three hundred pounds, if necessary, and through the roughest country to be found. Th are probably thousands of mares of the same t and from these, when crossed on the thoroughbr must come not only the ideal cavalry remount the greatest number of this eagerly sought for hor

Regardless of the fact that the United States exported, as shown in Mr. Sturgis' article, appr imately sixty million dollars' worth of horses a mules since the war started, the drain on the t ting breed has not been noticeable. That such a t mendous exportation has been felt is, of course, t yet a large majority of the animals sent abroad ha been neither thoroughbreds nor standard-breds, though many have combined in their veins the blo of both. The United States has sent abroad, sin the beginning of the war, an enormous supply ordinary horses without either breeding or indiv uality, yet it has not drawn on its supply of standa bred or thoroughbred to any appreciable extent. it is inconceivable that there should be a horse fa ine in this country as long as inferior geldings a mares are sent away and superior types of stallio and broodmares are retained.

As Mr. Sturgis says, the 23,000,000 head of hors now in this country, or rather at the beginning the European war, include a very large percentage draught animals, leaving a very small proporti suitable for cavalry remounts, yet it should also remembered that these very draught horses have field of usefulness abroad at this time perha greater than the light bodied, more active and bloo like specimen. The artillery horse in Europe tod must be capable not only of carrying weight, but drawing his heavy loads over the roughest countr In no war of the past has the light built trooper bee of so little use, nor has the importance of weigh strength and constitution been so evident.

If the United States expects to produce a type sui able for cavalry remounts for its own use, or replenish the supply that has been so heavily draw upon, it would seem to be the part of wisdom to us the thoroughbred only as a cross on the standard-bre and the lighter types of the draught horse. The Pe cheron and Clydesdale are individually too cumbe some for galloping purposes, yet their blood furnishe size, strength, muscular development and power, an when crossed on the thoroughbred must be admirabl suited to the needs of the fighting armies abroa and to the army of this country if it should ever b unfortunate enough to be called upon in defense. Fo every other purpose, such as for the cavalry an for mounted infantrymen, the standard-bred as type is better suited to present conditions than th thoroughbred, and if a German officer were to selec a thousand well made, stoutly built horses for eithe of the above purposes, he would undoubtedly find th necessity of abandoning the thoroughbred and choos ing the standard-bred.

That there is a great scarcity in this country o horses suitable for cavalry remounts at the pric allowed by this government is quite true, and Mr Sturgis is evidently correct in his statement tha such a price cannot secure horses capable of carryin 260 pounds which are servicely sound. In the natura course of events, this government will be forced t pay a reasonable price for horses suited to its needs and, with $300 as the minimum, it will not be difficul to mount our standing army with horses recruited from the standard-bred and the cross between thi type and the thoroughbred. There are today in thi country less than five hundred thoroughbreds capable of carrying 260 pounds and enduring the hardships of a severe campaign in a rough country, yet we have no hesitancy in saying that ten times as great a number can be found among standard-breds if the nations of the world at war with each other, or those in preparation for impending struggles, will pay a reasonable price.—Horse Breeder.

THE FARM

CALIFORNIA DATES.

t Coachella in Riverside county, ategrowers' association has been ned. This association reports the ber of bearing trees of its mem- s to be 800 imported palms and) seedlings. These trees produced 914 20,000 pounds of dates. Of un- ring trees there are 28,000 import- palms and half a million seedlings ier four years of age. With all of se trees bearing dates, if they pro- e as well as those now in bearing, Coachella valley will have a total p of approximately 3,000,000 pounds dates to market.

mperial County Dates.—The Pacific ast Packer reports good prospects m the Heber date gardens, a nu- us of date-growing which may add other big industry to Imperial's cot- n and dairy productions.

ndications now are that the crop m the Heber date gardens will be out three times as large as last ar's yield. This is really the first presentative year since the gardens re founded, as a large number of es will come into full bearing. The lms have blossomed about three eks earlier than usual, which means e yield will be more uniform, as it es three weeks more time for the uit to mature. In the garden there e three classes of palms, those bear- g soft, sticky fruit, those bearing uit of medium firmness, and those earing hard or "bread" dates. The econd class is the most numerous. Africa the hard dates are used by e natives for bread. Over 550 palms ill come into full bearing this sea- on, 200 of these being the famous eglet Noor palms specially imported om Africa; 300 are seedlings, grown om seeds planted on the local farm. he average yield per year for a full- rown palm is 150 pounds.—Home and arm.

EVERY FARM A FACTORY.

C. M. Carroll, in the Harvester World, says:

"The opportunity of the town lies n the country. The country can get along without the town, but no town ever has been or ever will be per- manently prosperous where the land s poor. The town is built on farm profits; on what farmers produce in excess of their home needs. In fact, towns are liabilities, not assets—con- sumers, not legitimate producers. They are the natural evolution and out- growth of necessity—places to store and distribute the world's surplus products through the channels of com- merce. There is but one road to per- manent city building—that road leads to the farm. Business is so sympa- thetic, so sensitive to crop production, that the forecast of a poor wheat or corn crop affects the markets of the world. When the harvest fields smile, towns wax fat, and factories increase the pay roll. Corn, wheat, and hay, beef, pork, and poultry—these are the soil builders, the home builders, the builders of great cities.

"The old-fashion chamber of com- merce, with its cash bonuses and free factory sites, is rapidly passing away. Instead of grabbing business from each other, towns are beginning to look to the country, out into the fields of growin corn and wheat and hay. Here lies the opportunity—for the great city, strange as it may seem, is out in the country, hidden in the fer- tility of the soil. A successful hay campaign will bring factories to the town. Hay means beef and pork, which beckon the packing house and storage plant. More corn means cereal mills, glucose factories, starch factories. Flour mills locate in wheat- producing sections. Creameries follow the dairy cow, and the truck patch calls for the canning factory.

"Let us have more chambers of agriculture and commerce and fewer 'commercial clubs.' Let us create wealth from the opportunities at home, and not subtract it from other communities.

"We must not forget that every farm is a factory, and that in every state there are thousands of these factories which need our best thought and effort to make them productive."

DECIDE THESE POINTS.

Which sow do you prefer, the one that farrows eight to ten pigs in her litter, twice a year; or the one that only has three to five at a litter?

These are family traits which are inherited, one having the natural pro- pensity of bringing forth small litters, each of which in turn repeats on the same order and character in their future litter. While the other con- tinues to multiply her successive fam- ilies on the larger numbered scale. The difference between these two fam- ilies in twenty-five years with thirty sows in the herd would represent a snug fortune itself. The two charac- ters of sows might mean the differ- ence between failure on the one hand and marked success on the other.

The same soil that grows trouble- some, worthless weeds that are a use- less expense, will produce a profitable crop with proper care if the farmer elects to do so.

In this day and age the wisest farmer and breeder gives the closest attention to every feature of his busi- ness and upon discovering that a sow is delinquent in her duty she is quickly fattened and marketed for pork.

The successful farmer selects the prolific producer, the easy feeder, the quickest to reach marketable condi- tion, with largest profit to the feeder; this hog is the great money-maker and consequently the popular hog of the day—American Swineherd.

THE DAIRY COW'S UDDER.

Nothing so adds to the value of a dairy cow as a capricious, well-placed udder. Either at a sale or in a show ring the udder seems to be the one point on which the final decision is based. It appears to be the one thing that indicates whether or not a cow will be a revenue producer or a non- self-supporter. The udder is, there- fore, a very great essential to the dairy cow.

Length and width of a cow's udder are of greater importance than depth. We get the length desired in an udder that is attached high behind and runs well forward on the belly. Width is determined by the conformation of the thighs. The inside of the thighs should curve outward, forming a well- defined arch that begins high, has its widest part at the top and inside of which the udder hangs free and easy.

In order to be well quartered each teat should give the same amount of milk, which calls for a uniform devel- opment in each of the four parts of the udder. If the teats are altogether too small and too short that is an ag- gravating fault in a dairy cow. Anoth- er very objectionable form is termed a tilted udder, too much being project- ed between the thighs. Fully two- thirds of the milk is made in the hind quarters and if the front quarters were similarly developed a corresponding capacity would be added and greater milk production would result. This abnormal projection between the thighs also becomes dirty from the droppings of the cow, which is serious and objectionable.

Some udders hang low and pick up much of the filth with which they come in contact. A cow with such an udder as this is most disagreeable to milk and is a sure indication of a poor producer. A common defect, too, is a badly shaped teat of a flehsy na- ture, hard to grasp, and the cow is decidedly tiresome to milk.

While a large udder is sought for, it is not always an assurance of heavy milking ability. A large udder may be fleshy and firm in texture and con- sequently would not surpass in produc- tion a smaller udder whose tissue was of greater quality. This quality is im- portant and it is one point upon which a dry cow might be judged for milk production. The udder should be soft, light and spongy to the touch. The skin should be soft and elastic and covered with fine silky hair. After milking the covering should fall into many folds that are loose, soft and oily.—Iowa Homestead.

Gombault's Caustic Balsam

The Worlds Greatest and Surest Veterinary Remedy

HAS IMITATORS BUT NO COMPETITORS!

SAFE, SPEEDY AND POSITIVE.

Supersedes All Cautery or Firing. Invaluable as a CURE for

FOUNDER,
WIND PUFFS,
THRUSH,
DIPHTHERIA,
SKIN DISEASES,
RINGBONE,
PINK EYE,
SWEENY,
BONY TUMORS,
LAMENESS FROM SPAVIN,
QUARTER CRACKS,
SCRATCHES,

SAVE-THE-HORSE

(Trade Mark Registered.)

Save-The-Horse Does Not Blister. Does Not Discolor or Destroy Hair. Horse Works as Usual. THE RESULT IS PERMANENT.

This is the kind of work it does.

FRANCIS McKENNA, Vienna, Wis., April 16, 1915, writes: I have a horse, eight years old, that had two bone spavins, one on each hock. I sent him to a veterinarian and had the worst one operated on, cutting open the bunch perpendicularly with the limb. I let him rest three months. I would not consent to cutting again, but began to try liniment and blisters. I had about concluded to give him away when a friend in Burlington, Wis., told me about your **Save-The-Horse,** as he had used it with most favorable results. I did so and found it to be all that he claimed.

It was the best investment I ever made, as I would not part with that horse now for a hundred dollars.

Over 19 Years a Success

$5. Every bottle sold with Signed Contract Bond to return money if remedy fails on Ringbone—Thoropin—SPAVIN—or ANY Shoulder, Knee, Ankle, Hoof or Tendon Disease.

Third Edition Within One Year of Publication.

CARE AND TRAINING OF TROTTERS AND PACERS

NEVER before in the history of the publishing world has a horse book gone into a third edition within one year of publication. Yet the explanation is simple—the book fills a long-felt want. Never before has this subject been treated in a distinct manner. It has been handled in connection with autobiographies of trainers, but such works are out of print or out of date, for they were published 20 years or more ago. Conditions and methods have changed since then, and former treatises are just as much out of date as the high-wheel sulkies then in vogue.

"Care and Training of Trotters and Pacers" is as modern as a 42-centimeter gun. It does not contain the ideas of one man, but of 100 of the leading horsemen of the day, including Thomas W. Murphy, Walter R. Cox, and Edward F. Geers. These ideas were converted into book form by two prominent American turf journalists.

This book enables anyone to do his own caretaking and training until it is time to send the colt to a professional trainer, or the owner can train and race the colt himself. The treatise covers the details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented. Nothing is left to guess work. The language is lucid. Both theoretical and practical views are outlined and compared. The instructions are concise and easily understood. The work contains no advertisements—it is not a catch-penny publication that looks big in the advertisement but proves disappointing when received.

Many professional trainers have purchased the book and have found it interesting. Despite the war, over 300 copies have been sold in Europe and Australia.

Price $1.00 postpaid. Cloth, illustrated, 176 pages, 5x7 inches.

REOPENING of UNFILLED HARNESS EVENTS

—FOR—

The Oregon State Fair

SALEM, ORE.

SEPT. 27 to OCTOBER 2, 1915

Mile Track; National Trotting Association.

All communications to W. Al Jones, Secretary, Salem, Oregon.

ALL EVENTS NOT MARKED (CLOSED) TO CLOSE AUGUST 13, TO HORSES ELIGIBLE ON CLOSING DATE

MONDAY, SEPTEMBER 27

Three-minute Trot, 3 heats	$ 300.00
2:10 Pace, 3 heats	700.00
2:25 Trot (closed)	600.00
One-mile Handicap Dash, Trot and Pace	500.00
Great Western Relay Race	1,500.00

TUESDAY, SEPTEMBER 28

2:15 Trot, 3 heats	$ 700.00
2:18 Pace (closed)	700.00
Three-year-old Trot (closed)	2,000.00

Second day Relay Race.

WEDNESDAY, SEPTEMBER 29

Three-year-old Pace (closed)	$1,500.00
2:30 Trot, 3 heats	500.00
2:08 Pace, 3 in 5	2,000.00

Third day Relay Race.

THURSDAY, SEPTEMBER 30

2:20 Pace, 3 heats	$ 700.00
2:12 Trot, 3 in 5	2,000.00
2:15 Pace, 3 heats	700.00

Fourth day Relay Race.

FRIDAY, OCTOBER 1

Free-for-all Pace, 3 in 5	$ 700.00
2:20 Trot, 3 heats	700.00
Three-minute Trot or Pace, 3 in 5	300.00

Fifth day Relay Race.

SATURDAY, OCTOBER 2

2:12 Pace, 3 heats	$ 700.00
2:09 Trot, 3 heats	700.00
2:25 Pace (closed)	500.00

Sixth day Relay Race.

CONDITIONS:

Five per cent to enter and 5% from money winners.

All races, except the One-mile Handicap Dash close August 13, 1915. Entrance fee, 5% of purse, 5% deducted from money winners.

One-mile Handicap Dash for Trotters and Pacers, handicap distances to be announced by the judges at 1:30 o'clock on the day of the race; standing start from pistol shot. Entries close September 14. Five per cent to enter and 5% from money winners.

The 2:08 Pace, Free-for-all Pace, 2:12 Trot, and 3-minute Trot or Pace are three-in-five, no race longer than five heats and money not decided before the fifth heat to be accorded on summary at the end of the fifth heat.

All other races are three heats, money divided: 30% to first heat, 30% to second heat, 30% to third heat and 10% to first and second horses according to rank in summary.

Should two or more horses be tied for the first place after the third heat, such horses only shall contest a fourth heat and the money divided between the first and second horses, according to rank in summary at the termination of this heat. Only winner of the race to get record.

These races will be governed by general conditions as published in last stake book, as nearly as possible.

The Board reserves right to declare any race off.

Money divided 50, 25, 15 and 10 per cent. Summary money, 75 and 25 per cent.

All races mile heats.

GUNCRAFT
By W. A Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

Cartridge board cover, $1.00; Cloth, $1.50

MODERN BREAKING
By W. A. BRUETTE

A revised edition of the latest Treatise on the Training of Setters and Pointers.

THIS book enables anyone to do his own training and fully explains the methods employed by the most successful trainers in developing the setter and pointer. The important lessons are illustrated by photographs from life; nothing is left to guesswork. The entire subject is covered, from the selection, raising and development of puppies to the conditioning of dogs and their handling in the field. The amateur is told, in lucid language, how to make a dog a high-headed, stylish worker, stanch on his points, steady to shot and wing, and a prompt, tender retriever; all of this is accomplished by simple methods, some of them never before given to the public. The instructions for correcting the faults of bird dogs and keeping them up to their training are concise and easily understood. Every man who owns a bird dog or shoots in the field should read this book.

1915 WINRACE —and— ELIGIBILITY BOOK

The National Trotting Association Winrace and Eligibility Book for 1915 is now ready for delivery. It is a work of 858 pages, bound in cloth and contains official reports of all races and time record meetings held by members of the National and American Trotting Associations as well as copies of all special reports received by the two Associations, and all reports of non-association meetings which appeared in the columns of the turf and daily papers in 1914 as well as an index giving the starts made by each horse. In addition to this, it also contains an Eligibility List which presents the names of all live horses that acquired records or winraces in 1912, 1913 and 1914. When a winrace was made over a mile track it is designated by the letter (m) and if a horse also has a winrace over a half mile track within the four seconds limit fixed by the rule, it is also given and marked (½m).

Last year after the new eligibility rule was adopted, the National Trotting Association issued a Winrace and Eligibility Book, which covered 1912 and 1913. It assisted materially in the application of the new rule, but members and horse owners were frequently in doubt as to whether a horse was entitled to a time allowance. This resulted in a very voluminous correspondence and in order to obviate it in 1915, the present book has been compiled and issued as approved by the President under an order of the Board of Review.

In the matter of time allowance, a horse with a winrace is allowed one second for each year, if raced, in which he fails to equal or reduce his record or win a race, providing same is claimed by the nominator when making the entry. If a horse was not raced in 1914, he is not entitled to a time allowance and a reference to the index in this book will show whether he was raced or not, while by referring to the summaries, it can be determined whether he equaled or reduced his record or won a race. Also in order to give all the information possible, the reports of meetings contain all races at half mile heats as well as at mile.

This book presents reports of 1,400 meetings at which 12,673 horses started in 8,730 races and 939 performances against time, for which the premiums amounted to $3,228,617.82, while the Eligibility List presents the names of over 14,000 horses.

The 1915 Winrace and Eligibility Book will be sent postage prepaid to any address for $2.00 by

A Practical Treatise on the Training of Hounds

Training the Hound

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Coon Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

Is Your Brother a Shooter?

A WAVE of enthusiasm in restoring American prestige with the gun is sweeping the country.

Shooting is virile sport with a strong appeal to that inherited protective instinct that made our forefathers the greatest marksmen in the world.

The best place to learn to shoot is at a trapshooting club, but novices shy at the idea of making a start in the company of a bunch of experienced shots. To satisfy the demand for an organized arrangement for beginners, we planned a

NATIONAL BEGINNERS DAY SHOOT

at which your inexperienced brother, son, wife, daughter, or friend may learn in company with various other beginners.

Briefly, the plan provides two trophies—

A FOB FOR MEN, A SPOON FOR WOMEN

The bronze fob illustrated at the right is for the best score made by a beginner, man or woman, at each of these beginners' shoots. The sterling silver Nemours teaspoon is for each woman, beginner or experienced, who makes the best score at each of these shoots.

BEST HUNDRED CLUBS GET CUPS

A handsome bronze cup trophy will be given to each of the hundred clubs having the greatest number of beginners contesting in these shoots.

Any club may hold a shoot any day or days in August.

Write at once for full details and conditions.

LET EVERY MEMBER GET A MEMBER

Get every member of your club to pledge himself to bring at least one beginner. Here is your chance to double the membership of your club and do a real service for your brother, son, wife, daughter, or friend.

Get the details quickly from

IT LOOKS GOOD TO EVERYBODY

The Winchester Model 1912 Hammerless, Repeating Shotgun has won the enthusiastic approval and endorsement of shooters everywhere. Its light weight, strength, balance, easy-working action, and splendid shooting qualities appeal to men who know a good gun. Its Nickel steel construction means not only a lighter and stronger gun, but a better balanced one, because of the better distribution of weight. This gun loads and unloads easily, has a cross-bolt trigger lock, and a simple take-down system. It is made in 12, 16 and 20 gauges. If in the market for a shotgun, don't fail to examine

Randall Scores Double Victory in Maine

E. A. RANDALL
Maine State
Champion

E. A. RANDALL, of Portland, ran away from the field for the honors of the Maine State Shoot. He not only won the State Championship with 99 x 100, but made his victory more complete by winning the High General Average of the tournament, scoring 390 x 400. Throughout the meet, Mr. Randall shot Remington-UMC Arrow Steel Lined Shells.

Portland Won the Interstate Team Race

The Portland Team—E. A. Randall, S. B. Adams, G. A. Blanchard, W. D. Hinds and O. P. Weymouth,—all shooting Remington-UMC Nitro Club and Arrow shells, carried off the honors in the Interstate Team Match with a score of 473 x 500.

A feature of the meet was Randall's fine work the second day. He broke 199 of 200 birds and won easily from the rest of the field.

GUNCRAFT

By W. A. Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

VENTURA ENTRIES TO CLOSE MONDAY.

While the fields of trotters and pacers that compete at the Ventura County Fair to be held on August 26 to 28 inclusive will probably be composed very largely of horses owned somewhere in that approximate locality, owing to the fact that there are no other meetings to back it up and thus draw horses from a distance, there may be a few horsemen in other sections that desire to take a hand in the game, and for their benefit we wish to say that entries for the Ventura races close on Monday, August 16.

On the first day, Thursday, will be raced the free-for-all trot and a mixed class for green trotters and pacers, the former for a purse of $500 and the latter for $250, the program being rounded out by a running race for $250 at a half-mile and repeat. Friday will be devoted to other sports, including a half-mile and repeat chariot race for county horses only, but on Saturday the harness horses come back, with a $500 free-for-all pace and a $250 purse for trotters and pacers eligible to the 2:20 class. On Saturday a mile run and repeat for $250 at catch weights will also be staged.

All entries should be addressed and checks for entrance made payable to L. P. Hathaway, Secretary, and entries not accompanied by the customary entry fee in full will not be accepted. All harness races will be three in five under the old system, and the rules of the N. T. A. will govern with but one exception, the division of the purse. The Ventura folks want real horse racing and to encourage keen competition have eliminated fourth money and given the lion's share, quite properly we believe, to the winner, the money being cut sixty, thirty and ten per cent. Some will find fault with this division, but not the winners—and they are the ones that best please the spectators.

The Ventura track is in good condition and the gentlemen behind the movement are the right sort and deserve the support of all horsemen who are within a reasonable shipping distance. The fair is a youngster, only in its second year, and is making a bid for success without subsidy from the zealously (sometimes) guarded state treasury. One way to assure its future is to support it, and if you do go there with a horse or so you will be helping your own good cause and have as good a time as the fair folks can provide by square treatment and hospitality, even if you make no million.

THE THOROUGHBRED REVIVAL.

Next Saturday afternoon at the beautiful course at the Panama-Pacific International Exposition grounds there will echo from the Presidio hills the thud of the hoofbeats of galloping thoroughbreds and the cheers of enthusiastic supporters urging them to greater effort—sounds that were at one time familiar to residents of the bay cities but which for some seasons have been stilled through the operation of adverse legislation.

Thoroughbred racing "as it used to be" will never flourish again in California, but there is absolutely no reason why thoroughbred racing "as it should be" should not assume an assured position of permanence and prosperity here as it is doing in other sections, and it is racing of this kind that the gentlemen composing the Golden Gate Thoroughbred Breeders' Association are going to have. Under the old regime racing was conducted largely by men whose interests were confined solely to racing and betting, but under the new dispensation it is promoted and controlled by those who have a direct interest in the welfare of the game owing to their deeper interests as breeders.

Many obstacles have had to be overcome before a meeting could be given locally under the revised statutes with any prospect for attaining the slightest degree of success, but at the same time a number of happy circumstances have combined to make the present an auspicious time for the effort to re-establish racing in public esteem. The course at the P.-P. I. E. was available, the exposition is drawing a big daily attendance of thousands of people who will find a trip to the races a matter conveniently and enjoyably accomplished, and plenty of horses are at hand to furnish good sized fields and excellent competition. The latter pleasing feature is due in a very large measure to the passing of the racing bills in Nevada and the staging of the Reno meeting under the pari-mutuel system of speculation, that event attracting very many horses that would not otherwise have found the trip west possible. There are, of course, very many horses to be present here that were not at Reno, but the Nevada racing has been the greatest single factor in furnishing entrants for the local events. Throughout the preliminaries attendant upon the promotion of the Golden Gate meeting the gentlemen in command in Nevada have shown a most commendable spirit in co-operating in every way with the local association—a course that is most pleasing and promises well for the future.

However, given these things to help the cause along, nothing could have been accomplished save by a coterie of actual horsemen who were willing to face a certain loss of time and money in order that a beginning of a new era might be effected. With no income in the way of a percentage from mutuals or open betting privileges, the sums received from the strictly "legitimate" resources will probably not suffice to meet the expenses of the meeting. This, however, has been anticipated, and the deficiency will be gladly met by the members of the association.

It is gratifying to note the response that campaigners of thoroughbred stables have made to Secretary Nealon's call for horses. While, as remarked previously, the bulk of them will come from Reno, there are stables here—or en route—from numerous other points, in some instances many hundreds of miles away. San Francisco has a genuine "strangle hold" on the affection of the countless horsemen who made her their Mecca in days gone by, and they welcome eagerly the opportunity to come back and race once more. The meeting will continue until September 18, and in the course of that time many thousands of dollars will be paid to horsemen in stakes and purses.

Entries closed this week for the fixed events—the Stewards Cup selling stakes and the Exposition, President's Cup, Geraldine, Golden Gate, Juvenile and San Francisco handicaps—and while the complete lists are not available at this writing, considerably over a hundred horses have been named therein, so that the fields will be of generous size. These seven events are all for good sums and will in all probability become the "fixtures" around which the association will arrange the programs in the years to come. Approximately seventy-five horses are now quartered at the local track, and as Reno, in deference to the wishes of San Franciscans, will close today, next week will witness the early arrival of practically all the horses that will participate in the meeting.

The revival of thoroughbred racing in California, if successful, means much more to the state at large than would appear on the surface. No one who is fully conversant with conditions in and about our cities can be so absolutely absurd as to view it as a detriment to public morals, and it does mean a great impetus to the public business. Most gratifying of all the results that would attend its success would be the rejuvenation of the few breeding farms that have managed to weather the storm, as well as the establishment of numerous new plants of like nature. No state in the union has a more famous history than has California in the way of speed production, and no state is more admirably adapted for the home of great nurseries having as their purpose that most fascinating of pursuits, the breeding of high class horses for racing purposes.

The enterprise of President Clark, Secretary Nealon and their associates is deserving of every success, and we join our best wishes to those of thousands of others who have at heart the best interests of the horse, be he galloper or trotter. We sincerely trust that the initial meeting of the Golden Gate Thoroughbred Breeders Association will mark the beginning of a new era of success and prosperity in racing and breeding, and should such prove to be the case, the indebtedness to them of not only horsemen but the public at large will be incalculable.

SOME APPROPRIATE NOMENCLATURE.

From time to time during the course of every racing season there arises more or less curiosity as to how in the dickens some horses get their names. In some instances there are good reasons for appellations that are a bit out of the ordinary, and as a "speaking example" of such we call your attention to the bunch starting in the mounted police special at the exposition Wednesday, as they seem to have been conceived extemporaneously, as it were, but mighty fittingly.

Now a policeman has all the natural inclinations of the ordinary mortal, and when Chief White gave his OK to the proposed race there was, of course, a spirit of rivalry rampant that led to a desire to bet and bet heavily on one's favorite. The force, of necessity, was in a quandary as to how to get its money down, for, really and truly, the police do not know of any joints or pool rooms in the city, and a consultation was held immediately. They just naturally had to have action, so they sent The Copper who had just gone off duty out to see what he could find out. Right off the reel he ran across an old Jail Bird who had formerly been a Trusty and sometimes in his days gone by had made a few prices on the ponies. There was nothing stirring, however, even though the Patrol was called and the old timer put On the Carpet and given the Third Degree, for he had a perfect Alibi and proved he had been converted by Billy Sunday and gotten in good on a softer graft. Then The Copper went out on another Gum Shoe and rounded up a regular Stool, from whom they easily learned, much to their surprise, that out in the Fog Belt in the Sunset district there was a Small Book in operation. This helped. A betting commissioner was at once started out to get their money down, but got in a Jitney Jam at Third and Market and the race was over before he got in the clear again.

Now that's what we call hard luck!

However, it goes to show that once in a great while there are extremely valid reasons for the bestowal of some of the names that clutter up the summaries and furnish material for the scribes to fill holes in the last form with.

Looking Backward Over the M. and M

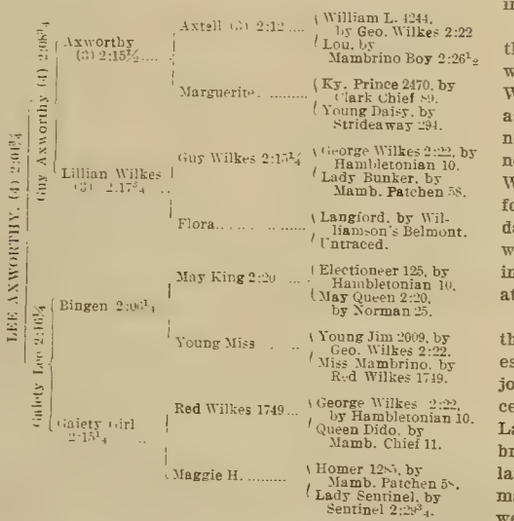
Sidelights on the Big Stake Thrown by Random Statistics—Lee Axworthy and Some of His California Ancestor

The victory of Lee Axworthy (4) 2:04¾ in the greatest M. and M. that has ever been raced brings to mind a number of interesting instances concerning the part played by horses of various ages, especially four-year-olds, in this famous stake, which has for over a quarter of a century been the main trotting fixture of every season. There are stakes of equal or surpassing value, but while the public may forget who won them almost before they are well over, the name of the winner of the M. and M. lingers long in memory wherever the American trotter is well known.

In 1889 it was that the M. and M. was inaugurated, the first winner being the Michigan bred gelding Hendryx 2:17¼ by Dauntless 3158, a son of Hambletonian 10 owned at Dowagiac by H. J. Hendryx, for whom the M. and M. winner was no doubt named. Hendryx was seven years old at the time of his greatest turf achievement, and, strange to say, was the only trotter bred on Michigan soil to attain the pinnacle of fame awarded an M. and M. victor.

Until 1893, the winners of the stake were aged trotters, five years old or over, that season witnessing the first victory for a four-year-old, the chestnut filly Siva being returned winner in straight heats and record time, her mile in 2:13¾ being the first to be trotted in the stake better than 2:15, the record to that time being held by Prodigal—2:17¼. Siva was the first of the Californians to win the big event and was a real "native daughter," being by Guy Wilkes 2:15¼ and out of Sable Hayward by Poscora Hayward, grandam the great brood mare Sable by The Moor. The second horse the same year was also a four-year-old and also a filly—Miss Lida by King Clay.

In 1898 the second four-year-old winner appeared in the California stallion Directum Kelly who in John Kelly's hands made the nearest approach to 2:10 to that time with one heat in 2:11¼. The five heat contest was a memorable one that put the seal of quality upon Directum Kelly, but none present looked forward to a day when a son of his would place the race record over a Detroit course perilously close to the two-minute mark.



Three years later, in 1901, further honors fell to the four-year-olds when Eleata, from Palo Alto, first set the stake record below 2:10, the daughter of Dexter Prince trotting her fastest heat in 2:08¾. Then came nine long years during which the aged trotters ruled supreme, Anvil, in 1911, being the next four-year-old winner, and the last of the age until we come to Lee Axworthy. In addition to the four-year-old winners, there have been four occasions when the contending horse was of that age—Miss Lida in 1893, Hallie Hardin in 1902, Wainscott in 1903 and Beirne Holt in 1912. With but one exception, Anvil, the four-year-old winners have established new records for the stake, the reductions being of a striking nature, so that the part played by four-year-olds in this great classic is most worthy.

Horses of various ages have been winners of the M. and M., but the most prevalent age is five years, ten trotters having been returned victor at this age. Seven six-year-olds have won it, five four-year-olds, one seven-year-old and two eight-year-olds. The age of one winner, J. M. D., is not established, nor is the age of Stanley Dillon given in the Year Book, but our opinion is that he is the oldest horse to head the summary in the event, as he was, according to the best knowledge we have in this office at present, in his ninth year when Mr. Geers "put him over" in 1904. Linda Wrona, holder of the record of 2:05½ which Lee Axworthy's 2:04¾ replaces, was perhaps the oldest performer to figure prominently in the stake's history, being ten years of age last season.

Eleven states have produced M. and M. winners, though they have not always been foaled in the state where they were bred. Kentucky, most naturally, has been most prolific in this respect, nine of the number having been bred somewhere in the blue grass. Next to Kentucky comes California with five in the honor roll; New York, Ohio and Nebraska have each given two such horses to the turf, and one each may be credited to Michigan, Kansas, Mississippi Indiana, Tennessee and New Jersey, the latter state being the newcomer to the list, as Lee Axworthy, though foaled in Kentucky, was bred there. Just where to credit J. M. D. we do not know, but perhaps someone who sees this may possibly be able to supply the information.

The predominance of the blood of Hambletonian 10 in the most successful of American trotters is nowhere more graphically portrayed than by the history of this stake. Of the twenty-seven winners, only three fail to have a direct paternal cross to the grand old Hero of Chester, and of these three, two trace through the paternal line to Mambrino Chief II, while it is highly probable that J. M. D. owned allegiance through his sire to one or the other of these foundation sires. Members of the female persuasion have achieved signal success in the M. and M., as it has been won by mares fourteen times, by geldings seven times, and by stallions six times. Only one sire, Direct, has begotten two such winners, foaled across the continent from each other, Directum Kelly in California and Ann Direct in New York. No winner has as yet sired a winner, but the time will doubtless come when the roster contains the names of sire and son.

While the breeding of very many of the heroes and heroines of the M. and M. has been of the "gilt edged" variety, perhaps few if any have carried in their veins a more harmonious fusion of the blood of great houses than does Lee Axworthy, the following brief tabulation serving to bear out the above statement fully:

It needs only a cursory inspection of the above for a person familiar in any degree with trotting blood lines to realize that Lee Axworthy is not an accidental star, but the result of years of effort in breeding for the production of trotting speed—early trotting speed at that. It is from such breeding that sturdy race horses may most safely be expected to spring, and he fits into the line of M. and M. winners most acceptably, carrying an intense infusion of the blood of Hambletonian 10 and Mambrino Chief 11, the sires whose descendants have dominated the stake.

Like many others among the great performers of the present day, bred on eastern soil, Lee Axworthy traces back to the farms of California that were the speed nurseries without rival in the days of a generation gone—on the sire's side to Wm. Corbitt's San Mateo Stock Farm and through his dam to Palo Alto, both of which establishments had, as mentioned previously, furnished four-year-old winners of the M. and M. Lillian Wilkes (3) 2:17¾ was herself a "colt trotter" of note, making history for her family here on the Pacific coast in the same year that witnessed the racing of the first M. and M., the year of the foaling of the filly that was to become the first four-year-old to win that classic, the chestnut lassie Siva by Guy Wilkes. There are many of the older generation of horsemen who recall the day at Petaluma when Lillian Wilkes took her record and administered to the presumably invincible Sunol a most decisive drubbing.

To the "casual observer," perhaps, the only "hole" in the pedigree of Lee Axworthy would seem to come through this same Lillian Wilkes, but there have been many ardent students of breeding who woul sieze upon that hole with glee, for therein lies nc only the one-time highly prized "thoroughbred cross, but a cross to the best of the thoroughbreds tha figure extensively in trotting pedigrees.

Recent tabulations of this pedigree in eastern e changes give Flora as a daughter of imported Lang ford, which is erroneous. Over half a century ag there came to California among others in the wago train of Williamson Brothers the thoroughbred sta lion Belmont and the thoroughbred mare Liz Given by imported Langford, dam Charlotte Pace by Si Archy, the latter a stallion credited with being prominent factor in the foundation of the trottin horse. It was in 1853 that the Williamsons starte from Ohio on the long overland journey to the Golde Slope, and in the spring of 1855, at their first Cali fornia home on Stony Creek, in Colusa county, there was born to Liz Givens, to the cover of Belmont, male foal. This youngster, to the best of the writer's belief, enjoyed the distinction of being the first thor oughbred colt foaled west of the great divide, and in time became known as Langford, a race winne and a weight carrier and, withal, possessed of muc speed and purity of gait at the trot. In other years there came from the matings of Belmont and Li Givens such old time race horses as Bonnie Belle Gladiator, Pele and Error, every one of whom, with the exception of Error, number standard performers in harness among their descendants.

It was this Langford, and not imported Langford that sired the dam of Lillian Wilkes, and Lee Ax worthy need feel no shame from carrying a trace to Williamson's Belmont. Lou Dillon 1:58½ carries it as does Joan 2:04¼, John A. McKerron 2:04½, So noma Girl 2:04¼, Directum 2:05¼, Sterling McKin ney 2:06¼, Bolivar 2:00¾, Copa de Oro 2:01, Mona Wilkes 2:03¼ and a great array of other 2:10 per formers of both gaits. Flora Langford (for so the daughter of Langford was always known locally) was by nature a pacer, and though never appearing in the standard list had an authentic trial of 2:24 at that gait.

As is the case of many horses of the early days, the history of Flora has never been authoritatively established by the register, and as old time turf journals in their reference to her say nothing con cerning her dam, perhaps the fact that she was by Langford is all that can be stated concerning her breeding. The time of her birth was probably not later than the middle sixties, as she was an aged mare when she came into Mr. Corbitt's possession well in the seventies. Her first performer was Joe Arthurton 2:20½, foaled in 1878, and though she produced a number of foals at the Corbitt farm, before Lillian Wilkes appeared upon the scene, the latter lass was the only other one to gain recognition in the standard list.

Lillian Wilkes, like the filly Leonor, the ancestress of White Sox, whose history was related not long ago in these columns, was a young lady whose sterling qualities were such that she overcame many handicaps on her path to fame. Flora Langford in 1886 had reached a state of extreme infirmity through the ravages of time, and for the last several months of her life was set on her feet almost daily through the kindly offices of her caretaker, assisted by a block and tackle. On numerous occasions subsequent to her last mating to Guy Wilkes her owner offered her at a hundred dollars with no takers. At last came the day of foaling, and not long after the wobbly little brown filly had been safely delivered the old mare breathed her last, leaving the baby to face the world alone—by no means an auspicious start in life for a future stake winner and famous matron. However, the inherent qualities of greatness were not to be denied, and that fall she received at the competent hands of Johnny Goldsmith the lessons that were the stepping-stones to the career whose chief incidents have been touched upon herein. What pleasure would it not have given her breeder could he have lived to see the day when a four-year-old by a son of hers would win the M. and M. in record time!

It is also interesting to note that all was not a bed

[Concluded on page 12.]

DIDN'T KISS 'EM THIS AGE IN CALIFORNIA.

Magnus Flaws, who as a member of the official in the stand helped to decree judgments after h heat, also did the announcing and made a de- ed hit with the crowds. Mr. Flaws has had long erience in the stand, both as judge and starter. s voice is excellent for announcing, and some ngs have given me a hunch that his comeliness features helps out some, too. After the day's work been finished on Friday, the genial official was nding near a grandstand exit awaiting some ends, when there was a slight commotion in a fam- group that had evidently come in from some ce in the Hawkeye State's fertile districts to see day's sport.

Noticing that the group, which contained a middle- ed couple with a trio of youngsters of varying es, seemed bashfully cogitating on the propriety of proaching him, Mr. Flaws stepped towards them d in his most gracious manner said: "Is there ything that I can do for you?"

"You're the fellow that done the callin' on the rses this afternoon, ain't ye?" asked the masculine okesman.

"Yes, sir, I did the announcing for Dr. Stone, who somewhat unused to the work, and is careful of s voice during the hot weather."

"Well, ye done a right good job of it, and ye ought get a big pile of money at it, too. Mirandy and e has just been talkin' about a little matter. Ye e, this young feller ain't got no name," he said, inting to a husky boy of doubtful months that the other was holding, "and we been kind of disputin' bout what we'd call him. Mirandy said we ought to ame him after our Congressman, who is called the est lookin' man in our district, but he ain't just my ind of politics, and I don't want it that way. So I ays to Mirandy when I see ye callin' them names ut up there—I says, there's a man I'd be glad to ave put his name on this lad. He's got your man eat ten ways, talkin', looks and everything else, I ays—and Mirandy agreed. Now, if ye'll just put our name on this here boy, I'll promise ye that he'll huck more corn in fifteen years than any one other id in the county, and it don't make no difference hat your politics is."

I turned away at this juncture, for there are some ights too sacred and too affecting for spying eyes. he kissing of an infant has from time immemorial een the accompaniment of the christening in rural istricts, and my auricular equipment told only too lainly that the name of Magnus Flaws had been estowed on one particularly chubby youngster to e coupled with the cognomen that his father bears. nd it is safe to say that the job was never better one. — Davenport Correspondent, Western Horse- nan.

ANDY McDOWELL AT WILMINGTON, DEL.

It does one good, every now and then, to run across some old-timer in the racing game, and who is still n it, to listen to the stories of the turf of nearly fifty ears back, when a 2:30 trotter was somewhat of a arity. In our roaming around race tracks we occa- sionally meet with some one of these patriarchs of the high wheel sulky, and it is a real treat to while away an hour or two in the morning hours, before the horses are called for the afternoon performance, and swap yarns with these old-timers who were in the racing game when the writer first took out a stable of trotters, flanked with a pacer or two that could go lively for about three-quarters of a mile and then put on a longing look for the way out to a box stall for rest and refreshments. The latest find is Andy McDowell. You, or at least most of you, know of Andy, and if you don't know him you have more than likely heard of him. A long time ago Andy McDowell was the most talked about and one of the most successful drivers of light harness horses in this country, and today, after having passed so many mile stones in his journey through life (we know how old Andy is, but won't tell on him), is still in the horse game and his reinsmanship, it seems to us, has lost none of its early cunning. His old-time reminiscences of the race tracks before the National Trotting Association was ever talked about, have on more than one occasion carried us back to days gone by when horse racing was horse racing, even if the time was not as fast, by many seconds, as it is today. In his early days on the turf it took not only head- work to win races, but a driver had to have some muscular development and be ready to call this into play when occasion required. Both of these requi- sites Andy McDowell possessed. He drove himself into prominence on the race track and fought his way out of difficulties on several occasions. Some of those "difficulties" were close calls, whilst others were easy going. At this time he has a pretty good racing stable, his star youngster being Prenelda, which next October at Lexington, Ky., will be very troublesome to beat. That is Andy's summing up of the possibilities of this young thing, and she looks and acts at this time as though she will not prove a disappointment to her trainer and driver when the fateful time comes for her to make her first bow before those in the big grandstand at Lexington, at the windup of the Grand Circuit meetings for 1915.— Trotter and Pacer.

Racing over the North Pacific Circuit begins next week at Vancouver, B. C., on the two-lap track, and will continue until early in October, when the circuit ends at Salem.

Time at Grand Rapids Is Sensational

Third Day at Kalamazoo.

Kalamazoo, August 6.—The track at Recreation Park today was heavy as a result of the rains earlier in the week, but three races were pulled off success- fully though the time was, of course, slow. W. L. Snow and Todd Temple took the first heat of the 2:11 trot like it was all over but cashing the tickets, but Tommy Murphy and Sadie S., well back in the ruck in the first mile, came back strongly and took the next three, the Todd Mac trotter never landing again in the first four. Laramie Lad was a consistent contender for three of the four heats but couldn't outfoot Sadie in the brushes.

Flaxy B. played fair with Snow in the 2:11 pace, and annexed first money after dropping the second heat to Pappy Geers and the four-year-old Bud Elliot. Colorado Range made a procession of the three-year-old trot—and incidentally the youngsters went the best race of the day in certain respects. When aged pacers can do no better than 2:11¾ and trotters of the same class are satisfied to call a heat in 2:11½ enough, three-year-old trotters that reel off miles in 2:12¼ look to be pretty fair—or a little better. The details:

Kalamazoo, Aug. 6.
Columbia Hotel 2:12 trot, three-year-olds, $600 added:
Colorado Range, b c by Colorado E.....(McDonald) 1 1
Rusticoat, ch c by Axworthy.....(Andrews) 2 2
Deroche, ch c by John A. McKerron.....(Geers) 3 3
Henry Todd (Lasell), Northspur (Cox) also started.
Time—2:12¼, 2:13¼.

Hotel Rickman 2:11 trot, purse $2,000:
Sadie S., b m by Archdale.....(Murphy) 6 1 1 1
Todd Temple, b g by Todd Mac.....(Snow) 1 7 6 5
Laramie Lad, b g by Master Bo..(McDonald) 2 6 2 2
The Guide (Geers), Lettie Lee (White), Fair Virginia (Cox), June Red (McMahon), Baby Doll (Quinn) also started.
Time—2:12¼, 2:11½, 2:12½, 2:12¼.

2:11 pace, $1,000:
Flaxy B., b m by Quaker K.....(Snow) 1 5 1 1
Budd Elliott, br g by Prodigal.....(Geers) 2 1 5 5
Clara Walker, ch m by Early Reaper...(Cox) 4 2 3 3
Bill Hurst (Nethaway), Dustless McKinney (Murphy), Fleeta Dillon (L. Shuler) also started.
Time—2:11¾, 2:14¾, 2:14½, 2:15¼.

Last Day at Kalamazoo.

Kalamazoo, August 7.—Peter Scott, twice second in the M. and M., paid the first large instalment on the thirty thousand bucks he owes his owner today by taking the ten thousand dollar Paper Mill stake in straight heats. Albaloma, Worthy Prince and King Clansman took turns in driving out the Murphy entry, but couldn't carry the final clip far enough and fast enough to head him to the wire.

Single G. and Major Ong indulged in a five-heat duel in the 2:06 pace, the Indiana wiggler besting the gentleman with the military title in the final time out by unbelting next to the fastest mile of the event, 2:05½. Murphy straight-heated the 2:21 trot- ters for his second win of the day with the three- year-old filly Bondella, that won the first race of the season for the Poughkeepsie trainer at North Ran- dall. Her field today was more easily disposed of than were the three-year-olds in her other race, as the fastest mile she was forced to trot, the third one at that, was an even 2:10. She "pulls a ton" but gets there just the same.

Hal Boy, the real hard luck hero of the season's pacing stakes, threatened to cop the coin in the Burdick Hotel classic today, but had to be content with second money. Russell Boy, the dark horse winner of the Edwards, had the guidance of Ed Geers from the start and took the first two heats without a mistake in 2:07¼ and 2:04¾, hard pressed in the second heat by the little western pacer. In the next two heats Russell Boy displayed some of the unsteadiness that has cost him heats before, Hal Boy taking both in 2:05½ and 2:05¾, Charley Val- entine and Judge Ormonde making unsuccessful bids for each of them. Russell Boy's performance and subsequent guarding of the rear evidently failed to tire him greatly, and in the fifth, again on his good behavior, he outpaced his game little rival in 2:04¾. The summary:

Kalamazoo, August 7.
Park American Hotel 2:06 pace, purse $2,000:
Single G., b h by Anderson Wilkes (Gosnell) 1 1 5 2 1
Major Ong, b g by Major Gantz...(Murphy) 4 5 1 1 2
Lelia Patchen, bl m by Dan's Brother (Snow)5 2 4 4 3
Rastus (McDonald), Baron A. (Cox), Our Colonel (Jones), Harry the Ghost (Brennan) also started.
Time—2:07¾, 2:04¾, 2:07, 2:06¼, 2:05½.

Paper Mill 2:08 trot, purse $10,000:
Peter Scott, br h by Peter the Great (Murphy) 1 1 1
Worthy Prince, b g by Prince McKinney..(Cox) 4 2 3
Kings Clansman, br h by The Clansman.....(McMahon) 5 4 2
Albaloma, b g by Almaden D.....(Quinn) 2 5 5
Peter McCormick (Shuler), The Duchess (McDonald), Wilgo (Marvin), Axtien (Harris) also started.
Time—2:08¾, 2:05¾, 2:06¼.

2:21 trot, purse $1,000:
Bondella, br f (3) by Walnut Hall.....(Murphy) 1 1 1
Todd McGregor, ch h by Cochato.....(Rodney) 3 2 2
Jeannette Speed, b m by Peter the Great (Cox) 2 4 4
Sarah Douglas (Floyd), Colonel Riser (Brennan), Mc- Mahon (McMahon), Lusitania (Marvin), Bourbon Maid (Thacker) also started.
Time—2:15¼, 2:12¼, 2:10.

Burdick Hotel 2:09 pace, purse $3,000:
Russell Boy, b h by Rustic Patenter (Geers) 1 1 7 7 1
Hal Boy, b g by Hal B.....(M. Childs) 3 2 1 1 2
Judge Ormonde, bl h by Ormonde(Valentine) 7 5 2 2 3
Camelia (Cox), Queen Abbess (White), Hal S. (Mur- phy), Patrick M. (Stokes) also started.
Time—2:07¼, 2:04¾, 2:05½, 2:05¾, 2:04¾.

First Day at Grand Rapids.

Grand Rapids, August 9.—Real racing weather, the first that the Grand Circuit stables, have enjoyed for several days, graced the opening of the big trots in the Furniture City today, fast time and great con- tests being the result. Favorite players had a poor day, however, as the dope was upset in each of the three events raced.

Lettie Lee and Mirthful carried most of the edu- cated money in the Grand Rapids Railway trot, but failed to deliver as per order, Mike McDevitt and Miss Directed having the call in all but one of the four heats, Mirthful winning the third with the Cleve- land mare back in the ruck.

Miss Harris M. looked the logical winner of the first of the season's events for three-year-old pacers, the Matron stake, and while she paced fast and gamely she was not able to take the measure of General Todd, the first standard performer for George Todd 2:07¾. McDonald evened up in the 2:10 trot, however, as after four hot heats from 2:06¼ to 2:10 Adbell M., an outsider, was returned winner over Guy Nella, Lulu Lumine and five other good trotters, the good four-year-old acquiring a winrace record of 2:08¾. The details:

Grand Rapids, August 9.
Grand Rapids Railway, 2:10 trot, purse $3,000:
Miss Directed, b m by Direct Well..(McDevitt) 1 1 5 1
Mirthful, b m by The Star of Patchen(Murphy) 3 2 1 4
Lettie Lee, b m by Moko.....(White) 2 5 3 3
Todd Temple (Snow), Laramie Lad (McDonald), The Guide (Geers) also started.
Time—2:07½, 2:06¼, 2:08, 2:07½.

The Matron, three-year-old pace, purse $1,250:
Gen. Todd, b c by George Todd.....(Reappy) 1 1
Miss Harris M., b f by Peter the Great (McDonald) 2 2
Sad Thoughts, b f by Bingen.....(Cox) 3 3
Peter Worthy (McCarr) also started.
Time—2:06, 2:08.

2:10 trot, purse $1,000:
Adbell M., b h by Moko.....(McDonald) 6 1 3 1
Guy Nella, b m by Guy Axworthy.....(Geers) 2 8 1 2
Lulu Lumine, b m by Orator.....(Murphy) 1 5 6 3
Lizzie Brown (Valentine), Lou Jennings (Brennan), Marshall (Snow), also started.
Time—2:06¼, 2:08¾, 2:07½, 2:10.

Second Day at Grand Rapids.

Grand Rapids, August 10.—Most of the Grand Cir- cuit tracks this season have been more or less both- ered by water and floods, but that other potent element, fire, played the principal part here today and tonight the Furniture City track course is still smoking. Eleven heats were raced from 2:00¾ to 2:06½, the average time being just slower than 2:04¼, so the track has a reason for being hot, as this is an unequaled record for an afternoon's racing. Right from the jump the pace of each race was fairly dizzy, and every heat winner save one, Margaret Druien, has a nice new record.

Single G., winner at North Randall, Detroit and Kalamazoo, has at last been taken into camp, and the lad that did the trick was the same one that upset all the expert calculations in the Edwards, the Illinois pacer Russell Boy. Geers had the mount, and the way Marse Ed teamed the bay horse was worth a long trip to see. Russell was second choice in the speculating, but romped in at the head of his field in each heat, pacing the second one in 2:02¾. Gosnell and the Hoosier bear-cat drove him out in the first mile, but Aconite was the contender in the succeeding heats, the Cox horse being genuine poison.

Geers also had the reins over Bonington in the 2:08 trot and started out to hang up some more rec- ords, outbrushing Peter Scott and Worthy Prince in brilliant style in 2:04¾, reducing the stake ma- terially, the former figures having been an even sec- ond slower. Troubles developed for the Hillanddale trotter in the next heat, however, and he was dis- tanced, Peter Scott, well pressed by Worthy Prince and King Clansman, winning in 2:05¼ and coming back for the third and fourth in 2:05½, all four heats being better than the fastest one ever trotted previously in the event.

The bright, particular star of the day was Flower Direct, the eight-year-old mare in Ben Whitehead's stable. Flower has been knocking at the door of the two-minute list for some seasons, and while she didn't quite succeed in breaking it in today she did give the woodwork of the upper panels some healthy cracks. At Detroit Ben showed the girl to be mighty good, as Marvin had to go to the bat with William to stall her off in the second heat of the free-for-all pace. Braden Direct, whose rejuvenation has been one of the seven wonders of the early season, was also right as right, Flower Direct having to go two heats in 2:00¾ and 2:02½ to win from him, with Earl Jr. and R. H. Brett third and fourth, respec- tively, in each heat. The Tennessee lass becomes the holder of the two-heat record for pacing mares by this performance, supplanting that other famous daughter of the sunny south, Evelyn W. by The Spy, whose two miles were won in 2:03½, 2:00½ three years ago at Syracuse.

Margaret Druien again proved herself to be the class of the 2:05 trotting brigade, taking both heats in comfortable style in 2:06½ and 2:05¼, Joan being the best contender. The details of the big day follow:

Grand Rapids, August 10.
2:08 pace, purse $3,000:
Russell Boy, b h by Rustic Patenter.....(Geers) 1 1 1
Aconite, b h by Aquilin.....(Cox) 3 2 2
Single G., b h by Anderson Wilkes.....(Gosnell) 2 4 3
Peter Farren, b h by Peter the Great..(Murphy) 4 3 4
Time—2:04¼, 2:02¾, 2:04¾.

Furniture Manufacturers' 2:08 trot, purse $5,000:
Peter Scott, br h by Peter the Great (Murphy) 2 1 1 1
Worthy Prince, b h by Prince McKinney (Cox) 3 2 2 2
King Clansman, br h by The Clansman.....
.....(McMahon) 5 3 4 3
Duchess (McDonald), Reugens (Rodney), Wilgo (Marvin), Lucille Spier (Shank), Peter McCormick (Shuler), Bonington (Geers) also started.
Time—2:04¾, 2:05¼, 2:05½, 2:05½.

2:03 pace, purse $1,000:
Flower Direct, b m by Direct's Star..(Whitehead) 1 1
Braden Direct, bl h by Baron Direct.....(Egan) 2 2
Earl Jr., gr h by The Earl.....(Cox) 3 3
R. H. Brett, b g by Waponce.....(Grady) 4 4
Time—2:00¾, 2:02½.

2:04 trot, purse $1,000:
Margaret Druien, b m by Peter the Great....(Cox) 1 1
Joan, br m by Directum Spier.....(McDevitt) 2 2
Bright Axworthy, b g by Axworthy.....(Murphy) 3 3
Star Winter, b g by Ed Winter.....(McDonald) 4 4
Time—2:06½, 2:05¼.

Third Day at Grand Rapids.

Grand Rapids, August 11—With neither Russell Boy nor Single G. to go up against today, Hal Boy was installed as heavy favorite in the Comstock stake for 2:12 pacers, but life on the Grand Circuit for the plucky little western horse and his trainer is just one blamed thing after another—and today it was Judge Ormonde, the black pacer from Columbus, who reeled off three miles in 2:03¾, 2:04¾ and 2:03¾, being closely driven out in each of the two fast heats by the Hal B. gelding, Lillian K. securing the place in the second time out.

The Pastime Stable scored another win in the Matron stake, Professor Andrews piloting Rusticoat to victory in two nice heats in 2:08½ and 2:08¼, Native Spirit keeping him company the first time and Henry Todd driving him out in the fast one. The Eno evened up with St. Frisco for his defeat by the latter at Kalamazoo, but Marse Ed and his lad were right there all the time.

The race that pleased the natives was the 2:12 pace. Murphy took Jean to the wire in front for the first mile in 2:06½, with the local mare Polly Ann at his heels; in the second Clark turned the tables and won out in good shape, annexing a winrace record of 2:06¼ and putting quite a bit of cash into circulation among the home folks. The summary:

Grand Rapids, August 11.
2:16 trot, purse $1,000:
The Eno, ch h by The Native.....(Floyd) 1 1 1
St. Frisco, b h by San Francisco.....(Geers) 2 2 2
Tommy Todd, b g by Todd Mac.....(Snow) 3 3 7
Cacus Star (Hall), Todd McGregor (Rodney), Jeannette Speed (Cox), Loe Blossom (Wall), Col. Riser (Brennan) also started.
Time—2:09¼, 2:09¼, 2:08¼.

The Matron, three-year-old trot, purse $7,500:
Rusticoat, ch c by Axworthy.....(Andrews) 1 1
Native Spirit, b f by Native King.....(Cox) 3 2
Henry Todd, b g by Henry Setzer.....(Lasell) 2 4
The Colorado Belle (Serrill), Humpfast (Wisher) also started.
Time—2:08½, 2:08¼.

The Comstock, 2:12 pace, purse $3,000:
Judge Ormonde, bl h by Ormonde.....(Valentine) 1 1 1
Hal Boy, b g by Hal B.....(M. Childs) 2 11 2
Lillian T., bl m by Roy Patchen.....(Wilson) 5 2 3
Hal S. (Murphy), Queen Abbess (White), Lustrous McKinney (Rodney), Thistle Patch (Snow), Hal Connor (Geers), Bill Hurst (Hathaway), Camelia (Cox), Pat Carmody (Whitehead), Miss Miriam (McMahon) also started.
Time—2:03¾, 2:04¾, 2:03¾.

2:12 pace, purse $1,000:
Polly Ann, b m by Alstrath.....(Clark) 2 1 1 1
Jean, b m by Flosko.....(Murphy) 1 2 6 2
Altawood, gr m by Altonwood.....(Valentine) 8 3 2 5
Patrick M. (Stokes), Prestolite (Geers), Crescent Simmons (McCarr), Major Byers (Cox), Fleeta Dillon (L. Shuler), Flaxy B. (Cares) also started.
Time—2:06½, 2:06¼, 2:07½, 2:09½.

Fourth Day at Grand Rapids.

Grand Rapids, August 12.—The weather early in the week was too good to last, and today there came the visit of Jupiter P. Luvius that horsemen have grown so accustomed to of late. The entire card was carried over and, weather permitting, will be raced later in the week.

—o—

Members of the Santa Ana Driving Club held their second matinee of the season last Saturday and had the three things that combine to make a truly pleasant afternoon of sport—good weather, good attendance and good crowds. E. F. Hall with Maude C. won the mixed event at a half mile and W. R. Murphy put over two winners, taking the 2:20 class with Dr. H. J. Stevens' Doctor S. in 2:20½, and the 2:25 class with Chas. Morgan's Maggie M. in 2:19. Another matinee is planned for some time in September and the plan to hold a county fair in October is steadily gathering supporters. Here's luck.

◆ ◆ ◆

The breeding season is drawing to a close and it is a remarkable fact that in view of the strong European demand for horses, and which must continue for some years to come, so little breeding of useful animals has been done by our ranchmen, although the best of our most serviceable mares have been coupled. There is bound to be a great scarcity of horses here in the west before the thing is all over. The war trade has not ceased although it has its spasms of open and shut demand. Buying is likely to continue for several years yet for even after the cruel war is over the call will still be for more horses to go to Europe and there is likely to be a stiffened Mexican demand after they get through scrapping down there. We will also have a continued call for the opening up of the west, for the iron horse is not going to do all of the development work that the years have in store for us. With the return of good times and renewed activities in irrigation development we will need more heavy horses than are available at the present. A horse can not be grown in a season like a bean stalk.—Field and Farm.

Matinee and Butchers' Day Race

Owing to the fact that many of the regulars among the matinee horses were entered in the butchers' day races scheduled for Wednesday, the card for Sunday's matinee was limited to four events, which furnished pleasant entertainment for a fair crowd of spectators. There was less wind and more sunshine than has usually been the case at the P.-P. I. E. course, both features being duly welcomed and fully enjoyed.

The 2:18 pace had the largest field of the afternoon, with six starters, J. C. Simpson and Lady Listole stepping out in front of the bunch. The Lady showed them the way around the last turn but couldn't stand off the rush of Emma M. and Hamburg Belle, the latter winning in a nice drive. Emma hooked in for another try in the second but made a break in the stretch, the Belle winning handily from J. C. Simpson.

In the free-for-all pace Senator H. did an Art Smith stunt on the turn and the feeling was evidently "catching," as Delilah and King Pointer followed suit, Mabel Dillon staying on her feet and going from last to first before reaching the quarter pole. Delilah was the first of the aviation corps to come to earth and set sail for the leader gamely but futilely, Mabel winning with plenty to spare. Next time out Mabel took to the air on the turn while the others stayed pacing, Delilah having a fairly easy win. Delilah went away in the lead in the final trial, Mabel Dillon going into second place owing to breaks by the other two. Burton brought his mare up around the turn and outstepped Delilah in the stretch, Senator H. coming up inside and grabbing the place.

Burton drove his second winner of the day in the free-for-all trot, Muggins being on the trot all the time and having no great trouble in annexing two straight from Birdeye and St. Patrick, the latter breaking under the drive in each heat.

The feature event of the day was a special match between Bradmont and Happy Dentist, two genuinely gentlemanly fun horses, the former piloted by Fred Purner of the Chronicle and the latter ably teamed by Leon Wing of the Examiner, the writer sending 'em away, as Starter Ryan was barred, being the owner of Happy Dentist. President Geo. Giannini, who pays Bradmont's bills, was also requested to leave the stand during the race that no breath of scandal or collusion—not collision—might attach itself thereto. Wing had been practicing during the week but Bradmont was a one to two favorite, the syndicate book writing tickets on Happy at six to five. Purner had instructions to trail to the head of the stretch and then pull out for a Murphy finish, but forgot how close he was to trail and allowed Wing to open up a big lead early in the mile, Happy going to the quarter in :31½ and the half in 1:06. Coming around the turn Purner and Bradmont began moving along and came a fast last quarter, but couldn't cut down Happy's big lead, the old king-pin winning under the wraps in 2:15. Purner protested the race, claiming the starter had bet forty-eight cents on Happy and then deliberately given him the best of the start, but the preponderance of the evidence submitted tended to show that that official had never at one time been possessed of such a princely fortune and the protest was not sustained. The day in detail:

2:18 pace:
Hamburg Belle .....(Schwartz) 1 1
Emma M. .....(Malough) 2 3
J. C. Simpson .....(Goularte) 4 2
Lady Listole .....(Doran) 3 4
Tom Murphy .....(Ayres) 5 5
J. G. P. .....(Cerciat-Martin) 6 6
Time—2:15, 2:14½.

Free-for-all pace:
Mabel Dillon .....(Burton) 1 4 1
Delilah .....(Goularte) 2 1 3
Senator H. .....(Hanks) 4 3 2
King Pointer .....(Lercari) 3 2 4
Time—2:17, 2:15¼, 2:15½

Free-for-all trot:
Muggins .....(Burton) 1 1
St. Patrick .....(Schwartz) 2 2
Birdeye .....(Combatalade) 3 3
Time—2:15½, 2:14¾.

Sporting Editor's Special:
Happy Dentist.....(Leon Wing, Examiner) 1
Bradmont .....(Fred Purner, Chronicle) 2
Time—:31½, 1:06, 1:42, 2:15.

The varied program of races given Wednesday afternoon at the exposition track in connection with the special events of "Butchers' Day" attracted a good crowd of near four thousand spectators and proved interesting from start to finish. Adequate prizes were provided by the exposition management and none were awarded until after a hot contest had been waged.

All races were on the dash order and there were no repeats and no delays, the crowd having a run for its money right along. The 2:18 pace was the first race called, and Tom Murphy, on the pole, went away in front with Lady Listole lapped up and a number of others laying close. In the stretch there was a good brush and J. C. Simpson came through fast enough to win slowing up, with Hamburg Belle a nice second and Emma M. third. Matawan started in to make a runaway affair of the free-for-all trot, St. Patrick getting away slowly and Muggins and Birdeye both breaking on the first turn. St. Patrick gradually picked up speed and overhauled the fading Matawan several lengths from the wire, winning handily out in the clear.

The race for horses used in the retail trade aroused considerable dust as the entrants included none other than Adam G. 2:05½, now seventeen years old but doing service in the shafts of a business buggy in this city. A little heart to heart talk between the various owners and the judges led to Adam being drawn with amicable relations unshattered, but the jock had other ideas and endeavored to start on his own responsibility, the services of the marshal being required to instil other notions into his head. Edna S., a nice little brown pacing mare, gave evidence of the quality of horses in commercial service by winning handily in 2:32½, but what old Adam would have done to the field would have been "a sin and a shame."

The best race of the day was a quarter mile dash between a dozen stalwart members of the mounted police, riding service horses. They made a nice show in the parade to the post and finished in a bunch with a whoop and a holler for good measure, the judges having a little difficulty in picking the winner, Officer Smith, riding On the Carpet, being awarded first place after some consultation.

Jack and King Pointer went to the front in the early portion of the 2:15 pace, but Mabel Dillon answered a hurry up call down the inside passage of the back stretch and was never headed after once getting in the lead, Happy Dentist finishing strongly for place. The free-for-all pace had the closest finish of the lot, W. J. K. coming from behind after breaking on the first turn and nipping Dick W. in a sizzling brush to win by a head. Greatness would have been a closer contender had she not been carried wide in the stretch owing to a break by Vera Hal.

The Roman race by four of Uncle Sam's lads from the Presidio gave the crowd a diversion from the usual course and was won handily by Corporal Watts' pair, who had a bit the best of the start. The boys from "the yards" put up a hot quarter mile dash on cow ponies, Santos and Tom Mora having the legs of the bunch with Babe and Cowboy. W. J. Kenney did the starting of all events save the Roman race, which was handled by Lieut. Lewis Brown. The active judges were D. O. Lively, Jack Holland and John Nowlan, with Chief White presiding during the police fray, as he wanted to be sure there was no pulling among that bunch. The time was caught by S. S. Bates, Fred Clotere and Geo. Giannini, and the details are as follows:

Butchers' Convention Stake, 2:18 pace:
J. C. Simpson, b g by San Mateo...(Frank Goularte) 1
Hamburg Belle, b m by Stilwell.....(Al Schwartz) 2
Emma M., b m by Stilwell.....(Wm. Malough) 3
Tom Murphy, b g by Gossiper.....(Ed Ayres) 4
Victor Pointer, Aerolite Jr., and Zallan also started.
Time—2:15¼.

Master Butchers' Stake, Free-for-all trot:
St. Patrick, b g by Direcho.....(Al Schwartz) 1
Matawan, b g by Athadon.....(H. Cohen) 2
Muggins, ch g by Jack Hawkins Jr...(Frank Burton) 3
Birdeye, ro g by Birdman.....(A. Combatalade) 4
Time—2:19¼.

Retail Butchers' Cart race:
Edna S., br m.....(D. Belluomini) 1
Steve D., ch g.....(Jack Tassi) 2
Dandy, b g.....(Joe Bacciocco) 3
May Day, b m.....(John Dechler) 4
Time—2:32½.

Mounted Police Race, quarter mile (pedigrees not guaranteed):
On the Carpet, by The Commissioners (Officer Smith) 1
Fog Belt, by Wind and Water.....(Officer McTernan) 2
Jitney Jam, by Henry Ford.....(Officer Coates) 3
Gum Shoe, by Peanut Politician.....(Officer Hanley) 4

Also started:
Alibi, by The Suspect.....(Officer Coghlan)
Patrol, by Roundsman on the Beat.....(Officer Dolan)
Jail Bird, by Criminal Instinct.....(Officer Hawkins)
The Copper, by Political Appointment..(Officer Hanna)
Third Degree, by Desk Sergeant.....(Officer Lynott)
Stool, by Snitch the Squealer.....(Officer Pidgeon)
Small Book, by The Cigar Man.....(Officer Truitt)
Trusty, by Warden's Favor.....(Officer McLagy)
Time—:26½.

Deutche Metzger Verein Stake, 2:15 pace:
Mabel Dillon, b m by Sidney Dillon..(Frank Burton) 1
Happy Dentist, ch g by Nutwood Wilkes(Al Schwartz) 2
Delilah, b m by Zolock.....(Frank Goularte) 3
Jack, br g .....(Ed Ayres) 4
Palitea, Senator H. and King Pointer also started.
Time—2:12½.

Cavalrymen's Roman Race, three-eighths:
Caesar and Cleopatra.....(Corporal Watts) 1
Ben Hur and Claudius.....(Trumpeter Trummel) 2
Tiber and Rome.....(Sergeant Ashenfelter) 3
Pompeii and Vesuvius.....(Private Troutmiller) 4
Time—:40½.

Journeymen and Union Butchers Stake, free-for-all pace:
W. J. K., b g by Dexter Prince.....(Wm. Smith) 1
Dick W., b g by Athadon.....(Al Schwartz) 2
Greatness, br f by Peter Wilton.....(Doc Martin) 3
Vera Hal, b m by Expressive Mac.....(H. Cohen) 4
Time—2:10½.

Vaquero race, cow horses only, quarter:
Babe .....(Santos Mora) 1
Cowboy .....(Tom Mora) 2
Sealskin .....(E. P. Rand) 3
Freckleface .....(H. Nuchols) 4
Roughneck, Dell, Banjo, White Stockings and Snowball also started.
Time—:25.

—o—

Anyone in the market for a handsome, good sized stallion of the McKinney family can get a line on same by addressing E. O. Voyer, 219 Third street, Petaluma. The horse is eight years old and never trained regularly but can show a mile at the pace in 2:20.

NOTES and NEWS

he Grand Circuit crosses the boundary next week, campaigners on the big line being due for a fort- t's sojourn at Montreal.

◈◈◈

hree great days at Grand Rapids and then one a good one—for ducks. Salem has nothing on h G. C. tracks this summer for uncertain footing.

◈◈◈

ou Taylor has changed the base of his operations n San Jose to Hemet and is now taking his work he twice-around at the Hemet Stock Farm.

◈◈◈

. Olsen, whose address is 1450 Firty-sixth avenue, land, offers for sale through our business col- s a sound six-year-old gelding, a stylish, hand- e lad, that has shown a mile in 2:14 with little k. He is bred nicely and the ad may interest .

◈◈◈

ill Durfee took over San Jacinto 2:05¼ for ning when he returned to Los Angeles, and the evine telegraph reports that the son of Geo. W. Kinney turned the Durfee track lately in 2:03½. is a very fast horse and ought to be useful in l's hands.

◈◈◈

. Compton has a good green trotter at Santa Rosa, on of Lynwood W., that has made speed rapidly of . He has had no over-supply of training so far, on last Friday circled the Santa Rosa course in 7, with the last half in 1:04 and the final quarter :31½.

◈◈◈

One of the features of the Davenport races was contest between DeRyder Brothers with Miss fection and Spriggan, the former winning the first third heats in 2:09¼ each, while the gelding k the second in 2:11¼. Some of those present ught it was a hippodrome and Charles and Wil- n were haled before the judges to show cause y, wherefore, and so on—and evidently "showed" right, as they were not penalized.

◈◈◈

The Reno meeting, which has been a gratifying cess for a starter under the new regulations in vada, comes to a close today and the bulk of the rses will arrive here early in the week to prepare the opening of the Golden Gate Thoroughbred eeders' Association meet next Saturday at the position track. Quite a delegation of runners are eady on deck and the opening day card will be good one.

◈◈◈

Hal McKinney 2:06¼ is "quite some pacer" over e two lap tracks this season for Bob Sebastian and s been paying dividends pretty steadily—as a atter of fact, Bob's horses are all staying in the oney pretty regularly. Down at Wahoo, Nebraska, e nine-year-old son of Hal B. hung up a new state cord by pacing three heats in 2:08¼, 2:09¼ and 07¾, Columbia Fire and Sir Lain keeping him ose company. Fred Ward's horses also gave good count of themselves at the same meeting.

◈◈◈

The Grand Circuit campaigners showed their ap- reciation of good weather Tuesday afternoon at rand Rapids by hanging up what looks like a record the matter of average time for a four event card. he 2:08 pace was reeled off in 2:04¼, 2:02¾, .04¾; the 2:08 trotters went their routes in 2:04¾, :05¼, 2:05½; the 2:04 trotters went in 2:06½, :05¼, while the 2:03 pacers could only do 2:00¾, :02½—and William and Directum I. were in the arn! The eleven heats average just a trifle slower han 2:04¼, which is certainly moving along some.

◈◈◈

With the retirement of J. J. Gethin from the man- gement of the Riding and Driving School, S. E. ramer assumed control of the popular establish- ent at 701 Seventh avenue, which will be known enceforth simply as the San Francisco Riding chool. Mr. Kramer has many friends among lovers f the bridle path and show ring both here and in ther cities of the coast, and will leave nothing un- one to insure the success of the school. Improve- ents under way mean an increase in comfort and fficiency which will be appreciated highly by the atrons of the school, and many pleasant special eatures are planned for future entertainment.

◈◈◈

As there is to be no fair this year at Santa Rosa nd consequently no opportunity offered, as usual, for he marking of any young stuff, the Sonoma County Driving Club, of which M. D. Forsyth is secretary, will hold a record meeting on Saturday, August 21, at the track at Santa Rosa, at which time a number f local horsemen will put some new ones in the list. On Sunday, August 29, the club will also give a mat- nee at the same track, staging four or five harness aces for Sonoma county horses, there being plenty available to insure a nice card. The afternoon's sport will be varied by an exhibition by Joe Ryan's famous guideless pacer, College Maid, as well as some field stunts by the members of the U. S. engi- neering corps who are encamped at the track.

Charley Spencer, who will race through the north- west, expects to ship from Pleasanton about the twentieth of this month, going first to Baker, Oregon. Will Duncan is another Californian who will take in a number of meetings in that section, and the Silva- Daniels horses left for Vancouver some days ago.

◈◈◈

The many California friends of F. D. Meyers, formerly of Hemet, will regret to learn that he has decided to remain at his old home in Pennsylvania where his business interests are centered, this course causing him to seek a buyer for the great brood mare Bonnie Ailse 2:08½ and her two filly foals by Wilbur Lou (3) 2:10¼, one a two-year-old and the other a suckling, all now at Hemet Stock Farm. Bonnie Ailse is the dam of those good young things in Will Dur- fee's stable, Contention B. (3) 2:08¼ and Carlschen (2) 2:23, and with her Wilbur Lou foals should be worth much more than the moderate price asked. Particulars appear elsewhere, and communications addressed to Mr. Myers in care of this office will be properly cared for.

WAHOO, NEBRASKA.

July 29.—2:24 trot, $400:
Charm King, b m by Norval King.....1 1 2 2 1
El Bel Maden, b m by Almaden D.....3 2 1 1 2

Time—2:06¼, 2:08¼, 2:10¼.

GOOD ENTRY LISTS AT SPOKANE.

Five harness races have been filled for the big meet of the Spokane Interstate Fair during the week of September 15.

These events include 18 entries in the 2:25 pace, 13 in the 2:18 pace, 10 in the 2:11 pace, 11 in the 2:25 trot and 10 in the 2:15 trot.

For two years there has been no harness races at the Spokane Interstate Fair, and the filling of so many under conditions existing is a surprise to horse- men and assures a good meet.

On Friday, Sept. 17, Derby Day, the 2:25 pace, with 18 starters, the big event of the harness meet, will be called. It looks as though it would be the best race of the meeting, for the entries comprise some of the best green pacers in the Northwest. More horses have been trained at Spokane and more have been entered here this year than in the past ten years, proving the revival in the interest in the light harness game.

The harness races will begin on Thursday, Sept. 16, and continue through Saturday. Monday and Tuesday have been set apart exclusively for automo- bile races, while Wednesday will be devoted to the starting of the men's $1,250 relay race, the ladies' relay race, novelty and feature races.

On Thursday, Sept. 16, the 2:25 trot and the 2:16 pace are slated, and on Saturday the 2:15 trot and the 2:11 pace will be put on.

Horses are entered from Montana, Washington, Oregon, California, British Columbia and Saskatch- ewan, and the best on the northwest circuit will be seen here.

The entries, officially announced by Secretary Geo. P. Larsen, are as follows:

2:25 trot, purse $750—Al McK., b h, J. A. Bush, Spo- kane; Claud Woodford, blk h, Thos. Battell, Moose Jaw, Sask.; Hops, blk h, E. N. Townsend, Dayton, Wash.; Peter R., b h, W. C. McDooley, Sprague; Hallie D., b m, Mrs. L. W. Watts, Portland; Monte Carlyle, blk g, W. F. Sheets, Walla Walla; Floradora Z., br m, P. J. McCor- mick, Seattle; Zombrowno, b g, Fred T. Merrill, Portland; Novella, b m, J. B. Stetson, Portland; Amy McKinney, blk m, A. A. Fidler, Haines, Ore.; Perrico, b g, Zeigler & Moisner, Portland.

2:18 pace, purse $750—Molly, b m, M. Leggett, Hanford, Cal.; Truxton King, ch h, W. C. McDooley, Sprague; Sis- ter Norte, b m, Wm. Gumm, Spokane; Frank Zolock, ch g, John Lance, North Yakima; Hal Edo, b m, W. S. Abbott, Portland; Scarlet Trent, b h, L. Thompson, Re- gina, Sask.; Roxcy Hal, gr m, John Hoffman, Salem; Lot- tie Dishman, gr m, J. J. Bartholomew, Reardon, Wash.; Jennie May, br m, O. Squires, Portland; Dan L., b g, J. A. Bush, Spokane; Spanlock, blk h, J. E. Marshall, Union, Ore.; Chestnut Hal, ch g, J. R. Daily, Missoula, Mont.

2:25 pace, purse $750—Tosoro, b m, C. A. Harrison, Se- attle; King Zolock, b h, Ed. Dennison, Portland; Glad Wren, blk m, Al. Mitchell, Vancouver, B. C.; Cold Star, b g, J. A. Lytle, Waterville, Wash.; Lena Patch, blk m, A. J. Brown, Gresham; Gazelle Deer, b m, Thos. Huson, Spokane; Teddy Ham, blk g, C. S. Turner, Davenport; Nellie J., b m, D. H. Young, Sprague; T. R. McGregor, b h, J. V. Shaw, Sprague; Maud Defiance, br m, J. G. Sewell, Walla Walla; William C., s g, Wm. Duncan, Co- lusa, Cal.; Heigh Ho, br h, A. R. Cooper, Vancouver, Wash.; Royal Express, b h, Mary Kimball, Union, Ore.; Sally H., b m, F. V. McCarthy, Salem; Nigger Boy, blk h, John Lance, North Yakima; Hal Bear, b g, Hall & Brese- len, Portland; Tillamook Maid, blk m, W. F. Shultz, Forest Grove, Ore.; Courtney W., blk g, Thos. Battell, Moose Jaw, Sask.

2:15 trot, purse $750—Frisco, ch g, John Lance, North Yakima; Margerite A., b m, P. J. McCormick, Seattle; Dan Mathews, b g, B. Thompson, Regina, Sask.; Nuristo, br h, Alex Brown, Pleasanton, Cal.; Bonnie Ansel, b m, Chas. Spencer, Pleasanton; Oakland Moore, b g, G. K. Howett, Portland; Wild Girl, b m, Mrs. Sadie Keyt, Salem; Heartwood, blk h, Thos Battell, Moose Jaw, Sask.; Sargo, b g, Brooker & Bluerock, Vancouver, Wash.; Bitter Root Rose, blk m, A. Goff, Corvallis, Mont

2:11 pace, purse $750—Bonnie Antrim, b g, C. Todd, Portland; Glen Rose, blk m, John Roberts, Spokane; Hal Edo, b m, W. C. Abbott, Portland; Recall, b h, John Lance, North Yakima; Big Squag, blk m, E. N. Jones, Spokane; Ella Erickson, b m, John R. Jennings, Victoria, B. C.; Red Hal, b h, Fred T. Merrill, Portland; Ed Kar- nack, ch g, J. R. Baily, Missoula, Mont.; Soumise, b m, M. Leggett, Hanford, Cal.; Parkwood, b h, Mrs. Mary E. Kimball, Union, Ore.

Drink Jackson's Napa Soda.

HOW TO BECOME A TRACK SUPERINTENDENT.

Manager The Horseman's Correspondence School: Have just been appointed Track Superintendent for our coming fair, but the only experience I have ever had in the way of tracks, was to built a two-foot patch from the kitchen door to the hencoop for my wife, my regular business being a bartender, but I think with a few instructions from your department I could ride the burrow without being thrown off. Yours, G. I. N. Slinger.

You have had a larger experience in building tracks than you really give yourself credit for, as outside of that track to the hencoop, which you built to keep peace in your family, you have built tracks to that hot place where his highness, the Devil, is king, for many who rested their foot on the third rail of your bar and ordered liquid fire in wholesale quantities (we are not preaching prohibition, but only trying to prevent you from hiding your track building experience under a bashful attitude). The race track sometimes leads to fire and you will almost think the same way when you get done hearing the compliments handed you during and after the fair.

If you have a kind hearted and mild disposition and do not take rough and uncouth language too seriously, you will be a success in taking care of a track, but if you resent everything said to you, a course in prize fighting will help you a lot before the week is over. You must remember that the driver of every horse in each race who does not win, blames you for his defeat, because if the track had been good the horse would have won. These drivers of course do not figure on how the winner got there first over the same track. If you hang around the hotels and stopping places at night, you will hear lots of remarks such as: "I could have beaten that horse easily, only I stepped in a hole on the back stretch." These drivers never find holes on the home stretch, the judges' stand is too near.

You should take charge of the track not earlier than the morning before the first race. Walk around it and look wise, there will always be a number of hangers-on present to cheer you on your way and to greet you at the finish of your round. As soon as you arrive back at the front of the grandstand, join these loitering groups and tell them in what a rotten condition the track is. A lot of horses may have been training over it all spring and negotiated some fast miles, but this fact need not interfere with you in expressing your opinion of its being in rotten condition and tell everyone that you intend making it the fastest track in the world.

You then order out or take out the team hooked to a harrow, drive the teeth down in this, until they extend about six inches; this will give you a good, strong bite on the bit of earth and when you look back at your work, you can easily see that the harrow has got its work in good and strong. Have no compunction about tearing up the nice cushion already on the track, as the man who put it there was ignorant and your expert knowledge is worth much more. The track will look like a ploughed field when you get through harrowing, but never mind, you have your own ideas on the subject.

After you have the track in good round cussing condition, put on your scraper and drive the wrong way of the track, starting on the outside, and by the time you have reached the pole there will be a nice hill formed for the pole-horses to beat down when scoring and racing. The drivers of these horses will be tickled to death that they drew the pole. Of course, after the thorough scratching up you give the track it will be nice and rough for the horses and drivers, but help the tire and sulky company to make a better living.

After you get through with the scraper, get out your water wagon and give the track a good soaking; this will help to smooth it out, as you know mud always runs, and if you have it in splashing condition everybody will be joyful. You will be unable to put the harrow on so deep the next day, as by that time the drivers have themselves together and have already formed resolutions that may result in bodily injury to yourself if you persist in farming during the race meeting.

You should be a good weather prophet and if it looks like rain any night before the races, soak the track well, as you know the more water there is on the track, the quicker it will dry. Your cart, assisted by the rain, will give you a splendid duck pond for the drivers and judges to talk over next day. This will also give you a chance to work original ideas on drying as well as to find out how many friends you have in the community among auto riders, because when you ask them to ride around the track and beat out the water, many will not appreciate the job, as muddy gears are hard to clean and the fact that you refused them passes into the grounds will also have a tendency to make them bashful.

With all this mud on your hands to dry up, you will see the advantage of scraping up that hill of dirt around the pole, as it prevents the water from running into the ditches, and when the balance of the track is dry, you will have about five feet of slippery dirt around the inner fence, which is fine to drive over. The horsemen may interview you and speak harsh words, but the world is large and you can tell them that you did not invite their presence. This kind of talk makes you popular and will also help the secretary to get entries next year.

You can also make yourself popular, by being on the track with your water-wagon, harrow or scraper, while most of the horses are being warmed up, as it is very pleasing to the drivers to round a turn suddenly and find you and your team plodding along. They must pull up their horses for safety's sake, but you are the boss and your association is giving them money to race for. If they do not pull up in time and injure the horse, it is not your loss as the driver should look where he is driving. Be particular in selecting a slow moving team.

If conditions require that you scrape or brush the track between heats, this slow team will give the judges and crowd plenty of time to admire your way of doing business. Then when you mount the throne of your water wagon between heats, always endeavor to have a leaky cart, stop still often, thus allowing patches of wet and slippery mud to accumulate on the track, as this is a splendid idea, since it teaches many horses to become expert hurdlers. The drivers also like these wet spots, as it gives them a chance to exercise their authority over the horse, although sometimes it does prevent them from getting money.

If at any time during the meeting you become tired of working the track and taking the impudent calls from judges and horsemen, you can hire a substitute. If you select the proper man for this job you can have a lot of fun. Pick out some foreigner that does not understand the English language, and then let everybody yell at him as they please. He does not understand and will obey your orders only. Many track superintendents have a lot of fun this way and escape direct criticism. Another thing that drivers and horses both like is to have a watering cart come on them unannounced and sprinkle them well with water. You can see their faces (the drivers') wreathed in smiles that portend damage if you are within reaching distance.

When you get through with this job you will find there is more safety in building a track to a hundred hen-coops, even if your wife is bossing the job. These pointers on bossing a track during a race meeting may help you a little, so good bye and may luck be with you.—W. H. Shields, in The Horseman.

SHOW DATES AT THE EXPOSITION.

From September 30 to December 3, the Panama-Pacific International Exposition at San Francisco will be the scene of a succession of live stock shows which, it is believed, will surpass any ever held in the United States, or even in the world. From the list of those who have already signified their intention to participate, it is assumed that in all the shows animals and poultry of the finest quality, and in large quantity, will be represented. Almost half a million dollars have been appropriated for the live stock features of the exposition. The exposition itself has apportioned $190,000 for cash prizes for live stock and horse show; forty-five breed record associations have set aside $100,327 for special premiums and the commissions of various states have appropriated a total of $150,230 for participation of live stock from their respective regions. The quarantine has been raised in practically all the states and stock shipments can now be made without restriction.

The fact that the exposition is now on a sound financial basis, its net profits increasing monthly, assures the carrying out of the extensive preparations made for shows, which will be as follows:

Horses, mules and asses—Sept. 30-Oct. 13; entries close Sept. 1, stock received Sept. 25.

Cattle, beef and dairy—Oct. 18-Nov. 1; entries close Sept. 15, stock received Oct. 15.

Sheep, goats and swine—Nov. 3-Nov. 15; entries close Oct. 1, stock received Nov. 1.

Car lots of live sheep—Nov. 11-Nov. 14; entries close Oct. 10, stock received Nov. 10.

Poultry and pigeons—Nov. 18-Nov. 28; entries close Oct 15, stock received Nov. 16.

Dogs, cats and pet stock—Nov. 29-Dec. 1; entries close Oct. 25, stock received Nov. 27.

Children's pets—Dec. 1-3; entries close Nov. 15, stock received Nov. 27.

During their stay at the exposition, the various kinds of stock will be housed in stalls and pens constructed along the most improved lines of sanitation and convenience, which in themselves will be instructive exhibits. There will be no charge for stall or pen rent, but there will be a nominal fee for receiving, cooping, benching, feeding, exhibiting and returning poultry, pigeons, dogs, cats and pet stock. The exposition will protect exhibitors from overcharge by providing them with feed at cost price.

Inasmuch as some exhibitors may wish to ship stock of various classes all at the same time, Chief D. O. Lively, of the exposition live stock department, through the courtesy and co-operation of the California State Agricultural Society, has arranged to make use of the state fair grounds at Sacramento, Cal., as a temporary depot for such shipments, where they can be cared for while awaiting the time for their reception at the exposition. Special arrangements have to be made with Chief Lively by those desiring to avail themselves of this convenience. While at the Sacramento depot, there is no charge for the sanitary stalls, pens or water or other facilities.

Special live stock trains will be sent from Chicago, Kansas City, Omaha and other central points direct to San Francisco.

On the exposition grounds, every convenience and every safeguard for health has been provided by the exposition management for live stock. Being now on a profitable financial basis, the exposition is abundantly able to carry out all its projects. That its net profits are increasing rapidly is shown by the f that for the last three weeks of July they amoun to $210,243.09, which is more than the entire profits for the first twenty weeks of the exposit period. The gate receipts show a steady gain fr week to week.

Arrangements have been made with the Transc tinental Freight bureau and the Pacific Freight Ta bureau by which the roads party to them will ret live stock sent to the exposition free of charge, I vided the outgoing freight and terminal charges ha been paid in full in advance. On similar shipme not returned, a rebate of 25 per cent will be made.

While the competitions for premiums will not c mence until Sept. 30, many fine animals have be on exhibition throughout the exposition period. Pro inent among them are displays of Percheron a Shire horses, Berkshire hogs and dairy cattle, alsc fine poultry exhibit.

REFINING A MULE.

The mayor of a Missouri city has offered a rewa to any person who will keep a mule from braying night. We have no hope to hold out to the may We once thought we knew a sure cure for a mule affected, but now we do not even feel competent give advice on the subject. It takes a person w great depth of character to refrain from giving vice, especially on a subject he doesn't know a thing about. On the subject of braying we no long pose as an authority.

We had read in a paper when we were a boy th a mule could be made to give up its craving for so by tying a stone to its tail, the article pointing that a mule could not bray unless it could raise tail. When a neighbor came to us one day sayi that his mule did not rest well at night we quick volunteered to cure it. In our younger days we we ready to right every wrong. The first moment t mule lifted its voice on the evening quiet we pick up a stone, wrapped it with baling wire and slipp out to the barn where the mule was tied in a sta Opening the door we stepped inside and put our ha on the mule. Its back bent up like a spring, but did not stop to think about that. Then we beg tying the baling wire to the animal's tail. So pro were we that we were doing something to help alo mankind that we hummed a tune as we worke After we had fastened the wire to the part of t creature's anatomy just mentioned we stepped ba to contemplate our work and to think what a lar sized wrong we had righted.

Then things began to happen that had not occurr to us before. We noticed that the mule had gather its four feet closer and closer together, like a c standing on a saucer, but the significance of this d not dawn on us. It did not occur to us that t creature would do anything unworthy of itself. would surely know that we were doing this for own good, but we had reckoned without taking in consideration a mule's ingratitude. We started reach out our hand to calm the creature's troubl spirit, but our hand never reached its destinatic In a moment we found ourselves on the ground o side the barn, having left by way of the wall. board crashed beside us. Before we could get the whole end of the barn came over and got dov on the ground beside us—the stone was still hangi to the mule's tail. The stall came flying out, too, we got up and crawled away. Then all was silenc and we knew that the stone was off the mule's tail.

We worked our way over to where the mule w still tied. It was peacefully standing there, calm munching hay, as if nothing had marred its evening quietude. Softly we stole away, leaving the creatu to its own reflections. That is the reason there no need of anyone coming to us and asking us cure a mule of braying in the night. We are no content to leave a mule to its own devices, and to a mayors we give out the word that we have disco tinued the mule branch of our business—Kansas Ci Star.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

CALIFORNIA GAME RESOURCES.

[By Harold C. Bryant.]

The American white-fronted goose, or speckle-belly goose, as it is usually called by the hunters, is a much prized game bird in California. It is found throughout central and western North America and northeastern Asia. The species breeds on and near the Arctic coast from northeastern Siberia east to northeastern Mackenzie and south the lower Yukon valley. The winter season is spent in the southern half of the United States and northern Mexico in North America, and in China and Japan in Asia. On the Pacific side of North America the winter home occupies the area lying between British Columbia and Lower California.

The white-fronted goose is a common winter visitant to suitable localities throughout California, but is most numerous on the plains and in the marshes of the Sacramento and the San Joaquin valleys. This goose is the first one to arrive in the fall and the last one to leave in the spring. The early arrival of this species is doubtless responsible for the newspaper articles regarding the predictions of an early winter which are so commonly offered by the local riseacres. The species has been recorded as early as September 7 and as late as May 3.

The white-fronted goose is sufficiently different from other geese to make it easy of identification. The speckled or blotched lower surface, giving rise to one of its popular names, "speckle belly," and the conspicuous white forehead are distinctive features. Additional characters are large size, wholly dark wings and upper parts, light colored bill with edges of mandibles separated, giving a peculiar grinning expression to the birds, and the reddish yellow feet. The very loud, harsh calls are stated by hunters to be of peculiar quality.

This goose breeds abundantly in Alaska. The nest is a small depression with a slight lining of grass, moss and down, and is usually placed on the grassy border of a small lake or on a grassy islet. The maximum number of eggs in a set appears to be seven. The young are guarded by both the male and female parents.

Indians imitate the call of this goose by patting the mouth with the hand and pronouncing the syllable "wah." The species is sometimes called "laughing goose," not only because of its grinning expression, but also because its notes are said to resemble the laugh of a man.

The white-fronted goose is said to drop into its feeding grounds from high in the air by almost tumbling downward head first, the members of the flock forming a cataract of whirling life until within a few feet of the water, and uttering at the same time a constant gabble. As contrasted with this the Canada goose descends in long, curling lines, and the snow goose "slants in."

During the middle of the day white-fronted geese usually loaf on some body of water, doing their feeding early in the morning, in the evening, or during the night. The flights to the feeding grounds are oftentimes very regular, the time of arrival and departure not varying more than fifteen minutes. During periods of stormy weather these geese often fly over in large flocks, apparently with no definite object in view other than a change of feeding ground.

The food of the white-fronted goose is made up almost entirely of grass. It is not averse, however, to feeding on sprouting grain, and in years past it has been responsible, along with other geese, for considerable damage to grain.

The speckle-breast is one of the most highly prized geese for food and is a common bird on the market. This species is said to be easily approached by the gunner, and so is readily procured. Pits dug in the ground in localities where the birds are known to fly regularly are most commonly used as blinds in hunting them. Otherwise some ruse, such as hiding behind a grazing steer or horse, must usually be resorted to in order to make a good kill. This method of approach is called "bull hunting." Hunting of this sort allows of unjustifiable slaughter, hundreds of geese sometimes being killed by four shots from a large bore gun.

The market demand for this species, as well as the ease of capture, has been instrumental in greatly reducing the numbers. There is probably not now more than one bird to a hundred that were formerly found in this State. Geese have received no protection whatever, and since their numbers are concentrated in this State during the winter season a false idea of the real numbers of these birds has become current. California is responsible for the care of most of the geese in the western part of the North American continent. It is high time she gave more than a passing thought to the possibility that at her door will be laid the blame for the near extermination of several species of geese. The federal migratory bird law has finally come to the rescue and there is now a close season on geese. The most needed additional step is a bag limit law.

EXHIBITING DOGS.

In exhibiting dogs, as in other walks of life, there are some that will succeed and others that will fail. Why some fail and others succeed is not always easy to explain especially by those who fail, but the onlooker who sees most of the game can usually tell the story or come near to fixing the true reasons. These reasons may be many or they may be few. Many fail perhaps for small faults, and few will suffice to cause failure if the faults are serious ones.

The infinite capacity for taking pains has much to do with success in winning with dogs on the bench, and the want of it is responsible for many of the losses. The novice comes into the fancy with a rush and expects by weight of money and buying his winners to carry everything before him, but if this is not backed up by real knowledge that he is smart enough to pick up as he goes along, his time is short; his purse must be long to pay the expense of keeping on the top. Some become shrewd and learn to breed a few; then interest increases and the pride in his own prowess keeps the owner at it. But if the novice remains a buyer and wins with his purchased dogs sufficient prizes to satisfy his craving for notoriety he is likely to leave the game as it becomes too easy.

There is another sort of buyer who buys recklessly and does not do much winning. He soon leaves for other pursuits, knowing very little more when he leaves off than when he began about the real art of dog showing or dog breeding. Those who succeed are of a different mould and begin as a rule more slowly, or, if they begin faster, are perhaps by nature more observant and more capable, and soon pick up enough real science to help them along. But the general average of successful ones are so because they have studied the subject and really know what they are trying to do.

In all branches of the fancy the successful ones are those that take infinite pains, and it goes without saying that in this case their dogs are put down in the ring in the finest condition possible, with every chance of winning. The best way to begin showing dogs is to start with the idea that the successes will be few at first. Remember that you are taking your best to meet every one else's best. The first essential to winning prizes is to obtain a good dog either by purchase or by breeding one, and the next essential is to learn how to keep the dog in show condition. Dogs out of condition are as a rule better kept at home till fit.

Nature has endowed some people with a more accurate eye, which becomes even better by practice, than others are blessed with. Some improve with study; others never have the capacity to judge between two competitors, no matter how long they stay in the game. It is unfortunate but nevertheless true that some ardent dog fanciers cannot judge their own dogs even after unlimited practice, and therefore are not competent to judge those belonging to others, and as often as not when losing the loser may be kicking hard from an honest conviction that he has the best dog, but in this case nature has not endowed him with the capacity of rightly sizing up his dog or that belonging to any other person.

When one begins showing dogs it is well to remember that one's opponents have been in the game a long time. As one picks up knowledge bit by bit he will learn the art of dog breeding and showing, bit by bit getting well beaten by the old hands that started ahead and learned their lessons before. When the exhibitor finds that he knows more than the other fellow he will be wise to use that knowledge quietly. If he underestimates his difficulties or the opponents' strong points he will probably fail.

THIBETAN SPANIELS.

From year to year new breeds of dogs are being popularized in this country, remarks an eastern writer on kennel topics. In the last few years we have seen the Pekingese and the Sealyham coming to the front as favorites. There is a new type that has come here only recently which soon may be making a bid for favor among the fanciers and it is a dog little is known about. At the present time there are only about ten in this country, and in England there are not more than threescore. This dog is the Thibetan spaniel, a dog that hails originally from the "forbidden" country.

Even Mr. Pfizer, who is specializing in these dogs, knows but little of their history. He obtained his from a British army officer, who had been in the forbidden city of Lhassa and had smuggled one of the breed to the outside world. Officers of the British army who had been engaged in expeditions to Thibet brought some of these dogs back with them to the home country and in this way the Thibetan spaniel has obtained a foothold in England, much in the same way as the Pekingese did when they were brought back from China by army officers in the time of Queen Victoria.

These dogs are a very odd looking sort. They vary in size and some of them are little fellows like "Pekes" and others are as big as water spaniels. The one thing that strikes you when you look at them is the wonderful coats they possess. When I saw pictures of these dogs the first thing that impressed me was the resemblance in head to a collie, even though they are small. When I saw them in the flesh at Mr. Pfizer's home the resemblance to the collie in a miniature way was strengthened. The chief point of this sort was the enormous ruff displayed by them. As far as the coat is concerned there is probably no dog that has a heavier growth of fur on its body than these. Their tails stick out like huge plumes and the general covering is very profuse.

This heavy coating is an exemplification of what nature does to protect animals. In Thibet, a very mountainous country, the weather is rather rigorous and the dogs need heavy coats to protect them from the icy blasts.

The small specimens of a solid color that Mr. Pfizer has do not look unlike a Pomeranian in the head expression, if the ears are held up. The ears, however, droop like a spaniel's. In every way they are very odd looking dogs, with characteristics of various types that one can pick out. They are very good watch dogs and of an affectionate disposition. When Mr. Pfizer showed his dogs at the Charity Show Mr. Muss-Arnolt, who judged them, said that he was perplexed as to which one he should give first prize to. He said that as there was no standard he was in a quandary as to which should be given the first prize. He finally decided to give the award to the one that had the closest spaniel traits.

Mr. Pfizer brought over his first dog of this sort to the United States from England in 1911, when Tweenie came here to start the breed in this country. She was in whelp at the time, and sofe of her puppies are now here. Two years after this Mr. Pfizer acquired a stud dog, Mr. Percy, and he has left his imprint on the breed with some mighty fine offspring. Mr. Percy is a black and white, yet he has been the father of solid color specimens. Although he is called black and white, Mr. Percy is more of a silver color as far as the light tint is concerned, and the dark part of his coloring is not exactly a jet black, but has a little brownish tint.

They are a breed of mystery, and it would be interesting to trace back the ancestry, but that is a thing that is practically impossible.

STEELHEAD IN WISCONSIN WATERS.

About fifteen years ago the gill net men of Lake Michigan began to find specimens of trout among their catch of a kind previously unknown to them. In later years these were taken in increasing abundance, until now they form a very important part of many a haul. Most of them are small, few if any exceed five pounds in weight. The quality of their meat is higher than that of the native lake trout of the Great Lake. The fish was promptly baptized "salmon" or "salmon trout."

What is this fish, and where did it come from? To settle this question, specimens were sent by the fishermen to James Nevin, superintendent of the State Fish Hatcheries, who in his turn sent them to the Zoological Department of the University of Wisconsin for determination.

Here an interesting story was disclosed. The fish undoubtedly is a "steelhead" trout, a form native to the streams entering the Pacific ocean in California, Oregon, Washington, and British Columbia, and never occurring east of the Sierra Nevada. How then came it to be found in our lakes?

A search disclosed that some thirty years ago, the United States Bureau of Fisheries planted several hundred thousand of steelhead fry in Lake Superior. In subsequent years others were planted in streams tributary to Lake Superior and Lake Michigan. But as there were no apparent results, the matter was forgotten. It is possible that these young fishes succeeded in holding their own, and to ascend the streams to deposit their eggs; and that their presence was overlooked until their numbers were greatly increased. But there is one very important fact which complicates the question. In the same region from whence came the steelheads there is a second trout, the "rainbow." This also has been "planted" in these waters, and in numbers many times exceeding those of the steelhead. In many of the northern streams it is a common fish, as also in Lake Superior. Now steelhead and rainbow trout vary greatly, and it has long been a question whether both are not the same species, altered only by the particular waters they occur in. Evidence is accumulating that this is the case. In Lake Superior it is often hard to tell whether any given trout is steelhead or rainbow.

So it may be that the large steelheads are after all not the descendants of the early plantings, but descendants of the rainbow. Either condition shall probably never be proved. But whichever may be the case, the State has a valuable addition to the fish resources of the Great Lakes, bound to play an important part in the future development of these resources.

From the native Lake or Mackinaw trout, the steelheads can be very readily distinguished by their silvery color, their somewhat larger scales, the number of black spots along their backs, and by their square tails.

CALIFORNIA-NEVADA TOURNAMENT.

Outshooting a field of sixty-one contestants last Saturday afternoon, Foster Couts of San Diego won the individual blue rock championship, the main event of the California-Nevada trapshooters' three-day tournament at the West Alameda blue rock range. The winning score was 96 out of 100 targets at 16 yards rise.

O. N. Ford of San Jose and Harry Lorenson of Newman tied for second place with 95 birds each. Lorenson won the shoot-off, 22 to 21. The winner will be eligible for the national championship match at Chicago next week, a $50 purse being the Interstate Association award upon his entry. Lorenson, the runner-up, will be entitled to the same coveted privilege should the winner not enter.

Seven handsome trophies were donated by the Interstate Association for the seven high guns in the championship match. The trophy winners were J. F. Couts, H. Lorenson, O. N. Ford, one, two, three; H. Pfirrmann, 94, F. M. Newbert 93, A. Julian of San Diego 93, and J. F. Downs of San Diego 93. A purse of $176 was divided between the above mentioned shooters, with the addition of Barney Worthen, Harry Balkwell, and Andy Flickinger, who each broke 92 birds—enough to get a small slice of the purse.

The main event was shot under the handicap of a heavy west wind that caused the clay pigeons to take all sorts of dips and turns. Several leading shots lost more birds in the seventh section than during the rest of the day.

H. Pfirrmann was high average for the three days with 578 out of 600 birds. O. N. Ford was second with 576 and J. F. Couts third, 575. The professionals were led by Hugh Poston, also 578, Lon Hawxhurst 568, Guy Holohan 564, and Dick Reed 564.

The forenoon program was five 20 bird events. Couts, Ford and Flickinger were high guns, 99 each.

The tournament started Thursday morning on the West Alameda grounds, under the auspices of the Golden Gate Gun Club, with a lively fusillade that required nearly 15,000 blue rocks to be trapped before the last shot was fired late in the afternoon. Weather and light conditions were favorable and a general average of excellent scores was the result.

The high squad for the day: W. G. Warren of Tonopah, Guy Holohan and H. Pfirrmann of Los Angeles, J. F. Dodds and Foster Couts of San Diego made the splendid average of 95 per cent in shooting at a total of 1000 inanimate targets, 200 per man. In the eighth event the squad smashed every bird trapped, in two other events they broke 98 out of 100.

H. Pfirrmann, the winner of the Pacific Coast Handicap at San Diego recently, shot in fine form and scored high amateur average for the day, 194 out of 200. J. F. Dodds, and Tom Wilkes of this city, tied for second high average, with 190 each. O. N. Ford of San Jose, Foster Couts and J. F. Downs of San Diego were third, with 189 breaks.

The total amount of purses and added money distributed among the high guns amounted to $800. Mrs. Ada Schilling of San Jose, Mrs. A. G. Wilkes and Miss Meyers of this city, shot through the 200-bird daily programme and made excellent scores.

The trophy events Friday, during the second day's session of the shoot, were a series of hotly contested shotgun skirmishes from start to finish.

Andy Flickinger turned his door-knobbed pump-gun loose in the second event and ran through three 25-bird frames without a miss. He was tied by Henry Garrison of Modesto, O. N. Ford of San Jose, "Red Shirt" Varien of Pacific Grove, H. Pfirrmann of Los Angeles, W. G. Warren of Tonopah, A. P. Haliburton of Lindsay, H. Brickell of the Family Club, and Dr. McGettigan of the Volante Club.

Shooting off the tie in the next event, "Flick" smoked 25 straight again, Billy Varien also put on the high for another 25 straight. The Vallejo star bird pulverizer lined out 25 again in the fourth event and the Pacific Grove shooter was one bird short.

This put Flickinger down for one win on the Sorenson champion gold medal. Varien had hard luck for a win-out here would have given him the medal permanently as he had the 1912 win to his credit.

The Peters trophy match, event three, was also finally annexed by Flickinger, who was tied by A. G. Wilkes, T. D. Riley and Varien.

O. N. Ford of San Jose had to run fifty straight for a win on the Hunter Arms trophy No. 1. C. N. Nash of San Jose, and Harry Balkwell of Stockton, shot off the tie with Ford, but lost out by a bird.

The Du Pont trophy was won outright by J. F. Couts, this being his second win; the San Diego crack also had to smother 50 birds before he shook on Toney Prior, Pfirrmann, Dodds, Hoelle and Flickinger.

Frank Newbert of Sacramento was also a two-time winner in the R. C. Reed trophy race. A. G. Wilkes, C. D. Hagerman of Los Angeles, Ford, W. G. Warren, Couts, Haliburton and Harry Ogelvie of Lindsay broke 25. Newbert shot a second tie with Hagerman and finally won out, 24 to 24 and 24 to 21.

Balkwell made a 50-bird sprint for the Roos trophy. Fred K. Burnham, N. A. Howard, Tom Wilkes, Emil Hoelle and Dr. McGettigan were the contenders in event six. The Stocktonian nosed out Hoelle by one bird on the shoot-off, 25 to 24.

George Anderson of San Jose won the Hunter Arms No. 2 trophy in a 50-straight argument. Prior, Warren, Ogelvie and Balkwell tried to outshoot the Garden City musketeer, but fell short, Prior was runner-up with 24, in the tie shoot.

The board of officers elected for the ensuing year were: J. W. Dorsey, president; G. H. Anderson of San Jose, vice-president; Clarence A. Haight, secretary-treasurer. Directors—H. Pfirrmann, Los Angeles, C. A. Julian, San Diego, A. G. Flickinger, Vallejo, W. S. Peace, Elko, Nev., H. Garrison, Modesto. F. K. Burnham, Martinez, and Tom Wilkes.

Long run trophy winners were: Du Pont—Pfirrman 103, 65, 68, 55, Tom Wilkes 108, 59, Ogelvie 68, Flickinger 97, 84, Willet 58, 59, Ford 103, 68, Balkwell 64, 73, Lorenson 53, Guy Holohan 58, Varien 56.

Hercules—Couts 79, 78, 118, 79; Poston 53, 52, 61, 84; Warren 60; Hawxhurst 69, 72, 52, 64; Newbert 56; Reed 59, 54, 72; Prior 56, 64; Anderson 50, Avery 59, A. G. Wilkes 53.

The scores for the three days' tourney follow.

Alameda Traps Close.—The final shoot of the year was held last Sunday by the Bay View Gun Club, and the winners were announced. Frank Webster was crowned champion for the year, Percy R. Fox won the Hercules trophy, Frank Blum secured the Du Pont trophy and Webster took the honors for the longest run of breaks during the season, 38 straight.

The scores in the final club medal race were: J. R. Foster 18 and 13 out of 20; F. Blum 17, 15; J. Millet 17; H. Wobber 17, 16; F. Webster 15; P. R. Fox 15; L. Vosburgh 15, 13; D. Best 14; L. Middleton 12, 9; Nelson 9.

Du Pont trophy—Best 14 out of 15; Fox 13, Wobber 12, Blub 12, Chichester 12, Webster 11, Vosburgh 9, Foster 8, Millet 7.

Hercules trophy—Foster, 13 and 12 out of 15; Fox 13, Blum 13, Nelson 12, Chichester 12, Wobber 11, 10; Vosburgh 11, Webster 10, Best 10, Millet 9, 9; Miss Houghawout 8, Middleton 8.

Merchandise shoot—Chichester 17 out of 20, Fox 17, Blum 16, Best 14, Millet 14, Webster 13, Middleton 12, Vosburgh 12, Wobber 11, Foster 10.

Grub shoot—Foster 9, Fox 7, Miss Houghawout 9, Chichester 10, Millet 6; total 45. Blum 7, Wobber 10, Webster 5, Vosburgh 7, Best 5, Nelson 6; total 40.

BRIEF HISTORY OF THE G. A. H.

00—Held at Interstate Park, N. Y., June 14.
). Heikes (22 yards) winner, 91x100. 74 entries.
01—Held at Interstate Park, N. Y., June 18.
. Griffith (19 yards) winner, 95x100. 75 entries.
02—Held at Interstate Park, N. Y., May 8.
. Floyd (18 yards) winner, 94x100. 91 entries.
03—Held at Kansas City, Mo., April 16. M. Diefrfer (16 yards) winner, 94x100. 192 entries.
004—Held at Indianapolis, Ind., June 23. R. D. till (19 yards) winner, 96x100. 336 entries.
005—Held at Indianapolis, Ind., June 29. R. R. ber (16 yards) winner, 99x100. 352 entries.
006—Held at Indianapolis, Ind., June 21. F. E. ers (17 yards) winner, 94x100. 290 entries.
007—Held at Chicago, Ill., June 20. Jeff. J. nks (17 yards) winner, 96x100. 495 entries.
008—Held at Columbus, Ohio, June 25. Fred Harc (16 yards) winner, 92x100. 362 entries.
009—Held at Chicago, Ill., June 24. Fred Shattuck yards) winner, 96x100. 457 entries.
910—Held at Chicago, Ill., June 23. Riley Thomp (19 yards) winner, 100x100. 383 entries.
911—Held at Columbus, Ohio, June 22. Harve on (20 yards) winner, 99x100. 418 entries.
912—Held at Springfield, Ill., June 20. W. E. llips (19 yards) winner, 96x100. 377 entries.
913—Held at Dayton, Ohio, June 19. M. S. Hootn (17 yards) winner, 97x100. 501 entries.
914—Held at Dayton, Ohio, September 10. Wool- Henderson (22 yards) winner, 99x100. 515 en-
s.

NATIONAL AMATEUR STATE CHAMPIONS.

Following is a list of the winners (and the runners-) of "The Interstate Association's State Amateur ampionship" at registered State tournaments held to August 7:

Alabama—J. K. Warren, winner; J. A. Blunt, runr-up.
Arizona—T. L. Eden—R. DeMund.
Arkansas—Tournament not yet held.
California—J. F. Couts—H. Lorenson.
Colorado—R. A. King—M. Weick.
Connecticut—C. Vanstone—W. W. Rice.
Delaware—A. B. Richardson—J. B. McHugh.
District of Columbia—Affiliated with Maryland.
Florida—No State Association.
Georgia—J. M. Barrett—W. H. Jones.
Idaho—E. C. Grice—E. M. Sweeley.
Illinois—C. H. Ditto—C. J. Schade.
Indiana—R. H. Bruns—E. H. Bindley, Jr.
Iowa—J. R. Jahn—W. H. Tolen.
Kansas—H. C. Hood—R. Ainsworth.
Kentucky—State Tournament not yet registered.
Louisiana—Tournament not yet held.
Maine—Tournament not yet held.
Maryland—E. W. Ford—F. Billmeyer.
Massachusetts—Tournament not yet held.
Michigan—Tournament not yet held.
Minnesota—F. S. Novotny—F. McKay.
Mississippi—G. M. Keyes—A. C. Robison.
Missouri—Tournament not yet held.
Montana—C. L. Parsons—F. A. Weatherhead.
New Hampshire—E. Reed—E. E. Reed.
Nevada—Affiliated with California.
Nebraska—H. J. Rebhausen—S. A. Huntley.
New Jersey—F. S. Tomlin—C. B. Platt.
New Mexico—Affiliated with Colorado and Wyo.
New York—H. J. Prendergast—W. W. Vanderhoff.
North Carolina—W. L. Hefner.
North Dakota—J. W. Sturgeon—E. G. Lemke.
Ohio—J. Rummell—K. P. Johnson.
Oregon—L. Rayburn—P. H. O'Brien.
Oklahoma—J. A. Campbell—Wm. Homer.
Pennsylvania—C. H. Newcomb—Brian Teats.
Rhode Island—No State Association.
South Carolina—J. H. Staples—G. M. Collins.
South Dakota—A. J. French—J. A. Ward.
Tennessee—T. Hale—J. H. Noel.
Texas—T. Bryant—P. Miller.
Utah—C. H. Reilley, Jr—R. A. Lohr.
Vermont—C. H. Burr—H. B. Moulton.
Virginia—L. Richards—S. T. Day.
Washington—E. J. Chingren—F. M. Troeh.
West Virginia—H. L. Smith—J. B. Lallance, Jr.
Wisconsin—Tournament not yet held.
Wyoming—Affiliated with Colo. and N. M.

Moraga Valley Shoot.—"Beginners' Day" shoot at he Moraga Gun Club, in Contra Costa county, was participated in by three squads of novice trap shots. The feature of the day was a 25 bird match between women. The results were: Mrs. W. N. Parrish 8, Mrs. Josephine Swain 5, Miss Gause 4, Mrs. L. Springmeyer 1, Mrs. W. P. Ellis 0.

Foster Hummell, 11 years old, and Norman Parrish, 8 years of age, signalized their initial trap shooting experience by each breaking two birds out of twelve shot at. Other scores shot were: W. W. Smith 18, O. G. Stanley 17, H. D. Perry 17, H. M. Rich 16, L. Springmeyer 16, L. L. Fuller 12, F. D. Talbot 9, L. G. Krigbaum 4.

* * *

Golden Gaters—After the big shoot last week the Golden Gate Gun Club will hold the regular monthly blue rock shoot at West Alameda tomorrow.

Drink Jackson's Napa Soda.

FISH LINES.

The trout streams have not been entirely depleted of the finny denizens thus far in mid-summer, for pleasing reports reach the city-bound angler from time to time. From the Feather river region advices are that the mountain likes in the vicinity of Johnsville are well worth the anglers' attention. In Gold lake good catches have been made daily, with both fly patterns and spinning spoons.

Mr. and Mrs. Jack Zuckerman will stay two weeks at Green Camp. B. H. Paul has recently fished in that section of Plumas county and is inclined to believe that anybody can catch trout there.

Near Blairsden the river was normal and fishing fair, with both flies and bait. At Belden the results have been a bit better—the sport is improving daily—grasshoppers do the trick for the fishermen and the brown hackle fly is apparently also a favorite.

At Big Bar there has been a decided improvement recently and fair catches have been taken with fly hooks. In the Big Meadows reservoir, large trout are taken by trolling, and plenty of them.

Low water and hot weather has put a crimp in Truckee river fishing. The trout have been gorging upon bottom food. The conditions tended to bring out case worms in myriads. James Cameron, however, picked up a nice limit a week ago near Boca.

From the Upper Sacramento resorts there is a different story to tell—the fishing is good. Roscoe Havens and M. Matthews, who know every foot of the river near Sims and other points, are devoting their attention to the speckled fish while the going is good.

Frank Maskey is back from a sojourn at Robinson's on Eel river. There has been a run of half-pound steelhead, accompanied by quite a few large fish. J. A. Dougall's recent short trip to Grieg's was rewarded with five nice sized fish. George Vance, who has not missed an annual visit to Eel river for years, left last week for a two months' stay.

In Colusa county the fishing is said to be excellent—the Big and Little Stony, near Fouts Springs. Al Baker advised fellow members of the California Anglers' Association that he has taken quite a few large trout recently.

* * *

There should be the best of black bass fishing in the Yolo basin this season. Above Rio Vista, at present, good catches have been made in the dredger cuts and the lakes of the tule overflowed sections.

Near the Santa Fe crossing at Middle river George Klarmann, Charles Paddon, Louis Gotthelf, George Roberts and others have made some nice catches of black bass, with now and then a fairly heavy striped bass.

In Kelly lake, near Watsonville, Dr. Earl Pomeroy and W. J. Street found black bass plentiful enough to take out fifty bass, from a half to one pound in weight. Those lake bass fancied a red spinner fly or a No. 00 bucktail.

Bass anglers and other fishermen who fish with minnows in Russian river and feeding creeks are much put out over the notice from deputy fish wardens that the use of minnow nets is prohibited in those waters. Minnows are used for bait, especially by the bass fishermen. Nets have been used in Sonoma county waters, ostensibly for minnows, but really for larger fish. Therefore the officers will no longer overlook that breach of the law.

DEER AND DOVES.

It cannot be said that deer are scarce this season. Since the opening day, August 1, numerous fat bucks have arrived in this city by express or in the machines of returning hunting parties. The outlook indicates there will be a steady supply coming in up to the close of the season, for deer are plentiful in many districts.

Deer are numerous in the Marin hills, but the animals have been cunningly taking matters easy on the several game preserves and posted ranches where they were unmolested. The independent rangers were out in force on the opening day, but most of them returned empty-handed.

The largest hunt reported was that of the Lagunitas Rod and Gun Club members. John McKee, Frank Jones, Sam Hubbard, Carl Westerfeld, George Jackson, Charles Bosworth, Hal Sanders and J. K. Lynch bagged five bucks on the opening day. W. E. Cashman's buck was shot in Lucas valley.

Sonoma county has reared a bountiful crop of venison this season, for many bucks have been shot already in the county. William C. Smith got one near Gualala. Dr. J. W. Clark shot two bucks on the Elk Range Gun Club's preserve, back of Cloverdale. Santa Rosa Elks' lodge indulged in a venison stew Thursday evening. Pete Curtis secured the necessary venison in the vicinity of Skaggs Springs.

Santa Clara county hunters have been extremely busy since the season began—a small army of riflemen went out in the hills and ranges for a longer or shorter hunt as luck determined. Joe Cannon of this city, and Dr. Fred Ryan of San Jose, firing at the same time, bagged a 130-pound buck in the hills above New Almaden. They "jumped" ten more deer, but did not get a shot.

Two other hunters came in from Madrone Sunday morning before 9 a. m. and had three bucks. John Kelly and Theodore Fischer bagged a six-pointer in the same district.

F. A. Ladner and party tried the San Benito country and got a forked horn. In the Eiler mountain section H. A. Hoover got a four-pointer and F. Lennogg a five-pointer. The Arroyo Bayo territory produced ten forked horns for C. O'Brien, J. Bryant and F. Wiesdanger.

Norden Hanson of Aptos, a 16-year-old boy, while out hunting rabbits, killed a deer with his shotgun, a forked horn that weighed 160 pounds.

Bob Murdoch and E. C. Smith are off for a week's hunting trip in Mendocino county, above Longvale station, a district where deer are plentiful. In the Klamath river country of Siskiyou county deer are reported to be more numerous than for years past.

Fair dove shooting can be found near Tres Pinos. R. C. Haas and J. T. Connelly shot limits in that district one morning. Near Watsonville, both dove and rabbit hunters have git full game bags. Charley Breidenstein and Max Berges shot rabbit limits near Concord, Sunday and Monday last. The rabbit season closed on the 7th inst. and the lid will be on for Mollie Cottontail until the quail season opens, October 15.

THE CARE OF FIREARMS.

"I am using a rifle that has been shot over 10,000 times, and it could be sold today as a new gun, because I have taken care of it and never, under any circumstances, put it away 'soiled,'" says E. P. Thomas of Morehouse, Missouri, writing on the subject of "Care of Firearms."

"When learning how to handle a gun I often wished," continued Mr. Thomas, "for a word of advice from some experienced person. I burned pounds of powder in the old muzzle loaders before I learned my lesson well; therefore, I feel that when we have something good we should pass it along.

"Briefly, then, my experience tells me that first you should own a good standard arm. In shooting practice, use small objects to soot at and train your nerves to be steady from the beginning.

"Asquire the habit of pressing (not pulling) the trigger and try to fire as soon as you have the proper aim.

"Always grip a gun of any kind firmly but not too tightly. If the grip is too tight the tendency is to tremble. Don't hurry, be careful and deliberate. Do not expect to hit the mark every time. You cannot do it. Be patient, but optimistic. Try, try and then some more. Speed will come with practice.

"There is one thing the marksman must not overlook under any circumstances; the condition of the inside and outside of his gun. Never lay it away without carefully cleaning and oiling it outside and inside.

"Do not think that the .22 Remington is a toy for children to play with. It isn't. It is built for serious work and is a mechanism of great accuracy. It will send the tiny 29 grain bullet a distance of 100 yards in less than half a second. By using the .22 long rifle cartridge, you can increase the distance to 200 yards and secure greater accuracy.

"In conclusion, I can only say, do your part as a marksman, have faith in your gun and the results will not only please but astonish you."

FIXTURES

Interstate Association Tournaments—

August 16, 17, 18, 19, 20—The Interstate Association's Sixteenth Grand American Handicap Tournament, Chicago, Ill., under the auspices of the Chicago Association of Trap Shooters, $3,500 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

Registered Tournaments — Pacific States and Territories:

September 5-6.—San Jose Blue Rock Club, O. N. Ford, Secretary.

September 6—Tacoma Gun Club, Tasoma, Wash., "Old Policy"; Carl Coon, Secretary.

September 13, 14—Omaha Gun Club, R. D. Vaught, Secretary-Manager, Omaha, Neb.

September 24—Medford Gun Club, Dr. E. R. Seely, President, Medford, Ore.

November 4—Williams Gun Club, F. E. Lowe, Secretary, Williams, Ariz.

November 5, 6, 7—Arizona State Tournament, under the auspices of the Tucson Blue Rock Gun Club, W. A. Julian, President, Tucson, Ariz.

Rem-UMC Notes.

In summing up the results of the recent California-Nevada State shoot held by the Golden Gate Gun Club, it was found that nearly every winner carried off the laurels with Remington-UMC Arrow and Nitro Club Speed shells.

The California-Nevada interstate championship was won by J. F. Couts with a score of 96x100. O. N. Ford tied for second with a score of 95x100, both using Remington-UMC Arrow Speed shells. O. N. Ford also won second amateur average with a score of 576x600.

J. F. Couts made the longest run of the tournament, 119 straight, and O. N. Ford second longest run, 113 straight.

The high professional average was won by H. E. Poston with Arrow Speed shells with the good score of 578x600.

Of the seven State trophies contested for six were won with either Remington-UMC guns or shells.

Looking Backward over the M. and M.

[Concluded from page 4.]

of roses for Lee in his younger days. He was an unprepossessing two-year-old, and at that age passed from Walter Cox to the Pastime Stable as "boot" in a deal for a youngster of like age called Prince Loree, by Prince McKinney, dam Delore 2:09¼ by Delmarch. The certainty of the uncertainty of human judgment where horses are concerned is most aptly expressed by the graphic phrases of Joe Markey, who writes that "the Prince was the 'golden pippin,' while Lee, at the time, was just a snarly little windfall such as one picks from the ground beneath decrepit trees in neglected orchards. Prince, in other words was the bacon and Lee merely the rind. Well, the trade was made and Lee thrown in as a sort of sop to bind the bargain. At present, incidentally, the Prince is enjoying the oats for which Lee is working, and so far he seems indisposed to take up the matter of self support."

As a two-year-old Lee acquired a time record of 2:28¼ at Detroit and came in for a good deal of attention from the anvil chorus, which bothered him and his trainer not a whit. That winter Andrews gave him the best efforts that a long and successful experience could provide, and by spring the lemon was transformed into the finest kind of a peach. At North Randall in the Fasig he won both heats, trotting in 2:08¾ and back in 2:08, at that time the track record for the age and gait, Miss Perfection being second each heat. At Kalamazoo he was 2-2-6 in the Horseman futurity to Peter Volo in 2:04¾, 2:05¾, 2:06¾. At Syracuse he won the Ka-Noo-No stake in straight heats—2:10, 2:10¼, 2:08¾. In the Matron stake at Hartford he was second to Peter Volo in slow time, and at Columbus, in the Horse Review stake, was 3-2 to the same horse in 2:07¼, 2:08¾. Then came his last race of the season, that memorable Kentucky futurity which Peter Volo trotted in 2:07¼, 2:05, 2:03½, the son of Guy Axworthy finishing 2-2-3. His performances this season need no comment here, and only misfortune will prevent much more being written of him in the future. It is a matter of regret that he is not a sound horse, but this handicap serves to emphasize the true greatness of his performances, and in spite of it he is not to be overlooked as a candidate for the stallion championship.—[N.]

COST OF HORSE LABOR ON THE FARM.

Agricultural conditions are gradually changing. Men now living remember when the first draft horses were brought to the United States. The average farm horse in those days was small, and so was the machinery. Now many farmers use three-bottom plows and two-row cultivators and horses proportionately larger. Since the introduction of the draft horse farmers have learned that it is the most profitable farm horse. High-priced land, high interest, ineffective man labor, and an occasional dry season have led many to give their horse equipment serious consideration. Those who have read the signs of the times correctly have been making plenty of money in horses. Every farmer should know why horse labor is expensive, and what methods are being followed to reduce these costs.

Recent figures furnished by farmers show that the farm horse works on an average of from 3 to 4 hours for each working day at a cost of $75 to $100 per year, or 9 to 12 cents per working hour. Man labor on these same farms costs from 14 to 20 cents per hour. The expense of keeping a team is more than that for a hired man. No farmer would think of employing a man during the entire year for 6 or 8 weeks of spring work, yet many farmers keep extra horses for which there is work only in the springtime. The horse that works practically every day earns his yearly keep. It is the idle horse that is too expensive. Plenty of horse power is absolutely necessary to put in a crop well and at the right time. The question is how to secure cheaper horse labor.

There are four practical methods by which horse labor costs may be reduced—the use of a cheap grade of horses, a better distribution of horse labor throughout the year, the use of young horses, and the use of more productive draft mares.

Cheap horses worth from $75 to $125 furnish labor at a low cost because the original investment and depreciation charges are lower than on $250- to $300-horses. For some farmers this is a decided advantage. The man with limited means is able to begin farming much sooner by using cheap horses. The man who must depend almost entirely on hired help, and that many times incompetent, finds that cheap horses are very satisfactory. If a careless driver overheats a cheap plug, the financial loss is not so great as if it were a $300-horse. But such horses can furnish only labor. Successful farmers who use this kind of horse labor attribute their success to the fact that they have had little money invested and that their main object has been to get the work done regardless of the welfare of their teams, though absolute disregard for the feelings of even plug horses is not laudable. A serious objection to using cheap horses is the fact that they soon become unfit for work and have to be replaced. It would be much better for the farmer to have a pair or two of good horses to sell every spring rather than a pair of plugs to buy, even though they do not cost much.

Much can be done to reduce horse labor costs by a better distribution of labor throughout the year. During the cropping season there is need for more horses than at any other time in the year. Most farmers do not buy extra horses for the busy season, selling them again when work is slack, but they carry all the horses they need throughout the year. Those who receive nothing but labor from their horses find that any system that will reduce the total number of horses kept and still operate the farm effectively contributes a great deal toward making the farm pay. If they have young horses that are increasing in value or brood mares that are producing valuable colts, the more horses that their farms will carry the greater will be their profits, providing they know how to develop and sell colts on a profit-paying basis.

Diversification is the keynote to a better distribution of horse labor. Growing more leguminous roughage reduces the number of acres in cultivated crops. Other crops may be selected that do not require attention at the same time as ordinarily cultivated crops do. The practice of fall-plowing many times enables the oats and corn crops to be put in earlier in the spring with less expenditure in both man and horse labor. Farmers who require only labor from their horses find that such a system is a good one; they do not have to carry as many horses. Those who grow out young colts advocate such a system because leguminous crops furnish excellent hay and pasture for growing animals.

Some farmers have been successful in reducing the expense of horse labor by using nothing except young horses. They have made money by buying up under-fed draft colts during the winter when they are rising three years old. They work them a season or two and then sell them. Thirty-month-old draft colts oftentimes look pretty tough in the hands of some farmers. For some unknown reason they seem to have an idea that young horses can be roughed along on cornstalks and oatstraw like steers, and that practically no grain need be fed to colts until they are old enough to work. As a result late winter or early spring finds such farmers with coming three-year-old colts that are poor prospects for spring work; rather than carry them over for another year they will sell them worth the money. Farmers who are good judges of horses, as well as good feeders, can pick up colts of this kind, break them, work them moderately during the first season and then turn them when they are four or rising five at a good figure. However, such a system cannot be recommended to every farmer; it is the unusual man and not the average who knows what to buy, how to feed, and when to sell. It takes a business mind coupled with unusual talent for handling horses to reduce horse labor costs by such a system.

Without a doubt, the use of productive draft mares is the most reliable and effective means of reducing horse labor costs. It will take fewer of them to do the same amount of work that was formerly done with 1,000- to 1,200-pound horses. Draft mares properly handled can easily accomplish all of the work required of the average farm horse and raise foals at the same time. They are more profitable than geldings or mules because they do more than merely furnish labor. Heavy draft mares make possible the use of larger machinery, thereby enabling the farmer to do his work more rapidly, more thoroughly, and with less expenditure of man labor. This means that every farmer who properly uses productive draft mares can secure his horse labor cheaper than by any other means. He gets valuable colts from his mares in addition to their work.

A farmer well known to me bought a pair of good grade draft mares as an experiment. These mares were five and six years old, weighed around 1,800 pounds each, and were heavy in foal to pure-bred stallions. The pair cost $550. They foaled soon after he bought them, one a filly, the other a colt. The colt was sold at about three years of age for $300. The farmer still owns the filly and he has refused $250 for her several times. In the fall after the foals were weaned he was offered $750 for the mares but would not sell them. One of them raised only one other foal, a mule that sold for $100 at about ten months of age. The other mare produced one filly for which he has refused $250 as a three-year-old, one colt valued at $125 as a two-year-old gelding, and three mules which sold for an average of $100 per head as yearlings. This farmer raised mules from these mares because he owned a jack and felt that it was too much trouble to go several miles to a good draft stallion. He sold the mares at the age of ten and eleven for $350. He had owned them for nearly six years and had used them practically every day. His original investment was $550. He received $700 for produce sold and he has three left on the farm which he values at $625. This makes a total of $1,325 for the produce of these two mares, one of which was an exceptionally poor breeder, producing only two colts in the six years. Assuming that these mares earned their yearly keep by the work which they did, the profit from this investment was $1,125, as the team sold for only $200 less than it cost. The owner wants more draft mares because he says that he misses them when there is heavy spring work to be done. He is firmly convinced t such mares are a profitable investment.

If properly handled, purebred draft mares red horse labor costs much faster than do grades. is admitted that purebred draft mares require m care and painstaking intelligence than do mules draft geldings. However, any farmer is well-p who is willing to take good care of his horses. farmer can afford to keep an old pair of geldi worth $75 each that will cost $100 per head to k per year for the work they will do. Neither can afford to raise colts that will bring only $120 to $ at maturity when it has cost nearly that much raise them. Purebred draft mares well taken c of furnish cheaper horse labor than grades not cause they are able to do any more work but beca their colts will always bring at least $100 to $ more at selling time. It costs no more to feed pu bred draft colts well than it does to feed grad Purebred draft mares are not able to do any m work than grades of the same size and temperame The difference in value is in the selling price of th produce.

Can the average farmer afford to keep pureb draft mares? This question was asked of C. McConnell, Hamilton county, Ind., and he repli "Yes; there is no question in my mind but that pure-bred draft mare on almost all of our medi sized farms is the most economical and dependa source of power for the bulk of their farm work. T tractor when tried proves to be expensive a adapted only to a small portion of the work on average farm. The purebred draft mare is the m satisfactory farm horse, providing the farmer kno how to raise colts or is willing to learn. Six g purebred draft mares can easily do the work of f big mules or geldings and they should produce lease four foals per year. These at two years of a will bring $300 to $350 per head, and many tim they will bring much more if they have been well-f Thus one has farm power which instead of being constant source of expense provides a good ann income."

H. S. Griesmer, Tazewell Co., Ill., says: "Twe years ago, I used fully one-third more horses common grade stock to do the same work that purebred Percheron mares do today. By using few horses I have reduced my feed costs a great de More horses mean more work in hitching, unhit ing, cleaning and harnessing. I believe that a farmer with from 160 to 200 acres of land can opera his farm with one less man by using pure-bred dr mares instead of common horses weighing arou 1,200 or 1,300 pounds."

"We keep purebred draft mares," says Emery He ingway, Cedar Co., Ia., "because we can make mo money operating our farms with them than wi grades. We are not horse dealers, but farmers terested in raising hogs and purebred Percher horses, feeding cattle, and in growing big crops f the money that we can make. We have 1,040 acr of land and operate it entirely with purebred P cheron mares. We are not raising purebred dra horses as a separate business. That is only a pa of our farm operations, and one which we belie any farmer can handle successfully if he will on take good care of his mares. We keep about thir five mares of breeding age which in addition to t colts old enough to do some work constitute our e tire source of farm power. We sell practically all the horse colts for stallions. Our weanlings bri on an average of $150 per head. The bulk of o colts are sold from two to three years of age at $4 to $500 per head. We raise from twenty to twent five every year. The home farm of 160 acres operated with six purebred Percheron mares. W put in 45 acres of corn this spring with these mare They have five live colts, and the other mare is d to foal in a few days. Any farmer can duplica what we are doing if he will only select good mar that are producers and then take good care of them —Ellis McFarland, Breeders' Gazette.

UNIQUE INSURANCE COMPANY PAYS FIRS LOSS.

Check No. 1 for $100 has been issued by The Hor Insurance Association of the U. S. Forest Service i payment of the claim of Ranger J. B. Stephenso stationed on the Cleveland National Forest in Sout ern California. One of Stephenson's horses was r cently injured while working with a constructio crew on the forest, and had to be shot. Satisfactor proof of loss was made to association headquarte in San Francisco and prompt payment was made t Mr. Stephenson.

This insurance association is not a governmer institution, but was recently formed by the fore rangers of the California-Nevada District of the Fe eral Forest Service for the purpose of distributin the loss that occurs when saddle and pack animal owned by its members are killed or disabled. It i purely mutual in character, funds to pay losses bein provided by means of a small quarterly assessmen All forest officers of the district are eligible for men bership in the association, each member being a sessed a small amount to provide a fund from whic to pay loss. The amount of the assessment depend on the losses incurred during a quarterly period.

At present over two hundred horses are insure and it is expected that this number will be greatl increased during the summer, when the forest forc will reach its maximum strength of from eight hur dred to nine hundred men.

THE FARM

OLIFORNIA HAS MONOPOLY IN BORAX.

reased Production in 1914 Shown by eports to United States Geological urvey.

he production of crude borate ma- ials in the United States in 1914 s 62,400 short tons valued at $1,464,- , as compared with 58,051 tons in 3, valued at $1,491,530. This is an rease in quantity of 7½ per cent, ording to Charles G. Yale and Hoyt Gale, of the United States Geolog- l Survey. All the crude borate ma- ial now used in this country is the neral colemanite. The product dur- 1914 was obtained from three nes, all in southern and southeast- n California, the larger part coming, usual, from the Lila C. mine of the cific Coast Borax Co., in the moun- ns of the Death Valley region of o county. During the year this mpany completed a calcining plant Death Valley Junction to roast the ver grade ores before shipping them New Jersey to be refined. It also mpleted a narrow-gauge railroad m the Tonopah & Tidewater rail- ad at Death Valley Junction to the ddy McCarthy and Monte Blanco nes of the company in the Furnace eek region, which have not yet been erated.

The Sterling Borax Co., near the rder of Los Angeles county, was sec- d in production. Two grades of ore e mined and are roasted to remove purities. On calcination the cole- anite content of the ore is dehydrat- and becomes a fine powder.

The Stauffer Chemical Co. of San ancisco, which was once interested the borax mines at Lang, has ob- ined a controlling interest in the oldings of the Russell Borate Co. in e Ventura district. This company uls the ore 35 miles to rail and ships to San Francisco for refining. The ason is limited to about seven onths in the year on account of eavy roads in winter.

A 40-foot deposit of colemanite is ported to have been discovered at a pth of 370 feet by ranchmen drilling r water about 4 miles from Rich ation, in the Kramer district, San rnardino county, Cal.

Chile and the United States lead the dustry with approximately equal out- ut of borates, or boric acid and borax, ach producing in round numbers bout 40,000 to 50,000 metric tons of rude ores, mainly calcium borates. urkey probably stands third in rank f production, with a reported average roduction of 14,000 tons reported as oracite; and Peru, Bolivia, Italy, Ar- entina, and India are also producers.

The price of borax crystals is quoted as 3¾ to 4 cents a pound, though it rose to 4¼ to 4¾ at the very close of the year. The price of boric acid crystals, which is normally 7 to 7½ cents a pound, advanced to 7¾ to 8½ cents at the close of the year. The tying up of some foreign sources of supply, as, for instance, the mines on the Sea of Marmora, and the interruption of foreign business has created somewhat larger demand for the American products, and a slight rise in price may be expected.

MIXED FARMING.

When Benjamin Franklin said nearly 200 years ago: "Put not all thine eggs in one basket," he must have had diversified farming in mind.

In sections where wheat is the staple, there is great temptation to grow nothing but wheat. The practice inevitably leads to lessened yields and ultimately leads to barrenness. In the corn-belt the tendency is to grow corn almost exclusively and doubtless corn should be the most prominent crop in that region, but even this king of cereals must share tillage with oats and wheat and hay and potatoes and other things in order to make permanent agriculture possible.

As a general proposition, that farm prospers which produces plenty of hay and keeps it on the place. To sell hay is one of the short cuts to soil exhaustion. High grade livestock makes the farmer's best market. He makes a profit as a feeder, and if he takes good care of the manure, his lands are growing richer every year.

The farm is a place for work, and the more intelligent work that is applied to the crude products of field and barn yard, the bigger the profits.

Mixed farming with the livestock accompaniment means work all the year round. Especially is mixed farming profitable if a few extra good cows are kept. The average farm could support several cows on the roughage commonly wasted.

The farm garden does not get the attention it deserves. At garden time everyone is busy planting or plowing corn, or looking after the big things. Yet it is a common thing to see the garden acre the best paying acre on the whole place. Five acres in small fruits, berries and the right kind of vegetables will earn bigger net profits on labor and capital than 40 acres in corn or wheat. The expansive farmer who lives to wear a big overcoat at the stock shows should "despise not the day of small things."

According to the United States weather bureau records we have a serious drouth about every five years throughout the mid west. It is significant that in thise years when the corn is burned up with hot winds and lack of rainfall, the winter wheat in the same territory is nearly always a bumper.

Something Each Month.

The lesson from this division of responsibility is "Safety first." The farmer who does not plunge in some specialty nor give up all his interest and labor to a single crop, but has a little coming in every month in the year is the one who will most easily win independence.

This kind of a farm sends a few turkeys to town at Thanksgiving time. At Christmas there is an extra goose or two for somebody's dinner. In January the farmer kills a half dozen hogs, and after his own supply of meat is salted away he sells the surplus to people who like the good country article right from the farm. February sees a nice little check for a load of fat steers. In March the good wife exhibits a neat sum from early eggs for hatching. In April there is easy money from the sale of some weanling pigs. May is broiler time and market eggs contribute to the growing hoard. June, July and August are harvest months for fruits and vegetables. In September the farmer sells his small grain and corn follows in October.

In all these months the dairy turns a constant stream of dollars into the family treasury and when a carload of porkers or a well bred colt is sold, that coveted automobile, or new piano-player, or a much needed sleeping porch is gained without anybody feeling the expense, and everybody is happy.

"Something doing every month in the year" keeps all hands busy, and when people have something to show for their business the skies are blue, the world is a pleasant place to live in and life is a splendid thing.

One crop farming is unsafe and wasteful, while mixed farming distributes work throughout the year, lessens the risk from crop hazards and permits the scientific rotation of crops which means permanent soil fertility. —Rocky Mountain Husbandman.

MULCHING CONSERVES MOISTURE.

R. S. Vaile of Ventura county, in discussing the common problem that all fruitgrowers who irrigate their trees have to deal with, viz., the even distribution of water, suggests that some system of mulching may be worked out that will be very useful in assisting in the distribution of the water, and also serve a good purpose in retaining the moisture where it is most needed in the soil.

The principles involved in Mr. Vaile's article are not new; in fact, they were well known by fruitgrowers in the '60s, but they are nevertheless capable of profitable application under certain conditions.

The first and most important condition that must be present if mulching is to be practiced is the certainty—a probability will not answer—of being able to obtain the material for mulch whenever through decay the original application grows too thin to longer protect the soil from drying winds and the rays of the sun, for it must be understood that a mulching system, once commenced and established, may not be discontinued without serious injury to the trees.

The layer of mulch must be of sufficient thickness to protect the soil and hold the moisture up to the surface, otherwise it will harden and allow the moisture to escape, an undesirable consequence.

However, with a sufficient supply of mulching material in sight and to be provided from year to year, there can be no question as to its power to keep the root zone of the fruit trees in an evenly moist condition with the use of very much less water than must be used under the usual methods of irrigation and cultivation; but it must be borne in mind that because the mulch, if properly applied, will retain moisture evenly up to the surface of the soil, it will also induce root growth upward as far as soil and moisture make growth possible, and that is why this system if once established must be continued, or the roots in the top few inches will be destroyed by plow or cultivator on the return to the usual methods of orchard work.

By the mulch method the soil will yearly receive added fertility from the decaying mulch, and the expense of cultivation will be saved, both of which are important items in the conduct of an orchard, and may equal or exceed the cost of applying the mulch; but on the other hand, some system of keeping down the green growth that will start during the rainy season from seeds in the mulch must be devised, and will cost something.

Any one who contemplates trying the mulch system should try it out in a small way, and demonstrate its workings under the conditions present in his section before adopting it largely with a possible chance of being compelled to abandon it later, to the detriment of his orchards.

As stated above, the certainty of a steady supply of mulching material from year to year is indispensable to the success of the system.—Home and Farmer.

TREAT INFLAMED UDDERS PROMPTLY.

"Garget makes an appearance every once in a while in cows which apparently are in perfect health," said F. B. Hadley of the college of agriculture. "The milk in severe cases," he continued, "is either stringy or otherwise altered in character when drawn and collects a yellowish colored sediment on standing. In less pronounced cases there may be little visible change in the milk, but an examination would reveal a large number of germs.

"Noninfectious garget is caused by bruises or other injuries, or by a sudden congestion of blood in the udder, as frequently occurs in heavy milkers and in heifers at first calving. Affected animals usually make a complete recovery if given 1½ pounds of Epsom salts and their feed is restricted to that of a succulent nature.

"The cause of infectious garget is a germ or germs. When many of them are present in the udder not only is the milk changed, as mentioned above, but the udder itself becomes hot and sensitive to the touch.

"The importance of the infectious form of garget rests in the fact that it is usually not easily cured and has a tendency to recur. Furthermore, the disease is easily conveyed to healthy cows through the medium of the milker's hands or contaminated material of any kind, unless precautions are taken to avoid the transfer of the germs.

"Temporary relief may be given by bathing the udder with hot water for one half hour each morning and evening. After thoroughly drying the surface of the udder warm cottonseed oil should be rubbed in with the palm of the hand.

"A complete cure is possible in most cases only by drying the cow off at once so that her system may be free to fight the disease producing germs that are present in the udder."—Wisconsin Station.

EGGS ARE "FANCY."

When fresh, clear, and full bodied.

Whe nshells are sound, clean, bright and of uniform color.

When they weigh 24 ounces or more to the dozen.

It pays to produce and market fancy eggs.

A REAL BARGAIN IN HIGH CLASS HORSES

Owing to a combination of circumstances that will keep me permanently in the east and prevent my return to my former home in Southern California, I wish to dispose of the famous brood mare BONNIE AILSE 2:08½ and her two filly foals by WILBUR LOU (3) 2:10¼, one a two-year-old, the other a suckling, all at present at Hemet Stock Farm, and offer them for a quick cash sale at a most liberal figure.

BONNIE AILSE 2:08½

brown mare, foaled 1897, standard and registered, is by Faustino 2:12¼, dam Ailse Medium 2:27¾ (dam of 2) by Happy Medium 400, grandam Ailse (dam of 1) by Corbeau 98. She is a producer of exceptional quality and is the dam of

CONTENTION B. (3) p. 2:08¼
a pacer of exceptional merit, barred from being a world's record holder by a technicality only.

CARLSCHEN (2) 2:23
a trotter that is right in every way and is showing well this year in his three-year-old form.

Both of these youngsters are members of the stable of W. G. Durfee and are valued away up in the three and four figure marks. Ask him what he thinks of Bonnie Ailse's produce.

WILBUR LOU (3) 2:10¼

is one of the best bred young horses in the country and a coming great sire—has three two-year-olds (one with a yearling record) in the list. The two-year-old out of Bonnie Ailse is his first foal and has never been trained.

MODERN BREAKING

By W. A. BRUETTE

A revised edition of the latest Treatise on the Training of Setters and Pointers.

THIS book enables anyone to do his own training and fully explains the methods employed by the most successful trainers in developing the setter and pointer. The important lessons are illustrated by photographs from life; nothing is left to guesswork. The entire subject is covered, from the selection, raising and development of puppies to the conditioning of dogs and their handling in the field. The amateur is told, in lucid language, how to make a dog a high-headed, stylish worker, stanch on his points, steady to shot and wing, and a prompt, tender retriever; all of this is accomplished by simple methods, some of them never before given to the public. The instructions for correcting the faults of bird dogs and keeping them up to their training are concise and easily understood. Every man who owns a bird dog or shoots in the field should read this book.

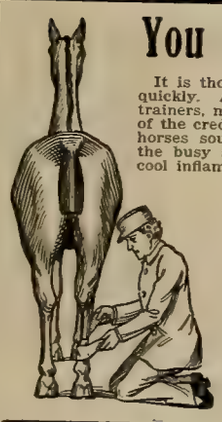
1915 WINRACE
—and—
ELIGIBILITY BOOK

The National Trotting Association Winrace and Eligibility Book for 1915 is now ready for delivery. It is a work of 8[illegible] pages, bound in cloth and contains official reports of all races and time recorded meetings held by members of the National and American Trotting Associations as well as copies of all special reports received by the two Associations and all reports of non-association meetings which appeared in the columns of the turf and daily papers in 1914 as well as an index giving the starts made by each horse. In addition to this, it also contains an Eligibility List which presents the names of all live horses that acquired records or winraces in 1913 and 1914. When a winrace was made over a mile track it is designated by the letter (m) and if a horse also has a winrace over a half mile track within the four seconds limit fixed by the rule it is also given and marked (½m).



Last year after the new eligibility rule was adopted, the National Trotting Association issued a Winrace and Eligibility Book, which covered 1912 and 1913. It assisted materially in the application of the new rule, but members and horse owners were frequently in doubt as to whether a horse was entitled to a time allowance. This resulted in a very voluminous correspondence and in order to obviate it in 1915, the present book has been compiled and issued as approved by the President under an order of the Board of Review.

In the matter of time allowance, a horse with a winrace is allowed one second for each year, if raced, in which he fails to equal or reduce his record or win a race, providing same is claimed by the nominator when making the entry. If a horse was not raced in 1914, he is not entitled to a time allowance and a reference to the index in this book will show whether he was raced or not, while by referring to the summaries, it can be determined whether he equaled or reduced his record or won a race. Also in order to give all the information possible, the reports of meetings contain all races at half mile heats as well as at mile.

This book presents reports of 1,400 meetings at which 12,673 horses started in 8,730 races and 939 performances against time, for which the premiums amounted to $3,228,617.82, while the Eligibility List presents the names of over 14,000 horses.

The 1915 Winrace and Eligibility Book will be sent postage prepaid to any address for $2.00 by

You Can Rely Upon ABSORBINE

It is thoroughly dependable and reliable—it penetrates and acts quickly. ABSORBINE is used season after season by successful trainers, many of whom do not hesitate to give ABSORBINE much of the credit for their success. They use it to get lame, blemished horses sound and fit for spring training or work, and, through the busy season, to put vim and energy into jaded muscles, to cool inflamed tendons and to prevent "next-day" stiffness.

ABSORBINE does not blister or remove the hair, and horse can be used.

It is economical, as only a few drops are needed at an application. A bottle of ABSORBINE, diluted as directed on label, makes 3 gallons of effective liniment at a cost of 80c. a gallon.

USE ABSORBINE to reduce Bursal Enlargements, Bog Spavins, Thoroughpins, Puffs, Shoe Boils, Capped Hocks, Swollen Glands, Infiltrated Parts, Thickened Tissues, Rheumatic Deposits, Enlarged Veins, Painful Swellings and Affections; to reduce any strain or lameness; to repair strained, ruptured tendons, ligaments or muscles; to strengthen any part that needs it.

W. F. YOUNG, P. D. F., 54 Temple St., Springfield, Mass.

Third Edition Within One Year of Publication.

CARE AND TRAINING OF TROTTERS AND PACERS

NEVER before in the history of the publishing world has a horse book gone into a third edition within one year of publication. Yet the explanation is simple—the book fills a long-felt want.

Never before has this subject been treated in a distinct manner. It has been handled in connection with autobiographies of trainers, but such works are out of print or out of date, for they were published 20 years or more ago. Conditions and methods have changed since then, and former treatises are just as much out of date as the high-wheel sulkies then in vogue.

"Care and Training of Trotters and Pacers" is as modern as a 42-centimeter gun. It does not contain the ideas of one man, but of 100 of the leading horsemen of the day, including Thomas W. Murphy, Walter R. Cox, and Edward F. Geers. These ideas were converted into book form by two prominent American turf journalists.

This book enables anyone to do his own caretaking and training until it is time to send the colt to a professional trainer, or the owner can train and race the colt himself. The treatise covers the details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented. Nothing is left to guess work. The language is lucid. Both theoretical and practical views are outlined and compared. The instructions are concise and easily understood. The work contains no advertisements—it is not a catch-penny publication that looks big in the advertisement but proves disappointing when received.

Many professional trainers have purchased the book and have found it interesting. Despite the war, over 300 copies have been sold in Europe and Australia.

Price $1.00 postpaid. Cloth, illustrated, 176 pages, 5x7 inches.

A Practical Treatise on the Training of Hounds

Training the Hound

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

IS YOUR BROTHER A SHOOTER?

A WAVE of enthusiasm in restoring American prestige with the gun is sweeping the country.

Shooting is virile sport with a strong appeal to that inherited protective instinct that made our forefathers the greatest marksmen in the world.

The best place to learn to shoot is at a trap-shooting club, but novices shy at the idea of making a start in the company of a bunch of experienced shots. To satisfy the demand for an organized arrangement for beginners, we planned a

National Beginners Day Shoot

at which your inexperienced brother, son, wife, daughter, or friend may learn in company with various other beginners.

Briefly, the plan provides two trophies—

A Fob for Men, A Spoon for Women

The bronze fob illustrated at the right is for the best score made by a beginner, man or woman, at each of these beginners' shoots. The sterling silver Nemours teaspoon is for each woman, beginner or experienced, who makes the best score at each of these shoots.

BEST HUNDRED CLUBS GET CUPS

A handsome bronze cup trophy will be given to each of the hundred clubs having the greatest number of beginners contesting in these shoots.

Any club may hold a shoot any day or days in August.

Write at once for full details and conditions.

LET EVERY MEMBER GET A MEMBER

Get every member of your club to pledge himself to bring at least one beginner. Here is your chance to double the membership of your club and do a real service for your brother, son, wife, daughter, or friend.

IT LOOKS GOOD TO EVERYBODY

The Winchester Model 1912 Hammerless, Repeating Shotgun has won the enthusiastic approval and endorsement of shooters everywhere. Its light weight, strength, balance, easy-working action, and splendid shooting qualities appeal to men who know a good gun. Its Nickel steel construction means not only a lighter and stronger gun, but a better balanced one, because of the better distribution of weight. This gun loads and unloads easily, has a cross-bolt trigger lock, and a simple take-down system. It is made in 12, 16 and 20 gauges. If in the market for a shotgun, don't fail to examine

ÆSTHETICISM vs. ADVERTISING.

All the world loves a lover and a large proportion of the population of the mundane sphere aforementioned will confess to a more or less strongly developed admiration for a real good, husky, single handed scrapper. Whether or not the editor of the Horse Review qualifies as a recipient of the world's affections on the former score we know not, but of a certainty he must be accorded consideration as a candidate for admiration under the terms of the second clause of our introductory remarks. No sooner does he emerge from one editorial battle than his bellicose nature embroils him in another, and be it here stated that he is an ideal scrapper in a number of ways. With him it is "a fight for the fight's sake," regardless of what it may be about, whether he may be right or wrong, or whether he may win or lose. In his own mind he is always right and always victor—a veritable Kaiser Bill (or would it be more fitting if we said a real "John L."?) among the war lords of journalism.

Things being a bit dull with his most treasured foes of five-hundred-and-thirty-some-odd South Dearborn Street, he has trained his guns upon a harmless eastern contemporary, and under the heading "Corned Beef and Cabbage" has given his pen free rein with the following result:

> From our Athenian contemporary, the "Horse Breeder," of recent date, we reproduce the following editorial, which was inspired by one that appeared in the Review a few weeks ago:
>
> It has been suggested that one of the features of European racing that might well be adopted in this country is the naming of important harness events after famous horses, whether they be sires, dams, or high-class racers.
>
> The "Breeder" heartily concurs in this conclusion, but is not at all sanguine as to the probability of such action being successfully brought to a conclusion, principally for the following reason: We have our M. and M., our Ohio, our Transylvania, etc., which names (having a commercial value owing to the memorable contests they have brought about), could not very well be discarded. Most of the other "big" purses are named for some industry or institution, hotels, perhaps, being in the lead in this particular, it being the practice for the person or business which gives the race its name to take—or, at least, guarantee—a certain number of nominations, each one of which means exactly so much cash to the track giving the race.
>
> A good plan, fair to both parties and to the public, since those who pay at the gate care not one whit whether the $10,000 trot for 2:09 horses they have come miles to see, and the field for which embraces several equine stars, is called the Hambletonian Purse, the Uhlan Handicap, or the Sure Shot for Spavin Sweepstakes. The contest between horses of extreme speed is what the public pays for, and, if the proprietor of the justly celebrated Pleasant Pellets for Puny Pups tells the track management he will plank down $2,000 if the Hambletonian purse is changed to the Pleasant Pellets, the chances are all in favor of his offer being accepted, and why shouldn't it be?
>
> When turf rules permit the purchase of famous horses and the changing of their names to those of patent medicines, it is idle to argue that the associations that give big purses for horses so named ought—from pure aestheticism—to call these events after famous horses for nothing when the Pleasant Pellets man stands in the offing and waves a bunch of coarse money which he is prepared to hand to the track under certain conditions.
>
> When it comes down to the cold facts at issue, we think we are not far wrong in stating that the amount of advertising subsidization of our notable harness stakes resembles, more than anything else, the hole in the doughnut rather than the periphery thereof. Let us take, for instance, the three events named above—that is, the M. and M., the Ohio and The Transylvania. We believe, when first inaugurated, something over a quarter of a century ago, the M. and M. and its companion stake, the C. of C., were, to a certain extent, subsidized by certain commercial organizations of Detroit—but we believe it is also true that this condition long since ceased to exist, and that for many seasons past these races have been sponsored wholly by the Detroit Driving Club. So far as they are concerned, however, we think it would be a blunder to change the name of either, for both are so widely known and have such memorable histories under their long-standing appellations that any alteration would be extremely ill-advised. But if our Athenian editor will kindly inform us what institution, pill-factory, or other enterprise, similar or dissimilar, ever subsidized the Ohio or the Transylvania, we would feel vastly enlightened. We had supposed that the former was named for the great middle-western state in which North Randall, where it is trotted, is situated; and that the latter was named in honor of the famous Transylvania University, at Lexington, which, in turn, derived its title from the Latin name applied in Colonial times, to a vast extent of territory of which Kentucky was a part, its meaning being, "beyond the forest (or wilds)"—a name redolent of that aestheticism against which our editor protests and leading to the query, Is he not writing considerably at random?
>
> We have no doubt in the world that the K. T. H. B. A., when it originated the Kentucky Futurity, could have obtained a lusty subsidy therefor, if it had endeavored to secure some big Blue Grass distiller to act as the "angel" of the event in return for having his distillery's name "blown in the bottle." Indeed, it probably could today—but it has never seen fit to adopt such a course—certainly a shocking example of aesthetic ascendancy over "cold facts." All along the line the K. T. H. B. A. has been similarly negligent, for, aside from naming a few events for celebrated breeders or breeding establishments (some of which have endowed these events with trophies for the winner and some of which have not, but none of which have ever guaranteed or subsidized them), they have neglected all the brilliant advertising opportunities within their grasp.
>
> Years ago the home town of the "Breeder" used to be a Grand Circuit point, but, if we remember aright—and we are confident that we do—its top-liner, as a fixed event, was named after the old Bay State—"the Massachusetts"—and not for a booze emporium, a phosphate mill, or even a hostelry. As we farther recall it, the other stakes at these meetings were named for historic places 'round about, as the Blue Hill, the Neponset, the Ponkapoag, etc., etc. In so far as North Randall is concerned, its stake program is also destitute of advertising "angels." Aside from the Ohio, it features the Edwards and the Fasig, two events named after two of the foremost men in the past connected with harness racing in and about Cleveland, Colonel William Edwards and William B. Fasig, both now dead, and both eminently deserving of such monuments. In addition it has also its well-known Tavern "Steak," which is, if not an example of aestheticism, at least devoid of any advertising angle of the variety which our contemporary exploits.
>
> We might go on and recall the fact that the classic Charter Oak stake, at Hartford, has now weathered the storms of thirty-two years without any pill placards or liniment labels posted upon its drop curtain, etc., etc., but it is unnecessary. The point we wish to make is this—that the editorial from the "Breeder" is alike devoid of aestheticism and of cold facts. But it is marked by a tendency that is one of the blights of harness racing as at present, and for a long while past, conducted in this country—which is, to place and keep it upon what we may term a "corned-beef-and-cabbage" basis, in which the crass, the crude and the commercial are always in the foreground, and all other considerations and aspects kept subservient to them. If there is any one thing that American harness racing needs, it is the soft-pedaling of these features and policies. By this we do not mean to say that it is neither allowable nor praiseworthy for stake events to be promoted with "angelic" assistance of the nature under discussion. Under certain circumstances, such events have their own proper place to fill. But when a supposedly representative turf journal like the "Breeder," hailing from the "Athens of America," stoops to argue that our trotting associations cannot afford to follow the European custom and name some of the events upon their programs in honor of great historic individual horses, because, forsooth, they must angle for advertising subsidies for these events, a lementable example is presented of inability to apprehend the elementary aspects of sport conducted upon a high plane.
>
> Such subsidies are not distinctive of high-class sport of any kind, and when they are pandered to and given the center of the stage, they reflect upon the status of anything to which they are attached. It is a mistake, also, to argue that the public is indifferent to such matters. The public is much more sensitive to these things than such arbiters of taste as the editor of the "Breeder" imagines. It is very quick to take notice of "cheap" things where "cheapness" is uncalled for, and it properly resents them. It "gets wise" with great rapidity to the wiles of the publicity promoter and gives unmistakable evidence of it to any observer capable of seeing through a pane of glass. The truth of Abraham Lincoln's saying that you can fool all the public part of the time and part of the public all the time, but not all the public all the time, was never more forcible than at the present day, and it grows constantly more so. The public does not need a guardian to proclaim to it the difference between cream and skim-milk. It likes things that have "class"—and it is particularly susceptible to the attractiveness of names. Owing to this, many organizations and enterprises use the greatest care in bestowing names upon things for which they wish to attract public favor—and in a host of cases they have been known to pay large, even huge, sums of money, for especially appropriate ones.
>
> There is nothing that the managers of our trotting associations could do to better advantage than to give heed to these "cold facts," and take advantage of the lesson that they teach—but up to date the proportion of them that have done so is very small—and it will certainly not grow much larger so long as such exponents of the "corned-beef-and-cabbage" style of doing things as the editor of our Athènian contemporary beckons them along the pathway marked out in his utterances quoted above.
>
> Now the above argument is something in which we have absolutely no cause at stake, but—while former sad experiences, both personal and on the part of numerous acquaintances, have taught us the folly of "horning in" on someone else's funeral, we are impelled to rise to a point of order (or whatever the proper parliamentary term may be) and promulgate a few thick witted cogitations and queries of our own. Primarily, we think the Review has taken the Breeder's remarks a bit improperly, but there is no doubt concerning the seriousness with which the Review editor views his own utterances, nor does he leave room for doubt as to the aestheticism of his own chaste spirit. What a soul-mate he would have made for some of the ancient Greeks!—Sappho, or Helen of Troy, or Queen Elizabeth, or Marie Corelli, or Ella Wheeler Wilcox, for instance.
>
> But the query we fain would have answered is this: How, in the face of such a display of the finer feelings of his inner soul and of his horror-stricken loathing of anything resembling "advertising subsidization of our notable stakes," does he account for that lamentable faux pas committed in the sacred confines of his own sanctum, the christening of a certain famous light harness classic as "The Horse Review Futurity"?
>
> How it must humiliate him!
>
> Why was it not given an aesthetic appellation redolent of the locality in which it had its inception, an appellation free from all hint of base commercialism? Why (just supposing) was it not called "The Kickapoo" or "The Pottawatamie," in honor of the early residents of that portion of Illinois? or, to be more strictly local, "The Bubbly Creek," in honor of a certain fragrant inland waterway; or, as a token of love and affection, "The Lake Breeze," in memory of the one gift of God which makes a certain climatic paradise a tenable habitation for men, mules and motorcars for two or three months of the year?
>
> Or, did they wish to honor some eminent Chicagoan standing high in horsedom, why was it not named, as a compliment to that sole purveyor of authoritative race reports, "The Magnus Flaws"?
>
> All we are asking for is real information, and we will bet six bucks, Mex., that real information on this dark point is the last thing we will get.

Records Fall at North Randall Track

Lee Axworthy Beats Peter Volo — William Downs Directum I.

Some days ago when the A. P. wires carried broadcast the news that on Monday, August 16, two great five-thousand-dollar match races between Peter Volo and Lee Axworthy on one hand and William and Directum I. on the other would be staged at North Randall, interest ran very high, especially in the central western cities that were within reach of the scene of battle. Given good weather it was a foregone conclusion that there would be some wonderful racing and a great crowd, both features developing fully when the day arrived. By the grace of good fortune the day was fair, the footing excellent, people came in droves from all directions and the racing was of the record breaking variety.

In each instance, the horses pitted against each other were "ancient enemies." Peter Volo, with Lee Axworthy as his nearest competitor, had hung up some wonderful records as a three-year-old, while the meetings last season between the two great pacers furnished the thrills of the year. As four-year-olds, the trotters had never met, but Directum I. had recently gone down once this season before his younger rival, making the score even up between them.

Early in the training season when the Pastime Stable issued its defi to all comers for a match race with Lee Axworthy it was the general opinion that the stable's proprietors were nice folks with money to spend for a little sport, but Monday's race proved that they were not only after the fun but out for the coin in earnest. Having been so thoroughly proven the best of the pair last season, Volo was the general choice in the betting, but the Ohio crowd was game and backed Axworthy substantially, the recent performances of their favorite having given them confidence in plenty. Volo won the first heat by a very narrow margin in 2:02, which equals the stallion record held by The Harvester since 1910, and cuts a second and a quarter from the four-year-old stallion record of 2:03¼ made last season by Etawah. In the next heat Andrews took his colt away very fast, carrying Volo to a break and securing the pole. Closing up the lost ground at the speed required left Murphy's mount all out for the stretch brush, Axworthy winning handily in 2:03¼, the former record for the age and sex. The third heat was easier for the Cleveland trotter as Volo still felt the effects of his extraordinary efforts of the preceding mile. The race establishes a new three heat record for trotters, the aggregate time being 6:09½ as against Etawah's total of 6:10¾.

Brilliant as was the race between the pacers, the contest was not so close as in the trot, William taking the lead at the first turn in each heat and never being headed, the miles being in 1:58½ and 2:00—time that has been beaten for two heats in a race by Directum I. only, and that in a contest with William, stamping the pair beyond doubt as the very greatest of racing pacers. William's fastest mile supplants that of Uhlan in 1:58¾ as the record for the North Randall track, and that of Braden Direct in 2:01½ as the world's record for five-year-old pacing stallions. As a matter of interest at this time and for future reference the summaries of all meetings of the contestants in these great match races are appended:

WILLIAM — DIRECTUM I.

SEASON OF 1914.

Lee Axworthy (3) .....(Andrews) 3 2
Lady Wanetka (Cox), 2-3; W. J. Leyburn (McCarthy), 4-4; Saint Frisco (Geers), 5-5.
Time—2:07¼, 2:08¾.

Lexington, Oct. 6, 1914—Kentucky Futurity, purse $14,000:
Peter Volo (3) .....(Murphy) 1 1 1
Lee Axworthy (3) .....(Andrews) 2 2 3
Lady Wanetka (Cox), 3-3-2; Ortolan Axworthy (McDonald), 4-4-4.
Time—2:07¼, 2:05, 2:03½.

SEASON OF 1915.

Cleveland, Aug. 16, 1915—Special trot, purse $5,000:
Lee Axworthy (4) .....(Andrews) 2 1 1
Peter Volo (4) .....(Murphy) 1 2 2
Time—2:02, 2:03¾, 2:04¼.

VOLGA (2) 2:13¼.

Prominent among the eastern sensations concerning whom a certain amount of information has trickled through to the coast this spring is the two-year-old filly Volga, sister to Peter Volo, in Billy Andrews' stable. Volga is touted as the one and only two-year-old trotter in the country and of course may be great enough to survive this handicap and go out and win everything in sight, but we are a bit inclined to the view that when the big stakes are raced this fall there will be a few others finish inside the flag. Like a good many others among the headliners, Volga is an "individualist" of the extreme type, the following story from the Grand Rapids Herald throwing some interesting light upon some of her most pronounced traits:

"Volga is a medium size, trimly made two-year-old daughter of Peter the Great. She is pretty as a picture, gaited to the point of perfection, knows nothing but trot when on the race track, and instead of being (or having been) trained for speed, she has been and is being trained with the sole idea of seeing how slow she can be persuaded to go on the days when it is her turn to take one of the semi-weekly 'workouts' all trotters must have as an important feature of their training.

"Already, although she has started in but one race, Volga has tabbed herself as a champion in the minds of all who have seen her perform. While being "talked back" by her driver, W. J. Andrews (who has Lee Axworthy, the star among 1915 trotting stallions, in his stable), Volga trotted a mile in 2:11 over the Cleveland track. 'Amazing!' said the railbirds, 'but too fast.' That criticism would have been true enough in case of almost any other colt than Volga in the history of trotting, but it did not apply to the flying filly, because that 2:11 mile meant nothing more to her than covering the distance in the 2:40 would mean to the ordinary good two-year-old trotter.

"Right now, on what they have seen her do, horsemen of the critical class, men who have seen the colt champions of the last half century, rate Volga up to a mile in 2:07, and when it is considered that the world's record for two-year-old trotting fillies is 2:07¾, and that it was made in October, some idea of what Volga might do next fall were she coaxed to go fast instead of being coaxed to go slow, may be had. And aside from being a speed miracle the chestnut filly has notable points.

"She is a perfect storage tank of energy, having so much more 'gimp' than any of the great colt trotters that have preceded her that they seem by comparison to have been tame and spiritless.

"No distance is too long for Volga to trot—if you let her have the say—and no rate of speed is too great for her to attain, according to her ideas. Brought on the track when her day for 'work' rolls around, she will play like a kitten, taking little side jumps at the most unexpected moments, then darting ahead as if Satan and all his hosts were after her, and perhaps changing from that mood to one which says to her 'pace a little," whereat she will scoot away on the smoothest pace you ever saw, the exhibition being in every way so perfect that one seeing her then for the first time never would dream she knew of any other mode of locomotion.

"But when the play spell is ended, when she has pirouetted and caracoled and waltzed her way around the track a couple of times, and at last Andrews turns her head the right way of the course, Volga undergoes a transformation. No more play spells, no jumping, no pacing. She just drops her beautiful head into the check, shifts to a beautiful, space-killing trot and is ready and eager for whatever her driver desires in the way of speed. She knows perfectly well she is to be permitted to trot fast. Not as fast as she would like to go—oh, no—but faster than any other colt of her age can go, and faster even than most aged horses. Then it is a coaxing match on the part of Andrews. It would never do to take the beautiful filly back to a slow rate by main strength, for she would fight that sort of treatment from the instant it was begun and in a short time become a confirmed 'puller,' would be what is known as 'speed crazy,' and that means worthlessness as a race horse.

"So Andrews talks to the filly, now and then exerting gentle pressure on the lines to explain the point of his argument, and Volga (who is at heart the best natured thing in the world) nearly always will come to his way of thinking and do about as he wants her to in the speed line. But now and then she just cannot hold in any longer, and away she goes with a burst of speed that if kept up for a mile would shatter all the records for her age. No use to pull her then—that would only make matters worse—so away she goes on the long sprint, and when the wire is reached there is another fast mile to be put down on her training chart—which in the case of a great trotter is as carefully kept as is the chart the nurse in the hospital guards so closely until the doctor has arrived and looked it over.

"Something like $30,000 worth of stakes can be won by Volga as a two- and a three-year-old if she is fortunate to finish first in all those to which she is eligible, and her victory in every last one of them is merely a matter of her keeping sound—for it is plain nothing of her age comes near enough to the flying filly in speed to give her a hail, and that accidents barred, she will 'walk in' every time she turns for her money."

———o———

Grand Opera, the Canadian pacer, enjoys the distinction of being the only horse to be distanced twice in the same race this season. He was a hot favorite in the 2:10 pace at Rockport and after a singlefoot, run and pace specialty was distanced in the first heat. Scenting fraud the judges placed him and substituted another driver, with no marked improvement. The original teamster was restored for the third heat and again the horse whose name describes our idea of no kind of a show for our money saw the flag drop. This time he stayed out, and Guy Rockwell suggests Ragtime as a more fitting cognomen.

LEXINGTON, KENTUCKY.

Aug. 2—Free-for-all trot, for cups.
Boquita McKinney, b m by McKinney (R. L. Nash) 1 1

———o———

Single G. gets his name from a peculiar white mark in his forehead resembling the seventh letter of the alphabet. Any name is good if the horse is "all there," though some are less classic than others.

OE MARKEY AND THE DERYDERS AT PEORIA.

Charley and Mrs. DeRyder made the trip from California in their motor, stopping enroute to race, but using no other means of transport during the entire trip. To me the two-year-old colt Anvilite 2:21¼ was of particular interest, for he is the first record performer for one of my long-time favorites, Anvil 2:02¾. Charley stated that after winning with the youngster at San Francisco and coming east he had very little chance to give him regular work, and as a consequence he was at present "short." He worked him in 2:20 on Thursday and I can attest that Anvilite is a real trotter. He is of rather above average size and is very highly developed in a physical way for one of his age. In fact, one could well be fooled in taking him for an aged horse. His dam is Martha Spy, by The Spy, whose first foal, a filly by The Harvester 2:01, was a sensational yearling for Mr. Geers, but died early the following spring. Mr. Geers bred this colt and also sold the dam to R. J. MacKenzie, of Winnipeg. Charley smiled when I told him that Volga 2:13¼, the filly that he has to meet in the futurities, could perhaps shade 2:08. He didn't seem to doubt my claim for Volga, but the point is he wasn't scared a bit. Evidently Charley thinks that Anvilite needs to take off his hat to no colt or filly of his age. It certainly would be a fine thing for Anvil if he would sire a star off the reel, his stud career just being in its inception. Maymack 2:04½ got a trifle off in shipping, but on Saturday Charley worked her in 2:06½, I was told, but didn't time the mile.

"Brother Will" DeRyder, who won the $20,000 race at San Francisco with Spriggan 2:08¼, annexed the 2:09 trot on Saturday with the now-noted gelding. Will told me that after the Exposition race Spriggan became ill and was also troubled with a curb. He has rounded to, however, and from the manner in which he trotted through the stretch in the second heat I take it that he has a lot of speed. He is an odd-looking gelding, being a couple of inches higher over his coupling than at the withers, but he is clean gaited, and needs no boots, although they are sometimes used for protection.—Horse Review.

Frank Childs is piloting Our Colonel again but was just outside the money at Grand Rapids on getaway day.

Runners Hold the Boards at P.-P. I. E.

With a card of six races, having for its feature the Exposition handicap for three-year-olds and upward at one mile, thoroughbred racing comes back to California this afternoon, the day ushering in the twenty-five day meeting of the Golden Gate Thoroughbred Breeders' Association. Promptly at 2:15 the starters for the six furlongs will be called, and well in advance of that time it is the belief of the sponsors of the meet that the big grandstand will be housing a record breaking crowd. Ever since the thoroughbreds began coming in some days ago interest has increased steadily and the crowds of visitors that have been in evidence at the morning gallops and at the stables throughout the day speaks encouragingly for the prospect for a good attendance at the daily contests.

The program for today includes the following events: Six furlongs, three-year-olds and upwards, $400; four and a half furlongs, two-year-olds, $300; five furlongs, two-year-olds, $300; Exposition handicap, three-year-olds and upward, one mile, $1,000 added; six furlongs, three-year-olds and upward, $300, and mile and a sixteenth, three-year-olds and upward, $300. Good fields are provided for each race, and the handicap promises some especially interesting features. Twelve entries were made originally and probably eight or ten will accept the weights assigned. Owing to her recent performances with a good load up, Celesta will be called upon to shoulder the heaviest burden, 137 pounds, but the Wingfield crack looks amply able to carry it. She is an exceptionally pleasing type of the thoroughbred, and it is doubtful if there is a mare in the country today possessed of more of the qualifications of genuine greatness than this daughter of Sempronius and Rezia by Meddler. The Wingfield stable is the best money winner in the west this season, with a record of eighteen firsts out of twenty-five starts, and every member of the string brought over by Trainer George Strate is "up to something."

Californians are showing a lot of interest in the horses from El Palomar, President Clark's San Mateo establishment, of which there are nearly a dozen present that promise to figure in the fray to a considerable extent, and as Mr. Clark is the gentleman to whom the existence of this meeting is largely due, no one will begrudge victory to his entries.

John Berry, who brought up several head from Santa Anita, has his hands full with visitors who flock to his stalls to see famous old Rey el Santa Anita, now in his twenty-fourth year and looking like a youngster. A visit to him certainly recalls some stirring days, and he is sure of a warm reception this afternoon when, with others from the Baldwin rancho, he will be paraded before the stand between races.

While most of the three hundred odd thoroughbreds that are present shipped well and stood the change nicely, the horsemen now here were less fortunate in this respect than were the trotting horse trainers here in May and June, as several horses have been severely affected and one or two have died. General health is good, however, and all will be nicely acclimated before the meeting is far under way.

Six races will be staged daily with the exception of Sunday until September 18 if all goes well, the first event being called promptly at 2:15. Superintendent Maxwell after considerable difficulty has provided fair footing and on the long stretches some fast time should materialize. The entries for the seven feature events of the meeting are as follows:

Exposition handicap, August 21, for three-year-olds and upward at a mile, $1000 added by C. W. Clark—El Palomar Stable's Lovins; Nevada Stock Farm's Celesta, Star Shooter, Scarlet Oaks; John Lowe's Brynlimah; Charles L. Stephenson's Moddelle; Daniels & Hodge's John Graham, Loftus; California Stable's Rash; J. C. Ferriss' Alda; A. G. Dunlap's Stolen Ante; George W. Billerman's W. C. West; Tigue & Bussey's Be.

The Stewards' Cup, August 28, selling stakes, for three-year-olds and upwards, at seven furlongs, $1000 guaranteed—El Palomar Stable's Lovins; Charles L. Stephenson's Moddelle; Daniels & Hodge's John Graham, Loftus, Commissioner; J. C. Ferriss' Alda; A. G. Dunlap's Stolen Ante; Ramon Macias' Theodorita; J. W. Parker's Rey; J. W. Billerman's W. C. West; May Doyle's Finnigan; Charles Hawk's Louise Paul; Tigue & Bussey's Be, Seneca.

The President's Cup, September 4, handicap, for three-year-olds and upward, at a mile and a furlong, $1000 added and winner to be presented with cup donated by C. W. Clark—John Lowe's Brynlimah; Nevada Stock Farm's Celesta, Star Shooter, Star Bottle, Scarlet Oaks; Daniels & Hodge's John Graham, Loftus; California Stable's Rash; Frank Rinehart's Zoroaster; J. C. Ferriss' Alda, Rhodes; N. Jortall's Pro Realis; A. G. Dunlap's Stolen Ante; J. W. Parker's Rey; George W. Billerman's W. C. West; W. H. Tully's Executor; Tigue & Bussey's Be.

The Geraldine handicap, September 16, for three-year-olds and upward, at six furlongs, $1000 handicap—Daniels & Hodge's Loftus, Commissioner; El Palomar Stable's El Palomar, Lovins; Nevada Stock Farm's Scarlet Oaks, J. C. Ferriss' Magikon; T. Goulding's Paporita II; A. G. Dunlap's Stolen Ante; Ramon Macia's Theodorita; W. J. Dunn's Thistle Belle; Nevada Stable's Joe Hooker; Howard & McDonough's Eureka; T. O. Webber's Spring Valley; A. Neal's Domica; Tigue & Bussey's Seneca.

The Golden Gate handicap, September 9, for three-year-olds, at a mile and a quarter, $1500 guaranteed—W. H. Tully's Executor; Frank Rinehart's Zoroaster; California Stable's Rash; Nevada Stock Farm's Celesta. Star Shooter, Star Bottle; John Lowe's Brynlimah; Daniel & Hodge's John Graham, Loftus, Commissioner; J. C. Ferriss' Alda, Rhoades; Tigue & Bussey's Be; George W. Billerman's W. C. West; J. W. Parker's Rey; N. Jortall's Pro Realis; A. G. Dunlap's Stolen Ante.

The Juvenile handicap, September 11, for two-year-olds, at five furlongs, $500 guaranteed—Kinkead Live Stock Company's Syphone Boy; T. O. Webber's Cuyama; A. Neal's Cudihee; California Stable's Toastmaster; Nevada Stock Farm's Washoe Belle, Tze-Lsi, Mary Jay; El Palomar Stable's Aunt Sal, Frisky; Daniels & Hodge's Leah Cochran; J. C. Ferriss' Asama, Lola; A. F. Ross' Von Lady, Wheelation; Charles Stout's Spokane Queen, Early Wright's Schulenburg; T. B. Munford's Brooks.

San Francisco handicap, September 18, for three-year-olds and upward, at a mile, $1000 guaranteed—T. O. Webber's Spring Valley; Charles L. Stephenson's Moddelle; W. H. Tully's Executor; Frank Rinehart's Zoroaster; California Stable's Gano, Rash; Nevada Stock Farm's Celesta, Scarlet Oaks, Star Shooter, Star Bottle; John Lowe's Brynlimah; El Palomar Stable's El Palomar, Lovins; Daniels & Hodge's John Graham, Loftus, Commissioner; J. C. Ferriss' Alda, Rhodes, Makikon; Tigue & Bussey's Be; George W. Billerman's W. C. West; Nevada Stable's Joe Hooker; F. T. Shortell's Kootenay.

NORTHWESTERN NOTES.

Port Townsend, Wash.

While there will be no fair in Jefferson county this fall, it is just possible a little race meeting will be arranged. Chas. Williams has four horses in training at the track, which is in very fair condition.

Duroc Hal by Hal B. 2:04½ is owned by Sam McGee, the livery and auto man here. He is going good and will be started in the 2:18 pace at the Southwest Washington Fair at Centralia and at the Gray's Harbor county fair at Elma, Wash., the week following.

Duroc B., a three-year-old pacer by Duroc Hal, owned by J. W. Worthington, the hotel man of Chimacum, Wash., will start in the three-year-old pace at Centralia.

Lady Rozell by Romont, dam May Moon 2:13¼ by Baronzale, is a very nice three-year-old trotter, but will not race this year. She is bred to Burion, owned by A. J. Boyle of Seattle, the Larrabee-bred horse, sire of A. J. B. 2:17½.

J. M. Thomas has the good mare, Diavolo L. by Diablo, dam Lillian Langtry by Nephew. She is in foal by Duroc Hal and will not race. Thomas also has a green gelding by a son of Antrim that is a good prospect.

Peter Mansen has Lady Lou by Kinney Lou 2:07½. He is giving her regular work himself and she is going nicely with promise of much speed.

Seattle.

At the Madison Park track is more activity than one might expect to see. Four strings of harness horses and two men with runners are quartered there. Chas. Guion has Maud Bond, a three-year-old filly by The Bondsman, dam Nusta 2:18½ by Nushagak. She is a big, growthy filly and Guion does not believe she has come to herself yet, though she has a lot of speed and will be raced at least at Centralia and Elma. She is also paid up in three California futurities. He also has his own four-year-old, Gertie R. by Byron Corbett, dam Flaxie D. by Diablo.

Duke McManus has two of his own. Sea Waif is a green mare by The King Red, dam Sea Queen by Vice Regent. She is taking her work well and if she goes on will race in the $20,000 trot at San Francisco this fall, in which she is paid up. His other is Duke, a green five-year-old, Main Hero, and Floradoro Z. by Zombro. Both are entered all around the circuit and both are going sound.

C. W. Ray of Bellingham is here with Bonnie B. 2:17½ by Hal B., dam Almak, and a green seven-year-old trotter of uncertain breeding. Bonnie B. is entered at Centralia and Elma.

E. L. Henderson has the runners, Beauty and Goldie, and P. C. Pangborn has Susan F.

Most of the horses will leave for Centralia for a few days.

Baker, Ore.

Reports from Baker indicate that the county fair at that place will be by odds the best ever held. Notwithstanding general financial conditions the citizens of Baker county have met the issue and have put up more money for their fair than they ever have in the past. This has had the very natural result of stimulating the interest.

There has been hung up for harness races $3,400 with an additional sum for special local harness horse races, owners to drive. There will be five purses for runners, including the Baker Derby. Other races are a four-day relay, one for cowboys, one for cowgirls, one for girls and one for boys, restricted to ponies fourteen hands and under.

Baker business men are showing their loyalty, closing everything tight two days during the fair and enjoying the sports with the rest of the population.

The harness horses in the stables of Fidler, Wilbourne, Brady, Butches, McGoldrick and Steinman are all doing exceptionally well and are entered through the North Pacific Circuit. "What I have seen from the 'railbird stand' leads me to believe that some of the coast horsemen will think they have struck some real 'bear' when they meet here," writes Joseph Waddell, manager racing program.—Rural Spirit.

Montreal this week and next.

JOHN A. McKERRON TO RETIRE.

Readers of the Breeder and Sportsman will learn with regret that John A. McKerron has decided to close up his establishment and retire from the business with which he has so long and so successfully been identified, the manufacture of racing equipment of the very highest order and the vending of general horse and stable accessories of standard quality, Mr. McKerron having come to this conclusion as a result of the dearth of racing and training and the passing of the road horse, the present demand for equipment of the "McKerron" kind not being sufficient to justify the maintenance of his plant. The manufacturing end of the business has already been discontinued; no orders for new work will be received, and just as soon as cut prices clear the shelves and cabinets of the bulk of their contents the store on McAllister street will be closed and will remain so, until reopened by other parties for some other line of endeavor.

With the retirement of Mr. McKerron, the Pacific Coast states are left practically dependent upon factory made harness and boots, as there is no one in all this section who approaches him in the "finer parts" of the work of fitting and turning out work of this kind. That a set of harness or a pair of boots were "McKerron made" has for years stood as an unchallenged guarantee not only here but in other sections of the world where the local products have found their way, for the name stood for nothing save the best that could be built for the purpose for which it was intended. Some years ago Mr. McKerron could have sold the use of his name for a trademark for a tempting sum, but refused rather than risk the chance of inferior goods finding their way on the market bearing his device.

Just what his plans are is not yet known, but as soon as the store is closed, which is merely a matter of a few days, the first thing in order is a good long rest in the country. Whatever he does or wherever he goes, John McKerron takes with him the best wishes and deepest respect of scores and hundreds of people with whom he has had relations, business or social, during the thirty-nine years of his active career in San Francisco. Horsemen will miss him, and how much they will miss him they do not yet begin to realize.

MISPLACED CONFIDENCE.

For the greater period of the nearly quarter of a century which marks the identification of the writer with light harness horse affairs the Year Book was as "by day a cloud and by night a pillar of fire" in directing our groping steps to sources of correct information. It is pleasant to record the fact that during the most of this period our confidence was rarely misplaced and we found the official records, as a general thing, a mainstay and a "very present help in time of trouble." It is difficult to eradicate early impressions and shatter deep-rooted beliefs which have ripened into faith, but we must confess that the experiences of recent years have convinced us that there is no longer justification for our trust, and that the confidence which was once supreme is today "a house built upon the sands." We no longer turn with unquestioning faith to the book which still bears the name of Wallace, for we have found that it frequently bears false witness and holds out lights that mislead.

The foregoing is impelled by a discovery but for which we would have been led to impart some faulty information concerning one of the central figures in the racing at the recent Panama-Pacific Exposition meeting at the other coast. The concurrent testimony of all who have written of the winner of the $20,000 2:06 pace on the closing day agrees upon the sex as a mare, and she is even pictured in our California contemporary as the "racing queen of the Pacific Coast"; yet in the Year Book, in the table of 2:30 trotters and that of 2:25 pacers, in the index and in half a dozen other places, White Sox is described as a bay gelding. As there is nothing in the name to indicate the sex, we should have relied on the Year Book and have been led into error but for the aforesaid testimony of those who have seen White Sox and call her a mare. The matter might ordinarily be considered of trivial importance, but it is at least worthy of attention and justifies criticism when it involves a performer who has taken a trotting record of 2:13¼ and a pacing record of 2:06¼, besides earning the further distinction of winning a $20,000 purse.—Trotter and Pacer.

Loe Blossom, who ranks as the season's most sensational forenoon trotter, has been sold by Edward Peterson of Omaha to ex-Congressman McMillan of New York, Frank Childs turning her over to John Wall some days ago. John's luck for a starter was no better than Frank's, as she was behind the money in time much slower than she is easily capable of negotiating. All winter and spring she looked like the candy, but when taken by the neck she begins climbing in front and misbehaving in general. Wall's patron will give her a thorough trying out and if she absogoldarnlutely refuses to race she will be sent to the McMillan establishment and bred to Wilteen 2:12¼. The price paid has not been made public, but it is an everlasting cinch that it doesn't begin to approach the round ten thousand offered for her by Lon McDonald.

LAST DAY AT GRAND RAPIDS.

Grand Rapids, August 13—Getaway day here was devoid of feature events, the card being composed of three class races which were won in straight heats, two well backed favorites winning for Tommy Murphy while a third choice, Lelia Patchen, took the 2:06 pace. Ed Geers was distanced for the second time this week, so that all is not a bed of roses even in high society. The summary:

Grand Rapids, Aug. 13.—2:13 trot, purse $1,000:
Sadie S., b m by Archdale.....(Murphy) 1 1 1
Dick Watts, b h by Gen. Watts.....(Rodney) 2 2 2
F. A. L., b g by Anderson Wilkes.....(Gosnell) 4 3 4
Victor Star (Valentine), Blue Feather (Cox), Roy Miller (Grady), John Gwynne (Mott), Nowaday Girl (Lasell) also started.
Time—2:07¾, 2:07¾, 2:07¼.

2:09 pace, purse $1,000:
Major Ong, b g by Major Gantz.....(Murphy) 1 1 1
Bingen Pointer, b g by Bingen.....(Snow) 2 2 2
The Importer, b g by Inline B.....(Jones) 4 3 4
Little Director (Valentine), Budd Elliott (Geers), Clara Walker (Lasbury) also started.
Time—2:08¼, 2:08¼, 2:08½.

2:06 pace, purse $1,000:
Lelia Patchen, bl m by Dan's Brother.....(Snow) 1 1
Rastus, b g by Liberty Boy.....(McDonald) 2 2
Frank Patch, br h by The Patchen Boy.....(Cox) 3 4
Fay Richmond (Jones), Our Colonel (F. Childs), Ben Locanda (Murphy) also started.
Time—2:06¾, 2:05½.

WILLIAM REPORTED SOLD.

Eastern dispatches to the local dailies this week state that just prior to shipment from North Randall to Montreal Tuesday, the great pacer William 1:58½ passed from the ownership of A. E. VanAtta of Otterbein, Indiana, to that of C. K. G. Billings of Curl's Neck Farm, the price reported being $35,000. The dispatches state that both owner and trainer were reluctant to part with the colt champion even at that figure. There is a long line of intimate history connecting William and the Van Attas and Billy Marvin, and the reported sale is something of a surprise, though the price represents a figure in excess of his probable earning capacity as a race horse.

If William has been purchased by Mr. Billings, it is to be hoped that he will not be withdrawn from racing and his future operations confined to exhibitions, which is the usual case in such instances. Mr. Billings seldom races a horse, but the public wants to see the Indiana pacer given a chance to show his real quality, pitted against Directum I. or any others that appear. He is just entering what should be the years of his prime, the fifth and sixth, and the question of superiority in certain circles has not yet been definitely settled. Whether the horse is to remain in Marvin's hands or go to another trainer's is not yet known, but friends of all parties would like to see Marvin go on with him—as did Myron McHenry with Dan Patch when that great champion changed hands.

Billy Andrews had a buyer for William some weeks ago, and it is possible that he was acting for Mr. Billings at that time. In case the reported sale is a reality, Mr. Billings has departed from his usual custom of devoting his affections almost exclusively to the trotter, as he has never displayed great interest in the lateral gaited lads. If he has purchased William he has made an excellent selection and will have small grounds for regretting the action. Perhaps, under the Billings colors, we may get to see him this fall at the P.-P. I. E.

DEATH OF W. L. SPEARS.

W. L. Spears, one of the best known and most popular trotting horse breeders, died at Hickorywood Farm, near Lexington, Tuesday, after a long illness. Though he had been in a rather serious condition for some time past, it was not generally known and came as a surprise. Mr. Spears has never been a breeder on a large scale, but has owned a few mares all the time and has bred a large number of high class trotters. The star of these was probably the former champion three-year-old Colorado E. 2:04¾, at which time he also had the credit of breeding the champion two-year-old, Trampfast 2:12¼. Among the others that he bred was Susie Jay 2:06½, Ruth McGregor 2:08½, a good race mare; Thistle Doune 2:09¼, sold as a yearling for $7,500; Shakespeare (3) 2:09[3/4], trial 2:04[1/2], winner of the pacing futurity; Seraphina 2:16¼, that divided second, third and fourth moneys in the Kentucky Futurity the year it was won by Peter the Great; Peter McKlyo (3) 2:12¼, a fast California trotter; Mediumwood 2:13¼, a horse of 2:10 capability; Lakewood, Princewood 2:18½, Hickorywood (2) 2:29, all star trotters in their day.

The last good trotter to perform of his breeding is this season's crack half mile track trotter, Ima Jay 2:13¼, being raced by Harvey Ernest. Mr. Spears has been decreasing his stud for the past three or four years and sold the last of his mares in the February sale here. He owned at the time of his death but one trotter, a yearling filly by Colorado E. (3) 2:04[3/4], out of Minnie the Heiress 2:19¼, the dam of Ima Jay. During the past few years Mr. Spear was always thought of in connection with the fast trotter and good sire, Jay McGregor 2:07, a horse which he did not breed, but owned, and closely connected with many of the good trotters he bred.—Western Horseman.

Drink Jackson's Napa Soda.

FUN DRIVERS BACK AT THE STADIUM.

Owing to the fact that the exposition track is loosened up for the runners, the members of the San Francisco-California Driving Club have gone back to the Stadium in Golden Gate Park for the holding of their weekly matinees, the fun commencing there tomorrow afternoon at an early hour. There will be some "strangers" in evidence in tomorrow's fields, a few horses making their first start of the season and several others reappearing after an absence of some weeks. The entries are as follows:

2:18 pace—Tom Murphy, E. T. Ayres; King Pointer, H. Campodonico; Emma M., William Malough; Victor Pointer, Dan Keating; Palitea, John Kramer.

Free-for-all trot—St. Patrick, J. J. Ryan; Ella M. R. (Geo. Machado); Miss San Francisco, Al Schwartz.

Free-for-all pace—Bradmont, G. J. Giannini; Mabel Dillon, B. Cohen; Dick W., A. Ottinger; Bondalean, Charley Silva.

2:15 pace—Hamburg Belle, J. Ginocchio; Senator H., Joe Kidd; Pointer Belle, Joe Kidd; Happy Dentist, J. J. Ryan; Jack McDonnell & Conlon; Zorankin, Frank Goularte.

2:25 mixed—Peaches, F. P. Lauterwasser; G. J. P., R. Consani; Ateka, B. Cohen; Cookey, Joe Vermet.

PEORIA, ILLINOIS.

Peoria, Ill. (half-mile track), Aug. 5—2:09 pace, purse $1,000:
Fred Russell, b g by Little Frank....(Hersey) 1 2 1 1
Tommy D., b g by Tommy the Irish Boy..
..... (Glasscock) 2 1 3 4
Joe Murphy, br g by Chambertin.....(Sanders) 3 3 2 2
Society Leader, br m by Dick Wilkes..(Smith) 5 4 4 3
Imbro, 4-5-dr.; Gipsey Margrave, and Black Ball, dis.
Time—2:08¼, 2:07¾, 2:09, 2:11½.

2:25 pace, purse $600:
Sayde Densmore, ch f (4) by Don Densmore....
..... (Thomas) 1 1 1
Madam Mack, br m by Expressive Mack.....
.....(C. DeRyder) 2 2 3
Billy Law, bl g by Law King.....(Squires) 4 3 2
Bob White, bl g by The Patchen Boy...(Wilson) 3 4 5
Justice B., 5-5-4; Canute, dis.
Time—2:09¼, 2:08¾, 2:08¼.

Three-year-old trot, purse $600:
Humfast, b f by Trampfast.....(Wishart) 1 1
Allie Watts, ch f by General Watts.....(Edman) 2 2
Jauntfast, b c by Trampfast.....(Weeks) 3 4
The Exposer, br c by The Exponent.....(Donahue) 4 3
The Index, 5-5.
Time—2:16¼, 2:13¼.

2:19 trot, purse $600:
Slip Past, b m by E. M. R.....(Taylor) 1 1 1
Colonel H., b g by Constenaro.....(Ganoung) 2 2 4
Eureka Thorn, b h by Jay McGregor.....(Grant) 4 3 2
Red Silk, b g by Silkwood.....(Breitenfield) 5 5 3
Celia Dillon, 3-8-8; The Jester, 6-4-6; Dr. Luster, 9-6-5; Maud Linton, 7-7-9; Betty Scott, 8-9-7.
Time—2:11¾, 2:15, 2:15.

2:11 trot, purse $1,000:
Princess Welcome, gr m by Lodaller.....
..... (McLaughlin) 1 1 5 1
Governor Mason, b h by Colonel Mason(Bagby) 2 2 1 2
Ham Patterson, br h Alfred G.....(Taylor) 3 3 2 3

Time—2:11¼, 2:08½, 2:09, 2:11½.

NOTES and NEWS

William 1:58½,
Flower Direct 2:00¾,
Peter Volo (4) 2:02,
Lee Axworthy (4) 2:03¼,
And so on up the line!

◈◈◈

The Centralia-Chehalis fair is the attraction of the North Pacific circuit for next week, with some good sport anticipated.

◈◈◈

Russell Boy and Pop Geers evidently "had their troubles" at Montreal, as they failed to land in the money in the Queen Mary stake.

◈◈◈

And once again the thoroughbreds are in our midst! It seems like reading a page from a favorite old book to visit the grounds and see the morning exercise.

◈◈◈

Joe Carson is affording the boys down the Great Western circuit the opportunity to lay a wager or so when the spirit moves them to pursue the fickle goddess.

◈◈◈

Sadie S., who won the 2:13 trot at Grand Rapids in excellent style, was worse than a fire cracker with a short fuse at Montreal,—last in a field if six with the fastest heat in 2:09½.

◈◈◈

William and Directum I. were scheduled to meet at Montreal prior to the report of the sale of the former, and it is to be hoped that the race will go. The Canucks will get a real thrill of it does.

◈◈◈

Nearly forty-eight thousand dollars went through the pari-mutual machines last Saturday at Reno, with lots of people unable to get their money down owing to the crowd. Evidently Nevada folks rather like the system.

◈◈◈

Can you imagine the feelings that come to a man that finishes third in the M. and M. solely because he had previously sold the two horses that beat him? That was Walter Cox's predicament at Detroit the other day.

◈◈◈

That three-year-old John A. McKerron colt, Deroche, in Ed Geers' stable, must be a pretty fair kind of a youngster, as at Montreal Thursday he was 2-1-1-2-2 in a field of aged horses in time from 2:09½ to 2:11¼.

◈◈◈

There will be a draft horse show at Rio Vista on Thursday, Sept. 9, cash prizes being offered for a very wide range of classes. Entries close on Wednesday, September 1, and all particulars may be obtained from Dr. A. F. Hanna, Rio Vista, who is the secretary of the organization back of the exhibition.

◈◈◈

Flower Direct and Braden Direct were to have gone to the mat last Monday at North Randall for a thousand dollars a side, but for some reason the match failed to materialize. Anyway, five heats in the average time of 2:01 3-5 furnished fair entertainment for one day.

◈◈◈

The premium list for the Fresno fair is out and its offerings cover the ground fully in all departments save that devoted to light harness speed contests—the same being conspicuous by its absence. Intending exhibitors may obtain copies of the catalog by addressing the secretary or other officers of the association. Our bet is that they will eventually welcome the horse races back with open arms.

◈◈◈

John A. McKerron is going out of business and closing out his stock at almost any kind of figures—figures that are ridiculously low when the cost and quality of the offerings is considered. Articles of most general use are being snapped up pretty rapidly, and wise horsemen will make it a point to drop in at the store at 122 McAllister street at once and pick out genuine bargains in things that are in daily use in and around their stables. The store will be open but a few days longer.

◈◈◈

A dispatch from Santa Ana states that Fritz Schultz, owner of the blind racing horse Aladdin, and between-times upholsterer, has hurled his hat into the ring, and challenges Ralph Fuller's Pelee, or Hershel Johnson's Strathmore Jr. to a race for any amount, any distance, from one jump to 100 miles, any day or night on the Santa Ana track. The usual one-mile distance is preferred. "Fritz" is not alone in his belief that his horse can trip either of the two other critters, and when the event is pulled off no doubt a large crowd will be attracted to the home track. It is too bad that Zulu Belle has gone east, as she might be included in the "one jump" event, providing the other contestants wear the straps, as her former owner, one Adolph Ottinger of this city, offered to match her at this style of contest against any horse in the world for anything from a pretzel to ten thousand bucks. At the P.-P. I. E. track she cleared two four by eights eight feet apart without an effort or a misstep in her panties.

The Fasig-Tipton Company announces November 22 to 27 as the dates for the Old Glory auction in Madison Square Garden this fall, and looks forward to a healthy market for the right kind of material at that time.

◈◈◈

The Sonoma County Driving Club is holding a record meeting today and there will be some additions to the standard list as a result thereof. Next Sunday the members of the same organization will probably put on a matinee at the Santa Rosa track.

◈◈◈

The new track at Omaha is a few seconds slow but the meeting early this month was a success in every way. Age will improve the going, and the association promises constant improvements along other lines in connection with the plant, so Omaha is probably back on the map to stay.

◈◈◈

One of the best races of the season for the class was the 2:13 trot last Friday at Grand Rapids. Sadie S. by Archdale took the event in straight heats for Tommy Murphy, going the three miles in 2:07¾, 2:07¾ and 2:07¼, with Dick Watts second right through the race.

◈◈◈

Light harness horsemen have long found J. David West's establishment at 1265-67 Golden Gate avenue a good place to trade, and owners or trainers of thoroughbred stables will have the same experience if they pay it a visit. All kinds of "tack," accessories and veterinary remedies are always on hand.

◈◈◈

Hal Boy and Judge Ormonde had another hot battle at Montreal on opening day in the big pace, the Columbus horse again having the best of the summary, though Hal Boy lasted the longest. Marvin is always trying and will yet put one over on the eastern bunch with the game little Hal B. gelding.

◈◈◈

We have Budd Doble's word for it that the brood mare Bonnie Ailse 2:08½ and her two Wilbur Lou (3) 2:10¼ foals advertised for sale by F. D. Myers are right in every way. They are at Hemet Stock Farm and are worth a whole lot more than the four hundred dollars asked for the three.

◈◈◈

M. L. Woy was in town from Fresno during the week and reports that his three-year-old trotting filly Florence B. by Bon Voyage 2:08, out of Loma B. (dam of Albaloma 2:08¼) by Stam B., is working very nicely for Charley Clark. Schuyler Walton also has some futurity candidates he is working on, but affairs in general at the Fresno oval are quiet.

◈◈◈

Entries close Monday for the eighteen open events at the Indiana state fair, the purse in each instance being one thousand dollars, the classes ranging from 2:03 to 2:25 for pacers and 2:08 to 2:25 for trotters. Secretary Downing inaugurated a straight three per cent basis for entry fees and a generous patronage is assured in return.

◈◈◈

Charley DeRyder drove two horses to second money in their starts Wednesday at Galesburg, Bertha Carey in the 2:14 trot and The Proof in the 2:20 trot. If Charley's program is arranged so that he can continue to drive the Keefer & Spencer trotter you may look for them to head the summary any day, as they are beginning to get acquainted nicely.

◈◈◈

The popularity of the horse in New England is well attested by the program of the Marshfield Fair Horse Show, to be held August 26 in connection with the Marshfield, Mass., fair. Thirty-one classes are included, a silver cup being awarded the winner of each class. Thomas W. Lawson is president of the association, and the horse show is in the capable hands of A. W. Davis, one of the old time eastern horsemen who has numerous acquaintances and friends here on the other side of the continent.

◈◈◈

Who do you suppose is occupying a comfortable stall out at the exposition stables? Nobody but good old Rey el Santa Anita! Over a score of years have passed since he made his first bow to the public, but Pappy Time—and the owners—have dealt kindly by him and he is in excellent condition. He is by long odds the most frequently visited horse on the grounds, for if an opposition candidate for governor could rally to his support as many voters as Rey el Santa Anita has friends in this world, Hi Johnson et al. would think a tidal wave had landed them in Galveston.

◈◈◈

C. B. Wood, formerly secretary of the Arizona State Fair, arrived in San Francisco with his family last Friday for a visit of several days' duration at the exposition. While the change in climate is fairly noticeable, Phoenix folks became accustomed to a considerable amount of moisture during the fall and winter just passed, so the Woods party has not suffered greatly from the fog and ocean breezes. While "C. B." is no longer officially connected with the Arizona fair and devotes his time almost entirely to looking after the welfare of Uncle Samuels' postal service at Phoenix, he is as ardent a racing fan as ever and is taking much interest in this year's big show, which has been dated to follow the fall meeting at the P.-P. I. E. in order that visiting horsemen may drop off and round up a few more bags of oats for winter. The home track, as usual, is in first-class shape and Arizona horsemen have quite a number of good ones in training there.

C. W. Bowers of the firm of Ruby & Bowers of Davis is hard at work assembling and fitting a great band of draft horses for exhibition at the fall show at the exposition. The big boys and girls composing the lot are as good as they make 'em and will go into the show ring with everything in favor of their annexing a number of ribbons. Business with Ruby & Bowers is good—so good that a new barn will probably be necessary in the near future to take care of it.

◈◈◈

Starter C. D. Stevens was among the early arrivals from Reno, and every morning has found him at the track patiently working with the green ones and the bad actors, of which there are always a certain number in evidence at every race track. Stevens, who answers more readily to the "stable name" of "Squint" than he does to the more formal appellation of "Mister," is one of the younger generation of horsemen that is rapidly making a name for himself in his own particular line. His services at Reno made him a lot of friends and he is dated ahead for some time after his local engagement comes to an end.

◈◈◈

Charley DeRyder bought himself a new trotter down in Illinois a few days ago, the Kansas-bred stallion Governor Mason by Colonel Mason, out of Allena B. by Ontoneo. Joe Markey, in his Peoria letter to the Review, speaks very kindly of the Governor, as follows: "Governor Mason 2:10¼ wasn't the best trotter that I observed here, but I fell in love with the bay stallion, just the same. He raced in the 2:11 trot on Thursday and with a day's rest came back in the 2:09 trot on Saturday; on both occasions, while being a trifle outclassed, first by Princess Welcome 2:07¾, and next by the $20,000 stake winner at the Panama-Pacific Exposition, Spriggan 2:08¼, he defeated them a heat and had them stepping all the while. The Governor is a natty little fellow of the Morgan type, carries himself with an airy, buoyant way, has a lot of action, and if he were taken in hand by a show horse fitter, would be a blue ribbon winner. He is eleven years old but doesn't show much effect as the result of his numerous campaigns. His owner-driver, J. L. Bagby of Topeka, Kan., is in ill health, being quite weak, but to the stallion this appears to be no handicap. He just digs in and tries all the while, and when being outstepped, makes a riffle and never loses an inch of ground. He hugs the turns like an ardent lover does his sweetheart, and it's a real pleasure to see him out there on the track displaying every evidence of being wholly in love with and entirely absorbed by his occupation. He beat 2:10 in the fourth heat of his first race and I am told that he can turn a like trick over a good half-mile track."

GRAND CIRCUIT SHIFTS TO MONTREAL.

Montreal, Aug. 19—The Grand Circuit campaigners had a breathing spell here this week owing to a cause other than rain, racing not commencing until today. Under the provincial restrictions on race meetings only three days a week with betting are allowed, the local meeting being arranged to include the limit for two weeks.

The track at Dorval Park was in good condition and while the time was not sensational it was highly creditable and the contests were well received. Hal S. paraded for three straight in the opening event, going each mile in 2:08 or better, driven out in the first heat by Thistle Patch and in the others by Camelia.

The hot race of the day was the Queen Mary stake for 2:06 pacers, in which most of the Grand Circuit headliners made an appearance. Baron A. from the Cox stable took the first heat handily, after which Hal Boy and Marvin Childs grabbed one in time just a bit faster, with Judge Ormonde and Charley Valentine hard after them. Valentine had the black horse ready for the third and lined out the mile in 2:04½, the Boy getting in difficulties and finishing last. The next heat also went to the Judge, Childs being handicapped by his position in the score, but the Boy came back strong in the fifth and trimmed the bunch in 2:06½. Russell Boy, well supported by the investing public, failed to figure.

The 2:14 trot also went the limit and was won by Todd Temple after a hard struggle with Pop Geers' three-year-old trotter, Deroche. Loe Blossom went only a fair race for John Wall, while Sadie S., a brilliant winner at Grand Rapids, threw her friends down hard. The summary:

Montreal, Aug. 19.—2:13 pace, purse $1,000:

Hal S., ro h by Hal Chaffin.....(Murphy)	1	1	1	
Camelia, br m by Cummer.....(Cox)	3	2	2	
Thistle Patch, bl g by Joe Patchen.....(Snow)	2	3	4	

Patrick M. (Stokes), Hal Connor (Geers) also started.
Time—2:07¾, 2:07¾, 2:08.

The Queen Mary, 2:06 pace, purse $5,000:

Judge Ormonde, bl h by Ormonde(Valentine)	7	2	1	1	4
Hal Boy, b g by Hal B.....(M. Childs)	6	1	8	5	1
Baron A., b h by Baron Medium.....(Cox)	1	8	6	3	3

Lelia Patchen (Snow), Rastus (McDonald), Russell Boy (Geers), Peter Farren (Murphy), Lustrous McKinney (Rodney) also started.
Time—2:06¾, 2:06, 2:04½, 2:06, 2:06½.

2:14 trot, purse $1,000:

Todd Temple, br g by Todd Mac.....(Snow)	1	2	3	1	1
Deroche, ch c (3) by John A. McKerron.... ..... (Geers)	2	1	1	2	2
Loe Blossom, ch m by Lepide.....(Wall)	3	5	2	3	3

Todd McGregor (Rodney), Blue Feather (Cox), Sadie S. (Murphy) also started.
Time—2:09½, 2:11½, 2:11¼, 2:09½, 2:09½.

HOW TO BECOME A PROGRAMMER.

Manager The Horseman's Correspondence School: Have just secured the program privilege for a race meeting and not having done anything stronger before than grafting my meals and bed, am rusty on what a good programmer should do. Would you give me any tips? Yours, L. ALLTIME.

We are sorry to hear that you have given up your old profession and gone to real work, because you have selected something that will keep you hustling all the time until the race meeting is over and you must not be too careful on how you get the money, either, because many of the best programmers, whether soliciting ads. or selling the programs, take advantage of getting all the money they can without being particular as to the means. Of course there are some comebacks at times, but if you have any nobody will be hurt.

You do not say in your letter whether you intend selling the programs yourself or intend having a boy to do it, and therefore we will endeavor to explain how the average man gets the money on both jobs, so that you need not worry about any money getting away from you, through your own carelessness.

When you are ready to start out to solicit your advertisements, prepare a dummy program from blank paper, about the size you think you will need, then go to some printer in the town where the races are to be held and get his estimates on how much he will print them for. Give this printer a line of talk, about how much business you have already secured, make him think you are a great man in the business and he will think so much of you that you can get credit until the end of the race meeting.

After this is off your mind, then your hard work commences to induce the merchants in the town to come across with advertising. Tackle all the hotels first and as an argument, tell them that you can get all the horsemen to stop there if they will advertise in your program, and the chances are good that they will fall for it. Of course you must not tell one hotelkeeper that you promised his rival the same thing. Take no chances; all the hotel men in town are not friends. Now take cigar dealers next and promise them that their exclusive brands only will be sold at the meeting, in fact while you are at it, make arrangements to sell some yourself, along with your boys. This can easily be done after the sale of the programs ends each day, as you will have lots of time on your hands and if you can handle a few cigars, which you must get on credit, you will have that much more money at the end of the week.

If there are any breweries in town get them to advertise and be sure to get all saloonkeepers to have an ad. on your program. Then tackle gents' furnishing stores and any other small stores, as you will find it hard sledding to get ads. from large stores, if there are any in the town your are "working." By no means ask any of the officials of the racing association, if they are in business, for an ad., and the reasons for this we show you later.

Now that you have combed the town and secured all the ads. you can get, turn the copy over to the printer and let him get to work and have the ads. ready when you turn in each day's program. Many programmers take the entire entry list and print all horses named on it; this allows you to get all the programs out for the entire week and although there may be many scratches each day, you should not worry, because the association should make all entered horses start. The association may kick at such a program and insist that you go around the night before each racing day and get the starters for next day. Then it is for you to speak up and say: "I never heard of such a thing and it was not in my agreement." This may stall them off until the end of the meeting.

Your copy is now in the hands of the printer and you have a few days of idleness on your hands, but you can kill this time by taking your list of advertisers, make out your bills and then visit each one and offer them a discount on the former price if they will pay you at once. To save a few dollars many of them will jump at the chance, that is, unless they have been worked before. Put some very strenuous work in on this, as it is ready money and makes you safe on the deal. Some few may turn you down, but do not worry about this, you will get yours. But you can go back at these delinquents as soon as the printer gives you a sample copy and then demand payment and this generally gets them, unless they had no intention of paying in the first place. If the printer seems to treat you a trifle distant, slip him a ten spot on account; this will make him think you are all right and it will boost you.

Well, we are ready for the first day's race now, and you must make preparations to sell your programs. By inquiring around you can easily find out about how many were sold the year before and then order a hundred or so less than this number. In the meantime get hold of a bunch of entry lists from the secretary, the more the better, and preserve them carefully. To sell your programs right and not to have too many boys on your staff to watch, get green boys who have never worked at the job before; they are less liable to steal from you than the experienced boys, and will turn over all they get.

The best idea is to sell programs yourself and pick out the best selling point for your own work. Make a lot of noise and approach every customer with a rush, this throws them off their guard and you can easily short-change them. If some one finds out you have not given them enough change and calls you, do not put up any argument, but excuse yourself and give them the right change, this allays suspicions and makes it look like a mistake, but better still, this style of treatment does not draw others' attention to the fact and put them on their guard.

After all your programs have been sold and you have short-changed everybody you could, there may be some calls for more programs and a howl go up that you did not print enough. This is when your chance comes to use those entry lists which you got from the secretary, with some smooth talk about wanting to help them out, you can sell them an entry list for the same price as the programs and at the same time tell these customers that it is the program for the entire week and will save them from buying one next day. This soft stuff generally works and you get a lot of extra dimes. If you should happen to have any programs left any one day, save them and there may be a chance to sell them on the last day and at the same time ordering less of that day's program from your printer.

During morning hours while the race meeting is on, you can go after any delinquent advertisers and by the time the last day arrives you should have them pretty well cleaned up. By this time also the secretary of the association may want his share of the money for renting you the privilege. Tell him you have only collected a little and you gave that to the printer, but you would do your collecting tomorrow and see him at noon. This will hold him for awhile, but your cue is to take a train out of town about 4 o'clock of the afternoon of the last day's racing, having moved your suitcase to the station in the morning and it is waiting your arrival. The landlord of the house where you are living it not suspicious about your taking out the suitcase, because he has seen it with you every morning and thinks it contains programs.

You have now made a clean getaway and should have a nice bank-roll and the only people who are mourning your departure are the printer and secretary. The former has ten dollars to solace himself with and the secretary has had experience. But be careful and leave that part of the country alone for awhile. "Oh! for the life of a programmer, not."—W. H. Shields, in The Horseman.

TAKING HORSES TO WAR.

I arrived in Galveston, Texas with the United States troops after the evacuation of Vera Cruz. The talk of the European war was increased by reason of the great numbers of horses being shipped from that port to Europe. Many governments not yet in the struggle were exporting animals from Galveston, Greece perhaps leading this division. I met a number of Greek army officers, who were all clean-cut, well-posted men. The younger ones had received military training in both Germany and England. I was surprised at the large number of fine horses they bought, especially after looking at some New United States remounts the previous day at Fort Crockett. The Greeks, not yet at war, exercised more judgment in the selection of their animals. They rested their horses at Galveston and subjected them to the mallein test for determination of glanders. The new horses do not stable or drink out of the same fountain with the tested horses until they too are known to be free from this disease.

Several days later I was in New Orleans, from which the French and English were shipping army mounts as fast as they could procure ships. The English were shipping great numbers of mules. They had learned the value of the army mule in the Boer war. The mule is comparatively new to the French as a war animal, and they use them chiefly as the United States does, for transportation purposes. It is often said that a mule will not "stand fire." This is not true. The 4th Field Artillery, U. S. A., a mountain battery, is conveyed on mules. When a stop is made the guns carried on the mules' hacks are assembled and the mules herded a little in the rear, where they stand the noise as well as the men. Mules are not so fast as horses to draw regular field artillery into action, but the English use them for this work in South Africa.

It would be interesting to know the number of horses and mules sent to the war since last summer. Their source is almost a mystery. They are not buying as good a class of horses now as they were last fall and winter, because there is a scarcity. Army horses are purchased in two ways: first by a purchasing board of army officers, so that when a horse passes the board's veterinarian he belongs to that government; secondly, capitalists purchase from farmers or dealers under veterinary examination and take the chances of a few rejections when they arrive in France or England. Very few are rejected, however, as they need lots of horses to carry on war. One thing that lots of English officers "fall for" is a "bishoped" mouth. This is a method devised by one Bishop, an Englishman, and consists in an attempt to lessen a horse's apparent age by changing the looks of his teeth.

In New Orleans I met a Londoner who was furnishing money to buy horses for the French. He had a large number at Memphis ready to come down and take ship. It was arranged that I go in charge of these horses and we were to be carried by the horse transport Rembrandt of Liverpool. This ship on her previous trip from Baltimore had started to burn at sea the third night out. She was headed back to Newport News, the nearest port, and it was only after she was in port some hours that the fire was extinguished. She was sent outside of port again and three days were spent casting dead horses over board. A number died later from pneumonia due to the smoke, making the total more than 500 dead. The officers had all kinds of evidence that the fire was of incendiary origin and knew that horses were being poisoned the first day out.

No chances were taken on our trip. Two watch men were on duty day and night and the crew all carried passes signed by the captain. The hay and grain were watched from the time they left the warehouses until placed in the ship. About this time a man was arrested for planting a bomb in an English cotton ship and all the English captains were nervous. After several visits to the French consul we got our horses down from Memphis. These visits to the consul were made impressive by a great demonstration of stealth and a painful sense of quiet. We had a few less than 1,200 horses, a few having died on the train. They were loaded from the train to the ship by means of two bridges, which took about eight hours. Those who should know told me it was the best load of horses ever to leave New Orleans, and this port had sent many horses in previous wars. I have in my possession a grand letter of recommendation from the commandant of cavalry who received these horses in France. Several times while they were being unloaded this man turned to me and said, "Your horses are beautiful."

We left port with a physician, veterinarian, three foremen of hostlers and eighty-odd hostlers, in addition to the regular crew. A ship leaving an American port with fifty or more Americans must carry a physician to comply with United States maritime law. All these big horse transports carry deck loads. A shed is built all around the top and in this way a large number of extra horses is cerried. Last winter a number of horses died of exposure on the top decks, while some in the body of the ships near the boilers sweltered with the heat. Our horses cost around $200 a head and were insured by Lloyds of London. It cost $71 a head to carry them from New Orleans to France. The horse transports do not ply on troubled waters for fun. The stalls are just large enough to admit a horse. They cannot lie down in the stalls. When one falls exhausted, due to the long continued standing, the front of the stall is unbolted and he is dragged out in front in the clear. A number of our horses were coming down with influenza or pinkeye when they arrived in New Orleans, but I was requested to take them all. After the second week the whole load was infected with it. We kept into the South Atlantic as long as we could on account of the sick horses and were lucky in losing only 53. When these were cast overboard they sank like lead, because the fluid in their diseased lungs increased their specific gravity.

During the first week out we fed only hay. After we struck rough weather and the ship started to roll we fed grain. The rolling of the ship gives the horses a little exercise which facilitates digestion. We had no digestive disorders among the horses on account of our system of feeding. We carried two wireless men but they only listened, and we covered our lights as night. Horses are contraband as much as guns or ammunition, and we were carrying the English flag. One of the wireless men was a nervous wreck before we got to France and had to be sent to his home in England. Several times we were picked up by a French cruiser and convoyed by her. After we got into the Bay of Biscay we heard we were to discharge our horses at St. Nazaire at the mouth of the River Loire in North France. Running toward Belle Isle, we suddenly saw a great blur ahead of us; we could not determine just what it was, even with glasses, until almost upon it. It was an English battleship fleet. Many were super-dreadnaughts.

We got in to the harbor of St. Nazaire before 4 o'clock in the afternoon. A war law prevents ships entering after that hour. We had to lie in the harbor two days waiting for a dock, making a total of 23 days the horses were on the water. There were 7,000 horses in this little port that had come recently. The latest figures of our quartermaster-general give us a total of 25,000 horses and mules in the United States army. The first to meet us was the cutter of the marine police, manned by old men. They locked and sealed our wireless room and the customs officers confiscated for the time our matches with other things. Matches are heavily war-taxed in France and there is a severe penalty for using any but native matches.

There is a great absence of young men in the French cities, except the wounded, and they are anxious to get back to the front. All kinds of manual work are being performed by women; in Bordeaux they are operating the street cars. The German prisoners got ready the bridges for unloading the horses. French soldiers went aboard and led off the horses, turning them over to the prisoners. It was seen that the Germans were not allowed close to the ships.

There is a Purple Cross Society for horses having for its object the alleviation of suffering. It is like the Red Cross for men. Horses injured beyond surgical aid are shot. Others are sent to field or base hospitals. Many of the wounds are multiple, due to the common use of shrapnel. Many horses are seriously injured in the feet from going at speed through wrecked towns and cities and encountering nails. Horses condemned as army mounts after injury are sold to farmers and make good farm animals.—W. J. Ratigan, V. S., Breeders' Gazette.

Drink Jackson's Napa Soda.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

NORTHERN PACIFIC GUIDE BOOK.

Uncle Sam has spent some thousands of dollars in preparing a series of transcontinental guidebooks, telling the traveler of many of the wonders of the West which he sees from the car windows and concerning which he asks questions that none of his companions can fully answer. The Northern Pacific Guidebook, one of this series, has just been published by the United States Geological Survey as Bulletin 611, and it is Secretary Lane's hope that this popularly written book may get into the hands of the greatest possible number of travelers. This volume, like the other three of the series, is to be sold by the Superintendent of Documents, Washington, D. C., at $1 a copy. The book is in no sense a purely geologic publication, although the geology of the route is described in terms that can be readily understood by the layman. The mountains, plains, river valleys, and rocks that are seen from the car window as apparently unrelated items in the landscape are described as parts of an orderly procession, and the story of their birth and growth is so simply told as to interest the most indifferent reader.

To present to the traveler the record of the country through which he is passing, as he reads, the book therefore not only describes what is to be seen but recalls events, both human and geologic, that compel the reader's interest. In considering a great semi-arid cattle range, standing today thousands of feet above sea level, for instance, the text presents a brief picture of the prehistoric age when this part of the United States was an inland sea or a vast swamp, whose low-lying shores and islands were covered with dense semi-tropical vegetation and teemed with huge beasts and strange reptiles, long ago extinct. Later the region swarmed with buffaloes and Indians; then came the hardy American pioneer, and now, as related in the Guidebook, its inhabitants are engaged in developing its resources and industries and the mineral wealth that lies hidden beneath its surface.

The Northern Pacific Guidebook includes 212 pages and contains 27 reproductions of photographs, 38 text illustrations, and 27 topographic maps covering the entire route, which have been prepared with a degree of accuracy never before attempted in a gidebook.

The information given in this guidebook should afford the traveler a most excellent comprehension of the country traversed. As has been well stated, to the average traveler a trip from the Mississippi Valley to the Pacific Coast means at its end only a jumble of impressive scenery; with vast deserts and lofty mountains, and here and there some unusual feature, generally scenic, standing out from the mass and making a permanent impression on his memory. If, however, the traveler has provided himself with one of the Geological Survey's guidebooks, the interest of his trip and the information he gains is immensely increased.

WILD BIRD GUESTS.

It is admitted by all authorities that the author, Harold Bayne, has achieved greater success in his field than has any one else in this country, perhaps in the world, if we except the great German bird-lover, Baron Hans von Berlepsch. Even this wizard never succeeded in getting on the terms of personal intimacy with his shy neighbors which characterizes Mr. Baynes' work.

Although the primary object of the book is to assist bird-lovers to attract to their gardens and orchards and woodlands the birds they love, it has a much wider scope. It not only shows the actual necessity of doing such work as a means of creating sentiment in favor of bird protection, but points out in a simple entertaining way, the economic, æsthetic and moral reasons why it is to the interest of every community to have the birds protected.

The chapter on bird clubs is absolutely unique. Mr. Baynes has the reputation of never having failed to start a bird club in any town where he has made the attempt. From his experience in the organization of scores of such clubs all over the country, he has been able to give minute instructions which will enable the reader to organize a bird club almost anywhere.

The list of trees and shrubs and creepers which are attractive to birds is the most complete ever published, and its value is greatly enhanced by the fact that the fruiting seasons are given, and also by the fact that the comparative value of each plant is indicated, making it easy for those desiring only a few to select the very best.

The author's wide experience as a lecturer and as an organizer of bird clubs has made him very familiar with most of the problems which confront the beginner, and he has thoughtfully devoted a whole chapter to helpful suggestions for the solutions of those problems. The reader is told in a friendly, sympathetic way how to attain success without experiencing the discouraging failures which so often check the enthusiasm of those desiring to do something for the birds. E. P. Dutton & Co., N. Y.

SOCIETY TURNS TO HOUNDS.

Did it ever occur to you that the width of your skirt and the line of your dress had anything to do with the faithful quadruped on the end of the leash? That he should expand and contract with the whim of Fashion sems almost inhuman, but such is the case. When skirts are tight, dogs are small; but no sooner is fulness introduced in the mode than society finds excuses for buying long-legged, lithe canines that suit their clothes.

Today is the day of the hound. Dispose of your terrier and bull, and acquire a greyhound or one of the guaranteed-to-protect police dogs; that is, if you have an odd thousand or two which is not working overtime in the stock market. It is quite the smart thing to do. All the matrons on Long Island have forsaken bridge to bring up pups into perfect specimens of American doghood, and prices for special species soar beyond the reach of the mere lover of dogs. These canines, bred through generations to perfect obedience and alert watchfulness, bring fabulous prices. One police dog, imported from the other side, was recently purchased by a certain Miss Fisher, prominent in New York society, for the tidy sum of ten thousand dollars; but then, this dog has passed the test of regular duty and is perfectly capable of running down the huskiest of desperadoes. Dogs trained for home duties are much more modest in price. Oftentimes a bargain, especially in the younger dogs, can be picked up in three figures.

So devoted are the younger set to their pets, they are bringing them into town with them. Many smart dogs are to be seen on the avenue. It is interesting to note the divided favor between the greyhound and the police dog. Possibly it is because the greyhound is so picturesque that some women, especially the slender, choose this breed. One girl, who lives in the millionaires' row on the upper end of Fifth avenue, takes "Jeff" out for exercise herself when she is in town. I met her in front of the library the other morning. Whether she dressed with "Jeff" in mind, or whether her gray serge skirt was happenstance, I do not know; but certainly, the costume and the dog brought out the best points in her personality. Her dark blue eyes and blue-black hair were intensified by the contrast with the gray. The skirt was one of the new Princess styles in gray serge, edged with blue and trimmed with braid. This had the new suspender straps and was worn with a blouse of sheer, transparent Swiss, cut on simple lines, the fabric being its charm. The hat, too, was in the same shade of gray, one of the new taffeta turbans, with a tulle band to shade the eyes, that Jeanne Lanvin brought out in the early season. The whole tended toward long lines, and the greyhound fitted in admirably well with the costume.

Out on the large estates on Long Island the greyhound and police dog are put to real service. Mrs. Butler Duncan, formerly Mrs. James Kernochan, was one of the first women of prominence to bring the police dog to America. Her "Peter" was soon the pride of Long Island, for he gummed the game of a dark individual who had his mind fixed on Mrs. Duncan's prize poultry. Now there are other Peters on other estates. These dogs are trained to watch the autos, the buildings, the sheep, in fact, all the property of the owners. So invaluable have the dogs become that the owners bring them along with them when they change from country to town, or from town to country. A young matron who has an estate just across country from the Duncans has a half-grown police dog for a boon companion.

Wherever she goes, the dog is with her—in the country, trotting serenely beside her horse, and in town, well knowing the dignity of his position, tugging at the end of a leather leash. This fad of taking your dog out on the Avenue is growing. I saw the woman mentioned above, the other day, striding along behind her husky Pat. She was smartly gowned, but there was nothing that would attract attention other than the dog. Her dress was a linen Princess in coat style, cut short enough to show her striped stocking that matched her collar. Her hat had a dark blue satin brim fastened well upon a straw bead pin. The whole costume was simple. She was out to enjoy a walk with her dog, and her skirt was amply wide, thanks to Fashion, so that she could keep up with the sturdy Patrick.

It would seem, the wider and more extreme they have their skirts the larger is their dog. And Fashion says hoop skirts are returning. What, then, are we to expect in dogs? Fancy the Four Hundred with great Danes for pets!

Airedale Shows.—Russell H. Johnson, of Chestnut Hill, Pa., will judge the annual specialty show held by the Airedale Terrier Club of America, which takes place in New York November 27, while the judge for the annual show of the Philadelphia Airedale Terrier Club, held in Philadelphia, November 20, will be Theodore Offerman of Brooklyn.

FLY-TYING FOR BEGINNERS.

Most people are under the impression that fly-tying is a long and tedious business, which takes ages to learn; but that is not quite correct. Anybody with normally adaptable hands can learn in a very few hours, and after a couple of dozen flies have been made, most of the seeming difficulties will have vanished out of sight. Possibly a sister angler might acquire the art more quickly still—of that I am not sure; but certain it is that the fisherman who can tie flies for himself will never suffer from two disadvantages; he will not run short of the pattern which the trout are taking, because he can easily make others; and if some insect unlike any in his fly-box happens to be coming down, he has merely to halt for a few moments, and copy it straight away at the waterside without any reservation. I assert confidently that the pleasure of catching a fish is trebled if you have tied the fly yourself. I could say more here, but perhaps if these flies are to be ready by the beginning of next season, it will be well to go directly into details as my correspondent has it right now, writes "Iron Blue" in the Christ Church Express.

The necessary tools are neither expensive nor numerous, and the most costly item is a small vise. For this one may pay anything up to a pound or more, but there is an alternative plan which answers equally well. A couple of the two smallest sizes of a watchmaker's vise can be bought for about a dollar each at a hardware store. The larger of the two is treated as follows: Get a nice foot-square block of wood, which will do to stand on a table, bore a deep hole in it, and drive the vise firmly into this; the smaller vise is for holding a fly when one is out by the river. Two or three pairs of "Archer" clips or pliers are useful as weights, to hold down a strand of silk and prevent it from slipping, when it is necessary to work something else into the fly; artery forceps make a good substitute. Hackle clips, with a ring for a finger while turning a hackle, are supposed to be necessary, but the Archer clips will do very well instead. A pair of sharp fine-pointed scissors completes the list.

Hooks come first among the materials, and—taking the sizes from Hardy's list—a few dozen must be bought of Nos. 10 to 14, and fewer dozen of Nos. 6 to 9. The latter are chiefly for lake flies or for a big "coachman," which is to be used at night. Every tackle maker seems to have a different number for his hooks, and the easiest way to get those you require is to take or send patterns to a dealer. The sizes I have quoted are for "down-eyed snecks," which are the most convenient kind; as those with upturned eyes are rather harder to finish off. Especially for dry flies, the hook should be fine and the eye small; and it is just as well to test it before taking the trouble of turning it into a fly.

Next are the silks and feathers, not laces, thank heaven, for the list is long enough without, and easily might fill a page; so the best plan is to form a collection by degrees, and begin with a few things which are likely to be wanted first. Such are starling wings, and wings of other small birds, and feathers from variously colored fowls. Brown, white, black, and red hackles; and what are known as "cochy bondhu" hackles, which are red with black tips. Of these, the red, white and black hackles are the most useful; and of course it is quite easy to obtain them from the necks of different fowls. Whenever a rooster happens to get slain for Sunday dinner, always make a point of securing some of his neck feathers for fly-tying purposes, and we need buy little from a shop. For myself, I believe that a hackle tip wings a fly far better than any other feather, and for this reason: Take almost any of the natural duns which we see upon our waters, and hold them up against the light, and you will notice that the wings are transparent. Now the fibres of a hackle are separated, so the light can come through; and the feather of a starling—often used for a wing—is opaque; therefore hackle tips must more nearly resemble the wings of the natural fly.

To the feather list we must add some peacock herl; and fortunately, the fur from a hare's ear and scalp, is waiting for us in the nearest field. A little gold and silver twist is necessary, also silk of different colors. Pearsall's gossamer is proper for fly-tying, almost it is indispensable, but in case of need we make "pure sewing silk" serve instead. The colors chiefly required are scarlet, black, white, champagne, various browns, olive, and bright yellow. Some people have a fancy for varnishing the heads of their flies, and also for waxing the tying silk; but though a little white wax may not seem harmful, it is a mistake to use it in making a dry fly, for the fraction of added weight will only help to sink it. Two half-hitch knots are usually a sufficient finish, and if occasionally a fly comes undone, it is very easy to tie another. Now it is to be supposed that everything is ready for a beginning, and the whole has cost less than $5, so the expense was not alarming; and perhaps I may go on to explain the methods of making some of the most useful flies, next week.

Salmon In the Bay.—Good catches of salmon have been taken outside the heads by trolling boats during the past week. One boat brought in 30 quinnat salmon one day, the largest fish scaled nearly 40 pounds. Last Wednesday afternoon a salmon was hooked off California City, by a lady angler. This fish was a very large one but broke away before the gaff was brought into play.

EXPOSITION FLY AND BAIT CASTING.

Exposition Trophy Winners.

C. H. Gardiner, San Francisco, heavy tackle accuracy, 99.36 per cent.

Paul W. Shattuck, San Francisco, dry fly accuracy, 98.45 per cent.

Harry C. Golcher, San Francisco, light tackle distance, 116 feet (National Association record).

Oscar Lane, Los Angeles, quarter-ounce lure, accuracy, 97.9 per cent.

Stanley Forbes, San Francisco, quarter-ounce lure, distance 134.2 feet.

Fred N. Peet, Chicago, quarter-ounce lure, "slam," 153 feet.

Fred N. Peet, Chicago, salmon fly, distance 162 feet (world's record).

Walter D. Mansfield, San Francisco, half-ounce lure, accuracy, 98.4 per cent.

Oscar Lane, Los Angeles, half-ounce lure, distance 193.3 feet.

Oscar Lane, Los Angeles, quarter-ounce lure, "slam," 240 feet.

Carlos G. Young, San Francisco, light tackle fly, accuracy 99.30 per cent.

The fly and bait-casting contests in the eighth international tournament, under the auspices of the San Francisco Fly Casting Club, started Thursday forenoon, August 12, at Stow lake in Golden Gate Park. Harry Golcher of this city had the distinction of breaking the national association tournament record in the light tackle fly-casting event. He put out his line 116 feet, beating the 1912 record of C. J. McCarthy, made in Chicago, by two feet.

Golcher won the exposition silver trophy. The winners of eleven other prizes in this event were: T. C. Kierulff, Stanley Forbes, W. D. Mansfield, Dr. W. E. Brooks, F. M. Peet of Chicago, W. J. Davis, Jr., J. Waddell of Grand Rapids, Mich.; F. J. Cooper, E. A. Mocker, and F. A. Webster. Walter D. Mansfield of this city holds the world's record in this style of casting, 129½ feet, made at Stow lake, 1902.

Paul W. Shattuck won the exposition silver trophy in the dry fly accuracy contest. The other prize winners, in the order named, were: George C. Edwards, Tom C. Kierulff, F. A. Webster, F. M. Peet, F. H. Reed, Stanley Forbes, J. F. Burgin, E. A. Mocker, Harry A. Thomson, Jr., W. D. Mansfield, and Charles H. Kewell. Three casts were made by each contestant at five anchored buoys, distant from twenty to fifty feet from the casting platform.

Shattuck's win in the light tackle dry fly accurac was hardly less of a surprise, and was another di tinct feature for the younger competitors.

Golcher's performance, the best individual reco of the day, was of the "come back" variety. For se eral years the winner had not been taking an activ interest in casting events and he entered for the lon distance contest with little or no preliminary pra tice. The long-distance fly, which was held in th afternoon, was the only event of the day in whic Golcher competed.

The scores in Thursday's contests follow: Ever 1, heavy tackle acuracy fly-casting. Event 2, dry fl accuracy. Event 3, light tackle distance fly-castin feet:

Events—	1	2	3
P. W. Shattuck	99.2	98.45	6
G. C. Edwards	99.1	98.54	.
T. C. Kierulff	98.13	98.20	11
F. A. Webster	98.13	99.24	8
F. M. Peet	98.13	98.30	10
F. H. Reed	98.12	98.52	.
S. Forbes	98.9	98.32	11
J. F. Burgin	98.9	99.28	7
E. A. Mocker	98.8	.....	8
H. A. Thomson, Jr.	98.7	98.44	7

Fly Casting at Stow Lake.

Club Lodge, Truckee River.

T. C. Kierulff, San Francisco, delicacy fly casting, 98.52 per cent.

Walter D. Mansfield, San Francisco, heavy tackle, long distance fly, 134 feet (National Association record).

Special Prize Winners.

Stanley Forbes, all round championship, silver cup, donated by California Anglers' Association.

T. C. Kierulff, best average in seven fly casting events, Exposition cup.

Stanley Forbes, best average in accuracy, distance, dry-fly and delicacy and accuracy, special prize.

Oscar Lane, best average in ¼ and ½ ounce events, Exposition cup. Best average in all of the bait events, special prize.

San Francisco Fly-Casting Club, Exposition cup for club making best average.

Col. G. C. Edwards, highest percentage in all fly events, except distance.

Charles H. Gardner won the exposition silver trophy in the heavy tackle accuracy contest. The other prize winners were: Charles H. Kewell, J. F. Burgin, F. A. Webster, F. J. Cooper, Joseph Springer, F. H. Reed, Dr. W. E. Brooks, P. W. Shattuck, Harry A. Thomson, Jr., W. J. Davis, Jr., and Stanley Forbes.

During the afternoon casting, gusts of wind at odd times sent the gossamer leaders and lines in every direction but near the ring buoys. A heavy west wind interfered with the distance casting in the afternoon, tangling up back casts, to the discomfiture of several experts in that particular casting.

Gardner's win was a distinct surprise. It was only at the last minute that he had been induced to enter the event. Originally he had determined to try his skill only in the bait competitions, and made the change only with the intention of making himself eligible for the all-around championship, for which competitors must take part in all the events. His mark of 99 9-15 has been eclipsed in only two of the seven tournaments thus far held by the association.

W. D. Mansfield	98.7	97.34	110
C. H. Kewell	98.6	99.28	80
J. Springer	98.3	98.50	..
Dr. W. E. Brooks	98.2	98.48	104
C. G. Young	98.1	98.42	..
H. Golcher	.....	.....	116
L. G. Burpee	98	98.40	..
W. J. Davis, Jr.	97.11	98.40	94
F. J. Cooper	97.9	99	83
C. H. Gardiner	97.8	99.36	70

F. N. Peet, the champion salmon fly caster of the Chicago Fly Casting Club, Friday afternoon, August 13, at Stow lake, won the Exposition silver bowl trophy and established a world's record in salmon fly distance casting, 162 feet, beating his winning cast, 151 feet, made at the Los Angeles tournament the previous week. The national association record up to Friday was 150 feet, made in Chicago by C. E. Lingenfelter last year.

The other prize winners in this event in the order named were: W. D. Mansfield, E. A. Rogers, C. H.

Jewell, John Waddell of Grand Rapids, J. F. Burgin, F. E. Kierulff, W. J. Davis, Jr., W. P. Shattuck, F. J. Cooper, Dr. W. E. Brooks, Stanley Forbes, Harry A. Thomson, Jr. Weather conditions were favorable for the contests at the lake. Rogers afterward cast 44 feet to Mansfield's 135 on the tie score.

The Court of Palms was selected Friday forenoon instead of the south garden at the Exposition for the one-quarter ounce accuracy lure casting contest. The buoys were anchored out in the pond, the judges standing by in gum boots. Oscar Lane of Los Angeles won the Exposition trophy; J. M. Rainey and M. M. Clarke, both of Chicago, J. F. Burgin, F. A. Webster, C. H. Gardner, T. C. Kierulff, S. Forbes, F. F. Cooper, W. J. Davis Jr., F. N. Peet, C. H. Kewell and P. W. Shattuck won the minor prizes in the order named.

Two other contests were held on the aviation field —one-quarter ounce lure distance casting and "slam" casting with the same tackle. Stanley Forbes' average of 134.2 feet in five casts won the Exposition trophy in the first event and F. N. Peet's 153 cast—the best in five, won the Exposition trophy in the "slam" event.

Prize winners in the one-quarter ounce lure distance casting were: Rainey, Lane, Peet, Davis, Kewell, Kierulff, Mansfield, Webster, Burgin, Shattuck, and Gardner. The prize-winning slamsters were: Forbes, Lane, Cooper, Kierulff, Kewell, Davis, Shattuck, Webster, Mansfield, Gardner and Burgin. The contests at the Exposition were followed by a large audience.

The scores made Friday follow: Event 1—"Slam" casting. Event 2—One-quarter ounce lure, distance in feet. Event 3—One-quarter ounce lure, accuracy percentages. Event 4—Salmon fly, distance in feet.

Events—	1	2	3	4
F. N. Peet	153	124.6	95.1	162

Walter D. Mansfield won the half-ounce lure casting contest Saturday afternoon in a spectacular finish that was greeted with rounds of applause by an immense audience of spectators gathered about the picturesque pond in the center of the Court of Palms at the Exposition.

In this event each contestant made two casts, up and down the line, at five anchored targets in the water, distant from sixty to 100 feet. When the return target was reached the contest narrowed down to Mansfield and Oscar Lane of Los Angeles. Lane finished one point ahead of the local rodster. Mansfield stepped up to the scoring peg—everybody tensed up—a cast striking one foot from the floating target meant a tie, farther away defeat. The veteran of many rod and reel tournaments poised his rod, shot out the line and the half-ounce aluminum plummet struck the gong in the center of the buoy and rang up a perfect score. Mansfield's skillful cast at a critical time kept the elegant Exposition silver trophy in this city.

The other prize winners were, in the order named: O. Lane, F. A. Webster, P. W. Shattuck, Stanley Forbes, J. M. Ranney of Chicago; W. J. Davis Jr., F. N. Peet of Chicago, F. J. Cooper, J. F. Burgin, Austin Sperry, C. H. Gardner, M. M. Clarke of Chicago, R. B. Nason of Tacoma. The scores in this contest, while good, were below the general average. Gusts of wind interfered with accurate casting.

Lane captured the Exposition trophies in the two following contests held on the aviation field—the half-ounce distance and the half-ounce slam casting events. In the latter event W. J. Davis Jr., with 228.4 feet, was looked upon as the winner. Lane protested and claimed that he was entitled to a fifth and final cast, when the judges came in from the outer end of the court. Davis, like a good sportsman, under the circumstances waived all claim to the Exposition trophy. Lane then made his fifth cast and scored 240 feet.

The two casting events on the grass field were conducted under a handicap of wind and raw weather. There were enough prizes in both events for every contestant to be recognized.

The scores made Saturday follow: Event No. 1, half-ounce accuracy; event No. 2, half-ounce distance; event No. 3, half-ounce "slam" casting, best distance cast in five:

Events—	1	2	3
W. D. Mansfield	98.4	93.8	157
O. Lane	98.3	193.3	240
F. A. Webster	97.9	134.9	155
P. W. Shattuck	97.8	159.10	198
S. Forbes	97.5	167.4	213
J. M. Ranney	97.3	117.3	..
W. J. Davis Jr.	97.1	162.11	228.4
F. N. Peet	96.9	137.9	160
C. G. Young	96.8	.....	..
F. J. Cooper	96.7	102.7	..
J. F. Burgin	96.5	99.2	97
A. Sperry	96	145.4	162.4
M. M. Clarke	95.8	71.10	..
C. H. Kewell	95.1	157.10	204.4
T. C. Kierulff	94.9	136.6	160
Dr. W. E. Brooks	94.8	.....	140.8
E. A. Mocker	93.2	.....	..
R. B. Nason	93	.....	..

The contests terminated late Sunday afternoon at Stow lake with the heavy trout tackle long-distance competition. Walter D. Mansfield, casting in his old-time form, extended his line over the water a distance of 134 feet, and won the Exposition silver trophy.

Harry Golcher's cast of 131 feet, made early in the contest, was generally thought to be the best that would develop in the event. It was, until Mansfield put on three more feet. Both casts were way ahead of prior national association tournament records.

The scores of 134 and 131 feet respectively are an odd coincidence, for in 1902, at an open-to-all tournament on Stow lake, both fly casters made identically the same scores. Harry Golcher subsequently made a record score of 140 feet.

The high performance in long-distance fly casting to date, however, is an exhibition cast of 144 feet, made by Mansfield in 1902.

T. C. Kierulff was the Exposition trophy winner in the delicacy contest—after casting off a tie with Mansfield. In this event the contestants made five casts at three-ring targets, anchored thirty-five, forty and forty-five feet from the platform. Accuracy of aim and delicacy of line and leader recovery from the water counted in general percentage average.

C. G. Young was the trophy winner in accuracy fly casting—each rodster whipped line and leader five times at three ring buoys anchored forty-five, fifty and fifty-five feet distant from the caster.

In both of these events the local contestants led the Eastern fly casters by quite a margin. The rods used weighed five and three-quarters ounces. There were prizes enough for every entrant in both contests to win something, ranging from Leonard rods through a long list of articles prized by anglers down to subscriptions to sportsmen's publications. One energetic fly caster won reading matter in three different events—about a dozen subscriptions in all.

An overcast sky and quiet weather in the forenoon turned into a raw, misty afternoon, with gusts of wind that interfered with back casts at critical times. The Chicago fly caster, F. N. Peet, had bad luck in the long-distance event—his line broke before he could exceed 110 feet. A large crowd of spectators was present all day and were unstinted in applause at various times, particularly when the long-distance records were beaten. The judges throughout the tournament were: F. E. Daverkosen and James Turner; Paul Nippert, referee.

A banquet Thursday evening at which time the trophies and prizes were presented to the winners, and a two-day fishing trip to the Truckee river, were the final features of the tournament. The results of the last day, Sunday, August 15, follow: Event 1—Delicacy percentages. Event 2—Accuracy percentages. Event 3—Heavy tackle, long-distance fly casting, feet:

Registered Tournaments — Pacific States and Territories:

September 5-6.—San Jose Blue Rock Club, O. N. Ford, Secretary.

September 6—Tacoma Gun Club, Tasoma, Wash., "Old Policy"; Carl Coon, Secretary.

September 13, 14—Omaha Gun Club, R. D. Vaught, Secretary-Manager, Omaha, Neb.

September 24—Medford Gun Club, Dr. E. R. Seely, President, Medford, Ore.

November 4—Williams Gun Club, F. E. Lowe, Secretary, Williams, Ariz.

GRAND AMERICAN HANDICAP.

The five day Interstate Association tournament began Monday under favorable auspices—783 entrants, with mail entries to hear from, made up the greatest gathering of trap shooters in the history of the sport.

The Grand Park introductory, first event of the tournament, Monday, August 16, brought out a field of 235 shooters. The event called for 200 single targets thrown at unknown angles at 18 yards. The weather was favorable and high scores were recorded. W. S. Hoon of Jewell, Pa., led the field with 196 breaks.

Tom Wilkes of San Francisco missed only twelve of 200 clay pigeons out of ten frames of 20 targets each. Wilkes had three straights. He broke every bird in the fifth, ninth and tenth frames. He got off to a bad start, having three misses in the first frame. He made 19 in the second and 18 in the third frame. In the fourth he broke 19, and the same number in the sixth. He had 18 hits in each of the seventh and eighth. H. M. Williams, however, broke 190, Pete O'Brien 190 and J. F. Dodds 182. Sam Huntley scored 194.

C. A. Haight of San Francisco broke 87 targets out of 100, and P. J. Holohan of Portland was credited with 94 hits.

No California trigger puller participated Tuesday in the national singles championship, which was open to all State champions. Oregon and Washington were represented, however.

P. H. O'Brien, the Oregon champion, broke 95 out of 100 pigeons shot at in the event and finished well toward the top. O'Brien broke 24 out of the first 25 birds, but missed two in each of the second and third frames. In the last frame, he went through straight.

F. M. Troeh, who represented the State of Washington, broke 90. He was unlucky on the start, having five misses in the first frame. He missed only one in the second, but lost four in the third. He broke clean in the fourth.

Other Pacific Coast trapshooters who competed in the Chicago overture were J. F. Dodds of San Diego, who broke 86 of the clay birds, while E. E. Young of Portland broke only 60.

C. H. Newcomb, Philadelphia, won the national singles title at 100 targets, sixteen yards rise, missing only one chance, for a total of 99. Guy Dering, Columbus, Wis., led a field of eighty entries in the national doubles championship, getting 91 out of a possible 100 at 16 yards. The Chicago Overture, also at 16 yards, went to H. J. Rebhausen of North Plate, Neb., with a count of 98. There were 220 entrants in this event.

Newcomb's victory was considered the most important of the day. Second to him were A. B. Richardson, Dover., Del., and R. A. King, Delta, Col., with 98 each. John Jahn, Davenport, Ia., was next with 97. The work of the high men was especially noteworthy in that a high wind swept the field.

The wind made the doubles event particularly difficult and accounted for the comparatively low scores in that contest. Next to Dering were Mark Arie, Thomasboro, Ill., with 90, and S. A. Huntley, Omaha, who got 87.

Huntley also placed in the Chicago overture, tying with William Wetleaf of Nichols, Iowa, for second place, each getting 97 breaks. J. P. White, Watertown, S. D., and W. M. Foord, Wilmington, Del., were next with 96.

The professionals were also busy today. J. E. Dickey, Minneapolis, led the field with 97. R. R. Barber, St. Paul, was second with 96, and then came Bart Lewis, Springfield, Ill.; J. M. Hawkins, Pittsburg, Pa.; J. S. Fanning, Wilmington, Del.; F. G. Bills, Chicago; C. A. Young, Springfield, Ohio, and L. S. German, Aberdeen, Maryland, each of whom scored 95.

Among the high scores in Tuesday's events were the following:

Chicago Overture: 94—C. L. Waggoner; 90—E. W. Varner, Bert Waggoner.

National amateur championship: 98—R. A. King, 97—John Jahn, 96—C. L. Parsons, 95—P. H. O'Brien, 94—D. R. Miller, 93—C. H. Reilly Jr., 92—H. J. Rebhausen, 91—S. B. Adams, Portland, Ore., 90—F. M. Troeh, Vancouver, Wash.

The Preliminary Handicap, Wednesday, had an entry of 683 shooters. R. H. Morse, Chicago, shooting from eighteen yards, won with 95 out of 100 single targets. He was awarded a trophy and $336.50. A northeast gale sprang up at noon and kept the scores down.

A triple tie at 94 followed Morse's score, those making that mark being George K. Mackie, 18 yards, Lawrence, Kan.; Ed Echendel, 18 yards, Milwaukee, Wis., and C. A. Gunning, 20 yards, Longmont, Col. They divided $807.60, and were to shoot for the second and third place trophies Thursday. Those who broke 89 or better shared in the remainder of the $3365 purse.

Among those who broke 90 or more, with their handicaps, were: 94—George K. Mackie (18), C. A. Gunning (2), A. R. Castle (18), P. R. Miller (2), C. Parsons (2). 92—William Wettleaf (19), C. L. Waggoner (19), William Riley (22). 91—G. E. Caple (18), C. H. Larsen (18). 90—D. M. Ehler (19), S. McEwen (19), J. S. Frink (2), H. J. Rebhausen (2), H. J. White (21).

The feature event, the Grand American Handicap, was started with 827 entries Thursday and finished yesterday, too late for announcement of the winner.

ALFALFA SILAGE FOR FATTENING STEERS.

[By G. H. True, F. W. Woll and V. F. Dolcini, U. of C.]

While many experiments have been conducted with regard to the use of Indian corn silage in feeding fattening steers, but little is known in regard to the value of other silage crops for cattle feeding. Since the first cutting of alfalfa often consists largely of foxtail and other weeds, and in that case makes a poor quality of hay, it seemed desirable to secure some definite information as to the use of this crop for silage purposes. One of the stave silos at the University Farm was accordingly filled with the first cutting of alfalfa from a weedy field, on April 27 to May 3, 1914. This field was so foul with weeds that it would have been practically valueless for hay, the foxtail being nearly ripe and the beards already hard.

A mixed lot of 107 native range steers, mostly three and four years old, was purchased for the experiment last summer from a foothill ranch near Coyote, California. The better individuals among the steers showed some evidence of Shorthorn, Hereford or Devon blood, but on the whole the steers were rather below the average of California range cattle. They were bought at 6 cents a pound on foot with a 3 per cent shrink, and averaged 963 pounds when weighed at the ranch on the morning of July 6, 1914. After a ten-mile drive to Coyote and twenty-four hours on the cars they weighed, when unloaded at Davis, an average of 883 pounds.

For the first two days at the University Farm, the steers received nothing but long alfalfa hay. On the morning of July 10th, they were started on alfalfa silage with which was mixed rolled barley. No hay was fed for the two following days, in order to accustome the steers to the silage. On July 12th hay was again fed and the ration from this time on consisted of alfalfa hay, alfalfa silage and rolled barley. Throughout the experiment the silage and grain were fed rather late in the morning and evening, and though not eaten immediately, practically all was consumed by the next feeding time. The hay was fed separately twice a day in hay racks.

The alfalfa hay fed during the greater part of the experiment was good second-cutting hay, clean and free from weeds. The silage, as stated, was made from the first cutting of alfalfa and contained a large proportion of weeds, principally foxtail. A botanical analysis of a sample of the silage, made by Professor P. B. Kennedy, showed that it was composed of over 55 per cent foxtail. While this may not represent the true percentage of weeds in the entire lot of silage, it is believed we may safely assume that at least one-half of the bulk of the silage consisted of plants other than alfalfa. Many of the loads were quite dry as filled into the silo and considerable water was added after each load and also after the silo was filled, in order to improve the quality of the silage.

The silage as fed out was well made, of a dark brown color and of slightly acidulated, aromatic flavor. That in the lower part of the silo was more moist than that in the upper part and was apparently relished best by the steers. While most of the silage was not taken with particular relish, it was always eaten up clean, with the exception of a few days during the middle of July when a layer of partially spoiled silage was reached, at a point where the filling of the silo had been interrupted for a couple of days. The foxtail heads, which would have caused great trouble in feeding the alfalfa as hay, were eaten before having a chance to dry out.

The silage was sampled once every week for determinations of moisture and acidity and a complete chemical analysis of the mixed samples was made by Professor M. E. Jaffa, who also made analyses of the other feeds used in the experiment. The chemical composition of these feeds with digestible components calculated on the bases of average digestion coefficients is shown below.

Chemical composition of feeding stuffs, in per cent:

	Alfalfa Silage	Alfalfa Hay	Barley
Moisture	76.00	15.87	12.36
Protein	3.40	11.32	10.37
Fat	.34	1.30	1.80
Fiber	5.56	28.63	6.26
Nitrogen-free extract	11.72	35.85	66.61
Ash	2.98	7.03	2.60
	100.00	100.00	100.00
Volatile acids	.40	.....	.....
Fixed acids	.91	.....	.....
Digestible protein	1.29	8.38	7.27
Digestible carbohydrates and fat	8.28	40.17	68.20
Nutritive ratio	1:6.4	1:4.9	1:9.4

The feeding test was started on July 20th when the steers had recovered their normal fill. The experiment progressed without important incidents, except that one steer, which was found tubercular at slaughtering time, went off feed and failed to gain in weight. The steers on the whole showed a marked improvement in condition throughout the experiment, and with the exception noted all were in fair condition when sold, although but few could have been classed as finished for market. To one who watched the steers closely from day to day, it seemed that now and then a steer that had been doing especially well would stop gaining. The apparent explanation of this was revealed by an examination of the carcasses after slaughter, when it was found that there were accumulations of foxtails in the mouths of practically all the steers. This condition suggests that had the experiment continued much longer, trouble might have developed as in the case of foxtail hay, and emphasizes the necessity for cutting the alfalfa for silage before the foxtail beards become hard. From August 21st on, only one-half feed of silage was fed, the amount of barley being increased by two pounds. The trial brought to a close on September 3rd, when the silage was fed out.

The following statement shows the main results of the trial:

Weight of steers July 6 at shipping point 963 lbs.
Weight of steers July 8 off cars at Davis.. 883 lbs.
Weight of steers July 20 at Univ. Farm.. 971.2 lbs.
Weight of steers Sept. 3, selling weight..1041.08 lbs.
Average daily gain per head..... 1.53 lbs.

	Hay	Silage	Barley
Average daily ration per head	10.6 lbs.	20.2 lbs.	2.4 lbs.
Feed per lb. gain for the period of 46 days	6.9 lbs.	13.1 lbs.	5.4 lbs.

The composition of this ration on the basis of the chemical analysis made was as follows:

Dry matter ..... 21.13 lbs.
Digestible protein ..... 1.76 lbs.
Digestible carbohydrates and fat.. 11.66 lbs.
Nutritive ratio .....1:6.6 lbs.

Financial Statement.

The steers were sold on September 3rd, at 7 cents a pound with a 3 per cent shrink. In the following financial statement of the feeding trial, the item of feed eaten includes all the feed which the steers received from the time they were bought until they were sold. The prices of feeds given were those prevailing in this locality during the past summer, except that of silage which was assumed to cover the cost of production only, since weedy alfalfa like that used in the making of this silage has practically no value for feeding as hay and the silage itself has no established market value.

Initial cost of steers, 103,099 lbs. at 6c.	$6,185.94	
Freight from Coyote to Davis (4 cars at $33.04 per car)	132.16	
Sanding cars	2.00	
Commission for buying 107 head at 50c per head	53.50	
Interest on $6,373.60 at 8 per cent	84.98	
Refund on account of one tubercular steer	47.60	
Feed eaten: 31.4 tons hay at $4.00, $125.60; 23.24 tons barley at $18.50, $429.94; 58.32 tons silage at $1.25, $72.90	628.44	
Labor, approximately, one-half time of one man	50.00	
Horse and wagon	15.00	
Total cost		$7,199.62
Selling price, 108,126 lbs. at 7c		7,568.82
Net profit on entire lot		$369.20

Charging against the steers only the cost of feed and labor and interest on the money invested, as would be done by a man feeding his own cattle, the profit would come to $556.86. Charging alfalfa hay at its normal market value of $6 a ton in the stack and barley at $21 a ton, there would still be a profit of $436.06 from the feeding operation.

This trial shows that silage may be made from weedy alfalfa which would make but inferior hay, that such silage will be eaten without waste, and that it can be used as a supplementary feed for fattening steers on alfalfa hay and barley.

PASSING OF GEN. B. F. TRACY.

Full of years and honors, General B. F. Tracy, in other days one of the most prominent and stalwart figures in American public and political life and an extensive breeder and patron of the American trotting horse, died at the home of his daughter, Mrs. Ferdinand Wilmerding, 14 East Sixtieth street, New York, last Friday afternoon. For upward of 60 years General Tracy had been a national figure and had occupied some of the most distinguished stations in public affairs, among which was Secretary of the Navy under President Benjamin Harrison, where he earned the distinction which has ever since clung to him as the "Father of the American navy." He was one of the founders of the Republican party, a brave soldier during the civil war and a lawyer of the highest ability.

His identification with the breeding pursuit dated from soon after the war, and for many years his Marshland Farm at Owego, Tioga county, was a noted establishment for the production of the trotting horse. He belonged to the older generation of breeders, in the times of Chas. Backman, Edwin Thorne, and others of like ilk, but now gone and practically unknown to the present day. The General established a farm in the early 70's at Owego, Tioga county, in the southern part of New York state and called it Marshland Farm. Among the first of his most noted possessions in the horse line was Peacemaker 260, a son of Rysdyk's Hambletonian, and that sired seven standard performers. About the same time General Tracy also owned Oxmoor 1400 (son of Princeps), the sire of three in 2:30, all of whom were bred by General Tracy. Oxmoor, however, was noted as a sire of dams and his daughters produced quite a number of fast trotters of the later 90's.

Shortly after this General Tracy purchased anoth farm, located in the adjoining town of Apalachin, a re-established himself there. It was when at tl latter place that General Tracy bred on a large sca and had for a number of years at the head of t stud the stallion Mambrino Dudley. This was 1883, and the horse had then a record of 2:43 which he later reduced to 2:19¾. As a sire Ma brino Dudley was not as successful as other Ma brino stallions, his get having a reputation for bei soft. In all he sired eight standard performers wi four speed sires and the dams of eleven.

About this time the get of George Wilkes 2:22 we beginning to bring attention to themselves, one pa ticularly that had raced brilliantly and gamely a whose name was on everybody's tongue, this bei Kentucky Wilkes 2:21¼, who had raced continuous and successfully from a two-year-old, having met a defeated such noted old-time stars as Forest Patche 2:18¼, Driver 2:19, Judge Davis 2:18¾, Alexand 2:19, etc., and Maxie Cobb, that later placed tl world's stallion record at 2:13¼.

Kentucky Wilkes became the property of Gener Tracy and always remained his favorite horse.

It was with Kentucky Wilkes that General Trac obtained his greatest reputation as a breeder, from him he bred such good trotters as Bravad 2:10½ (later exported to Europe), Caprice 2:13¼ etc., the two fastest trotters ever bred by Gener Tracy, also the noted brood mare Pique, dam of including Chain Shot 2:06½, Brash 2:14¾, etc. Fro Kentucky Wilkes General Tracy also bred the pace Crafty 2:09½ (sire of Helen D. (p.) 2:09¾). Rig here it might be interesting to note that Crafty wa the only pacer ever bred by General Tracy, wher (to use his own words) he expected a trotter. I fact, General Tracy was most partial to the trotte and while he claimed not to be impartial to the pace did, no longer ago than 1901, write a warning t breeders anent the alarming increase of pacers an advising the rejection for breeding of all animal that did not show a predilection for the trot, and too up the cudgels against those extremists who claime that to cross pacing blood with trotting was the wa to breed extremely fast trotters.

When General Tracy became one of the leadin lights in the political world he practically droppe out of the breeding interests for a number of years In 1897 he re-engaged in the business and establishe his farm at the noted nursery of trotters, Stonyford near Goshen, N. Y., where Chas. Backman had s extensively bred trotters, and placed at the head o the stud the Electioneer-Wilkes stallion Advertise 2:15¼, sire of the then world's champion yearling Adbell 2:23. He had intended keeping only a few animals as a relaxation from professional work, bu the fever again got into his blood, and before long he had as many as 100 head on the place, and bought two other stallions to assist Advertiser, these being Lord of the Manor and Kiosk, representatives of the Mambrino King and Harold families. Lord of the Manor was an own brother of the world's champion mare Lady of the Manor 2:04¼, and was one of the fastest trotters ever raised on the famous Village Farm. So fast had he shown when in training, and so handsome was he, that that shrewd and critical horseman, C. J. Hamlin, said he would not "swap" the young stallion for a brown-stone front on Fifth avenue. The horse, however, went wrong and never got to the races, though as a three-year-old he trotted a quarter in 32½ seconds.

In the meantime Charles Backman, from whom General Tracy had leased Stonyford, died suddenly, and the farm and other appurtenances was put on the market, necessitating another removal on the part of General Tracy. The General tried to get another farm near Stonyford, but the price at which it was held was considered too high, as he never was considered a very wealthy man, so he decided to sell out every animal he owned with the exception of a score or so of youngsters and a few old mares; so Marshland Farm was practically dispersed in Madison Square Garden in the Midwinter Sale of 1902, and the active efforts of General Tracy as a breeder came to an end, though he retained a keen interest in the trotters and occasionally attended a race meeting.—Trotter and Pacer.

Aviator William Mattery, who arrived in New York recently after having made his escape from Mexico where he had served as an aerial scout for Pancho Villa, brings tidings of the death of his fellow scout, Mickey McGuire, at the hands of the rebel chieftain's men, contrary to the report sent out from "official" sources that he was killed by a fall from a considerable height. According to Mattery, the pair were engaged by Villa's agents in New Orleans, being paid a bonus of $2,000 each and promised $500 a week for their services. After some weeks Mickey notified Villa in person that unless the salaries were forthcoming the boys would quit, the ex-bandit's response being a laugh, followed by a volley from twenty rifles as McGuire turned his back to go to his machine. Mattery was also sentenced to death but by good luck escaped and made his way back to this country. The murdered aviator was a pleasant, happy-go-lucky, likable lad barely well into his twenties, and was a pupil of the late Lincoln Beachey. He was well known here in the extreme west, and his flying was an interesting feature at the last Arizona State Fair. He deserved better luck than assassination and a nameless grave in a barbarous land.

THE FARM

HORSEFLIES.

Horseflies are not only a serious nuisance to live stock in many sections of the United States, but are frequently agents in transmitting the disease known as anthrax, or charbon, which is extremely fatal not only to various kinds of animals but to man as well. It has been proved in experiments that horseflies, as well as the stable fly, carry this disease. In particular, observations in the plateau region of west Texas furnish important evidence that the horsefly is responsible in some degree for the spread of this disease to healthy animals. This fact, it should be said, does not in any way lessen the necessity of the other measures of controlling anthrax, such as the burning of carcasses and preventive inoculation. In fact, large numbers of horseflies have been observed feeding on animals which had either just died or were about to die from anthrax. At this time the blood is known to be filled with the germs of the disease. This emphasizes the importance of isolating sick animals and destroying the carcasses immediately after death.

Even, however, when the horsefly plays no part in the spread of anthrax, it may cause severe loss of stock. The worry caused by the flies' bites frequently causes animals to cease feeding and to group themselves together for mutual protection. When the pest is more than usually abundant nervous animals are sometimes driven frantic and injure themselves in various ways. Furthermore, the loss of blood due to the attacks of the fly may be very serious. Scientists in the department have studied cases in which it was estimated that in the course of a single day several hundreds of flies charged themselves with the blood from the animal. In addition to the blood drunk by the flies, much was lost by trickling out of the wounds made by the insects.

The adult horsefly is equipped with such a formidable biting apparatus that it is difficult to protect stock from its attacks. Any substance which will repel them effectually is likely to irritate the animal to which it is applied. One preparation which will, however, give some temporary degree of protection consists of 1 gallon of fish oil, 1 pint of oil of tar, and 1 ounce of pennyroyal. This may be sprayed on work animals with advantage, but the use of sprays is practically impossible in the case of range stock. Bulletin No. 1 of the Department of Agriculture, which may be obtained from the Superintendent of Documents, Washington, D. C., for 5 cents, deals with this question of repellents.

Another method which has the advantage of simplicity is to provide sheds which furnish a rather dense shade and into which live stock may go when the pests are most troublesome. Horseflies do not enter these sheds readily and the stock will obtain some relief. For very valuable stock or for young calves fly-proof cages are sometimes constructed and the animals placed in these during the middle of the day when the flies are the worst. Such a screened cage is very desirable as a means of isolating animals suspected of anthrax. After a diseased animal has been in it the cage should always be diinfected.

Most of the species of horseflies breed in swampy places. For this reason the numbers of the flies decrease with the clearing up and cultivation of marshy areas. This of course is a very slow measure of relief, and investigators have found that the process may be hastened by placing a film of kerosene on the surface of pools of water. All adult flies that strike the kerosene are destroyed. This system of control is valuable chiefly in regions where there are comparatively few pools of water or in wooded areas where certain pools are observed to be especially attractive to the flies.

The adult fly frequently deposits its eggs on the leaves of water plants growing in pools or along streams, but in west Texas it has been found that the eggs are usually deposited on rocks sticking out of running water. When first deposited the eggs are almost white, but they soon turn almost black or, in other cases, an ashy gray. The minute larvae or maggots hatch in a few days and drop off into the water or mud. When full grown they change into the pupal or resting stage and a few weeks after emerge as adult flies. Most of the species of horseflies require nearly a year to complete this life cycle, and so there is usually but one generation annually. There are a large number of different species, however, each of whom shows minor differences. One of the most important groups is known as the "ear" or "deer" fly. This is a comparatively small insect with mottled wings.

WINTER DAIRYING.

In many sections most of the cows freshen in the spring. The more observing and careful dairymen however having found that winter dairying has many advantages, are breeding their cows to drop the calves in the fall. The following are some of the advantages of winter dairying:

First, higher prices are obtained for milk and cream. As the usual season for cows to freshen is the spring, milk has always been plentiful during the early summer and scarce and higher during the winter.

Second, milk and cream can be handled in cold weather with less danger of souring, so there is little loss on account of milk returned from the creamery.

Third, the amount of labor on the farm is better distributed throughout the year. If the cows freshen in the spring, they are in full flow of milk and need the most care when work in the fields is most pressing. On the other hand, if the cows calve in the fall and are milked during the winter, the farmer can give them close attention, has more time to study the problem of feeding, and can give his men employment all the year and in that way get better help.

Fourth, the lactation period is lengthened and the amount of milk given during the year increased. Cows that freshen in the spring milk heavily while grass is good, but as the pastures dry up the flow of milk falls off and with the approach of winter the cows are nearly dry. If they freshen in the fall, they should at once be started on a good winter ration, and when they have been milked six months it is time to turn them to pasture and for a time the flow of milk will be nearly as great as that from fresh cows. Recent investigations by experiment stations verify this observation.

Fifth, fall calves can be raised better than those born in the spring. Young calves should be fed on milk for several months, after which they must be weaned and fed on solid food. If they are born in the spring, they will be tormented by flies all summer; they may be neglected because of the farm work, and when it is time to wean them they must be put on a dry winter ration. Fall calves come at a time when the dairyman can give them the closest attention, and when weaned they can be put on grass at an age when an easily digested and nutritious food is most needed.

As more milk can be produced, higher prices obtained, the labor more evenly distributed throughout the year and better calves raised, winter dairying offers the best returns to producers.

Warranted to give satisfaction.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

Third Edition Within One Year of Publication.

CARE AND TRAINING OF TROTTERS AND PACERS

NEVER before in the history of the publishing world has a horse book gone into a third edition within one year of publication. Yet the explanation is simple—the book fills a long-felt want.

Never before has this subject been treated in a distinct manner. It has been handled in connection with autobiographies of trainers, but such works are out of print or out of date, for they were published 20 years or more ago. Conditions and methods have changed since then, and former treatises are just as much out of date as the high-wheel sulkies then in vogue.

"Care and Training of Trotters and Pacers" is as modern as a 42-centimeter gun. It does not contain the ideas of one man, but of 100 of the leading horsemen of the day, including Thomas W. Murphy, Walter R. Cox, and Edward F. Geers. These ideas were converted into book form by two prominent American turf journalists.

This book enables anyone to do his own caretaking and training until it is time to send the colt to a professional trainer, or the owner can train and race the colt himself. The treatise covers the details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented. Nothing is left to guess work. The language is lucid. Both theoretical and practical views are outlined and compared. The instructions are concise and easily understood. The work contains no advertisements—it is not a catch-penny publication that looks big in the advertisement but proves disappointing when received.

Many professional trainers have purchased the book and have found it interesting. Despite the war, over 300 copies have been sold in Europe and Australia.

Price $1.00 postpaid. Cloth, illustrated, 176 pages, 5x7 inches.

THE BREEDER AND SPORTSMAN
366 Pacific Bldg., San Francisco, Cal

MODERN BREAKING

By W. A. BRUETTE

A revised edition of the latest Treatise on the Training of Setters and Pointers.

THIS book enables anyone to do his own training and fully explains the methods employed by the most successful trainers in developing the setter and pointer. The important lessons are illustrated by photographs from life; nothing is left to guesswork. The entire subject is covered, from the selection, raising and development of puppies to the conditioning of dogs and their handling in the field. The amateur is told, in lucid language, how to make a dog a high-headed, stylish worker, stanch on his points, steady to shot and wing, and a prompt, tender retriever; all of this is accomplished by simple methods, some of them never before given to the public. The instructions for correcting the faults of bird dogs and keeping them up to their training are concise and easily understood. Every man who owns a bird dog or shoots in the field should read this book.

Price: Paper $1.00, Cloth $1.50. Sent Postpaid

A REAL BARGAIN IN HIGH CLASS HORSES

Owing to a combination of circumstances that will keep me permanently in the east and prevent my return to my former home in Southern California, I wish to dispose of the famous brood mare BONNIE AILSE 2:08½ and her two filly foals by WILBUR LOU (3) 2:10¼, one a two-year-old, the other a suckling, all at present at Hemet Stock Farm, and offer them for a quick cash sale at a most liberal figure.

BONNIE AILSE 2:08½

brown mare, foaled 1897, standard and registered, is by Faustino 2:12¼, dam Ailse Medium 2:27¾ (dam of 2) by Happy Medium 400, grandam Ailse (dam of 1) by Corbeau 98. She is a producer of exceptional quality and is the dam of

CONTENTION B. (3) p. 2:08¼

a pacer of exceptional merit, barred from being a world's record holder by a technicality only.

CARLSCHEN (2) 2:23

a trotter that is right in every way and is showing well this year in his three-year-old form.

Both of these youngsters are members of the stable of W. G. Durfee and are valued away up in the three and four figure marks. Ask him what he thinks of Bonnie Ailse's produce.

WILBUR LOU (3) 2:10¼

is one of the best bred young horses in the country and a coming great sire—has three two-year-olds (one with a yearling record) in the list. The two-year-old out of Bonnie Ailse is his first foal and has never been trained.

FOUR HUNDRED DOLLARS TAKES THE THREE

and any one alone is worth that figure. No trades, and no reduction from this price. Address all communications to

SAVE-THE-HORSE

TRADE MARK REG'T.

PROVES ITS WORTH

These show why the drvggists say: "They come again for Save-The-Horse"

J. H. Cail, 55 William St., Portland, Maine, Jan. 11, 1915, writes: Troy Shemical Co., Binghamton, N. Y.—In October I purchased through Riker-Jayns—druggists, a bottle of Save-The-Horse for my driving horse Dan Sox. Most of my acquaintances laughed and said there was no cure.

He had a Blood spavin and was dead lame. He was never trained but is the best road horse in Portland.

I started using Save-The-Horse and in five weeks he was all over the lameness. He goes as sound as he ever did in his life and, since November, I have been working him every day. He can step just as fast as ever, not one mite stiff in any way. I have since cured a cockle on a work horse of two years standing.

A friend of mine has a valuable trotting mare that last summer had two large windpuffs come on behind. He used ——— and had his horse in the barn six weeks; it did no good; ½ bottle of Save-Tthe-Horse cured her entirely. You are at liberty to use this letter if you want to. I cannot say too much for your medecine.

SAVE-THE-HORSE does not "burn" the life and strength out of muscles, ligaments and tendons that need to be strengthened and made elastic.

SAVE-THE-HORSE does not harden joints nor calcify bones that should be kept limber and strong.

This remedy is not experimental, and we furnish with every treatment an iron-clad Guaranty Contract to return the purchase money if the remedy fails.

SAVE-THE-HORSE is sold by Druggists and Dealers Everywhere

$5 with a binding contract to refund money or cure any case of BONE AND BOG SPAVIN, THOROUGHPIN, RINGBONE (except low), CURB, SPLINT, CAPPED HOCK, WIND PUFF, SHOE BOIL, BROKEN DOWN AND INJURED TENDONS. No scar or loss of hair. Horse works as usual.

GUNCRAFT
By W. A. Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

1915 WINRACE —and— ELIGIBILITY BOOK

The National Trotting Association Winrace and Eligibility Book for 1915 is now ready for delivery. It is a work of 858 pages, bound in cloth and contains official reports of all races and time record meetings held by members of the National and American Trotting Associations as well as copies of all special reports received by the two Associations, and all reports of non-association meetings which appeared in the columns of the turf and daily papers in 1914 as well as an index giving the starts made by each horse. In addition to this, it also contains an Eligibility List which presents the names of all live horses that acquired records or winraces in 1912, 1913 and 1914. When a winrace was made over a mile track it is designated by the letter (m) and if a horse also has a winrace over a half mile track within the four seconds limit fixed by the rule, it is also given and marked (½m).

Last year after the new eligibility rule was adopted, the National Trotting Association issued a Winrace and Eligibility Book, which covered 1912 and 1913. It assisted materially in the application of the new rule, but members and horse owners were frequently in doubt as to whether a horse was entitled to a time allowance. This resulted in a very voluminous correspondence and in order to obviate it in 1915, the present book has been compiled and issued as approved by the President under an order of the Board of Review.

In the matter of time allowance, a horse with a winrace is allowed one second for each year, if raced, in which he fails to equal or reduce his record or win a race, providing same is claimed by the nominator when making the entry. If a horse was not raced in 1914, he is not entitled to a time allowance and a reference to the index in this book will show whether he was raced or not, while by referring to the summaries, it can be determined whether he equaled or reduced his record or won a race. Also in order to give all the information possible, the reports of meetings contain all races at half mile heats as well as at mile.

This book presents reports of 1,400 meetings at which 12,673 horses started in 8,730 races and 939 performances against time, for which the premiums amounted to $3,228,617.82, while the Eligibility List presents the names of over 14,000 horses.

The 1915 Winrace and Eligibility Book will be sent postage prepaid to any address for $2.00 by

A Practical Treatise on the Training of Hounds

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

"JACK-RABBIT" APPERSON

A BOOSTER FOR

TRAPSHOOTING

MR. EDGAR APPERSON, President of Apperson Bros. Automobile Co., makers of the widely-known Apperson automobiles, says about trapshooting,—"the Sport Alluring":

> The pleasure I derive from the "Sport Alluring" is the most enjoyable of all the outdoor sports in which I engage—hunting and fishing not excepted—and I take a great deal of pleasure in both of these.
>
> Of all the outdoor sportsmen, I think the gentlemen who follow trapshooting are the most enjoyable lot that it has been my good fortune to meet. It is to be regretted that more ladies do not take up trapshooting than do.
>
> There is one thing necessary. To become a proficient trap shot requires a great deal of mental concentration, which of itself makes one forget business cares and worries, and is not only a bodily but a mental rest as well.

Mr. Apperson's experiences are typical of those of thousands of other men and women trapshooters.

There's a welcome awaiting you at the shooting club. Ask for booklet and a letter of introduction to the secretary of the nearest trapshooting club.

For thirty-nine years the name of

McKERRON

Has stood for nothing save the

VERY BEST

of everything in the way of harness and accessories for stable, track, road and field. What is now offered "at any price" is the remnant of the sterling stock from which your wants have been filled during all these years—articles that are absolutely A-1 in every respect. When they are gone this establishment will be closed, never to be re-opened.

The Manufacturing Department

has been discontinued and no orders for new work will be accepted.

The curtailing of racing and training operations and the passing of road driving have combined to make my business no longer a matter of profit and I have reluctantly decided to

Go Out of Business Immediately

and when I say "go out of business immediately" I mean just that and nothing else. The present stock will be sold regardless of cost, and while it lasts you have your pick of

"McKerron" Horse and Stable Goods

Harness in sets and parts ***Handmade Horse Boots***

Blankets Robes Coolers Whips

Saddles, Bridles, Spurs, for track, park, or polo field

and an endless array of minor fittings and accessories, each and every article of the sterling quality that the name "McKerron" implies.

INITIAL COST IS NOT A CONSIDERATION

I must and will close this place at an early date and will make any reasonable sacrifice to enable me to do so. The stock is fast diminishing and I advise you to make your selections and purchase immediately.

IT LOOKS GOOD TO EVERYBODY

The Winchester Model 1912 Hammerless, Repeating Shotgun has won the enthusiastic approval and endorsement of shooters everywhere. Its light weight, strength, balance, easy-working action, and splendid shooting qualities appeal to men who know a good gun. Its Nickel steel construction means not only a lighter and stronger gun, but a better balanced one, because of the better distribution of weight. This gun loads and unloads easily, has a cross-bolt trigger lock, and a simple take-down system. It is made in 12, 16 and 20 gauges. If in the market for a shotgun, don't fail to examine

NANCY HANKS 2:04.

On Monday, August 16, at John E. Madden's Hamburg Place in the blue grass district of Kentucky, death laid claim to the spirit of Nancy Hanks, foremost among the world's trotters a score or more of years ago, and famous also as a producer of speed in her own right as well as through her sons and daughters. For some years she has been owned by the Maddens, and in a country that nature formed for a "horse heaven" has had every comfort that could be provided for one whose work had been as well done as had hers.

Though death came to her at an advanced age, and in the course of her twenty-nine years of life she had traveled far, her final years of idleness and ease were spent in the same locality where she first saw the light of day and achieved her early honors on the race course, for Nancy was a member of one of the "first families" of the blue grass. In 1885 it was that Hart Boswell of Lexington mated to Happy Medium (then in his twenty-second year) the black mare Nancy Lee by Dictator, as a result of which union there was born, during the following season, the brown filly that was to become so widely known to fame under the homely but long-revered name of Nancy Hanks. Nancy Lee was bred by Mr. Boswell, who also owned throughout her life the grandam of the brown filly, Sophy by Edwin Forrest, herself the dam of a champion. Mated in 1868 to Andy Johnson, Sophy produced the filly Julia Ann Johnson, who, as a two-year-old in 1871, won for Mr. Boswell her first and only race, placing the world's record for two-year-old trotters at 2:45½. Through Sophy, the champion traces on back to Parker's Brown Pilot and the thoroughbred families of Sir Archy and American Eclipse.

Taken in hand early in life by Ben Kenney, Nancy soon showed evidence of pronounced trotting proclivities and as a three-year-old (1889) was raced by that "gentleman and horseman" through the Kentucky circuit, achieving a record of 2:24½ and winning seven races, one of them a walkover. As a four-year-old her operations were confined to the territory close to home, but she won six races and cut her record to 2:14½, performances that caused her to be regarded as a formidable candidate for future honors of a championship nature, her four-year-old record having been surpassed by but two fillies of that age, Sunol (4) 2:10½ and Margaret S. (4) 2:12½.

So firmly did her owner and admirers believe in her abilities to become a champion that before another season rolled around she had gone into the hands of that maker of champions, Budd Doble, and the wisdom of the change was not left in doubt for long. Belle Hamlin and Margaret S. were decisively disposed of in match races, and in her last competitive race, a stake for five-year-olds at Independence, Iowa, she defeated Allerton and Margaret S. in straight heats and record time, 2:12, 2:12¾, 2:12, the three heats, individually and collectively, establishing four championship marks. Later in the year she trotted at Cambridge City, Indiana, against time in 2:09¼, and a week later at the Quaker settlement of Richmond, in the same state, clipped the fraction and established the world's five-year-old record at 2:09.

World's records are sometimes "fleeting things," and such was the case in this instance. In 1883, Jay-Eye-See had trotted as a five-year-old in 2:10¾ for Ed Bither, and at this figure it remained until the season just reviewed, which was a hard one for five-year-olds. At Independence, Allerton cut the mark first to 2:10 flat and then to 2:09¼ for C. W. Williams, and from Sept. 4 to Sept. 30 rejoiced in being a world's champion for the age. Then Nancy asserted her claims for queenly honors, but her reign was of even shorter duration than Allerton's, as on October 20 Charles Marvin piloted Sunol over the Stockton course in 2:08¼.

Up to and including the season of 1891 all of Nancy's races had been to the old-fashioned high wheeled sulky, to which style of hitch she had performed as follows:

PERFORMANCE TO HIGH WHEEL SULKY.

Total miles in standard time	44
" " in standard time in races	31
" " in 2:20 or better in races	14
" " in 2:15 or better in races	5
" " in 2:12 or better in races	2
" " in 2:15 or better	15
" " in 2:14 or better	14
" " in 2:13 or better	11
" " in 2:12 or better	8
" " in 2:10 or better	2

The season of 1893 witnessed the introduction of the bike sulky into general use, as in a very short time its superiority over the high wheel type was most emphatically demonstrated—and one B. Doble, Esquire, was not the man to pass up a good thing when he saw it. Three times during the month of July Nancy started to the old wagon without beating 2:11, but on August 11 at Grand Rapids she was hooked up to one of the new-fangled trinkets and showed her appreciation of the same by trotting in 2:09. Never again in a public trial was she to trot a mile so slowly!

On August 17 at Chicago she clipped a second from the 2:08¼ of Sunol, and on August 31 at Independence trotted in 2:05¼. Not content with this, she trotted the regulation track at Terre Haute in 2:04, being the first trotter to beat 2:05, pulling a bike sulky that weighed sixty-two pounds. She trotted ten exhibitions in all to that hitch in 1892 and six in 1893, the time for the sixteen averaging approximately 2:07¼.

Some time prior to the close of her career in harness, Nancy had passed from the ownership of her breeder to that of J. Malcolm Forbes, who on her retirement began the series of breeding operations which were to be so richly rewarded, for Nancy was no "single barrel" champion and was not only the first performer to trot in 2:07¼ but was also the first matron to produce two sons to equal that figure—Admiral Dewey 2:04¾ and Lord Roberts 2:07¼. Indeed, so much might be written concerning her descendants that rather than have this story "run away with itself" we will restrict our efforts to the following concise summary of her produce:

BRED BY J. MALCOLM FORBES:

1896—Narion, b f by Arion 2:07¾; dam of Vice Commodore 2:11 (sire of 31, including 2 in 2:10), Albia 2:08¾, Darion 2:29½ and Ariello (dam of Orbingen 2:18).
1897—Barren.
1898—Admiral Dewey 2:04¾, b c by Bingen 2:06¼; sire of 45, including 5 in 2:10.
1899—Princess of Monaco, b f by imp. Meddler, thbd.; dam of Nancy Bingen 2:15¼, Vanitza (3) 2:29½ and Hanks Bellini p. 2:11¼.
1900—Lord Roberts 2:07¼, b c by Arion 2:07¾; sire of 34.
1901—Markala p. 2:18¼, br f by Peter the Great 2:07¼.
1902—Ondawa, b f by Bingen 2:06¼; injured.
1903—Palema, b f by Bingen 2:06¼; dam of Lema Worthy (2) 2:26.
1904—Malcolm Forbes, b c by Bingen 2:06¼; sire of 2.
1905—Barren.

BRED BY J. M. JOHNSON:

1906—Nancy McKerron (3) 2:10½, b f by John A. McKerron 2:04¼.
1907—King Todd p. 2:22½, b c by Todd.
1908—Nancy's Todd (3) 2:22¾, b f by Todd.

"The queen is dead, long live the queen," and while the present and the future queens surpass or will surpass in some points the subject of this sketch, not one is or ever will be more truly "every inch a queen" than Nancy Hanks.

TROTTING CLASSES AT EXPOSITION SHOWS.

Thursday, September 30, is the day on which the standard bred trotter will be in the limelight in the show ring out at the Panama-Pacific International Exposition, and owners of high class horses who propose to take part in the competitive classes on this occasion are warned that entries close with Chief D. O. Lively of the Department of Live Stock on Wednesday, September first—next Wednesday, to be brief. So thoroughly has the work of distributing the prize lists of this department been accomplished that there should be practically no breeders ignorant of the opportunities provided for them by the exposition management, but for fear there may be intending exhibitors among our readers who have been overlooked, we present the following schedule of classification and awards:

STANDARD TROTTER.

Section		1st	2nd	3rd	4th	5th	6th	7th
1.	Stallion, 4 yrs. old or over	$75	$60	$50	$40	$30	HC	C

Premier Championship for Breeder.

27.	Best showing of Standard Trotters in sections 1 to 10 inclusive, as determined by the largest aggregate amount awarded to animals bred by any one breeder represented	Ribbon

Premier Championship for Breeder.

28.	Best showing of Standard Trotters in sections 1 to 10 inclusive, as determined by the largest aggregate amount awarded to animals owned by one Exhibitor	Ribbon

We wish also to call attention to the special offerings of supplementary prizes made by the American Trotting Register Association, which some months ago voted a thousand dollars for this purpose, its awards to be made pursuant to the following conditions:

Champion Stallion with 5 of his get, four year olds and under, $200 cup and $300 cash.
Champion Mare with 2 of her colts, four year olds and under, $100 cup and $100 cash.
Champion Stallion, any age, $100 cup.
Champion Mare, any age, $100 cup.
Champion Gelding, any age, $100 cup.
Horses standard bred and registered in the American Trotting Register Association.
All mature horses must be 15 hands, 2 inches or over and sound.
All horses must have long tails.
The following percentage will govern in Stallion and Get:—
General conformation and all around suitability of Sire as a light harness horse, 30%; style, action, manners and speed of Sire, 20%; general conformation and all around suitability of Get as light harness horses, taken as a whole, 30%; style, action, manners and speed and uniformity of type in Get, 20%.
The following percentage will govern in Mare and two of her colts:—
General conformation of dam as a brood mare of the light harness horse, 50%; general conformation, style, action, speed and manners of her offspring, 50%.
None of the above conditions alone shall be conclusive.
Horses alone to be considered.
A certificate of registry in the American Trotting Register Association is absolutely necessary to render animals eligible for entry in this class.

The cups mentioned in the association's list of awards are beauties, and are illustrated on our cover page this issue. They were designed by C. D. Peacock of Chicago along lines suggested by a committee appointed by Secretary W. H. Knight. Certainly no more appropriate selections could have been made of famous horses whose likenesses adorn the cups—for the champion sire, Bingen 2:06¼; for the champion brood mare, Miss Russell; for the champion stallion, The Harvester 2:01; for the champion trotting mare, Lou Dillon 1:58½, and for the champion gelding, Uhlan 1:58.

The cash awards and trophies are well worth competing for, and if your entries are not already made, look to them at once. Copy of certificate of registration should accompany entry, and quarters for the accommodation of all horses that are to participate in the exhibition will be in readiness on September 25.

Racing on the North Pacific Circuit

REPORTS BY W. C. BROWN AND H. S. RALSTON.

VANCOUVER, B. C.

Vancouver, B. C., Aug. 14—The races the opening day of the Vancouver Exhibition were certainly an attraction from every standpoint. The feature race was the 2:20 trot and the 2:25 pace which was captured in straight heats by Lady Hal, H. B. Cox's stately daughter of Hal B. 2:04½ of Portland, Ore., and ably driven by Wm. Hogoboom. Second money fell to Nellie J., the speedy daughter of Zolock and owned and driven by D. H. Young of Spokane. Third and fourth money fell to Vancouver horses, third money coming to Prince Malone and fourth money to Baldue. The time of the three heats was good, being 2:15½, 2:16¾ and 2:19½, the track being heavy and dusty.

The amateur free-for-all was won by Olga S., though Glad Wren won one heat. The time for the three heats was 1:07½, 1:08 and 1:07½. Monarch Boy got third and Nellie Wilkes fourth money.

The Fields and Boyd Challenge Cup was won by Uncle Tom, Chromo winning the first heat. The summary:

August 14—2:20 trot and 2:25 pace, purse $500:

Lady Hal, b m by Hal B.....(Cox)	1	1	1
Nellie J., b m by Zolock.....(Young)	2	2	2
Prince Malone, ch g by Kinney Lou.....(Loomis)	4	4	3
Baldue, b g by Del Coronado.....(Stewart)	5	3	5
The Frisco, ch g by Caution.....(Lance)	3	5	6
Johnny D., b g by Wildbrino.....(Wright)	6	7	4
Alex Williams, bl g by The Patchen Boy(Hodgins)	7	6	7
Tosora, b m by The Patchen Boy.....(Stetson)	ds		
Aurelia Lou, br m by Kinney Lou.....(Dixon)	ds		

Time—2:15½, 2:16¾, 2:19½.

Free-for-all pace, amateur, halfmile heats:

Olga S., b m by Diablo.....(Marshall)	1	2	1
Glad Wrenn, bl m by Jubilee de Jarnette(Mitchell)	2	1	3
Monarch Boy, b c by Merry Monarch.....(McKie)	4	3	2
Nellie Wilkes, ro m by Jayfoot.....(Morris)	3	4	4
Myrtha Pointer, b m by Star Pointer...(Brown)	5	5	dr

Time—1:07½, 1:08, 1:07½.

Fields and Boyd Challenge Cup, amateur, halfmile heats:

Uncle Tom, bl g by Monbars.....(Handford)	2	1	1
Chromo, bl g by Moko.....(Bell)	1	3	2
Morris Barker, b g by Walter Barker (Ripplinger)	3	2	3

Time—1:13, 1:12½, 1:13¾.

Second Day at Vancouver.

August 16.—The best trotting race ever pulled off on the Vancouver track took place today in the 2:25 trot for a purse of $1,000.

The nine starters represented almost every shade of breeding, the race going four heats before the winner was found. The winner, Floradora Z., is a handsome brown daughter of Zombro and now carries a race record of 2:19¼. She is owned by Messrs. McMormack & Cudaghy of Seattle and her dam was Flora G. by Altigo.

Frank D. Nichol, winner of second money and winner of the second heat in 2:20¾, is a bay stallion by the ex-champion Cresceus.

The winner of third money, Sea Waif, is a rangy brown mare by The King Red, dam Sea Queen by Vice Regent, and the winner of fourth money, Alta Mac, is by Redlac, dam by McKinney, and is possibly the most speedy of the lot but is very unsteady.

The other horses competing were Peter R., a grandson of Peter the Great, dam Miss Sunflower; Nellie B., bay mare by Hal B.; Hal McK. by Bonnie McK.; Novela by Letrado, and Beauty B. by Woodlock. The field was certainly a classy one and the fourth heat in the vicinity of 2:20 on a half mile track for horses the majority of which were making their first start of the season was exceptionally good.

The second race was the D. Class pace for matinee horses. The winner was May Putnam, a handsome black mare by Glendor 2:11¼, son of Red Medium, and her dam was Fannie Putnam, the well known race mare.

The winner of second money, Lady Tango, was also a three-year-old, very fashionably bred, being by Belmar son of Moko, dam Delbars 2:11¼ by Monbars. She stepped the third heat—the fastest of the race—in 1:10½.

The third race was the C. Class trot, mile heats, three heats, every heat a race, in which three descendants of Kinney Lou started, and was won by Susie G., who took a record of 2:27½ to win. The day in detail:

August 16—2:25 trot, purse $1,000:

Floradora Z., b m by Zombro....(McCormick)	1	2	1	1
Frank D. Nichol, b h by Cresceus....(Loomis)	6	1	2	6
Sea Waif, br m by The King Red (McMannus)	2	4	4	4
Alpha Mac, bl m by Redlac.....(Parker)	4	6	5	2
Al McK., b h by Bonnie McK.....(Bush)	7	3	8	3
Peter R., ch g by Blue Peter.....(Young)	8	7	3	5
Novela, b m by Letrado.....(Stetson)	3	8	6	7
Nellie B., b m by Hal B.....(Swisher)	5	5	7	8
Beauty B., b m by Woodlock.....(Wright)	9	dr		

Time—2:19¼, 2:20¾, ——, ——.

Class D pace, halfmile heats:

May Putnam, b m by Glendor.....(Millington)	1	1	2
Lady Tango, b m by Belmar.....(Burgoyne)	6	2	1
K. M. C., b g by B. C. King.....(Lochead)	2	3	3
Queen May, bl m by Oro Wilkes....(Birmingham)	3	6	4
Red Squirrel, ch g by Bland S.....(Loomis)	4	5	5
Comet, br g by Oliver J.....(McGuire)	5	4	6
Moko Jerome, b g by Belmar.....(Handford)	7	dr	

Time—1:11½, 1:12, 1:10½.

Class C trot:

Susie G., b m by McKinney.....(Steves)	1	1	1
Ameline Lou, br h by Kinney Lou.....(Steel)	2	2	4
Lou Nut, b g by Kinney Lou.....(Brown)	4	4	2
Alma Lou, bl m by Kinney Lou.....(Mason)	3	3	3
Special Blend, b g by Burtwood.....(Burgoyne)	5	5	dr

Time—2:29¼, 2:27½, 2:32½.

Third Day at Vancouver.

Tuesday, Aug. 17.—The races for today in connection with the Vancouver Exhibition Association were as usual up to a high standard. The 2:15 pace for a purse of $1,000, best three in five, brought out a field of exceptionally fast pacers, including Ella Erickson, bay mare by Diablo, dam Vevo by Altamont, owned by J. R. Jennings of Victoria and driven by Collie Wilson; Nic Nac, bay gelding by Alcone, owned and driven by W. B. Russell of Vancouver; Glenrose, black mare by Beaumont, dam Browney, owned by John Roberts of Spokane; Indian Hal, a full brother of the now famous Hal Boy and owned by S. A. Agnew of Centralia, Wash.; Prince Malone, chestnut gelding by Kinney Lou, dam Princess Beshum, driven by F. B. Loomis; Nigger Boy by Oregon Patch, dam Dictatress, owned by I. Rabi, North Yakima; Tillamook Maid by Zolock, and Scarlet Trent by Parovas, dam Rose Rial by Alcone.

Scarlet Trent, the bearcat of the Western Canada circuit, was the most extensively regarded in the race, but Glen Rose and Indian Hal were also highly considered. The winner proved to be Scarlet Trent, second money going to Tillamook Maid, third to Indian Hal and fourth to Prince Malone.

The field was a truly representative one and a race second to none of the halfmile tracks in the North Pacific circuit.

In the first heat Indian Hal made a break going away on the first turn, forcing Ella Erickson to a break and she in turn colliding with Prince Malone, breaking the wheels of both Ella Erickson's and Prince Malone's sulkies. Both horses were placed and in the remaining two heats Prince Malone gave a remarkably good account of himself, coming from behind every time and finishing a strong third. This horse has had no racing experience and has been trained on a mile track all this season, so he was, therefore, very considerably handicapped. He looks as though he would be a very speedy horse next season.

The second race was a B class pace, halfmile heats for British Columbia horses and brought forth a field of six, New Moon, a chestnut mare by Bonner N. B., Johnny D., bay gelding of unknown breeding, and Hal Scott, a brown horse by Hal B. being most highly regarded, the race being on the every-heat-a-race plan. The winner proved to be Hal Scott, who went three good half-miles in 1:07½, 1:07¼ and 1:06¾. Nellie Wilkes, out of the dam of William 1:58½, went a good race, finishing 3-3-2.

The third race was also a local affair for trotters and brought forth four slow steeds of mediocre capacity, the best bet being May Bells, a white-legged bay mare by Walter Barker. The best bred individual in the race was Bon Ladi, a handsome small black filly by Bon Voyage 2:08, dam Mag Ladi 2:07¼ by Del Norte, but she has not yet shown that she is likely to live up to her speed inheritance. The remaining entrants, Mac Seal and Sweet Nut, were by Red Seal and Bertwood respectively.

The winners were as shown by the summary. The only feature requiring remark was the second half by May Bells. This daughter of Walter Barker pulls an express wagon in the city and is a pretty considerable trotter when she takes a notion, but breaks badly at times. The details:

Tuesday, Aug. 17—2:15 pace, purse $1,000:

Scarlet Trent, b g by Parovas.....(Thompson)	1	1	1
Tillamook Maid, bl m by Zolock.....(Woodcock)	3	2	2
Indian Hal, br h by Hal B.....(Wilson)	2	5	4
Prince Malone, ch g by Kinney Lou.....(Loomis)	7	3	3
Nigger Boy, bl g by Oregon Patch.....(Lanse)	5	4	5
Glen Rose, bl m by Beaumont.....(Young)	4	6	7
Nic Nac, b g by Alcone.....(Rpssell)	6	7	6
Ella Erickson, b m by Diablo.....(Wilson)	8	ds	

Time—2:13¼, 2:13¼, 2:13¾.

Class B pace, halfmile heats:

Hal Scott, b h by Hal B.....(Stevenson)	1	1	1
Nellie Wilkes, ro m by Jayfoot.....(Morris)	3	3	2
Johnny D., b g untraced.....(Wright)	5	2	4
San Lucas Maid, ch m by Dictatus.....(Foster)	2	5	5
New Moon, ch m by Bonner N. B...(Thompson)	6	4	3
Lady Patrice, b m by Ben Z.....(McCullough)	4	6	6

Time—1:07¼, 1:07½, 1:06¾.

Class D trot, halfmile heats:

Mac Seal, b h by Red Seal.....(Fenn)	3	2	1
Sweet Nut, b m by Burtwood.....(Milloy)	1	4	2
May Bells, b m by Walter Barker...(McCullough)	4	1	4
Bon Ladi, bl m by Bon Voyage.....(Smith)	2	3	3

Time—1:27½, 1:17¾, 1:23.

Fourth Day at Vancouver.

Wednesday, Aug. 18.—Judged by the amount of interest and enthusiasm evoked from the grandstand on Wednesday afternoon, the harness races put up on that occasion elicited and merited the approval of a large audience, by all means the largest of the week.

The feature race was a free-for-all trot or pace, which was won in straight heats by Allerdaw, a well known campaigner on the North Pacific circuit, having taken a record of 2:09 on a half-mile track in A. L. Russell's hands some three years ago. The best horse in the race, however, was apparently Mr. McCullough's brown horse, Hal Stewart, a son of Hal Mercury and one that has been winning second money consistently all season throughout the prairies. The Frisco, J. H. LaRoux's good trotter and the only trotter in the race, put up a surprisingly good fight considering that he was very lame.

The three-year-old pace from a breeder's standpoint was more interesting than the feature race, as it covered three high class baby pacers. The winner of first money, Jim Sonnie of Spokane, is a fine-looking and fast colt but the winners of second and third money were more interesting locally, both being high class fillies. Lady Tango, winner of second money, was the Vancouver favorite, bred and raised here, a granddaughter of the great futurity sire Moko and out of Delbars 2:14¼ who, by the way, took second money in the next race, which was won by Alex Williams, Mr. Fenn's popular matinee pacer. Elsie J., brought down from Chilliwack, did not race up to expectations. The details:

Wednesday, Aug. 18—Free-for-all trot or pace, purse $500:

Allerdaw, br g by Allertonian.....(Hogoboom)	1	1	1
Hal Stewart, b g by Hal Mercury...(McCullough)	2	2	2
The Frisco, ch g by Caution.....(Le Roux)	4	3	3
Tosora, b m by The Patchen Boy.....(Stetson)	3	6	4
Dan L., b c by Sunrise.....(Bush)	6	4	6
Truxton King, ch h by Idol Chimes.....(Dooley)	5	5	5

Time—2:19½, 2:15¾, 2:16.

Three-year-old pace, purse $300:

Jim Sonnie, br c by Gerfalcon.....(Young)	1	1	1
Lady Tango, b f by Belmar.....(Burgoyne)	2	2	2
May Putnam, bl f by Glendor.....(Millington)	3	3	3
Recall, b c by Freddie C. Jr.....(Lanze)	4	4	4

Time—2:24½, 2:24¾, ——.

Class C pace, halfmile heats:

Alex Williams, bl g by The Patchen Boy..(Fenn)	1	1	1
Delbars, br m by Monbars.....(Burgoyne)	2	2	2
Elsie Johnson, b m by Dr. Wilkes.....(Morris)	3	4	3
Billy Button, b g.....(McCullough)	4	3	4

Time—1:10, 1:10, 1:09½.

Fifth Day at Vancouver.

Thursday, Aug. 19.—Today's program of harness races at the fair was robbed of its interest to a certain extent by the unfortunate accident which occurred to W. S. Marshall's Olga S. in the second heat of the free-for-all when, rounding in the first turn in the second half of the heat, she was seen to falter and stop. The veterinary failed to find any broken bones but the mare was in great distress and will probably be unable to race again. This, and the withdrawal of Baldue in the same race owing to sickness, left Hal Scott easily the monarch of the field and the winner in straight heats, best time 2:19½. Johnny D. and Monarch Boy, however, furnished a high class race for second position, the latter winning the place in the second heat and would probably have won the third but for striking his knee and going lame when rounding into the home stretch.

The two-year-old trot or pace brought out four well bred and breedy looking youngsters. Captain Mc. and K. M. C. were easily the best in the field and the race between them for first place was a very classy one, the decision, however, going each heat to the Captain. This colt is a son of The Bondsman, known all over the world as the sire of Colorado E. (3) 2:04¾ by many regarded as the greatest three-year-old ever bred, and the Captain colt today justified the expectations which had been entertained regarding him as a high class prospect. The Captain hails from Oregon. K. M. C., the winner of second money, is a local product, being by J. W. Hollingshead's good stallion B. C. King, dam Arketa by McKinney, and this colt was a contender all the way. The winner of third money, C. A. Harrison's filly Boniquee by Count Boni, a full brother to Bonaday 2:11¼, dam Niquee 2:13¼ by Joe Patchen 2:10¾, is a handsome filly but either did not like the going or was short on training. The same is true of Red Squirrel, Jas. McMynn's handsome Bland S. colt.

In the third race another accident occurred, this time in the last heat of the race, when Geo. Bell's Chromo collided with the fence, throwing Mr. Bell and spraining his ankle severely. This was an exceptionally good race, Choromo taking his first two heats by narrow margins from Morris Barker, while Morris Barker won the last heat with Lou Nut, who had been fourth in the first two, as a contender. Though the fields were not as large as in former days the finishes were close enough to create interest. The wild horse races, relay races and bucking contests were as usual interesting and exciting. The summary:

Thursday, Aug. 19—Free-for-all pace, B. C. horses:

Hal Scott, b h by Hal B.....(Stevenson)	1	1	1
Johnny D., b g untraced.....(Smith)	2	3	2
Monarch Boy, b g by Merry Monarch...(McKee)	3	2	3
Olga S., b m by Diablo.....(Marshall)	4	dr	

Time—2:21¼, 2:19¼, 2:23½.

Two-year-old trot or pace, halfmile heats, purse $400:

Captain Mc., b c by The Bondsman...(Woodcock)	1	1	1
K. M. C., b c by B. C. King.....(Lockhead)	2	2	2
Boniquee, b f by Count Boni.....(Stetson)	3	4	3
Red Squirrel, ch g by Bland S.....(Loomis)	4	3	4

Time—1:10½, 1:14, 1:14½.

Class B trot:

Cromo, bl g by Moko.....(Bell)	1	1	4
Morris Barker, b g by Walter Barker.(Riplinger)	2	2	1
Lou Nut, b h by Kinney Lou.....(Brown)	4	4	2
Uncle Tom, bl g by Monbars.....(Hanford)	3	3	3

Time—2:24½, 2:22¼, 2:20½.

The time of the two heats in which William beat Directum I. averages just a quarter of a second slower than that of the two heats in which Directum I. beat William.

◈ ◈ ◈

The program of the Riverside District Fair is out, and the association has stood firmly to its promise to provide an opportunity for trotting horse folks to pick up a bit of money, the condensed program being as follows: Tuesday, Oct. 5, 2:30 trot, $300, and 2:23 pace, $300; Wednesday, Oct. 6, 2:09 pace, $500, and 2:14 trot, $300; Friday, Oct. 8, 2:20 trot, $300, and 2:18 pace, $300; Saturday, Oct. 9, 2:14 pace, $300, and 2:10 trot, $500, a number of matinee events rounding out the day in each instance. Entries close Wednesday, Sept. 15, and blanks with full particulars may be had upon application to Secretary O. P. Sanders. The Riverside oval is the fastest two-lap course in the state, and horsemen racing there last season were quick to say a good word for the management and the plant, both being OK in every particular. The association holds membership in the N. T. A.

Exposition Horse Shows

In connection with the general horse show that it will conduct from September 30 to October 13, the Panama-Pacific International Exposition at San Francisco will have a special horse show, which its promoters believe will demonstrate to the world that the horse is as high in popular esteem as ever. It is pointed out that he is recovering from the blow given him by the automobile just as he recovered from the blow given him by the bicycle.

This is true particularly in the fashionable world, where the automobile is being used for rapid travel over great distances, but the family carriage is again in favor by people of elegance for purely family purposes, for comfort and ease; where the tally-ho coach and the tandem and the high-seated cart are as popular as ever.

Above all, the saddle horse is said to be more in demand than ever, for both sport and pleasure, the out-of-door man and woman delighting especially in the hunter and jumper.

The special horse show will be, in addition, an important society event, as such shows usually are, wherever held. Among the patrons and patronesses are such prominent social leaders and judges of horses as Mr. and Mrs. Stotesbury of Philadelphia; J. Campbell Thompson of New York; General and Mrs. J. B. Castleman of Louisville, Ky.; John D. Crimmins of New York; A. C. Leonard of Chicago; Fred Pabst of Oconomowoc, Wis.; General and Mrs. John J. Preshing, U. S. A.; Mr. and Mrs. H. W. Treat of Seattle; Mr. and Mrs. George Wingfield of Reno, Nev.; Major and Mrs. J. C. Harbord, U. S. A.; Mr. and Mrs. J. D. Farrell of Portland, Ore.; Joseph K. Maddux of Warrenton, Va., and others well known throughout the country.

Among the Californians who will be patrons and patronesses are Howard Huntington, Mr. and Mrs. J. Cheever Cowdin, Mr. and Mrs. E. J. De Pue, Mrs. Phoebe A. Hearst, Mrs. Henry J. Crocker, Mr. and Mrs. John S. Drum, Mr. and Mrs. E. O. McCormick, Mr. and Mrs. R. H. Miner, Mr. and Mrs. Walter Hamlin Dupee, Mr. and Mrs. Phillip E. Bowles and others of equal note.

This special show will include all the horses of the performance classes at the exposition; such as roadsters; carriage horses, including high steppers, tandem teams, three and five-gaited harness horses and four-in-hands; ponies in harness, draft horses, hunters and jumpers, gaited saddle horses, saddle ponies.

The judging for the special horse show will take place each day, beginning at 2 p. m. in the forum of the department of live stock, which is a large elliptical area, with ample seating capacity for thousands of people. There is ample opportunity in this forum for displaying all of a horse's performance to best advantage.

Numerous special events of extraordinary interest will take place in conjunction with the horse show. One of these will be an open one-mile trot under saddle, governed by the rules of the Pacific Coast Trotting Horse Breeders' Association, the first prize being $200, the second $100 and the third $50. Prizes of like amount will be awarded to the winners of a mounted police race, of one mile; steeple chase and hurdle race. There will be a polo pony dash of half a mile, for members of a polo club, the ponies participating in which must have been played regularly during one season. In this dash, and in a relay race of two miles from which cowboys are barred, also in a saddle tandem race of six furlongs, the prizes will be $100, $75 and $50. There will be a relay race of two miles for cowboys and one of the same distance for cowgirls, the prizes in each being $200, $100 and $50.

In the Panama-Pacific International jumping contest, over the horse show jumps, the first prize will be $150, second $100, third $75, fourth $50.

The greatest of the special events will be a five-mile marathon four-in-hand race, over the exposition race course, for prizes of $250, $150 and $100.

Particular interest is being evinced in the exhibition of the hunting and jumping classes. Some famous hunters and jumpers have been entered for these contests, the contestants to be ridden over post and rail, 4 feet; brush jump, 4 feet 6 inches; in and out jump, 3 feet 9 inches, 20 feet apart, and a water jump of 8 feet. All riders in these events must be neatly and suitably attired.

Ladies' hunters will be another strong attraction. These must be ridden by ladies, over four successive jumps, which will be 3 feet of timber with 12 inches of brush on top.

Prizes will be given for the best, second best and third best pair of hunters, to be ridden abreast over two jumps 4 feet high, and two jumps over 3 feet 6 inches of timber with 6 inches of brush on top.

The high jump contest will be over unlimited twine tied bars; for the first trial placed at 5 feet 6 inches. They will then be raised 6 inches at a time until the contest is decided. Each horse will be given three trials at each height.

The Grafton long jump, free for all, will be held over pasteboard boxes. The first jump will be about 13 feet, two feet being added for each jump afterwards.

Hunters ridden by members enjoying full privileges of a recognized hunt club, in their club costume, will be eligible in the corinthian class, for which cups will be given as prizes.

There will be trophies for the best hunter exceeding 14.2 hands, for the best amateur performance over four successive timber jumps not less than four feet in height, for the best type of saddle horse shown in hand, any age; for the best polo pony, best park hack, best ladies' saddle horse and other specially desirable types.

The applications for entry blanks for the exposition horse show have been so numerous that the supply of blanks became exhausted early in August and a new supply had to be provided.

CONSIDINE FUTURITY CANDIDATE WORKS WELL AT LEXINGTON.

Lexington, Aug. 13.—A number of fast moves were reported at the track today, the one attracting the most attention being that of the two-year-old colt, Suldine (1) 2:24¾, (2) 2:17¼, that stepped two miles for H. C. Moody in 2:13¾ and 2:12¼ with the last quarter of the second mile in 32¼ seconds. The colt was started in the two-year-old trot at the Blue Grass Fair last Friday and after winning the first heat handily in 2:17¼ made breaks in subsequent heats and landed back in the ruck in each of the remaining three. With a week's rest and a change of shoes Moody brought the colt out this morning, breezed him a handy mile in 2:13¾, which attracted considerable attention, and a few minutes later stepped the mile in 2:12¼, doing it so impressively that it caused no little favorable comment. The mile was timed by J. R. Magowan in 2:12 and Lewis Ellis in 2:11 3-5, but 2:12¼ is what Moody's watch registered. His performance today makes him like a good Futurity candidate, were not the chestnut filly Volga in the list of eligibles. Moody said that he believed Suldine would surely have won the race on Friday, but that he believed him a bit short of work and the track that day was stinging his feet. With Forest B., winner of the race, Suldine is the fastest two-year-old colt of the season to date, while Forest B.'s race is probably the fastest four-heat race on record so early in the season for a two-year-old.—Western Horseman.

Ed Geers, who was one of the judges of the match races at North Randall, set a new record for himself that day without even having a horse in harness—he was serving as a judge for the first time in his life, which is some record when you stop to think about it. Our notion is that Marse Ed's frequent appearance in an official capacity would be in no way detrimental to the sport, but the trouble is to catch him taking a "day off" from racing.

DEATH CLAIMS JOHN CONDON.

From cumulative effects of paralysis John Condon died August ninth at his home in Chicago. He was born at Crestline, Ohio, June 1, 1854, but was taken to Indiana when a child and grow to manhood at Logansport, in that state, from which circumstances it was his custom to call himself a Hoosier. Coming to Chicago late in the seventies or early in the eighties, he soon became a leader in the wide open gambling that then prevailed here, not as a gambler of note personally, but as a backer and a reaper of profits. His first connection with racing was when in partnership with George Hankins, Harry Varnell, "Billy" Weightman and others he took possession of the old West Side Park and calling it Garfield Park carried on the sport there on the lavish scale until that disastrous day arrived on which Captain Jim Brown was slain after he had killed Policeman Powers. That tragedy led to the instant abandonment of racing at Garfield Park, but not to Condon's loss of interest in the sport on its strictest commercial side. In racing as a sport he took no interest, and hardly knew the difference between a thoroughbred and a Percheron. But as owner, part owner, or stockholder he was from time to time subsequently connected with such racing plants as those at Harlem, Worth, Oaklawn, Ideal Park, New Orleans Fair Grounds, Lakeside, Oakland and Fort Erie. At the time of his death he was the reputed sole owner of the Harlem track, a property in which he took great pride. It was a great money-maker for him when racing flourished there and has been kept in good condition since racing ceased there seven years ago. Some of his racing ventures cost him dearly, that at Oaklawn, Hot Springs, Ark., in particular. It was not because of lack of good judgment in making them to start with, but because adverse legislation or other circumstances enforced the cessation of racing and the loss of certain profits.

One of the most spectacular incidents of Mr. Condon's career was his warfare with Ed Corrigan, who battled for a share of the gambling profits from turf operations. His fight for privileges at Washington Park track is reported to have led to the closing of racing in Chicago.

The dead man was combative and masterful, but not uncourteous. He was a leader in most of the enterprises with which he was concerned, many of them being in strictly legitimate lines of business. His name is not one that will soon be forgotten in Chicago. He had been blind for many years.

Condon's recreation was art collecting, and his home contained a remarkable gallery.—Thoroughbred Record.

Thoroughbreds Draw Good Crowds

Whether or not Californians still cherish the old affection for the thoroughbred is no longer a matter of conjecture, as Saturday's crowd was by far the largest that has gathered at the exposition track for any event aside from the auto races, and the continued attendance throughout the week at the G. G. T. B. A. meeting has been of most gratifying proportions. There have been larger crowds on California race courses, there have been richer stakes and faster fields, and there have been individual wagers in the course of one afternoon's play by some of the old-time plungers that would, perhaps, have covered every dollar that changed hands Saturday, but there never was a cleaner day's racing or a crowd whose attendance was actuated more largely by a regard for racing for the racing's sake. There was, of course, a certain amount of wagering between friends in the grandstand, as is the case at a sporting contest of any and every description, and down on the grounds and in the neighborhood of the saddling paddock those so inclined and familiar with the race course and its ways might find a few quiet voiced men idling about who would take any wager of their choosing, but these sharpshooters were operating on their own responsibility and "open betting," in any way resembling the old protected system, was conspicuous by its absence, and the percentage of those present who really "had a bet down" was very small.

While the sun steadfastly refused to shine and the fog hung low over the surrounding hills, there was practically no wind and the afternoon was in no way unpleasant. The flag poles topping the grandstand had been newly furnished with pennants of the association colors, blue and gold, and more ornate streamers floated from the staffs on the roof of the club house in the infield, which was the center of the afternoon's social activities on the part of members and their guests. Autos were admitted on the back stretch, and many machines were parked in the rear of the athletic grounds. The crowd gave evidence of the widespread popularity of the thoroughbred in eloquent fashion, as it was recruited from all classes of society and rich and poor rubbed shoulders and capital and labor forgot their long-standing feud while watching 'em gallop around the turns and through the stretch to the wire.

The opening day was marred by no accident or untoward event of any kind, and the racing was clean and in most cases sharp, the stretch drive between Brynlimah and Rash, both piloted by former king pin jockeys of the days gone by, Bullman and Gross, bringing the spectators to their feet with a cheer. The seven races went off without a hitch and the crowd was well entertained all afternoon. There was music in plenty, and the time between races passed quickly. One of the most pleasing features of a special nature was the parade of the thoroughbreds and Arabians from Mrs. Anita Baldwin's famous establishment in Southern California, the horses groomed to the minute and the attendants attractively garbed in natty livery. Preceded by a standard bearer displaying the Baldwin device, the horses twice passed the stand in the following order: Rey el Santa Anita, Reina de Los Angeles, Norito, Reina de Santa Anita, Adalid, and the Arabians Mahruss, Nedjme, Nedjrez, Shireen and Cibolo.

In very few instances did Starter Stevens keep his fields at the post save for a moment or so, and the starts on the whole were good. Bad actors are present in copious quantities and no starter can handle these with more than a certain degree of satisfaction, but Stevens seems to have that degree well developed. The other officials in direct charge of the meeting are James C. Nealon, secretary; Pres. C. W. Clark, Dr. S. P. Tate and H. T. Griffin, acting stewards; W. B. Jennings, presiding judge; A. Sydney Ashe and J. Cheever Cowdin, associate judges; W. B. Jennings, John M. Crane and C. T. Boots, racing committee; J. A. McGovern and J. C. Quinlan, patrol judges; J. S. Rothert, clerk of scales; Richard Dywer, paddock judge. The daily events appear in condensed form as follows:

First Day—Saturday, August 21.

First race—Five and a half furlongs, selling, purse $300; Daniels & Hodges' bl g Master Franklin (3) by Modred—Zirl, 108 lbs., (Palms) won driving; Azurea, 110, second; Stelcliff, 112, third; Leford, Mark Kennedy, Fort Johnson, Sonoma, Rooster and Sheffield also ran. Time, 1:08.

Second race—Five and a half furlongs, selling, purse $300; W. J. Dunn's br m Thistle Belle (aged) by Knight of Thistle—Belturbet, 106 lbs., (Palms) won easily; Old Bob, 108, second; Marta Mac, 106, third; Aunt Elsie, Zenotek, Quick, Ann Tilly and John Hurie also ran. Time, 1:07½.

Third race—Five furlongs, two-year-olds, purse $300; George Van Gordien's ch f Rose Marian (2) by General Roberts—Rose Cherry, 120 lbs., (Kirschbaum) won in a gallop; Friskey, 115, second; Toastmaster, 111, third; Mary Jay also ran. Time, 1:02.

Fourth race—Exposition handicap, one mile, $1,000 added; John Lowe's ch g Brynlimah (5) by Bryn Mawr—Notlimah, 102 lbs., (Bullman) won driving; Rash, 107, second; John Graham, 107, third; Be and Lovins also ran. Time, 1:40.

Fifth race—One mile and a sixteenth, selling, purse $300; J. R. East's b g Chas. W. Hodges (aged) by Woolthorpe—Lily M., 117 lbs., (Burns) won driving; Brando, 110, second; Rey, 111, third; Lady M. M., Fairly and Electrowan also ran. Time, 1:48.

Sixth race—One mile, selling, purse $300; Portland Stable's br g Eastman (aged) by John F.—Peggy, 112 lbs., (Gross) won easily; Nebraska Lass, 110, second; Ceos, 112, third; Sorrowful, Wise Mason and Renwar also ran. Time, 1:42½.

Seventh race—Six furlongs, selling, purse $300; R. Macias' ch m Theodorita (4) by Dick Welles—Anna Brooks,

103 lbs., (Gentry) won easily; Butter Ball, 115, second; Far Cathay, 113, third; Hardy, Zangaree, El Pato, Madelle, Zamloch, Rey Shannon II. and Pro Realis also ran. Time, 1:14⅕.

Second Day—Monday, August 23.

First race—Five furlongs, selling, purse $250: J. Randolph's br h Uncle Jimmy Gray (aged) by Bonnie Joe—Mary Hill, 101 lbs., (Gentry) won in a gallop; Ida (3), 101, second; Vesta (3), 96, third; Laura James, Sir Barry, Vireo and Smoky Dan also ran. Time, 1:01⅘.

Second race—Five furlongs, selling, purse $250: F. Rinehart's b g The Feller (6) by The Major—Rubiana, 110 lbs., (Imes) won handily; Frances G. (4), 107, second; Diadi (4), 108, third; Category, Ida Cummings, Tordillo, Marie O'Brien, Fred T., Otto Kahn and Whistling Jennie also ran. Time, 1:02.

Third race—Seven furlongs, selling, purse $300: J. Duncan & Sons' ch m Lady M. M. (aged) by Rey el Santa Anita—Bella Donna, 116 lbs., (Roberts) won easily; Gano (3), 112, second; Ora McGee (6), 116, third; Ceos and Cantem also ran. Time, 1:29.

Fourth race—One mile, selling, purse $300: J. R. East's b g Chas. W. Hodges (aged) by Woolthorpe—Lilly M., 108 lbs., (Burns) won easily; El Pato (6), 98, second; Brando (6), 107, third; Rey and Rey Shannon II. also ran. Time, 1:40⅗.

Fifth race—Six furlongs, selling, purse $250: L. B. Wood's br g Sweetbait (4) by Fisher Boy—Cupboard Love, 118 lbs., (Murphy) won driving; Henry Wallbank (aged), 113, second; Choctaw (6), 118, third; McAlan, Transparent, Custom House, Southern Gold, Orba Smile and Old Coin also ran. Time, 1:14⅘.

Sixth race—Five and a half furlongs, selling, purse $300: W. J. Duncan's br m Thistle Belle (aged) by Knight of Thistle—Relturbet, 108 lbs., (Palms) won driving; Faustina (5), 109, second; Baby Lynch (3), 96, third; Charity Ward, Camia, Finnigan, Commendation and Delmas also ran. Time, 1:08.

Third Day—August 24.

First race—Six furlongs, selling, purse $250: J. B. Clark's br m Sorrowful (aged) by Bannockburn—Trauer, 100 lbs., (Gentry) won driving; Tordillo (3), 102, second; Rhodes (4), 104, third; Renwar, Lovey Johnny and Zinkand also ran. Time, 1:15⅗.

Second race—Five and a half furlongs, selling, purse $250: Howard & McDonough's b g Eureka (aged) by Trappean—Lady Newin, 108 lbs., (Burns) won easily; Aunt Elsie (4), 101, second; Old Bob (3), 104, third; Tom Chapman, Teeto, Miss Genevieve, Tallow Dip and Viva also ran. Time, 1:06¾.

Third race—Five furlongs, selling, two-year-olds, purse $250: T. B. Munford's br g Brookes (2) by Leonid—Insolence, 107 lbs., (Palms) won driving; Toastmaster (2), 107, second; Laughing Water (2), 97, third; Lola and Ojita also ran. Time, 1:03¼.

Fourth race—Seven furlongs, selling, purse $300: J. McCarthy's br h Metropolitan (aged) by Filigrane—Annie Thompson, 118 lbs., (Gross) won easily; Canapa (aged), 113, second; Darkey (5), 115, third. Sweetbait, Pro Realis, Hardy and Sheepland also ran. Time, 1:28.

Fifth race—Five and a half furlongs, selling, purse $300: R. G. Brown's br m Miss Folly (4) by Bonnie Joe—La Dotta, 109 lbs., (Hawkins) won driving; Master Franklin (3), 107, second; Quick (5), 106, third; Mary Emily, Miss Clark, John Hurie, Ed Luce, Briton and Breezer also ran. Time, 1:08.

Sixth race—Six furlongs, purse $300: F. T. Shortell's ch g Kootenay (aged) by Ben Strome—My Beauty, 132 lbs., (O'Mahoney) won easing up; Bc (6), 113, second; Louise Paul (5), 111, third; Stolen Ante and Lovins also ran. Time, 1:15.

Fourth Day—Wednesday, August 25.

First race—Six furlongs, selling, purse $250: M. Doyle's br g Valadolid (5) by Mizzen—Valencia, 110 lbs., (Clampitt) won handily; Lillian Ray (aged), 113, second; Miss Tempo (4), 108, third; Fort Johnson, Fred T., Sheffield, Bunny, Tallow Dip, Rooster, Igloo and Lone Star also ran. Time, 1:15⅕.

Second race—One mile, selling, purse $250: H. Butler's ch m Christmas Eve (4) by Dick Welles—Bessie Spahr, 101 lbs., (Gentry) won driving; Eastman (aged), 108, second; Henry Walbank (aged), 109, third; Prince Conrad, Electrowan, Sir Barry and Fairly also ran. Time, 1:14¾.

Third race—Five furlongs, selling, purse $250: T. Mills' b g Bally Beers (aged) by Liberty—Unknown, 108 lbs., (Burns) won driving; Apache Kid (5), 108, second; Carondelet (aged), 110, third; Roseas, Jennie Crawford, Kate Stanfield, Vireo and Sweetdale also ran. Time, 1:01¾.

Fourth race—Five and a half furlongs, handicap, purse $300: Tigue & Bussey's bl g Seneca (aged) by Disguise—Swiftfoot, 112 lbs., (Warren) won driving; Kootenay (aged), 107, second; Loftus (4), 118, third; Orange Blossom also ran. Time, 1:06¾.

Fifth race—One mile, selling, purse $300: John Lowe's ch g Brynlimah (5) by Bryn Mawr—Notlimah, 103 lbs., (Gentry) won driving; Rash (aged), 108, (Gross) second; John Graham (aged), 108, third; Zoroaster also ran. Time, 1:40.

Sixth race—Six furlongs, selling, purse $250: El Paso Stable's b g Butter Ball (aged) by Sempronius—Miss Jordan, 115 lbs., (Burns) won driving; Marta Mac (4), 113, second; Loan Shark (5), 110, third; Delaney, Azurea, Marie O'Brien, Far Cathay and Stelcliff also ran. Time, 1:14.

Fifth Day—Thursday, August 26.

First race—Five furlongs, selling, purse $250: W. W. Ashe's br m Quantity (6) by Galore—Battledore, 111 lbs., (Nolan) won driving; Renwar (4), 113, second; Mi Alma (3), 106, third; Bob Love, B. C. Winston, Otto Kahn, Miss Sedalia, Wernras, Doc Stanley and Wynema also ran. Time, 1:03.

Second race—Five furlongs, selling, purse $250: J. Randolph's br g Leford (4) by Bonnie Joe—Lady Lee, 108 lbs., (Gentry) won easily; Mintanka (5), 113, second; Russell McGill (6), 113, third; Milton Barber, Effie May, Moller and Smoky Dan also ran. Time, 1:02.

Third race—Six furlongs, selling, purse $250: Foster & Singleton's b m Frances G. (4) by Rapid Water—Constanza, 113 lbs., (Frach) won driving; Madelle (5), 113, second; Ida (3), 104, third; Mark Kennedy, Far Cathay, Sorrowful, Augustus Heinze and Auto Maid also ran. Time, 1:14⅘.

Fourth race—One mile, selling, purse $300: M. V. Parker's ch g Rey (aged) by Tim Payne—La Hindoo, 111 lbs., (Mahoney) won easily; Brando (6), 108, second; Gano (3), 105, third; Ora McGee, Commendation, Zamlock, Pro Realis and Fairly also ran. Time, 1:40⅗.

Fifth race—Six furlongs, selling, purse $250: G. Billerman's b g Diadi (4) by Bowling Green—Lady Dotte, 115 lbs., (Ormes) won driving; Fred T. (3), 106, second; Southern Gold (aged), 115, third; Vesta, Criterion, Viva and Queen Bergy also ran. Time, 1:15⅕.

Sixth race—Six furlongs, selling, purse $300: R. Macias' ch m Theodorita (4) by Dick Welles—Anna Brooks, 112 lbs., (Bullman) won easily; Louise Paul (5), 112, second; El Pato (6), 109, third; Darkey, Nannie McDee and Lady M. M. also ran. Time, 1:14⅘.

—o—

Volga, the Pastime Stable's candidate for the junior trotting divisions of the futurities, worked the North Randall track last week in 2:10⅗, with a half in 1:00⅖. If she stays sound she ought, by all appearances, put crimp in that 2:07¾ mark of Native Belle's.

DICK W. WINS STADIUM FEATURE.

Sunday wasn't the finest day in the world for racing "overhead," nor was the going especially fast "underfoot," but a good crowd gathered early in the afternoon at the Stadium in Golden Gate Park and enjoyed five nice contests in which the time was most creditable. Only one race developed split heats, the 2:18 pace, and that was largely on account of a break in the first mile on the part of Emma M., Billy Malough not getting her squared away in time to catch her field again, King Pointer winning from pretty well back. Emma regained the "edge" on the back stretch in the second heat and annexed both it and the third in handy fashion.

Miss San Francisco, who was formerly known to the matinee goers as Soreta, made her first appearance of the season and won from St. Patrick in two close finishes, having to make up considerable distance in the second on account of a break. Ella M. R. also made her debut as a fun trotter, but appeared a bit short of work as yet.

Dick W., Bondalean, Bradmont, Mabel Dillon and Pointer Belle were the entries for the free-for-all pace and finished both heats in the order named, the Sacramento three-year-old forcing Dick W. to step in 2:09¾ and 2:10½, two excellent miles. Bondalean is a high class youngster and continues to look good for this fall's futurities.

Happy Dentist speared the 2:15 pace in rather comfortable style, as did G. J. P. the mixed event. Jack was game and consistent but didn't have old Happy's brush, while Senator H. was unsteady. The summary:

First race—2:18 pace:
Emma M. .....(William Malough) 5 1 1
King Pointer .....(H. Campodonico) 1 4 5
Palatea .....(J. Kramer) 2 2 3
Tom Murphy .....(E. T. Ayres) 4 5 2
Victor Pointer .....(D. Keating) 3 3 4
Time—2:15, 2:16, 2:17.

Second race—Free-for-all trot:
Miss San Francisco.....(Al Schwartz) 1 1
St. Patrick .....(J. J. Ryan) 2 2
Ella M. R.....(G. P. Machado) 3 3
Time—2:16, 2:16.

Third race—Free-for-all pace:
Dick W. .....(A. Ottinger) 1 1
Bondalean .....(Chas. Silva) 2 2
Bradmont .....(G. J. Giannini) 3 2
Mabel Dillon .....(B. Cohen) 4 4
Pointer Belle .....(J. Kidd) 5 5
Time—2:09¾, 2:10½.

Fourth race—2:15 pace:
Happy Dentist .....(J. J. Ryan) 1 1
Jack .....(McDonnell & Conlan) 2 3
Hamburg Belle .....(J. Ginocchio) 3 2
Senator H. .....(J. Kidd) 4 4
Time—2:14, 2:14½.

Fifth race—2:25 mixed:
G. J. P.....(R. Consani) 1 1
Cookey .....(J. Vermet) 2 2
Ateka .....(B. Cohen) 3 3
Time—2:20, 2:20½.

—o—

Empire City Park has been given an official OK as to health and sanitary conditions, and the Grand Circuit meeting will be held there next week as originally scheduled—weather permitting!

◈ ◈ ◈

Murray Anderson, who is racing the eastern string of the International 1:55 Horse Farm, uncovered a nice trotter recently at Janesville, Wis., in the four-year-old filly Gay Patch by Dan Patch. Starting in twelfth position in a field of fifteen she was seventh the first heat, second in the second, and won the next three, the third heat in 2:16¼ being the fastest of the race. She must have some real stuff in her, as the bunch hung up what must have been nearly a world's record in scoring, and the "critics" report that the longer the race lasted, the easier she won.

Rain Mars Racing on the Big Line

Second Day at Montreal.

Montreal, August 20—While there was some fast time and some sharp racing in the class races on today's program, the big event, the King George stake for 2:08 trotters, was a disappointment, the time being slow and Peter Scott having things very much his own way. Only four starters appeared for what should have been the feature event of the week, and none of them could make Scott extend himself.

The real surprise of the day was the performance of the Montana bred pacer Yedno, now owned by F. J. Daly of Petersboro, Ontario, the daughter of Bob Fitzsimmons reeling off her winning heats in 2:07¾, 2:05½ and 2:02½, Billy Dale being her nearest competitor in the fast mile.

The 2:10 trot was one of the best contests seen on the big line this season, the contending horses being right after the money from the jump, and all three on the trot. Lizzie Brown, who headed the summary in a "five heater" at Kalamazoo, was returned winner after both Mirthful and Reusens had taken a heat apiece, the daughter of The Bondsman being first or second at the wire each time out, in time from 2:07¾ to 2:08¾. Charley Valentine was the busiest man on the track, as in addition to winning with Lizzie he was second to Murphy in the trot with Victor Star and third in the pace with Altawood. The summary:

Montreal, August 20—The King George, 2:08 trot, purse $5,000:
Peter Scott, br h by Peter the Great....(Murphy) 1 1 1
Victor Star, b g by Star Simmons.....(Valentine) 2 3 2
Duchess, ro m by Allerteen.....(McDonald) 3 4 3
Wilgo (Marvin) also started.
Time—2:10½, 2:11, 2:09½.

2:08 pace, purse $1,000:
Yedno, br m by Bob Fitzsimmons.....(Fogarty) 1 1 1
Billy Dale, b g by Dale Patchen.....(Cox) 5 3 2
Altawood, gr m by Altonwood.....(Valentine) 6 2 3
Margot Hal (McDonald), Ben Locanda (Murphy), Fern Hal (McPherson), Budd Elliott (Geers) also started.
Time—2:07¾, 2:05½, 2:02½.

2:10 trot, purse $1,000:
Lizzie Brown, b m by The Bondsman....
.....(Valentine) 2 1 2 1 1
Mirthful, b m by The Star of Patchen ....
.....(Murphy) 1 3 3 2 2
Reusens, ch g by Prince of India..(Rodney) 3 2 1 3 3
Bonington (Geers) and Grand Marshall (Snow) also started.
Time—2:07¾, 2:08¾, 2:08½, 2:08½, 2:08½.

Third Day at Montreal.

Montreal, Aug. 21.—Tommy Murphy put over two winners here today, taking both his starts in straight heats without being seriously endangered at any time. Hal S. took the 2:15 pacers into camp very handily, the best contender being the Hal B. gelding Hal Chief that has been racing out on the Canadian prairies on the two-lap tracks. Mr. Geers was third with Prestolite, and Miss Harris M., the three-year-old Peter the Great filly that Lon McDonald is hardening up for the pacing futurities, caught the flag in the second heat. Frank Bogash Jr., making his initial bow for the season in the free-for-all pace, landed in a soft spot and never was truly extended, though Earl Jr. made him go the final heat in 2:03.

R. H. Brett, having gotten away from some of the bearcats that trimmed him earlier in the season, paced three nice heats in the first race. The only split heat event of the day was the trot for Canadian horses. Aulsbrook taking the money after May Case had won two heats from Robert Allerton. The weather outlook tonight is not auspicious, and Monday's card may be carried over a day. The results:

Montreal, Aug. 21—2:05 pace, purse $1,000:
R. H. Brett, b g by Waponee.....(Grady) 1 1 1
Grand Opera, b g by Claus Forrester....(Neville) 2 2 3
The Assessor, ch g by Walter Direct..(McMahon) 4 3 2
Del Rey, b h by Nutwood Wilkes.....(Cox) 3 ds
Time—2:04¾, 2:05¾, 2:05¼.

2:15 pace, purse $1,000:
Hal S., ro h by Hal Chaffin.....(Murphy) 1 1 1
Hal Chief, b g by Hal B.....(Matheson) 2 2 2
Prestolite, br m by Don Varick.....(Geers) 3 3 3
Miss Harris M. (3), b f by Peter the Great....
.....(McDonald) 4 ds
Time—2:09½, 2:06¾, 2:08½.

Free-for-all pace, purse $1,000:
Frank Bogash Jr., b g by Frank Bogash (Murphy) 1 1 1
Earl Jr., gr h by The Earl.....(Cox) 2 2 2
King Couchman, br g by Atlantic King(Valentine) 4 3 3
Hal Connor, br h by Argot Hal.....(Geers) 3 4 4
Time—2:04½, 2:07¼, 2:03.

Special trot, Canadian horses only, purse $1,500:
Aulsbrook, bl h by Bingara.....(Bastien) 5 4 1 1 1
May Case, b m by Judge Case....(Larente) 1 1 6 7 3
Robert Allerton, b g by Nixon...(Robillard) 2 2 3 8 4
Keynote (Gignas), Drestillion (Simard), Ismalian (St. Vincent), Harold K. (Vandalae), McCash (——) also started.
Time—2:16½, 2:14¾, 2:16, 2:16¼, 2:16.

Fourth Day at Montreal.

Montreal, Aug. 24.—The rain promised the latter part of last week materialized in due time and ample quantity, causing Monday's card to be carried over until today, the events being contested over a heavy track, some seconds slow. Patrick M. took the first heat of the 2:12 pace, but had to give way for the balance of the race to the Canadian-owned pacer Yedno, who set the local track record at 2:02½ last week. Russell Boy was "in form" for Ed Geers and annexed the big end of the 2:10 pace in straight heats, the surprise of that event being the failure of Hal Boy to be in the money, this being the first start of the season in which the little fellow failed to be a hot contender. Like Directum I., he favors a rather hard, fast track.

Sadie S. started in to win the 2:15 trot for Tommy Murphy, but failed to deliver but one heat, the other three going to Senator McMillan's new purchase, Loe Blossom, the event being her first win of the year on the big line. Only one heat of the special pace was contested, William winning in the slow time of 2:04. The summary:

Montreal, Aug. 24.—2:12 pace, purse $100:
Yedno, br m by Bob Fitzsimmons....(Fogarty) 4 1 1 1
Patrick M., bl g by Norbells.....(Stokes) 1 4 2 2
Fern Hal, br m by Gold Hal.....(McPherson) 2 2 3 3
Camelia and Dustless McKinney also started.
Time—2:10¼, 2:11½, 2:12¾, 2:12¾.

The Greater Montreal, 2:10 pace, $3000:
Russell Boy, b h by Rustic Patenter.....(Geers) 1 1 1
Judge Ormonde, bl h by Ormonde....(Valentine) 5 2 2
Peter Farren, b h by Peter the Great...(Murphy) 3 4 4
Lustrous McKiney, Aconite, Hal Boy also started.
Time—2:09, 2:08, 2:07¼.

2:15 trot, purse $1000:
Loe Blossom, ch m by Lepide.....(Wall) 2 1 1 1
Sadie S., b m by Archdale.....(Murphy) 1 3 2 2
Jeannette Speed, b m by Peter the Great (Cox) 3 2 3 3
Idora Worthy and Tommy Todd also started.
Time—2:14, 2:13, 2:12¾, 2:10¾.

Special pace, purse $5,000 (unfinished):
William, b h by Abe J.....(Marvin) 1
Directum I., ch h by Directum Kelly.....(Murphy) 2

Second Postponement at Montreal.

Montreal, Aug. 25.—The footing at Dorval Park today was so heavy owing to recent showers that the entire program, including the unfinished match race between William and Directum I., was carried over. Conditions permitting, racing will be resumed tomorrow.

NOTES and NEWS

Nancy Hanks 2:04 has passed to the great beyond.

◈◈◈

The Ventura County Fair is in full sway this week.

◈◈◈

Hal Boy was out of the real competition at Montreal in his second start for the first time this season.

◈◈◈

Vancouver had a successful meeting in spite of the many discouraging obstacles that had to be overcome.

◈◈◈

George Gano 2:02, holder of the saddle championship pacing, 2:11¾, may be seen at the exposition fall meeting in some trials against the watch.

◈◈◈

Montreal also came in for a visitation from the rain maker, operations there this week having been sadly interfered with.

◈◈◈

Frank Bogash, Jr., won his first start on the Grand Circuit Saturday at Montreal but was not forced to display any "championship form."

◈◈◈

Will DeRyder was second with Dicto last Friday at Galesburg in the 2:16 pace, Al Russell winning the event with Lee Dale, the fastest time being 2:09¼.

◈◈◈

Six new performers were put in the list at the record meeting of the Sonoma County Driving Club last Saturday at Santa Rosa.

◈◈◈

Don Pronto's service fee in his Australian home is ten guineas, or fifty dollars, which is a most moderate charge for the service of a horse of his quality.

◈◈◈

Napoleon Direct 2:02½, injured while loading at North Randall, is improving in a manner that causes Ed Geers to have hopes of starting him again in the near future.

◈◈◈

Lizzie Brown and Charley Valentine annexed another first at Montreal in a race that was a regular wolf. The daughter of The Bondsman is being more respectfully regarded as the season lengthens.

◈◈◈

Not satisfied to "call it a day" after defeating Tommy Murphy in the four-year-old trotter match at North Randall, Billy Andrews wound up about "chore time" by driving the brown colt Vincent Todd by Jim Todd to a three-year-old record of 2:08¾ trotting. Some folks never seem to know when to stop.

◈◈◈

And Loe Blossom has at last "won a main" on the Grand Circuit, Montreal being the scene of her triumph. The time was not fast but neither was the track, so give her as much credit as possible. With Loe Blossom sold and Bon Guy and O. U. C. temporarily on the shelf, Frank Childs must be just about "afoot."

◈◈◈

The King George five thousand dollar stake for 2:08 trotters at Montreal had only four starters, Peter Scott winning with ease in very moderate time, around 2:10. The footing couldn't have been so very bum, either, as 2:08 pacers went the third heat in 2:02½, and the 2:10 trotters went five heats from 2:07¾ to 2:08¾.

◈◈◈

A recent visitor at the Los Angeles track brings word that Railey Macey is making nice progress with the members of the International 1:55 Stable and that they are turning out some excellent time. Macey is well pleased with Los Angeles as a summer training ground and expects Owner M. W. Savage out from Minneapolis the latter part of September, to remain until after the P.-P. I. E. meeting.

◈◈◈

While Hunter Moody has been making speed with Suldine at Lexington for John W. Considine, Harry Dowling hasn't been letting any grass sprout under the sulky when he works Sadie Ansel at the home track. Mr. Considine was a recent visitor at the farm at Woodland and had the pleasure of seeing the two-year-old daughter of Prince Ansel and Lauress trot a half in 1:06½, with the final quarter in :30½.

◈◈◈

George N. Patterson, Homer Rutherford's good young trotter, tangled up with Allie Watts in the three-year-old trot at Dubuque Thursday and came out victor over Fred Edman and his General Watts filly after a warm split race, the filly trotting the fastest heat in 2:13¼. Geo. N. Patterson worked the Pleasanton track in 2:09¾ for Homer before going east and if he meets with no misfortune should be a big factor in the futurities at the exposition meeting in November.

◈◈◈

"Them DeRyder boys" prized up a little more "cain" at Dubuque Thursday when Spriggan and Miss Perfection came together again. Brother Charley and his four-year-old favorite had the best of their first meeting, but Brother William and Spriggan were there with the goods this time and copped the kale, trotting one heat in 2:08¼. It must be an awful temptation for Charley to put a reverse english speed ball in Bill's coffee along about lunch time.

Peter McCormick 2:05½, the big trotter in the Shuler stable, struck one of his hind legs in the third heat of the 2:08 trot at Grand Rapids and was drawn after finishing third to Peter Scott and Worthy Prince in 2:05¼, shortly thereafter being shipped home to Indianapolis where he will be given some careful handling in hope of being ready for some racing later in the fall. Since going east Mr. Shuler has sold John Gwynne to Dr. S. E. Dodson of Grand Rapids, and Fleeta Dillon to John H. Dillon of New Haven, Conn. Laurence Shuler will continue to handle the "bird headed" daughter of Sidney Dillon for the time being, as he gets more pace out of her in company than anyone else has been able to secure.

◈◈◈

The S. S. Bailey stable, from California, was shipped from Grand Rapids to Indianapolis, and will probably be sent home to the coast in a short time, as O. U. C. 2:08½, the pacing gelding that was expected to figure prominently in the year's pacing stakes, is quite lame, and may not get into form again this season. Bon Guy 2:11¼ also failed to get in form. The loss of Mr. Bailey is regretted by all of the circuiters that had met him, as he was a good horseman, one of the best ground trainers in the country, and a man whose character and business integrity was a good asset to the turf. Frank Childs, who raced the Bailey stable in 1913, and again this year, was given charge of Our Colonel p. 2:03¾ by owner J. B. Jones, and shipped him to Galesburg, Ill., for racing in the Great Western circuit.—Horse Review.

◈◈◈

William G. Durfee, who went into "temporary retirement" after his stable annexed some seventeen thousand simoleons at the spring meeting at the exposition, will make his next bow to the public at Salem and then ship here for the second battle of the beach. While he is not working his horses where they can go by some seconds they are all doing nicely and are pretty well keyed up for a race. Esperanza, who took a pronounced dislike to the going here, has steadied greatly since getting off the hard-pan and trotted a half recently in 1:02½, while Virginia Barnette, her stable mate of like age, went the route in 2:13, last eighth in :14. White Sox, winner of the big pace, has had a trip in 2:07 and Contention B. a mile in 2:09¾, with the last quarter at a two-minute clip. Workouts by other members of the stable are Byron (3), a half in 1:04¼; Helen Belle (3), a half in 1:05¾; Nicola B. (3), a mile in 2:16 with final quarter in :31¼; Old Folks, a mile in 2:15; Hermes (2) a mile in 2:19 trotting; Tom Thumb (2), by Copa de Oro 2:01 and out of Leonor Mc., mat. 2:08, a mile in 2:24½ pacing, and San Jacinto a mile in 2:03½. Clara Mac is working nicely and has put on a hundred pounds of flesh since going to Los Angeles, while the Carlokin filly Ethel D. has recently trotted to cart in 2:12½ and promises to go into the 2:10 list this fall.

◈◈◈

The old-time breeders of trotters would gasp with surprise could they know the early age at which some of the modern sires become represented by 2:10 trotters. In the days of such noted old-time breeders as Gov. Stanford, C. J. Hamlin, A. J. Alexander, J. C. McFerran, William Corbitt, Chas. Backman, Alden Goldsmith, Geo. B. F. Tracy and others identified with the breeding interests a score or more years ago, it was considered a great happening if a sire secured one 2:10 trotter before old age incapacitated him for service. Later on if a sire got his first 2:10 trotter by the time he was fifteen years old he was regarded as exceptionally successful in the stud. A few days ago, when the three-year-old colt, Colorado Range, raced to a trotting record of 2:09½, he made his sire, Colorado E. 2:04¾, a 2:10 sire at eight years of age. This former three-year-old champion is the eighth stallion to become a 2:10 sire at eight years or younger. The first sires to become 2:10 sires at such an early age were Todd 2:14¾ by Bingen, and Alto Leyburn 2:24½ by Expedition. In 1907, when these stallions were eight years old, each got a 2:10 trotter, Kentucky Todd 2:08¾ being Todd's representative, while Jack Leyburn 2:08½ (later 2:04½) represented Alto Leyburn. The following year Bingara, by Bingen, then seven years old, secured his first 2:10 trotter in Binvolo 2:09½ (later 2:07¾). In 1912 Gen. Watts, then eight, got his first one in Mahomet Watts 2:10. In 1913 Peter O'Donna 2:08, then eight, by Peter the Great, got Don Chenault 2:05¾, and Grey Petrus, only six years old, got Peter Johnson 2:08¾. In 1914 Native King 2:11¾, eight years old, got Native Spirit 2:09¾, and this year Colorado E. has already been added to the list by Colorado Range's performance.—Horseshoers' Journal.

GERMANS MAY RESUME RACING.

Berlin, August 26, via London, August 27.—Trotting and steeplechase races at which the pari-mutuel betting system will be permitted probably will be resumed in the near future, as the Government sanction, which the racing interests have been endeavoring to obtain for some time, is expected this week.

If the government grants permission, a trotting meeting, the first since the war began, will be held at Mariendorf, near Berlin, followed by steeplechasing at Karlshorst.

Drink Jackson's Napa Soda.

SANTA ROSA RECORD MEETING.

Santa Rosa, Aug. 21.—Six new performers entered the ranks of standard performers as a result of the record meeting of the Sonoma County Driving Club held here today, the fastest performance of the day being the mile paced in 2:11 by Dr. William S. Jennings, the second of the produce of the great brood mare Caritone by Antone to pace close to the 2:10 circle. The best among the new trotters is The Lizard, a beautifully gaited son of Lynwood W. owned by John Compton, his mile in 2:20½ being easy for him.

Next Sunday the club will stage a full afternoon's program of matinee races, in which the best horses of the county come together. Today's details are as follows:

Santa Rosa, August 21.

To beat 2:25¼ pacing:

Dr. William Jennings, ch g by Frank S. Turner, dam Caritone by Antone.....(F. S. Turner) 2:11
Potreress, ch m by Potrero Boy, dam by Alton.. .....(M. Reams) 2:22

To beat 2:30¼ trotting:

Lady Steinmore, gr m by Bonnie Steinway, dam by Grand Moor .....(F. S. Turner) 2:24½
Guy's Anteeo, br m by Guy Dillon, dam by Anteeo.....(H. Whitney) 2:30
The Lizard, ch g by Lynwood W., dam by Gossiper .....(John Compton) 2:20½
Jessie Dillon, ch m by Guy Dillon, dam Nellie by Gossiper .....(F. D. McGregor) 2:26¾

Judges—Dr. J. J. Summerfield, L. L. Cannon and Len Brittain.
Timers—Henry Carlton, S. H. Morris and Joe Ryan.
Starter—Dick Ables.
Clerk of the Course—Jack Forsyth.
Representative of A. T. A.—Geo. B. Kelley.

TURF SLEUTHS EXPOSE A RINGER.

Lady St. Clair 2:13½, the winner of class races at Conneaut Lake, Pa., and Youngstown, O., and of a $1,000 early closing event at Belle Vernon, Pa., was protested at the latter point the past week by Secretary Gocher. Clarence Cole of Indianapolis, Ind., was on hand to examine the mare in the interest of the trotting association and he pronounced her as being the Ohio bred mare, Edna L., which was sold at Indianapolis the past winter under peculiar circumstances. Cole claims that Delay, the driver of the mare, spent some time at the Hoosier State capital this winter also, which fact tends to add materially to the affair. Delay, who hails from Waterbury, Conn., made an affidavit to the effect that she was as represented, and stated that he was in position to produce the party in Hartford, Conn., who bred the mare and also owned both her sire and dam, and he further claimed that Lady St. Clair was but a five-year-old, but an examination by Joe McGraw, John Pender and Robert Anderson caused them to pronounce her a coming seven-year-old.

The mare was under suspicion at Bradford and Youngstown both and it occasioned no great surprise to quite a few horsemen when Mr. Gocher took a hand in the matter.—American Sportsman.

A CANDIDATE FOR WILLIAM'S CROWN.

A possible new world's record maker was introduced last week at Grand Rapids when Guy Rea, the young Pittsburgh amateur trainer, won the division of the Matron stake for three-year-old pacers with General Todd, the colt pacing two heats each in 2:06—but a second away from the championship mark for his gait and sex.

The General is strictly a Rea product, as he was bred by Henry B. Rea, the father of Guy, and owner of Reamore Farm. Early last year persistent effort was made to make the General trot, but it required more ballast than was deemed wise for him to carry, especially as he was inclined to pace and had numerous engagements which might be turned to more profit if he proved himself a wiggler of class. So he was geared for pacing in July, George Starr having him in charge while the Rea stable was away racing. The lateral gait seemed to suit him perfectly, as Starr worked him in 2:16, half in 1:02¼ and quarter in :29¾. Following this his work this season was very good all during his spring preparation. He had shown in 2:08¼ before his Grand Rapids race, but the Indianapolis filly, Miss Harris M., in Lon McDonald's stable, was considered his superior before they met, being first choice in the betting over him, and heavily backed. But General Todd had more speed than the filly, and in each of the heats in 2:06 was fairly easy at the finish. There were no spectacular flashes of speed, but from the ease with which he paced both heats it should be a comparatively easy task for him to lower William's record of 2:05.

The General is a rather tall colt, but well bodied and a regular space eater, as to gait, and well enough bred to be a champion, his dams being by Oratorio 2:13, Nutwood 2:18¾ and Dictator. At present he looks like the real scare crow in the pacing futurities, and he is billed to participate in most of them yet to be decided this year.

It's a pretty close corporation that participates in the General's success, as he is Rea-bred, Rea-developed and Rea-raced; and at Grand Rapids both the senior and the junior Rea indulged in a good natured race as to who would first see the paymaster. Youth won, as Guy collected both first and fourth moneys, his winnings, in the shape of a check, made to his own order. But I don't imagine that his father was particularly put out thereby.—Walter Moore, Horse Review.

MISSOURI TOWN GREAT CONCENTRATION CAMP FOR WAR HORSES.

Lathrop, Mo., August 20—When fifty or sixty horses die here a day nobody pays any particular attention to it. It's only the normal death rate. For in Lathrop at present there are more horses than were ever assembled before in the world's history.

To Lathrop come all the horses and mules purchased for the British army. Because of a lack of transports to take them across the Atlantic they have been accumulating, until now all Clinton county is virtually one vast feed lot.

When "shipping" or "barn" fever broke out among the horses recently there were many rumors of an epidemic. Even the State health inspectors came to Lathrop when they heard that hundreds of animals were dying. The army veterinarians received them calmly, admitted the hundreds of deaths and then proceeded to hand out some statistics.

The statistics made the "epidemic" stories shrink wonderfully. The deaths, the veterinarians showed, figured out just about one-half of 1 per cent a week. And they defied the inspectors to find a farmer who could show as good a record. The inspectors agreed and left. The British continue to lose some $10,000 worth of horses a day.

Disease is not the only agent that keeps the horses from being killed by German bullets. Their habit of "milling" has caused many deaths. On being changed from one pasture to another the entire herd of horses will immediately set out on a dead run and make the circuit of the whole field. Sometimes they run for hours until many fall dead from exhaustion. If the bunch is large it may not be able to make the turns at the corners. In that case a quarter mile of fence disappears in a twinkling and the veterinarians are sewing up wire cuts for days.

The disaster of the sunken road at Waterloo was duplicated here a few days ago. Eleven hundred horses were being driven along a road a short distance east of town when they came to a ravine partly filled with water from the heavy rains. The horses stampeded and the front ranks were swept into the muddy pool. The frantic animals were literally trampled into a solid mass of bodies that filled the ravine from bank to bank. Over the struggling mass what was left of the herd galloped.

Many of the horses were dead by the time the stampede had passed. Others were terribly wounded by the battering hoofs. Some were saved by holding their heads above water until they could be extricated from the tangle of bodies, but when they had been taken out there still remained a gruesome task for the skinning gang.

There are four skinning gangs now and sometimes even that large force get so far behind that horses are dumped in the long burial ditches without their hides being saved. For a time one man, Charles Tillman, was given the hides for burying the dead horses. As they brought from $4 to $5 each on the market, he was reputed to be getting about $1,400 a week for the work. A later arrangement is understood to have brought his income down somewhat from the figures attained only by vaudeville headliners, and that, perhaps, in stage money.

All Lathrop has shared, to some degree, the prosperity of the horse skinners. For eleven months a shing stream of British gold has poured through the town and few are those who have not been able to dip their hands in the current. Buildings have gone up with the rapidity of a boom mining camp. Huge hay barns, two blocks long and a hundred feet wide, feed barns, a grain elevator, offices and acres of shipping pens have all come as the result of the horse business.

Since the disastrous stampede at East Alton, Ill., the British have closed their depot there and all the horses, even those from St. Louis and the East, come to Lathrop.

In the Boer war in 1901 England handled 132,000 animals through the depot here and that number has possibly already been equaled. The average price is $175 for horses and $200 for mules.

Unless transports begin arriving from Europe soon there is no telling how many horses Lathrop will be called on to accommodate. They have been arriving by the trainload practically every day until the number now is estimated at from 27,000 to 30,000 head. If the influx continues it may be necessary to build a second story to the county and put some of them upstairs.

EDUCATING THE HORSE OWNER ON SHOEING.

There are some horse owners who will stand a good argument which will show them that they do not know it all, but there are others who believe that they are a good deal smarter than you, yourself, though having spent your lifetime at the trade. It is a question in my mind whether it is worth while talking to a good many of them or whether they are interested in such a subject as shoeing their horse; anyhow, I try to avoid coming in contact with any of them and go right ahead, do the work, and if it does not please I soon hear from them. I know that a great many will stand to be informed, but the question is how to get them interested. If they are busy men, they do not want to bother with such a small thing as horseshoeing, at least that is they way they view it. A good business man who is fond of horses and careful about their shoeing will look around beforehand and find out if the man who is shoeing his horses is worth while patronizing and if he is not they will soon leave him and go to another. Perhaps there is some way by which we could get at the horse owners and tell them how much there was in shoeing a horse and why a horseshoer is worth his hire, but that way I do not know, excepting it is when something goes wrong and then give him the best of your knowledge on the work that you are doing, if for no other reason than to impress him with your own importance. We must admit that many horseowners are totally ignorant on the subject of horseshoeing. Now and then we will find a man who knows just what he wants and tells you in such a way as to make you feel glad that you met him, but there are others and they are in the majority, whom words are wasted on if they were spoken to about this, that, or the other thing that was wrong with their horse. There is another class of horse owners who do not want to have their feelings hurt by telling them that there is something the matter—that their horse has got a bad pair of feet, as some kind of disease, or that he is going wrong and never can be corrected unless shod after your manner. Those fellows are a kind that believe they "know it" and, as I said, it hurts their feelings to have them told that they didn't jnow just what they were thinking or talking about.

There is no doubting the fact that the horseshoer is the caretaker of the horse's foot and unless he uses intellectual means to keep that foot in condition and to keep the horse going right, then there is not much use in driving such a horse, and if we could only get horse owners to look on us in that way it would not be very hard to convince them that we were worth all that we were asking for when we shod their horses, and also it would be an easy matter to convince them that cheap horseshoeing was dear at any price.

Just to give you a few illustrations that I have come across in my experience shoeing horses, I will touch upon first, the case of a man who was a superintendent of a large public institution that used a number of horses. I had reason to believe that this particular superintendent was not just right, in other words, that he was fattening off of the proceeds of the institution, for it was running behind and I thought that he was getting a little bit ahead.

Anything that I might do to this horse would not be of much benefit to him, because the disease had made such headway that his heels were simply a mass of corruption and the frog, to make matters worse, showed signs of thrush, so that it was impossible to use any pressure on them by a bar shoe. I shod this horse with a three-calk shoe, rolled the toe and elevated the heel calk slightly and he went along very nicely for about a week, when he showed up lame after a run. When I shod the horse I called up the superintendent and told him that his purchase was not a good one and he ought to discard the horse as somebody had put it over on him and that very soon he would break down under a run. Before I got through my conversation I knew that I had made a mistake and lost a customer, and I was right in my suspicions for I never saw the horse again, neither did I see the superintendent, that is, as a customer. I tried to educate this fellow and you can see how I succeeded. He was an exception to the rule. It was not long after this that they had a new boss in the institution and this fellow of whom I speak was in another job with much less money in it.

I remember another case of a horse whose feet were badly contracted. He also was a new purchase and the owner thought he was "quite the thing" as a judge of horseflesh. About two months after the horse had been brought to me, he went to stumbling and sometimes fell in his tracks, and I was brought to task by the owner who told me that this was a new habit for the horse as he had never been guilty of it before. I said to him, "Well, when you bought the horse and brought him in to me to be shod I pointed out to you the defect in his feet—they are contracted and it will take you some time before they become expanded. The only thing I can do is to help the good work along and you must give me time to do it." He knew that I was sincere and honest in what I was telling him, but I knew that he did not like me to tell him that he had been "taken in" when he bought the horse with contracted feet.

This was case number three: A team was driven into the shop one day and one of the ponies, for they were both small horses, was quite lame. I had been shoeing for this man for several years and this particular horse, I considered, was among the best that he had. His feet were sound and he was a real top-notcher of a traveler all through; there wasn't a pimple on him, his limbs being as clean as a colt that had never seen road work. When he left the shop with the team after being shod, the teamster in some way gave this horse a sudden jerk which caused him to partly stumble when he made his next step. The result was a lame horse. The owner of this horse asked me what the trouble was and, of course, I would not dare to tell tales out of school, because it might hurt the teamster if I told what I knew about his driving, but when it came to threatening me with the loss of his patronage, I up and said to the man, "See here, there are many ways that this horse of yours could have gone lame from the time he left my shop until he reached your barn. I don't know what the exact cause is I do know, however, that he was sound when he left me and I defy you to show that there is anything wrong with the feet or with the shoeing of them." This man asked me if I was perfectly well acquainted what a sound foot was. I told him I thought so and I asked him in return if he was acquainted with the subject. He said, "No, not particularly, but if I were shoeing horses I would be. That is not my business." I handed him a small pamphlet and told him to read up something about what there was in horseshoeing and he said that he did not require it, as he had other business to attend to. This pony was taken to a veterinarian, given an examination and the trouble was pronounced to be in the navicular joint. I concluded that the horse in slipping had strained the ligament surrounding the joint and it had worked up into a fevered condition. When I gave my view of it to the owner he said that he was perfectly satisfied with the explanation, but that he felt that it was best for him to change his horseshoer as he thought I knew too much. This was case No. 3 of the owner who would not be educated.

I wonder what kind is the next one that I might refer to, for there are dozens of them. But is it necessary to bring in more? It is all right for a young horseshoer to start in trying to do business and buck against some old heads who have been established for a long time, but the average young man must have a stout heart if he wants to keep his head over water and at the same time play the game square all around, and if he has not a stout heart, he will find himself going backward instead of forward. It is still another thing for us to say that we can educate the horse owners who are paying us for their work and believe at the same time that we can hold their business by dictating to them on how their horses should be shod when they, themselves, think that they should be consulted and not be dictated to.—Horseshoers' Journal.

BUSBEY'S MODERN METHODS.

It was Walter Cox, we think, who once remarked that a horse editor did not know enough about that noble beast to tell which end to put the bridle on, or some such awful canard. We might have retorted that Walter did not know enough about a horse paper to tell how to finance one, but we forebore, preferring to let the logic of events disprove Walter's allegation and then defy the "allegator." Recent developments have vindicated the wisdom of our determination, for they have proved that there are more things which horse editors know, not merely as to "hooking," but also as to training a horse, than the philosophy of Walter ever dreamed. It has remained for the dean of our noble guild, the patriarch Bro. Hamilton Busbey, contemporary of mighty sires, performers and breeders before Walter was born, to evolve a new process of training development which applies the genius of the 20th ventury to the antediluvian methods of its predecessor, and surpasses them as far as Uhlan could beat Dexter. Paradoxically as it may seem, Brother Busbey has requisitioned the anathematized symbol of a horseless age as an auxiliary to the development of the horse's speed. He has employed the automobile as a pacemaker. He has told vividly the success of his experiment. How the horse at first looked at the horseless wagon and eyed it with suspicion. How the fire of battle lit the eye of the splendid creature when it discovered that it was challenged to a test of speed. How the puffing and snorting of the monster only spurred the spirit of the noble nag, and the shouts of the chauffeur encouraged him to greater effort. But even all this failed to call into exercise the full play of the resources of the horse, for it was not until the barking of a bulldog in the tonneau was added to the hubbub that the splendid beast put forth the last ounce of his speed and fulfilled the expectations of his editor-trainer. The moral is obvious, and we hope Walter will let it sink in. Don't disparage the talents of the horse-editor. Don't overlook the sapience which applies modern thought to stereotyped methods. And especially don't forget the bulldog.—Trotter and Pacer.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

THE DOGS OF THE NORTH.

The husky dog belongs to the prehistoric age. His manners are those of the dogs that crept from out of the great forests to join the hairy men, who squatted on their naked haunches gnawing meat off red bones. He is a creature of an age of club and fang. He lives where the right to survive belongs only to the strongest and the fiercest. Yet he belongs to the fraternity of dogs, for he has a man master. Probably his half-brother the wolf calls him a fool and servile for this allegiance; but the husky cares not, for he has the reckless devotion of the true dog. In spite of blows and starvation he comes to his man master, knows him and bows before him. But other men he knows not, and that, again, is true to the canine creed. For no dog serves man in the abstract; he serves man in the concrete, the one who feeds him. He serves one master, but never two. An allegiance once contracted has something deeper than the flesh-pots of Egypt to bind him. He has no sense of philanthropy, and is unethically indifferent to his master's morals. So the husky is of the canine fellowship, even though, at times, he will point his long nose to the polar stars above in the Arctic night, and call the wolf call. But he is not really a wolf, for he has found a god, and the wolves, timber or gray, have no god.

He is short in the legs and chunky of body, over which arches resplendent a curled and bushy tail. His "pelt" is of a coarse fur in which nature has overcoated him free of charge from the severe Northern cold. Some have said he comes from Alaska, others from Greenland and Labrador. This much at least is certain, he belongs to the Esquimaux, for his appellation, "Husky," is the Indian insult for anything pertaining to the blubber-eating Esquimaux.

The husky's life has but two phases or seasons, year in and year out. Without him in the far North, in winter the white man or the Indian, who owns him not, is helpless, for the husky is the dromedary of the snows. But in summer man needs him not, and he becomes a wolf in habit, since he has to feed himself or starve. In winter the long raw-hide lash cracks about his ears, and the cry, "Mush! Mush!! Damn you, mush on!!!" goads him on to the long white trail, while answering he springs to his feet and trail, while answering he springs to his feet and strains at the rawhide harness of the toboggan. In teams of five or six hitched to ice-shod Komatiks, or to a freight toboggan, he hits the trail from dawn to dark, each dog pulling his hundredweight. He brings food, letters, and the thousand things men need into the great white North's crystalline heart. Viciously beaten, over-worked and underfed on white-fish, he staggers on with bleeding or frozen paws—the slave of man. Now and then one drops out, but the trail goes on. Men only swear and ask whose dog it is. Now and then one eats through the traces and vanishes northwards where the wolves are. Fasting and gasping and flogged on hard trails, like the famous Esquimaux, on he goes for days at a time. Upon the barrens, however, where caribou fall to his lord's gun, he feeds for a space like a king on venison. In the southern wastes tallow and corn-meal keep his body, and I think we may say, his soul, together for weeks. Round the igloos of the far North he wins his share of the "blubber." But this is a glorious thing compared to the summer. How the husky must be thankful for its northern brevity. For if it is one long unending day of muskeg smells and flowers, it is also for him a day of starvation, until the sun at last sets and the winds of winter blow. Until then, it is true, he roams at will, but he roams also a slave to hunger. For it is the time of the canoe and water transportation. The husky is useless. And as no work is required no food is given him. He must find for himself. So the wolf in him arises. The call of the wild comes to him in all its full meaning. He goes inland for days and nights together to the hills, hunting his prey after the manner of his wolf sires. But food is scarce and to take life, life must be given in the grim north where man and beast cling passionately to the gift of breath. What can one dog work with a moose or a stray imported horse? So they gather hungry and cruel, and sweep the land more ravenous and bolder than the wolf in pack. Even man, when alone and unarmed, is unfeared so that they may fill those hollow bellies of theirs, stanch that gnawing at their vitals. Of their ways in summer and how they subsist, when they belong to the shiftless Cree or improvident Esquimaux, no man knoweth more than he knows of the way of the wolf.

Yet the first deep snow finds them back at the trail again, working out their destiny in a waste of snows. And the trail has no end all winter long beneath the austere sky, where the northern lights flash and flame like battling angel hosts.

And only the men of the north in their parkis, with frost-lit eyes and clouds of frozen breath, know how the huskies go on barking for joy with their curling brushes in the air, up to the world through the violet creamy light of sun-kissed snow. Each man, then, knows nothing matters save the dogs. On them depends everything. For them everything is planned and done. For the trail is the husky way, and God pity him who forgets it.

Let us go with them a little way. In the bright moonlight of early morning, long before the brilliant starlight of the North has lost a vestige of its lustre, the guide, half-breed or pure-blood Cree, gets up from his spruce bed to rekindle the cooking fire. Then he wakes the party to "boil the kettle" (which in Northland parlance means food). It is cold and clear. Now they hitch up their teams long before the dawn spills itself along the east. Bell rings. The men shout. Their whips crack and the dogs bark. "Mush! Mush!! Damn you, mush on!!!" One team after another goes forward in its turn to break the trail. By ten o'clock the dogs must be rested, and the bannock is thawed out and breakfast gobbled from the frying-pan before it has time to freeze. Sometimes a blizzard lashes down, lifting the snow, stabbing the men's faces with cold-sores. Each man plows his own way with the twanging cruch of snow-shoe beneath his feet. If he falls, he is alone. These huskies that now slave on under his lash have been known to eat him. There is no mercy here either for the dog or the man who peters out. He who falls, sometimes never rises. He who fails is finished. Iron wills and steel muscles and a lust for life alone survive.

By two in the afternoon another halt is called to rest these huskies, whose dogged grit has by now caught your soul with admiration. Bannock and tea for the humans, but not a scrap yet for them. Famishing, they swing out for the last of the day's marches. But the vim of the trail, the elasticity of the dawn, is dying in weary man and beast. If a side-wind swings your sledge off the trail, those devils of huskies seem to know and wag their tails exultingly. Perhaps a moose scent is caught by them, and away goes a whole team from a green hand, flinging sledge and its cargo overboard on to the snows. Perhaps as the sun dies out in a splash of crimson blood over the white rim of the snow, the trail is running over a frozen river. You find your huskies edging into the bank, for they know. But the camping-ground lies up stream, and you lash at them furiously like a devil without mercy. It has got to be made. Your eyes are wicked and theirs have the ugly green light.

At last you come to the day's goal, and look for the lee side of its trees. A sleeping place is dug in the snow and floored with green spruce. Men light the two fires,—the camp and the cook fires. But the veterans of the party turn to the huskies. They bed them. That is, they choose a spruce about eight feet tall, lop it of its green, and chain the husky to it. They feed them. That is, each dog gains its white-fish or moose meat. Afterwards the men may feed and smoke. Then betwixt their eiderdown quilts in the sleeping bag comes happy-hearted sleep. Until another trail stretches out for men and dogs, until another dawn leers across this white world, and the heavens are again filled with the mirages of the North. "Mush! Mush!! Damn you, mush on!!!"—Bernard Muddiman, in Rod and Gun in Canada.

EFFECT OF ANAESTHETICS ON DOGS.

The invention, or rather the discovery of chloroform, has not only caused a revolution in the practice of surgery upon human beings, but also in that of animals, especially on dogs and cats, and now it is in general use when serious operations must be performed upon any of the canine and feline species.

Dogs and cats, however, are not such good subjects for chloroform as might be expected in comparison with human beings. It is well known that dogs especially are quickly killed by chloroform. On the other hand, cats are ideal subjects for chloroform—a fact to be borne in mind when administering that in order to cause death. A dog often will die in twenty minutes, but a cat will endure chloroform for a couple of hours or more, according to the extent to which it gets diluted with air. Great care, therefore, should be taken with dogs.

As to how far it is possible to relieve the pain of minor operations by the aid of anaesthetics of course a great deal depends. Canine patients vary considerably in their capacity for enduring anaesthetics; but where there is any operation to be performed that can be done quickly—such, for instance, as the tearing out of a claw or the cutting away of some external growth, an inhalation of chloroform may be risked.

On the other hand, what is termed local anaethesia is never especially satisfactory. The freezing process, common in dental practice, for instance, is not suited to canine dentistry; and the only really effective way of saving our dumb friends pain is to make the unconsciousness complete. An amateur never should undertake to administer an anesthetic; it should be done only under the supervision of a veterinary surgeon, or, if need be, of a medical practitioner.

THE COST OF A CHINESE CHOW.

Jong, a chow puppy, arrived in New York direct from China a year ago in a box about two feet square and a foot high. When an effort was made to take him from the prison which he had inhabited all the way from San Francisco, the puppy snapped and snarled until one brave hand grasped him by the nape of the neck and deposited him outside on the floor. Since that time the chow has grown in size and beauty, but he has never snapped or snarled at the owner of the grasping hand and every evening gives him a five minutes' welcome home of strident yelps of joy and wild dances of delight.

Chows that came direct from China are scarce in New York because few of them survive the long sea journey from the Oriental republic. Almost every ship that leaves China carries some of the chows, but very few survive the first thousand mile leg of the journey. The sea air is deadly to the chows, and unless the greatest care is taken with their diet and their digestive organs few of the animals reach their destination. The American who sent Jong to a friend on Staten Island had sent four others previously by way of the Suez Canal route and every one died before reaching Singapore.

Why the real Chinese chows are many times more expensive in this country than the American-bred chows is easily realized when it is taken into consideration that the original cost and the cost of shipping the animals that die on the way must be added to the price of the dogs that survive. While an American-bred chow can be bought for from $50 to $150, there are few dealers who would care, in peaceful times, to furnish the real Chinese animals, for less than $200 each. At the present time there are no chows coming by the Suez route and few by the Pacific route, so that dealers declare they can furnish none at any price.

Just how expensive it is to send a chow puppy from Canton, the native city of Jong, to New York City, is shown by this itemized account:

Cost of dog	$3.00
Freight, Canton to San Francisco	12.50
Worm medicine	.75
Collar and leash	1.50
Tips to hotel and ship boys	1.00
Butcher, Pacific Mail steamer	5.00
Night watchman, Mail steamer	2.00
Customs duty, San Francisco	3.00
Doctor's certificate	2.50
Boxing	.75
Freight and insurance, San Francisco to New York	9.83
Total	$41.83

The original cost of the dog in this case was excessive, because it usually is possible to buy the best kind of a chow in Canton for one dollar. The $5 paid to the butcher on the Pacific Mail steamship was for attention and not for meat, as the chow is a rice and vegetable eating animal, although he will eat chickens when he can catch them.

The chow is an excellent watch dog, giving an alarm at the slightest noise, day or night. He is very playful with friends, but snaps and snarls at strangers. His only fault is his roving habit. He will roam away from home and sometimes will remain absent for hours. If his master's home is in the suburbs he invariably will find his way back, but if he lives in the city he is lost in the mazes of streets. There is one satisfaction, however—when the chow is roaming away from home he will not be picked up by strangers or dog catchers and carried away, for his teeth are too sharp and his feet too speedy.

FEEDING HINTS.

There is often trouble with dogs when their owners are too kind to them in the way of food. One often hears the remark made that "we only give well-cooked meat to our dogs," little thinking that that particular way of feeding animals is an excellent plan to produce jaundice or stomach troubles. Dogs are by nature raw flesh-eaters, and if the kind sir or madam ignores that fact the darling pet is bound to suffer. The feeding and care of dogs are thus referred to in "Our Dogs": "The reason why dogs suffer from indigestion, paradoxical as it may seem to suggest that complaint, is mainly that their owners often bring that condition about by not giving them enough of what humans would call 'indigestible' food. The dog was never intended to masticate his food like a human being does. His fangs and his 'crunchers' were given him for the purpose of tearing the meat off his prey and crushing up the bones. Therefore, if a dog be fed on soft, sloppy foods instead of on raw meat and hard bones, not only will his teeth lose their quality of hardness and brightness, but the powerful digestive juices, by means of which he can assimilate all the solid lumps of bone, etc., that he 'bolts' down, will lose their power, and he will begin to suffer from actual dyspepsia. There is nothing better for any dog, next to meat, than good hard dog biscuit. This will tend to keep him in the best of health, and his teeth clean and white. Dyspepsia or indigestion leads to liver disease by easy stages, and therefore, as has been shown, the question of right feeding is a very important one. Next to feeding properly, a dog needs plenty of open-air exercise. The dogs most likely to suffer from jaundice resulting from indigestion and its sequel (sluggish liver) are those kept tied or fastened up without the freedom that is natural to a dog.

ZANE GREY'S FIGHT WITH A SWORDFISH.

The season's record swordfish weighing 284 pounds was brought to gaff Saturday, August 21, by Zane Grey, the well known New York author, who is spending a month at San Clemente angling for these king game fish. The fight lasted eight hours. So enthusiastic is Angler Grey that he had not time to bring the fish to Avalon himself but chartered a special boat so that the catch could be recorded. Despite the efforts to rush the monster to Avalon it is claimed that over 30 pounds weight was lost in transit. At San Clemente Island the catch weighed 316 pounds. Angler Grey is confident that he will land a larger specimen before the fish leave these waters, which, according to expert anglers, will be about September 15.

At daylight Sunday, in his pristine camp at Mosquito harbor, Mr. Grey told a newspaper representative the following story:

"It was about noon Saturday. The sea was calm except up toward the west end, where a wind was whipping the water white. Clemente Island towered over me, with its steep slopes of wild oats and its blue canyons full of blaze.

"Swordfishing is hard work because you have to troll for hours, and be on the alert every instant. I was tired, but not tired of looking at the Pacific and the wild and beautiful island.

"Capt. Dan suddenly said he had seen a big swordfish jump off to the west, and we put on full speed. The monster fish must have been a mile out and was disporting itself just where the breeze ruffled the water.

"His great fin and tail were violet, almost pink in color. They had not had time to get sunburned, as those of fish earlier arrived at Clemente.

"We made a wide circle around him, to draw the flying fish bait near him. But before we could get to the exact point of action he sank out of sight.

"The same old story, I thought, with despair—these floating fish will not bite. Cautiously we circled over the place where he had disappeared, and I watched my bait rising and falling in the low swells of the green-blue Pacific. Fifty miles from civilization, but still on the war path, I mused.

"Suddenly Capt. Dan yelled and I saw a great blaze of purple and silver green flashing after my bait. It was the swordfish and he took the bait on the run. The monster's jaws opened—that was a moment for a fisherman.

"I found it almost impossible to let him have enough line. All that I remember about the hooking of him was a tremendous shock. The first dash was irresistibly powerful, and I had a sensation of the absurdity of trying to stop a fish like that. Then the line began to rise on the surface and to lengthen in my sight, and I tried to control my rapture and fear enough to be able to see him clearly when he leaped.

"Then, tearing off the line, he was out of the water in seven great leaps—in rapid succession. It was utterly impossible to keep the line taut, and when I felt the slacking of weight I grew numb and sick—thinking he was gone. But suddenly he strained on the line with a jerk that lifted me, and started inshore.

"The contest seemed an age. When he stopped and went down he had pulled thirteen hundred feet of line off my reel while we were chasing with the engine pounding its capacity of revolutions. While under the surface I got back half of this line. I wish I could give some impression of this royal purple fish of the sea. He came up again—in two more leaps, one of which showed me his breadth of back—and then he performed the feature of which I had heard so much, and which has made the swordfish the most famous of all fish—he rose two-thirds out of the water, I suppose by reason of the enormous power of his tail—and then he began to walk across the sea in a great circle of white foam, wagging his massive head, sword flying, jaws wide, dorsal fin savagely erect, like a lion's mane. He was magnificent. I have never seen such fury expressed or such an unquenchable spirit. Then he dropped back with a sullen splash and went down and down—down!

"In the next hour he pulled us from the fence to Long Point, a distance of four miles. Once off the point, where the tide rip is strong, he began to circle in great, wide circles. Strangely, he did not put out to sea. And here, during the next hour, I had the finest of experiences I think that ever befell a fisherman. I was hooked to a monster fighting swordfish; I was wet with sweat and the salt water that had dropped from my reel, and I was aching in every muscle. The sun was setting in banks of gold and a silver fog over the west end, and the sea was opalescent—vast, shimmering, heaving, beautiful. And at this sunset moment, or hour—for time seemed nothing—a school of giant tuna began leaping around us, smashing the water, making the flying fish rise in clouds, like drifting bees. I saw a whole flock of flying fish rise into the air with that sunset glow and color the background, and the exquisite beauty of life and movement was indescribable.

"I was all Saturday afternoon at this fight, and all in, too, but at last I brought him near enough for the captain to grasp the wire leader. . . . Then there was something doing round the boat for a spell! I was positive that a tornado had hit us. But the explosion was only made by the swordfish's tail and Capt. Dan's voice, yelling for another gaff. When the second gaff was passed to him, as he gripped the wire leader, there was another submarine attack, but the boat did not sink.

"Next came the job of lassoing the monster's tail. Here I shone, for I had roped mountain lions with Buffalo Jones, and I was there with the goods. Capt. Dan and I were unable to haul the fish into the boat and we had to rig block and tackle to the mast and thus lift the tail on the deck, secure that and then pull the head from the other side. After that I needed some kind of tackle to hold me up.

"We were miles from the camp and I was wet, cold and exhausted, and the pain in my blistered hands was excruciating. But not soon shall I forget that ride down the shore with the sea so ripping and moon-blanched, and the boom of the surf on the rocks, and the peaks of the island standing up bold and dark against the white stars."

FLY-TYING FOR BEGINNERS.

[Concluded from last week.]

It is understood that the necessary instruments and and materials have been acquired, and we wish to begin the work of tying flies immediately; so in the event of a few failures at first, still we shall have time to become skillful before October. It is a good plan to choose a simple wet fly for a beginning, and to assemble the silks and feathers required for that particular pattern in a developing dish or on a plate, which can stand on the table at the right-hand side. Naturally, the flies most easily tied are those without wings; for instance, a red palmer or a coch-y-bondhu, which consists merely of a coch-y-bondhu colored hackle, and a body of peacock herl. As these are "wet fly" patterns, the silk may be waxed, by placing three twelve-inch lengths together—to lessen the chance of a breakage—and pulling them between the thumb and a bit of white wax; then separating the strands, of which only one is wanted for each fly.

A suitable hook having been gripped in the vice—the eye to the right—we proceed to "set in" or make fast a piece of silk; by laying it lengthways along the hook, and turning it back over itself half a dozen times, near the eye, winding away from you, over the top of the hook. Now, for the movement, clip the silk in one of the artery forceps and let it hang straight down, when the weight of the forceps will keep all fast.

Select a coch-y-bondhu hackle—red with black tips and center—strip off the soft stuff near its butt, make the fibres point straight out from the center, by passing the fingers the reverse way of the feather, and fasten the butt on the hook, with close turns of the silk towards the bend, half-way down the shank; secure the whipping by two single hitches; snip off the butt of the hackle and let the end of silk hang down as before. The tip of the hackle projects beyond the eye of the hook. Now take three strands of peacock herl, and lay them pointing tailwards along the hook, and continue the whipping over them to the bend, where it can be secured with another half-hitch. Some people snip off the short ends of herl, which are left at the place where we began whipping over them, but it is better to let these remain, as they help to make the body of the fly a little fatter.

Twist the silk and herl together at the bend of the hook, and wind closely up the shank, nearly to the hackle; there untwist the silk from the herl, fasten down the latter with a few turns and a half hitch, cut off the ends, and leave the silk hanging. The body of the fly is finished, so take the point of the hackle in a pair of pliers and wind it closely back to meet this finish, where it must be tied in with three firm turns of silk. Cut away the left-over part of the point, and work the silk in three or four turns through the hackle to the eye of the hook; there secure with a couple of half hitches, cut off the end of silk, and the coch-y-bondhu is complete. A few diagrams would make this description half as long, but if the process appears difficult, I can assure the beginner that a trial will convince him it is very much the reverse.

Having tied a few of the flies, the beginner may try a red palmer for a change, but first a note by the way. It is the hackle which gives floating power; so, as we desire a coch-y-bondhu to float or not, we add more turns of hackle or do the other thing. To tie a red palmer, set in a length of silk at the bend of a longish hook, and whip on three strands of peacock herl, a plain red hackle—by the point—and a piece of silver twist. Wind the silk and herl together and make the body as before, finishing just behind the eye of the hook. Next, work the silver twist over and up the body in fairly close rings, and fasten off in the same place. Finally, wind on the hackle in close turns from bend to eye, and secure it with two half-hitches. "A whip finish" is more artistic than half-hitches, but these are quite sufficiently good for ordinary use.

One of the most easily tied winged flies is a coachman, consisting of a peacock herl body, a plain red hackle, and a wing of white fowl, or duck, or—in the fly called a "dark coachman"—of starling. Set in the silk and make the body, according to the coch-y-bondhu method; only the hackle must be tied in a little farther back on the hook shank, to leave room for the wings, and the last wind of silk left hanging right up against the hackle. Now choose a small white feather—a seagull feather is best of all—and stroke out the fibres on one side at right angles to the middle rib. Then cut off a piece wide enough to form a pair of wings, which are made by folding the piece in two. Place these wings over the hook, just in front of the hackle, and clip them to the head the fly between the left thumb and forefinger. P the silk twice up under the thumb, and back un the forefinger, to get a grip of the wings, and t hold them upright upon the hook, and strain the tightly in a downward direction. Wind on three m turns with a downward pull after each of the before slackening your hold with the left hand, then let the silk hang while you consider the res The wings most probably are standing up from hook at a correct angle; so cut away any stum lay on two more turns, and finish the fly with couple of half-hitches as before.

I have now described three most useful wet fli and variations of the tying will enable the begin to construct many others of their tribe, until dou less he will feel equal to the work of inventing special fancy fly for himself; but the duns and d flies require an article alone, for besides being rath harder to make, they are perhaps more importa than the rest. Though I say not a word against and it is a killing method in our every-day use, I a not absolutely convinced that "wet fly" fishing can considered "fly" fishing at all, for this reason: the term "wet fly" indicates, the lure sinks belo the surface, while a natural fly is found always flo ing upon the top. Therefore, "dry fly" must be nearer imitation of the real thing and it is the on true "fly" fishing. Probably a wet fly is taken the trout for some small fry—very small fry—ephemeral nymph, beetle, or insect of sorts; or he just hungry at the moment, and will take anythi that looks filling at the price. However, our o friends the wet flies—or lures—unquestionably a killing; and it is necessary always to carry them wit us to the water-side.

FISHING LICENSES IN THE NATIONAL PARKS

The following communication from the Secretar of the Interior, at Washington, August 17, 1915, t Secretary Ernest Schaeffle, California Fish an Game Commission, is of particular interest to th angling fraternity:

"I am in receipt, by your reference, of a lette from A. D. Ferguson, assistant game warden i charge of Fresno Division, stating that the superin tendent of Yosemite Park is not disposed to enforc the laws of California regarding procuring of anglin licenses by fishermen within the metes and bounds of Yosemite National Park, without instructions from this Department.

In response I have to state that the following tel egrams have this day been sent to superintendent Bell of Yosemite Park, and to superintendent Fry of Sequoia and General Grant Parks:

'Laws of State of California obtain over and are enforceable in Yosemite, Sequoia and Grant National Parks. Persons desiring to fish in waters in these parks must first obtain fishing licenses required by State laws.

Issue proper instructions to secure enforcement of this law in park.' "

MIGRATORY BIRD LAW TO BE ENFORCED.

With the approach of the open season for shooting wild fowl, the United States Department of Agriculture is warning sportsmen that the Federal regulations as amended October 1, 1914, will be strictly enforced. Some misunderstanding has arisen from the fact that the various State laws do not always conform to the Federal regulations. This is regarded as unfortunate but in such cases the Department must insist upon the observance of the Federal regulations.

The Department will consider any recommendations submitted in good faith for amendment of the regulations, but will hold no public hearings thereon, nor will it amend the regulations prior to October 15, 1915. It is the purpose of the Department to conform the regulations to the wishes of the majority of sportsmen so far as it can be done and at the same time give wild fowl the necessary protection.

Federal regulations divide the United States into two zones. Zone No. 1, the breeding zone, includes the States of Oregon, Idaho, Colorado, Nebraska, Iowa, Illinois, Indiana, Ohio, Pennsylvania, and New Jersey, and all States north of them. Zone No. 2, the wintering zone, includes all States south of those named.

The regulations applying to the Pacific Coast territory prescribe seasons as follows:

Waterfowl—Arizona, California, Texas, Oct. 15—Feb. 1. Oregon, Washington, Idaho—October 1—January 16.

Rails, Coots, Gallinules — Arizona, California (coots), October 15—February 1; Oregon and Washington, October 1—January 16.

Shore Birds—Black-breasted and Golden Plover, Jacksnipe, Yellowlegs—Arizona, California, October 15—February 1; Utah (snipe), October 1—December 16; Utah (plover and yellowlegs), September 1, 1918; Oregon, Washington, October 1—January 16.

Insectivorous birds protected indefinitely. Band-tailed pigeons, cranes, swans, curlew, and smaller shore birds protected until September 1, 1918. Rails and wood ducks in California protected until September 1, 1918.

Shooting prohibited between sunset and sunrise; or at any time on the Mississippi river between Minneapolis and Memphis after January 1, 1915.

At the Traps

and American Handicap Winner.—L. B. Clarke hicago won the Grand American Handicap, the 's premier trap shooting event, in Grant Park n, after tying with three others at 96 out of 100 ets, he broke 20 straight in the shoot-off. arke is not a seasoned shooter and this makes performance all the more noteworthy. He has following the clay bird game for only about a , although previously he had been an ardent tsman. Clarke is vice-president of the Hibernian k and holds the same office in the Sportsmen's o of America.

he three men who tied with Clarke were M. E. ire of Hampton, Ind., C. C. Hickman of Yeoman, , and J. J. Randall of Greensburg, Kan. Clarke Dewire shot from the 18-yard line while the oth- were on the 19-yard mark.

he four leaders each received $664.50 of the A. H. purse. In addition Clarke received a chest silver. Six men with scores of 95 carried away 6.44 each. They were: E. W. Anderson, J. H. ry, A. Gilson, C. F. Helm, P. L. Heinicke and W. Irrgang. Eleven men finished with scores of and seven with cards of 93. Shooting the last day s under the most trying conditions. Throughout tournament the contestants have been bothered a strong breeze blowing diagonally across the ps, but Saturday it was nearly a gale.

he Consolation Handicap with 274 entrants was n by H. Hammersmith of Milwaukee, after a shoot- with Sam Leever, the former baseball pitcher, now Goshen, Ohio. Both finished the 100-bird event h cards of 91. Hammersmith won the shoot-off by ashing 18 out of 20, while Leever broke only 16. a shoot-off for the third place D. Livingstone of ungstown, Ohio, won by breaking 20 straight. The ner of the consolation received $145, second man k $130.50 and third man $116.

The professionals staged a race for the Henry nford trophy and R. O. (Pop) Hikes carried home bacon. Six men entered and Taylor was elim- ted with a score of 87 on a 100-bird shoot. In the phy contest, which was also at 100 targets, Heikes oke 96, Bart Lewis was second with 95, E. S. Gra- m third with 94, Lester German fourth with 93, and S. Spencer last with 92.

The tournament was such a great success that the 16 G. A. H. probably will be held at the same spot.

* * *

Vernon Gun Club Organized.—Los Angeles is to ve a gun club second to none on the Pacific Coast. he new club was organized by a number of shoot- s who realized the necessity of having grounds at could be reached from all parts of the city for five cent car fare. The club leased a beautiful urteen acre tract from the Huntington interests, d then erected a club house, shooting shed, trap ilkheads, and every other detail which helps to ake an ideal shooting park.

In the organization of the new club, an original ea was presented. A full membership card free charge, good for all time, carrying no membership es, dues or assessments, was issued to all lovers of e scatter gun. This membership card entitles the lder to all privileges of the grounds and to compe- tion to the prizes and trophies put up by the club. S. W. Trout will be keeper in charge and super- ttendent of the grounds. Targets will be trapped r one cent each, and a full line of all standard trap ads of the various ammunition manufacturers will e carried on the grounds, and sold at prices estab- shed by the Los Angeles sporting goods houses. untington Park cars go direct to the grounds; Santa e Avenue cars within two short blocks.

Officers of the club elected for the coming year re: C. E. Groat, president; Jack Doyle, vice-presi- ent; William Pugh, treasurer and manager; S. W. rout, secretary and superintendent of grounds.

* * *

Initial Club Shoot.—The opening shoot of the ernon Gun Club was held August 22. A total of orty-four shooters faced the traps during the day nd these gun pointers fired at 4,000 targets with nore or less success, writes Secretary S. W. Trout.

George Melford of Glendale was easily the class of he day. He broke a total of 86 targets in the 100- ird merchandise shoot, and while this is not a won- erful score under good conditions, it is excellent, aking into consideration the new grounds and quar- ering wind that came up at noon.

George was closely followed by Dr. Fitzgerald, who ad a total of 85 breaks to his credit. Mr. Melford lso annexed the long run money of $5 with a traight score of 37. W. G. Wilshire copped the $3 or second long run and Doc Packard hung up third un for the $2 offered.

The club will be open every day in the year with he secretary in charge, and handsome prizes will e offered for competition at the coming Sunday hoots. Every shooter is a member and everybody s welcome. The scores follow:

Merchandise event, 100 birds—Council 69, Melford 86, Mrs. Groat,80, C. E. Groat 74, Hoyt 79, Dr. Fitz- gerald 85, Peterson 79, Grewell 69, Dr. Packard 74, R. L. Hall 64, C. W. Clement 71, Oliver 63, Miller 59, Graham 61, Hill 60, Fullerton 56, S. A. Bruner 56, Monasco 63, Nugent 65, Newton 66, Pugh 82, A. W. Bruner 67.

Practice events—Gardner shot at 50, broke 32; Nissen 90—53; Moist 40—32; L. E. Hall 85—43; Albridge 75—46; Taylor 45—28; Hanson 40—23; Nugent 50—29; Newton 50—33; Anderson 50—21; Van Ness 50—19; Crayne 25—9; Pyle 25—4; Millard 75—43; Hill 50—28; Oliver 50—36; Fullerton 25—20; C. S. Van Horn 50—22; Peterson 35—26; R. L. Hall 40—33; Collins 50—22; Fitzgerald 25—23; Grewell 25—21; Pugh 50—42; Miller 25—17; Packard 25—22; Hoyt 25—17; S. A. Bruner 50—42; Charles Van Horn 25—11; Graham 45—42; Groat 35—24; Mrs. Groat 25—20; A. W. Bruner 50—40; Council 25—20; Clement 25—18; French 25—9; Melford 25—22; Levelle 20—4; Durant 20—6; Perk 25—10; Dr. Bishop 25—19; Trout 25—24; Kimball 25—11; Monasco 25—18.

* * *

Registered Tournament.—The two day shoot of the San Jose Blue Rock Club, September 5 and 6, should draw a large attendance of shooters. This shoot will be about the last big tournament in Central California this season.

Nine 20 bird events—$2.50 entrance, $10.00 added in each event, one 50 bird event, $5.00 entrance, $10.00 added, and a miss and out, $1 entrance, constitutes the card for each day—230 birds a day, 460 birds for both days.

Events 1 to 9 each day, Jack Rabbit System. Event 10, 50 birds, September 5, O. N. Ford championship of California, 25 pairs, now held by Foster Couts of San Diego. Event 10, September 6, O. N. Ford championship of California, 50 singles, now held by Toney Prior, of San Francisco.

* * *

Garden City Traps.—San Jose Blue Rock Club shooters, two squads, were out last Sunday. Dr. A. M. Barker won the county championship, 46x50. C. H. Nash won the special event, 24x25.

The following scores at 100 birds were shot: O. N. Ford 97, Dick Reed 92, Dr. A. M. Barker 90, Geo. H. Anderson 90, C. H. Nash 90, Louis Baumgartner 89, C. R. Arques 88, A. Smith 86, B. Jones 85, P. Miller 85.

Doubles, 24 pairs—Dick Reed 42, O. N. Ford 38, A. F. Baumgartner 35, Dr. A. M. Barker 31.

* * *

Golden Gaters.—The challenge match at the Golden Gate Gun Club shoot August 15 was won by Barney Worthen, who smashed every blue-rock in the string of twenty trapped. Then followed a series of ground challenges, with the following result: Champion class—Worthen 20, Hoelle 20, Bud Havens 15, Prior 18. Shooting off the tie, Worthen again scored 20 in a row, Hoelle 18, Prior 16, Havens 15.

N. A. Howard won in the first class with 19 out of 20. The scores in a following challenge match were: N. A. Howard 17, T. D. Riley 17, H. R. Phinney 17, H. Stelling 17, W. H. Price 16. The tie argument was another tie: Howard 19, Price 19, Phinney 19. McGill's 18 was high score in the second class regular event. The challenge scores that followed were: McGill 18, A. E. Stone 17, W. W. Thomas 14. Thomas, who broke 19 out of 20, won the third challenge match. Stone broke 14. McGill 12.

"Pop" Merrill and H. C. Peet tied, with 17 each, for third class, in the opening match. A. E. Smith won the second shoot with 17; Peet, Merrill and L. Pickersgill each broke 16, T. W. Parson 15. The third time up, Peet and Merrill could not get away from another tie, 16 each, Pickersgill 8, Smith 15.

In the club medal match at 20 birds the winners were: Champion class—E. Hoelle, 19 out of 20. First class—N. A. Howard, 20. Second class—R. E. McGill 18. Third class—L. Pickersgill 20.

The grub shoot" scramble between 15-men teams was won by Captain Phinney's bombardiers, 121 out of 150 birds. Captain Price's scatter-gunners broke 106. Each man shot at 10 birds. The straights were: Thomas, Price, Hoelle, Worthen, Hawxhurst, Howard and Stemfeld. Barney Worthen made the long run of the day—72 straight.

EASY 'TIS THAT "E. C." DOES.

The Grand American was won last Saturday by L. B. Clarke, 96 x 100, who used "E. C." smokeless powder. The three high amateur averages, second, third and fourth places in both the Amateur Championship at doubles, and the Chicago Overture, second in the Chicago Introductory and high professional average, were all accomplished with Hercules powders.

Appended is a list of Hercules powder representatives present at the G. A. H. last week, and also the roster of long runs made with "E. C." or Infallible:

List of Representatives at G. A. H.

Mr. J. T. Skelly, Vice-President	Wilmington, Del.
Mr. W. S. Magill, Manager	Chicago, Ill.
Mr. Edw. Banks	Wilmington, Del.
Mr. T. H. Fox	Lynchburg, Va.
Mr. E. M. Daniel	Lynchburg, Va.
Mr. W. S. Jones	Pittsburgh, Pa.
Mr. F. K. Eastman	Indianapolis, Ind.
Mr. J. R. Graham	Ingleside, Ill.
Mr. H. Kennicott	Evanston, Ill.
Mr. C. W. Hymer	Minneapolis, Minn.
Mr. W. M. Hammond	Wilmington, Del.
Mr. J. R. Hinkle	Oklahoma City, Okla.
Mr. T. W. Baker	Wilmington, Del.

Amateurs.

Runs made in G. A. H. with Hercules Powders (Infallible and "E. C."):	Runs
R. C. Kingsley, Omaha, Neb.	62
L. C. Huckins, Chicago, Ill.	90-68-68
F. G. Fuller, Mukwanago, Wis.	91-64
Wm. M. Foord, Wilmington, Del.	59
F. U. Roseberry, Baltimore, Md.	58
J. S. Young, Chicago, Ill.	57-53-72
S. A. Huntley, Omaha, Neb.	67
Dr. L. G. Richards, Roanoke, Va.	56
Geo. Grubb, Wetmore, Kan.	53
Wm. Wettleaf, Nichols, Iowa	65-60
P. H. O'Brien, Portland, Ore.	106
W. H. Kivitts, Terre Haute, Ind.	53
W. H. Cochrane, Bristol, Tenn.	58
C. E. McKelvey, Seattle, Wash.	65
R. D. Morgan, Washington, D. C.	54
H. C. Stutz, Indianapolis, Ind.	59

Ed. Graham, Long Lake, Ill.	106

WILD DUCKS NUMEROUS.

Just a foreword on prospects for the coming duck season. Numerous flocks, large and small, of ducks have been seen flying over San Pablo and Suisun bays. Sprig and mallard are already somewhat numerous in the Suisun marsh ponds. Several flocks of bluebills and sprig have been seen during the past week in the southern portion of San Francisco bay. Some of our weather sharps prophesy an early winter. Experienced duck hunters claim the hunting season will be A-1 this fall.

E. A. Richards, a game warden from the northern part of the State, reports that wild ducks of every variety were never before in the history of the rice belt section of Butte county more plentiful than this season.

At Butte creek, in the vicinity of Gridley, Biggs, Richvale and thereabouts, the wild ducks abound in thousands upon the open ground. The Graves ranch of 600 acres he observed covered with the game.

George Neale, of the Fish and Game Commission, claims that the rice fields and the irrigation necessarily adjunct to them are responsible for the abundance of game.

FIXTURES.

Registered Tournaments—Pacific States and Territories:

September 5-6.—San Jose Blue Rock Club, O. N. Ford, Secretary.

September 6—Tacoma Gun Club, Tasoma, Wash., "Old Policy"; Carl Coon, Secretary.

September 13, 14—Omaha Gun Club, R. D. Vaught, Secretary-Manager, Omaha, Neb.

September 24—Medford Gun Club, Dr. E. R. Seely, President, Medford, Ore.

November 4—Williams Gun Club, F. E. Lowe, Secretary, Williams, Ariz.

November 5, 6, 7—Arizona State Tournament, under the auspices of the Tucson Blue Rock Gun Club, W. A. Julian, President, Tucson, Ariz.

FOUNDING AND IMPROVING A HEREFORD HERD.

One of your readers, a novice in Hereford breeding, submits the pedigree of his bull and asks advice as to the kind of cows, individually and in bloodlines, he can best be mated with. I can not give an intelligent answer to his question without a personal knowledge greater than is submitted. It is difficult enough when all the factors of ancestry of bulls and cows are known; but a general discussion may aid your inquirer and others.

The pronounced merit and consequent popularity of Herefords have been made possible by the consistent efforts of breeders who have studied the problem of "like begets like" for many years, and have always had in view some ideal type to breed for, and by culling out each year such animals as do not come up to the standard required uniformity eventually becomes firmly established in the herd and the cattle will all look alike. The main thing to be considered in establishing uniformity in a herd is to secure a bull from a breeder who has made a study of the subject, and has been successful in perfecting an acceptable and profitable type. The bull should if possible be the product of this breeder unless it came from a herd of similar type and breeding. Individual merit in a herd bull is advisable when possible, but strict conformity to showyard requirements is not always necessary to make a good breeding bull. A good head and horn, denoting prepotency and intensified breeding, are all-important in selecting a herd bull. When possible it is better to see the bull and his sire and dam and the herd out of which he comes. Should this inspection be satisfactory it is reasonably safe to assume that the bull will breed after this type, although cases have been known where animals of identical breeding have varied considerably in their produce, the one out-breeding the other in individual merit. Still I think these are exceptions and should not be considered too seriously. The breeding problem at the best will take a man's most earnest thought, if he wishes to get to the top.

A linebred sire is apt to be more prepotent than a bull of mixed breeding. In the former a concentration of one type has been perfected through several generations, intensifying the reproductive tendency to such an extent that a uniform bunch of calves may be expected from a mixed lot of cows and from colts of the same type almost absolute uniformity should result. The sire of mixed breeding may be an excellent individual and will no doubt beget some outstanding calves but some of the objectionable types in his pedigree will show up now and then. There is no fixed standard of conformation in Herefords. Different breeders have their own views of what is the most profitable type to breed for. Some prefer extreme size, others a medium-sized Hereford, with short legs, a compact body and thick flesh, denoting early maturity and easy-keeping qualities; but all have one aim: to better the breed to the best of their ability.

A man starting out to breed cattle must first make up his mind what type he wants to produce, and then act accordingly. It is not necessary to discard a herd of good cows because they are of mixed type and breeding. Cull out the objectionables and then breed up to the type sought, rejecting each year such cows as do not produce what is wanted. There are not many bulls that will "nick" right with every cow; it is the general average of excellence in the crop of calves that denotes the value of a breeding bull—the same as in the cow that produces a good calf every year; but where she produces one the bull may get 50 or more, so it can readily be understood that a good sire may quickly enhance the value of a herd of cows by establishing a uniformity of character throughout. To obtain quicker results and attain the type desired females conforming to such type should be purchased out of herds conspicuous for their uniformity. The buyer could at one step continue the work, with the benefit of the seller's experience thrown in the bargain. This is no small asset for a beginner at the business and should be valued highly.

There are many active breeders today who can recall some of the earlier Herefords, such as Anxiety, Lord Wilton, The Grove 3d, Sir Richard 2d and others. Each of these bulls added fame in the past to the breed and their names will be found in almost every pedigree some generations back. The younger breeders know them only as appearing in the pedigrees of their cattle and have read about them on different occasions. The present-day Hereford owes much to the breeders of the past twenty years who have studied the problem of reproduction wisely and well.

I do not think it advisable to mate one extreme with another; if one has a herd of big, coarse cows he should use a medium-sized, heavy-fleshed, low-down bull on them, with plenty of character, and he is apt to strike a happy medium. If the cows are small, light-boned and thin-fleshed, use the same type of bull with a little more size, but not coarse. Coarseness begets thin flesh and poor doers—two evils to be avoided. I would say to the beginner that if he have a bull and he does not conform to the type wanted, sell him and get one that does; then go ahead and get females, bred on the same lines, but not too close, and of the same type. The results, with proper care and feed for the calves and the herd generally, should prove satisfactory. It is almost impossible to mate animal for animal in a mixed pedigree, as no one man can tell of what type each animal was, but in a line-bred animal where the one type has been the object for several generations there is more certainty in' the results.—Breeders Gazette.

MACK HENDREN COMES TO SIERRA VISTA FARM.

Big, genial Mack Hendren of Springfield, Ky., has recent accepted a position with Revel L. English, of Chino, California, owner of the noted Sierra Vista Stock Farm, and who, perhaps, is the most prominent saddle horse breeder on the coast. Mr. Hendren will leave Mokena, Ill., where he is located, for Chino immediately.

Mr. Hendren has been managing the saddle horse department of Mokane Farm, where he has been most successful with the horses which are the property of the well known Chicago attorney and horseman, Ernest V. Maltby. He could not resist the call of the Golden State, however, and has agreed to assist Mr. English in winning the big $6,000 stake and other prominent exposition shows.

Mr. Hendren will do well with the English horses. This ardent western horse lover has been fortunate in securing his services as this young Kentuckian and San Jacinto will make a pair to be reckoned with in the big $6,000 stake this fall.—Missouri Stockman.

THE EVOLUTION OF THE PLOW.

Naturally, ever since the first tilling of the almost beginning with the days of the creation, s form of implement has been used for the purpo turning it over in order to secure a proper foo for the seed or plants, says the Pittsburg Disp The early methods were most primitive in char and it was not until close to the middle of the century that anything like a serviceable article secured.

The first patent for a plow is said to have obtained by Joseph Foljamb in 1730. His inver was closely followed by other plow makers, an struck the same practical idea that has been so orated in the toil-turning instrument of today.

The most primitive of plows was shaped from trunks, limbs or roots of trees. Such were in close to the time of the Christian era. The Old tament mentions plows of iron or bronze, but ex in western Europe and America little progress been made in the improving of the implement s the time of Herodotus. The first recorded form plow is found on the monuments of Egypt, whe consists simply of a wooden wedge tipped with and fastened to a handle projecting backward a beam, pulled by men or oxen, and projecting ward.

In the first half of the 18th century a plow a short convex mold board of wood was introdu from The Netherlands into England and, as impro at Rotherham, in Yorkshire, became known as Rotherham plow and enjoyed considerable vogue

About the same time that Foljamb patented first plow Jethrow Tull invented a plow desig especially to pulverize the soil thoroughly, an embodied in modern plows of the best type.

In attempts to improve the plow the moldbo which raises and turns the furrow slice, and wh appears in the plows of The Netherlands during 17th century, has probably received more attent than any other single part. Thomas Jefferson, published his views in 1789, and James Small 1802, were among the first to attempt to establ the property lines of the moldboard upon a ma ematical basis. It was Small who first brought a plow in which beam and handle were of wrou iron, and the moldboard of cast iron. The sha when made of the same material, required const sharpening. This necessity was removed by device of Ransome in 1803, of chilling and so hard ing the under surface of the share; the upper s face, which is soft, then wears away more quic than the chilled part, whereby a sharp edge is alwa assured.

Nowadays the moldboard is of steel with a chill and polished surface to give greater wearing qu ties and to reduce friction. In the latter part the nineteenth century there were numerous i provements, but no fundamental alterations in t construction of the ordinary plow.

The first important invention of a plow in t country to be patented was by Jethro Wood in 18 He was a resident of Scipio, N. Y., and the first p ent for a sulky plow in America was granted to Brown in 1844, but practical plows of this type we not made until 1864.

The idea of the use of engines and machinery plow the ground seems to have originated with Dav Ramsey and Thomas Wildgoose in 1618, but t motive power they proposed to use is not quite cle Francis Moore in 1769 first attempted to use t steam engine for this purpose. The history of pra tical steam plowing dates from the invention Fowler, assisted by Smith, in 1854.

In the United Kingdom steam plowing is general carried on on the double engine system, introduc by John Fowler in 1865. The most improved plo in the United States consists of large engines drawi behind them a number of plows, sometimes coverir a space of 30 feet.

A COPPER RIVETED CINCH.

An Irish jockey was called as a witness in a tria and the opposing counsel was doing all he could t invalidate his testimony.

"What are you?" he began in a bullying tone.

"Sure, I'm a jockey, same as my father was b fore!" was the reply.

"Ah!" said the barrister, thrusting his hands int his pockets and preparing to enjoy himself hugel with the witness, "and I suppose your father did little cheating in his time, like the rest of the fra ternity?"

"Troth, and I suppose he did now an' thin," wa the quiet response.

"And where do you suppose he is now?"

"In heaven, I hope, rest his sowl."

"And what should such fellows as jockeys do there I should like to know?" inquired the barrister, in voice of thunder.

Paddy scratched his head. Then, with a sly grin he replied:

"Train hosses for the angels, perhaps."

"And cheat them as they did their fellow mortals?"

"Maybe so," replied the jockey, still unabashed.

"Ah! they would be prosecuted then," exclaimed the barrister, triumphantly.

"Sorra a bit," answered the witness.

"And why?"

"Because they might search over and over again and no lawyer would they find there."—Exchange.

THE FARM

DGREE IN PORK PRODUCTION.

re is a too general idea among
rs that pedigree of swine is
hing not worth their attention,
they are only in the business
sing pork. They retain the idea
a pedigree is a meaningless list
e ancestors of some animal, of
st only to the fancier or show
er, whose work, they imagine,
ittle connection with the every-
practice of pork production. This
nistake that is costing hundreds
ousands of dollars to the pork
cers of this country; for pedi-
rightly understood, represents
s, more than many other factors
eat production.

is idea was recently expressed by
mer in this way, referring to the
ded pedigree of a certain hog:
it good will that little piece of
ever do me, when I butcher my

t us forget all about pure breeds
registry associations for a little
, and talk about "just pigs."
hat is the pedigree of that young
nd-black sow that you are keep-
o breed next spring?"
hy, she has no pedigree at all;
just a common hog that I bought
my neighbor, over there."
hen why are you keeping her in-
t of a pig of your own breeding?"
Well, you see, my stock seemed to
unning out, my old sow brought
s several times in succession, and
he neighbors were poking fun at
besides, what she did raise never
ied to amount to much, and it
't pay. The mother of that pig I
ht was an old red sow Neighbor
s owned. She was an extra good
ier, and always brought big lit-
and raised them, too. That shoat
om Brown's black-and-white boar
he's the finest fellow for his age
I ever saw, big, and pretty, too.
ght to get some fine pigs, and lots
hem."
asn't that pig any pedigree?
sn't pedigree mean anything to
farmer? Right there, you get
it all that pedigree means to any

You are discarding pigs whose
wn pedigree is poor, for one with
od pedigree on both sides, and you
ect to make it pay.
hat pedigree was good, but it still
great factors of weakness, the
being that ie doesn't go far
ugh. That pretty boar may have
one of a twin litter, his remark-
growth being do to his start when
nad half of his mother's milk, and
may entirely undo the prolific ten-
cies of the mother. The mother,
, may have been a good pig out of
oor litter and transmit poor shape
thrift, undoing the boar's good
lities, so that posibly you may find
rself back to exactly the same con-
on—small litters and unprofitable
wth. This is no fanciful picture,
what happens many, many times
ctual practice.

he second weakness of that pedi-
e is that it deals with mixed
eds. All of our hogs are but im-
ved types of the wild boar, secured
ough years of care and selection.
tle by little his poor qualities have
n eliminated and the good qualities
the improved breeds fixed, each
ticular breed according to the orig-
tor's ideals of what a hog should

The longer a family has produced
spring of a certain type and excel-
ce, the more this type is fixed and
more surely they will transmit
m to their offspring. When two of
se fixed breeds are crossed, each
supposed to give half of the race
dencies to the resulting young, that
ght be good if it would continue,
t their ability to produce like is also
ided by two and even these half-
wer tendencies conflict among them-
ves. The result is that the age-old,
ld boar tendencies, always strong,
come predominant over man-made,
dern ones, and degeneracy soon
lows.

This brings us back to recorded ped-
ees and registry associations, which
e nothing whatever but a guarantee that the blood lines of a certain animal are pure, and thus able to produce its good qualities in its young, without conflicting tendencies.

If, added to the excellence of the breed, the individual pedigree for several generations show ancestors of merit, you can know with almost certainty that their produce will show like merit. Pedigree, then, rightly understood, means insurance of quality and evenness of production, and this, in hog raising, is as nearly synonymous with profit as anything can be. Pedigree means in many cases, the difference between marketing prime, even pigs at five and one-half to six months, instead of rough, mixed or poor lots at from seven to ten months, as too many farmers think is the time necessary before they can profit (often it is loss) by their pig-feeding. There are too many farmers who lose in profits on every litter more than it would take to buy a start of pedigreed stock.

Another mistake that many farmers have made in times past (and are still making) is to think that excellence in the show ring is too far removed from ordinary operations to interest them. On the contrary, it is exactly what should interest them, for the points required by modern shows are with a few exceptions exactly what the farmer needs. The exceptions are such things as color and extreme requirements for ears, coat, tail, etc., but these usually receive few points on score cards and are themselves not without value, indicating that the pig has its race inheritance highly developed in every part. While the pedigree that boasts many prize winners is not necessary for good results, it at least gives assurance of quality, and show winnings are often the most available history of quality when a pig is to be bought.

Whether individuality or pedigree is most important in animals of pure breeding is sometimes a question hard to decide, but the best opinion seems to be that between a remarkable animal from a family of known efficiency and a somewhat deficient specimen from a notable family, the latter is the best, for in the long run family characteristics overcome individual tendencies, save in rare cases of exceptional prepotency.

Finally, in these times of high-priced feed, pedigree means feed insurance as against speculation in pork production.—Pacific Homestead.

ALFALFA HAY AS FEED FOR HORSES.

We have been feeding alfalfa hay to farm horses and colts for 14 years, says the writer of a prize letter in the Nebraska Farmer. We have colts and their mothers and grandmothers that have lived on alfalfa hay all their lives. On our farm we have no other kind of hay. We have a mare purchased on the range in Wyoming 12 years ago. For 12 years her hay has been alfalfa. She raises a colt nearly every year. Tickle the bronco spirit in her when she is at work and you will think she has all kinds of wind.

We think that alfalfa hay fed with care throughout the whole year causes a saving of one-third in the amount of grain required. As nearly as we can we follow the rule to feed a horse at work one pound of alfalfa hay to each 100 pounds of live weight every 24 hours; that is, 12 pounds of hay to a 1,200 pound horse at three feeds of four pounds each. Colts and horses not at work get less grain and more hay.

In the 14 years we have fed alfalfa hay to horses and colts we have never had any bad results—unless we were short on alfalfa hay. We have a yearling colt whose mother works nearly every day in the year farming and feeding cattle. At one year of age this colt weighed 960 pounds. It had access to alfalfa all the time.

We have lived in York county 31 years. When I came to Nebraska prairie hay was very popular, and we still have a few men who think prairie hay is the only feed for a work horse. It was all right 30 years ago when corn was selling at 14 to 22 cents a bushel, but it is all wrong now when corn is selling at 55 to 70 cents a bushel and you can get four tons of alfalfa where one ton of prairie hay used to grow.

ACREAGE OF FARM LANDS.

The last Federal census shows the total number of farms in the United States to be 6,361,502, containing 878,798,325 acres.

The land in farms represents 46.2 per cent, or less than one-half of the total land area of the country. Of the total acreage given only 478,451,750 acres are classed as "improved land." The balance comprises wood land and other unimproved land in farms. The improved land given above is only about 25.1 per cent of the total area of the country. The average size of farms, as shown by the last census, is 138.1 acres, of which an average of 75.2 acres are improved, and 62.9 acres unimproved.

AIDS IN POTATO PRODUCTION.

(1) a more liberal use of potato seed will generally result in both increased production and profit.

(2) A good storage place is essential in order to insure sound, firm seed at planting time.

(3) The use of high-grade seed will increase the returns from the potato crop of the country by many millions of dollars.

(4) All seed should be treated with formalin before planting to prevent scab.

Water supply and sewage disposal are most important factors in the comfort of the farm dwelling. Where these permit, however, it is desirable to have the farmhouse stand in an open location facing the southwest, so that sunlight may enter all of the rooms during the day. An abundance of ventilation is a necessity, and in most sections of the country the addition of sleeping porches will be found well worth while. The bedrooms should be large enough to allow each person at least 500 cubic feet of space, and preferably 1,000. In the construction of barns, it may be added, not less than 600 cubic feet should be allowed for each 1,000-pound animal.

THE BEST LINIMENT
OR PAIN KILLER FOR THE HUMAN BODY
Gombault's
Caustic Balsam
IT HAS NO EQUAL
For the Human Body —It is penetrating, soothing and healing, and for all Old Sores, Bruises, or Wounds, Felons, Exterior Cancers, Boils Corns and Bunions, CAUSTIC BALSAM has no equal as a Liniment.
We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.
A Perfectly Safe and Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Strains, Lumbago, Diphtheria, Sore Lungs, Rheumatism and all Stiff Joints
REMOVES THE SORENESS--STRENGTHENS MUSCLES

Third Edition Within One Year of Publication.
CARE AND TRAINING OF TROTTERS AND PACERS
NEVER before in the history of the publishing world has a horse book gone into a third edition within one year of publication. Yet the explanation is simple—the book fills a long-felt want.
Never before has this subject been treated in a distinct manner. It has been handled in connection with autobiographies of trainers, but such works are out of print or out of date, for they were published 20 years or more ago. Conditions and methods have changed since then, and former treatises are just as much out of date as the high-wheel sulkies then in vogue.
"Care and Training of Trotters and Pacers" is as modern as a 42-centimeter gun. It does not contain the ideas of one man, but of 100 of the leading horsemen of the day, including Thomas W. Murphy, Walter R. Cox, and Edward F. Geers. These ideas were converted into book form by two prominent American turf journalists.
This book enables anyone to do his own caretaking and training until it is time to send the colt to a professional trainer, or the owner can train and race the colt himself. The treatise covers the details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented. Nothing is left to guess work. The language is lucid. Both theoretical and practical views are outlined and compared. The instructions are concise and easily understood. The work contains no advertisements—it is not a catch-penny publication that looks big in the advertisement but proves disappointing when received.
Many professional trainers have purchased the book and have found it interesting. Despite the war, over 300 copies have been sold in Europe and Australia.
Price $1.00 postpaid. Cloth, illustrated, 176 pages, 5x7 inches.

Green, absolutely sound and ready to show any time.—H. OLSEN, 1450 Forty-sixth avenue, Oakland.

"JACK-RABBIT" APPERSON

A BOOSTER FOR

TRAPSHOOTING

MR. EDGAR APPERSON, President of Apperson Bros. Automobile Co., makers of the widely-known Apperson automobiles, says about trapshooting,—"the Sport Alluring":

The pleasure I derive from the "Sport Alluring" is the most enjoyable of all the outdoor sports in which I engage—hunting and fishing not excepted—and I take a great deal of pleasure in both of these.

Of all the outdoor sportsmen, I think the gentlemen who follow trapshooting are the most enjoyable lot that it has been my good fortune to meet. It is to be regretted that more ladies do not take up trapshooting than do.

There is one thing necessary. To become a proficient trap shot requires a great deal of mental concentration, which of itself makes one forget business cares and worries, and is not only a bodily but a mental rest as well.

Mr. Apperson's experiences are typical of those of thousands of other men and women trapshooters.

There's a welcome awaiting you at the shooting club. Ask for booklet and a letter of introduction to the secretary of the nearest trapshooting club.

SAN FRANCISCO, CAL.

A Practical Treatise on the Training of Hounds

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effectiv , so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types or English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

GUNCRAFT

By W. A. Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

1915 WINRAC

—and—

ELIGIBILITY BOOK

The National Trotting Association W race and Eligibility Book for 1915 is ready for delivery. It is a work of pages, bound in cloth and contains o cial reports of all races and time rec meetings held by members of the tional and American Trotting Assoc tions as well as copies of all special ports received by the two Associatic and all reports of non-association me ings which appeared in the columns the turf and daily papers in 1914 as as an index giving the starts made each horse. In addition to this, it a contains an Eligibility List which p sents the names of all live horses acquired records or winraces in 1 1913 and 1914. When a winrace made over a mile track it is designa by the letter (m) and if a horse also a winrace over a half mile track wit the four seconds limit fixed by the r it is also given and marked (½m).

Last year after the new eligibility was adopted, the National Trotting As ciation issued a Winrace and Eligibi Book, which covered 1912 and 1913, assisted materially in the application the new rule, but members and ho owners were frequently in doubt as whether a horse was entitled to a t allowance. This resulted in a very luminous correspondence and in order obviate it in 1915, the present book b been compiled and issued as approv by the President under an order of Board of Review.

In the matter of time allowance, a ho with a winrace is allowed one second each year, if raced, in which he fails equal or reduce his record or win a ra providing same is claimed by the no inator when making the entry. If a ho was not raced in 1914, he is not entit to a time allowance and a reference the index in this book will show wheth he was raced or not, while by referri to the summaries, it can be determin whether he equaled or reduced his reco or won a race. Also in order to give the information possible, the reports meetings contain all races at half m heats as well as at mile.

This book presents reports of 1,4 meetings at which 12,673 horses start in 8,730 races and 939 performanc against time, for which the premiu amounted to $3,228,617.82, while the El gibility List presents the names of ov 14,000 horses.

The 1915 Winrace and Eligibility Boo will be sent postage prepaid to any ad dress for $2.00 by

WILMINGTON ***HERCULES POWDER CO.*** **DELAWARE**

HERCULES POWDER

For thirty-nine years the name of

McKERRON

Has stood for nothing save the

VERY BEST

of everything in the way of harness and accessories for stable, track, road and field. What is now offered "at any price" is the remnant of the sterling stock from which your wants have been filled during all these years—articles that are absolutely A-1 in every respect. When they are gone this establishment will be closed, never to be re-opened.

The Manufacturing Department

has been discontinued and no orders for new work will be accepted.

The curtailing of racing and training operations and the passing of road driving have combined to make my business no longer a matter of profit and I have reluctantly decided to

Go Out of Business Immediately

and when I say "go out of business immediately" I mean just that and nothing else. The present stock will be sold regardless of cost, and while it lasts you have your pick of

"McKerron" Horse and Stable Goods

Harness in sets and parts — **Handmade Horse Boots**

Blankets Robes Coolers Whips

Saddles, Bridles, Spurs, for track, park, or polo field

and an endless array of minor fittings and accessories, each and every article of the sterling quality that the name "McKerron" implies.

INITIAL COST IS NOT A CONSIDERATION

I must and will close this place at an early date and will make any reasonable sacrifice to enable me to do so. The stock is fast diminishing and I advise you to make your selections and purchase immediately.

122 McALLISTER ST. **JOHN A. McKERRON** SAN FRANCISCO, CAL.

It Looks Good To Everybody

The Winchester Model 1912 Hammerless, Repeating Shotgun has won the enthusiastic approval and endorsement of shooters everywhere. Its light weight, strength, balance, easy-working action, and splendid shooting qualities appeal to men who know a good gun. Its Nickel steel construction means not only a lighter and stronger gun, but a better balanced one, because of the better distribution of weight. This gun loads and unloads easily, has a cross-bolt trigger lock, and a simple take-down system. It is made in 12, 16 and 20 gauges. If in the market for a shotgun, don't fail to examine

Remington UMC "MODERN" Firearms and ammunition

REMINGTON UMC

HONORED WITH Grand Prix HIGHEST OF HONORS

at the Panama-Pacific International Exposition

REMINGTON UMC

MODERN

The Superior Jury at San Francisco delved deeply into firearms and ammunition history, statistics and both trade and consumer conditions before using that word MODERN in connection with this award. There are many reasons why—here are a few:

BECAUSE:

1. The first hammerless solid breech repeating shotgun.
2. The first hammerless solid breech autoloading shotgun.
3. The first successful high power slide action repeating rifle.
4. The first lock-breech autoloading rifle.
5. The first paper shot shell and first metallic cartridges successfully manufactured in the United States.

THE REMINGTON-UMC FACTORIES PRODUCED

6. The first perfected steel lined shot shell.
7. The first primer adapted to smokeless powder.
8. The first battery cup for quality paper shot shells.
9. The first cartridges for automatic pistols.
10. The first standard high power smokeless cartridges for big game autoloading rifles.

MODERN

TEN MODERNIZED REMINGTON-UMC OFFERINGS THAT SPORTSMEN THE WORLD OVER ENJOY TODAY.

You want Remington-UMC Grand Prize MODERN Steel Lined Shot Shells, Metallic Cartridges, Autoloading and Repeating Shotguns and Rifles.

Now Is Your Chance!!

For thirty-nine years the name of

McKERRON

Has stood for nothing save the

VERY BEST

of everything in the way of harness and accessories for stable, track, road and field. What is now offered "at any price" is the remnant of the sterling stock from which your wants have been filled during all these years—articles that are absolutely A-1 in every respect. When they are gone this establishment will be closed, never to be re-opened.

The Manufacturing Department

has been discontinued and no orders for new work will be accepted.

The curtailing of racing and training operations and the passing of road driving have combined to make my business no longer a matter of profit and I have reluctantly decided to

Go Out of Business Immediately

and when I say "go out of business immediately" I mean just that and nothing else. The present stock will be sold regardless of cost, and while it lasts you have your pick of

"McKerron" Horse and Stable Goods

Harness in sets and parts *Handmade Horse Boots*

Blankets Robes Coolers Whips

Saddles, Bridles, Spurs, for track, park, or polo field

and an endless array of minor fittings and accessories, each and every article of the sterling quality that the name "McKerron" implies.

INITIAL COST IS NOT A CONSIDERATION

I must and will close this place at an early date and will make any reasonable sacrifice to enable me to do so. The stock is fast diminishing and I advise you to make your selections and purchase immediately.

122 McALLISTER ST. **John A. McKerron** SAN FRANCISCO, CAL.

Minor Heir Jr. Racing Harness

A HARNESS with two styles of hitches—the two minute attachment for racing, and the breast collar and traces for jogging and training — Another famous Sell Brand product.

Made from genuine old-fashioned, slow-tanned Hollinger Oak Leather, without exception the finest harness leather produced in this country, reinforced with Indian tanned rawhide. Hand cut, hand finished. No other racing harness at anywhere near its price can equal this in quality. It is indeed a masterpiece of harness-making. If it wasn't the BEST of its kind, I wouldn't be backing it with my name and reputation.

Write for price and full information, or come and see it. **SEND FOR CATALOG**

THOUSAND DOLLAR PURSES AT PHOENIX.

For some time horsemen throughout the west have been on the lookout for the program of open classes to be given in November at the Arizona State Fair, and this week Secretary T. D. Shaughnessy makes announcement of the same through our business pages. Much to the regret of the officials of the fair their racing appropriation was cut down considerably this season, but the program has been arranged to give horsemen the best possible treatment with the money available. Ten open classes for one thousand dollars each have been arranged—for free-for-all, 2:07, 2:09, 2:12 and 2:18 trotters, and free-for-all, 2:04, 2:07, 2:10 and 2:15 pacers, in addition to which other classes are provided for horses owned in Arizona, as well as a liberal list of events for the galopers, which always find favor with the Arizonans. Entries close October first, and records made after that time will not operate as bars to eligibility.

Phoenix has one of the best tracks in the country and modern and conveniently appointed stabling quarters, and by arranging her dates for November 15 to 20 hopes to accomplish two objects with the horsemen: First, to attract all the easterners homeward bound from the fall meeting at the exposition, which immediately precedes the Arizona show, as well as their regular patrons among the western contingent, and, second, to induce some of the stables to winter at that point. Alonzo McDonald, of the "big six" of Grand Circuit fame, spent several months there last fall and winter and had nothing but praise concerning both the advantages offered, natural and artificial, and the treatment received by the local people, who have a well developed general fondness for the harness horse.

Also, the dates coincide well with fixtures in the realm of the gasoline speed bug, as they are just prior to the events at Corona which always attract the benzine burning headliners. For some time the auto and motorcycle events have been accorded prominence at Phoenix, and a 150 mile contest will be the feature of this year's offerings, which will be rounded out by other races.

Blanks with all particulars may be had upon application to Secretary Shaughnessy.

THE THOROUGHBRED MEETING.

With today's racing, the initial meeting of the Golden Gate Thoroughbred Breeders' Association enters upon its third week, with no regrets for that portion that has passed—save that it has passed—and nothing but promise for the future. That so much could have been accomplished under all the conditions existing has been a matter of surprise in many quarters, and is a source of much gratification to all who have in their hearts a love for the sport of racing, either under saddle or to harness.

Presumably, it is a "betless meeting," as Californians formerly knew betting; in reality there is no reason why anyone who longs for action should not get it, for there are plenty of gentlemen who will accommodate you providing the price and the amount are mutually agreeable. The system in vogue is neither that of New Orleans or New York, but is a great modification on the old method of operation where the races were more often raced in the betting ring than on the track. Large wagers are few and far between; modest sums are the rule, and such speculation as is indulged in is confined very largely to the "regulars" of the recognized "sporting element" to be found in any city of this size. The layers of wagers are free lances and there is no insurance against welchers. This operates to discourage "plunging," in which there is also another element of restraint—the prices offered. None of those present are seriously threatened with immediately impending death from enlargement of the heart superinduced by lavish generosity. The fact remains, however, that such betting as is carried on is so handled that it is not an abomination to the public.

From the standpoint of the man or woman who goes to the races purely and simply for the love of racing for racing's sake—and such are to be found present in generous numbers daily—the meeting has proven a source of much enjoyment and genuine pleasure. The professional race track habitue would doubtless cast a disparaging eye at the majority of horses contending in the daily events and class them as a cheap bunch of "selling platers," "oat hounds," "hay beagles," etc., but they put up races that in most instances have the all-redeeming feature of being contests, and contests are the things that thrill the heart of the real horse lover. Two to four horses leveling for all they are worth and coming to the wire head-on furnish a much more pleasing spectacle, even if they be merely platers, than would be furnished by a field of stake horses of high quality in which one individual stood out pre-eminently as the best. "The race is the thing," and never has it been more conclusively demonstrated than at this meeting. Every day has its quota of driving finishes, and on one card five out of the six races were won by no more than a neck.

This pleasing feature is due not only to the horses themselves but to another policy of the association—that of furnishing fair purses to race for as well as discouraging heavy speculation. True, the purses are not of monumental size, but they are large enough to overshadow the betting—that is, a win in most instances is more liberally rewarded by the owner's attendant call upon Secretary Nealon and Treasurer Tobin than is his visit to the layers of wagers. Last week the purses ran as low as $250; this week the minimum was $300, and if the gate receipts justify them in so doing, the officials of the association will raise this figure during the latter portion of the meeting.

Aside from the fact that the racing has been well contested, it is also worthy of note that by far the greater portion of the events have been above suspicion. True, there have been numerous rides that could have been improved upon, but more of them have been due to lack of skill and experience than to a disinclination to win. At all events there has been nothing sufficiently bad, at this writing, to invoke the disciplining powers of the judges or stewards, such penalties as have been pronounced having been imposed by Starter Stevens for infractions of the rules at the post.

The preliminary announcements of the Golden Gate Thoroughbred Breeders' Association that they would endeavor to revive racing on a new standard that would meet with general approbation rather than with public condemnation have so far been made good in an incontrovertible manner, and they have the thanks, best wishes and support of right minded lovers of his majesty, the horse.

Sixth Day—Friday, August 27.

First race—Six furlongs, selling, purse $250: D. K. Carter's br g Angelus (aged) by Sandringham—Vespers, 118 lbs., (Gentry) won easily; Hannis (aged), 113, second; Merry Twinkle (3), 109, third; Vespasian, Zinkand, Laura James, Rhodes, Sheffield and Renwar also ran. Time, 1:15 2-5.

Second race—Six furlongs, selling, purse $250: El Paso Stable's b g Acumen (aged) by Ilderim—Adele Harding, 118 lbs., (Burns) won easily; Princess Industry (aged), 111, second; Rey Shannon II, 121, third; Tordillo, Engraver and Annual Interest also ran. Time, 1:15 4-5.

Third race—Five and a half furlongs, selling, purse $250: F. Rinehart's b g The Feller (6) by The Major—Rubiana, 108 lbs., (Burns) won driving; Uncle Jimmy Gray (aged), 106, second; Charity Ward (3), 104, third; Norford Rose, Kid Nelson, Bill York and Finnigan also ran. Time, 1:06 3-5.

Fourth race—One mile, selling, purse $300: J. McCarthy's br g Metropolitan (aged) by Filigrane—Annie Thompson, 111 lbs., (Gross) won easily; Chas. W. Hodges (aged), 117, second; Zoroaster (aged), 114, third; Eastman and Stolen Ante also ran. Time, 1:41.

Fifth race—Seven furlongs, selling, purse $250: L. D. Gentry's b g Quick (5) by Conjuror—Fanny Wilson, 110 lbs., (Gentry) won easily; Henry Walbank (aged), 115, second; Orbe Smile (aged), 113, third; McAlan, Cantem, Prince Conrad and Sleepland also ran. Time, 1:27 4-5.

Sixth race—Seven furlongs, selling, purse $250: L. B. Wood's b g Sweetbait (4) by Fisher Boy—Cupboard Love, 115 lbs., (O'Brien), won handily; Nebraska Lass (aged), 113, second; Dennis Stafford (aged), 115, third; Electrowan, Choctaw and Tom Chapman also ran. Time, 1:27.

Seventh Day—Saturday, August 28.

First race—Six furlongs, selling, purse $250: Mallory & Co's ch m Miss Tempo (4) by Tempo—Standard, 113 lbs., (O'Brien) won driving; Robert Mantell (4), 115, second; Hardy (6), 115, third; Lady St. Patrick, Azurea, Stelcliff, Madelle, Lillian Ray and Miss Sedalia also ran. Time, 1:15 1-5.

Second race—Five furlongs, selling, two-year-olds, purse $250: T. B. Munford's br g Brooks (2) by Leonid—Insolence, 108 lbs., (O'Brien) won easily; Laughing Water (2), 95, second; Toastmaster (2), 105, third; Lola, Von Lady, Ojita and Leah Cochran also ran. Time, 1:02 3-5.

Third race—Five and a half furlongs, handicap, purse $300: Nevada Stock Farm's b m Scarlet Oaks (4) by Dick Welles—Glena, 116 lbs., (Burns) won ridden out; Eureka (aged), 107, second; Loftus (4), 111, third; Orange Blossom also ran. Time, 1:07.

Fourth race—Seven furlongs, Stewards' Cup selling stakes, net value $675: Daniels & Hodges' br g John Graham (aged) by Modred or Fake—Leenja, 114 lbs., (Palms) won driving; Theodorita (4), 107, second; Kootenay (aged), 119, third; Stolen Ante and Seneca also ran. Time, 1:27.

Fifth race—Six furlongs, selling, purse $250: J. Ferguson's ch m Lady Young (6) by Henry Young—Masher, 113 lbs., (Carter) won driving; Custom House (4), 118, second; Sweetbait (4), 115, third; Baby Lynch, Transparent, Miss Clark, Sweetdale and Old Bob also ran. Time, 1:15 3-5.

Sixth race—One mile, selling, purse $300: J. A. Pritchard's ch m Ora McGee (6) by McGee—Idly, 101 lbs., (Phillips) won driving; Ceos (4), 108, second; Henry Walbank (aged), 109, third; Christmas Eve, Commendation and Fairly also ran. Time, 1:41 3-5.

Eighth Day—Monday, August 30.

First race: Five and a half furlongs, selling, purse $300: L. Miller's br g Mark Kennedy (aged) by Wax Taper—Miss Dora, 108 lbs., (Burns) won easily; Camia (5), 106, second; Delmas (aged), 108, third; Kitty Stanfield, Minnie F., Tallow Dip, Viva, Mintanka, Wasatch, Sajetta and Vespasian also ran. Time, 1:08 2-5.

Second race: Five and a half furlongs, selling, purse $300: Mrs. B. McClintick's bl g Darkey (5) by Modred—Zirl, 109 lbs., (Small) won driving; Carondelet (aged), 109, second; Aunt Elsie (4), 101, third; Norford Rose, Zenotek, Roscas, Marta Mac, Wernras and Vireo also ran. Time, 1:07 2-5.

Third race: Five and a half furlongs, selling, purse $300: J. Randolph's br g Minco Jimmie (aged) by Bonnie Joe—Mary Hill, 103 lbs., (Gentry) won easily; John Hurie (5), 108, second; Tight Boy (5), 115, third; Auto Maid, Ida Lavinia, La Cazadora, Ida Cummings, Quantity and Van Horn also ran. Time, 1:08.

Fourth race: Six furlongs, selling, purse $300: W. J. Dunn's br m Thistle Belle (aged) by Knight of Thistle—Belturbet, 113 lbs., (Lounsberry) won driving; Sweetbait (4), 115, second; Butterball (aged), 115, third; Frazzle, El Pato, Miss Folly, Master Franklin and Pro Realis also ran. Time, 1:14 4-5.

Fifth race: Five and a half furlongs, selling, maidens, purse $300: J. H. Walker's b g Lovey Johnny (3) by Johnny Lyons—Lovey Mary, 106 lbs., (O'Brien) won easily; Rey Shannon II. (3), 114 second; Merry Twinkle (3), 106, third; Laura James, Smoky Dan, Rhodes, B. C. Winston, Otto Kahn, Queen Bergy, Sunflower Belle and Queen Maeve also ran. Time, 1:08 2-5.

Sixth race: One mile, selling, purse $300: M. Kennedy & Co.'s ch g Transparent (aged) by Smile—Little Pearl, 111 lbs., (O'Brien) won easily; Quick (5), 106, second; Fairly (4), 111, third; Wise Mason, Prince Conrad, Valadolid and Lady M. M. also ran. Time, 1:41 1-5.

Ninth Day—Tuesday, August 31.

First race—Five and a half furlongs, selling, purse $300: S. Lando's ch m Faustina (5) by Star Shoot—Nisbat, 109 lbs., (Riddle) won driving; Jennie Crawford (5), 104, second; Old Coin (5), 111, third; Hardy, Briton, Augustus Heinze, Fort Johnson, Kid Nelson and Marie O'Brien also ran. Time, 1:08 1-5.

Second race—Six furlongs, selling, purse $300: F. T. Shortell's b g Old Bob (3) by Joe Carey—Foul Play, 106 lbs., (Burns) won driving; Tordillo (3), 104, second; Miss Geneviege (6), 110, third; Bunny, Teeto, Magikon and Bobby Johnson also ran. Time, 1:15 4-5.

Third race—Five furlongs, two-year-olds, purse $300: G. Van Gorden's ch f Rose Marian by General Roberts—Rose Cherry, 120 lbs., (Kirschbaum) won in a canter; Frisky, 112, second; Mary Jay, 112, third; Robert Lee also started. Time, 1:02 1-5.

Fourth race—One mile, selling, purse $300: Daniels & Hodges' br g John Graham (aged) by Modred or Fake—Leenja, 111 lbs., (Palms) don driving; Be (6), 108, second; Zoroaster (aged), 107, third; Metropolitan and Rey also ran. Time, 1:40 2-5.

Fifth race—Seven furlongs, selling, purse $300: Mallory & Co.'s b m Electrowan (aged) by Joe Terry—Quatre, 113 lbs., (O'Brien) won handily; Lady Young (6), 113, second; Southern Gold (aged), 110, third; Tom Chapman, Acumen, Ceos, Loan Shark and Gimli also ran. Time, 1:28 2-5.

Sixth race—Six furlongs, selling, purse $300: W. J. Dunn's ch h Tight Boy (5) by Serpent—Azuba, 116 lbs., (Lounsberry) won easily; Sonoma (5), 111, second; Fred T. (3), 104, third; Angelus, Light Knight, Lofty Heywood, Robert Mantell and Forest Rose also ran. Time, 1:14 4-5.

Tenth Day—Wednesday, September 1.

First race—Five and a half furlongs, selling, purse $300: Hoag & Co.'s ch g Kid Nelson (5) by Solitaire II.—Bohemian Lass, 108 lbs., (Gross) won driving; Ed Luce (4), 111, second; Azurea (5), 108, third; Lillian Ray, Zamlock, Fred T., Smoky Dan, Wasatch, Bob Love, Moller and Renwar also ran. Time, 1:08 1-5.

Second race—Five and a half furlongs, selling, purse $300: R. G. Brown's bl g Carondelet (aged) by Bannockburn—Ida Kearney, 108 lbs., (Hawkins) won driving; Custom House (4), 111, second; Delaney (aged), 108, third; Roseas, Norford Rose, Choctaw, La Cazadora, Charity

[Concluded on page 6.]

San Francisco and Santa Rosa Matinees

Sunday was one of the nicest racing days, from the weather standpoint, that the San Francisco-California Driving Club has been favored with this season, and while the footing at the Stadium track was not as fast as it has been occasionally in days gone by, the track record had a mighty close call.

Bondalean, the great young pacer in the Silva stable, was the lad that caused the old record to have an attack of ague, and the horse that forced the fast stepping was Adolph Ottinger's Dick W., the owners having the mounts, the other starters being Little Bernice, W. J. K. and Pointer Belle. The boys went away a bit fast in the first heat, with the result that both Dick W. and Bondalean went to breaks in the first quarter, Little Bernice assuming a good lead around the turn and W. J. K. going into second place, Dick W. being the first of the tangoists to get back to his normal gait and dropping into third. Past the half Ot began moving up and passed W. J. K. on the turn, the Kenney entry making an ascension. Down the stretch Dick closed fast and gamely but had too far to come and finished lapped up on Little Bernice in 2:12, with W. J. K. third and Bondalean taking things comfortably back in fourth place.

Charley Silva then came to the stand and filed a lien on the trophy, stating in all confidence that there would be nothing to the race from there on except his entry, subsequent events proving that he had a fair sort of an idea of what he was talking about. Bernice brought the field past the stand the first time down, with Bondalean and Dick second and third, respectively, W. J. K. having difficulties in getting around the turn. Ot was a bit back in the middle section of the course but began closing up after passing the half, which was reached in 1:05. Coming into the straight the clip was too much for the Del Coronado mare and she went in the air, Bondalean standing off Dick W. by little more than a long neck in the stiffest kind of a drive, the last half in 1:03 and the mile in 2:08—some mile for a three-year-old over an amateur track with an amateur driver up.

As the race was for three heats only, Dick W. could still head the summary by landing the last heat, having two seconds to his younger rival's fourth and first, and the final mile was a battle for blood. Smith supplanted Owner Kenney behind W. J. K., but the change had no effect on the results, as the bay gelding broke shortly after getting away and the leaders went out in the same order as in the preceding heat. At the half Silva made a sprint that carried Schwartz' mount to a break and drew away for a good lead. Again Dick came from well back and again was lapped up on the winner at the wire, the heat being in 2:10½ and getting a good hand from the crowd.

Billy Malough and the ever reliable Emma M. annexed the 2:18 pace handily after King Pointer had taken the first heat, Zorankin going the best race of the balance of the field. Miss San Francisco started in to make a runaway affair of the free-for-all trot, but got unsteady in the final heats and finished last in both, St. Patrick trotting a consistent and a winning race. The real feature of the trot, however, was the "daybu" of Sandy Smith and the performance he put up with Ella M. R. The big daughter of Lord Alwin has never hit her gait right since her long let-up after her two-year-old races, and in the first heat was ten years behind excitement. Sandy made a few changes after his own notion between heats and sprung a real surprise in the second and threatened to win the third right up to a few yards from the wire.

Bradmont, racing from behind in the final quarter, after his favorite system, nipped Happy Dentist at the wire in both heats of the 2:15 pace, going a pair of nice miles in 2:12, 2:12½, and Rosie O. straight heated her field in the mixed class, the nice mannered Cookey furnishing her a bit of company. One of the most pleasing features of the afternoon was the removal by the police of a number of sixty per cent handbook makers, who have made themselves objectionable at recent matinees, eight of these gentry being furnished with free transportation from the grounds. The day in detail:

2:18 pace—Prize, Smoking Set, presented by the Club:

Emma M., b m (Wm. Malough)	(Malough)	2	1 1
King Pointer, b g (H. Campodonico)	(Burton)	1	3 4
Zorankin, b g (Frank Callea)	(Callea)	3	2 3
G. J. P., b g (R. Consani)	(Consani)	5	6 2
Hamburg Belle, b m (J. Ginocchio)	(Schwartz)	4	4 6
Tom Murphy, b g (E. T. Ayres)	(Ayres)	6	5 5

Time—2:14, 2:14½, 2:15½.

Free-for-all trot—Prize, Robe, presented by J. W. Wilkins:

St. Patrick, b g (J. J. Ryan):	(Lauterwasser)	2	1 1
Miss San Francisco, br m (Al Schwartz)	(Schwartz)	1	3 3
Ella M. R., br m (Geo. J. Giannini)	(Smith)	3	2 2

Time—2:19, 2:18, 2:17.

Free-for-all pace—Prize, Cocktail Set, presented by Senator R. J. Welch:

Bondalean, br c (3) (C. F. Silva)	(Silva)	4	1 1
Little Bernice, b m (J. C. Welch)	(Schwartz)	1	3 4
Dick W., b g (A. Ottinger)	(Ottinger)	2	2 2
W. J. K., b g (W. J. Kenney)	(Kenney-Smith)	3	4 4
Pointer Belle, b m (Kidd & Luce)	(Luce)	5	5 5

Time—2:12, 2:08, 2:10½.

2:15 pace—Prize, Fruit Basket, presented by the Club:

Bradmont, b g (Geo. J. Giannini)	(Lauterwasser)	1	1
Happy Dentist, ch g (J. J. Ryan)	(Schwartz)	2	2
Jack, bl g (McDonald & Conlan)	(Conlan)	5	3
Mabel Dillon, br m (B. Cohen)	(Burton)	3	5
Senator H., b g (Joe Kidd)	(Hanks)	4	4

Time—2:12, 2:12½.

2:25 mixed—Prize, Carving Set, presented by the Club:

Rosie O., bl f (3) (J. J. Ryan)	(Schwartz)	1	1
Cookey, b g (J. Vermet)	(Vermet)	2	2
Ateka, b m (B. Cohen)	(Burton)	3	3
Marin, b g (P. Kane)	(Kane)	4	4

Time—2:19, 2:18¾.

SANTA ROSANS HAVE GOOD SPORT.

[Report by The Republican.]

Santa Rosa, August 29.—Sarah C. and Jessie Dillon divided the honors at the fair grounds today, with Dr. William S. Jennings coming well to the fore as a favorite with the fifteen hundred fans that were gathered for the afternoon's sport. Seldom if ever has such a fine program been given at the local track for so little money, and the fans were of one mind in demanding that the Sonoma Driving Club give us more of these matinees and plenty of them.

"They should have these things oftener," was heard on every hand, while horsemen from San Francisco who came up for the meet went away surprised at the splendid turnout of horses for the events and saying that if the public did not appreciate such a meet as this one, they could not care much about racing.

Sarah C. clipped off a mile in 2:14¼ in the last heat of the second race, the 2:15 mixed event. She was racing against Pfeister's Lynwood and Nutwood Demonio, two fast ones, and had all she could do to stretch under the wire a winner. Lynwood took the first heat in 2:15, while the second went to Nutwood Demonio in 2:15¼, Sarah C. coming back in the third and taking the heat and the race by lowering the previous marks. In each case Sarah C. got away to a bad start. The first heat of this race was the closest of the day. It was a whirlwind finish and all three horses were bunched and driving hard on the stretch. Sarah C. was leading to win when Lynwood came up with a rush and nosed her out. Sam Norris was up behind Sarah C.

In the first race of the day Jessie Dillon won in two straight heats, 2:21¼ and 2:26¼. Although this was the first race for the little sorrel, she took it like a veteran and won hands down each time. She got away poorly, but in each heat was leading before the half-mile pole was reached. She was driven to victory by Frank D. McGregor, her owner.

In the free-for-all, Dr. William S. Jennings took the event in straight heats, 2:12 and 2:13. The big sorrel won easily, although once in the stretch it looked as if Le Donna was going to forge ahead. The Ryan mare broke, however, and lost the chance of winning. Both heats were pretty, and if Le Donna had not broken during the circuit in both heats, the finish would have been much closer.

Sam Norris drove The Potrero to a straight heat win in the fourth race, the 2:25 pace. The big horse made 2:23 and 2:23¼ and was not in any danger at any time. She started bad, but pulled herself up well and was leading before the half was reached in each heat. Tom Mack took second in the first heat and The Tramp in the second.

The road race was the last one on the program and furnished a great deal of excitement, although the time was miserable. Pacific, with L. Blurock up, won the first heat and went to the stables, as per agreement. Then Linnie C. with J. Compton up took the second and last heat of the race. Guy Carlton was scratched and Ike M. substituted.

So much for the card of regular races. Not content with giving the public more than its twenty-five cents' worth in racing, the club put on some exhibitions. First came an equipment race by a mounted squad from the army engineers' camp. Captain Moore and Lieutenant Fleming were in charge of the men. For a half mile they strung out their equipment, taking bridles apart and leaving them in one place, saddles apart and leaving them in another, blankets in another, and so on. The men started with their horses bareback, and assembled the bridles, then rode to where the saddles were strewn about and assembled these. Then they kept on until their outfits were all together and on the horses and the first man to ride the circuit of the inside track, provided his equipment was in order, was the winner. Corporal Hardesty was declared the winner and Musician Hesse second. Each was penalized one point for minor displacement of equipment.

Later another squad gave an exhibition setting-up and bayonet drill, which proved of great interest, showing as it did the exercises which the soldiers have to take to keep themselves fit and in trim.

Another feature of the program was an exhibition half-mile by Joe Ryan's guideless wonder, College Maid. The mare traveled the half in 1:08½ and went straight as an arrow to the stables at the conclusion of the circuit.

Still another feature of the program was the music, furnished between events by Guidotti's Royal Italian orchestra. This added materially to the pleasure of the afternoon.

To the members of the Sonoma Driving Club we say, "Give us these matinees oftener," and in doing so we echo the sentiment of the public.

The officials for the meet were:

Judges—H. B. Smith of Ukiah, Millard Sanders of Pleasanton and C. C. Oliver of Forestville.

Timers—Len Brittain, W. English and Tom Carlton.

Starter—W. Higginbottom of San Francisco. M Higginbottom is a licensed starter and has been a work in the matinee game in San Francisco for th past seven or eight years. He was loud in his prais of the meet and urged that it be repeated often.

The summaries follow:

2:20 trot:

Jessie Dillon	(T. D. McGregor)	1	
Lady Steinmore	(F. S. Turner)	2	
Alameda Maiden	(J. Grimes)	5	
Ned	(Vansant)	3	
Springtime	(Joe Ryan)	4	

Time—2:21¼, 2:26¼.

2:15 mixed:

Sarah C.	(Sam Norris)	2	2
Pfeister's Lynwood	(J. Compton)	3	1
Nutwood Demonio	(J. Grimes)	1	3

Time—2:15, 2:15¼, 2:14¼.

Free-for-all pace:

Dr. William S. Jennings	(F. S. Turner)	1	
Le Donna	(Joe Ryan)	2	

Time—2:12, 2:13.

2:25 pace:

The Potrero	(Sam Norris)	1	
Tom Mack	(F. McGovern)	2	
The Tramp	(J. Grimes)	3	

Time—2:22¾, 2:23¼.

Road race:

Pacific	(L. Blueback)	1	re
Linnie C.	(J. Compton)	2	
Ike M.	(J. Grimes)	3	
Sir Lynwood	(H. Carleton)	5	
Guy's Anteeo	(Harry Whitney)	4	

Time: ——, ——.

FREEMAN HOLMES BACK HOME.

F. Holmes, the well-known Canterbury trainer of light harness horses, returned to Christchurch last week from America, after a short but thoroughly enjoyable visit to the United States. In the course of a brief chat, "Free" told me that he had seen all the racing at the Panama-Pacific Exposition with the exception of the first day's programme, which he missed owing to the steamer being late in arriving. The sport at that meeting he described as thoroughly high-class, and he said that he had been specially impressed by the sound constitution exhibited by practically all the horses competing, who had to take part in a very strenuous programme. They were, as a rule, particularly well-mannered and well-gaited, and knew their business thoroughly. He took a particular interest in White Sox, the winner of the big pacing event at the exposition, as he spent a great deal of time with Will Durfee, her driver, whom he found one of the most genuine of friends. White Sox is an unhoppled pacer, but it was interesting to notice that when she first began to move up for the score, she went at a trot, changing to a pace when she increased her speed. The racing itself, said "Free," was the feature that received practically all the attention of the authorities in the States, and there was not the same provision made for the convenience and comfort of the public as was the case in New Zealand. The American trainers whom he met were exceedingly kindly disposed towards visitors, and always prepared to give information and advice. They were much interested in learning about conditions in New Zealand, and some of them said they were inclined to pay the Dominion a visit. As was mentioned last week, Holmes bought three horses, which are due to arrive next week, and he left a commission to secure a fourth. If breeding counts for anything, these three horses should prove valuable acquisitions to the trotting stock of the Dominion.

* * *

Mr. H. Barlow's imported American mares, Queen Patch and Alice Shaw, were released from quarantine last week, and were brought over to Christchurch looking little the worse for their long trip from New York. Mr. Barlow was lucky in being able to arrange for their shipment by a steamer sailing direct from New York for Lyttelton, and his two purchases have the distinction of being the first horses to come to the Dominion by way of the Panama Canal. Queen Patch, who, as has already been stated, is by Thistle from Nelly Patch, is a pacer, while Alice Shaw, a trotter, is by Edward Audubon from Forest Belle. Queen Patch, who is a handsome mare, showing a lot of quality, has been placed in A. Fleming's charge. This trainer some time ago purchased the property at Riccarton formerly occupied by R. O'Donnell, and subsequently acquired a block of 26 acres of land adjoining, enabling him to lay out a first-class private training track. Alice Shaw is at present being looked after by J. H. Duncan, who is conditioning her prior to her being sent to another trainer. This mare evidently got down during the voyage, and shows marks on her hind legs.

The strictness of the New Zealand quarantine regulations as exemplified in the case of Mr. Barlow's importations does not offer a great deal of encouragement to New Zealanders to bring horses from the United States. Mr. Barlow's two mares were subjected to the mallein test before being shipped, and certificates were produced stating that they were free from any disease, and came from a district where no disease was prevalent, but they were compelled to undergo a period of quarantine, and were again given the mallein test. A double dose of this test in a comparatively short space of time is rather a severe experience for horses, and Mr. Barlow's mares are now showing its effects. On the other hand, it must be admitted that the authorities must exercise precautions against the introduction of disease, and from their point of view it is better to err on the side of strictness rather than leniency.—Christchurch Press.

WALTER MOORE AT GALESBURG.

A number of excellent performances took place during the week, and the trotter that I most fancied was the black colt George N. Patterson, by On Voyage 2:25½, son of Bon Voyage 2:08, now in the stud at Frankfort, Ind., in charge of Col. James Hazelton. The Patterson colt met the crack filly Allie Watts, and when the decision was left to a brush in the stretch Patterson beat her home in both the first and second heats, then in the third he forced her out in 2:10¾, but already had first money won. He came over from California in the DeRyder car, and was sick for some time after his arrival in the east, but seems to be about right again. Before leaving Pleasanton, early in June, he worked a mile in 2:09¼, so that we may expect him to annex a pretty fast record before he ends his eastern campaign at Lexington. There are few colts that have the same line of breeding, as he runs in and out of the McKinney-Zolock family in every one of his first five crosses so completely it really requires a tabulation to show the peculiarity of his bloodlines. His dam, Yu Tu, is by R. Ambush 2:09¼, son of Zolock p. 2:05¼, by McKinney 2:11¼. His second dam is by Dick Turpin, by Inca Jr. 2:29, and the dam of Dick Turpin is Gypsey, the grandam of Zolock. His third dam is by McKinney 2:11¼, and she is also the grandam of R. Ambush. His fourth dam is by Inca 2:27 (sire of Inca Jr.), and she is the third dam of R. Ambush. The fifth dam is by Echo 2:23 and she is the fourth dam of R. Ambush.

If this colt was a young man, wouldn't he have a time of it finding out what relation some of his relatives were to him?

* * *

Charley DeRyder was a mighty pleased man to find a new trotter right in his own barn, or to resurrect one out of his own stable. The new-old one is Zomblack (three-year-old trotting trial 2:08¾), that was started pacing two years ago, after his legs began to fail a little, the Zombro horse showing well outside of a little tendency to hit his knee. But care, time, or pacing, one of the three, caused his legs to grow practically sound again, and one day last week Charley came out with him and announced that this was the way to shoe a pacer that hit his knee, and with that announcement he started him up on a trot. He had not been allowed to trot any in two years previously, but an 8-oz. shoe and 2-oz. weight suited him exactly. It will be remembered that after he trotted in 2:08¾, as a three-year-old, he trained off; but was not hard to start back trotting again, and seemed perfectly natural and safe on his stride at the gait, and worked in company in 2:11¾. There are few better individuals than Zomblack, and should he acquire a fast record at the trot he will be a much desired stallion, as he is regarded as a perfectly mannered horse, either in or out of the stable.

* * *

I am still undecided as to whether Joe Murphy p. 2:06¼, by Chambertin 2:14¼, the "Joe Lemon" character in my Christmas story of 1913, in which I charged him with being everything but a race-winning pacer, is not getting a little more than even with me. I have previously made humble apology to him for the unkind things I said of him, but had never seen him race until this week. Joe celebrated my appearance at Galesburg on Tuesday by whipping a good field of 2:10 pacers in 2:06¼, 2:06½ and 2:07½, while I sat here thinking of the $576.72 that he cost me to own him two years. But I have to hand it to him now—he is a good, game pacer, not an extremely fast sprinter, but one of those raters that hang on to the end of a mile like grim death, and not a bit particular if it be the sixth or seventh heat, either. Joe was driven an admirable race by Stanley Dunn, son of Walter Dunn, and in fact the Dunns, father and son, and the Chambertins, were very popular at Galesburg. In addition to Joe's bracket, Wanda won the three-year-old pace, with Directum J., another Chambertin colt, second the last heat, himself timed in 2:14¼.—Horse Review.

WILLIAM AS SEEN BY SCOTT HUDSON.

While all horsemen have for a long time had a most healthy respect for the champion colt pacer, William, it remained for Scott Hudson to be the first to predict his future assumption of the all age crown, the ruddy haired Southerner being outspoken in the extreme concerning his views of the Hoosier sidewheeler. After the famous meeting between the Marvin pupil and Directum I. a couple of weeks ago at North Randall, Hudson gave vent to the following when the race was being run over on the short track in the hotel lobby under the incandescents that night:

"William has a chance of going as fast in the open as Dan Patch went behind windshield. He is a marvel and I predicted that he would beat Directum I. after I saw him race at Detroit, and after I saw how well Marvin trained him at Grand Rapids last week and how well the horse finished a mile in 2:02, last quarter in 28½ seconds.

"Dan Patch went in 1:55 behind a wind shield, but William, in my opinion, will equal that mark without a wind shield. He is the greatest pacer in the world and when in condition can beat Directum I. any old time."

Salem's entry list looks like there would be some good sport at the Oregon State Fair. Too bad the free-for-all pace failed to fill.

Good Entry List at Oregon State Fair

Thanks to the aggressive campaign for entries waged by Secretary W. Al Jones, the fields at the Oregon State Fair this fall promise to be of fair size and excellent quality. Three of the early closers were well patronized on June first, while those classes closing on August 13 received from five to thirteen entries each. With the exceptions of the futurity events, the entries for the various classes are as follows:

Monday, September 27.

3:00 trot, purse $300, three heats: Honest Boy, H. S. Hogoboom; Edythe M., E. C. Keyt; Zombronum, Fred T. Merrill, Agent; Sea Waif, B. D. McManus; Nellie Mac, Geo. Swisher; Katherine West, C. H. Wheeler; Salem Boy, Mrs. Ione Mauzey. Seven entries.

2:10 pace, purse $700, three heats: Indian Hal, S. A. Agnew; Bonnie Antrim, J. H. Childers; Truxton King, W. C. Dooley; Delmas, A. A. Fidler; Allerdaw, Elmer Hogoboom; Harold Welcome, G. A. Lincoln; Red Hal, Fred T. Merrill, Agent; Oro Mo, C. F. Silva. Eight entries.

2:25 trot, purse $700, three heats: Bonnie Ansel, Alex Brown; Bon Diablo, S. M. Bush; Al McK., J. A. Bush; Going Some, Peter Coo; Peter R., W. C. Dooley; Mercury, R. Dixon; Virginia Barnette, W. G. Durfee & Co.; Jetlock, G. W. Gill; Floradora Z., P. J. McCormick; Salem Boy, Mrs. Ione Mauzey; Columbia T., C. F. Silva; Guy Light, W. F. Schultz; Hallie B., Mrs. L. W. Watts; Perrieo, Ziegler & Misner; B. & M., Mrs. Ione Mauzey; Claude Woodford, Thos. E. Battell. Fifteen entries.

One mile handicap dash, trot and pace, purse $500, to close September 14.

Tuesday, September 28.

2:15 trot, purse $700, three heats: Bonnie Ansel, Alex Brown; Sargo, Brooker & Blurock; General Brightheart, O. C. Koontz; Wild Girl, Mrs. Sadie Keyt; The Frisco, John Lance, Agent; Marguerite A., P. J. McCormick; Oakland Moore, G. K. Howitt; Eloise Dell, C. F. Silva; Prince Seattle, Fred Woodcock; St. Michaels, C. F. Wilson. Ten entries.

2:18 pace, purse $700, three heats: Hal Edo, W. S. Abbott; Halmetta, S. A. Agnew; Lena Patch, O. J. Brown; Hal Bear, Hall Bessellen; Lady Hal, H. C. Cox; Aurelia Lou, R. Dixon; Contention B., W. G. Durfee; St. Elmo, Chas. Gholson; Savage Right, T. R. Howit; Prince Zolock, H. H. Helman, Agent; Royal Express, Mary E. Kimball; Nigger Boy, John Lance, Agent; Sally H., F. V. McCarthy; Glad Wren, Alex Mitchell; Potrero Boy, C. F. Silva; Tillamook Maid, W. F. Schultz; Scarlet Trent, B. Thompson; Roxey Hal, John Hoffman. Eighteen entries.

Three-year-old trot, Oregon Futurity, purse $2000:

Wednesday, September 29.

Three-year-old pace, Oregon Futurity, purse $1,500.

2:30 trot, purse $500, three heats: Going Some, Peter Cook; Peter R., W. C. Dooley; The Bulletin, H. S. Hogoboom; Edythe M., E. C. Keyt; B. & M., Mrs. Ione Mauzey; Zombronum, Fred T. Merrill, Agent; Floradora Z., P. J. McCormick; Columbia T., C. F. Silva; Novela, J. B. Stetson; Katherine West, C. H. Wheeler; Perrieo, Ziegler & Misner. Eleven entries.

The Greater Oregon 2:08 pace, purse $2,000, three in five: Indian Hal, S. A. Agnew; King Zolock, R. T. Dickerson; William G., Wm. Duncan, Agent; Delmas, A. A. Fidler; Mack Fitzsimmons, B. F. Jaggar; Parkwood, Mrs. Mary E. Kimball; Nigger Boy, John Lance, Agent; Red Hal, Fred T. Merrill, Agent; Glen Rose, John Roberts; Potrero Boy, C. F. Silva; Scarlet Trent, B. Thompson; Haltamont, Clair Todd; Francis J., Mrs. J. C. Leggett, Agent. Thirteen entries.

Thursday, September 30.

2:20 pace, purse $700, three heats: Belle Smith, H. G. Cox; Marlin, H. S. Hogoboom; Frank Zolock, John Lance, Agent; Duke, B. D. McManus; Oro Mo, C. F. Silva; Helen Hal, A. G. Smith, Agent; Ruth Hal, Fred Woodcock; Jennie May, Ziegler & Misner. Eight entries.

The Lewis and Clark 2:12 trot, purse $2,000, three in five: Bonnie Ansel, Alex Brown; Sargo, Brooker & Blurock; Amy McKinney, A. A. Fidler; General Brightheart, O. C. Koontz; Wild Girl, Mrs. Sadie Keyt; Complete, A. G. Smith; Dan Mathews, B. Thompson; Hallie B., Mrs. L. W. Watts. Eight entries.

The State Fair 2:15 pace, purse $700, three heats: St. Elmo, Chas. Gholson; Hal Edo, W. S. Abbott; Indian Hal, S. A. Agnew; Grace M., Geo. L. Swisher, Agent; Scarlet Trent, B. Thompson. Five entries.

Friday, October 1.

Free-for-all pace, did not fill.

2:20 trot, purse $700, three heats: Mark H., Peter Cook; La Siesta, Clem Hart; The Frisco, John Lance, Agent; Sea Waif, B. D. McManus; Floradora Z., P. J. McCormick; Novela, J. B. Stetson, Agent; Eloise Dell, C. F. Silva; Prince Seattle, Fred Woodcock; Zomdell, W. S. Abbott. Nine entries.

3:00 trot or pace, did not fill.

Saturday, October 2.

2:12 pace, purse $700, three heats: Hal Edo, W. S. Abbott; Indian Hal, S. A. Agnew; Bonnie Antrim, J. H. Childers; Truxton King, W. C. Dooley; King Zolock, R. T. Dickerson; Prince Zolock, H. H. Helman; Parkwood, Mrs. Mary E. Kimball; William G., Wm. Duncan; Harold Welcome, G. A. Lincoln; Glen Rose, John Roberts. Ten entries.

2:09 trot, purse $700, three heats: Nuristo, Alex Brown; Bonnie Ansel, Alex Brown; Wild Girl, Mrs. Sadie Keyt; Kid Cupid, C. F. Silva; Dan Mathews, B. Thompson. Five entries.

2:25 pace, purse $500, three heats: Halmetta, S. A. Agnew; Lena Patch, O. J. Brown; Hal Bear, Hall Bessellen; High Ho, A. R. Cooper; Lady Hal, H. C. Cox; Aurelia Lou, R. Dixon; Contention B., W. G. Durfee & Co.; Tosora, C. A. Harrison; Savage Right, T. R. Howitt; Mack Fitzsimmons, B. F. Jaggar; Arlene K., E. C. Keyt; Royal Express, Mary E. Kimball; Nigger Boy, John Lance, Agent; Zom Norte, Mrs. Ione Mauzey; Sally H., F. V. McCarthy; Glad Wren, Alex Mitchell; Sonoma Maid, E. Steinman, Agent; Tempest, E. Steinman, Agent; Tillamook Maid, W. F. Schultz; Ruth Hal, Fred Woodcock, Agent; Courtney W., Thos. E. Battell. Twenty-one entries.

THE THOROUGHBRED MEETING.

[Concluded from page 3.]

Ward and Milton Barber also ran. Time, 1:07 4-5.

Third race—Five furlongs, two-year-olds, purse $300: El Palomar Stable's ch f Aunt Sal by Salvation—Antioch, 109 lbs., (Bullman) won easing up; Lola, 109, second; Schulenburg, 109, third; Syphon Boy also ran. Time, 1:03.

Fourth race—One mile, selling, purse $300: Freeman & Co.'s b g El Pato (6) by Conjurer—Pearl Barnes, 106 lbs., (Gentry) won driving; Brando (6), 111, second; Ora McGee (6), 111, third; Stolen Ante, Gano, Eastman and Nannie McDee also ran. Time, 1:41 1-5.

Fifth race—One mile and a sixteenth, selling, purse $300: J. Cushin's ch g Delmas (aged) by Luke Ward—Colita, 103 lbs., (Gentry) won easily; Ceos (4), 109, second; Fairly (4), 108, third; Miss Tempo, Lady M. M., Wise Mason and Tahoe also ran. Time, 1:48 4-5.

Sixth race—Five and a half furlongs, selling, purse $300: Moore & Son's ch g Robert Mantell (4) by Prince Esher—Mamie Lou, 106 lbs., (Ormes) won driving; Uncle Jimmy Gray (aged), 109, second; Charles Goetz (aged), 107, third; Jake Argent, Ida Pinack and Igloo also ran. Time, 1:08 1-5.

Eleventh Day—Thursday, September 2.

First race—Five and a half furlongs, selling, purse $300: Jarrett & James' b f Marie O'Brien (3) by Caesarion—Sneedwell, 97 lbs., (Gentry) won driving; Tallow Dip (aged), 111, second; Kitty Stanfield (4), 108, third; Vesta, Lillian Ray, Teeto, Lone Star, Queen Bergy and Viva also ran. Time, 1:09 2-5.

Second race—Six furlongs, selling, purse $300: Lieut. Stevenson's b m Madelle (5) by Sir Huon—Victoria B., 115 lbs., (O'Brien) won easily; Dominica (aged), 115, second; Frazzle (6), 115, third; Alda, Ida and Lovins also ran. Time, 1:14 2-5.

Third race—Five and a half furlongs, selling, purse $300: W. C. Weant's b g Stelcliff (6) by Clifford—Amstel, 111 lbs., (Taplin) won driving; Baby Lynch (3), 102, second; Jennie Crawford (5), 106, third; Roscas, Van Horn, Engraver, Tordillo, Zenotek and Orba Smile also ran. Time, 1:08.

Fourth race—Seven furlongs, selling, purse $300: Tigue & Bussey's Be (6) by Aeronaut—Millie A., 112 lbs., (O'Brien) won driving; Theodorita (4), 107, second; John Graham (aged), 121, third; Batchler and Executor also ran. Time, 1:27.

Fifth race—Five and a half furlongs, selling, purse $300: J. Randolph's br g Leford (4) by Bonnie Joe—Lady Lee, 103 lbs., (Gentry) won driving; Mark Kennedy (aged), 110, second; Brighouse (4), 111, third; Diadi, Miss Genevieve, Barbarita, Arrowshaft and Helen Hawkins also ran. Time, 1:08 1-5.

Sixth race—Six furlongs, selling, purse $300: L. B. Wood's b g Sweetbait (4) by Fisher Boy—Cupboard Love, 115 lbs., (Taplin) won driving; Hardy (6), 110, second; Commendation (aged), 110, third; Tight Boy, Light Knight, The Feller, Master Franklin and Auto Maid also ran. Time, 1:15 2-5.

Jockey William O'Brien, who ranked fourth among the winning riders of the country last season, came in last Friday from New York and hung out his shingle as a free lance. Business came his way with a rush, as he had a winning mount that afternoon and has furnished his share of the competition daily since then. One thing that encourages O'Brien's followers is that they always get a ride.

* * *

His Excellency Governor Johnson was among the guests of the association Saturday, and after a pleasant visit with the judges, stewards, and in the club house accepted an honorary membership in the G. G. T. B. A. Evidently he didn't see anything highly shocking to his pronounced progressive and reform sensibilities.

* * *

J. A. Schas, secretary of the Reno Jockey Club, was here for several days of late and announced that Reno had practically decided to give thirteen days of racing at the conclusion of the local meeting. They have that many days of grace on the original allotment and the first meeting was so successful that there is a general demand for the full allowance to be raced out.

* * *

President Clark's El Palomar Stable "got going" Wednesday when the two-year-old filly Aunt Sal carried the copper and pink to the front for the first time during the meeting. Johnny Bullman took the daughter of Salvation out in front to play with the field, winning in hollow style. The San Mateo sportsman now has a long supply on two-year-old material, as after Rose Marian's second victory over Frisky, the classy daughter of General Roberts—Rose Cherry immediately changed boarding houses. El Palomar Stable's accommodations were increased one "room" for the new arrival, and while George Van Gorden's popular hostelry was minus its best paying guest, George's bankroll had assumed more plethoric proportions to the extent of some three thousand dollars.

* * *

Scarlet Oaks showed good qualities last Saturday in the five and a half furlongs by winning in a nice drive in the stretch from a position fairly well back at the paddock. She was the first winner for the Nevada Stock Farm at the meeting.

* * *

Thistle Belle, who has made it three in a row since the meeting started, is one of those birds that cause the starter to bend a pitying gaze on anyone who tells him it is wrong to swear. The brown mare is a wolf at the post and can deal a bunch of riders and the starting crew more misery than is handed out by that well known San Franciscan, Mr. Sand Flea, when he gets to going good in a picture show house. She either beats the barrier or gets away not at all, and so far here she has succeeded in breaking very advantageously after raising her full quota of preliminary cain. She is sure one disturbing element.

* * *

Many of the big crowd of opening day who were disappointed over the failure of Celesta to appear will have an opportunity to see the great girl today in the President's Cup, as Trainer George Strate has announced his intention of starting her. She carries twenty-four pounds more than Loftus, the top weighter of the balance of the field, but will go to the post favorite at that, as she is the real race horse of the entire lot stabled at the exposition. She holds the world's record of 1:42 3-5 over a mile and a sixteenth, and on Wednesday morning carried a heavy boy over the nine furlong route here in 1:57 2-5.

* * *

A friendly feud between two of the top boys added a bit of interest to the general run of things Thursday. At the conclusion of the fourth race Olin Gentry protested O'Brien's ride on Be, but after considerable "auguring" the judges failed to sustain it. Both boys had a mount in the next race, Gentry on Leford and O'Brien on Mark Kennedy, and the way they scrapped it out was worth seeing, the handy little apprentice getting his "evens" by showing his more experienced rival the way the track ran in a hard, close drive.

* * *

The unwonted commotion at the club house after the second race Thursday caused bystanders to fear that some fair devotee of the thoroughbred had fallen off the roof in an outburst of enthusiasm, but the wild excitement was merely the "army crowd" pulling for Madelle, who, under O'Brien's skillful handling, had won a nice race for Lieutenant Stevenson. The army folks are good "rooters"—no foolin'!

GETAWAY DAY AT MONTREAL.

Montreal, August 27.—That much delayed second heat of the special match race between William and Directum I. was raced today as the feature of the final program at Dorval Park and resulted in a victory for the Indiana king-pin and a new race record for Canada, the mile being negotiated in the good time of 2:00¼. The track was very much more to the liking of Directum I. than it was when the first heat was raced earlier in the week, but William was in shape to beat him on any kind of footing.

Peter Scott took his second stake in handy fashion and very moderate time, Worthy Prince, his nearest competitor, not being able to make him step faster than 2:09¼. St. Frisco and Laramie Lad split up the heats in the 2:11 trot but Marse Ed's four-year-old son of San Francisco was too good for the Colorado trotter, and after they had gone three heats slower than 2:10 put a clincher on the event with a mile in 2:08.

Lizzie Brown, Dago and Dick Watts paraded in the order named in three featureless heats, and Dick McMahon tincupped a Peter the Great filly, The Great Miss Russell, in 2:24¼. The summary:

Montreal, Aug. 27.—Special pace, purse $5,000 (one heat in 2:04 won by William on Aug. 24):

William, b h by Abe J.....(Marvin)		1
Directum I., ch h by Directum Kelly.....(Murphy)		2

Time—2:00¼.

Dominion of Canada, 2:12 trot, purse $3,000:

Peter Scott, b h by Peter the Great....(Murphy)	1	1	1
Worthy Prince, b h by Prince McKinney....(Cox)	2	2	2
McCloskey, br g by Theodosius.....(McDonald)	3	3	4

Victor Star, Todd Temple, The Guide, Baron Aberdeen and Decision also started.

Time—2:10¾, 2:10¾, 2:09¼.

2:11 trot, purse $1,000:

St. Frisco, b h by San Francisco.....(Geers)	1	2	1
Laramie Lad, b g by Master Bo..(McDonald)	4	1	2
Lulu Lumine, b m by Orator.....(Murphy)	3	3	3

Reusens and Grand Marshall also started.

Time—2:10½, 2:10¼, 2:10½, 2:08.

2:09 trot, purse $1,000:

Lizzie Brown, b m by The Bondsman (Valentine)	1	1	1
Dago, b g by General Forest.....(Grady)	2	2	2
Dick Watts, b h by General Watts.....(Rodney)	3	3	3

Duchess and Bonington also started.

Time—2:10¾, 2:08½, 2:09¾.

HEAVY GOING AT EMPIRE CITY PARK.

New York, Aug. 31.—Rail lines between this city and Montreal provide rapid transit and most excellent shipping facilities for horses and men but they cannot compete with the aerial express patronized by the weather man. The Grand Circuit campaigners left Montreal Saturday on specials that landed them at the Empire City Park in short order, only to find that his nibs had gotten in ahead of them with J. Pluvius. The old horse shipped well but fell to staves shortly after his arrival, with the result that this locality received a thorough drenching. However, a big race meeting without rain wouldn't seem just right this season east of the Mississippi, so the horsemen present feel right at home.

Walter Cox, the elongated Yank, and his pupils took to the heavy going just as though they had ordered it especially for their particular benefit, the stable grabbing two firsts and one second out of the day's offering of three events.

On the other hand, the tiring footing contributed to the defeat of the hitherto invincible youngster in the Pastime Stable, Lee Axworthy. After his former defeats of both the Murphy topliners he was looked upon as a sure thing for the Greater New York 2:08 trot, but the Axworthy lad is not a mudlark and was content to trot to third place in the summary to Peter Scott and Worthy Prince, the Scott horse seeming to be satisfied with any sort of a course.

Cox and Queen Abbess had a merry duel with Murphy and Hal S. in the 2:15 pace, the roan gelding lining out the first two miles below 2:10 with the brown mare at his heels. Then Cox took out for three in a row, with Murphy's pacer a good contender for two heats but giving way to Peter S. in the final.

Longshot had a closer call in the 2:17 trot with Jeanette Speed, with the time ranging from 2:14¾ to 2:18, four heat winners developing. Bettini took the first and then retired to the rear guard; Idora Worthy annexing the second and also giving ear to the retreat call. Red Gift added variety by taking the third, whereupon Jeanette declared herself and took the next two, with the Grattan Boy lass contending strongly and Idora Worthy seeking the restful seclusion of her "boudoir" after the fourth heat.

Directum I. was scheduled to start against his record today but as any sore of a mile was an utter impossibility the flight against the watch was postponed until later in the week. In accordance with the anti-gambling laws, there was no open betting. The summary:

New York, August 31.—The Greater New York 2:08 trot, purse $5,000:

Peter Scott, br h by Peter the Great...(Murphy)	1	1	1
Worthy Prince, b g by Prince McKinney..(Cox)	3	2	2
Lee Axworthy, b h by Guy Axworthy.(Andrews)	2	3	3

Bonington, Reusens, Duchess also started.

Time—2:09¾, 2:10, 2:09¾.

2:15 pace, purse $1,000:

Queen Abbess, br m by The Abbe.....(Cox)	2	2	1	1	1
Hal S., ro g by Hal Chaffin.....(Murphy)	1	1	2	2	3
Peter S., b g by Como.....(Grady)	3	3	3	3	2

Patrick M. also started.

Time—2:08½, 2:09¾, 2:10¼, 2:13½, 2:15¼.

2:17 trot, purse $1,000:

Jeanette Speed, bl m by Peter the Great .....(Cox)	5	2	5	1	1
Red Gift, b m by Grattan Boy..(Dickerson)	4	3	1	2	2
Bettini, b m by Bingara.....(Lemkin)	1	6	6	5	4

Brook King, Great Bells and Idora Worthy also started.

Time—2:16½, 2:14¾, 2:16¼, 2:17, 2:18.

Second Day at Empire City.

New York, Sept. 1.—Another day of racing on very heavy footing was responsible for several instances of reversal of form today, as some of the most highly regarded starters in the three events raced could not perform well and the summaries were topped by horses who have the ability to handle mud, though the going was heavy, rather than dangerous.

The feature of the afternoon was the Stallion Stake for three-year-old trotters, with half a dozen starters. Deroche, in the Geers stable, and Rusticoat should have been among the leading contenders but failed to figure to any great extent, Rusticoat getting the flag in the first heat. Deroche trotted second to Henry Todd for one mile and then gave way to The Colorado Belle. The winner was bred, owned and driven by the Massachusetts sportsman, C. W. Lasell.

Loe Blossom, who appeared to fancy soggy dirt by winning last week at Montreal, went two good heats in 2:09¼ and 2:08½ in the 2:13 trot, but blew up in the third, making two breaks and finishing behind the banner. Pop Geers and The Guide took the third heat, and then along came Alonzo McDonald with Laramie Lad, who had been trotting consistently right after the early winners, and annexed the next two and the race. Nathan Axworthy, who hung up a world's record a few days ago at Goshen and who would have carried a lot of money had there been open betting, grew so weary in the sticky stuff that in the fourth heat he got the flag, though he showed his natural qualities by "dying on a trot."

Thanks to the fact that Yedno is not a mudlark, McDonald won his second race of the day, the 2:07 pace, with Rastus. The Canadian mare went two winning heats in good time with Rastus driving her out, but from then on it was Rastus all the way, with Frank Patch the best contender. The summary:

New York, Sept. 1.—Stallion Stake, three-year-old trotters, value $10,435:

Henry Todd, b g by Henry Setzer.....(Lasell)	1	1	
The Colorado Belle, b f by Colorado E.....(Serrill)	3	2	
Deroche, ch c by John A. McKerron.....(Geers)	2	4	

Onward Forbes, Native Spirit, Rusticoat, also started.

Time—2:11¾, 2:12½.

The Manhattan, 2:13 trot, purse $2,000:

Laramie Lad, b g by Master Bo.(McDonald)	3	2	2	1	1
The Guide, b h by Peter the Great..(Geers)	6	3	1	3	2
Miss Directed, b m by Direct Well(McDevitt)	7	4	3	2	3

Nathan Axworthy, Loe Blossom, Todd Temple, Kitty L., Bettini and Sadie S. also started.

Time—2:09¼, 2:08½, 2:09¾, 2:11, 2:11½.

2:07 pace, purse $1,000:

Rastus, b g by Liberty Boy....(McDonald)	2	2	1	1	1
Yedno, br m by Bob Fitzsimmons (Fogarty)	1	1	3	3	3
Frank Patch, b h by The Patchen Boy(Cox)	3	4	2	2	4

Peter Farren and Bingen Pointer also started.

Time—2:07, 2:07¼, 2:07½, 2:11½, 2:11¼.

Third Day at Empire City.

New York, Sept. 2.—While Directum I. failed to equal his previous record of 1:58 here today or even to pace a mile dangerously close to the two-minute mark, horsemen who know him well are inclined to consider his performance in 2:02¼ one of his most excellent ones. Repeated experiences have shown that the little red fellow has no liking for any other than footing of the very best, and the going here today was poor, loose and cuppy, most of the wise birds setting 2:04 as the probable limit for the speedy pacer. Without a windshield, he turned the quarters in :32, :30¼, :31 and :29.

The three-year-old pacing division of the stallion stake had only two starters but was a merry contest between Miss Harris M., and Sad Thoughts, the former winning the second and third heats in 2:07¼ and 2:10 after the Bingen filly had taken the first in slower time. The other events were won in straight heats and moderate time, Lustrous McKinney taking the 2:11 pace and Audrey Grey heading the list of 2ff:20 trotters. The summary:

New York, Sept. 2—Stallion Stake, three-year-old pacers, value $2,205:

Miss Harris M., b f by Peter the Great(McDonald)	2	1	1
Sad Thoughts, b f by Bingen.....(Cox)	1	2	2

Time—2:12¼, 2:07¼, 2:10.

2:11 pace, purse $1,000:

Lustrous McKinney, b g by McKinney..(Rodney)	1	1	1

ean, b m by Flosko.....(Murphy) 3 2 2
udd Elliott, br g by Prodigal.....(Geers) 2 3 3
Major Byers also started.
Time—2:12¼, 2:08, 2:07¼.

2:20 trot, purse $1,000:
udrey Grey, b m by Moko.....(Cox) 1 1 1
odd McGregor, ch h by Cochato.....(Rodney) 2 2 5
lary Guy, ch m by Guy Axworthy.....(Murphy) 8 4 2
Jess Y., Dame Danvers, Prinelda, Helen Constantine, Alerta and Notice B. also started.
Time—2:13¼, 2:12½, 2:14¼.

THE "LADY ST. CLAIR" CASE.

On July 14, 1915, a young man named Albert Delay of Waterbury, Conn., appeared at Youngstown, Ohio, and started a bay mare named Lady St. Clair in the 2:25 pace. Very litle attention was paid to her. In the first heat of that event she finished ninth and in the next heat fourth. In the third heat she was first to the wire but was set back to last place for a foul. Delay then went to the front and won. After his first winning heat, he also waved his hat at the judges for which they in due time made apologize.

From Youngstown Lady St. Clair was shipped to Conneaut Lake, Pa., where she won again and from there to Bradford where she was defeated. Her next appearance was at Belle Vernon, Pa. When she came out to start there W. H. Gocher, Secretary of the National Trotting Association, was at the track with Clarence Cole of Indianapolis. The latter identified Lady St. Clair as Edna L., a six-year-old bay mare by Major Guethlein, dam The Witch by Alcantara, that made a record of 2:09¼ in 1914 when she was raced by Frank Tinkler of Martinsville, Ind. When Delay was called to the judges' stand he stated that there must be a mistake about it as he purchased Lady St. Clair from John Shortt, the proprietor of a butcher shop on Main street, Waterbury, Conn.; that Shortt raised her and that she was sired by a horse named George St. Clair out of the dam of the Roan Wilkes mare, May Day 2:14¼. The mare was allowed to start under protest in the 2:25 stake and after a six heat contest won the event. Her next appearance was at Kamms, Ohio, where she was distanced in the first heat and the judges promptly suspended Delay and the mare for not making an effort to win.

When John Shortt of Waterbury was interviewed by the Secretary of the National Trotting Association he said that he had sold Lady St. Clair to Albert Delay and described the mare racing under that name so accurately that it looked suspicious. On further inquiry it was also learned that the horse which Shortt bred by George St. Clair out of the dam of May Day was five instead of six years old, while a number of Waterbury horsemen alleged that instead of being a mare it was a gelding.

After the Rockport race, Delay shipped Lady St. Clair to Hartford where on Monday, August 23, she was again identified as Edna L. 2:09¼ by Irvin Paul, a young man from Martinsville, Ind., who was present when Frank Tinkler sold her. Also on the afternoon of the same day Paul met Albert Delay and William E. Russell of Waterbury, Conn., the two owners of the mare raced as Lady St. Clair, and identified them as the men who purchased Edna L. at Martinsville, Ind., and to whom he delivered her at Indianapolis, Ind., on January 2, 1915. Albert Delay denied that he had ever seen Irvin Paul, but after thinking it over two or three days, William E. Russell called at the office of the National Trotting Association and admitted that Paul was right and that he and his partner had purchased Edna L. with the object of ringing her and did ring her, and after a spectacular career of six weeks both of them are financially embarrassed and all that they have left as a turf asset is a little hoppled pacer with her equipment, while that asset is not at present available for racing purposes, as she was suspended for fraud at Rockport, Ohio, and will no doubt in due time be penalized for being used as a ringer.

The mare Edna L., alias Lady St. Clair, is a little bay mare weighing about eight hundred pounds. She has a small white spot on her forehead and a little white mark on the heel of her right hind foot, while she has also a curb on each hock.

ANCIENT HORSESHOES.

Some four thousand years ago horses were shod with some pliable material, and even, we are informed, as late as the seventeenth century the same custom was adopted. Nailing the shoe to the horse's hoof is a modern invention.

Xenophon states that he captured many animals shod with fibre and spartium, and Aristotle wrote that "horses were shod with fibre or spartium." Pliny the Elder, 23 A. D., gives an account of "mules and asses being shod with spartium and oftentimes reinforced with rawhide." Pollux mentions "horses shod with fibre or leather."

The Arabs use various materials such as rawhide, willow twigs and bamboo. The Chinese and Japanese use shoes made of bamboo or rice straw. The Iceland peasant shoes his pony with sheep's horn. Horses in Soudan wear socks of camel skin.—Our Dumb Animals.

Charley DeRyder switched Zomblack back to the trot recently and was third to Princess Welcome and Italian Aubrey at Dubuque in 2:10¾. His legs are good and he threatens to make a race horse in spite of all the hard luck he has had to buck.

NOTES and NEWS

Bondalean (3) 2:08.
In a Sunday matinee.
With an amateur driver.
Also on an amateur track.
Looks like the real goods as a three-year-old pacer.

◈◈◈

The Great Westerners are making mighty good time, both trotting and pacing.

◈◈◈

Don't overlook the Phoenix program that appears elsewhere in this issue—ten classes for a thousand dollars each.

◈◈◈

Dicto now carries a mark of 2:09¼, made in the third heat of a race at Galesburg in which he won second money.

◈◈◈

William Higginbottom of this city, who is equally at home starting horses or selling them, gave the word at the Santa Rosa matinee last Saturday.

◈◈◈

By pacing in 2:00¼ at Montreal in his last meeting with Directum I., William hung up a new race record for Canadian tracks. The victory also put him two up on the little red horse.

◈◈◈

The Dubuque track at old Nutwood Park got two nice new records last week, Little Prince setting the pacing mark at 2:05¼ and Spriggan hanging up 2:08¼ for the trotters to shoot at.

◈◈◈

Lee Axworthy doesn't seem to hanker any more for "holding" dirt than does Directum I., the Andrews colt being easily beaten over the heavy course at Empire City by two horses that he has handled with ease on a track to his liking.

◈◈◈

Governor Mason, the Kansas bred trotter that Charley DeRyder recently purchased "down east," justified his new owner's faith in him by winning the 2:10 trot Thursday at the Great Western Circuit meeting at Des Moines.

◈◈◈

Alonzo McDonald put over two winners in the heavy going at New York Wednesday, Laramie Lad in the 2:13 trot and Rastus in the 2:07 pace. In both events his entries won in the latter portion of five heat races, outlasting the early winners.

◈◈◈

Directum I. had hard luck at Empire City Park in his trial for a new record, as he hit exactly the kind of footing he has never been successful in handling. However, he unbelted a mile in 2:02¼, which is faster than was expected under the circumstances.

◈◈◈

Henry Helman and Prince Zolock were a whole team in the 2:15 pace at Centralia-Chehalis last week, taking the second and third heats in 2:10½ and 2:15 after forcing Scarlet Trent to step the first one in 2:09¼ to win. The former track record of 2:11¼ was well jolted both in this race and the free-for-all.

◈◈◈

The first of the major stakes for three-year-old trotters, the Stallion Stake, valued at $10,435, was won Wednesday at Empire City Park by Henry Todd, the son of Henry Setzer bred, owned, trained and raced by Chester W. Lasell. The contest was good but the time slow, owing to recent rain. Rusticoat caught the flag in the first heat.

◈◈◈

J. A. McKerron, at the old familiar place at 122 McAllister street, still has a good many highly useful articles of horse gear in the shelves and show cases, and horsemen in search of bargains will do well to drop in and take a look around. The prices are cut to your own figures and the store will not be open much longer.

◈◈◈

Miss Harris M., the nice three-year-old Peter the Great filly that Alonzo McDonald had with him on his western trip this season, now carries a winrace record of 2:07¼, having taken the big end of the pacing division of the stallion stake at Empire City Park Thursday. The track was loose and cuppy, so all the more honor to her.

◈◈◈

We have an inquiry at this office for the names of parties in position to furnish horses in good sized bands for export to Europe. If any of our readers are interested in such a proposition we will, upon advice from them, take pleasure in putting them in communication with our correspondents, who are fully responsible.

◈◈◈

Donald McRea, sheriff of Snohomish county, Wash., with headquarters at Everett, is the owner of the fast trotting mare Vallejo Girl 2:10¼, by McKinney, dam by McDonald Chief, and is dam of six, including the great sire Tom Smith 2:13. Her second dam is by Ethan Allen Jr., third dam Thoroughbred. She has been bred to Count Boni (2) 2:27½, owned by Mr. Jennings at Marysville, Wash., Mr. McRea's home town, and Mr. McRea believes he has bred to as good a chance for speed, especially for trotting, as he could find in the Northwest.—Rural Spirit.

Millard Sanders, who was among those present Sunday at Santa Rosa, is endeavoring to "stir up a meeting" at that point in the interim between Salem and San Francisco. There would be plenty of horses available to have a good meeting and it would undoubtedly be welcomed by the Sonoma county folks.

◈◈◈

Future Tramp, the four-year-old gelding by Trampfast which C. A. Durfee is working at Pleasanton for Tim Sexton, trotted the McKenzie track last week in 2:16¼, going the last half in 1:01¼, leading Charley and Tim to think they have a real trot horse, an opinion shared by a number of others who saw the mile.

◈◈◈

As was to be expected, when William's change of ownership was announced, the famous sidewheeler goes shortly into the hands of Doc Tanner. "The boys" in general hate to see Marvin lose him, and the impression is that Doc will do no more with the horse than Billy would have done—perhaps not so much.

◈◈◈

The Proof made good on certain recent predictions concerning him by winning the 2:20 trot at Dubuque last Friday from Direct Patch, Red Silk, Main Lac and a number of other starters, the best time being 2:12¼. Our notion is that the lad can and will win where the time is faster than this before the season closes.

◈◈◈

It hardly seems necessary to state it in print, but the meeting at Empire City Park had rain to contend with just the same as every other big line meeting recently. After waiting five years for a return of the Grand Circuiters it seems tough on the New Yorkers to have to buck the weather man. Doubtless it is a bit wearing on the nerves of the horsemen as well.

◈◈◈

Loren Daniels and the Silva horses made their first starts since July 5 at the Southwest Washington Fair last week, Columbia T. trotting 6-4-4 in her event, Eloise Dell 3-2-4 in the 2:20 trot, and Teddy Bear 2-1-1 in the free-for-all pace, the fastest heat of which was in 2:09½. Oro Mo, we regret to announce, has developed trouble which in all probability will prevent him from racing again this summer.

◈◈◈

E. R. Dunn has recently turned over to Sutherland & Chadbourne for future development the two Cochato two-year-olds that he has been handling personally at San Jose. The pacer has not yet "come back" fully following his castration, but the trotting filly is as sweet as can be, having worked not long since in 2:17¾. She has turned the middle distance in 1:06 and a quarter in :31, so she ought to figure in the junior divisions of the stakes this fall.

◈◈◈

Albaloma and Baby Doll, in their retreat from the firing line on the Grand Circuit, arrived at Alameda late last week in charge of Johnny Hunt. Seems a bit like they came home a little early, as they are both in nice shape and some of the fast birds that "hung it on 'em" are beginning to go bad and slow up. Johnny, looking pretty fit himself, spent a few days ground racing with local friends before returning east, where he will probably tie up for the winter with some good stable.

◈◈◈

Don Densmore, Little Prince, Columbia Fire and Shamboy tangled up Tuesday at Des Moines in the free-for-all pace, the Don finally emerging victor with a championship record dangling from his belt. According to the A. P. reports the average time for the five heats was 2:07¾, which would make the total of 10:38¾ one second faster than the total time of Ella Ambulator's five-heater two years ago at Allentown. Last year Densmore was sick and after his last start at Phoenix, in which he piled up in front of the grandstand, he didn't look very promising as a candidate for future championship honors.

◈◈◈

Several new faces have appeared among the trainers at the Indianapolis track in the past couple of weeks, and the big training camp is a very busy place. One of the most recent arrivals is the Grand Circuit trainer, John Dickerson, who moved in with the Dickerman horses a few days ago. Dickerson turned the little chestnut trotter, Bonington 2:04¾, over to "Pop" Geers, bringing six head here, and will start some of these at the fair which takes place next month. Dickerson is very sweet on the trotting filly, Atlantica, that he is getting ready for the two-year-old events. This filly is by Atlantic Express 2:08¼, and out of the dam of Margaret Druien 2:04¼, breeding which should not interfere with her trotting fast. John states that she was a regular trotting "bear" early in the season, but some time ago she took sick and got a big setback. She is getting back to form fast now and it is the intention of Dickerson to start her at the Syracuse meeting in September. She has been a mile in 2:16 and John believes that she will trot in 2:10 before the season comes to a close. The three-year-old filly, Barbara King, by King Bellini and out of Helen Simmons, is a classy acting youngster and can trot fast. This filly, together with Harlem Express (2) 2:22, by Atlantic Express and Harvette, a daughter of The Harvester 2:01, are eligibles to The Western Horseman Stake to be decided at the Indiana State Fair, and in this trio the York State teamster has three likely acting youngsters. All have been miles around 2:16.—Western Horseman.

VOLUNTEER VIEWS THE HEADLINERS.

In writing of William last season I said that, phenomenon though he was, he needed full maturity to show his full capacity—that with the strength it should bring him behind his stroke and speed, he should eclipse all past pacing records. It was my reasoning that if he had done what he had then, in his then form, with the bone and sinew, the thews and muscles, of greater age and development, he would be irresistible.

I saw William for the first time this season—indeed, for the only one thus far, as I have not attended any of the subsequent Grand Circuit meetings, nor was it possible for me to see the great matches—during the inaugural of the "Big Ring" at Randall the week of July 20. I had learned the previous day when he was to receive his final work for his next week's race at Detroit, so I was on the firing line bright and early that morning, as I did not want to miss a move he made. When Marvin brought him out on the track for his first pipe-opener, I became excited immediately. So far as I recollect, I have no memory of any other champion race horse that had made such immense physical improvement from one season to the next. The William of 1914 had been a leggy, lathy, slim, almost angular colt, light-fleshed and with small suggestion of "substance." I now saw a truly magnificent stallion, a "living picture" of grandly developed masculinity. How he had broadened and strengthened and filled out and let down at every point! All appearance of lightness or lack of power had disappeared; instead he looked able to go either through or over a stone wall if one happened to cross his path. With it all, William had also taken on an added appearance of high breeding. His higher flesh and greater strength, instead of coarsening him, as is often the case with a stallion, had made him infinitely handsomer, of more aristocratic stamp and commanding carriage.

Altogether, he "took my breath away," as the saying goes; and after I had gladdened my eyes by feasting them upon him for a few moments, I turned to my confrere, "Marque," who stood near-by, and remarked to him: "There is a horse that LOOKS as if he could beat the world!" I print the word "looks" in capital letters because I emphasized it about that way, in order to express what I felt.

But—William's work that morning did not please the critics. He had previously worked the Randall track in 2:01¾, and it was the expectation that Marvin would set him down for a mile right at 2:00. However, as my watch caught them, his two fastest ones were in 2:02 4-5 and 2:03. There were no sensational bursts of speed, and the son of Abe J. seemed to slow down nearing the wire each time. To my eye Marvin was just riding along, not asking William for anything at any time; certainly not "stepping" him in any spot of place. But after the last mile the experts, almost to a man, gave it as their opinion that Directum I. would beat him at Detroit.

This opinion was intensified the second morning thereafter, when Murphy worked the son of Directum Kelly. The little chestnut stallion stepped two miles in 2:01 and 2:01¼ during the morning, with quarters around 28 and 28½ seconds at the end of each. I watched him from the upper deck of the timers' stand, and in one of those miles I thought once that for a piece of the way—from about the seven-eighths to the short distance—he was moving at a higher rate of speed than I had ever before seen a harness horse attain. His rush was terrific, the rapid fire of his hoof-beats being like the triple-roll on a snare-drum. In this respect Directum I. resembles his sire, Directum Kelly (4) 2:08¼, for he could, when at his best, cut loose and do an eighth or a sixteenth of a mile at almost a running-horse clip, giving the onlooker the impression of real "whirlwind speed." This work of Directum I.'s had an electrical effect, and the experts handed out the opinion: "Directum will win at Detroit, and win easily. He will pace right around William in the home stretch and beat him as he likes."

Personally, I did not feel so sure of this. And, as we all know, it took, so to speak, the "life" of Directum to beat William there the first heat in 2:00¼, the effort he made being so exhausting that it caused him to "cord" and in the next two heats he was the easy prey of his rival.

My impression of Directum I. at Randall was that he was a trifle light-bodied—a bit more so than I just liked to see. He is, of course, a small horse, and when drawn to fine edge, looks lighter-bodied than he really is. Still, he seemed, as I have said, a trifle lighter than he should, particularly considering the fact that he had not as yet faced the starter this season. I mentioned this to several horsemen who were watching him work with me, and they inclined to the opinion that he merely looked light in comparison with William—that he was "trained to the hour," whereas William was not, and that was one big reason why he would win at Detroit and William lose.

Certainly these two wonderful horses are the antipodes of each other. In conformation, size, style and stroke they have almost nothing in common except that both are pacers. Whenever they meet I am always in more or less of a "state of mind," for I cherish the deepest admiration for each, and hate to see either beaten! What marvels they are! Directum I. has beaten William in 1:58 and 2:00! William has beaten Directum I. in 1:58½ and 2:00! I consider that second match between them at Grand Rapids late last fall of little account as affording a basis for judgment of their respective capacities, for William had had no proper opportunity to prepare for it. In the previous race at the same place, a month earlier, he had beaten Directum I. impressively—but the Directum party claimed it was really the track that beat their horse. Well,—there's an old saying that you shouldn't have to carry a track around with a champion. But we may say that the two horses have met twice over tracks that were very hard and smooth and just to Directum's liking—at Columbus last year and at Randall last week. Directum won at Columbus and William won at Randall. But, in analyzing these races, it is to be said that William won his race much easier than Directum did his. And it is also to be said that Directum has not yet shown himself able to do what William has more than once—go out in front, make his pace all the way in each heat, and win. What the future will develop in the way of results enabling a definite judgment between the two remains to be seen—but at present William has all the better of the argument, and as he is by three years the younger of the pair, it is not unreasonable to believe that he will train on to performances surpassing all past ones; while, should Directum I. do so, it will be something of a surprise. In the nature of things, considering his age and all that he has done, he would seem more apt to do the reverse. Still, from such a horse the most amazing things are at any time liable to be forthcoming.

* * *

In the case of the pacing match, the "good big one" beat the "good little one," as, according to the old thoroughbred racing saw, he should have; but in the trotting match the exact opposite proved true, for here the "good little one" beat the "good big one." Peter Volo towers above Lee Axworthy just about as high as William does above Directum I., and proportionately he appears even more deep-girthed, muscular and powerful. This again illustrates the negligible value of racing axioms. When they "work" they are impeccable, of course—but there are so many instances in which they won't or don't work!

"One swallow does not make summer"—and, since the race, several horsemen have said to me, in discussing it, that they would not be at all surprised were the verdict reversed the next time the two colts meet. Yet it is difficult for such an opinion to be arrived at on the basis of the Randall result, for, assuredly, Lee Axworthy in it defeated Peter Volo most decisively. In the first heat he took him to the limit of his tether, and in the next two had him beaten before the ends of the miles were reached. There is only one thing to be said as an offset—namely, that Lee Axworthy had previously raced twice this season, whereas Peter Volo had not faced the starter, and that the former was ripe for the "race of his life," while the latter was not. In addition, Volo also covered quite a few mares in the spring, whereas, if I am properly informed Lee Axworthy did no service whatever.

In this connection I am reminded of the fact that back in the spring, when it was announced that Peter Volo, also Etawah, were to make stud seasons of something like fifteen to twenty mares each, I expressed the opinion that this feature was not one calculated to improve their outlook as performers—it being my conviction that "burning the candle at both ends" was costly. For my remarks I received at the time considerable criticism, some of it quite pointed, and various instances were cited of stallions that had made stud seasons in the spring and then broken records later that season. Such instances, though, can not shake my convictions for, in their cases, I believe that had all the powers of these stallions been conserved for the turf, instead of having been in part utilized at the stud, they would have made still greater records than they did. Still, so far as Peter Volo was concerned, I felt that perhaps less liberty was being taken with him than usual, on account of his being so robust and rugged; with, apparently, the constitution of a bear and almost unlimited physical ability. But after being driven out in 2:02 in the opener, he was unable to sustain the pace (29¾ seconds) set by Lee Axworthy in the first quarter of the second heat, and his break there was equivalent to his defeat, for that heat at least; while in the final, when it came to the decisive test at the head of the home stretch, he did not break, but he faltered, and it was "all over."

Previous to the race it was almost a superstition with horsemen that Peter Volo was unbeatable. At best they would concede Etawah to be the only living trotter with a chance to beat him, and that not now, Etawah being as yet far from ready for a race. But if one reviews turf history one will find, amid hundreds of thousands of race horses, that the number of "the unbeaten" can be counted on one's fingers, also that more than one of these few exceptions was favored by fortune, campaigned but to a limited extent, or something similar. So far as Peter Volo is concerned, it is to be remembered that he has now, in four succeeeding seasons, trotted in 2:19 at a yearling, 2:04½ at two, 2:03½ at three, and now, 2:02 at four. Flesh and blood have their limitations, and few are the lanes that have no turning. There has been, in all surety, no race horse ever foaled exempt from the operation of nature's laws. One may seem to be for a time, but in the end the inevitable happens. With me much of the fascination of watching the career of Peter Volo has been bound up with the question, How far will or can he go? The extremest early development is almost never accompanied by long-continued training-on capacity. By this I would not mean to intimate that Peter Volo has reached his limit. I think he has a chance to beat 2:02 considerably. But, on the other hand, it would not surprise me, and never will, for such a career to reach its zenith at any moment and then either sudden and swift or slow but sure "descent of the hill" begin. This is one reason why I am, have ever been, and always will be, strongly opposed to the development of yearlings and the extreme development of two-year-olds.

Regarding the two colts I have only this further to say—that both were faultlessly trained and driven by pre-eminent master-reinsmen, so there was no undue advantage for either on that score. From the standpoint of breeding, Lee Axworthy has, in my judgment, much the best of it, while I also consider him the better-gaited of the pair. And, while he is on the small side, he is the finer individual. In saying this my memory takes me back to an afternoon at Lexington, in 1906, when I stood watching his sire, Guy Axworthy (4) 2:08¾, cool out after the heat in which he took his record—and, curiously enough, he was driven to that record by Tommy Murphy, whose champion his son has now defeated! I thought then I had never seen a handsomer specimen of a young trotting stallion, hot with the heat of battle, than was the son of Axworthy 2:15½ and Lillian Wilkes 2:17¾. He, too, is not large—in size as well as bloodlikeness, son and sire, Lee and Guy, are much alike. Guy Axworthy was also a magnificently gaited trotter, but a "leg" sent him into retirement when he had only shown a flash of his quality. It is Hamburg Belle 2:01¼, the ill-starred daughter of Axworthy, that holds the world's two-heat and single-heat race record. Now Axworthy's grandson has taken the three-heat record. It "runs in the family," you see! When Hamburg Belle performed her unapproached feat, she beat Uhlan 1:58, who later on revenged himself upon her. Uhlan was by Bingen—and Bingen got Lee Axworthy's dam.

Still, some people say "there's nothing in breeding"!

* * *

Mr. C. K. G. Billings was one of the most keenly interested spectators at the two great matches at North Randall. It was his first visit to the harness races this season, and the result was a notable one, for within a few hours after the conclusion of the day's program he had become the owner of William 1:58½, whom he purchased from his owner-breeder, Mr. A. Earl Van Atta, of Otterbein, Ind., for the sum of $30,000 cash.

The news of this transaction will be received by all horsemen with acclaim. It is the general feeling, we think, that William has more than a fair chance to eclipse all existing light harness records before this season closes. He has already demonstrated himself a most marvelous race horse, having never been defeated except by Directum I., whom he forced to the world's race record of 1:58. He has disclosed himself possessed not merely of ultra-phenomenal speed, but of perfect manners, thorough gameness, and undeviating consistency—in fact, of all those attributes which go to round out an individuality practically unprecedented. The main question of interest about him now is, How fast can he go a mile under the most favorable conditions and with a special preparation? That Mr. Billings will utilize him specifically for this purpose is assured. William will go into the hands of trainer Charles Tanner as soon as he fills his engagement, made some time since, for the present week at Montreal, and will by him be pointed for an effort to beat all existing records "in the open." Not only will he be started to sulky, but it may be taken for granted that Mr. Billings himself will be seen behind him in an effort for a new world's wagon record. It is not improbable that these performances will be features at Lexington next October.

The passing of William into the Billings stable places him in companionship with Uhlan 1:58, Lou Dillon 1:58½ and The Harvester 2:01, the three world's champion trotters, and the feeling will be that he is "where he belongs." Truly, there is no other man identified with the light harness turf whom the general public regards as so fitting an owner for such a horse as William, as the man into whose possession he has now passed. We cannot, however, record this sentiment without saying also that from the purely sentimental standpoint, there is another man whom the public would equally have liked to see remain his owner "to the end of the chapter"—and that is the man who has just sold him. Mr. Van Atta was not known to the turf world at large until the advent of his wonderful colt, but since then he has gained the respect and esteem of the entire fraternity for his invariable sportsmanlike attitude in the management of William and the principles and ideals that have guided him. He did not desire to part with the horse, and had repeatedly refused very flattering offers for him; but, not being a man of large wealth, he did not feel that he could refuse the offer of Mr. Billings, particularly as it came from the source whence it did, which guaranteed the future of the horse that he had bred, that in turn enriched him and made him nationally notable, and for whose welfare he cherished the deepest solicitude.

That the man who has prepared so many champions for their highest achievements, capping the climax with the many record-breaking performances of Uhlan, is to have charge of William is another guarantee of his future. There is no man living who equals Charles Tanner in the fulfilling of such a task

[Concluded on page 12.]

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

ALONG THE YUKON.

When one mentions the Yukon river to the average erson it recalls the days of the mad rush of thou- ands in 1896-7-8 down this great stream to the rich old fields of the frozen North. It brings back mem- ries of the hardships endured along that pathway trewn with broken hearts and dismal disappoint- ments. Thrilling stories of those who packed their upplies and equipment at Dyea or Skaguay and ramped over the difficult Chilkoot pass in snow and ce on to White Horse for the spring opening, there o commit to the tender mercy of the swift running, ftentimes treacherous Yukon, a frail craft laden with human freight bound for the land of hope and treasure.

Owing to the uncertainty of the time of sailing the ittle town is crowded with people for at least two weeks. The opening of the shipping season is regu- ated by the ice jam in Lake LaBarge—a part of the iver through which the steamer must pass.

The steamers are the stern wheel type, built very nuch after the plan of the old Mississippi river boats except that their bows are square instead of pointed or rounded, the departure from the regulation ship being made on account of the boats being used to push barges of freight down the Yukon. Their en- gines burn wood and stop two or three times a day to "wood up" at the steamship "fuel" camps. At these points great piles of wood are kept on the river banks. There is no wharf and the steamer runs directly up to the bank. From four to five cords are taken at a time and while the loading is being done the passengers step ashore and spend their time gathering wild flowers and fighting mosquitoes.

Gathering wild flowers on the banks of the Yukon is a real joy despite the mosquitoes, for the most beautiful kinds grow there in abundance. The sea- son lasts only three months, but during that time bluebells, honeysuckle, wild roses, sweet peas and myrtle run riot over the hills and bloom even at the foot of a glacier. The ground is perpetually frozen and only about two feet thaws out during the summer season. The melting ice furnishes plenty of moisture and the warm sun does the rest.

A walk on the deck of the first boat will convince the traveler that all sorts and conditions of men and women make up the passenger list, for the first boat invariably carries gamblers and women of the half-world, as well as miners and supply dealers. As soon as the steamer pulls out the games are on in the smoking room, and before the boat reaches Dawson a number of men are "cleaned out" of money. Those who travel second class bring their own blan- kets and sleep in tiers of canvas strung up like hammocks. The space about them is also used as a baggage room for the luggage of the first-class passengers and for storing mail.

Getting on a sandbar is part of the Yukon pro- gramme, and this act generally begins on the first day out, and occurs at least once a day during the entire voyage. The river is constantly changing and a new channel is formed every year. All steamships carry huge poles, known as "shears," or sometimes called "ships' legs." When a sandbar is struck the pole is dropped off the slide and stands upright in the sand. A pulley is attached at the top, the en- gine is started and the boat lifted and swung forward six or eight feet. This process is repeated until the vessel is clear of the bar. During the jumping off process the passengers are sent aft in order to lift the bow. Soundings are taken with a gaily-colored pole until deep water is reached. The time spent on a sandbar varies from an hour to several days, and one of the boats actually remained on a bar for five days.

The boat on which the writer traveled reached Lake LaBarge late in the afternoon after a delightful June day. There the ice was from 10 to 18 inches thick and spread from shore to shore like a field of snow. The steamer pushed on while the sharp ice pounded savagely against the hull, which was built of 1½-inch planks. It scraped and cut the sides of the boat and buckled and formed little ice mountains over the lake. The steamer ran slower and slower until, after cutting through five miles, the captain decided he could go no farther in safety, so the steamer tied up at an uninhabited island to wait until the sun and wind would cause the ice to break. As soon as the steamer stopped the mosquitoes came on board and began their torments. Some of the pas- sengers rushed ashore and made fires of the drift- wood and sat around it to protect themselves from the pests.

All night and all the next day the steamer waited, and in the meantime the crew carried logs aboard and built an ice plow for the boat. The Vidette, a small boat used by the Northwest Mounted Police of the Yukon, was trying to reach Dawson with sup- plies, and she had started from White Horse a few hours later and was compelled to tie up at the island as well.

Late in the afternoon several people who were sitting on the upper deck saw a vessel steaming through the ice. It proved to be the Prospector com- ing from Dawson. She had fought her way through the ice. The Vidette instantly steamed up and crept out hugging the shore. At 8 o'clock in the evening, after twenty-four hours' delay, the first boat cast off and went into the ice. It was 11 o'clock when the sun set with that gorgeous coloring which the orb of day shows only in that northland. Red, yellow, pink and violet followed each other in quick succession and blended themselves together in indescribable beauty. The mountains and clouds caught the spirit of the light and when the sun had passed from view their shadows were picturesquely reflected in La- Barge's clear waters. It was a scene not soon for- gotten—the quick orders of the officers, the beating of the log plow against the boat, the noise of the breaking ice, and the stillness of the passengers who watched the opening of navigation in absolute si- lence.

Just beyond the lake is what is known as the sweepers—a swift current which is unusually danger- ous, especially for small boats, and during the early days many people lost their lives at this place. At times the water is so clear that the fish can be seen swimming about, but it gradually becomes darker as the steamer goes down stream, and at places is stained with the silt and decomposed moss carried down through the creeks from the moraines of glaciers.

Along the Yukon Nature is unmarred by the hand of man and in many places its banks rise to the dig- nity of mountains. Their slopes are well covered with spruce and birch, and the high sand banks are so honeycombed with martens' nests as to resemble miniature forts. The river is tortuous and at many places the current runs nine miles an hour.

Narrow gorges are entered and at the Five Finger Rapids (so called from the fact that four rocks pro- trude to a height of about forty feet from the center of the stream, dividing it into five channels) the pas- sengers are treated to the sensation of running the rapids between rocks scarcely twice the width of their boat apart. The place is considered extremely dangerous and boats coming up the river, in order to avoid being dashed against the rocks, pick up a cable fastened on the shore for that purpose, and by winding it around the capstan pull themselves up the rapids. The isolated rocks in the channel are the breeding places of gulls and other wild birds. At Fort Selkirk the Lewes and Pelly rivers join each other and make for the Yukon proper. There, in- numerable islands and hilly shores combine to make the scenery not unlike that of southeastern Alaska. Small settlements and Indian villages are sprinkled along the banks, and a little farther on, nestling on a flat at the foot of the Dome, lies Dawson, the Mecca of the gold hunter of 1898, and one of the greatest mining camps in the world—a town which sprang up over night and has passed through the various stages of life typical to a mining camp and finally settled down into a law abiding, sober little city.

After leaving that city wild life becomes plentiful and frequently the passengers are treated to the sight of a moose swimming through the waters or catch a glimpse of a black bear through the trees. Fifty miles below Dawson the river crosses the line from the Yukon territory into our own Alaska. The place is named Forty Mile, and is the pioneer mining town of the Yukon. Then follows Eagle, where there is a great wireless station owned by the United States Government. After many twists and turns Circle City, at one time the most populous settlement in interior Alaska, is reached. The rush to the Klon- dike, however, took away many of the inhabitants. In the creeks near this place such a large amount of mastodon ivory has been discovered that one of the creeks is known as Mastodon.

Farther down the stream broadens and the shores and small islands are dotted with Indian fishing camps, and very often on account of the steamer get- ting on a sand bar, the traveler gets a good view of the great strings of fish dried in the sunshine.

At Fort Yukon the river runs to the edge of the Arctic Circle—the true land of the Midnight Sun, as for several days in June the sun is never out of sight. At one time this place was an Indian trading post. After this come the Yukon flats, which spread out for at least 100 miles, after which Fort Hamilton comes into view. Thousands of geese may be seen on these flats. Rampart City—a place founded in 1897, is the next stopping point.

At present there is a hydraulic mining proposition in operation there which employs a large number of men, but the "city" is not attractive. At Tanana those who are going to Fairbanks change boats. The Government keeps a herd of reindeer at this point which is really worth going miles to see. Another amusement at this place is baseball, and in mid- summer the games are called at 10 p. m. and end between midnight and 1 a. m.

Below Tanana the current of the river increases and Kokrine is soon passed. Yuykup and Nulato, an Indian village, arouse the curiosity of the travelers, especially the latter, where the Indian women with tattooed faces come down to the wharf to sell curios. About this time there is a new arrival of mosquitoes and between bargaining with the Indians and fighting the voracious pests the traveler has a lively time. The majority of the settlements of the lower Yukon still retain their Russian names and life goes on much the same as it did under the Russian regime. At Kallag there is a Government station and a trail which is used as a short cut to Nome by mail carriers with their dog sleds in winter. From this place the river flows almost directly south to Koserfsky, then north- west to Andrefsky and into Behring Sea. St. Mich- aels, built on an island near the river's mouth, is reached through a channel between the island and the mainland and the traveler's journey is ended—a trip which though at times monotonous is never uninteresting.

SMALL BORE RIFLE CONTESTS, 1915.

The National Rifle Association of America has announced the prize winners in the Small Bore Short Range Outdoor Shooting League, in which thirty-four clubs participated from June 5 to August 7, shooting a match each week for ten weeks.

The winner of the matches is the Peters Rifle and Revolver Club of Kings Hills, Ohio, with a total score of 9,575. The members of the winning team are James Crawford, John Beedle, Forest McClung, A. D. Rothrock and Clarence Pierson. The Auburn, N. Y., Rifle Club finished second, score 9431, and third place was won by the Bucyrus, Ohio, Rifle Club, 9225. The Portsmouth-Norfolk, Va., Rifle Club, finished eleventh and won the first place and medals for Class B. The Kiowa Shooting Club of Des Moines, Iowa, gets first place and the medals in Class C, being twenty-first in the order of standing.

In the individual shooting nearly all the honors went to A. D. Rothrock, of the Peters Club. He had a total score of 1942 out of a possible 2000. He made the highest aggregate score in rapid fire, 991, but as under the conditions of the matches he could take only one medal, the prize for the best rapid fire goes to his club-mate, Forest McClung, who scored 980. The medal for the highest aggregate slow fire was won by J. Patterson of the Hydraulic Pressed Steel Co. Rifle Club, of Cleveland, Ohio, total 963. Sixty men fired in every match and made 80 per cent or better of the grand aggregate. Only one competitor mad the possible at slow fire, J. H. Cole, of the Auburn club. In rapid fire shooting, Rothrock made 5 possibles; McClung one; Beedle two; Stebbins of Auburn, 2; Lane of N. Y., one; Shapley of Auburn and Bork of Fremont, one each.

Final standing of clubs:

Order.	Name of Club.	Aggregate Score.
1.	Peters R. & R. Club	9575
2.	Auburn Rifle Club	9431
3.	Bucyrus Rifle Association	9225
4.	Rifle and Revolver Club of New York	9211
5.	Fremont Rifle and Revolver Club	9196
6.	St. Louis Colonial Revolver Club	9026
7.	Meeker Rifle Club	9006
8.	Pittsburgh Rifle and Revolver Club	9002
9.	Fort Harrison Rifle Club	8982
10.	Hydraulic Press Steel Rifle Club	8902
11.	Portsmouth-Norfolk Rifle Club	8889
12.	Cypress Hills R. & R. Ass'n	8853
13.	Canton Rifle Club	8814
14.	Ashburnham Rifle Club	9653
15.	Citizens' Rifle and Revolver Club	8567
16.	Dallas Rifle and Revolver Clu...b	9548
17.	Toledo Yacht Club Rifle & Pistol Ass'n	8445
18.	Milwaukee Rifle and Revolver Club	8366
19.	Nogales Rifle Club	8330
20.	Shawnee Rifle and Revolver Club	8283
21.	Kiowa Shooting Club	8268
22.	Niskayuna Rifle Club	7857
23.	Lewiston-Clarkston Rifle Club	7846
24.	South Chicago Rifle Club	7727
25.	Quincy Rifle Club	7532
26.	San Simon Rifle Club	7451
27.	Black Hawk Rifle Club	7440

CALIFORNIA CLUB WON.

The Los Angeles Rifle and Revolver Club proves the winner of the inter-club military match shot by rifle clubs between July 17 and 31, according to an announcement of the National Rifle Association. The Los Angeles club made a total score of 2,294 of the possible 2,500. Twenty-five clubs competed, ten men on each club, under service conditions, each man firing ten shots at 200 and 300 yards rapid fire and 300, 500 and 600 yards slow fire. The members of the winning team are E. C. Crossman, H. C. March, Dr. L. Felsenthal, I. O. Gardiner, D. R. Dickey, W. R. Jackson, E. D. Neff, A. F. Goldsborugh, R. J. Frazer, W. H. Hansen, G. L. Wotkyns and A. L. Thompson. Wotkyns made the highest individual score, 243. He and Dickey were the only men to make the possible 50, at rapid fire. Dickey shot a military rifle for the first time about a month before the match. The Phoenix, Arizona, Rifle Club, which finished second, beat out Los Angeles at the 300 and 500 slow fire and the 200 rapid fire ranges. The Fort Pitt Club of Pittsburgh led all teams at 500 yards. The National Board for Promotion of Rifle Practice will give a

trophy and decorations for the winners. The scores of the clubs are as follows:

Los Angeles 2294, Phoenix 289, Fort Pitt 2287, Quinnipiac, of New Haven, 2260; Kane, Pa., 2252; Gisholt, Madison, Wis., 2251; Seattle 2250; Hoosier, Indianapolis, 2237; Nogales, Arizona, 2208; Douglas, Arizona, 2188; St. Paul 2175; Bucyrus, Ohio, 2167; Fremont, Ohio, 2156; Rocky Mountain, Butte, 2152; Manhattan, Nevada, 2116; Salt Lake City, 2081; Port Clinton, Ohio, 2066; Albion, Ind., 2063; St. Augustine, Fla., 2015; Stanton, Neb., 1983; Newark, N. J., 1693; Garfield, Utah, 1616; Honolulu, Hawaii, 1565; Bladen, Neb., 1479, and Engineers, Cleveland, 1316.

GRAND AMERICAN HANDICAP.

The greatest trap shooting tournament ever held, to date, was the sixteenth Grand American Handicap of the Interstate Association, held at Grant Park, Chicago. Weather conditions throughout the shoot were generally cloudy and cool. More or less high winds prevailed each day during the week's shooting. Some shooters found difficulty in shooting over the water, with others the situation did not make much difference. The fluctuating averages from day to day and many low scores can be laid mainly to windy conditions at different times. A grand total of 282,473 targets were trapped during the shoot. Nearly 900 shooters in all took part in the different events.

Seven amateur shots: Tom Wilkes, of San Francisco; H. M. Williams, U. S. N.; Harry Ogelvie, of Lindsay, Cal.; P. H. O'Brien, of Portland; Frank Troeh, of Vancouver, Wash., and C. E. McKelvey of Seattle, with Clarence A. Haight and P. J. Holohan, represented the Pacific Coast.

The number of entries and amounts paid winning shooters follow:

Division of Purses.

Grand Park Introductory, August 16—235 entries at $16.00, $3,760. Added by Interstate Association $100—Total purse $3,860.00. Forty-eight moneys, divided among 57 high guns:

W. S. Hoon, 196, $386.; S. A. Huntley, 195, $347; Wm. Ridley, 194, 270.20; J. E. Harker, 194, 270.20; E. B. Eaton, 193, 173.10; Mark Arie, 193, $173.10; six 192's, $83.65 each; three 191's, $77.20 each; four 190's, $38.60 each; nine 189's, $38.60 each; nine 188's, $38.60 each; five 187's, $38.60 each; eight 186's, $24.10 each.

Chicago Overture, August 17.—219 entries at $13.00 on targets, $2847.00. Added by Interstate Association $100.00—Total purse $2947.00. Twenty-two moneys divided among 32 high guns:

H. J. Rebhausen 98, $383.10; S. A. Huntley 97, $294.70; Wm. Wettleaf 97, $294.70; Wm. Foord 96, $221.00; P. J. White 96, $221.00; seven 95's, $125.25 each, eight 94's, $58.95 each; eleven 93's, $5.35 each.

Purse on scores made on each frame of 20 birds, 219 entries at $2.00 each, $2,190.00. Event 1—three 20's paid $48.15 each; twenty-four 19's paid $12.20 each. Event 2—twenty-seven 20's paid $16.20 each. Event 3—twenty-one 20's paid $20.45 each; thirty-three 19's paid $19.25 each. Event 4—nineteen 20's paid $21.65 each; thirty-four 19's paid 70 cents each. Event 5—thirty-four 20's paid $12.90 each.

National Amateur Championship, double targets, August 17—88 entries at $8.00, $640.00. Added by the Interstate Association $100. Total purse, $740.00. Sixteen moneys among 18 high guns:

G. V. Dering 91, $118.40; M. Arie 90, $103.60; S. A. Huntley 87, $81.40; W. Ridley 84, $66.60; three 83's, $57.80; one 82, $37.00; one 81, $37.00; two 80's, $25.90; three 79's, $19.70; four 78's, $7.40 each.

National Amateur Championship, single targets, August 18—14 entries at $10, $140. Two moneys divided among three high guns: C. H. Newcomb $84.00, R. A. King and A. B. Richardson 98, $28.00 each.

Preliminary Handicap, August 18—653 entries at $5.00, $3,265.00, 36 entries for targets only (689 entries). Added to the purse $100.00—Total purse $3,365.00. Fifty moneys, divided among 84 high guns:

R. H. Morse 95, $336.50; E. Schendel, C. A. Gunning and G. T. Mackie 94, $269.70 each; five 93's, $134.60 each; ten 92's, $50.45 each; twelve 91's and eighteen 90's, $33.65 each; thirty-five 89's, $1.00 each.

Grand American Handicap, August 19-20—751 regular entries at $8.00, $6,008.00; 80 penalty entries at $13.00, $1,040.00; 53 forfeits at $5.00, $265.00 . Added by the Interstate Association $500—Total purse, $7,813.00. Fifty moneys, divided among 68 high guns, the first four moneys were decided by shooting off the tie, in the order named below:

L. B. Clarke	18	96	$781.30	$781.30
M. E. Dewire	18	96	703.15	703.15
J. J. Randall	19	96	625.05	625.05

Consolation Handicap, August 21—270 entries at $5.00, $1,350.00. Added to the purse, 100—Total purse $1,450. Fifty moneys, divided among 53 high guns:

H. Hammersmith 91, $145.00; S. Lever 91, $130.00; seven 90's, $65.25 each; three 89's, $29.00 each; six 88's, $19.35 each; eleven 87's and ten 86's, $14.50 each; fourteen 85's, $11.40 each.

At the Traps

Salinas Shoot.—One of the best shoots in the history of the Salinas Rodeo Gun Club was held Sunday over the traps at the Sherwood Park, writes a correspondent. Three good prizes were awarded the top liners and a fine feed was given everybody. Fred Chappel was high man with a total of 46 birds out of a possible 50. The other prize winners were Frank Pura with 45 and David McFadden with 44. The rest scored in the following positions: V. Massera, Fred Thoicke, Dr. Chappel, Charles McFadden, A. G. Winckler, W. H. Collins, Arthur Horton, Henry Gross, Frank Casey, and Frank Kattner. Other shoots will be held from time to time.

* * *

Chicago Women Trap Shots.—Women have gone in for trap-shooting to such an extent that five who reside in Chicago have not only become expert, but defiant. They claim they form the champion team of the entire world and any group of women who think they can shoot straighter can get an argument by communicating with Mrs. L. M. Featherston.

Captain Featherston issued a defi to the world after her team broke 199 of 250 targets in a telegraph match against a team of Wilmington, Del., women shots. The Wilmington women broke 169 of 250 targets. The teams shot in Chicago and Wilmington and the scores were telegraphed. It was the first shoot of the kind ever held among the fair sex.

All the members of the Chicago team are married. They have household duties to look after, but manage to take enough time away from their homes each week to keep in practice.

Some of the women can shoot better than some of the men of the country who rank high. In the telegraph shoot Mrs. Harold Almert of the Chicago team broke 25 flying targets in succession. She broke 21 of the next 25, making a score of 46 out of 50, despite cloudy weather and a drizzling rain.

* * *

Garden City Traps.—George H. Anderson was high gun with 94 birds out of a possible hundred in a shoot conducted August 29 by the San Jose Blue Rock Club. O. N. Ford broke up 93 and Clem Arques came third with 90. Arques' shooting was featured by a nice run of 30 straight. The score:

O. N. Ford 93, George H. Anderson, high, 94, C. R. Arques 90, S. A. Smith 88, A. J. Lewis 85.

Doubles, 12 pair—George H. Anderson, 21; O. N. Ford, 21; C. R. Arques, 15.

The San Jose Blue Rock Club will turn out in force tomorrow and Monday during the two day registered shoot. There will also be a large attendance of shooters from other points.

* * *

Back Again and Welcome.—Jack Fanning, accompanied by Mrs. Fanning, is due in this city any day now. Jack attended the Grand American Handicap in Chicago and writes that he expects to spend a couple of months "in his old home town." He was here last in 1910.

While here he will give the boys opportunity to examine the Du Pont Try Gun—a device guaranteed to fit any shooter. He will also demonstrate what can be done with a hand trap.

* * *

Live Bird Shoot.—The California Wing Shooting Club will hold the final shoot for the season of 1915 at the Sobrante grounds today.

FISH LINES.

A delegation of members of the California Anglers' Association superintended the restocking of Sonoma county trout waters last Saturday. About 300,000 steelhead and rainbows were liberated in Sonoma creek branches in Graham, El Verano and Nunn's canyons, Salmon and other creeks reached via Bodega roads. Near Cazadero, Ward, Austin, Pole mountain and other creeks were looked after. Stewart's point, farther up the coast, was also a base for distribution of troutlets in near-by streams. From Cloverdale cans of young rainbows were taken on to the Geysers for transplanting in Big and Little Sulphur creeks.

Long-distance outing trips are now in vogue. Nat Boas and Ned Bosqui returned last week from a machine tour of Oregon, Washington and Idaho. All of the well-known waters of those regions were sampled with profit and much sport. Dave Sachs, another Waltonian, is very enthusiastic over angling sport to be found in both the Rogue and McKenzie rivers in Oregon. In the cold waters of the Rogue, trout scaling ten pounds and more can be taken; fighting demons they are, too. The home-town anglers of that district wade out breast deep in the rapid river, where they can get at the big fish. The McKenzie offers a different phase of rod and line application—sport flavored with an element of excitement. Ten and fifteen mile stretches of the swift and turbulent stream are fished from a flat-bottomed boat. The big skiff, in charge of a boatman, is launched from the bank. Once in the current, there is no going back. Down stream, through splashing rapids and whirling eddies, casting here and there until the landing point is reached. The trout in that ice-cold river are large and game fighters. The trip down stream is sensational and there is something doing all the time. Trout are plentiful and a good angler can have a most enjoyable fishing trip. The trout in the two foregoing mentioned rivers, compared to Williamson river fish, are as canvas to cotton. The latter trout are neither as solid nor as full of fight, good as the reputation of the Williamson is. A trout was taken on a No. 4 Wilson spoon in the Williamson recently that measured thirty-three inches in length and weighed thirteen and a half pounds, caught by a Klamath Falls angler.

E. B. Jones and C. F. Breidenstein started by machane on a month's outing trip, September 1, for Big Meadows, thence to Fall and Pitt rivers, on to the Klamath Falls fishing streams, after which the Rogue and Mackenzie rivers will receive attention. Crescent City and vicinity will take up a week, and the jaunt will wind up on Eel river.

* * *

A letter from J. A. Morrill, of Fort Seward, states: "Just returned from a trip to North Eel river near its source. Went to ascertain just what were hunting and fishing conditions and how the trip can be made.

Found the fishing excellent. While I did not catch any extra large fish, I had no trouble in catching the limit of trout averaging six and eight inches, most of them by casting with fly patterns. In some of the larger holes where the water was deeper I caught some with salmon spawn for bait. This was in the west branch of the North Eel river. In the east branch I am told the fish are larger and more plentiful. Also in the upper Van Duzen the fishing is equally as good and the trip can be made in about the same time.

Deer and grouse are quite plentiful and after September one should have no difficulty in bagging the limit. There are some large bucks and they are in good condition.

Arriving on No. 2 train the trip can be made leaving Ft. Seward early following morning by team, arriving Zenia about noon or a little before, where horses are available and guide for the remainder of trip, which is made in about two or three hours, allowing some good fishing in the evening of the first day from Ft. Seward, or for hunting, as may be desired. Leaving the river about 4 p. m. the return to Zenia will be made before nightfall, and from Zenia early next morning train No. 1 can be made. This, of course, is figuring on a brief week-end trip, and I consider it well worth the trip.

For a party of four or more the fare for special trip is $1.50 each way between Zenia and Fort Seward. The charge for saddle horses is $1.00 per day, and for the guide $2.00 per day."

Salmon fishing outside the Heads has been good the past fortnight. A fleet of about 100 boats is out last Sunday. Possibly that many trolling ats will go out again today and tomorrow, for good tches were made all through the week. Among caers Terry Evans landed a 52and a 38 pound salmon nday. Joe Hickingbotham and Toots Schrader's at, trolling off Bolinas bay, caught sixteen fish nning from 6 to 42 pounds, and also a large skate, a bass and a big string of rockcod.

The run of salmon still continues off Santa Cruz. m Flynn and Percy Henderson of this city made te catches several days last week. A. Raht caught elve last Wednesday. E. H. de Selms picked up 36-pounder the same day.

GOSSIP FOR SPORTSMEN

Wednesday, September 1, was the date for the ening of the deer season in game district No. 4, hich district embraces the Southern California unties. The whole State is now open for the opera- on of deer hunting sportsmen—with the exception exactly 732,720 acres of land where wild animals d birds can exist without molestation by the man ith the gun.

The preserved area, while created primarily for the nefit of the game which it protects, is also designed r the safety of campers and summer sojourners in ie mountains and timbered sections. Resort keep- s were interested in the passage of such laws to iminate the dangers arising from hunting game ose to their grounds and also along mountain roads. he preserved area was doubled by the last Legisla- ire at the instigation of the State Fish and Game ommission.

The acreage of the six preserves is as follows: Trinity National forest, 66,650 acres; National Pin- acles forest, in San Benito and Monterey counties, 4, 080 acres; California Redwood park, Santa Cruz unty, 4600 acres; Cleveland National forest, San rnardino county, 98,840 acres; West End National ngles reserve, San Bernardino and Los Angeles unties, 321,360 acres.

The law provides that no wild creature, excepting redatory animals and birds, may be hunted or killed the foregoing preserved areas—for such hunting pecial permits must be secured either from the State fficials or the Federal forest rangers. Furthermore, is unlawful to carry killed game, a buck, for in- tance, through or over any of the preserved terri- ory, even if killed outside of these boundaries. Fish- ng, however, is permitted in the reserves under cer- ain restrictions.

* * *

The predatory animal clause in the State law de- elops the fact that jack-rabbits cannot be hunted vithout securing a hunting license. In the list of o-called predatory animals the long-eared jack does ot appear, nor is the animal mentioned in the peri- ds of close or open seasons. The license law, how- ver, specifies that hunting for wild game requires license, but does not list the animals and birds ommonly regarded as wild game. The ruling, there- ore, is, that as the jack-rabbit is not classed as a redatory animal, it will be necessary to have a hunt- ng license to bag the long-legged bunnies.

* * *

The dove season for every county in the State will pen September 1 and close December 1—three nonths' duration—with the daily individual limit bag laced now at fifteen birds. The birds have been lentiful in many districts, particularly in Colusa and Yolo counties. The open season for tree squirrels (12 per season is the limit) and sage hens (four per lay or eight per week, limit bag) also begins Septem- ber 1. Mountain quail and grouse — ten mountain quail per day, or twenty a week, and four grouse or eight a week—can be shot in game districts No. 1 and No. 23, from September 1 until December 1.

* * *

The records of the past two weeks do not show any noticeable increase in the shipment of deer car- casses sent in by hunters. Nor have many bucks been accounted for by hunters returning in automo- biles. Reports from numerous deer hunting districts are that deer are fairly plentiful, and many hunters have bagged one or two bucks.

It has been intimated in this respect that venison in suit cases, bags and boxes may have been brought in. There is no question but what the new provision in the deer law is regarded as inconvenient and cum- bersome. Every person taking or killing a deer must retain in possession, during the open season, and for ten days after the close of the open season, the skin and portion of the head bearing the horns, and must produce the same upon the demand of any officers authorized to enforce the game and fish laws. Many hunters would forego a trip rather than be bothered with a slimy, strong-smelling hide for the length of time specified.

It must be remembered also that the new law pro- hibiting the killing of spike bucks is now in full force. This provision may lead to future complications from the fact that some deer horns are abnormal in growth—bucks old enough for carrying forked horns or three pointers have been killed with but two straight horns sticking up like tines on a pitchfork.

Deer hunting in Humboldt county in the Mad river country has been excellent. H. L. Miller and party were camped for a month near the junction of Pilot creek and Mad river, where both fishing and hunting was good. Miss Jean Miller bagged a forked horn one day last week. Other members of the party also killed bucks. Hunting parties from Eureka have al- ready bagged many bucks. The Junction City dis- trict, in Trinity county, is reported to be full of deer. Deer also abound, according to the game wardens, in Plumas, Yuba and Sierra counties.

All of the extreme northern counties report an abundance of wild life. Forest fires have been fewer this season, up to date, than in many past years, with the result that deer have not been forced from the natural feeding grounds.

As the deer hunting season progresses, more and more hunters report bagging bucks in the various mountain hunting territories. Conventional stories have been told repeatedly by nimrods who have spent a vacation bent on securing a fine deer head and so many pounds of venison jerky—the regulation re- wards of a successful hunt for the city man. Aside from that odd things happen between times with devotees of the chase, and, further, bucks are bagged in other ways than by impact of a rifle bullet, and the venison tastes just as good.

Mrs. R. Mills of Kenwood, who was recently enjoy- ing a summer outing in the Horicon district, Sonoma county, went out in the woods one morning, accom- panied by her dogs. A fine large buck was jumped by the animals and soon stood at bay in a creek. Mrs. Mills managed to lasso the deer and fastened the rope to a tree, securing the captive buck until she secured assistance. The buck was dressed in due course and disposed of in the usual manner.

Chico hunters have for several years past endeav- ored to lay low a club-footed buck which ranged through the Pine Creek country. H. Powell of Marys- ville did the trick last Sunday. The animal had been shot at many times previously, and when slain a bullet hole through the forked portion of one horn was noticed—which hole, of course, must have been made this season.

Two San Rafael sportsmen were reported to have undergone the nerve-racking experience of being treed by a bull. County Clerk R. E. Graham and Probation Officer Thomas O'Connor (the latter wore a red sweater) were out for a hunt on the Victor Gun Club preserve Saturday. Taking a short cut to camp towards evening through an enclosure where cattle were grazing, they were charged by an enraged bull. The hunted hunters took refuge in a tree—and re- mained there, it is stated, until midnight. Their friends in camp became anxious over the non-appear- ance of the two marooned hunters and organized a searching party composed of Max Blum, John Saun- ders, Jim Owens, William Jones and R. H. Cochrane and several other prominent San Rafaelians. The shooting of guns and reply shots soon brought the searchers and perchers together. It quickly devel- oped that Mr. Bull had departed and a peaceful old cow and several calves were camped out under the tree!

Ed Gautier killed a spike buck illegally in Sonoma county. He was arrested, tried, convicted and sent to jail for fifty days, in lieu of paying a $50 fine imposed by Judge Phillips of Santa Rosa. The deer carcass was turned over to Sheriff Smith, in con- formity with the usual custom of either destroying confiscated game or giving it to some public institu- tion. Gautier in due course enjoyed a big dish of the venison stew fed to the prisoners.

This incident happened near Butte Meadows, near Chester: Mrs. Blank, with her husband, went deer hunting the opening morning in that district. The fair Diana became separated from her husband and wandered back to a spot near their camp. She saw what she thought were two big deer standing in a clump of brush near by. Up went her rifle and two quick reports rang out. The "deer" dropped in their tracks. Quickly reaching the fallen quarry, she found two dead mules! They were her husband's mules.

A party composed of W. Henfield, M. McGrey, Frank Ambrosio, George Wilson and I. Cox returned to Monterey after a two weeks' hunting trip below Slates Hot Springs on Big Creek. Three deer killed, the treeing of one hunter by a mountain lion, a fall by another of the party while on horseback sixty feet down a rough mountain side, neither man nor horse receiving more than minor injuries, made an itinerary of adventure and excitement.

A party of eight San Franciscans returned last week from a hunting and fishing trip in the Coast range mountains of Tehama county, where for two weeks they enjoyed excellent deer hunting and good trout fishing. The vacation outing was at Burnt Camp, a meadow tract of forty acres just under the peak of the South Yallow Bolla. From that point hunting trips were made to Harvey Ridge, Squaw Camp and Toomb's Pocket. In all, twelve fine bucks were brought into camp. Fishing was found, with considerable traveling, in the Cottonwood and Sul- phur creeks.

The party in the mountains included not only the San Franciscans but several residents of Corning, Tehama county, who packed in to the mountains with the visitors. The crowd of sportsmen included Godfrey Eacret, Ed L. Hoag, Frank P. Roop, Charles S. Howard, Perry Graves, Willie Ritchie, Doc Gene Jeffery and Harry B. Smith, of San Francisco; W. Herbert Samson, Supervisor of Tehama county; George Alexander Hoag, Cecil Million, Vernon Flour- noy and Bert Beaumont, all of Corning, Cal.

A part of the journey was made by automobile, and the balance of the rougher traveling with pack train.

Hoag was the leading man in a one-act bit of wild- wood comedy entitled, "The High Buck." One of the party came across a dead deer one afternoon, a buck that had been mortally wounded and escaped from the hunters only to succumb in the lonely brush section where it was found. The finder dragged the carcass over to an open spot, within easy view of a a trail leading by. Early next morning a hunting party was made up and the boys went away under the lead of the deer finder. Suddenly a signal from the leader brought the party to a halt. Cautioning them to be silent, the guide pointed to a buck appar- ently standing in the brush, with head and shoulders exposed. Hoag was selected to shoot, and after careful aim he fired. "A little higher, Ed," said the Guide. Another shot. "Just a bit too low," he was told. The next shot was effective—it cut the string holding the head in place. Rushing forward, elated with his good luck, Hoag stopped suddenly within ten feet of the dead buck—and held his nose. He rejoined the party looking rather sheepish, the joke was on him.

* * *

All special deputy fish and game commissioners in this State have been recently notified that their offices have been abolished and that hereafter no one will have the authority to represent the com- mission in police work except the regularly appointed and salaried field deputies or members of the forest ranger service. The badges and certificates of spe- cial deputies have been called in.

THE BULLDOG AND HIS ORIGIN.

The origin of the bulldog for a long time has been a matter of controversy, although the origin of the name has been easy to find. It comes from the dog that was used for bull baiting, a sport that was popu- lar some years ago. In attacking the bull the bulldog always attacked him in front and usually fastened to his lip, tongue or eye and would hold on in spite of the strenuous efforts of the bull to shake him off.

Puppies of six months of age were sometimes tried against a bull to see of what mettle they were made, although a dog was not thought ready for his best work until he was 15 or 18 months of age and would not reach his prime until 4 or 5 years. The bulldog of today is usually well past his prime at five years of age. This undoubtedly has been brought about by inbreeding in order to get perfect show specimens and as a result their constitutions weakened.

Of course there are many exceptions, as some bull- dogs are in splendid condition and health at a ripe old age, but the dog as a rule is one of the shortest lived of dogs. Many writers are of the opinion that the bulldog is of British origin and a descendant of the dogs which were used by the Britons in their wars with the Romans. This is undoubtedly true and both the English bulldog and the mastiff owe their origin to these dogs.

Probably no other breed of dogs is as universally popular as the bulldog. In England there are up- ward of a dozen bulldog specialty clubs, and in this country a number of powerful organizations are working for the welfare of the breed. The bulldog is one of the most courteous animals living and will bear pain with endurance that leads one to believe they are less sensitive to pain than any other living creature. This wonderful fortitude or courage has been inherited from their ancestors.

Those who do not know the disposition of bulldogs as a rule hold them in horror, for their appearance is against them. The fact is they do not know the dog's nature. A bulldog is one of the most docile of dogs, and as a companion or pet of children would be hard to equal.

They are of a very quiet nature and can be kept in a thickly populated section without annoyance to others, as they seldom bark and are not the kind to roam all over the neighborhood looking for trouble.

The English bulldog never has been more popular than he is today and never has been more highly valued. The bull ring has long since been put out of existence, but the bulldog is here to stay and is gain- ing in popularity every day.

The general appearance of the bulldog should be that of a smooth coated, thick set dog, rather low in stature, but broad, powerful and compact. Its head is strikingly massive and large in proportion to the dog's size. Its face extremely short, muzzle broad, blunt and inclined upward.

The body is short and well knit, the limbs stout and muscular, hindquarters high and strong, but rather lightly made in comparison with the heavy fore parts. The dog must convey an impression of determination, strength and activity similar to that suggested by the appearance of a thick set Ayrshire bull.

FIXTURES.

Registered Tournaments — Pacific States and Territories:

September 5-6.—San Jose Blue Rock Club, O. N. Ford, Secretary.

September 6—Tacoma Gun Club, Tasoma, Wash., "Old Policy"; Carl Coon, Secretary.

September 13, 14—Omaha Gun Club, R. D. Vaught, Sec? retary-Manager, Omaha, Neb.

September 24—Medford Gun Club, Dr. E. R. Seely, President, Medford, Ore.

September 27—Portland Gun Club, J. A. Addleman, Secretary, Portland, Oregon.

October 4, 5—Roswell Gun Club, E. P. Malone, Secretary, Roswell, New Mexico.

November 4—Williams Gun Club, F. E. Lowe, Secretary, Williams, Ariz.

November 5, 6, 7—Arizona State Tournament, under the auspices of the Tucson Blue Rock Gun Club, W. A. Julian, President, Tucson, Ariz.

EARLY HOLSTEIN-FRIESIANS IN AMERICA.

Over three years ago the secretary of the Holstein-Friesian Association of America, F. L. Houghton, asked me to write what I knew of the early history of the breed in this country leading to the formation of the association. I was personally acquainted with his father, Charles Houghton, the first secretary, and W. W. Chenery, the president and founder. I also was intimately acquainted with Thomas E. Whiting and the facts that led to the controversy resulting in the Dutch-Friesian Society.

Many of the largest interests in the world have sprung from chance and grown from very small beginnings. The present status of Holstein-Friesian cattle is an instance. Although Dutch cattle were brought to New Amsterdam, now New York, by early settlers, they did not attract attention outside that state until the late '60's. A few years previously (I cannot learn the exact date) a captain of a sailing ship retired and went to Waltham, Mass., to make his home, taking with him a Dutch cow that he had carried on long voyages to supply milk for the ship. He disposed of her in 1852 to W. W. Chenery, a wealthy wholesale liquor dealer of Boston, whose residence was in Waltham. The cow proved so good that Mr. Chenery decided to send an order to his Holland gin agent in Amsterdam to select two cows and one bull to send to him. In 1859 he sent another order for four more cows. These, with all their progeny except a bull, were destroyed by Massachusetts officials because they had contracted pleuro-pneumonia.

Not discouraged by his misfortune, Mr. Chenery made another importation in the fall of 1861, consisting of four cows and one bull. These cattle all being black and white, he was led to believe that it was the distinguishing and true color, hence the color-line rule. Mr. Chenery's interest in the cattle increased and he exhibited them at the leading New England fairs, where they attracted great attention. He finally decided to form a society for registering them, not for personal gain, but because he believed they would become of great value to the animal industry of America. The first volume of the herd book was published in 1872, recording 61 bulls and 67 cows.

These particulars I learned from Mr. Chenery in the many interviews I had with him in the '70's, after I took charge of the Russell herd. I knew nothing of the breed until Thomas E. Whiting, also a Boston merchant, returned from a pleasure trip to Europe in the summer of 1871 and brought five cows and one bull direct from Holland to my farm in old Concord, Mass. He applied for registry in the Holstein herd book, and Mr. Chenery came to inspect them. After looking them over he turned to Mr. Whiting saying, "You have a fine lot of cattle, but only two are eligible to registry under our rules." Two of the cows were of the regulation black and white; one, a very nice one, was red and white, one was steel gray, and one a sort of pumpkin and milk color. The bull was solid black except for a white shield in the face, and white legs, belly and end of tail. The cows came from the best districts in North Holland—Beemster, Midwoud, Halem Meer and vicinity. The bull was from the extreme north—Groningen—and Mr. Whiting told me that the color of the bull was the prevailing color in that district.

Knowing nothing previously of the color line, Mr. Whiting had given attention only to quality and individual merit in making selections, and being rather hot-headed he flew into a passion at once and said to Mr. Chenery, "You can take all or none." At that time I had no idea of having anything to do with the breed personally and took little interest in the controversy that followed, though I was compelled to listen to Mr. Whiting's side of it, as he made his home with me during the following six months. He declared that not only was the name Holstein wrong, in fact a misnomer, but that all colors were found in Holland and no difference was made in value because of color by the best breeders.

After a while Mr. Whiting decided to register the two cows accepted by Mr. Chenery, and later Mr. Chenery consented to take in the bull also, hoping in that way to pacify Mr. Whiting, though instead of being pacified he grew more bitter. He finally disposed of the whole lot and went for a second. As I remember he bought all of his second importation in Friesland, and came home with the idea of starting a new society with the proper name—Dutch Friesian.

Until I took charge of the William A. Russell herd in Massachusetts in 1872 I had always believed the milking families of Shorthorns the best dual-purpose dairy cows, but the result of judicious treatment of Holsteins at Andover changed my mind. I believed that a profitable trade could be worked up in the middle west, and with Mr. Chenery's help I persuaded Mr. Russell to let me try for it. My three successful trips to Illinois in '73 and '74 interested him, and he determined to send me to Holland to select a herd. His only instructions were: "Get quality regardless of cost."

The information that I had previously gained from Mr. Whiting was of considerable assistance to me, and during my first trip I had an opportunity to get facts and decide which one was right in the controversy between him and Mr. Chenery. I found that in the matter of name Mr. Whiting was right; although some of the North Holland cattle may have descended from Holstein cattle, the Dutch farmer and the environment had transformed them into a highly improved breed, and Friesian was a more proper name; but Dutch or Hollanders was still more proper than Friesian, because while excellent cattle are found in Friesland they are no better than those in other districts; in fact, I found a higher average in Edam, Beemster, Midwoud and adjacent low-land districts.

In the matter of colors also Mr. Whiting was in a measure correct. I found them quite varied, the black-and-whites in the majority, but steel grays and red-and-whites quite numerous and as highly valued as any. The red-and-whites were prized particularly because of better form—smoother and finer; and I was told that their milk averaged richer and that the district of Gelderland was their proper home.

Because of my favorable experience with the red-and-whites, I fully determined to go to Gelderland and select a herd and bring it to Aurora. But the panic of '84 and late '86 delayed me, and on closing out my herd in '94 I gave up the idea.

The red-and-white blood is so strong in some strains of so-called Holstein-Friesians that it still crops out occasionally, and I have yet to see a poor cow among them. I still contend that if the organizers of the Holstein society had made quality and performance instead of color the standard, the breed would have made more rapid progress in public favor, as then importers would have been more careful in their selections and not so much would have been said of "soup bones and skimmed milk." This is not that I do not value uniform color where it can be had without sacrificing essentials. As soon as the Dutch farmers realized the value that American trade was likely to be, and that only black and white would be accepted, the off-colors became scarce and in some districts almost entirely disappeared.

While I do not place the value that some do on the excessively high yields reported, because of the forcing process which dairymen cannot afford to follow, I get a deal of satisfaction from knowing that many of the best cows and others closely related to them passed through my hands. Lady Cliffden, the first cow to make a high record—77½ pounds of milk in a day and 17,746 pounds in a year—was in the first importation made for Mr. Russell, and was one of the family afterwards known as Aaggies. Her record was made with liberal feeding, but not by the forcing process.

In 1876 I imported the bull recorded in Holland as Jacob. I did not like the name, so changed it to Cato. His get in Holland, as well as that in Dundee, Ill., where I sold him, proved high-class milkers. Lady Le Baron, the dam of Jacob, was a first-class cow and a deep milker. I imported her in 1879, after importing several of her heifers bought at high prices; I found her that year in the feedlot to be fattened for market. It was a rule among Dutch farmers that when it came a cow's turn to "go for the beef," she must go regardless of dairy qualities. I kept her at Aurora several years. She was an extra milker the year through. It was impossible to dry her off. Her offspring were all of like quality. My herd records are not available now.

I owned Johana Paul. She was a common-looking young cow, not an extra milker. I sold her for $125. I was told that later one bull calf from her sold for $1,000. Her daughter Pauline Paul, by Climax, became famous because of her butter record—1,153 pounds and 15 ounces—as well as her milk product—18,669 pounds and 9 ounces in a year. I think the credit of these records belongs to Climax, her sire. He was by 2d Consul, son of Dictator, out of Lavinia, both in the Russell importation of 1874. I am told that Lavinia proved an extra milker, and her heifers also after I left Andover, but I have none of the records at hand.

It can safely be claimed that the history of Holsteins in the middle west commenced on Dexter Severy's farm at Leland, Ill., in June, 1873, where I took the first carload from the Russell farm. Until then, so far as I can learn, there was none owned west of Ohio, except a few in Walla Walla, Wash., owned by a Boston friend of Mr. Chenery. No special effort had been made to push them.

It took a lot of persistent hard work to get them started. My first attempt was on two dairymen in Pawpaw, Ill., recommended by Mr. Severy. I was met with the biggest rebuff I have had in my long experience: "No, we don't want them." "What little we know of them is against them." "No money to waste on them." "No time to go and look at them." But after a few hours' argument they consented to stop and look at them on their way to town. They came as agreed, and in less time than it takes to tell the story closed a bargain for a four-year-old bull at $600. I said then that I would not take "No" for an answer where I found a dairy so situated that Holsteins could be handled to advantage, unless the wife interfered, which I met with occasionally; then I wasted no more time there.

The two Pawpaw men bought two cows the next year and were highly pleased with their investments. I made a farm to farm canvass for the next two years through northern Illinois, Wisconsin, and Iowa. The progress made by Holsteins from 1875 to 1884 was phenomenal. Then came the panic and years of depression. Just as I had completed my purchase of 300 Holsteins in 1884 the report came of the Baring Bros.' failure, and I had difficulty in getting my drafts cashed. I wished many times in the late '80's that the panic had come a few months sooner, because of the drop in prices and slow sales. I would have made good, however, but for another disappointment. When I purchased my Texas ranch in 1890 determined to move my young stock there and build up an acclimated herd, but during my absence m superintendent, contrary to my instructions, permitted a Mexican buyer to pick all my best cows, thu spoiling my herd. I decided to let the remainder g at nominal prices.

While more than two decades have passed since closed my financial interest in the breed, I read wit pleasure of other breeders' success, and get a dea of satisfaction from thinking of the active part I too in promoting the breed, and that the prejudice an opposition of jealous opponents that I met are fas wearing away. There is ample room in America fo all the improved breeds of domestic animals.

I regret that Mr. Chenery could not have lived t know the result of his efforts. There were 61 bull and 67 cows in Vol. I of the herd book and there ar now recorded a total of 161,891 bulls and 292,13 cows. The total of recorded cattle includes those i the Holstein Herd Book, the Holstein-Friesian Herd Book, the Dutch-Friesian Herd Book and the Western Herd Register.

Mr. Whiting continued the contest until he was ruined, financially as well as mentally. He died o softening of the brain, his troubles the direct cause He imported some very fine cattle, and was consci entious and honest, but was too persistent in a losing contest.—G. E. Brown, Breeders' Gazette.

VOLUNTEER VIEWS THE HEADLINERS.

[Concluded from page 8.]

as that now before him. He has been "out of harness" for over a year past, and had repeatedly refused to again resume activity in the sulky—but the combination of Mr. Billings and William overcame his resolve to permanently retire from the vocation in which he has won unprecedented triumphs on two continents. As a result, it is our expectation that he will, ere long, have to his credit not only the driving of Uhlan to the world's trotting record, but that of driving William to the world's pacing record as well. All that seems necessary to insure it is that no misfortune happens to the horse.

In conclusion we may say, as we did concerning the change of ownership of William, that while it is a source of gratification that he has passed into the hands of his new trainer, it is also a source of regret that he has passed out of those of his old one. William has been "made," as the phrase goes, "from the ground up," by trainer William W. Marvin, for whom also he was named. That reinsman has had entire charge of his development, training and racing from the date when he was first broken to harness, and the manner in which he has acquitted himself of his task has been faultless. The voice of criticism is silent when the results of his labors are contemplated, for no other like instance is of record. Unqualified commendation cannot, on the contrary, be restrained, for the self-same reason.

We congratulate Mr. Billings upon his purchase of William. We believe that he will derive an immense amount of pleasure from his ownership. We congratulate Charles Tanner that the horse has passed into his care, for we believe that their connection will be fraught with great results. We congratulate Mr. Van Atta upon selling him, but over and above that upon the fact that he bred him in the first place, and has, as his owner, controlled him with such success and with constant adherence to the best methods of sportsmanship. We congratulate trainer Marvin for all he has done with him and the manner in which it has been done. In every respect we feel that, to date, no chapter of turf history has been more prolific of satisfaction to all horsemen with the best interests of the sport at heart.—Horse Review.

With all the buying of army steeds for the European war the American breeders, the most of whom live in the west, have parted with not more than 300,000 head, so that it would look as if the buyers are not here to deplete our horse stock very soon. In America we have twenty-three million horses of all kinds and sizes and Russia with twenty-six million is the only country that has more. The removal of 300,000 head is a very small fraction to fuss about and the horses we have spared will never be missed at all. Colonel Holesworth, who is in charge of the British remount service in America, told us the other day that the army call for our horses would continue for at least three years longer and then at the close of hostilities every country involved would have to have more animals for peace than they had provided for war, so that the demand on America is likely to be pretty stiff for years to come. The immediate needs are likely to take up a lot of rejects now held by some of the sub-contractors who have been a little careless in their choosing. Buying has been resumed in Chicago and St. Louis and the bug will soon be moving out this way again. The Carpathia, which figured in the rescue of the Titanic survivors, left Yonkers, New York, last week with 1,901 horses on board. This is the largest number ever put on one ship. She sailed for St. Nazaire, France, and got there all right without being torpedoed enroute. It requires a good deal of courage to risk the sea shipment of horses these days on account of the European war.—Field and Farm.

Drink Jackson's Napa Soda.

THE FARM

SORES ON HORSES.

Many horse owners at this season of the year find that their horses are troubled by sores which resist usual methods of treatment, and which in this respect differ from ordinary wounds. These growths or sores are supposed to be of fungous origin. Their true nature and cause, however, have not been definitely determined. They are especially prevalent in the Southern States, and are called summer sores on account of their persistency and the difficulty with which they are healed during the summer season. As cool weather approaches, healing frequently takes place, but there is always the possibility of the wound breaking out anew with the advent of warm weather. They may appear on any portion of the body, but are especially troublesome when occurring on the lower parts of the limbs or at points where the harness touches.

Frequently the first indication or appearance of the trouble is a small lump resembling a grain of shot beneath the skin. In a few days the skin sloughs off over the spot, leaving a raw surface. This increases in size until in a few weeks there is a raw surface from one to several inches in diameter. Commonly there is intense itching, and the animal bites and rubs the parts, aggravating the condition and increasing the size of the sore. The edges of these sores are usually rough in appearance and raised above the surface of the skin. When examined closely they appear like a mass of dark bruised tissue in which is embedded more or less of a yellow, gritty growth.

Numerous methods of treatment have been resorted to in this condition, with varying results, and frequently no improvement is noted until the approach of cold weather. Many cases, however, yield to the following treatment: The wound is thoroughly scraped with a surgeon's sterilized curette, or with a clean, disinfected dull knife, after which it is showered with cold water for 10 or 15 minutes. Iodoform is then dusted on and rubbed into the wound by means of a wad of absorbent cotton, and the wound is immediately covered with a layer of collodion. The iodoform and collodion applications are repeated every 24 hours for 15 days or until the sores heal. Ether or chloroform may be used in place of iodoform, being poured on cotton and applied to the sore for two minutes before painting it with collodion.

Formalin has been used by injecting it into the tisseues. This, however, should be used only by a qualified veterinarian, as its improper use might cause severe sloughing and disastrous results.

Not infrequently a valuable stallion becomes affected, in which case the genital organs may become involved and incapacitate the animal for breeding purposes. In such instances the injection of 75 to 100 grains of salvarsan, or neosalvarson, into the blood circulation has proved almost a specific. This, however, should be carried out only by a competent veterinarian. It should also be considered that a single injection of this preparation costs from $15 to $20, and its use is therefore advisable only for the treatment of valuable animals.

FARMING IN ALASKA.

That Alaska is capable of developing a considerable agriculture has been fully demonstrated by the practical experience of farmers and gardeners in the Territory, as well as by the Government agricultural experiment stations which have been maintained for a number of years at Sitka, Fairbanks, Rampart, and Kodiak. Successful farming everywhere is largely dependent upon favorable weather conditions, but, as a recent report of the agricultural experiment stations in Alaska points out, "in these northerly latitudes the weather plays a much more important role in the life of the farmer than it does in the States. The season is short at best, and when it is still further shortened by early fall frosts, or, what is equally disastrous, by much cloudy and wet weather during the season when crops should mature, the results are naturally unsatisfactory." Nevertheless, the report shows that in normal seasons, and even in bad seasons like that of 1914, with the exercise of foresight and resourcefulness, a considerable variety of field crops, fruits, vegetables, and ornamental plants can be grown.

Among the crops that have been successfully grown in the Territory are various cereals, especially Siberian varieties of wheat, rye, barley, and oats, as well as buckwheat, clover, potatoes, turnips, radishes, carrots, onions, chives, cabbage, cauliflower, Brussels sprouts, kale, corn salad, endive, cress, parsley, lettuce, celery, horseradishes, rhubarb, currants, raspberries, gooseberries, strawberries and other fruits, and hardy roses and other ornamentals of great variety and beauty. In fact, the report characterizes Alaska as "a land of flowers," and states that "some of the most beautiful flower gardens can be seen about Fairbanks every season." For gardens in this vicinity, however, the growth of only the hardy varieties of easy culture, such as sweet peas, pansies, pinks, asters, poppies, marigolds, daisies, and a few others, is recommended. In other parts of Alaska where the climatic conditions are less severe a larger choice is available.

CLEANING UP THE PLAGUE.

There was issued from the Office of the Secretary, under date of July 5, a special notice regarding foot-and-mouth disease, addressed to farmers, cattle owners, cattle dealers, and to county and state live stock sanitary officers for the purpose of enlisting their further effective co-operation for measures that will assist in keeping the foot and mouth disease under control.

The notice states that it is highly important that the hopefulness of the situation shall not lead to carelessness or pnwarranted disregard of the seriousness of this most contagious of animal diseases, and if every one will exercise a little patience as to necessary quarantine regulations and will co-operate heartily with the State and Federal authorities, it may be possible to say in the near future that the United States has been entirely freed from this plague, which so seriously threatened our great live stock industry.

The following excerpts from the notice are of special interest and importance:

As long as sporadic outbreaks continue to occur the epidemic which first made its appearance in Michigan in 1914 can not be considered as entirely over. Carelessness may now undo the work of eight months and force the country to face once more the greatest danger that has ever threatened its live stock. By the immediate slaughter of all animals known to have been exposed to the infection, by the thorough disinfection of all premises and articles that might harbor the contagion, by the imposition of Federal and State quarantines, and by close inspection of cattle for shipment, the disease has been brought under control. These measures must be persisted in, however, until the last atom of infection has been destroyed beyond a doubt.

Farmers and stockmen may be inconvenienced by the quarantines whic convenienced by the quarantines which restrict and regulate the movement of their stock. The necessity for these regulations can not be realized until the extreme contagiousness of the disease is understood. Once a single animal in a herd gets foot and mouth disease, or where an infected animal is introduced into a clean herd, every animal in that herd is almost sure to contract it. Cattle, swine, sheep, and goats are the chief sufferers, but the disease may be conveyed not only by them but by any article which has come into contact, no matter how indirectly, with an infected animal. Men, women, and children may carry the contagion on their shoes, clothing, and hands. Dogs, cats, rats, chickens, and pigeons may pick it up from the ground and carry it to another farm. Raw skim milk may transmit the disease, and hay and manure may easily be infected and made dangerous. In many cases farmers who have been induced by curiosity to inspect their neighbor's stricken herd have carried the contagion back with them to their own stock.

In short, the foot and mouth disease is the most contagious of all known animal diseases. To be effective against it, a quarantine must be not only proportionately strict but it must be continued until all danger of spreading the disease has passed. A quarantine that is lifted too soon is as useless as one that is not enforced.

Not only live stock, but such articles as hides, hoofs, skins, hair, horns, hay, straw and similar fodder, manure, litter, etc., may convey the contagion. In consequence, the exportation of such articles without previous disinfection is prohibited in the exposed and closed areas. In the case of animal products, however, taken from animals before August, 1914, and stored since that date away from all live stock, shipment without disinfection is permitted on affidavit that these conditions have been complied with. Hay and straw, harvested before this date east of the Mississippi and before October west of the Mississippi and stored in places away from live stock and not within five miles of any premised infected with the disease, also may be shipped on the same conditions. Other hay and straw must be first disinfected with formalin gas.

Experience in this and previous epidemics has shown conclusively that these precautions are necessary to prevent the disease being carried from one section of the country to another, just as local quarantines are necessary to prevent its sweeping through the herds of a county as smallpox used to sweep through cities. Where the people have realized this, the loss has been confined to comparatively small proportions; where it has not been realized and the temporary inconvenience caused by the quarantine has caused laxity in their enforcement, the loss has been crushing.

It is not, however, so much a matter of the present as of the future. If the disease were once to gain the foothold here that it has abroad, eradication would be an impossibility and the stock interests of the country would lose far more each year than it will cost to suppress this epidemic. In Germany in 1911 it was calculated that one out of seven animals susceptible to the disease was suffering from it. Under such circumstances the slaughter o fexposed herds becomes an impossibility and the disease remains a chronic drain upon the resources of the country, as the price is too great to pay for freedom from such a calamity.

BETTER DAIRY STOCK.

Professor Humphrey of the University of Wisconsin gives the following ten commandments for better dairy stock:

1. Treat cows gently and avoid excitement.
2. Be regular in time of milking.
3. Keep stables clean, well-lighted and ventilated.
4. Weigh the milk of each cow at milking time.
5. Get your neighbor to share with you in owning a Babcock milk tester, and test the product of each cow.
6. Discard the animals which have failed at the end of the year to pay for their keep.
7. Breed your cows to a pure-bred, registered dairy bull from a family having large and profitable production of butter fat.
8. Raise well the heifer calves from cows, which for one or more generations have made large and profitable productions of milk and butter fat.
9. Breed heifers to drop their first calves at 24 to 30 months of age. Give cows 6 to 8 weeks' rest between lactation periods.
10. Join a dairy cattle breeders association. It will help you keep posted and in touch with the best and most modern ways of managing your hairy herd.

The dairy farmer not only studies how to feed his cow but how to feed his land. He is not a soil robber, as he realizes that the farmer who reduces the fertility of his land robs without reason, since he steals from himself.

A "365" Day Liniment

YOU ARE SAYING TO YOURSELF—"If I only knew of something to stop that Backache—help my Rheumatism—cure my Neuralgia, I would send and get it at once."

Get It. Relief. Gombault's Caustic Balsam will give you immediate relief. A Marvelous Human Flesh Healer and a never failing remedy for every known pain that can be relieved or cured by external applications. Thousands testify to the wonderful healing and curing powers of this great French Remedy. A Liniment that will soothe, heal and cure your every day pains, wounds and bruises.

The Great French Remedy
Will Do It

It Helps Nature to Heal and Cure. Penetrates, acts quickly, yet is perfectly harmless. Kills all Germs and prevents Blood Poison. Nothing so good known as an application for Sores, Wounds, Felons, Exterior Cancers, Burns, Carbuncles and Swellings.

"I had a bad hand with four running sores on it. The more I doctored the worse it got. I used Caustic Balsam and never needed a doctor after that." —Ed. Rosenburg, St. Ansgat, Ia.

Mrs. James McKenzie, Edina, Mo., says: "Just ten applications of Caustic Balsam relieved me of goitre. My husband also cured eczema with it, and we use it for corns, bunions, colds, sore throat and pain in the chest."

A Safe, Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Rheumatism and Stiff Joints. Whenever and wherever a Liniment is needed Caustic Balsam has no Equal.

Dr. Higley, Whitewater, Wis., writes: "I have been using Caustic Balsam for ten years for different ailments. It has never failed me yet."

A liniment that not only heals and cures Human Flesh, but for years the accepted Standard veterinary remedy of the world.

Price, $1.50 per bottle at all Druggists or sent by us express prepaid. Write for Free Booklet and read what others say.

1915 WINRACE —and— ELIGIBILITY BOOK

The National Trotting Association Winrace and Eligibility Book for 1915 is now ready for delivery. It is a work of 858 pages, bound in cloth and contains official reports of all races and time record meetings held by members of the National and American Trotting Associations as well as copies of all special reports received by the two Associations, and all reports of non-association meetings which appeared in the columns of the turf and daily papers in 1914 as well as an index giving the starts made by each horse. In addition to this, it also contains an Eligibility List which presents the names of all live horses that acquired records or winraces in 1912, 1913 and 1914. When a winrace was made over a mile track it is designated by the letter (m) and if a horse also has a winrace over a half mile track within the four seconds limit fixed by the rule, it is also given and marked (½m).

Last year after the new eligibility rule was adopted, the National Trotting Association issued a Winrace and Eligibility Book, which covered 1912 and 1913. It assisted materially in the application of the new rule, but members and horse owners were frequently in doubt as to whether a horse was entitled to a time allowance. This resulted in a very voluminous correspondence and in order to obviate it in 1915, the present book has been compiled and issued as approved by the President under an order of the Board of Review.

In the matter of time allowance, a horse with a winrace is allowed one second for each year, if raced, in which he fails to equal or reduce his record or win a race, providing same is claimed by the nominator when making the entry. If a horse was not raced in 1914, he is not entitled to a time allowance and a reference to the index in this book will show whether he was raced or not, while by referring to the summaries, it can be determined whether he equaled or reduced his record or won a race. Also in order to give all the information possible, the reports of meetings contain all races at half mile heats as well as at mile.

This book presents reports of 1,400 meetings at which 12,673 horses started in 8,730 races and 939 performances against time, for which the premiums amounted to $3,228,617.82, while the Eligibility List presents the names of over 14,000 horses.

The 1915 Winrace and Eligibility Book will be sent postage prepaid to any address for $2.00 by

Third Edition Within One Year of Publication.

CARE AND TRAINING OF TROTTERS AND PACERS

NEVER before in the history of the publishing world has a horse book gone into a third edition within one year of publication. Yet the explanation is simple—the book fills a long-felt want. Never before has this subject been treated in a distinct manner. It has been handled in connection with autobiographies of trainers, but such works are out of print or out of date, for they were published 20 years or more ago. Conditions and methods have changed since then, and former treatises are just as much out of date as the high-wheel sulkies then in vogue.

"Care and Training of Trotters and Pacers" is as modern as a 42-centimeter gun. It does not contain the ideas of one man, but of 100 of the leading horsemen of the day, including Thomas W. Murphy, Walter R. Cox, and Edward F. Geers. These ideas were converted into book form by two prominent American turf journalists.

This book enables anyone to do his own caretaking and training until it is time to send the colt to a professional trainer, or the owner can train and race the colt himself. The treatise covers the details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented. Nothing is left to guess work. The language is lucid. Both theoretical and practical views are outlined and compared. The instructions are concise and easily understood. The work contains no advertisements—it is not a catch-penny publication that looks big in the advertisement but proves disappointing when received.

Many professional trainers have purchased the book and have found it interesting. Despite the war, over 300 copies have been sold in Europe and Australia.

Price $1.00 postpaid. Cloth, illustrated, 176 pages, 5x7 inches.

WILL TRADE—One 3-year-old registered filly—sound—by The Bondsman, dam by McKinney, for one registered Jersey heifer bred to a registered Jersey Bull. A. BENSON
Del Paso Heights P. O., Sacramento.

TRAINING DISTEMPER.

Ever hear of this? Yes, of course you did, but under different name. You have seen it in cases where the horse was "overtrained," worked a little too fast and regular. The nervous system gets the shock, after the voluntary muscular system has been taxed too heavily. The trouble starts in the mucous surfaces and the digestive apparatus, too, must then be impaired. He begins to cough when the glands are materially affected.

"SPOHNS" is your true salvation. It restores the appetite and normal functions of the whole system. The action in such cases is remarkably rapid and sure for recovery when you use this remedy according to instructions with each bottle. Only 50c and $1 a bottle; $5 and $10 a dozen. Sold by all druggists, horse goods houses, or express prepaid by manufacturers.

A Practical Treatise on the Training of Hounds

Training the Hound

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

Peters SHELLS

Used by Mr. J. J. Randall, of Greensburg, Kans., in making

High Score (tie) in the G.A.H. 96x100 from 19 yds

In the Preliminary Handicap, Mr. C. L. Parsons, Montana State Champion, tied for third, 93 x 100 from 20 yards.

The popularity of Peters shells was never more convincingly demonstrated than at this record-breaking tournament, where a big percentage of the 831 contestants chose the (P) brand.

The 1914 Grand American was won by Mr. W. Henderson with a world's record—score 98 ex 100 from 22 yds. He was also the winner of the 1914 U. S. Amateur Single Target Championship, 99 ex 100; the 1914 U. S. Amateur Double Target Championship, 90 ex 50 pairs, and the 1914 Official High Amateur Average, 96.44%, using PETERS shells exclusively.

THE PETERS CARTRIDGE CO., Pacific Coast Branch, 583-585 Howard Street, **San Francisco, Cal.**

WINCHESTER

SELF-LOADING RIFLE, .401 CALIBER

IT GIVES A STREAM OF SMASHING BLOWS

No need to fear the most powerful or most dangerous animal, if equipped with the .401 Winchester. It can deliver five smashing, one-ton blows in a few seconds, with aim. This rifle is a self-loader, and it is only necessary to pull the trigger for each shot. It shoots cartridges small in size but powerful in execution loaded with either 200-grain or 250-grain bullets. It beats any other rifle of this type for power and is the most effective hunting rifle made. Your first hunt will prove every word we say.

THE GRAND PRIX—The highest honor—was awarded to Winchester Guns and Ammunition at the Panama-Pacific International Exposition.

Dam of Lottie Ansel (2) 2:14¼, Ruth Ansel (3) 2:21, Anselot...(1) 2:28½ — Prince Lot...2:07¾ — Flora B. — Whippleton 1883, by Hamb. Jr. 1882.

In all of the statistical tables of world's records, not only in the various horse journals but in the Year Book as well, there has been a vacant place of long standing—the place in the compilation that should contain the name of the champion yearling trotting gelding. There has, of course, been this most excellent reason for the vacancy—the simple fact that to the best of our knowledge and belief no yearling gelding had ever trotted to a standard record.

Now, however, the table has been rounded out, and to California comes the honor of having produced the new champion, the first of his class, and Californians will not begrudge the fortune that has fallen to that one of her most prominent present-day breeders, John W. Considine of Woodland Stock Farm. The Prince Ansels have been working fast this season, and it occasioned slight surprise Wednesday when the Breeder and Sportsman received telegraphic advice from Mr. Considine to the effect that Anselot had taken a world's record of 2:28½ at Lexington in Hunter Moody's hands. In the first forms of the paper, already on its way to the press, we had included a short clipping from an eastern exchange telling of a recent mile in 2:30 by this youngster, so we were pretty well prepared to learn of the faster work, our preparedness, however, making the news none the less welcome.

Anselot is a native son, and as a glance over the accompanying brief tabulation of his pedigree will show is not a "scratch champion," having been preceded by a brother and two sisters of very high class—Prince Lot 2:07¾, Lottie Ansel (2) 2:14¼ and Ruth Ansel (2) 2:28½, (3) 2:21, Lottie Ansel holding the Pacific Coast record for two-year-old trotting fillies, as well as the season record for the age, gait and sex in 1912.

Anselot was one of the growthiest of last year's crop of foals at Woodland Stock Farm, being, at the time of the writer's visit in November, about the huskiest of all the young Prince Ansels. With the other weanlings he was put through the kindergarten stages of breaking and training by Messrs. Dowling and Maben, and while not as "oily" a trotter as Anselila, who was one of the most generally admired little ladies on the place, he had a good deal of reach and determination. Mr. Considine's faith in Prince Ansel has never wavered since his purchase some three years ago, and last fall he announced his intention of sending a number of weanlings to Lexington to be taken in hand by that highly successful colt trainer, Hunter Moody, just in order to show the easterners that the west still breeds early speed.

The Woodland contingent came in for a great deal of favorable mention by the Blue Grass correspondents immediately after their arrival, and the longer they were there the better they were liked. Anselila there, as here, was one of the most highly regarded of the lot and showed speed of a record nature some time since, but it remained for others who came more slowly to precede her into duly recorded fame. Anselot has been handled carefully and slowly, on account of his growth, but has come very fast of late, with fractional portions of the mile at rates which, if sustained, would put at his mercy all yearling records regardless of sex.

Nor were the activities of Mr. Moody with the Prince Ansels confined to the champion alone, as Verbena Ansel, out of Verbena Mac by Directum Spier 2:11¼, achieved a record on the same occasion of 2:26, she being the first performer from a daughter of this young sire. Mr. Moody also drove Suldine to a two-year-old record of 2:12, so that it was quite a pleasant day for the Considine Stable. Later in the season there will undoubtedly be more honors to fall to its lot, as its inmates have the quality in well-demonstrated quantities. A yearling championship and the season's record filly, for the track at the Blue Grass speed center, is a pretty fair day for a starter.

Prince Ansel (2) 2:20½ and Lottie Whippleton 2:15 are still at Woodland Stock Farm, hale and hearty, and that many future honors may and will come to both is the hope and belief of the many friends of their owner in all portions of the land.

Woodland Stock Farm's Premier Stallion
PRINCE ANSEL (2) 2:20½
Sire of the world's champion yearling gelding, Anselot (1) 2:28½.

GEORGE GANO 2:10¾ UNDER SADDLE.

The many friends of M. W. Savage here in the west will learn with pleasure that on last Thursday, September 2, the stallion George Gano made a further reduction in the world's record to saddle, reducing his own former mark to 2:10¾ over the track at Madison, Wisconsin. Some weeks ago the Breeder and Sportsman intimated that the fast son of Gambetta Wilkes should place the saddle record in 2:10 or better, and it looks now as though the opinion was well grounded.

There is a chance that horse lovers on the Pacific coast may have an opportunity of seeing Gano hang up some new records at this way of going at the fall meeting of the P.-P. I. E., as Mr. Savage is now in correspondence with the proper officials with the view of making two flights against the watch some time between October 30 and November 13. Mr. Savage's wide acquaintance, the popularity of Dan Patch and his stable mates and the aggressive advertising campaigns that precede any special performances by representatives of the International 1:55 Horse Farm always insure good crowds on such occasions. The presence of Gano in trials for a new world's record would prove a great drawing power at the exposition track, and we are very much in hope that steps will be taken to close the deal for his appearance at least twice.

ARTHUR THOMAS RESIGNS.

Owing to the impending change of ownership of the Horseman and Spirit of the Times, Arthur C. Thomas has resigned from the editorial desk of that publication and has accepted a position with one of the more prominent "allied industries," the nature of which will shortly be announced, the new duties to be assumed October first.

Arthur Thomas is one of the younger generation of turf writers and "business-horsemen," but one of the best known, his active connection with the harness horse for the last decade having won him friends in many corners and out-of-the-way places of the world as well as down the big line. In the time during which he has been editor of the Horseman that publication regained much of the ground it had lost in the horse world, took on a "new lease of life" and became again an up-to-the-minute, highly readable journal. The future proprietors of the Horseman will have to "go some" if they procure a better man than "A. C." for editor, and his new employers are to be congratulated on getting the services of one of the real "live wires" of the business.

A Little Story of Geraldine

The Old Queen of Sprinters for Whom the Geraldine Handicap is Named

Now that the thoroughbred seems to have a chance to "come into his own" again here in the state where he so long reigned supreme, it takes very little indeed to start any one of a number of the veterans of bygone days who are on hand at the present "hostilities" on a trial against the watch in a reminiscent way. Not one of the famous stakes of the past but has been raced over in the daily gatherings of late, from the morning assemblages "on the rail" to the nightly gatherings at the down town clubs and loafing places of the fraternity. Every day something transpires that reminds somebody—or several somebodies—of such and such a time when so-and-so beat so-and-so at a certain distance, and before that race is well over and the horses cooled out and in the straw, some other event is on with a vengeance. Sure, and racing 'em over on the jawbone circuit is one of the grandest little outdoor or indoor sports that ever came over the divide. Without it, racing would lose half its charm.

Of the many things that start the flow of memory, however, none has been more productive of real, hot after dinner racing than the staging of the Geraldine Handicap on Labor Day, for many a tale centers about the chestnut mare that carried the cherry of the Maltese Stable to victories and world's records over a score of years ago. For ten long years did Geraldine right worthily uphold the honor of California on tracks from the Atlantic to the Pacific, and in choosing a name for their feature sprint at their inaugural meeting, the officials of the Golden Gate Thoroughbred Breeders' Association have shown themselves to be horsemen of heart, and at the same time have paid eloquent tribute where tribute is due.

Geraldine was foaled in the spring of 1885 at the Maltese Villa Stock Farm of R. Porter Ashe, and was a daughter of Grinstead and Cousin Peggy, by Woodburn. Early in life she was taken in hand by Mike Kelly, making her debut in the California Stakes at the spring meeting at the Bay District track in her two-year-old form, being beaten merely a short head by Pocatello. A week later she earned the brackets for the first time, galloping home at six to one over a field of nine, four of whom had been preferred to her in the betting. Out of four starts at that meeting at the Bay District course she was twice winner, won two events at Sacramento, one a walkover, and then made the first of her numerous long trips to the classic courses of the east. After varying success in her earlier starts at Saratoga, she won her first large event in the Sapphire Stakes at twelve to one, and later on at Brooklyn annexed the Prospect Stakes, worth $2,500 to the winner, at a much longer price, beating the good Emperor of Norfolk and a number of others. Back home in the fall she won the Ladies' Stake and went into winter quarters with a record of eight wins out of fifteen starts.

As a three-year-old she made but a short campaign, heading the result tables in two out of five races and hanging up the season's record for five furlongs at Bay District, covering the distance in 1:01½. The following season she contested in over a score of fast events, carrying a burden of 122 pounds to a record of :46 at the halfmile at the course of the New York Jockey Club, and running the fourth fastest mile of the season here at home, 1:40¼. She had hard sledding as a five-year-old, as she was first in but one race out of nine—but there was a reason. She was racing against the pick of the land, and was beaten by only such horses as Tenny, Tipstaff, Eon, Blue Rock, Civil Service, with whom she ran a dead heat at a halfmile in :48½ at Brooklyn, and August Belmont's great colt Fides, whom she forced to run the three-quarter mile Toboggan Slide Handicap at New York in the record time of 1:10¼ to beat her.

These accomplishments would have been enough for many an excellent horse, but Geraldine was not yet through tampering with the table of best performances. The following season she carried the featherweight Sullivan over six and a half furlongs here, late in the year, in 1:19 3-5, and in January, 1893, traveled the four and a half furlongs at the Oakland track in the record time of :54.

Such, in brief, were the more noteworthy performances of the lass that was the idol of California race goers in the late eighties and early nineties. For ten years in a row she never missed going to the races, making from four starts to fifty-one, and not until her last year on the turf, at the age of eleven, did she fail to earn the brackets. In all, she participated in one hundred and eighty-seven events, sixty-nine of which she won, a truly wonderful demonstration of thoroughbred quality.

Like many other noted performers, Geraldine was an "individualist" of a very pronounced type. She was a mare of wonderful sensitiveness, and, if such a word can be applied to a dumb animal—and in the writer's opinion it most certainly can be used with all propriety—conscientious to an extreme. What she knew about racing would fill a big book, could it have been told, and there was a vast difference between Geraldine, the winner, and Geraldine, the loser. She knew exactly whether or not she had made good in a race. When she brought home the bacon it took all hands and the cook to bandage her, cool her out and "lay her away" properly, as she was ever in high spirits on such an occasion. Let her be headed to the wire by another horse, however, and by her actions she showed plainly that she knew just what the defeat meant to the stable, as she would stand docilely, almost despondently, while the boys did the work on her legs and put her away. With her next win she would be in mood to celebrate, and until the very last year of her career she never failed to "come back" after a defeat.

She had one pronounced peculiarity that was the source of a good deal of amusement to the boys and visitors to the stable, and of numerous dinners for her owner—she utterly and absolutely refused to have anything to do with an apple. No patience or coaxing could induce her to take the slightest nibble at the choicest apple ever raised, east or west, and when unbelievers tried to feed her fruit of this nature she would stand with her head out of the stall door and assume an air of utter indifference, as though bored by the whole proceeding. In her mind's eye she doubtless was picturing a scene that suited her right down to the ground, a big patch of — give you three guesses and bet that you lose — ripe tomatoes! Of all things that the good Lord in his wisdom put on earth for human or equine consumption, the tomato occupied first place in Geraldine's estimation, and if that dainty was to be had by any hook or crook there was always a basket somewhere around the stable especially for her. She had her many friends and was fond of visitors, but the one way to her real regard was by the tomato feeding route.

It is most fitting that her name should be perpetuated in turf annals by a stake named in her honor, for she left no descendants to help keep her memory green in the minds of the present and coming generations, who are more prone to forget things of this nature than were our forebears. When she was finally retired from racing she was sent to join the band of matrons at A. B. Spreckels' Napa Stock Farm, but she was not destined to achieve fame as a producer, misfortune and death overtaking her early in her career at Napa. In 1899 she gave successful birth to the chestnut colt Geraldyn by St. Carlo, but died in travail the ensuing season, the foal also sharing the mother's fate, leaving the St. Carlo youngster the sole hope of the line. Misfortune was his lot, also, wiping out the strain. He passed at an early age into the ownership of the late "Jack" Follansbee, in whose colors he won a five and a half furlong event at Saratoga as a two-year-old, well backed by his owner and friends at ten to one. Sickness broke out among the horses at Saratoga and the colt became its victim, emerging alive but permanently affected in wind and lung, passing, after a few unsuccessful races, into obscurity.

What a pity the old heroine of Maltese Villa Farm could not have lived to transmit her qualities to others.

And so we say, all honor to good old Geraldine, and long life to the Geraldine Handicap. May it become an annual fixture in California's future turf program, and if its winners approach in quality the famous mare in whose honor it is named, the spectators will have the full satisfaction of knowing they have seen a great race, well run, well won.

STADIUM TRACK HAS NEW TWO-HEAT RECOR

The free-for-all pace of some two weeks ago at th Stadium in which Bondalean paced one heat in 2:(was a mighty fast little old fun race, but last Su day's free-for-all was still faster, the time for the tw heats constituting a new record for the track i Golden Gate Park. Dick W. and Little Bernice, tw of the contenders in the race first mentioned, wer present Sunday with their pacing clothes on, bu were forced to give precedence to little Vera Ha fresh from her victory over San Jacinto at Ventur Vera assumed the lead from the start of the firs heat, winning by a good margin over Dick W. i 2:07½, Little Bernice going to a break in the stretch In the second heat the game little daughter of Ex pressive Mac had to stand a hard drive to stave of the rush of Little Bernice, who kept her feet an closed gamely. The Cohen mare was just as game and won under the whip in 2:08½, a fast race for a fun race over a three-quarter mile track.

Happy Dentist took the 2:12 pacers into camp i two nice miles in which Emma M. and Mabel Dillo took turns in driving him out, and Jack Kramer's Palitea trimmed Tom Murphy and G. J. P. two in a row. Matawan cut out the early pace in both heats o the free-for-all trot, but faded when collared by Miss San Francisco, who trotted her first mile in 2:15½ and the second in 2:19. King Pointer and Hamburg Belle furnished the real thrill of the afternoon in the 2:15 pace, only the King's long head and neck enabling him to win the final duel in the stretch. Trophies for the day were provided by the club and their friends, the prizes including complimentary remembrances from C. A. Sweigert, T. I. Fitzpatrick, Ed I. Wolfe and the Claremont Hotel.

The matinee tomorrow promises good sport, as all the local regulars are in good trim and the fields will also have entries from the stables of those good sportsmen from Sacramento, Harry Cowell and Charley Silva. Sunday's summaries follow:

First race—2:12 pace:

Happy Dentist	(J. J. Ryan)	1	1
Emma M.	(Wm. Malough)	2	3
Mabel Dillon	(B. Cohen)	3	2
Pointer Belle	(Kidd & Luce)	4	4

Time—2:12½, 2:13¾.

Second race—2:18 pace:

Palitea	(Jack Kramer)	1	1
Tom Murphy	(E. T. Ayres)	2	2
G. J. P.	(R. Consani)	3	3

Time—2:16½, 2:17. Scratched—Cookey.

Third race—Free-for-all pace:

Vera Hal	(H. Cohen)	1	1
Dick W.	(A. Ottinger)	2	3
Little Bernice	(J. C. Welch)	4	2
Bradmont	(G. J. Giannini)	3	4

Time—2:07½, 2:08½.

Fourth race—Free-for-all trot:

Miss San Francisco	(Al Schwartz)	1	1
Matawan	(H. Cohen)	2	3
St. Patrick	(J. J. Ryan)	3	2
Ateka	(B. Cohen)	4	w

Time—2:15½, 2:17.

Fifth race—2:15 pace:

King Pointer	(H. Campodonico)	1	1
Hamburg Belle	(J. Ginocchio)	2	2
Zorankin	(F. Callea)	3	3
Jack	(McDonnell-Conlan)	4	4
Senator H.	(J. M. Kidd)	5	5

Time—2:14, 2:14.

SPRECKELS YEARLINGS SELL READILY.

Twenty-three thoroughbred yearlings from Napa Stock Farm, the famous speed nursery of A. B. Spreckels of this city, were sold at auction last Thursday, September second, in the paddocks at Belmont Park, New York, the youngsters going into good hands at good prices, the consignment averaging $382 a head. Plohn, the chestnut brother to Nolli, topped the sale, going to the Northwood Stable at a bid of $2,000. The offerings were the get of Voorhees, Solitaire II. and Dr. Lecco, the various individuals selling as follows:

Plohn, ch c by Vorhees—Nanna; Northwood Stable	$2,000
Cruces, ch c by Voorhees—Chiffis; J. MacManus	800
Angorta, blk f by Dr. Leggo—Priceless Jewel; S. L. Parsons	800
Positan, b c by Solitaire II.—Bremerhafen; J. MacManus	750
Savilla, ch f by Solitaire II.—Salvatrix; J. MacManus	650
Barry, b c by Voorhees—Irama; G. M. Odom	375
Onunda, b f by Dr. Leggo—Lady Atheling; Northwood Stable	375
Tarvee, ch c by Dr. Leggo—Micco; W. Garth	305
Dyson, b c by Dr. Leggo—Napa Girl; W. Sheedy	325
Harper, ch c by Voorhees—Gaviota; W. Sheedy	300
Cobale, br or blk f by Dr. Leggo—Georgia Girl; G. Preece	300
Brobeck, b c by Dr. Leggo—Princess Alma; J. Powers	300
Lantana, ch f by Dr. Leggo—The Peeress; G. Preece	275
Alvord, b c by Solitaire II.—Lily Golding; W. P. Burch	250
Cleome, b f by Dr. Leggo—Norinne; E. A. Cantina	250
Zinnia, b f by Voorhees—Emir; W. H. Robinson	225
Hanan, b c by Dr. Leggo—Yorba; G. Preece	225
Lobelia, b f by Dr. Leggo—Othale; W. Garth	200
Galala, b f by Solitaire II.—Alma Dale; P. Sheridan	200
Burbank, b c by Dr. Leggo—Coma; G. Preece	200
Ayers, b c by Dr. Leggo—Guerara; Stewart Preece	175
Rienva, b f by Dr. Leggo—Pourquoi; J. K. Frayling	175
Manomet, b c by Dr. Leggo—Zafra; E. A. Cantina	100

Bob Sebastian and Hal McKinney continue to make quite a team. At Lincoln, on Tuesday, as a feature of the day's program of the Nebraska State Fair, the California sidewheeler met Columbia Fire, the Nebraska kingpin, in a special event in which honors fell to the invaders from this side of the big divide. Incidentally a new race record was hung up for the two lap course over which the contest was staged, the fastest heat being paced in 2:07¾.

Thoroughbreds Draw Well

Inaugural Meeting of G. G. T. B. A. Goes Merrily on at Exposition Track

LAST DAY AT EMPIRE CITY PARK.

New York, Sept. 3.—Over a track that was the fastest that has graced the present meeting, the track stake pacers of the big line came together here today and again Hal Boy was a near winner, being first or second in each heat of the hot contest. Wily Pop Geers and Russell Boy were too much for the westerners in the long run, and Single G. was never but once better than third. The first three heats were all better than 2:05, and the time and character of the contest made up in a large measure for the disappointments of earlier in the week.

Marse Ed kept his winning clothes on in the 2:10 trot also, the good four-year-old lad St. Frisco being fast enough to outtrot Mirthful and game enough to outlast her in a merry five-heater, all heats in ten or better. Both in this event and the pace Pop had close finishes decided against him, and had the crowd with him throughout the afternoon. Trampright, from the Murphy stable, took the 2:15 trot after dropping the first heat to Roy Miller, the fastest time being 2:11¼. The summary:

New York, September 3.—The Broadway, 2:08 pace, purse $2,000:

Russell Boy, b h by Rustic Patenter.(Geers)	2	1	1	4	1
Hal Boy, b g by Hal B.....(McMahon)	1	2	2	1	2
Single G., b h by Anderson Wilkes (Gosnell)	3	4	4	2	3

Major Ong also started.
Time—2:04¾, 2:04¼, 2:04¼, 2:07, 2:08.

2:15 trot, purse $1,000:

Trampright, b m by Trampfast.....(Murphy)	6	1	1	1	
Roy Miller, b h by Bingara.....(Grady)	1	2	5	5	
Vallette, ch m by Mobel.....(Coburn)	2	3	2	3	

W. J. Leyburn, Blue Feather, Kitty L., Bettini and Henry F. also started.
Time—2:12¼, 2:11¼, 2:11½, 2:13½.

2:10 trot, purse $1,000:

St. Frisco, b h by San Francisco....(Geers)	1	2	2	1	1
Mirthful, b m by The Star of Patchen.... .....(Murphy)	5	1	1	2	3
McCloskey, b g by Theodosius..(McDonald)	3	3	3	5	2

Parcliffe, Dick Watts and The Zombro Belle also started.
Time—2:07¾, 2:07¼, 2:09¼, 2:07¾, 2:10.

CHARTER OAK IS TAME AFFAIR.

Hartford, Conn., Sept. 6.—Only twice in its history has the Charter Oak stake been raced for as small a sum as five thousand dollars, but those present at the famous local course today were of the opinion that five thousand bucks was all the race was worth, and then some. In the first place, only four of the dozen trotters eligible put in appearance when the starters were called, and in the second place there seemed to be but one real trotter in the quartette, Tommy Murphy's high priced Peter Scott. Bonington trotted two steady heats, but a break in the third cost him his chance for second money.

Margot Hal made a good beginning in the 2:08 pace, taking the first heat in the respectable time of 2:05, but spoiled things by a three-eighths of a mile run in the second which caused the judges to declare her distanced, Queen Abbess winning on out with John R. Hal her best company. McDonald had better luck in the 2:13 trot, winning handily with Laramie Lad from Loe Blossom. The summary:

Hartford, Conn., Sept. 6.—2:08 pace, purse $1,000:

Queen Abbess, br m by The Abbe.....(Cox)	2	1	1	1	
John R. Hal, b h by John R. Gentry.(Crozier)	4	2	2	2	
Ben Locanda, b h by Locanda.....(Murphy)	3	3	3	3	

Margot Hal, Elisha J. and Hal Connor also started.
Time—2:05¼, 2:06, 2:09¾, 2:08¾.

The Charter Oak, 2:08 trot, purse $5,000:

Peter Scott, br h by Peter the Great...(Murphy)	1	1	1		
Worthy Prince, b h by Prince McKinney..(Cox)	3	2	2		
Bonington, ch h by Bellini.....(Geers)	2	3	4		
Duchess, ro m by Allerteen.....(McDonald)	4	4	3		

Time—2:09, 2:07¾, 2:07.

2:18 trot, purse $2,000:

Laramie Lad, b g by Master Bo.....(McDonald)	1	1	1		
Loe Blossom, ch m by Lepide.....(Floyd)	2	2	2		
Audrey Grey, br m by Guy Axworthy.....(Fox)	3	3	5		

Todd McGregor, Brook King, Mary Guy and Bonnie Setzer also started.
Time—2:10½, 2:08¾, 2:09½.

Second Day at Hartford.

Hartford, Sept. 7.—While the Charter Oak yesterday was a tame and featureless affair that failed to arouse the spectators to any high degree of enthusiasm, the 2:10 pace today had almost enough thrill in it for two races and gave the crowd an excellent run for its money.

Predictions have been freely made that Hal Boy, with an experienced Grand Circuit driver up behind him, would be the boss of the stake pacers, but the prophecy has yet to be made good, as Senor Ricardo McMahon has not yet succeeded in putting him over in enough heats to head a summary. Today the little western wiggler speared the first heat in 2:05¼ in a very close finish with Russell Boy, and then went into temporary retirement insofar as being a serious contender was concerned, the next two heats going to the Ohio pacer, Judge Ormonde, with Russell right after him all the time. Hal Boy finished behind the bloody banner in the third heat, but the judges placed him after Messrs. McMahon and Murphy made a trip to the stand and convinced them that his bad showing was the result of unintentional interference on the part of Murphy and Peter Farren.

The fourth heat was the hair raiser and the methods of Charley Valentine led to the elimination of the Ohio entry from the contest. Twice during the mile Russell Boy was seen to challenge the Judge for the lead unsuccessfully, the Boy being in second position and Ormonde on the pole, and just before reaching the wire Valentine's horse again swerved out, winning by a head. Mr. Geers, upon return to the wire, entered a protest, stating that he had been carried out each time that he endeavored to take the lead,

[Concluded on page 7]

Twelfth Day—Friday, September 3.

First race—Five and a half furlongs, selling, purse $300: Davies & Sieman's bl h Custom House (4) by Joe Carey—Ellen Atkins, 111 lbs., (Donovan) won easily; Finnigan (aged), 108, second; La Cazadora (6), 108, third; Mary Emily, Aunt Elsie, Ida Pinack, Briton, McAlan, Jake Argent also ran. Time, 1:08 1-5.

Second race—Five furlongs, selling, two-year-olds, purse $300: California Stable's b c Toastmaster by Hastings—Toscana, 108 lbs., (Gross) won driving; Bas Blancs, 107, second; Laughing Water, 97, third; Lola, Von Lady and Ojita also ran. Time, 1:02 4-5.

Third race—One mile, selling, purse $300: W. C. Weant's b g Brando (6) by Orlando—Alice Brand, 108 lbs., (Taplin) won driving; Henry Walbank (aged), 108, second; Gano (4), 103, third; Tom Chapman, Cantem, Fairly, Commendation and Gimli also ran.

Fourth race—Five furlongs, Army, Navy and Marine Corps Officers' race, cups to first and second: Lieut. Chas. Burnett's ch g Vive Le Roi (aged), 160 lbs., (Lieut. Stevenson) won easily; Nobax (aged), 169, (Lieut. Kobbe) second; Joe (4), 162, (Lieut. McNally) third; Lady, Fog Horn and Buffalo also ran. Time, 1:07.

Fifth race—One mile, selling, purse $300: W. Fenwick's b g Southern Gold (aged) by Gold Heels—Southern Girl, 108 lbs., (O'Brien) won driving; Bunny (3), 97, second; Sleepland, Rhodes and Hannis also ran. Time, 1:42 2-5.

Sixth race—Six furlongs, selling, purse $300: J. Randolph's ch m Princess Industry (aged) by Farandole—Work, 102 lbs., (Gentry) won driving; Acumen (aged), 115, second; John Hurie (5), 115, third; Delaney, Loan Shark, Pro Realis and Quantity also ran. Time, 1:14 2-5.

Thirteenth Day—Saturday, September 4.

First race—Five furlongs, selling, purse $250: N. K. Moody's b m Azurea (aged) by Joe Carey—Admit, 109 lbs., (Frach) won driving; Bill York (6), 108, second; Moller (5), 110, third; Teeto, Arrowshaft, Otto Kahn, Zamloch, Breezer, Wernras and Milton Barber also ran. Time, 1:01 4-5.

Second race—Five furlongs, two-year-olds, purse $300: George Van Gorden's ch g Carl Roberts by General Roberts—Janice Marian, 110 lbs., (Kirschbaum) won easing up; Robert Lee, 113, (Gross) second; Schulenburg, 110, third; Frisky unseated rider after the break and did not finish. Time, 1:03 1-5.

Third race—Six furlongs, selling, purse $300: J. Randolph's br g Minco Jimmie (6) by Bonnie Joe—Mary Hill, 110 lbs., (Gentry) won easily; Tight Boy (5), 118, second; Madelle (5), 115, third; Cecil, Angelus, Boggy Johnson, Helen Hawkins and Quantity also ran. Time, 1:14 3-5.

Fourth race—One mile and an eighth, President's Cup handicap, value $1,185: John Lowe's ch g Brynlimah (5) by Bryn Mawr—Notlimah, 110 lbs., (O'Brien) won driving; Rash (aged), 106, second; John Graham (aged), 106, third; Be and Celesta also ran. Time, 1:52 3-5.

Fifth race—One mile, selling, purse $300: Freeman & Co.'s b g El Pato (6) by Conjuror—Pearl Barnes, 106 lbs., (Gentry) won in a gallop; Zoroaster (aged), 106, second; Transparent (aged), 111, third; Stolen Ante, Rey and Nannie McDee also ran. Time, 1:41.

Sixth race—Six furlongs, selling, purse $300: L. B. Wood's b m Frazzle (6) by Plaudit—Pleasant Girl, 118 lbs., (Taplin) won easily; Electrowan (aged), 118, second; Master Franklin (3), 111, third; Old Coin, Quick, Tordillo, Fred T. and Vespasian also ran. Time, 1:14 1-5.

Fourteenth Day—Monday, September 6.

First race—Five and a half furlongs, selling, purse $250: Oklahoma Stable's b g Mintanka (5) by Jesse James—Laura Logan, 105 lbs., (Burns) won driving; Bill York (6), 98, second; Finnigan (aged), 105, third; Igloo, Lillian Ray, Quantity, Criterion, Flossie, Milton Barber and Camia also ran. Time, 1:08.

Second race—Five and a half furlongs, selling, purse $250: W. C. Weant's b g Stelcliff (6) by Clifford—Amstel, 108 lbs., (O'Brien) won driving; Lady James (3), 101, second; Tallow Dip (aged), 104, third; Mark Kennedy, Diadi, Frances G., Bredwell and Chas. Goetz also ran.

Third race—Mile and a sixteenth, selling, purse $250: Chicago Stable's b g Cantem (aged) by Canopus—Trim, 108 lbs., (Burns) won driving; Pro Realis (6), 111, second; John Louis (aged), 111, third; Prince Conrad, Fort Johnson, Lone Star, L. M. Eckert, Tahoe and Bluebeard also ran. Time, 1:49 2-5.

Fourth race—Six furlongs, Geraldine Handicap, value $920: A. Caven's b m Orange Blossom (5) by Joe Carey—Princessa, 97 lbs., (McGraw) won driving; Scarlet Oaks (4), 120, second; Theodorita (4), 108, third; Seneca, Kootenay and Eureka also ran. Time, 1:13.

Fifth race—Six furlongs, selling, purse $250: Vancouver Stable's b g Moller (5) by Marta Santa—Arthesia, 110 lbs., (O'Brien), won driving; Merry Twinkle (3), 105, second; Tordillo (3), 103, third; Smoky Dan, Laura James, Renwar, Otto Kahn, Rhodes, Wernras, Bob Love, Emelda and Sunflower Belle also ran. Time, 1:15 2-5.

Sixth race—Mile and a sixteenth, selling, purse $250: A. Neal's b m Nebraska Lass (aged) by Highland Lad—Kitty Balile, 108 lbs., (Leeds) won handily; Ceos (4), 103, second; Henry Walbank (aged), 108, third; Tom Chapman, Gano, Fairly and Commendation also ran. Time, 1:47 4-5.

Fifteenth Day—Tuesday, September 7.

First race—Five and a half furlongs, selling, purse $250: W. E. Cotton's b g McAlan (6) by The Commoner—Irresistible, 108 lbs., (Molesworth) won easily; Jake Argent (aged), 108, second; Auto Maid (6), 108, third; Norford Rose, Miss Sedalia, Sonoma, Ida, Helen Hawkins, Criterion, Teeto and Joe Busher also ran. Time, 1:07 3-5.

Second race—Five and a half furlongs, selling, purse $250: J. Pelter's ch m Mary Emily (6) by Nasturtium—Highland Princess, 108 lbs., (Feeney) won in a canter; Master Franklin (3), 109, second; Delaney (aged), 108, third; Aunt Elsie, Charity Ward, La Cazadora, Miss Edith and Marie O'Brien also ran. Time, 1:07 2-5.

Third race—Six furlongs, selling, purse $250: H. C. Smith's ch m Vireo (5) by Mazagan—Nun's Cloth, 110 lbs., (Hawkins) won driving; Wasatch (4), 115, second; Light Knight (aged), 115, third; Loan Shark, Mandadero, Kid Nelson, Roscas, Delmas and Valadolid also ran. Time, 1:15 4-5.

Fourth race—Six furlongs, selling, purse $250: W. J. Dunn's ch h Tight Boy (5) by Serpent—Azuba, 118 lbs., (Washer) won easily; Frazzle (6), 115, second; Lady Young (6), 115, third; Quick, Acumen, Canapa and Hardy also ran. Time, 1:13 4-5.

Fifth race—Five furlongs, selling, purse $250: L. B. Wood's b g Sweetbait (4) by Fisher Boy—Cupboard Love, 116 lbs., (Taplin) won driving; The Feller (4), 116, second; Ann Tilly (5), 111, third; Apache Kid, Rag, Frank G. Hogan, Carondelet, Bally Beers, Make Good and Dominica also ran. Time, 1:01 4-5.

Sixth race—One mile, selling, purse $300: W. C. Weant's b g Brando (6) by Orlando—Alice Brand, 113 lbs., (Taplin) won driving; El Pato (6), 113, second; Conflagration (6), 108, third; Zoroaster, Transparent, Stolen Ante, Rey and Alda also ran. Time, 1:41 3-5.

Sixteenth Day—Wednesday, September 8.

First race—Six furlongs, selling, purse $250: L. Stone's ch m Jennie Crawford (5) by Albula—Marie Bolton, 110 lbs., (Brazal) won driving; Light Knight (aged), 115, second; Baby Lynch (3), 108, third; Lady St. Patrick, Zenotek, Choctaw, Old Coin, Bredwell and Gimli also ran. Time, 1:14 4-5.

Second race—Five and a half furlongs, maidens, purse $250: W. H. Ford's b g Tordillo (3) by Meelick—Marguerite R., 105 lbs., (Gross) won easily; Renwar (4), 112, second; Smoky Dan (4), 112, third; Lovins, Madam Darkness, Rhodes, Major's Daughter and Wernras also ran. Time, 1:09 2-5.

Third race—Four furlongs, S. F. Police Officers, service mounts, catchweights, purse $100, donated by Geo. Wingfield: Buster (Officer C. Budd) won driving; Martin (Of-

CHANTILLY
Premier Stallion at Chas. W. Clark's El Palomar Farm.

ficer W. Lynott) second; Frank (Officer P. J. Smith) third; Percy, Panama, Tony, Bill and Babe also ran. Time, :55 1-5.

Fourth race—Five and a half furlongs, selling, purse $250: J. Randolph's br g Leford (4) by Bonnie Joe—Lady Lee, 113 lbs., (Nolan) won driving; Diadi (4), 113, second; Azurea (5), 113, third; Lady James, Robert Mantell, Mark Kennedy, Moller and Tallow Dip also ran. Time, 1:07 3-5.

Fifth race—One mile, selling, purse $300: C. L. Stevenson's b m Madelle (5) by Sir Huon—Victoria B., 112 lbs., (Taplin) won easily; Transparent (aged), 112, second; Ora McGee, 107, third; Rey, Stolen Ante, Hannis and Eastman also ran. Time, 1:41 4-5.

Sixth race—Five and a half furlongs, selling, purse $250: D. McDermid's br g Briton (aged) by Lithos—Lady Winkle, 108 lbs., (Kirschbaum) won easily; Kitty Stanfield (4), 108, second; Lofty Heywood (aged), 111, third; Chas. Goetz, Russell McGill, Lillian Ray, Anne McGee, Arrowshaft, Sir Barry and Definite also ran. Time, 1:08 1-5.

Seventh race—Six furlongs, selling, purse $300: J. Randolph's ch m Princess Industry (aged) by Farandole—Work, 110 lbs., (Nolan) won driving; Butter Ball (aged), 110, second; Thistle Belle (aged), 117, third; Miss Folly, Custom House, Darkey, Clint Tucker and Mammy also ran. Time, 1:13 4-5.

Seventeenth Day—Thursday, September 9.

First race—Five and a half furlongs, selling, purse $250: W. J. Dunn's ch h Tight Boy (5) by Serpent—Azuba, 114 lbs., (Washer) won easily; Master Franklin (3), 107, second; Marta Mac (4), 114, third; Ida Pinack, Miss Tempo, La Cazadora, Flossie and Milton Barber also ran. Time, 1:07.

Second race—Five furlongs, Native Sons' purse, $200, for two-year-olds: Geo. Van Gorden's ch g Carl Roberts by Gen. Roberts—Janice Marian, 120 lbs., (Kirschbaum) won driving; Washoe Belle, 115, second; Aunt Sal, 120, third; Brooks also ran. Time, 1:02 2-5.

Third race—Six furlongs, selling, purse $250: Heppner Stable's b m Canapa (aged) by Canopus or Bedeck—Panapa, 115 lbs., (McGraw) won handily; Augustus Heinze (4), 115, second; John Hurie (5), 115, third; Hardy, Cecil, Roscas and Executor also ran. Time, 1:15.

Fourth race—Mile and a quarter, Golden Gate Handicap, value $1,395: John Lowe's ch g Brynlimah (5) by Bryn Mawr—Notlimah, 115 lbs., (Nolan) won driving; John Graham (aged), 107, second; Rash (aged), 107, third; Star Shooter also ran. Time, 2:06.

Fifth race—One mile, selling, purse $300: T. Hatfield's ch m Lady Young (6) by Henry Young—Masher, 108 lbs., (Brazal) won driving; Frazzle (6), 108, second; Christmas Eve (4), 108, third; Quick, Henry Walbank, Southern Gold, Electrowan, Lady M. M. and Delmas also ran. Time, 1:41.

Sixth race—Five and a half furlongs, Admission Day Handicap, purse $350: Tigue & Bussey's bl g Seneca (aged) by Disguise—Swiftfoot, 112 lbs., (Kirschbaum) won driving; Eureka (aged), 105, second; Orange Blossom (6), 108, third; Pajaroita, Kootenay, Theodorita and Headfort also ran. Time, 1:06 3-5.

Chantilly, premier stallion at El Palomar, had a nice representative in the five furlongs for two-year-olds Saturday, the first of the family to start at the present meeting. Bas Blancs (which can be freely translated as "White Sox") is the appropriate name under which the youngster parades, as he has the white trimmings all around well over the pasterns. He is an attractive scamp individually and with a bit of racing should make a good sort of a horse to take away from home, as he was barely beaten in his race Saturday by the more seasoned and experienced Hastings colt, Toastmaster.

* * *

The first of the special events for gentlemen riders was staged Saturday afternoon, the five furlongs for army horses, ridden by officers of the army, navy or marine corps, and furnished the crowd considerable enjoyment. Lieutenant Stevenson, owner of a small but select stable participating in the regular events, was rather favored by those present for winning honors, and the crowd had things doped out about right, as the Tejano took his mount to the front for the whole route, which was traversed, officially, in 1:07, though many of the wrist watch clockers at the club house had it a couple of minutes faster. Buffalo, who finished a gallant last, was slow to get away and slower still to stop, as he insisted on a dash on around for the full route, Lieutenant Christian subduing his runaway ambitions in time to head him in at the paddock gate the second time down.

* * *

George Van Gorden uncovered another good two-year-old of the General Roberts clan Saturday, Carl Roberts, winner of the five furlongs for that age. The race was marred by the bolting of Friskey after the break, his antics unseating Jockey Burns and interfering with Schulenburg quite seriously, there being "nothing to it" after the mishap save Carl Roberts. Even with Frisky a well behaved contender the Sacramento colt looked to have the legs of the party, as he won easing up and well within himself. There are those who say he is a better one than his former stable mate, Rose Marian.

* * *

Brynlimah, the consistent five-year-old in John Lowe's stable, showed his heels to the best horses on the track Saturday in the President's Cup, traveling the nine furlong route in 1:52 3-5, closely followed by Rash, from the California Stable. Celesta, without doubt one of the very best mares in the land, was an odds-on favorite even with an extremely heavy impost, ran a good race under the circumstances but failed to figure in the money, considerably to the disappointment of many supporters. Carrying twenty-one pounds more on her back than any other horse in the race she bucked the back stretch wind out in the clear, assuming the lead before reaching the three-quarters and holding it until nearing the last eighth, when the lighter weighted contingent all passed her. High class she is, but no horse can reasonably be expected to tote an anvil over nine furlongs in especially startling fashion.

* * *

Olin Gentry, who has been one of the most successful pilots at the meeting, has been sadly missed this week. Sunday morning while walking a horse in the stock stadium the animal got scared at a piece of wind-blown paper and lunged ahead with a kick, Gentry's arm getting the full force of the blow and breaking under the strain. The plucky youngster besought the doctors to "fix him up in a hurry as he just had to ride," but the Golden Gate meeting will be a thing of the past some time in advance of the day when he can swing full strength on a bridle rein.

* * *

Monday—Labor Day—was a "big one," as the crowd on hand was nearly if not quite as large as on opening day, and the spectators had good runs for their money, as five of the six races were won in hard drives in which two to four horses figured, while the sixth race was one of "those kind" that come now and then to relieve the monotony of things. There were three features that stood out prominently to make the race remembered—the poor start, the curling up of Henry Walbank and the running of Nebraska Lass. Always uncertain at the post, the Lass was practically left when the word was given that started the field over the long route of a mile and a sixteenth, but Leeds "hung 'em into her" and took up the stern chase, which is always proverbially long. To make things look still worse for her, Henry Walbank opened up a lead that the whole German army could have marched through without inconveniencing either Henry or Ceos, his nearest competitor. Not until well past the half did the Lass pass even the laggard Fairly, but once straightened away to the wire she showed a rare burst of staying speed, overhauling the field and winning with a couple of lengths to spare over Ceos. Henry? Henry Walbank? You want to know about that bird? Easy—like this: He took O'Brien's stretch demands as full speed astern signals and backed up so hard and fast that he could only show by a nose!

* * *

It isn't always the best horse that wins and this was the case in the feature sprint of the meeting, the Geraldine Handicap at six furlongs, raced on Labor Day. Under even conditions the race should have gone to Scarlet Oaks or Theodorita, probably the former, who was carrying 120 pounds to the 108 of Theodorita and the 97 of Orange Blossom. Seneca and Orange Blossom held the field at the post thirteen minutes, every one of which meant just so much taken out of the weight carriers. Then when the word was finally given, the Blossom, wheeled by an assistant starter, "lit running" and opened a lead of over two lengths from Seneca, Scarlet Oaks and Theodorita being the last away. Neither mare met with the best of luck in running and both closed wonderfully well, the long shot barely nosing out the "red 'un," with the chestnut girl only half a length away. Given a start without delay and a fair break at the gate the daughters of Dick Wells would easily have been one-two, with the odds a bit in favor of the Wingfield entry.

* * *

The Neal Stable had a bunch of bad luck in the fifth race Tuesday. With Nebraska Lass romping home Monday in the long route, Norford Rose on the improve and Dominica rapidly getting on edge they looked to be in line for earning some money, but racing luck decreed otherwise, at least so far as Dominica is concerned. Carrying quite a bit of money on the nose the daughter of Alvescot forged to the front near the club house only to stumble and fall, spilling Leeds in front of the field, several horses hurdling him and leaving him unhurt save for the jar. Dominica got up and limped on down to the turn where she was pulled up, investigation revealing that her right front leg was broken at the ankle. She was a consistent mare when at herself and will be sorely missed by her owner.

* * *

The ranks of the top jocks were again invaded Tuesday, this time by discipline. Starter Stevens gave O'Brien six days for misconduct at the post with Marie O'Brien, and when the boy failed to resist the temptation to "pop off" at Stevens' expense the six days were stretched to include the balance of the meeting. With Gentry crippled and O'Brien "afoot," Tommy Burns is the only one of the three leaders left in the game.

* * *

The Admission Day crowd was a good one and had six good races to enjoy, with plenty of tight fits at the wire to bring everybody to their feet with a whoop.

* * *

There is no getting away from the fact that Brynlimah is the real hero of the meeting, for on Thursday he added to his former laurels by running his best race yet in the Exposition Handicap, the richest stake on the program. The handicap was no child's plaything, either, as it was run at a mile and a quarter on footing that is none too good, against horses that are no mean foemen. Celesta, not in the best of condition, was scratched by Trainer Strate, leaving Star Shooter as the sole hope of the Nevada Stock Farm Stable. John Graham, who has not been the greatest success in the world since coming here, was a better horse than usual, and Rash, who had passed before the races from the ownership of Frisco Hoag to that of L. B. Wood for a consideration of $1,700, went to the post in good shape and carrying quite a bit of money. The quartet was not long at the post and went away to a good start, Rash, contrary to his usual custom, going to the front from the first, with John Graham nearest him, Brynlimah third and Star Shooter last after the first half was run. Taplin kept Rash out for a three length lead coming into the straight, maintaining a good command of the field until halfway to the wire, when John Graham and Brynlimah began closing up steadily, cutting down the distance between them and the flying leader stride by stride. Then the pace began telling on the brown fellow and first Brynlimah, then Graham, passed him, Nolan standing off Palm's drive by not more than a neck, while cheer after cheer schoed from the Presidio hills as the thousands present rose to the occasion. As a demonstration of real enthusiastic pleasure in a real horse race, the outburst was the topliner of the meeting, though not equaling the reception accorded White Sox at the end of the 2:06 pace at the harness meeting. Brynlimah was well handled and won on his merits, bringing his owner a nice little sum of something over a thousand iron men to help keep hinges on the stable doors when the winter winds start blowing. Jack Atkin formerly owned the gelded son of Bryn Mawr and Notlimah, but sold him to Lowe at an ordinary figure. He began improving and John lost him down in Kentucky in a selling race, later getting him back through a like medium. He was entered for a thousand in a recent selling event here, but John's estimate of him is probably several notches higher at present.

* * *

That thoroughbred racing has come back to stay and that a new day for his equine majesty, the horse, has dawned in California was the opinion most fully evidenced Thursday evening at the St. Francis hotel, when a goodly array of representative horsemen gathered round the banquet table as guests of the Golden Gate Thoroughbred Breeders' Association. Tributes to man's best friend were paid in heartfelt talks by Messrs. M. H. De Young, Charles W. Clark, Captain McKittrick, George Wingfield, D. O. Lively, W. F. Humphrey, James Woods, J. H. Rossiter, Porter Ashe, Major Whitney, Charles Butters, Colonel Foote, J. J. Nealon and others, the spirit so unanimously voiced promising much for the future welfare of the breeding and racing industry in California.

Hay Boy sold for $12,000. Stoughton Fletcher, of Indianapolis, is the new owner, and Richard McMahon, of Wherever-the-battle-is-thickest is the new teamster. "Welcome to our city" when the fall meeting starts.

VANCOUVER, B. C.

Vancouver, B. C., Aug. 20.—The last two days of the Vancouver Exhibition brought forth some good racing. The 2:30 pace on Friday brought Lady Hal again to the front and she stepped the first mile easily in 2:12¾. The remarkable thing in this race was the showing of Hal Bear, the horse that won second money, who was said to be almost entirely without experience and training but finished at the winner's throatlatch in both heats and shows the ear-marks of a high class pacer. Another thing worthy of mention is that the winners of both the first and second money were by Hal B.

Friday's other races were rather tame but Saturday produced three good races. In the feature race, the 2:15 trot or 2:18 pace, Scarlet Trent again won, but stepped the first heat in 2:12½ to do so. Tillamook Maid was at all times a close second and this daughter of Zolock will bear watching.

Hal Stewart, a brown gelding by Hal Mercury, was the next best, as Indian Hal did not seem to have any lick after the first heat. Bell Smith did not show anything like the class of her half sister, Lady Hal, while Prince Malone, after having gone two exceptionally good races for the amount of his training and racing experience, was decidedly off color on Saturday, having bruised his heel in warming up, and two hard races in one week without any previous racing experience seem to make him cranky.

In the second race both Morris Barker and Uncle Tom showed up well in the final heat, stepping a half mile in 1:08¾—pretty fair for green trotters—while in the special race Novela's third mile in 2:18½ stamp her as a pretty creditable trotter on a half-mile track. The summaries follow:

Vancouver, B. C., Aug. 20.—2:30 trot or pace, purse $500:

Lady Hal, b m by Hal B.....(Hogoboom)	1	1	1
Hal Bear, b g by Hal B.....(Bush)	2	5	2
Nigger Boy, bl g by Oregon Patch.....(Lance)	3	2	4
Duke, b g by Admiral W.....(McManus)	4	4	3
Myrtha Pointer, br m by Star Pointer (Loomis)	5	3	5
Glad Wren, bl m by Jubilee de Jarnette (Hawk)	6	6	6

Time—2:12¾, 2:16¼, 2:16¼.

Class C trot, halfmile heats:

Susie G., b m by Greco B.....(Steves)	1	1	1
Alma Lou, bl m by Kinney Lou.....(Mason)	2	2	2
Amaline Lou, b h by Kinney Lou.....(Steele)	3	3	4
Lou Nut, b h by Kinney Lou.....(Brown)	4	4	3

Time—1:13¾, 1:14, 1:15.

Aug. 21.—2:15 trot or 2:18 pace, purse $500:

Scarlet Trent, b g by Parovas.....(Thompson)	1	1	1
Tillamook Maid, bl m by Zolock.....(Woodcock)	2	2	2
Hal Stewart, br g by Hal Mercury..(McCullough)	4	3	3
Indian Hal, br g by Hal B.....(Wilson)	3	4	4
Bell Smith, bl m by Blacksmith.....(Cox)	5	5	7
Nic Nac, b g by Alcone.....(Russell)	7	7	5
Prince Malone, ch g by Kinney Lou.....(Loomis)	6	6	6
Truxton King, ch g by Idol Chimes.....(Nomas)	8	ds	

Time—2:12¼, 2:14½, 2:15¼.

Class B trot, halfmile heats:

Uncle Tom, bl g by Monbars.....(Lochead)	1	1	1
Morris Barker, b g by Walter Barker (Ripplinger)	2	3	2
Chromo, bl g by Moko.....(Bell)	3	2	3
Lou Nut, br h by Kinney Lou.....(Brown)	4	4	4

2:30 trot, special purse:

Al McK., b g by Bonnie McK.....(Bessellen)	1	1	2
Novela, b m by Letrado.....(Stetson)	2	2	1
Beauty B., br m by Woodcock.....(Hogoboom)	3	3	3

Time—2:24¼, 2:24¼, 2:18¼.

NOTES and NEWS

Anselot (1) 2:28½.
George Gano 2:10¾ under saddle.
Both are nice new world's records.

◈◈◈

Verbena Ansel (1) 2:26 is another new trotter for rince Ansel (2) 2:20½.

◈◈◈

While Suldine, the Considine candidate for the jun- r trots in the futurities, rejoices in a two-year-old ecord of 2:12.

◈◈◈

General Todd (3) 2:04¼ is also a brand new turf ing, his second heat at Indianapolis ousting the be- ived William from the three-year-old throne. Cali- rnia had notions about setting a new record for is age and gait but George Todd beat Bondalean it.

◈◈◈

Anselot's record places him in the championship rowd for a yearling trotting gelding, which fills a ng vacant "hole" in the best record tables.

◈◈◈

Charley Silva and Harry Cowell will both be on and from Sacramento to take part in Sunday's mat- nee at the Stadium, at which some good sport is romised.

◈◈◈

The winners of the 2:30 trot and the free-for-all rot at Centralia are both products of C. X. Larra- ee's Brook Nook Ranch in Southern Montana, Jovela by Letrado (3) 2:25 winning the former event nd Sargo by Keeler 2:13½ taking the free-for-all. y a strange coincidence the fastest time in each ace was 2:15¼.

◈◈◈

John Quinn, who came home some days ago from is eastern trip, has purchased Albaloma from I. L. lorden and has taken him to Sacramento to fit for he fall fray at the exposition. John owned him once efore and has faith in his ability to win himself out the future, as he hardly had a fair tryout on the ig line this season.

◈◈◈

After his arrival at Los Angeles it was found that Electric Patch (3) 2:09¼, the good four-year-old trot- er in the 1:55 stable, had gone through the big trot ere at the exposition on a pair of front feet that ust have pained him considerably, pus pockets eing found in the heels of each forefoot. The forma- ion was not in the nature of a corn, but seemed the lowly developed result of stonebruise. The heels ave grown out well and the lad will probably be ready" when the fall meeting rolls around.

◈◈◈

The record for three-year-old pacing stallions has een nibbled away a quarter of a second at a time ince Klatawah's day until Wednesday of this week, hen General Todd buckled into William's mark of :05 for a reduction of three-quarters of a second. he contest in progress was the Western Horseman uturity at Indianapolis, the General pacing the first nile in 2:05¼ and the second in 2:04¼. Press dis- atches state that the track was heavy, but do not ive the contending horse. Under any circumstances he race was a wonderful affair.

◈◈◈

George W. Wingfield, Nevada millionaire mining nan, announces that he is negotiating for the pur- hase of last last year's St. Leger winner, Black ester, for breeding purposes. He has sent his rep- esentatives, Messrs. Guilliams and Bamberger, to England to buy the horse. Mr. Wingfield has prom- sed Charles Boots the use of the horse at his stock arm at Milpitas, near San Francisco, Cal. Black ester is a four-year-old son of Polymelus and Ab- surdity, by Melton, and is a high class race horse. This year he won the City and Suburban Handicap with 126 pounds up and the June Stakes, at a mile nd a half, with 129 pounds in the saddle.—Thor- oughbred Record.

◈◈◈

A blooming political war has broken out between he governor and the state racing commission. J. A. Burnett and M. J. Dunleavy of this city, members of he commission under appointment by the former governor, have been asked to resign, charged with aving allowed betting to go on at the recent Over- and meeting although the law legalizes the pari- nutuel system and even goes so far as to provide the ercentage that is to go to the state and to the acing association. We can not see how the gover- nor's position will have any effect on the fairs this all and the mutual machines will probably be used n the betting as was done at the Overland. The commission has worked hard and put the county fairs of Colorado on their feet. The five members have devoted their services free and paid their own expen- ses in the effort to boost the racing game and keep t clean. It is not interested one nickel in the pari- nutuel system. The commission has absolutely pro- hibited bookmaking, has cut out the sale of intox- icating liquor on race tracks, has forbidden touts to practice their tricks, has seen that boxes were sold only to reputable persons and has even cut off tele- phones from the grounds to prevent bookmakers from operating outside.—Field and Farm.

Laramie Lad was a straight heat winner at Hart- ford on opening day, with Loe Blossom trotting 2-2-2.

◈◈◈

Peter Scott and Mirthful were each double winners for Tommy Murphy at Hartford, while Directum I. hung up a new record of 1:58½ for the oval at Charter Oak Park.

◈◈◈

Gay Patch, in the eastern division of the Savage stable, won another five-heater at Beloit, Wis., trot- ting the halfmile track right at 2:15. She continues to look like a real good four-year-old.

◈◈◈

Margot Hal "threatened" at Hartford Monday, but one good heat was all she cared for, thank you, and the judges allowed her to retire at the conclusion of a run of some three-eighths of the second mile.

◈◈◈

"Force of habit" caused us to put Marvin Childs down as Hal Boy's jock at Montreal, when it should have been McMahon, the wily Illinoisan having taken command of the pony pacer's campaign at that point.

◈◈◈

Spriggan still has that winning habit, annexing the thousand dollar 2:09 trot Monday at Hamline and equaling his old record of 2:08¼ again. These 2:08¼ miles are getting to be an old story with this slim barreled trotter.

◈◈◈

Leata J. can pace the two lappers, evidently, as she trimmed Waynetta at Greeley, Colo., in 2:12, 2:12 and 2:14¼. If these girls tangle up frequently and hit good going they are liable to do things to the Colorado pacing record.

◈◈◈

Clarence J. Berry, who sailed for Alaska immedi- ately after the June meeting at the exposition, ex- pecting to remain in the vicinity of his mining prop- erties until late in the fall, returned rather unexpect- edly a few days ago. By accident, one of his feet was made the "objective point" of a bullet from a twenty-two rifle, and a quick trip was made to civili- zation in the fear of complications of a serious nature developing. Fortunately the apprehensions were groundless as the victim progressed famously and is going about his affairs as usual. The accident occa- sioned considerable inconvenience and necessitated a number of changes in Mr. Berry's plans, but so far as real, head splitting pain was concerned was less serious than would have been a "beaning" by one of Brother Henry's pitchers whose fast one hap- pened to be a little wild.

AMORIST 2:15.

When next a horseman comes to me with a tale of the "biggest fast trotter alive," and tells me that I should see the giant one that he refers to, I am going to make him take to his heels—for I have seen Am- orist 2:15!

This stallion weighed 1,410 pounds last winter and balanced the scales at 1,385 when, after the stud season Johnny Gray of Topeka, Kan., began to pre- pare him for the races. Amorist stands 16.3½ hands, and his trainer about 15.1 hands, so there is a com- bination of giant and pigmy that you cannot beat, the world over. Johnny worked Amorist a mile in 2:13¼ before coming here, and I saw him step a quarter in a moderate mile in :31. He is a good gaited trotter, too, and the twelve-ounce front shoes which he wears appear as mere plates when seen on feet of such proportions. Zombro 2:11 was his sire, his dam being Zaya, by Baybird; second dam Mary Lou 2:17, dam of the noted Kinney Lou 2:07¾. He was purchased in California by his present owner, F. O. O'Reilly, of Helena, Quebec. Mr. O'Reilly had previously purchased All Style 2:10 from Amorist's dam, and then sold the horse to the Australians. He is a veteran in the business, having owned several celebrated old-timers and been familiar with Hamble- tonian 10 and nearly all the famous horses of that historic period. There is many a good story stored away in the memory of this astute Hiberian, and later on I hope to induce him to shed some of them for our readers' delectation.—Marque, Horse Review.

STOUGHTON FLETCHER BUYS HAL BOY.

"The most important sale of the meeting here was consummated on Tuesday when Hal Boy 2:05¼ passed into the possession of S. A. Fletcher, of In- dianapolis, for a price reported at $12,000," writes Tom Gahagan in his report of the Montreal meeting in the Western Horseman. "The handsome little gelding from the west has already been in nine races this season, starting three times at the exposition meeting at San Francisco, where he won once and was twice second, the last time in the $20,000 stake for the 2:06 class. At Cleveland, Detroit, Kalamazoo, Grand Rapids and the first week here he was the contending horse every time, but seemed to be under a hoodoo and could not win. Marvin Childs, who drove him in all of these races, was severely criti- cised for his manner of handling the horse, and the prediction was made that in the hands of some of the star Grand Circuit teamsters the little gelding would not be beaten. Fletcher bought the pacer during the meeting here and when it came to the start of the 2:10 pace on Tuesday he had to do a lot of ex- plaining to the judges to show there was no infrac- tion of the rule which makes a horse ineligible when purchased after 5 p.m. of the day preceding the race.

"Dick McMahon, who campaigned King Couchman for Fletcher last season, was put up behind Hal Boy in his last race, but the pair did not hit it off well together, Hal Boy decorating the bottom of the sum- mary at the finish, his poorest showing of the season. At that it is not a true bill, for everybody knows that the little horse possesses a lot of class, while McMahon is conceded to be in the front rank among the reinsmen of today. The pair will pull down more than one good stake before the close of the season, unless all signs fail. Hal Boy is an eligible to the $20,000 pacing stake at the fall meeting at San Fran- cisco ,and if he stays good he should win himself out in that race alone, as he will not have to meet Russell Boy or Judge Ormonde, his two most formidable Grand Circuit opponents, in that event. Of those which raced against him the past week Tom Mur- phy's four-year-old, Peter Farren, is the only one eligible to the San Francisco race."

Second Day at Hartford.

[Concluded from page 5]

the judges declaring Judge Ormonde distanced for foul driving. Peter Farren forced Russell Boy closely in the fifth heat, which was negotiated in 2:06, the slowest time of the event, after which the race was carried over, heat winners only to race to a decision tomorrow.

Professor Wm. Andrews and Volga won the two- year-old trot in slow time and with utmost ease, while Mirthful and Tommy Murphy straight-heated the 2:10 trotters. The summary:

Hartford, Sept. 7.—2:10 pace, purse $2,000 (unfinished):
Russell Boy, b h by Rustic Patenter.(Geers) 2 2 2 1 1
Hal Boy, b g by Hal B.....(McMahon) 1 3 8 4 3
Peter Farren, b h by Peter the Great....
.....(Murphy) 4 6 5 2 2
Lustrous McKinney, Aconite, Thistle Patch, Anna Carll, Judge Ormonde and Ashbrook also started.
Time—2:05¼, 2:05½, 2:04½, 2:05, 2:06.

Two-year-old trot, purse $2,000:
Volga, ch f by Peter the Great.....(Andrews) 1 1
Libya, br f by Peter the Great.....(Nolan) 2 3
Setzer Mac, ro c by Henry Setzer.....(Lasell) 3 2
Time—2:25¼, 2:19¾.

2:10 trot, purse $1,000:
Mirthful, b m by The Star of Patchen (Murphy) 1 1 1
Duchess, ro m by Allerteen.....(McDonald) 4 2 2
Guy Nella, br m by Guy Axworthy.....(Geers) 2 3 3
Airedale and Henry F. also started.
Time—2:11¼, 2:07¾, 2:08¾.

Third Day at Hartford.

Hartford, Sept. 8.—With only heat winners to con- test the tag end of the unfinished 2:10 pace, Russell Boy and Pop Geers had an easy victory over Hal Boy and Dick McMahon, the Silent Man's win being a popular one after the hard road he had to travel to get there. Single G., who has been down in the sum- mary of his last start or two, was right in form today and paced three winning heats in 2:05 or better, Rastus, from the McDonald stable, going an excellent race to win second money. Margaret Dru- ien in the fast trot and Deroche in the juvenile trot made those events featureless by winning as they pleased in straight heats. The summaries:

Hartford, Sept. 8.—2:10 pace, final heat:
Russell Boy, b h by Rustic Patenter.....(Geers) 1
Hal Boy, b g by Hal B.....(McMahon) 2
Time—2:06¼.

2:06 pace, purse $2,000:
Single G., b h by Anderson Wilkes.....(Gosnell) 1 1 1
Rastus, br g by Liberty Boy.....(McDonald) 4 2 2
Lelia Patchen, bl m by Dan's Brother...(Snow) 2 4 3
Major Ong and Baron A. also started.
Time—2:05, 2:04¾, 2:04¾.

2:04 trot, purse $1,000:
Margaret Druien, b m by Peter the Great....(Cox) 1 1
Lettie Lee, b m by Moko.....(Andrews) 2 2
Fair Virginia, b m by Zombro.....(Monahan) 3 4
Star Winter also started.
Time—2:07½, 2:06½.

2:24 trot, three-year-olds, purse $2,000:
Deroche, ch c by John A. McKerron.....(Geers) 1 1
North Spur, b c by San Francisco.....(Cox) 2 2
Morning Gossip, br c by Border Knight....(Gowan) 3 3
Time—2:11¾, 2:11½.

Fourth Day at Hartford.

Hartford, Sept. 9.—This was "Murphy Day" at Charter Oak Park, the Poughkeepsie wizard and members of his stable romping away with the entire program. Directum I. found footing to his liking for the first time lately, and showed his appreciation of the same by pacing an excellent exhibition mile in 1:58½, which equals the season's record and clips a second and a half from the local track record, which was established at the even two-minute mark sixteen years ago by Star Pointer. The little red 'un was tiring at the wire, but held out gamely.

Murphy's other victories came with Peter Scott in the 2:21 trot and Mirthful in the 2:14 class, both events going in straight heats. Both horses were winners earlier in the week, so they have paid a good dividend on the trip to Charter Oak Park. Neither was in serious difficulty at any time during their races, McCloskey and St. Frisco handily trotting to second money in their events. The summary:

Hartford, Sept. 9.—To beat 2:00 pacing:
Directum I., ch h by Directum Kelly....(Murphy) Won
Time—1:58½.

2:14 trot, purse $2,000:
Mirthful, b m by The Star of Patchen (Murphy) 1 1 1
McCloskey, br g by Theodosius.....(McDonald) 3 2 2
Dick Watts, b h by Gen. Watts.....(Rodney) 2 3 3
Director Todd, Mary Warren, Todd Temple, Belsona, W. J. Leyburn, The Guide and Centerville also started.
Time—2:06¼, 2:06¾, 2:07¾.

2:21 trot, purse $2,000:
Peter Scott, b h by Peter the Great.....(Murphy) 1 1 1
St. Frisco, b h by San Francisco.....(Geers) 2 2 2
Jess Y., br m.....(Steele) 3 4 3
Loe Blossom, Ames Albingen, Truesda, Cockatoo, Maid, Tommy Todd, Solitaire, Lou Guy and Dolly Dixon also started.
Time—2:08¼, 2:08¼, 2:06¼.

DUBUQUE, IOWA.

[Western Horseman.]

The Dubuque people showed that they like the harness horse by coming out in large numbers each afternoon, despite the fact that the weather was far too much like the brand that the Eskimos enjoy. The racing, which was contested on the three-heat plan, proved to be of the snappy variety, and while this system has some objectionable features connected with it, I believe that it is a system that the public wants. The trainer that "lays up" cheats no one but himself, while the one that goes out for the coin each heat, and gets to the front, will get just what he earns. I believe, though, that the idea of drawing positions before each heat should be done away with, even though every heat is a race, but if a horse that has drawn tenth position in the first heat wiggles through his field and finishes fifth or sixth, he should be entitled to that position in getting away for the second heat. It happens in many cases that a horse will "trot his head off" getting to a position whereby he may get away in the front tier the next round, and then in the drawing for the heat will get a worse position that he had in the preceding. But, of course, on the other hand, "every heat is a race" and everyone has an equal chance in the drawing for the positions.

The horses were called to the track by a bugler, and then paraded in their positions past the stand. This is a stunt that every secretary should copy. The crowd then has an opportunity to look the starters over, and too, it sort of gives the impression that something worth while is about to take place. I believe that Secretary Kenney was the first manager of a race meeting to introduce this, and in my way of thinking, the idea is an excellent one. The success of this meeting means that Dubuque is again back on the map as a racing town, and that high class meetings can be given there in future.

* * *

The California trotter, Spriggan 2:08¼, in the stable of Will DeRyder, was the real hero of the week, the bay gelding being winner of both the 2:17 and 2:24 trotting classes, each for a purse of $1,500. In his first race, which came on Tuesday, the coast trotter did not have to beat 2:10¾ to win, but in the 2:24 trot on Thursday, the four-year-old filly, Miss Perfection, that had finished second to him on Tuesday, forced him to trot the second mile in 2:08¼—equaling the record taken by him in the $20,000 stake at San Francisco. This mile was a wonderful one, for the Dubuque track is far from being a lightning fast course, and the temperature was not the kind that trainers desire when for world's records. In this mile, the unsexed son of Baron McKinney was over to the half in 1:03¼. I believe that Spriggan can trot in 2:06 or better over a fast track, and if he stays in his present form, he will be a hard nut for most any trotter to beat. The races:

Dubuque, Iowa, Aug. 24.—2:17 trot, purse $1,500:

Spriggan, b g by Baron McKinney..(W. DeRyder)	1	1	ro
Miss Perfection, b f (4) by Gen Watts(F. Childs)	2	2	1
Princess Margrave, rn m by Margrave....(Hall)	6	3	2
Irving Heart, b h by Great Heart.....(Fullager)	8	7	3
Slip Past, b m by E. M. R.....(Taylor)	3	5	6
Baron Bates, b h by Baron Wilkes Jr. (Chandler)	5	6	4
Caroline, b m by John B. Donovan..(J. E. Jones)	7	4	5
Anzonetta, b m by Lewis Wilkes....(H. Thomas)	4	8	7

Time—2:10¾, 2:10¾, 2:11¾.

Money division — Spriggan, $522.50; Miss Perfection, $492.50; Princess Margrave, $185; Irving Heart, $82.50; Slip Past, $67.50; Baron Bates, $55; Caroline, $50; Anzonetta, $45.

2:20 pace, purse $1,500:

Sayde Densmore, ch f (4) by Don Densmore.... (H. Thomas)	1	2	2
Hal Actor, br h by Actonward.....(J. B. Jones)	3	3	1
Barlight, br h by Hal Burk.....(Mann)	2	1	5

Hokola, br h by Potosi.....(Blackman)	5	4	5
Henrietta, 8-5-6; Rose D., 6-8-7; Lady Richmond, 7-7-dr.			

Time—2:10¾, 2:11½, 2:11.

Money division—Princess Welcome, $330; Italian Aubrey, $111; Blanch B., $70; Zomblack, $69; Hokola, $20.

LIVE STOCK FREIGHT RATES, P.-P. I. E.

Favorable arrangements with various transportation companies have been made by the Panama-Pacific International Exposition at San Francisco, by means of which extraordinary advantages have been provided live stock exhibitors for the exhibition and sale of their stock. In broad terms, it can be said that shipments to San Francisco for exhibition, from points throughout the greater part of the United States, will be returned free to point of origin, provided charges have been prepaid in full one way, and that shipments not returned will have a refund of 25 per cent of one way charges, except terminal ones.

Roads party to the Transcontinental Freight Bureau have agreed to return free to point of shipment live stock (except race horses) exhibited at the exposition, provided full freight, terminal and switching charges have been prepaid one way. Such stock must be offered for transportation within 90 days after the close of the exposition. This provision applies to shipments originating in Chicago and points west thereof in the United States, except in Arizona, California, Colorado west of Canyon City and Manitou, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming west of Cheyenne, and El Paso, Texas.

On live stock exhibited but not returned, a refund of 25 per cent of the freight tariff (except terminal charges) will be made.

The same provisions have been made by the Pacific Freight Tariff Bureau for live stock shipped from points in Arizona, California, Colorado west of Canyon City and Manitou, and El Paso, Texas.

On shipments originating at and returned to points in the United States and Canada east of Chicago and north of the Ohio and Potomac rivers, horses, mules and other valuable or fancy animals, except cattle, sheep and hogs, will have to pay full rates up to Chicago. Cattle, sheep and hogs upon which full rates have been prepaid one way will be returned free.

All exhibits (except horses and mules) shipped from points in the United States lying east of the Mississippi river and south of the Ohio and Potomac rivers, if unsold and reshipped within 60 days after the close of the exposition, will be returned free from the junctions of the southern and western lines, provided full tariff rates were paid one way.

One man in charge of stock forwarded by freight train service will be passed with a shipment of one carload, but no return pass will be given; with two to five cars, one man will be passed in both directions; with six to ten cars, two men will be passed in both directions; with eleven or more cars, three men will be passed in both directions. On shipments of cattle and mules by passenger train service, the same provisions will apply. On shipments of horses by passenger train service, two men will be passed one way only, no return passes being given. Attendants will remain in the cars with the stock; oth wise they will be charged regular tariff rates.

These conditions do not apply in the case of t Louisville and Nashville Railroad.

Additional details concerning shipment of li stock to the exposition are furnished on applicati by D. O. Lively, chief of the exposition's departme of live stock.

PRINCE ANSEL YEARLINGS TROT FAST.

Rains again interfered with work at the Kentuc Trotting Horse Breeders' Association track the lat part of August and but little of any consequen was done. The fastest mile noted was that of t three-year-old bay filly, Petress Burton, in the stal of Ed. Willis, which trotted a handy mile for t colored trainer, according to his watch, in 2:08 last half in 1:02¾. This filly is the property Herman S. Crossman, of Long Island, who recen bought so many good horses through Willis, whi he is now racing through the Metropolitan Circu Petress Burton was not shipped with the rest, s being left with Willis to prepare for the futurities which she is eligible. The filly has always been f and seems better mannered than last season as two-year-old. She is from the same family as t cracks, Peter Volo and Volga, her dam being a ha sister to their dam, Nervolo Belle.

Possibly a move just as sensational was that of t bay filly, Verbena Aisel, owned by John W. Con dine of the Woodland Farm, Woodland, Cal., and member of the stable of H. C. Moody. She reel off a mile in 2:25 for her trainer. The filly is Prince Ansel, the premier stallion at the farm, a her dam is Verbena Mac, a daughter of the succe ful sire, Directum Spier 2:11¼. It is the fastest m of the season over the local track for a yearling.

It was not the only good performance for the ye ling Prince Ansels, as the bay colt Anselot, broth to Prince Lot 2:07¼ and Lottie Ansel (2) 2:14 trotted in just 2:30, with the last quarter in 35 seconds, and his training was begun much later th that of his stable companions. The brown filly Morgan Axworthy 2:17, out of Eloise, by Wiggi 2:19½, trotted a nice mile in 2:35, last half in 1:: Moody worked his good two-year-old, Suldine, a m in 2:15, in company with Thorn Worthy 2:11¾, ste ping the last quarter in 32 seconds. But of all the performances none was better than that of the thr year-old filly Busy Lassie, by Peter the Great 2:07 out of Miss Busy, by Clay, and her training dat from this spring. She is the property of Mood having been bought by him from George M. Steve Lancaster, N. H., who has bred a number of fa trotters.—Western Horseman.

Peter Scott took the Charter Oak into his keepi in easy fashion. Seldom has there been a tamer ra in the history of that classic stake.

THE HOLSTEIN-FRIESIAN IN EUROPE.

The average annual yield of the Holstein-Friesi cow in Holland is estimated by Prof. Hengerveld the Royal Veterinary Institute of Utrecht to 7,952 pounds. The American consul on the Isla of Jersey estimated the annual yield of the Jersey be 2,400 pounds of milk. From Friesland, where t Holstein is the exclusive breed, there, there was e ported in 1874 to England 29,796,592 pounds of butte This was in addition to Friesland's home consum tion of butter and exports to other countries, makir an average of 117⅛ pounds for every square mile, 205¾ pounds for each cow. The islands of Jers and Guernsey exported 100,464 pounds of butter, a eraging 1,647 pounds for each square mile. In t three years ending in 1910 Holland exported 71,40 000 pounds of butter, or 11 per cent of the total e port trade of the world, and 121,700,000 pounds cheese, or 23.8 per cent of the world's total expo The only countries in the world that exported mo butter were Denmark, which exported 196,000,0 pounds of butter in the three years, or 36.1 per ce of the world's total export, and Russia, which e ported 120,600,000 pounds, or 18.6 per cent of t export trade of the world. As the leading breeds each country, the Jutland in Denmark and the K gory in Russia, are both descended from the Dutch Holstein breed in Holland, it tends to prove t wonderful influence that the Dutch breed has ha upon the world's butter commerce.

In Canada, the world's greatest cheese exportir country, which exported 178,700,000 pounds of chees or 34.8 per cent of the world's export, the Holste breed occupies a predominant place. In Holla many cows have lately been officially tested for t length of their lactation period, which is held to 328 days. The best record so far made is by t Holstein cow Schoon Ries 2d, which made 18,7 pounds of milk and 913.96 pounds of butter in 3 days, the butter and milk record for a cow of a breed in Europe.

While the Dutch have not made the phenomen records which have been made with Holsteins America there is no country with a race of as goo uniform producers. Prof. I. P. Roberts places single herd of 30 mature cows in Holland above an thing like it in the world. The Illinois Experime Station states this of Holland:

"A poor farmer is seldom found, as the life of t Hollander has been devoted to one subject—Dair

[Concluded on page 12.]

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

THE PLEASURE SIDE OF MONTEREY.

[By H. T. Payne.]

The citizens of Monterey are justly proud of the portant place their city occupies in the history the great West. To the visitor they point with ide to the old custom house, from whose staff the ars and stripes were first unfurled from land to kiss e breezes of the broad Pacific. They will show you ith an air of see-how-old-we-are, the spot where ebastian Viscano landed in 1602. Then coming own to the dawn of their own civilization, they will ike you to where that great pioneer missionary, unipero Serra, landed his little band of faithful ranciscans in 1770. They will show you the ery tree under which he celebrated the first mass, nd by which he planted the first Christian cross orth of San Diego. They will point to the spot on heir beautiful bay where rode at anchor the old rigate Savannah, when Commodore Sloat demanded nd received the surrender of Mexican authority over ll that territory lying between the present northern oundary of Mexico and the southern line of Oregon, nd east to the Rocky Mountains. They will show ou the rose bush, said to have been planted by eneral — then Lieutenant — W. F. Sherman, and a lark-eyed senorita, in 1847, the day before he took is departure, and for whom he promised to return efore the tender cutting should unfold its blushing uds. They will point with pardonable pride to the old Colton Hall where assembled those grand old ioneers in that constitutional convention that wrote he organic law which placed upon our starry banner he brightest gem that glistens on its field of blue.

All those and many more scenes of historic importance will be pointed out to claim the attention, and excite the interest of the visitor; but how seldom do they call his attention to those greater attractions with which their country abounds in a most remarkable degree. How seldom do they call his attention to those health-giving sources of recreation with which the men, and women, too, of the present day are more concerned than they are with the landing of missionaries, with constitutional conventions, or with the raising of flags. As the dawning years of the twentieth century is an age of business rivalry, contention and bustle, and thereby an age of mental worry and physical strain, it is also an age characterized by a demand for seasons of mental relaxation and tissue building pastimes. Fortunes that have been made in the busy whirl of business activity are ready to purchase at any price the renewal of the wasted body and those exhilarating pleasures that make for the relaxation of the long over-strained mind. To such as these Monterey possesses attractions far greater than her old Custom House, her Colton Hall, or her Mission Carmel. Attractions that appeal not alone to the curious, or to the student of history, but to the whole people that are hunting peaceful rest, health-giving recreation and exhilarating out-door pastimes.

To enumerate these we will consider first the location of Monterey and the Hotel Del Monte. Between the southern shore of the Bay of Monterey and the Pacific ocean, nature, in planning the delightful spot where these resorts are located, erected a range of pine-clad mountains. The raw winds of the ocean, filtering through the trees of these mountains, reach Monterey and Del Monte in a gentle breeze laden with the health-giving balsam of the pines, while Point Pinos to the west and Point Alones, still nearer to Monterey, have so projected themselves into the bay as to cut off all eddying currents of wind that may sweep in from the Pacific. Thus these two favored resorts, nestled in a grand amphitheatre of mountains and pines, is protected even from the strong trade winds of the ocean, giving them a climate warm in winter, and with just that degree of coolness in the summer conducive to health and vigor. In front of this delightful spot stretches the waters of the bay, fanned into sufficient activity by the gentle breeze to give variety to its tints of blue, and agreeable motion to the many pleasure craft that rise and fall on its heaving bosom. Then, back from the farther shore, rise the redwood clad slopes of the Santa Cruz range, with the blue summits of Ben Lomond and Sierra Prieta clear-cut against the sky. Back of Monterey rise the pine-clad mountains in their varying tints of green. To the west, the new Government barracks and their park-like parade grounds set in a frame of graceful pines. To the east and across the great beet fields of the Salinas delta, the eye rests upon the blue summits of the peaks of the Gavilans.

Then, the famous "Seventeen-mile-drive" over the mountain, through the pines, and firs, and cedars, and back by way of the ocean shore and Point Pinos, the southern headland of the bay. Since more facile pens have attempted to describe this wonderful drive and have failed to portray one-half of its grandeur or its delightful charms, I would be rash, indeed, to venture on the field and add another disappointment to the long list that have preceded me. But without any attempt at description, I venture the assertion that there is no other spot on earth, with a pleasure drive of like distance, that presents such a variety of charming pictures, or that can produce the exuberant delight to be found on this drive. The passage over the mountain; the ride under the towering pines; the little glimpses down the rugged canyons, or into peaceful vales, may have their rivals in other lands, but there is no other view of the grand Pacific ocean like that which rivets the attention as the automobile or four-in-hand emerges from the pine-clad hills and hurries down to Prospect Beach. There are other coves, grand and inspiring, but none so weirdly beautiful in all its settings as that little indentation hewn by the hand of time into the rock-bound shore, and known by the romantic name of Chinese Cove.

There are other headlands and rocky points, lashed by the restless waves and raging storms of the mighty ocean, but there is only one Cypress Point, for nature never imitates, or attempts the impossible. There are other trees that find a foothold in the meager crevices of the granite rocks and flourish where no sustaining soil seems present, but there are no others so firmly rooted in the storm-lashed rocks, and so grotesquely picturesque as the Monterey Cypress. There are other rock-bound shores whose pinnacles, and arches, and caves, carved by the erosion of unnumbered aeons, hurl back in harmless spray the angry waves that lash their sides, but none with that peculiar individuality of beauty, form and character possessed by those along the shore skirted by this famous drive.

Pleasant as it is to record the lasting impressions made on the memory by the scenic splendors that surround these peerless resorts; pleasant as it is to inhale the balm infiltrated into the sea breezes during their passage through the pines, I must desist for the present, for more exciting sport awaits me. Yonder by the wharf our launch is waiting, and we will soon be in the midst of a sport whose exhilaration quickens the pulse and sends the red blood of the sportsman tingling through every vein. Look out over the blue surface of the bay and note the course of yon flock of birds that seem to be pursuing a school of sardines. The bow of our little launch is pointed toward them; and as her keen prow turns the wave like the rude plowshare turns the yielding mould, and we leave a foaming wake behind us, our rods and lines are adjusted and a hook-impaled sardine cast over from the port and starboard quarters. Barely has the necessary line been paid out when whiz-z-z goes the reel, for we are among the salmon and one has taken the hook. The churning of the propeller is at once stopped, and the fight with the gamy fish begins. The hard bent rod betokens a heavy fish as he takes yard after yard of line in his frantic rush for liberty. But the strong arms of the angler hold him taut, paying out only sufficient line to prevent a breaking strain. The water parts, a gleam of silver is seen above the surface as the bright sides of the fish reflect the rays of the sun; a splash, a turn of his wiry form and he is again in his native element. He was in the air but a second, but it was long enough to show the man at the other end of the line that he had hooked a forty-pounder with fight enough to tax his strength and skill. Stopped in his mad rush, he now changes his course and comes quartering toward the boat. The rod straightens and the slackened line must be reeled in promptly or the prize will be lost. By skillful work the line is kept taut, and the happy angler's eye gleams with a new light as the reel again sings its accompaniment to another rush of the big quinnat, for he feels the inspiration of the battle royal that is now on. The fish is fighting for its life with all its strength, coupled with no small measure of cunning. Glance for a moment at the angler's face. The eye sparkles with animation; around the mouth plays a smile of supreme satisfaction, of pleasure sought and found. The close-pressed lips mark a determined resolve to conquer, while over the whole face rests an expression of careful attention given to every pressure on the rod and every turn of the reel; and all showing that he is in the midst of an enjoyment that fills the mind, the heart—the soul, it you please—with the keenest of satisfaction. At last, after half an hour of this superb sport, the huge king salmon is brought to gaff and lifted into the boat; and the angler, with tired arms, and exercise enough to whet his appetite, takes his seat with a countenance beaming with joy.

Such is the grand sport—healthful, invigorating sport, which the bay of Monterey yields to those who cast their lines in its waters. The salmon season is now on and good catches running as high as twenty to thirty to the boat are now being made. From the establishment of a fish hatchery on the other side of the bay, jointly by the Southern Pacific Company and Santa Cruz county, this grand sport is destined to increase and furnish recreation to generations yet to come. At present the quinnat, or king salmon, are found in abundance during the summer months, and range in size from ten to forty pounds. About ten years ago some fifty thousand silver salmon were planted in the streams tributary to the bay by the Santa Cruz hatchery, in the hope that this variety, which seek the smaller streams for their spawning grounds, would make this grand bay their adopted home. From the abundance of food the bay affords this hope seems to have been well founded, and has added another charm to this section, for the experiment was successful.

But salmon is not the only fish to be found in Monterey bay. White sea bass, striped bass, steelhead, yellowtail, barracuda, several varieties of the cod family, as well as endless list of the smaller fishes, abound and furnish fine sport to those seeking the pleasures and benefits of out-door recreation.

Through the courtesy of Mr. J. K. Oliver, president of the Promotion Committee of Monterey, several years ago the writer was enabled to inspect one of the multitudinous curiosities that from time to time are encountered in the waters of Monterey bay. It was a fine specimen of the Trachypteris isakawae, one of the ribbon fishes of the pelagic class, found occasionally along the Japanese coast, but seldom encountered in these waters. This fish, which resembles a giant sea horse, created great consternation at the time among the local fishermen, who are usually well versed in everything piscatorial in these waters. Several years ago Dr. David Starr Jordan devoted much time to the study of fishes in Monterey bay, and made the assertion that all fishes of a migratory nature in the world at some time or other visit this wonderful bay, a statement fully verified by this rare Japanese visitor. This fish has no real economic value, but from a scientific standpoint it is possibly the most wonderful ever taken on this coast. It was sent to Stanford University for preservation.

To the devotee of the gentle art of angling, who wishes to whip the mountain streams for trout, Monterey can furnish him as fine sport as he will find anywhere. The beautiful Carmel—what memories that name awakens—with its delightful pools and silvery ripples; its scenic setting of mountain and forest; its open glades and enchanting dells, can never be forgotten by those who have visited it. Near the mouth of this stream stands the old Mission Carmelo, erected in 1770. The valley here opens into broad stretches of fertile soil, but above this open vale is where is found

"Its dark abysses, its transparent coves,
Its tranquil bays, its forest-gilded edge,
And all the blissful haunts the angler loves."

It is an ideal trout stream, and always furnishes the finest of sport to those who visit its upper waters. The fish are usually keen for the fly and gamy in their fights. By the enterprise of the people of Monterey this stream is restocked nearly every year, as well as by the natural run of steelhead from the ocean, thus keeping the supply always at the high mark. Besides the Carmel, the San Jose, the two Surs, and a few other smaller streams rarely fail to furnish an ample reward to those who visit them.

Within a reasonable ride or drive from Monterey, and over better than the usual mountain roads, can be found deer in good numbers, and these close to some of the finest camping grounds to be found in the State. In fact, this sections is the favored locality of many of the most experienced deer hunters of central California.

To the man with the shotgun and the trained bird dog Monterey county has especial attractions. There are few sections where quail can be found in greater numbers, easier of access, or grounds more conducive to comfort for either the man or the dog. All along the Salinas river from where it empties into the bay, up to its source in San Luis Obispo county, the call of the game little quail is heard. On the sand hills and mesa, even away a few rods from the surf back to the mountains, good shooting can be had on grounds that it is a comfort to shoot over. Up the Salinas valley there are a number of open canyons and foothill glades where these birds are to be found in wonderful numbers. Across the mountains in the Carmel and other little valleys can be had very fine quail shooting. The general open character of the grounds, the well equipped hotels and excellent livery service which characterizes these resorts, is also a consideration of no little importance to him who looks for comfort in his recreation.

Monterey and Del Monte, hid away as they are on the shores of a bay designed for man's peaceful enjoyment; hid away from the noise and bustle and turmoil of a busy world, and bathed in a quieting, dreamy atmosphere, are rapidly becoming the chief Meccas of the pleasure-seeker. Here he can find a climate which furnishes an outing season co-extensive with the yearly calendar. Polo, golf, and tennis grounds; riding and driving over roads that are ideal, and through scenes of beauty and absorbing interest; bathing, boating and sailing; fishing of some kind always ready for his enjoyment, and deer and quail shooting in season. With such a variety of pastimes there can be no chance for ennui at these resorts, no moping days when recreation is sought and not to be found. No moments when the siren voice of pleasure is not calling: "Come forth into the open air—the sweet, balmy air, and by the pursuit of the varied pastimes offered, build up the wasted tissues of the body, and through the exhilaration of their enjoyment renew the vigor of the tired mind."

Drink Jackson's Napa Soda.

THE RIGHT TO FISH.

A curious injunction suit has been brought in the United States Court in this city, states the Chronicle, editorially.

"According to a dispatch from Sisson, one Robert Casaita, of that place, has been served with a temporary injunction from the court forbidding him to fish on 'private preserves' along McCloud river.

Possibly, that which is of more interest than the fortunes of Casaita, or the fish, is how on earth the United States Court gets jurisdiction of the case. The McCloud river is not, we believe, a 'navigable stream,' and, if it is, the shades of Jefferson and Madison and Patrick Henry, should they be wandering in this State, would be inclined to commit shade suicide if they discover that the constitutional power of Congress 'to regulate commerce among the several States and with the Indian tribes' is construed to give authority to a Federal court to determine where a man might go fishing in the State of California.

As to the issue involved, it is not made clear in the dispatch. In the case of small streams dividing landed properties, it is usual for the deeds on each side to run to the center of the stream. In that case, the owners of both sides would be the owners of the land under the stream, and would apparently have power to exclude trespassers, no matter what their object. But State, and not Federal, law has been supposed to be the law to be invoked in such a case.

In the case of larger streams, the land titles usually run to the banks on each side, the stream itself, and the land under it, remaining public property, whether State or Federal depending on what is shown by the abstract of title. But whether State or Federal, the law of this State gives, we believe, express authority to fish, in season, in public waters, and we know of no Federal law against it, or of any good reason to suppose that in any case State law would not prevail. If the land under McCloud river is public land, we do not see how any one can be lawfully prevented from wading on it and catching all the trout he can in the proper season.

As to the equities of the case, the streams of the State are regularly stocked with fish at public expense, and that is most distinctly not done for the sole benefit of the landowners along the streams, but for the general welfare, as the Constitution of the United States expresses it."

A test case will, it is reported, be brought to decide whether or not the fisable streams of the State are the property of the State and whether fishing on private preserves along such streams can lawfully be prohibited, is to be brought before the United States District Court in this city.

Casaita will be supported by the State Fish and Game Commission in his fight for the right to fish in the McCloud river. The order to show cause why he should not be prohibited from fishing in the river bordered by the lands of the Bend Company in Siskiyou county was issued by the United States District Court last Saturday upon the complaint of the company, a Nevada corporation, that they had been damaged to the extent of $5,000.

Casaita asserts that he has a right to fish in the stream because it is stocked with fish by the State. The company charges he is a trespasser.

President F. M. Newbert of the State Fish and Game Commission states that the supervisors of Siskiyou county have the right to condemn strips along the river on lands riparian under a State statute passed in 1910 in cases where the bordering lands are uncultivated. He said that the Commission will be represented by legal counsel in the federal court when Casaita's case is argued.

THE LATE GEORGE W. ELLERY.

George Whanton Ellery, member of the Ellery Arms Company of San Francisco and prominent member of the Olympic and Union League clubs, passed away suddenly last Sunday while on the way from Monte Rio to his home at 1511 Broadway, Alameda. Mr. Ellery was stricken at Fortieth and Shafter streets, Oakland.

Mr. Ellery had resided in California a half a century. He was born in Newport, R. I. He is survived by his widow, Mrs. Blanche M. Ellery, two daughters and a son, Mrs. Charles Jennings, Mrs. Stanley Runyon, and John Ellery. He was a brother of William Ellery of San Francisco, Christopher Ellery of Napa, and Miss Ann Ellery of Rhode Island.

The deceased was well and popularly known among the ranks of local sportsmen and also became prominent in Coast kennel affairs a decade ago. He was a member of the directorate of the San Francisco Kennel Club up to 1907 and also the mainstay of the Oakland Kennel Club for several years. His fancy ran to cocker spaniels, a breed which he did much for during his active career in dogdom. He bred and exhibited a number of high class cockers, Champion Spiden and others.

George Ellery, as he was familiarly known to a host of friends and acquaintances, was noted for a most pleasing personality, and was the happy possessor of all of the endearing and respected qualities that go to make up a man loved by his associates and having the confidence of his business connections. We offer our sincere sympathy to his surviving relatives, a sentiment that we feel confident prevails with all who knew our departed friend in life.

FLY-CASTING CONTESTS.

San Francisco Fly-Casting Club candidates for gold medal honors in the Stow lake fly-casting contest met last Sunday forenoon and Saturday afternoon, when the contests were resumed after a sixty-day interval, getting trout dividends from mountain creeks meanwhile.

While the accuracy percentages demonstrate the rodsters' skill in practical trout fishing performances, the long distance exhibitions appeal to the general observer. Some good scores were made in light tackle long-distance casting, for instance: E. A. Rogers, 115½ feet (within six inches of the recent tournament record).

In heavy salmon tackle fly casting, E. A. Rogers led with 157 feet (just five feet less than the international tournament 1915 record, and the best up that recent performance of Fred N. Peet, 162 feet). He followed with a back score of 145 feet.

The scores in light tackle accuracy, event 1; dry fly accuracy, event 2; quarter-ounce lure accuracy, event 3; and quarter-ounce lure distance, event 4; quarter-ounce lure "slam" cast, event 5; light tackle distance fly, event 6; salmon fly distance, event 7; "in-and-out," 'event 8, follow:

BLACK BASS CLAIMED TO BE A MENACE.

Few of the younger generation of fishermen who, each Sunday, may be seen along the banks of the Sacramento, ever consider that the sluggish but edible catfish and many of the other fish which find favor with the anglers in these waters are not native to these streams, but have been brought here from half way across the continent. So long have the catfish, the striped bass, the black bass, the carp and a few other varieties been inhabitants of the Sacramento river that few of the old-timers remember much about the planting, says the Sacramento Union.

It is now more than forty years when, following the planting of eastern catfish in the river, the small boys of Sacramento began catching this fish. Many of the present disciples of Izaak Walton who are past the half-century mark will remember the time when the river levee broke and the waters came up to the old R-street levee (there was no Y-street levee at that time). Someone discovered that this back water had brought the catfish, then a stranger to most small boys of the west, up to the levee and instantly there was a great scramble for fish lines, hooks, raw meat and angle worms.

At that time the most plentiful fish in the Sacramento river was the perch, which since has gradually dwindled away. Fishermen of the '70's also caught large quantities of dace, a fish that has almost disappeared since. In the last quarter of the nineteenth century sturgeon still were numerous in the Sacramento, and set lines put out over night would often have six or eight of these great fish, weighing from 50 to 300 pounds, fast hooked in the morning. Now they, too, have gone.

Those who have observed the piscatorial life of the Sacramento river believe that the striped bass, which was imported after the catfish, and the black bass, particularly the latter, are responsible for the changes in the balance of the fish. The bass of all varieties are voracious fish and few other varieties can live in the same stream with them, the fortunate few being fish armored with spines which make them unpalatable to the cannibal bass.

Because of this capacity of the bass to destroy the young of other fish, as well as their own, many fishermen of the State look to see the balance in the river life further upset, it being their prediction that the black bass, which is now no longer a market fish, will in time cause the disappearance of the salmon, their argument being that the black bass inhabits just such streams as the salmon spawn in and in which the young salmon fry live.

It was about 1885 that the European carp was introduced into these waters. In this vegetable eating fish, which since has become such a nuisance wherever meadows are overflowed because of its propensities for rooting up grass and other green growth, California has some first-hand evidence of what nature is likely to do when an animal is removed to a new habitat and the old restrictions of environment removed. All this may be but another case of the kind such as the English sparrow planted in America, the American muskrat planted in Australia, or the English rabbit also introduced into Australia.

GOSSIP FOR SPORTSMEN.

Wherever else in the State doves may be plentiful Fresno county seems to be slightly in the lead. The birds in large numbers are reported to be frequenting the Kaffir and Egyptian corn sections and sunflower patches, where they feed. Vineyardists, however, bar the man with the gun and dog, by reason of damage shooting does to the vines.

Sporting goods dealers and hunters in that section are in accord that the present season promises to surpass in enthusiasm and numbers of participants any previous year. It is stated that 60,000 shotgun shells were sold to Fresno sportsmen during the two day rush preceding the opening day. At some places long lines of hunters formed to make application for licenses. Hunters who were out the first day nearly all returned with limit bags, fifteen birds. They reported the shooting could not be better. Motor trips were a big factor in putting hunters in position for the opening fusillade. Popular dove-hunting sections are along the San Joaquin river, around Sanger and Clovis, and at points between Fresno and Mendota on the West Side.

Sacramento sportsmen found good shooting in the ravines and valleys between Lincoln and Auburn. Dave Ruhstaller, G. Newbert, W. Ogg, E. Pipera and G. McRae made up on successful hunting party in that section. Capital city hunters are puzzled in one respect. Up that way dove shooting is only good during warm weather.

Just where the birds go when the warm days are over is the question. When cooler weather ensues, the warm valleys, which have been frequented by flocks of thousands of doves, are deserted save for a few stragglers. The birds no doubt take flight for the warmer southern districts. They leave early in the season the upper foothills when it grows colder, and keep on moving to warmer quarters from time to time.

Doves are fairly plentiful in Sonoma county, which condition tempted J. Giorgi to shoot a few birds before the season opened. Justice Small of Sonoma suggested that $25 would be the price for such carelessness. The amount was paid.

Gray squirrels are also in season now. G. Carponi, however, shot one rodent out of season. He squared the indiscretion in Judge Grigsby's court at Napa by paying a $25 fine, supplemented with $10 more for being minus a hunting license.

* * *

The price of shotgun shells and rifle cartridges is advancing throughout the United States, it is claimed, owing to the enormous consumption of ammunition across the water. A further increase is intimated by sporting goods dealers later on. Possibly shells that cost 75 cents a box of twenty-five now may cost 85 cents before long.

* * *

There seems to be a slight increase in the number of deer carcasses brought into the city recently. Trinity county hunting sections are reported to be well stocked with bucks. Siskiyou county can be put in the category of a hunting paradise. Supervisor W. B. Rider of Klamath National Forest has a force of seventy uniformed forest rangers on duty. These men are instructed to keep in touch with hunters and camping parties and direct them to the best hunting and camping sections. Feed has been abundant this season, the bucks are fat as butter, and most of the visiting hunters have been made happy with a limit bag of bucks.

Very few bucks have been killed in the hills near Livermore this season. Of those bagged, a forked-horn, killed in the upper Arroyo valley by D. Sachan, weighed when dressed 217 pounds. Santa Cruz hunters are still taking a fair toll of venison. Three nice bucks were killed Sunday by William Featherston and Horace Lockhart along Bean Creek gulch, and by Glen Ashley and William Hayes in the Zyante creek section.

* * *

The sale of deer hides is allowed by the new State law; that is, a hunter may sell the hides of two deer he has killed in one season. But before a hide can be sold the owner must secure a leather tag, issued by the State Fish and Game Commission. To procure the necessary tag it must be shown by affidavit, that the buck or bucks were legally killed by the affiant, before a county clerk or justice of the peace will deliver the sole leather tokens. Complying with this provision of the law, the State Fish and Game Commission has had made a quantity of leather tags and they are now being distributed to county officials throughout the State.

* * *

The incentive that leads the hunter to the mountains in deer season is not that he may be lucky enough to kill a deer and cut from it one or more of the quarters, that he and his friends may eat. True, the hunter who is lucky enough to bag a deer will nearly always save one or more of the quarters for said "feast," but first he wants to keep the head or the hide—and in most cases both. The hope of getting the head or hide as a trophy is the incentive that spurs the hunter on.

he main essential in all this, however, is to first your deer. After that the elated hunter must the hide and that portion of the head showing horns, to comply with the new law now in force. how many hunters know how to skin a deer erly? The following method is recommended: skinning heads, the slit should be made up the of the neck, so that the throat of the finished hy will show no seam. Cut around the neck, to the shoulders and brisket, then open up from center of the top of the skull, just behind the ers, and slit down the top of the neck as far as end of the neck skin.

ter this make a straight cut to the base of each er, your three cuts thus making a "Y." Work he skin of the neck. To detach skull, turn head side and slip the knife in between the base of skull and the first vertebrae; this severs the mus- and tendons. Then turn the head over and at the operation.

fter the head is free on both sides give it a ach and detach the skull. Cut the cartilage of ears close down to the skull and pry the skin y from each antler by inserting a small wooden ge under the skin and tapping on it. Peel the back to the eye sockets, but take care here that do not cut the eyelids.

ext peel the skin off as far as the lips, being ful of the skin around the eyepits. After reach- the eyes cut close to the bone all around, in r that the cartilage may be left attached to the . Cut through the cartilage well back of the rils and you will find the skin entirely free of skull.

ub plenty of fine salt into the entire surface of skin, roll it up and let it lie until morning, when hould be examined closely for soft spots where salt has not worked in and hardened the tissues. ve these soft spots down and rub salt into them. skin and skull should now be hung up in a dy place where neither dogs nor vermin can h them. Remember never to dry a skin by the or in the sun.

ake the opening slit by extending the belly cut along the throat between the jaw angles. Open bottoms of the feet. Remove the skin of the , but leave the bones in position. Detach the ll and clean it out (nice job, too, that). Split the from the inside and clean out the ears. After eading and salting the skin, roll it up flesh to h. Complete the operation in the morning by bing cornmeal or ashes on it, scraping off all fat salting again.

FISH LINES.

ecent reports from Eel river fishing resorts state t a steelhead run is on. Most of the fish are all—half-pounders, but larger trout were also com- up stream; a 13½ pounder was the largest taken Greig's pool last week. Ned Bosqui, Nat Boas and e Sachs are already on the river, and will be rtly followed by other local rod and reel experts. he recent trip of W. L. Gerstle, John Seibe, T. C. rulff, Walter Mansfield and others; Fred N. Peet Chicago and John Waddell of Grand Rapids, to San Francisco Fly Casting Club's loge on the ckee river was greatly enjoyed by the Eastern itors. The whole party got full baskets of fish. t's 2-pounder was the largest trout landed.

ake Tahoe anglers are enjoying good fishing at sent, particularly at Rockaway bay. Near Glen ine fishing in the small Sierra lakes is reported ellent.

ccording to telegraphic reports from various ther river points, trout fishing has been picking a bit recently. In the vicinity of Blairsden the er is clear and trout are paying more attention to patterns. Baited hooks are also giving good re- ns. Two-pound trout are numerous enough to ke this sport lively. From Keddie comes word of ra good fishing at Prattville in the Big Meadows i also near the Neiss dam. In the creeks near lden, fishing is said to be particularly good. Bait ermen get good catches, but the fly anglers are ring the best luck.

At Big Bar many visiting anglers have all been king excellent catches recently.

Restocking the streams of Marin and Sonoma nties with trout fry, planned by members of the lifornia Anglers' Association for last Saturday, was stponed. The railroad officials required unimpeded ht of way for the holiday traffic. The regular ist party of the club last week, at the club rooms, s attended by a large number of members and ests.

* * *

A neat, conventional-sized pocket edition of the w California fish and game laws has been issued, d is now ready for distribution to sportsmen and ers by the State Fish and Game Commission.

* * *

The National Association of Fish and Game Com- ssioners convened in this city September 7, 8 and at the Sutter Hotel. Ever since this association s formed at a meeting in the Yellowstone Park in 2 it has had a powerful influence in shaping the licy of fish and game conservation throughout the ntry.

* * *

Motion pictures were taken of fish-planting opera- ns recently along the American river when El Do- lo County Rod and Gun Club members and others were interested. In Placer and El Dorado counties about 656,000 trout fry have been liberated this season—a restocking of, it is claimed, about 5000 miles o ftrout fishing streams. Millians of baby trout have been planted in the waters of the State this year.

* * *

Not only fishermen of California, but those of the entire United States are beginning to be aware of the fact that the system of fish and game protection afforded by this State, coupled with the systematic work of the Fish and Game Commission, is making the fishing in California better with each passing year. As the Saturday Evening Post stated in a recent issue, "Contrary to the experience in all other States, fishing in California is going ahead." And many wielders of the rod testify that the State never has had such fishing as it enjoys this season.

Thus it is possible for the man visiting some of the lakes to catch an Eastern brook trout, whose habitat is New Hampshire. Hardly moving from his tracks, he may take a Loch Leven trout, native of Scotland; a brown trout, of German origin, or one of the several native varieties of trout, whose numbers are kept up by regular plantings. And all of this is the work of the Fish and Game Commission, coupled with better legislation and the support of the sportsmen of the State.

It is a big task that the Commission has before it. If the lakes and 26,212 miles of running streams in California were confined into one stream 60 feet wide and 30 feet deep, it would circle the globe more than 20 times, being 504,000 miles long. To keep this amount of running water properly stocked with fish a large hatchery is required, and this the State of California has in the Sisson hatchery, which is the largest trout hatchery in the world. Through the work of the hatchery and the other smaller ones, California will liberate this season 19,000,000 trout fry and 20,000,000 salmon.

* * *

Speaking of the better protection given fish and game of late years, F. M. Newbert, President of the Fish and Game Commission, states: "Much of the old-time destruction could be laid to the door of aliens. These people came to this country with the idea that they were free to do as they pleased and so they shot game in and out of season and dynamited streams to get fish. Records of dynamite sales, and sales of the cheap single-barrel guns in Sacramento, for instance, show this. Now the foreigner has acquired a healthy respect for the game laws.

The work of planting young fish is a rather difficult task, requiring constant care and attention, but, thanks to the use of autos and auto trucks in place of horses and rigs, it is much more simple than in the old days. The rapid movement of the trucks keeps the water in the cans agitated sufficiently to aerate it without artificial methods, so much of this work is obviated. With slow-moving horse and rig it was necessary for one or more men to stand over the fish cans with cups, constantly dipping up water and putting it back.

Then, too, trips that formerly required hours can now be made in a half or a quarter of the time, and this helps by shortening the time the fish are existing in unnatural conditions. Arrived at the streams the cans containing the fry must either be set in the stream until they are the same temperature as the running water, or water from the river must be dipped into the can until the two are the same. A difference of a few degrees is fatal to the young fish.

As showing the success of modern methods of planting, not more than 10 trout to a can were dead when the young fry were released in the American river a week ago. A few years ago losses of ten times that number would have been considered a good record."

At the Traps

Garden City Tournament—O. N. Ford last Sunday gathered in the feature event of the first day of the annual registered shoot of the San Jose Blue Rock Club when he captured the doubles championship of California with 45 out of 50—25 pairs. A. F. Baumgartner of San Jose was second with a score of 41. Ted Cooper, the Tacoma crack shot, turned in a 39.

The high amateur average for the day was shot by H. Pfirrmann of Los Angeles, 172 outof 180 birds. He had but a short lead over Bob Bungay of Venice, 169, Ford 168, A. Flickinger, of Vallejo, 168, and George Anderson, 167.

Andy Flickinger won the miss-and-out event on 43 straight, while Cooper made the long amateur run of the day by smashing 70 clays in succession.

In the professional ranks, R. C. Reed and Hugh Poston, both of San Francisco, divided honors with high averages of 172 out of 180. Reed made the long run for the day at 105 straight.

The scores, on 180 singles, for the day were: H. Pfirrmann 172, R. Bungay 169, O. N. Ford 168, A. Flickinger 168, Ted Cooper 164, L. Lorenson 163, N. A. Howard 163, C. H. Nash 162, Ada Schilling 161, C. A. Arques 159, J. P. Haese 157, J. T. Down 155. R. C. Reed 172, Hugh Poston 172, L. Hawxhurst 168, G. Holohan 166, G. Ellis 134, J. Brenan 127.

Doubles, 25 pair—O. N. Ford 45, A. F. Baumgartner 41, Ted Cooper 39, George Anderson 37, Bob Bungay 37, C. H. Nash 37, Pfirrmann 36, Arques 35, Mrs. A. Schilling 33, J. P. Haese 29, A. MacCaffrey 26, H. Cline 19.

The shoot closed Monday, September 6. R. H. Bungay and H. Pfirrmann tied with 386 out of 410 for high amateur average. H. E. Poston won the high professional average with 391 out of 410.

The miss-and-out race Monday was won by J. T. Downs of San Jose with 22 straight. Of the special events for women, Mrs. Ada Schilling, San Jose, won the Miss Hammond trophy with 18 straight and the O. N. Ford trophy with 198 out of 230. H. Lorenson of Newman won the O. N. Ford championship with 49 out of 50.

Miss G. Meyers of San Francisco won the Ruth A. Pepple trophy with 17 straight targets.

The summary of Monday's shoot follows:

H. Lorenson 230—217; R. Bungay 230—217; O. N. Ford 230—216; L. Baumgartner 230—215; Toney Prior 230—215; H. Pfirrmann 230—214; A. Flickinger 230—207; J. P. Haese 230—206; N. A. Howard 230—206; C. R. Arques 230—200; Mrs. Ada Schilling 230—198; E. W. Jack 230—197; J. T. Downs 230—196; H. Stelling 230J189; G. H. Anderson 230—187; E. C. Smith 230—177; Miss Meyers, 230—158; C. H. Nash 100—88; A. Bridgford 100—87; G. McCaffry 100—84; Dr. Topham 100—83; H. E. Poston 230—219; L. Hawxhurst 230—217; R. C. Reed 230—213; G. Holohan 230—198; W. R. Ellis 230—187; James Brennan 230—166; J. G. Heath 110—91.

Saturday's preliminary shooting shows:

O. N. Ford was high over the whole field with 98 out of 100. H. E. Poston, 95, and L. Hawxhurst with 92, came next. J. P. Haese of Santa Barbara was next to Ford in the amateur ranks. He smashed 90.

Other results in the preliminary were. N. A. Howard 89, J. T. Downs 89, R. Bungay 88, E. W. Jack 86, C. R. Arques 83, Mrs. Ada Schilling 82, E. C. Smith 80, G. Holohan 78, J. Brennan 73, and G. Ellis 63.

* * *

Butte Echoes—Renfro of Warm Springs won the Twohy and Confarr medals at a recent shoot of the Butte Rod and Gun Club. The weather was ideal and good scores were made. Besides Renfro, the out of town contingent which took part in the shoot included Donnolly of Chicago; Morgan from Salt Lake; Messrs. Gemmett, Hillard, Munn, L. G. Smith, and Mathewson from Anaconda; Messrs. Coleman, Tippett, Williams, Valiton, and Larabie from Deer Lodge.

* * *

Closing Live Bird Shoot.—The gold medal winners of the California Wing Shooting Club for the season of 1915 are: First, Ed L. Hoag; second, Toney Prior; Third, P. J. Walsh.

The club held seven monthly trap shoots, each contestant shooting at twelve pigeons, the distance handicaps ranging from 26 to 33 yards. The final shoot came off last Sunday. The leaders in the medal race up to then were Hoag, with three birds lost out of 74; Prior and Du Bray five down each; Walsh six and Nunan seven pigeons behind. Hoag scored eleven birds, which gave him a total of 80 out of 84, the top score for the season, and annexed the first medal.

The scores for the final club shoot at the Sobrante trap grounds follow:

Medal match, 12 pigeons, distance handicap, high guns:

T. Prior	33 yds.	2212 1222 2212—12
P. J. Walsh	29 "	2111 1111 2122—12
H. Stelling	28 "	1222 1222 1112—12
E. L. Hoag	32 "	2222 0122 1222—11
C. C. Nauman	30 "	1101 1111 1111—11
C. A. Haight	26 "	0211 1121 2102—10
Dr. G. J. Sweeney	27 "	1221 1010 1211—10
Capt. Du Bray	31 "	1010 1212 2110— 9

Purse match, 12 pigeons, distance handicap, high guns:

Capt. Du Bray	28 yds.	2212 1111 1122—12
E. L. Hoag	29 "	1111 2122 1122—12
T. Prior	32 "	2221 2112 1222—12

FIXTURES.

Registered Tournaments—Pacific States and Territories:

September 5-6.—San Jose Blue Rock Club, O. N. Ford, Secretary.

September 6—Tacoma Gun Club, Tasoma, Wash., "Old Policy"; Carl Coon, Secretary.

September 13, 14—Omaha Gun Club, R. D. Vaught, Secretary-Manager, Omaha, Neb.

September 24—Medford Gun Club, Dr. E. R. Seely, President, Medford, Ore.

September 27—Portland Gun Club, J. A. Addleman, Secretary, Portland, Oregon.

October 4, 5—Roswell Gun Club, E. P. Malone, Secretary, Roswell, New Mexico.

November 2—Williams Gun Club, F. E. Lowe, Secretary, Williams, Ariz.

November 5, 6, 7—Arizona State Tournament, under the auspices of the Tucson Blue Rock Gun Club, W. A. Julian, President, Tucson, Ariz.

Peters Points.

At the Missouri State shoot, St. Louis, Aug. 12-14, Mr. C. H. Reilley of Salt Lake City, Utah, won high amateur average on all targets, including doubles and handicaps, with the excellent score of 575 ex 600, with Peters "steel where steel belongs" shells.

THE HOLSTEIN-FRIESIAN IN EUROPE.

[Concluded from page 8.]

ing. . . . Holland has often been called the cow's paradise and it well deserves the name. . . . Here is a country where land is worth from $500 to $1,000 an acre and in many cases naturally no better than much of our Illinois land. Yet these people pay their rents or interests on money invested by producing butter and cheese which they place on the European market in successful competition with that produced in America on land of less than one-fifth the value. They do this in spite of the fact that they cannot produce the amount of digestible nutrients per acre that we can with either corn or alfalfa. The secret of their success is efficient cows, excellent care, co-operation, and superior quality of butter and cheese."

What is true of Holland is also true of nearly every prosperous dairy community in the world. The first secret of success lies in the fact that the Holstein breed is used. Other breeds have been introduced into Holland but we find in the department of state reports that "as a rule the offspring of foreign breeds has proved inferior in the more essential particulars and therefore the importation, breeding, and raising of such foreign cattle, no matter how fine the breed, have generally been unprofitable."

From Holland the Holstein breed under its various names of Dutch, Holland, Friesian, North Holland, or under its various offshoots of Jutland, Oldenburg, East Friesland, Belgian, Flanders, and Buttenburg has gone on to become the predominant dairy breed in every leading dairy country on the eastern continent. George May, director of the Weinhenstep Agricultural Station, asserts that the "Dutch cattle constitute the type of the properly so-called Lowland race, which extends throughout Netherlands, Oldenburg, Flanders, Normandy and Denmark."

Belgium imported 123,201 cattle into the country in 1878, of which 107,008 came from Holland. The same proportion holds true in other years, proving the overwhelming popularity of Holland or Holstein cattle. Consul Wilson of Brussels says that the farmers of that district will have nothing to do with any but such cattle as produce the largest amount of milk upon the smallest amount of feed, and for this they prefer the pure Dutch cow or her crosses with the Flemish animal. Consul Stewart of Antwerp asserts that "the cow is valued only by her milk-giving qualities and for this purpose the Dutch are much the best." Consul Tanner of Liege states: "The breeds to which I allude present now the outward appearance and the results for both the dairy and for beef cattle that cannot be surpassed in the world. This is more particularly true of the breeds known here as the Hollandais or Dutch cow and the Flamande or Gelbian cow. . . . The Hollandais or Dutch cattle on the whole I think are generally more esteemed than any other, though the Flemish, which belongs to the same family, holds almost equal rank. This breed of cows (the Flamande, which is an offshoot of the Holstein breed), ranks almost equally with the Dutch, even in North Holland, and in France, Germany and Switzerland are esteemed above any English breeds by all those who know cattle."

The price of the Dutch or Holstein breed is given from $118 to $180 and of the Flamande from $118 to $252.50. The Shorthorn brings $65 to $85, the Ayrshire $65 to $80, and the Jersey from $60 to $75.

In France it is stated in the department of state reports that "the Flemish breed also probably originated on the shores of the North Sea whence came the breeds of Holland, Schleswig-Holstein, and Jutland, all remarkable for their milking qualities." It is asserted that "the Flemish breed is pre-eminent as milkers in France," and the "Flamande (also the same race-stock as the Holstein breed) is essentially valuable for the dairy and is destined to predominate in the dairies of the northeast of France."

J. H. Sanders, appointed by the United States Department of Agriculture to attend the International Exhibition at Hamburg in 1883, which was adjudged to be the best exhibition ever held on the continent, states in the Bureau of Animal Industry report:

"The feature of the cattle show was the dairy stock, and in this I never saw anything that could approach it. Hundreds of Friesians or Holland cows were there with grand udders and every indication of milk producing capacity of the highest order. I am now more than ever convinced that all things considered the Dutch cow is the general dairy cow par excellence of the world. . . . I saw no breeds of live stock at this show the importation of which to the United States in my judgment should be encouraged or recommended more than the Holland or Friesian Dutch dairy cattle and the Oldenburg."

As the Oldenburg is of the same race stock as the Holstein and as there were Ayrshires, Shorthorns, and nine of the leading dairy breeds represented, it is indeed a high tribute to the remarkable quality exhibited by the Holstein breed in Europe to state that the Holstein or Dutch race alone should be encouraged to be imported into America.

In Denmark under the auspices of its agricultural society all the leading dairy breeds were given an impartial trial. The Jersey, Shorthorn, and other breeds were tried out in competition, with the result that the Danish farmer has discarded those breeds to place his reliance on the Jutland and the Red Danish breeds. As the Jutland breed originated from the shores of the North Sea, it is another testimony of the merits of the Holstein.

Illinois Experiment Station Bulletin 140 asserts that the "million dairy cows of Denmark are confined almost exclusively to two breeds, the Danish Red of Zealand and the islands and the Jyske or Black and White cow of Jutland. . . . In the dairy world it has remained for the little countries of Denmark and Holland to achieve economical production of high-grade dairy products. In no country does everything give place to dairying as it does in Denmark and Holland and in no country in the world are the farmers so prosperous and self-respecting."

In Russia Consul General Stanton of St. Petersburg states that the "Cholmogory, originally a cross between the Dutch cattle and a native breed of Archangel, is the best known race and is kept up by a constant importation of Dutch bulls. . . . The Cholmogory are remarkable for their yield of milk and are the favorite breed in St. Petersburg, where a great number of cows of this breed are bought." At Mustiala in Finland under the shadow of the Arctic Circle the Holstein proved to be the hardiest and most profitable cow under the most severe conditions. In a test lasting from 1885 to 1896 the Holstein breed averaged 3,159 pounds of milk and the Ayrshire 2,376 pounds of milk per year. The profit as given in the Experiment Station Record is for the Holsteins $38 net and for the Ayrshires $33. The Finnish native only averaged $23 and the Angler $26.50.

In Norway and Sweden as well as in Denmark the cow test association idea has been developed to a wonderful degree, and with the scales and the Babcock test to go by the dairymen are gradually discarding all other breeds for the Holsteins. In the Malmohus district in Sweden 2,092 Holstein herds averaged 7,648 pounds of milk for yearly production, 4 herds having an average of 12,126 pounds. These figures may be taken as the wonderful average that the Holstein breed has maintained in Scandinavia.

In England the most stringent laws have existed against the importation of cattle from the continent. Yet despite these difficulties the prolificacy of the Holstein breed is so great that with the few black and white cows that have succeeded in being brought into that country the Holstein breed association is the fastest growing cattle association in England. Being organized in 1909 and having only 50 m bers in 1911 it had increased to a membershi almost 350 before 1915. Holstein cattle are the most esteemed and sought of any dairy bree the island. Dr. James Withycomb of the Or Experiment Station, in reviewing the much hi prices that have been received by British Holst at public auction comes to the conclusion that "British farmer is apparently losing faith in milking Shorthorn." In a public sale at Clock H on Nov. 6, 1914, every Holstein animal offered for brought more than $500 and the average was $: for the sale. This is not only the highest ave for dairy cattle that has ever been obtained in land but it is the record sale of dairy cattle for world. On the other hand a recent dispersion sa a noted milking Shorthorn herd averaged $12 In the Jersey sales in 1914 the averages reported from $73.50 to $105.66, with $367.50 as the hig price for any animal at any of the sales.

The Jersey breed, according to the United St consuls in England, is "more fitted for amateur f ers and opulent families than for ordinary dairy poses" and "they are often kept as lady pet private families but are only partially used in reg dairies to give a little coloring to dairy produ The United States Department of State asserts: England about the year 1640 a bull and some c were brought into Holderness from Holland. T cattle were of large bulk and the cows better mil than were known and on this account they v greatly esteemed and used for crossing with na cattle. The cross showed great and lasting impr ment. The new breed formed by the admixture crossing of these imported animals soon asse their superiority over all other races. Such was origin of the Shorthorn."

Canadian Experiment Bulletin 13 asserts that mating accounts for "the excellent milking quali of the early Shorthorns and also for their s horns, both being inherited from their contine sires."

According to other eminent authorities the Hols breed also helped to form the foundation stock the Ayrshire breed.—Harold McAlister, Breeders' zette.

FINDERNE PRIDE JOHANNA RUE

How fleeting is the glory of a Dairy Cow Queen is best exemplified by the eclipse cast over the yield of the erstwhile leader of the dairy world, Finderne Holingen Fayne No. 144551 H F H B, by her stable mate, Finderne Pride Johanna Rue No. 121083 H F H B, the new world's champion. The reigning Queen, like her predecessor, is one of the brilliant luminaries of the Holstein-Friesian breed, and her remarkable performance, announced June 16 last by the Advanced Registry Office of the Holstein-Friesian Association of America breaks all world's records for butterfat production, not only those of black-and-white cattle, but for all other breeds, by yielding in 365 consecutive days 28,403.7 lbs. of milk (13,211 quarts) containing 1117.47 lbs. of butterfat. The average yield per day, therefore, was slightly over 36 quarts of milk and 4 lbs. of butter per day.

The Holstein-Friesian heifer, Finderne Holingen Fayne, the deposed Queen, whose achievement was the world's record for the short period of but three months, produced in a like period 24,612.8 lbs. of milk (11,448 quarts) containing 1,116.05 lbs. of butterfat.

The new world's record cow, Finderne Pride Johanna Rue, calved at the age of five years, four months and four days. Her sire is Johanna Rue 3d's Lad No. 26939 H F H B and her dam is Jondine Pride No. 60247 H F H B. She was bred by Bernard Meyer of Finderne, N. J., and is now owned by the Somerset Holstein Breeders Company of Somerville, N. J.

The test was made under the supervision of the New Jersey Agricultural College. In a seven-days' test beginning 358 days after she calved, the new world's champion produced 602.4 lbs. of milk and 28.831 lbs. of butterfat, and for a second time established a new mark in the division of records begun not less than 240 days after calving.

THE FARM

A GREAT POULTRY SHOW AT THE P.-P. I. E.

An extensive poultry show, expected to be the greatest ever held in this country if not in the world, will be conducted from November 18 to 28 at the Panama-Pacific International Exposition at San Francisco. Fowls from points throughout the United States and from abroad will enter the competitions, for which both cash prizes and trophies will be awarded by the exposition and by many breed record associations as well as some individuals. The exposition will give cash prizes varying in amount from $2 to $5, to the best five cocks, hens, cockerels and pullets, and for the best pen, in each breed and variety of poultry recognized in the 1915 edition of the American Standard of Perfection, including pea fowl, guinea fowl and pheasant. The same prizes will be paid on all non-standard and former varieties. The awards will be made for the best egg type, best meat type, and best type for both purposes. Those who desire entry blanks must write for them as they are sent only on request. Applications for entry blanks that have been received already give promise of a magnificent display of poultry.

Entries will close November 15. The fee to pay the cost of feeding, watering, cooping, handling and caring for the birds is $1.50 for a single bird, $4 for a pen of one male and four females and $7.50 for a large display cage capable of holding 10 or 12 birds. Express rates are very reasonable, those from New York, Boston, Philadelphia and other points on the Atlantic coast being very little more than those from Kansas City, Chicago and Indianapolis. For example, the round trip express rates for 100 pounds of chickens from the points following are: Los Angeles, Cal., $5.20; Seattle, Waseh., $3.30; Kansas City, $17.10; Dallas, Texas, or Omaha, Neb., $16.70; Boston $21, New York $20.80, Buffalo $19.60, Chicago $18.60, Denver $13.50, Philadelphia $20.60, Indianapolis $18.80. It is possible to get from 10 to 20 birds for each 100 pound shipment. The carload rate is 25 per cent less than these. Full details concerning the transportation, exhibition and care of poultry is furnished on application to D. O. Lively, Chief of the Department of Live Stock.

Autumn being the most pleasant season in California, the birds may be exhibited under the best auspices at the exposition.

The American Poultry Association will hold a convention in San Francisco during the period of the poultry show, and November 16th has been designated by the exposition as "Poultryman's Day," upon which due recognition and honor will be given the Great American Hen.

Every judge of the show is among the best experts in the state or section from which he comes and has a state or national reputation, and each has a license from the American Ptulary Association. Each has been assigned to the varieties upon which he is the best authority and upon which he has shown the greatest ability to pass with satisfaction to the leading breeders.

The Panama-Pacific International Exposition has more than fulfilled the most sanguine expectations of the most optimistic. By August 25 the attendance had passed well beyond the 11,000,000 mark and the influx of visitors from far and near is increasing daily. The fact that the exposition is now out of debt and making a profit guarantees the fulfillment of all its plans for a series of brilliant live stock shows.

In connection with the poultry show there will be an educational program, at which leading poultry experts of the country will deliver instructive addresses on many subjects of interest and value to poultry breeders. One particularly notable feature of this program will be an address on the subject of "Selecting the Layers," by Prof. James Dryden of the Oregon Agricultural College, the chicken eugenist, widely known as "the Luther Burbank of Poultrydom," whose experiments in breeding have attracted world-wide notice.

The American Poultry Association gold medal, diplomas, and specials will be offered at the Panama-Pacific Poultry Show. These medals are valuable and should prove a drawing card. These prizes include one grand championship gold medal, and a special medal for nearly every variety of poultry.

The American Buff Rock Club will hold its national meeting at the Panama-Pacific International Exposition and offer its National Cup and a large number of other specials. The Pacific Coast District of the Buff Plymouth Rock Club offers its District Cup to club members, for best cock, cockrel, hen and pullet, "The Maples," Milton, Oregon, offers the Maples Cup for the best display of not less than 12 Buff Rocks. The Plymouth Rock Club of Southern California offers four beautiful silver cups, one for the best pen of Barred Rocks, one for the best pen of White Rocks, one for the best pen of Buff Rocks, and one for the best pen of Partridge Rocks.

Red Rreeders Club of the World offers two silver cups, one on Single Comb Reds and one on Rose Comb, each valued at $50. THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio

HORSE TOO WELL ENTRENCHED FOR AUTOS TO INJURE.

When the automobile came into general use the gradual extinction of the horse was freely prophesied. But humanity is still far too much attached to the noble beast. It is true there has been considerable displacement of the horse by the automobile and motor truck. Perhaps it may seem strange, in view of this, that the price of horses has gradually increased since the automobile came into existence, but it is a fact. At the present time, of course, there is slight depression, due to the war and other influences, but it is only temporary. In general, if price be a standard of valuation, horses are more highly valued than ever before.

One automobile manufacturer puts down to the account of the horse a large amount of waste. He points out that nearly all the hay crop of the country, nearly all the oats, and much of the corn goes to feed the horse. In the United States the aggregate value of the three crops is over three billions a year. In Canada it would be several score of millions. He figures out that if the horse were banished the area given to these crops could be devoted to other production, and thus the huge cost of supporting the horse would be saved. It is sad to think that such fertility of mind should not bring forth greater fruit. Even if the automobile and motor truck were able to do all the work to which horses are put—which they cannot—there wiuld still be as high, if not higher, cost of operation. For certain purposes, such as cartage on paved streets, or moving heavy loads, the motor truck may be cheaper than horses. but the cost of keeping a horse is assuredly no more than would be the cost of operating substitute automobiles, allowing for renewals within the life of the horse. If you do not pay for the horse you pay for the automobile. And the horse still has many merits and atartctions that no mechanical contrivance can match.—Rural World.

FEEDING SPINELESS CACTUS.

I wish to mention at this time but one of the recent tests made in feeding cactus to dairy stock. A cow owned by C. M. Moody, dairyman of El Centro, Imperial Valley, Cal., was fed 62 pounds of cactus per day with 18 pounds of alfalfa hay for a period of 30 days. Previous to beginning the test the cow was fed an average of 42 pounds of alfalfa hay and six pounds of cotton seed per day. The results of the feeding test (sworn to by E. J. Clark, manager of the Clark creamery, M. C. Moody, owner of the Home dairy, and A. W. Swanson, mayor of El Centro) show an increase of 60 per cent of butter fat. Reduced to dollars and cents, the cactus feeding test shows a profit per cow per 30 days of more than $7 greater than the profit per cow per 30 days when fed on alfalfa hay and cotton seed alone. No cotton seed was fed with the cactus; only 18 pounds of hay per day.—Ben S. Lemmon, in Western Empire.

Where live stock is a factor on the farm, make every field hog-tight and sheep tight; have thoroughly good permanent pastures; grow leguminous crops; build a silo; and keep only pure bred males. These five things are absolutely essential in the economical production of live stock. Of course this program calls for some labor and expense, but the permanent condition of prosperity in the sections devoted to live stock production is proof of the good profit derived therefrom.

The prices of meat animals—hogs, cattle, and chickens—to producers of the United States increased 0.8 per cent from May 15 to June 15; in the past five years prices decreased in like period of 0.8 per cent. On June 15 the index figure of prices for these meat animals was about 5.1 per cent lower than a year ago, 4.7 per cent lower than two years ago, but 2.5 per cent higher than the average of the past five years on June 15.—Monthly Crop Report, July 15, 1915.

NITROGEN FERTILIZER.

According to Dr. Lipman of the New Jersey Experiment Station, who spoke at the Fruit Growers' convention at the exposition, 34 cents per year is spent for every man, woman and child in the world for nitrogen, our most valuable plant food, in fertilizer. He states that in the United States in 20 years $500,000,000 per year will be spent for commercial fertilizer.

There is approximately 1 per cent of nitrogen in coal, but it is all lsst when coal burns. When coke is made about one-fifth of the nitrogen can be saved as sulphate of ammonia, which commands a high price and is free from certain disadvantages of nitrate of soda.

About 60,000 tons of cyanamid, a new nitrogen fertilizer, is made per year at Niagara Falls. It is made by exposing carbide, the source of acetylene gas, to an intense heat in an electric furnace in the presence of nitrogen from the air.

As illustrating the wide area given to apple production during the past decade or so, not only are apples the leading horticultural display of most states at the exposition, but in the Canadian building, the greatest single exhibit, outside of wild animals, is the representation of an apple orchard, in sod. The apples, of many varieties, seem very fine and appear to be wonderful keepers. Some pears also are excellent, and gooseberries exhibited look like overgrown cherries.

The word "manure" originally meant hard work, indicating that crops could be increased by doing more work or by the application of plant food. This is true now as both fertilizing and good tillage will increase yields.

SAVE-THE-HORSE

TRADE MARK REG'T.

If there was ever a year when Save-the-Horse has demonstrated its efficiency and value this has been the year.

We know of no business where success depended more on eternal vigilance and judicious investments and economy the past year, which was so rife with disturbing factors and changes, than in the horse business.

It is a significant and glowing tribute to the powerful efficiency and success of this remedy that those who kept informed stuck closer than ever to Save-the-Horse. They let the "other fellow" do the experimenting. They have seen and know that in the final analysis—the safe cure—the sure cure—and the permanent cure—is brought about with Save-the-Horse; that the remedy which cures when all others fail is the most economical remedy to depend upon first and always.

Undeniable proof is on every hand. Just get with any group of horsemen and trainers, mention Save-the-Horse and you will then realize its all-powerful effectiveness to cure—and to cure sure and permanently—is without a peer.

SAVE-THE-HORSE does not "burn" the life and strength out of muscles, ligaments and tendons that need to be strengthened and made elastic.

SAVE-THE-HORSE does not harden joints nor calcify bones that should be kept limber and strong.

Save-the-Horse Does Not Blister, Does Not Discolor or Destroy the Hair Nor Leave a Scar. Horse Works as Usual.

$5.00 Every bottle is sold with a binding contract to refund money or cure any case of BONE AND BOG SPAVIN, THOROUGHPIN, RINGBONE (except low), CURB, SPLINT, CAPPED HOCK, WIND PUFF, SHOE BOIL, BROKEN DOWN, INJURED TENDONS AND ALL OTHER LAMENESS.

Third Edition Within One Year of Publication.

CARE AND TRAINING OF TROTTERS AND PACERS

NEVER before in the history of the publishing world has a horse book gone into a third edition within one year of publication. Yet the explanation is simple—the book fills a long-felt want. Never before has this subject been treated in a distinct manner. It has been handled in connection with autobiographies of trainers, but such works are out of print or out of date, for they were published 20 years or more ago. Conditions and methods have changed since then, and former treatises are just as much out of date as the high-wheel sulkies then in vogue.

"Care and Training of Trotters and Pacers" is as modern as a 42-centimeter gun. It does not contain the ideas of one man, but of 100 of the leading horsemen of the day, including Thomas W. Murphy, Walter R. Cox, and Edward F. Geers. These ideas were converted into book form by two prominent American turf journalists.

This book enables anyone to do his own caretaking and training until it is time to send the colt to a professional trainer, or the owner can train and race the colt himself. The treatise covers the details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented. Nothing is left to guess work. The language is lucid. Both theoretical and practical views are outlined and compared. The instructions are concise and easily understood. The work contains no advertisements—it is not a catch-penny publication that looks big in the advertisement but proves disappointing when received.

Many professional trainers have purchased the book and have found it interesting. Despite the war, over 300 copies have been sold in Europe and Australia.

Price $1.00 postpaid. Cloth, illustrated, 176 pages, 5x7 inches.

GUNCRAFT

By W. A. Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

MODERN BREAKING

By W. A. BRUETTE

A revised edition of the latest Treatise on the Training of Setters and Pointers.

THIS book enables anyone to do his own training and fully explains the methods employed by the most successful trainers in developing the setter and pointer. The important lessons are illustrated by photographs from life; nothing is left to guesswork. The entire subject is covered, from the selection, raising and development of puppies to the conditioning of dogs and their handling in the field. The amateur is told, in lucid language, how to make a dog a high-headed, stylish worker, stanch on his points, steady to shot and wing, and a prompt, tender retriever; all of this is accomplished by simple methods, some of them never before given to the public. The instructions for correcting the faults of bird dogs and keeping them up to their training are concise and easily understood. Every man who owns a bird dog or shoots in the field should read this book.

1915 WINRACI

—and—

ELIGIBILITY BOOK

The National Trotting Association Win race and Eligibility Book for 1915 is no ready for delivery. It is a work of 85 pages, bound in cloth and contains offi cial reports of all races and time recor meetings held by members of the Na tional and American Trotting Associa tions as well as copies of all special re ports received by the two Associations and all reports of non-association meet ings which appeared in the columns o the turf and daily papers in 1914 as wel as an index giving the starts made by each horse. In addition to this, it also contains an Eligibility List which pre sents the names of all live horses that acquired records or winraces in 1912 1913 and 1914. When a winrace was made over a mile track it is designated by the letter (m) and if a horse also has a winrace over a half mile track within the four seconds limit fixed by the rule, it is also given and marked (½m).

Last year after the new eligibility rule was adopted, the National Trotting Association issued a Winrace and Eligibility Book, which covered 1912 and 1913. It assisted materially in the application of the new rule, but members and horse owners were frequently in doubt as to whether a horse was entitled to a time allowance. This resulted in a very voluminous correspondence and in order to obviate it in 1915, the present book has been compiled and issued as approved by the President under an order of the Board of Review.

In the matter of time allowance, a horse with a winrace is allowed one second for each year, if raced, in which he fails to equal or reduce his record or win a race, providing same is claimed by the nominator when making the entry. If a horse was not raced in 1914, he is not entitled to a time allowance and a reference to the index in this book will show whether he was raced or not, while by referring to the summaries, it can be determined whether he equaled or reduced his record or won a race. Also in order to give all the information possible, the reports of meetings contain all races at half mile heats as well as at mile.

This book presents reports of 1,400 meetings at which 12,673 horses started in 8,730 races and 939 performances against time, for which the premiums amounted to $3,228,617.82, while the Eligibility List presents the names of over 14,000 horses.

The 1915 Winrace and Eligibility Book will be sent postage prepaid to any address for $2.00 by

A Practical Treatise on the Training of Hounds

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effectiv., so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Training the Beagle, Forming a Pack, Field Trial Handling, Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

SELF-LOADING RIFLE, .401 CALIBER

IT GIVES A STREAM OF SMASHING BLOWS

No need to fear the most powerful or most dangerous animal, if equipped with the .401 Winchester. It can deliver five smashing, one-ton blows in a few seconds, with aim. This rifle is a self-loader, and it is only necessary to pull the trigger for each shot. It shoots cartridges small in size but powerful in execution loaded with either 200-grain or 250-grain bullets. It beats any other rifle of this type for power and is the most effective hunting rifle made. Your first hunt will prove every word we say.

THE GRAND PRIX—The highest honor—was awarded to Winchester Guns and Ammunition at the Panama-Pacific International Exposition.

P. O. DRAWER 447.

National Newspaper Bureau Agent, 219 East 23rd St., New York City.

Entered as Second Class Matter at San Francisco P. O.

Terms—One year, $3; six months, $1.75; three months, $1.

Foreign postage $1 per year additional; Canadian postage 50c per year additional.

Money should be sent by Postal Order, draft or registered letter addressed to F. W. Kelley, P. O. Drawer 447, San Francisco, California.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

MEETINGS TO COME

CALIFORNIA AND ARIZONA POINTS.

FRESNO (Fresno District Fair)	Sept. 28-Oct. 2
RIVERSIDE (Riverside District Fair)	Oct. 5-9
SAN FRANCISCO (P.-P. I. E.)	Oct. 30-Nov. 13
PHOENIX (Arizona State Fair)	Nov. 15-20

NORTH PACIFIC FAIR AND RACING ASS'N.

SPOKANE, Wash.	Beginning Sept. 13
WALLA WALLA, WASH.	Beginning Sept. 13
HELENA, MONT.	Beginning Sept. 20
NORTH YAKIMA, WASH.	Beginning Sept. 20
VICTORIA, B. C.	Beginning Sept. 20
SALT LAKE CITY, UTAH	Beginning Sept. 27
SALEM, OREGON	Beginning Sept. 27
MISSOULA, MONT.	Beginning Sept. 28

GREAT WESTERN CIRCUIT.

MILWAUKEE, WIS.	Sept. 13-18
SPRINGFIELD, ILL.	Sept. 20-25
SEDALIA, MO.	Sept. 27-Oct. 2
MUSKOGEE, OKLA.	Oct. 4-9
PHOENIX, ARIZ.	Nov. 15-20

GRAND CIRCUIT.

SYRACUSE, N. Y.	Sept. 13-18
COLUMBUS, O.	Sept. 20-Oct. 2
LEXINGTON, KY.	October 4-16

RIVERSIDE—A REAL, OLD-FASHIONED FAIR.

When it comes to showing California towns how to establish a successful fair, without either state subsidy or betting as a source of financial revenue, the southern city of Riverside occupies the place at the top of the ladder. Two years ago she gave a fair under difficulties; last year she gave a dandy one on brand new grounds, and this season, on October fifth to ninth, she promises a still better one at the new plant, which has been extensively added to since last year's fair.

Riverside folks took to the fair like ducks to water, and the enterprise is with us to stay, and, we believe, to grow steadily and pay a profit to its public spirited promoters. The grounds are adequate in size, the improvements modern in every way, and the half-mile track has been thoroughly proven as a piece of dirt both fast and safe. Riverside is famed for its comfortable hotels and the hospitality of its people, and those who wish to enjoy a "real, old-fashioned fair," from "punkin shows" to horse races, will make no mistake in spending the week of October 5 to 9 in that vicinity.

THREE PER CENT AT PHOENIX.

Based on the theory that gate receipts rather than the horsemen themselves should pay the purses, the entry fee for the thousand dollar events at Phoenix has been placed at only three per cent, with seven per cent additional from the winner of first money, six from the second horse, five from the third and four from the fourth, so that all money winners stand to do better than get their entrance back. The three heat system will prevail, $300 to each heat with the customary division, the additional $100 going to the winner of the race according to the standing in the summary.

Ten classes, each for a purse of a thousand dollars, are open to all comers, the 2:18, 2:12, 2:07 and free-for-all trot, and the 2:15, 2:10, 2:07, 2:04 and free-for-all pace. Entries close on October first, but may be made at any time prior thereto with the further protection that records made after entry shall not operate as bars. Harness horses have a world of friends in the Arizona metropolis, a number of whom have furnished cups to go to the drivers of the winners of the feature events of the program. Governor Hunt's cup falls to the boss pilot in the 2:07 pace; the Arizona Republican's trophy to the winner of the 2:09 trot; Hugh Campbell's cup to the 2:07 trot, while "Daddy" J. C. Adams takes good care of the premier skinner in the 2:04 pace.

Phoenix is always the one best bet of the late racing season, and as its dates this year—November 15 to 20—enable horsemen to go there upon the close of the big meeting here in San Francisco, the entertainment provided should be even better than usual. On page 14 the full conditions and arrangement of the program will be found, or entry blanks can be had upon application to Secretary T. D. Shaughnessy.

THE HORSEMAN TO SUSPEND PUBLICATION.

The issue of the Horseman of September seventh bears the announcement of the early suspension of that publication, the news coming as something of a surprise to the general run of followers of the light harness horse, whose interests have so long and so ably been served through its columns. At one time without a rival in its field, it was gradually surpassed in circulation and popularity by newer comers to the same field, much of its decline being traceable to a lack of appreciation of certain policies of its owner on the part of many of those persons actively engaged in breeding, racing, and their allied industries. In recent years it had gained much in public favor, and, in favor and out, never lost its position as one of the most dominant influences in the trotting world. It will be sadly missed in many a home and office and on countless farms where the trotter is produced on widely varied scales, while our own exchange table will bemoan the absence of an old and ever welcome friend, a "standby" in many a moment of need.

Since 1887 the Horseman has been the personal organ of Mr. Daniel J. Campau, who has always dictated an editorial policy that was without fear or favor. Whether or not you or I liked its policy was a matter of utter indifference to its owner, who had ever at heart the welfare of the trotting industry, the existence of much beneficial turf legislation being traceable to the Horseman and its proprietor. Though Mr. Campau's individual ideas and policies may at times have cost him friends, they forced respect from all quarters, and respect makes for true power in the object of its bestowal.

To those familiar with Mr. Campau's personality, his determination to suspend the publication of the Horseman rather than sell it occasions slight surprise, as it is directly in keeping with his most pronounced characteristics. The announcement of its passing is couched as follows:

"The first number of The American Turf Register and Sporting Magazine was issued in September, 1829, and the editor, John S. Skinner, explained: 'The want of a repository in this country, like The English Sporting Magazine, to serve as an authentic record of the performances and pedigrees of the bred horse, will be admitted by all, whether breeders, owners, or amateurs of that admirable animal. The longer we remain without such a register, the more difficult it will be to trace the pedigrees of existing stock and the more precarious its value will become.' Thus, eighty-six years ago the fact was recognized in America that progressive breeding could not be carried on without a periodical of authentic character. Rumor has no place in work intended for posterity.

"December 10, 1831, The Spirit of the Times was founded with William T. Porter as editor and, as it appeared weekly, it took the place of the monthly in fostering breeding and racing and in building up the literature of out-door sport. It obtained a wide circulation and a discriminating public found in its pages the thoughts of the brightest minds of the nation. After the death of William T. Porter, The Spirit of the Times was published by George Wilkes, a man of marked ability, who declared that the paper was 'firm as marble, founded on the rock,' and was 'a part of Time itself.' In October, 1875, E. A. Buck, of Buffalo, became a partner of George Wilkes in the publication of The Spirit of the Times, and he wrote: 'In its intellectual and moral influences sporting journalism has an important part in the education of the public. It now holds a place which no other form of literature could possibly fill. All the sciences and arts contribute to its usefulness and the nine Muses are its continued attendants.' Charles J. Foster, long a member of the staff of The Spirit of the Times, with H. D. McIntyre, founded The New York Sportsman. Foster was a man of decided ability and thousands of minds were influenced by his pen.

"The first number of The Chicago Horseman was issued March 5, 1881, and two years later the paper was purchased by H. V. Bemis. Mr. Bemis' health failed, and in June, 1887, The Chicago Horseman passed to Daniel J. Campau, whose energy and capital made it a powerful factor in the realm of breeding and track development. In December, 1902, it was consolidated with The Spirit of the Times, which had previously purchased The New York Sportsman. Thus the prestige of such able and famous journalists as William T. Porter, George Wilkes and Charles J. Foster passed to The Chicago Horseman.

"Daniel J. Campau, who was born in Detroit and whose ancestors were with Antoine De La Mothe Cadillac when he founded Detroit in 1701, is a well known lawyer and large dealer in real estate. He has been active in shaping political opinion, holding for many years the chairmanship of the Democratic State Central Committee of Michigan. For nearly twenty years he was a member of the National Committee, and was chairman of the National Campaign Committee in 1896. The Democratic members of the Michigan legislature on three different occasions complimented Mr. Campau by voting for him for the office of Senator of the United States.

"Mr. Campau was an active member of the Detroit Driving Club for years and he placed the city of Detroit strongly on the map as a trotting center. He was the most influential factor in founding the American Trotting Association, and as president of the Grand Circuit he gained laurels which will never fade. He has practical knowledge of horses, having bred and campaigned trotters.

"It is now his desire to escape as far as possible business cares and to travel and enjoy a well earned rest. Consequently the publication of The Horseman and Spirit of the Times will be suspended rather than disposed of to interests which will not preserve its old and proud traditions. Mr. Campau is jealous of its reputation as an upbuilding factor in breeding and racing, and will embalm, rather than destroy, its prestige. In suspending publication, he surrenders no part of his right to the name and good will of the paper or to the honors which came to it through the absorption of other journals. A good name is capital which no one is privileged to filch.

"The library of The Horseman is without doubt the most complete and best of its kind in the country and it should be kept intact, but offers for its purchase, as well as the subscription list, will be considered. Should plans ever be made for the republication of The Horseman and Spirit of the Times, this library should be included in the plan.

"Nominators in the three-year-old trotting and pacing divisions of the 1912 and the two-year-old trotting divisions of our 1913 Futurities will please remember that those Futurities will be as previously announced, competed for at Columbus, Ohio, the week of September 27th. Due notice will be given of the time and place when the later Futurities will be raced."

LEXINGTON RECORD MEETING.

[Western Horseman.]

Lexington, Sept. 3.—A new world's record for yearling trotting geldings, a new 2:10 trotter, five new standard yearling trotters, two new 2:15 two-year-old trotters, and a season's records for yearling and two-year-old trotters were some of the features of the Breeders' meeting here today. Seventeen horses were on the card for trials and sixteen started; fourteen beat the marks they were scheduled to go against. By trotting in 2:28½, Anselot becomes the first unsexed trotter to enter the standard list and is therefore a champion of his age and sex. The successful young stallion, J. Malcolm Forbes, enjoyed a successful day, three of his yearlings taking standard records, giving him a total of eleven, while his four-year-old son, J. Forbes, took a mark of 2:09¾. He had previously taken a record of 2:15¼ over a half-mile track and 2:14¼ over a mile track in winning races. By her mile in 2:22½, Emma Magowan becomes the fastest yearling trotter of the year, and but two fillies have ever trotted to faster records. She is a sister to U. Forbes (1) 2:21½, champion yearling trotter over a half-mile track, and her performance was a high class one, trotting as she did the last quarter in 33¾ seconds.

Prince Ansel (2) 2:20½, the good California sire, had a good day, securing two yearling trotters, of which Anselot, as above stated, is the champion yearling trotting gelding. When Suldine circled the course in 2:12 he became the fastest two-year-old of the season to date on public performances. The colt trotted a nice mile, which was about evenly rated, each half in 1:06, with the final quarter in 32¾ seconds.

J. Malcolm Forbes secured three new performers, Prince Ansel and Axworthy two each, and General Watts, Senator Hale and Siliko one each. The summaries follow:

Lexington, Sept. 3.—To beat 2:30¼ trotting:

Kerrigan, b c (3) by Axworthy—Carrie Kerr by Prodigal ..... (E. Allen) 2:14¼

Gunfire, gr g (4) by General Watts—Evening Gray by Cresceus ..... (Morris) 2:12¾

Ethel Hale, b f (2) by Senator Hale—Toddy Cross by Todd ..... (Utterback) 2:26¼

Simony, b f (3) by Siliko—Elsie Leyburn by Expedition ..... (Hayes) 2:26¾

Emma Magowan, br f (1) by J. Malcolm Forbes—Ivolette by Moko ..... (W. Curry) 2:22

Patsy P., bl f (1) by J. Malcolm Forbes—Bessie Hughes by Stammont ..... (W. Curry) 2:27½

Labe Riddle, b c (1) by J. Malcolm Forbes—dam by Tregantle ..... (W. Curry) 2:30

Verbena Ansel, b f (1) by Prince Ansel—Verbena Mack by Directum Spier ..... (Moody) 2:26

Anselot, b g (1) by Prince Ansel—Lottie Whippleton by San Diego ..... (Moody) 2:28½

Silver Axworthy, ch c (3) by Axworthy—Easter Lilly W. by Oratorio ..... (Owings) 2:14½

To beat 2:21¾ trotting:

Expressive Lou, b f (2) by Atlantic Express—Lou Dillon by Sidney Dillon ..... (Snell) 2:15

To beat 2:19¼ trotting:

Britton Forbes, bl c (3) by J. Malcolm Forbes—Fanforan by Tommy Britton ..... (W. Curry) 2:13

To beat 2:17¼ trotting:

Suldine, b c (2) by Worthy McKinney—Carrietta by Directman ..... (Moody) 2:12

To beat 2:14¼ trotting:

J. Forbes, br c (4) by J. Malcolm Forbes—Callie Onward by Time Onward ..... (W. Curry) 2:09¾

Trotting in New Zealand, a Land at War

At numerous occasions during the last several months the Breeder and Sportsman has made reference to the rapid rise to popularity of the sport of trotting in New Zealand, the comments having been confined to generalities, as we were awaiting the close of the season, when we might present some figures that would tell their own story. On July 30 the racing season of 1914-1915 came to a close, and while we have not at our command all the facts we would like to present, we have enough available to give our readers a very fair idea of the present status of the industry in the island dominion which, with all other dependencies of Great Britain, has been involved in a struggle for its national life for over a year. We want you to compare the situation existing there with the one horsemen are facing here, in the hope that from the comparison you may draw conclusions that will be helpful to you in working out the future salvation of the light harness horse in this section, bearing in mind at all times that New Zealand is a country a little less than two-thirds the size of the state of California.

There are other salient features that you will also please bear in mind, including these: That New Zealand had running racing long before she had the trotter, and that the trotter is rapidly supplanting the thoroughbred in public esteem; that the interests of the public take precedence over the interests of horsemen in the eyes of the New Zealand clubs and governing bodies; that all races are dash races, short or long to suit the qualities of the various horses; that classification is by the time or distance handicap, based on performances just prior to the race to be contested; that racing rules are not put "in the books" unless they are meant to be lived up to and enforced; that racetrack speculation through the medium of the totalisator is conducted under governmental sanction and license, and that the sport, in a time of war, has grown rather than fallen off in popularity.

Now the short distance thinker or the man who jumps at conclusions will lose no time in saying that the existence of betting is responsible for the rise and spread of the sport. On the surface this may seem, to the average horseman, to be true, but it is not.

The character of the racing has made possible the governmental sanction of the totalisator; the character of the racing AND the sanction of the totalisator have, together, made possible the establishment of trotting on a firm and constantly growing basis.

You will note that we put the character of the racing as the prime consideration both before and after the licensing of totalisator speculation, and any thinking horseman, who has at heart the real welfare of the breeding and racing industries, will do likewise. With or without speculation, racing must survive or perish purely and simply on its merits as a sport—and a "sporting contest" is one in which, with every entrant striving honestly to the limit of his capacity, the elements are all so thoroughly balanced that the result cannot be foreseen and remains in doubt until decided by the final effort just as the goal is reached. Such racing is the kind we have too little of in this country and is the kind not encouraged under our system, while it is the very class for which New Zealand governing bodies are constantly striving.

The course of trotting in the antipodes has not been an easy one. Practically every visitor from there tells us of the prejudice that had to be overcome because the foreign idea of trotting in America—its home—was that it was rotten with crookedness. Sponsors of the sport persevered, however, and as time passed they worked out their own salvation. Heat racing was discarded entirely as a dangerous practice, at heart a prime incentive to bad racing, and dash races at various distances were established. Classification by handicapping was up to the day of the race, not six months prior thereto. The bookmaker was eliminated, and when it had been proven that harness horse racing was really a sport and not a sure thing gambler's device, the totalisator, under government license, came into permanent effect as the sole means of speculation on horse racing. How long would the government sanction it if the character of the sport were not maintained at the degree of excellence and cleanliness which justified its sanction originally?

However, let us get along towards the figures that show the actual footing of the business.

From the New Zealand Referee, the dominion's general sporting publication which is affiliated with the Christchurch Press, we have taken the following statistics showing the distribution of the season's purse money among owners, one hundred and seventy-eight of whom have won sums of one hundred pounds or over, the normal value of the pound being $4.86:

"The publication in this issue of the figures showing the principal amounts won during the past season will interest followers of the sport who are always anxious to learn how owners have fared in each racing period, and what sums have been secured by their winning representatives. Notwithstanding the great war that has been raging for over a year now, the past season has been one of remarkable prosperity for the clubs of the Dominion, almost without exception; stakes have been increased, and the result is shown in the large amounts that have been credited to the owners occupying prominent positions on the winning list. As was the case last season, our figures include, in addition to the winnings at all totalisator fixtures, the stakes distributed at those gatherings held by trotting clubs not possessed of a totalisator permit. There are, of course, many country clubs of the picnic variety that also include trotting events in their programs, but it has been impossible to take these into account, and in any case they would not affect the figures to any extent.

"The New Zealand Cup is now of such a substantial value that it gives its winner a very high place in the list, and Win Soon's victory in the big event at Addington last season has gone a very long way towards putting her owners in the post of honor at the head of the winning owners. Messrs. Stevenson and McMath have secured during the season £1690, of which Win Soon gained for them £1530, all but £30 of which came from her New Zealand Cup victory. The Ashburton owner-trainer, R. McDonnell, occupies a more prominent position than he did last season, when he was in thirty-fourth place, with a total of £300 10s. Now he is second with £1400, and it is pleasing to note that his brilliant mare, Emmeline, has been mainly instrumental with her winnings of £920 in giving him such a good place. On more than one occasion previously Emmeline's winnings have been far below the deserts of a mare of her brilliance, and it is all the more appropriate to find that she has done so well in what may be regarded as her last season on the track.

"Third place is occupied by Messrs. Hall and Simpson, who have moved up from ninth position, and their total of £1346 10s is largely due to the efforts of that consistent performer Frandocia, who secured £1051 10s, while Chelston, who by the way ran at one meeting at least in the name of Mr. Simpson alone, was responsible for a good addition to the total. The performances of that brilliant young pacer Our Thorpe, who had such a good sequence of victories, have been chiefly instrumental in giving Mr. J. Fleming his place as fourth on the list of winning owners. This young horse showed marked improvement during the season, and in annexing his total of £1240, which is the second largest amount on the winning horses' list, he displayed form suggestive of even better things in the future. Mr. H. F. Nicoll is usually to be found near the head of the list, but though his total during the past twelve months, amounting to £1340, was considerably more than the sum of £998 credited to him twelve months ago, his actual place is fifth. Of his total St. Swithin and Pearlchild have won more than £1000 between them. Mr. R. T. Reid comes next with a total of £1135, most of it won by Eccentric, whose total was £910, and he is followed by the Hinds sportsman, Mr. J. Farrell, to whose aggregate of £1129 St. Kevin was the largest contributor, with £905.

"The West Coast owner, Mr. H. W. Kitchingham, is a liberal patron of the sport, and his total of £1102 is the best that has yet been credited to him by his team, although last year he was actually higher on the list, then being fifth of the successful owners. It is worth noting as an illustration of the larger sums that are now to be won, that last year there was only one owner who topped the £1000 mark, while this year there are eight owners (including the two partnerships) that have been credited with more than that sum. Mr. W. J. Morland, of Rakaia, has done very well this season, and his winnings of £939 are mainly due to Country Belle, who secured £745, most of it gained by her second place in the New Zealand Cup. Year in and year out, there are few owners so consistently successful as the Christchurch owner who races under the name of 'Mr. M. Clarice,' and as he does practically all his own training and a good deal of his own driving, his aggregate of £926 5s, secured chiefly by Law Chimes, Franzalena and Pax, is one that he may well be proud of. Messrs. Geddes and Edwards have, in partnership, won £906, most of it due to Wallace Wood with £858, while M. Edwards, racing on his own account, secured £797, of which Adelaide Direct won £607. Persuader's winnings of £809, including the Dunedin Cup, have given Messrs. Herrick Bros. a more prominent position than they have occupied previously, while the well-known Riccarton owner-trainer, F. Holmes, has also had a much more remunerative season in the way of stake earnings than was the case twelve months ago. That fine trotter Muricata won £72 during the season, most of it in the interests of the late Mr. W. F. Clinton, who died a few months ago and it is pleasing to find another owner of a square gaited trotter, Mr. L. Leslie, credited with £615 won by Electrocute, who scored a good sequence of wins.

"It is unnecessary to deal with all the amounts given in the list, but some idea of the amount of money circulated by the sport may be gathered from the fact that twenty-five owners have won amounts of over £500, while sixty-two others have won sums varying from £200 to £400, and there are ninety-one credited with amounts from £100 to under £200."

These figures alone are impressive, but they do not cover all the ground. The horses that won one hundred pounds or over number one hundred and ninety-eight, and one hundred and ninety-four riders or drivers (we forgot to remind you that they race both under saddle and to harness) piloted the winners of nearly five hundred races—four hundred and ninety-eight, to be more exact.

Turn these figures over in your mind, think what it would mean to California if trotting were established and conducted here on such a basis, and then ask yourself if we are really "bird headed" when we intimate that America could learn some most profitable lessons from New Zealand in the matter of conducting harness racing.

One of the best indications of the excellent condition of the industry is the class publication which caters strictly to the trotter and pacer, the New Zealand Trotting Journal. Founded some time since by the efforts of a number of enthusiastic horsemen, it has advanced steadily in size, scope and influence, and with the opening of the present season appeared in a brand new form, bigger and better than ever, replete with up-to-the-minute news gathered by its own correspondents in every section of the dominion, and with its business pages well patronized. From it we take the following excerpts, which cast more light upon an interesting subject:

"In reviewing the past season it is gratifying to note the phenomenal progress made by every club in the Dominion. The fact of the sport making headway under such adverse conditions as have been brought about by the present crisis in Europe, is a matter upon which the clubs in particular, and the sporting community generally, deserve the highest praise.

"The wonderful support that has been accorded the fixtures is largely due to the loyalty displayed by the clubs in lending important assistance in aid of the needs, ammunition, equipment and materials of war. To a very great extent the trotting clubs have been conducting their meetings on patriotic lines, donating in some cases the whole of their profits to the war funds. The huge sums of money which have so generously been contributed to these funds, must excite the admiration of even those who are hostile to the sport. From precedents established by the clubs, it is safe to assume that still greater sums of money will be forthcoming to assist in the financial stress of the present time. While carrying out these worthy objects the clubs have provided for the many thousands who are depending upon trotting for their livelihood. No pastime has rendered such valuable support as that promoted by the trotting community of New Zealand. It would therefore be a huge mistake even to curtail a sport that is lending such valuable assistance as well as providing for its large number of dependents. That in carrying on the sport it has not interfered with recruiting is demonstrated by the number of young sportsmen who have offered their services for the front. It may therefore be claimed that a very great number of those engaged in the training of horses who are willing to fight, but ineligible as recruits, are, by the continuance of the sport, enabled to assist the various causes in more ways than one. All this assistance is needed in order to bring the great war to a successful issue.

"To these facts may be attributed the phenomenal progress of trotting for season 1914-15.

"During the year the stakes have been considerably augmented, and a general tightening of the classes has taken place. Thus has been brought about still better racing and thus have we substantial ground for pride that we have exhibitions of trotting and pacing equal to any in the world.

"The chief race of the year, the N. Z. Cup, £2500, has become world famous. The Canterbury Park and New Brighton clubs have also increased their stakes, while the latter club has continued its class racing by including in its programs the "free-for-all" stakes and the New Brighton Derby Stakes. The Auckland T. C. Cup of 650 sovs., and the Dunedin

up of 600 sovs. have come greatly into prominence. here has also been in every part of the Dominion general increase in the smaller stakes, a matter hat is very essential in present day racing.

"The Gore T. C. launched out with a liberal pro- ram, but their case was not singular as the Ashbur- on, Otahuhu, Oamaru, Greymouth, Wanganui, South Vairarapa and Hutt Valley clubs have all made ubstantial increases in stakes. The Nelson and Westport clubs deserve praise for the advance made y them.

"It is furthermore pleasing to note the manner in hich the new totalisator clubs have conducted their eetings. The fixtures of the Waikato, Manawatu, overty Bay and Waimate Plains T. C. were so uccessfully carried out that they have gained the dmiration of all.

"In the South Island only the Timaru and Westland rotting Clubs have yet taken advantage of their otalisator permits. The South Canterbury Club had very successful meeting, while the prospects of the Westland Trotting Club are particularly bright; the port is evidently gaining a great hold on the Coast."

It is pleasing to turn from the far from satisfactory r prosperous conditions which face California's horsemen and view the status of the trotter and acer in New Zealand. There the horse furnishes he leading outdoor sport for the people as a whole, nd while their ways may not be entirely fitting for ur use, we most certainly can draw many lessons f benefit from the example set for us. Their system ucceeds. Ours fails.

Can there be much argument as to which possesses he most real merit?

DES MOINES, IOWA.

T. H. Hewes, b h by Cup Bearer.....(Agler) 3 6 5 4
Emery A., 6-3-3-7; Josephine Wilson, 4-7-4-5; Fanny Simpson, 7-5-6-2.
Time—2:17¼, 2:19¼, 2:20, 2:20¾.

2:10 trot, stake $1,000:
Governor Mason, b h by Colonel Mason(DeRyder) 1 1 1
Peter Pearl, br h by Peter the Great....(Wilson) 2 2 2
Belle of Diamond Creek, b m by Wilkhurast....
.....(Hardie) 3 4 4
Miss Banner Feed, b m by Wiggins.....(Haley) 5 3 3
Belford Bell, 6-dr.; one other also started.
Time—2:14¾, 2:13¾, 2:14¼.

LITTLE BERNICE TAKES STADIUM FEATURE.

Pacers reigned supreme at last Sunday's matinee of the San Francisco-California Driving Club, each of the events carded being for performers at the lateral way of going, matinee trotters being scarce this season in the club's ranks. With the expected Sacramento delegation failing to materialize, only the regulars were in harness, but they put up four interesting contests.

The free-for-all pace, as usual, furnished the chief entertainment of the day, and after its conclusion Jack Welch was kept busily engaged receiving congratulations over the victory of Little Bernice, the daughter of Del Coronado making her first win of the season. Early in the first heat a break put her out of the contest for the time, Dick W. challenging Vera Hal in the stretch and losing by about a length owing to a break when on even terms a few yards from the wire, the time being 2:08. Vera went to the front in the second, with the others close up, making a handy break at the head of the stretch, settling very quickly. Bernice responded gamely to Schwartz' demands failing to make the break that has previously ruined her chances, and winning by a nose in a hot drive that pleased the spectators immensely. The third heat was much the same, the winning margin being a bit greater. Bernice has improved considerably of late, and Jack's friends hope that before he is through with her she will get back to the form that made her famous as a three-year-old.

Tom Murphy, Happy Dentist and Hamburg Belle were handy winners of the other events, the details being as follows:

2:18 pace:
Tom Murphy .....(E. T. Ayres) 2 1 1
Senator H. .....(J. Kidd) 1 3 2
Cookey .....(J. Vermet) 3 2 3
Time—2:15½, 2:20½, 2:19½.

2:12 pace:
Happy Dentist .....(J. J. Ryan) 1 1
King Pointer .....(H. Campodonico) 2 3
Emma M. .....(W. Malough) 3 2
Time—2:11, 2:12.

Free-for-all pace:
Little Bernice .....(J. C. Welsh) 3 1 1
Vera Hal .....(H. Cohen) 1 2 2
Dick W. .....(A. Ottinger) 2 3 3
Time—2:08, 2:10½, 2:10½.

2:15 pace:
Hamburg Belle .....(J. Ginocchio) 1 1
Palitea .....(J. Kramer) 2 2
Jack .....(McDonnell & Conlan) 3 3
Pointer Belle .....(J. Kidd) 4 4

Judging from some of the bear stories that are emanating from Pacific coast training grounds there will be some fast time and real horse racing when the futurities are called in November. Among both the two- and the three-year-old divisions, both trotters and pacers, there are a number of eligibles that are working very nicely indeed.

WASHINGTON WOMAN SUCCEEDS AS TRAINER.

Washington was the first state of the Pacific Northwest to grant the franchise to the fair sex, and now comes forward Mrs. F. H. Herman of Everett and asserts her right, with apparently excellent grounds, to engage in the sport of harness horse racing as the pilot of her own entry, no matter where the track or what the company. For many years Mrs. Herman has been an accomplished horsewoman, but not until after a strenuous campaign against mere men drivers in which she proved herself worthy of their respect as a rival reinsman was she extended the hand of fellowship that admits her as a member of the fraternity—or should we say sorority?—in good standing.

Mrs. Herman's most marked success has been with the erratic pacer, Elfreda D. 2:12¼, by Diablo 2:09¼ out of Belle Onward 2:14½, several trainers

ELFREDA D. 2:12¼ AND MRS. HERMAN

of the male persuasion having worked with her without success. She could pace and pace fast, but she wouldn't.

Eventually Mrs. Herman purchased her for the sum of three hundred dollars, and started in on an entirely original course of training. Probably her sex gave her an insight into the vagaries of the feminine mind of the equine family, but whether or not this is the case, an understanding was soon effected between herself and the mare that enabled them to get along famously. Under Mrs. Herman's tutelage Elfreda developed "powers of concentration" that enabled her to stay on a pace, and before leaving home this season was working a very ordinary track in 2:14. At Centralia she won the last heat of the 2:25 pace in 2:12¼, taking second money and outranking Hal Bear, King Zolock, Tillamook Maid, Nellie J., William G., Mack Fitzsimmons and High Lo. A thousand dollars was offered for her, and refused, after this performance.

From Centralia the Everett ladies went to North Yakima, where they will take part in the speed program of the Washington State Fair. The footing there is excellent, and Mrs. Herman has high hope of being able to give her favorite a mark well under 2:10 before the meeting closes.

Here's hoping!

ELMA, WASHINGTON.

Wednesday, Sept. 1.—2:20 County Trot or Pace, purse $200:
Tamarac The Red, by Hambletonian Mambrino..

Saturday, Sept. 4.—Free-for-all trot, purse $200:
Kid Cupid, ch g.....(Daniels) 1 1
Mary W., b m.....(Martin) 2 2
Oakland Moore, b g.....(Squires) 3 3
Time—2:28, 2:27.

After the race Kid Cupid went an exhibition mile in 2:15¼.

Free-for-all pace, purse $200:
Hal Edo, b m .....(Archer) 1 1
Teddy Bear, br s.....(Daniels) 2 2
Haltamont, b s.....(Gorman) 3 3
Dewey Ann, br m.....(Evans) 5 dr
Time—2:12¼, 2:11.

The full program and conditions for the Arizona State Fair appear elsewhere in this issue. Hunt them up.

THE OPENING AT SYRACUSE.

Syracuse, Sept. 14.—After one heat of the two-year-old trot had been raced yesterday, rain caused a postponement of the balance of the card until today. Thanks to the good qualities of the state fair grounds track the footing this afternoon was much better than one would have expected, and fair though not sensational time marked the day's performances. With the exception of the two-year-old trot, straight heats were in order, the winners getting away with their individual events without serious difficulty. The results:

Syracuse, Sept. 14.—Messina Springs Driving Club Sweepstakes, two-year-old trotters, purse $1,200 (first heat Monay):

Sunloch, b c by Sahib.....(Jones) 1 3 1
Roy Bingen, b c.....(Mitchell) 3 1 3
Revelry, bl g.....(White) 2 2 2
Peter's Pride, Lord Monte and Monoma also started.
Time—2:28¼, 2:23¼, 2:25¼.

The Onondaga 2:07 pace, purse $2,000:

Single G., b h by Anderson Wilkes.....(Gosnell) 1 1 1
Rastus, br g by Liberty Boy.....(McDonald) 2 2 3
Major Ong, b g by Major Gantz.....(Murphy) 3 3 2
Anna Hal, Frank Patch also started.
Time—2:06½, 2:04¼, 2:05¼.

2:14 pace, purse $1,000:

Camelia, b m by Cummer.....(Cox) 1 1 1
Patrick M., bl g by Norbells.....(Stokes) 2 2 2
Peter S., b g by Como.....(Grady) 3 7 3
Joe Patchen III., Fern Hal, Prestolite, Elisha J., June Frost, Peter Oakley also started.
Time—2:05¼, 2:06¼, 2:07¼.

Messina Springs Driving Club Sweepstakes, three-year-old trotters, purse $970:

Eudora Spier, bl f by Directum Spier.....(White) 1 1
Mazda, b c.....(Lattimore) 2 2
Beacon Hal, bl g.....(Mitchell) 3 3
Samoor, br c.....(Jones) 4 4
Time—2:17¼, 2:15¼.

2:19 trot, purse $1,500:

Almah, br m by Cochato.....(Carpenter) 1 1 1
Idora Worthy, b m by Guy Axworthy..(Rodney) 2 2 3
Audrey Gray, b m by Guy Axworthy.....(Cox) 3 8 2
Helena Constantine, King Bellini, Polly T., Onward Forbes, Dame Danvers, Adbella Watts, F. C. W., Prinelda, Host Peter also started.
Time—2:10¼, 2:10¼, 2:10½.

2:05 trot, purse $1,200:

Margaret Druien, b m by Peter the Great (Cox) 1 1 1
Joan, br m by Directum Spier.....(McDevitt) 2 2 2
Rhythmell, bl m by Rhythmic.....(Shank) 3 3 3
Time—2:06¼, 2:06¾, 2:05¼.

Second Day at Syracuse.

Syracuse, Sept. 15.—One thing that Monday's rain and a bit of harrow and float work accomplished was the conditioning of the track here "to a T," and the Grand Circuiters showed their appreciation of the same by tramping the merriest miles that have ever been witnessed at the New York State Fair, for throughout the afternoon the time was fast.

Marse Geers and Deroche started things by trimming the three-year-old trotters in three heats from 2:08½ to 2:09¼, with Tommy Murphy and Walnut Tree straight-heating the two-year-old division of the Breeder's futurity, the Madden filly being a new one for the Nancy Hanks family, out of Markala 2:18¼.

Hay Boy lived up to the predictions concerning his speed by pacing the first heat of his race in 2:02¼, but he has not yet broken the jinx, as Russell Boy won the race by coming back for a second heat in 2:02¼ and a third one in 2:03¼, the pony pacer forcing him out in each case. Peter Scott had a handy win in the big trotting stake, and Murphy had great rides behind Peter Volo and Directum I., the former equaling his own world's record of 2:02 and the latter hanging up a new mark of 1:56¾, without a windshield. The track record for trotters driven by amateurs was also cut, Captain David Shaw piloting Peter Mc over the course in 2:06¼.

The 2:03 pace, unfinished, witnessed the return to form of Napoleon Direct, who has been "out" since Cleveland owing to an accident in loading, and the unsexed son of Walter Direct gave Pop Geers a ride in 2:01½ and back in 2:02, unsteadiness costing him the third heat in much slower time. The day in detail:

Syracuse, Sept. 15.—The Kanoonoo, 2:24 trot, three-year-olds, purse $3,000:

Deroche, ch c by John A. McKerron.....(Geers) 1 1 1
Bondella, b f by Walnut Hall.....(Murphy) 3 2 2
Colorado Range, b c by Colorado E..(McDonald) 2 5 5
Northspur, Florence White and Rusticoat also started.
Time—2:08½, 2:09¼, 2:08¾.

American Horse Breeder Futurity, two-year-old trotters, purse $5,000:

Walnut Tree, b f by Siliko.....(Murphy) 1 1
Atlantika, ch f by Atlantic Express....(Dickerson) 2 2
Bingen Silk, b c by Bingen.....(Chandler) 3 3
Ollie Watts also started.
Time—2:12¼, 2:13.

Chamber of Commerce, 2:11 pace, purse $5,000:

Russell Boy, b h by Rustic Patenter.....(Geers) 6 1 1
Hal Boy, b g by Hal B.....(McMahon) 1 2 2
Aconite, b h by Aquilin.....(Cox) 2 3 4
Queen Abbess, Judge Ormonde, Major Woolworth, Ashlook, Anna Carl and Peter Farren also started.
Time—2:02¼, 2:02¼, 2:03¼.

Empire State, 2:14 trot, purse $10,000:

Peter Scott, b h by Peter the Great....(Murphy) 1 1 1
Worthy Prince, b h by Prince McKinney..(Cox) 2 5 2
Bronson, br g by Bingen.....(Graves) 8 2 7
Dick Watts, Lettie Lee, Loe Blossom, Miss Directed, The Guide, McCloskey and Todd Temple also started.
Time—2:05½, 2:05¼, 2:06¾.

To beat 1:59½ pacing (track record):

Directum I., ch h by Directum Kelly....(Murphy) won
Time—:29½, :58½, 1:27, 1:56¾.

To beat 2:07 trotting (track record, amateur):

Peter Mc., br h by Peter the Great..(Capt. Shaw) won
Time—:31, 1:03½, 1:35½, 2:06¼.

To beat 2:02 trotting:

Peter Volo, br h by Peter the Great.....(Murphy) lost
Time—:30¾, 1:01¼, 1:31¼, 2:02.

2:03 pace, purse $1,000 (unfinished):

Napoleon Direct, ch g by Walter Direct...(Geers) 1 1 4
Earl Jr., gr h by The Earl.....(Cox) 2 2 1
Lelia Patchen, bl m by Dan's Brother....(Snow) 4 3 2
R. H. Brett and King Couchman also started.
Time—2:01¼, 2:02, 2:07½.

Third Day at Syracuse.

Syracuse, Sept. 16—Another world's record was hung up here today when C. K. G. Billings drove his new champion, William, to a record of 1:59½ to wagon, the performance coming as the climax of an afternoon of great sport. Finishes were close throughout and the time fast, though not so sensational as yesterday. Mr. Geers and Napoleon Direct came back strong to take the final heat of the fast pace, while St. Frisco took the 2:20 trotters into camp in a decisive manner. Bonington also trotted a good race for Marse Edward in the Governor's stake, taking the final heat from Lee Axworthy in a thrilling drive. Jones Gentry upset the dope in the 2:06 pace, outclassing his field, and Alonzo McDonald gathered coin unto his exchequer and pleasure unto his bosom by being a double winner—with Miss Harris M. and also with Laramie Lad. The summaries:

Syracuse, Sept. 16.—2:03 pace (fourth heat only):

Napoleon Direct, ch g by Walter Direct.....(Geers) 1
Earl Jr., gr h by The Earl.....(Cox) 3
R. H. Brett, b g by Waponee.....(Grady) 2
Lelia Patchen and King Couchman also started.
Time—2:02¾.

The Syracuse, 2:20 trot, purse $2,000:

St. Frisco, b h by San Francisco.....(Geers) 1 1 1
Roy Miller, b h by Bingara.....(Grady) 2 2 2
Tommy Todd, b g by Todd Mac.....(Snow) 3 3 3
Kathryn Collette and Mary Guy also started.
Time—2:10¼, 2:10¼, 2:12.

2:18 pace, purse $1,000:

Miss Harris M., b f (3) by Peter the Great....
.....(McDonald) 1 1 1
Thistle Patch, bl h by Joe Patchen.....(Snow) 2 2 2
Clare Gentry, b m by John R. Gentry.....(Jones) 3 3 3
Hal Plex E. and Arden de Forest also started.
Time—2:08¼, 2:08¼, 2:08¾.

The Governor's Stake, 2:08 trot, purse $3,000:

Lee Axworthy, b h by Guy Axworthy..(Andrews) 1 1 2
Bonington, ch h by Bellini.....(Geers) 2 2 1
Lulu Lumine, b m by Orator.....(Murphy) 3 3 4
Duchess and Fair Virginia also started.
Time—2:05¼, 2:05¼, 2:06¼.

2:13 trot, purse $1,200:

Laramie Lad, b g by Master Bo...(McDonald) 2 1 1 1
Tommy de Forest, br h by The de Forest....
.....(Osborn) 1 3 3 2
Strafford, br h by Moko.....(Murphy) 5 4 2 5
Airdale, Nate Prime, Victor Star, The Expose and Parcliffe also started.
Time—2:09¼, 2:09¼, 2:08¼, 2:10¾.

2:06 pace, purse $1,000:

Jones Gentry, b g by John R. Gentry..(Ostrander) 1 1 1
Ben Locanda, b g by Locanda.....(Murphy) 5 2 2
Margot Hal, b m by Argot Hal.....(McDonald) 2 4 3
Baron A., Evelyn W. and Bingen Pointer also started.
Time—2:06¾, 2:03¼, 2:05½.

To beat 2:01¼ to wagon, pacing:

William, b h by Abe J.....(C. K. G. Billings) won
Time—:29¾, :59¼, 1:29¾, 1:59½.

G. G. T. B. A. RESULTS.

Eighteenth Day—Friday, September 10.

First race—Five and a half furlongs, selling, purse $250: A. Littell's b g Jake Argent (aged) by Jake Sanders—Argentina, 111 lbs., (Burns) won easily; Rag (3), 108, second; Chas. Goetz (aged), 111, third; Vesta, Teeto, Loan Shark, Auto Maid, Finnigan, Ida, Helen Hawkins and Russell McGill also ran. Time, 1:08.

Second race—Five and a half furlongs, selling, purse $250: J. Randolph's br f Baby Lynch (3) by Leonid—Queen Lithe, 107 lbs., (Nolan) won driving; Lady St. Patrick (3), 108, second; Miss Clark (5), 111, third; Engraver, Bill York, Boggy Johnson, Barbarita, Miss Edith and Make Good also ran. Time, 1:08.

Third race—Five furlongs, selling, two-year-olds, purse $250: El Palomar Stable's br f Bas Blancs by Chantilly—St. Zephyrine, 107 lbs., (Burns) won driving; Brooks, 115, second; Robert Lee, 105, third; She'll Do, Cuyama, Laughing Water, Lola and Frank Patterson also ran. Time, 1:02 1-5.

Fourth race—One mile, selling, purse $250: A. Neal's br m Nebraska Lass (aged) by Highland Lad—Kitty Balile, 111 lbs., (Leeds) won easily; Lady Young (6), 106, second; Fairly (4), 107, third; Superl, Eastman, Rey, Lady M. M. and Valadolid also ran. Time, 1:41.

Fifth race—Five furlongs, army horses, ridden by officers of the Army, Navy or Marine Corps: Satisfax (aged) bl m by Rock Sand—Satisfaction, 165 lbs., (Lt. Sands) won easily; Nabax, 165 (Lt. Stevenson) second; Kindness II., 165 (Capt. McNally) third; Chesspeak and Lady also ran. Time, 1:06

Sixth race—Seven furlongs, selling, purse $300: B. McClintinck's bl g Darkey (5) by Modred—Zirl, 118 lbs., (Washer) won easily; Ora McGee (6), 113, second; Conflagration (6), 115, third; Zoroaster, Quick, McAlan, Pro Realis, Hannis and Nannie McDee also ran. Time, 1:28.

Seventh race—Five furlongs, selling, purse $250: W. C. Weant's bl m Ann Tilly (5) by Isidor—Aranza II., 109 lbs., (Washer) won driving; Apache Kid (5), 111, second; Carondelet (aged), 123, third; Aunt Elsie, Van Horn, Bailey Beers and B. C. Winston also ran. Time, 1:01 3-5.

Nineteenth Day—Saturday, September 11.

First race—Five and a half furlongs, selling, purse $250: H. T. Batchler's bl g John Hurie (5) by Right Royal—Etta Gilroy, 106 lbs., (Gross) won driving; Light Knight (aged), 108, second; Augustus Heinze (4), 107, third; Choctaw, Mammy, Auto Maid, Sheffield and Joe Busher also ran. Time, 1:08.

Second race—One mile, selling, purse $250: L. Stone's b f Bunny (3), 97 lbs., (Brazal) won driving; Commendation (aged), 108, second; Stolen Ante (3), 102, third; Tom Chapman, Hardy, Zamloch, Wasatch and Pro Realis also ran. Time, 1:41 3-5.

Third race—One mile, selling, purse $250: F. Mallory & Co.'s ch m Helen Hawkins (aged) by Cunard—Katie Walcott, 108 lbs., (Nolan) won easily; Tallow Dip (aged), 108, second; Merry Twinkle (3), 99, third; Renwar, Fort Johnson, Emelda, Sir Barry, Hannis and Clint Tucker also ran. Time, 1:42.

Fourth race—Five furlongs, Juvenile Handicap, two-year-olds, value $470: Schas & Bro.'sb g Ed Cudihee by Gold Ball—Purse Rose, 115 lbs., (Leeds) won driving; Rose Marian, 122, second; Washoe Belle, 115, third; Schulenburg, Von Lady and Frisky also ran. Time, 1:01 2-5.

Fifth race—Two furlongs, polo ponies, officers of Army, Navy or Marine Corps, cup to winner: Canela (Capt. Lee) won easily; Happy Hooligan (Lt. Stevenson) second; Dago Mike (Lt. Sands) third; Joker II. and Comet also ran. Time, :25 1-5.

Sixth race—Five and a half furlongs, selling, purse $250: W. J. Dunn's ch h Tight Boy (4) by Serpent—Azuba, 116 lbs., (Washer) won easily; Custom House (4), 116, second; Old Bob (3), 109, third; Stelcliff, Kid Nelson, The Feller, John Spohn and Azurea also ran. Time, 1:07 2-5.

Seventh race—One mile, selling, purse $400: Daniels & Hodges' b g John Graham (aged) by Modred or Fake—Leenja, 109 lbs., (Palms) won easily; Brando (6), 102, second; Be (6), 106, third; El Pato and Alda also ran. Time, 1:40 2-5.

Twentieth Day—Monday, September 13.

First race—Six furlongs, selling, purse$250: D. K. Carter's b g Frank G. Hogan (aged) by Hawkswick—Wedding Day, 110 lbs., (Kirschbaum) won driving; In Dutch (4), 104, second; Smoky Dan (4), 101, third; Sheffie Renwar, Sweetdale, Russell McGill, Zinkand, Rey Shannon II. and Vespasian also ran. Time, 1:14 4-5.

Second race—Five and a half furlongs, selling, two-year-olds, purse $250: Nevada Stock Farm's b f Ma Jay by Hippodrome—Calyx, 109 lbs., (Washer) won driving; Toastmaster, 112, second; She'll Do, 109, third; Laughing Water, Cuyama, Lola, Robert Lee and Sovereign II. also ran. Time, 1:08 1-5.

Third race—Six furlongs, selling, purse $250: H. T. Batchler's b g Boggy Johnson (3) by Bonnie Joe—Dotta, 108 lbs., (Gross) won driving; Fred T. (3), 10 second; John Louis (aged), 115, third; Mandadero, Loft Heywood, Lillian Ray, Fort Johnson, Vesta, Quantity, E Fitzgerald and Tallow Dip also ran. Time, 1:15 1-5.

Fourth race—Six furlongs, selling, purse $250: Texa Stable's ch g Augustus Heinze (4) by Caesarion—Swee Eileen, 115 lbs., (Washer) won in a gallop; Cecil (5), 11 second; Acumen (aged), 119, third; Sonoma, Tordillo, An gelus, Far Cathay, Lady St. Patrick, Dr. Neufer an Aunt Elsie also ran. Time, 1:14 2-5.

Fifth race—One mile and a sixteenth, selling, purs $250: Alberta Stable's b g Conflagration (6) by Sta Ruby—Ashes, 105 lbs., (Taylor) won easily; Ora McGe (6), 105, second; Christmas Eve (4), 108, third; Southern Gold, Ceos, Cantem, Stolen Ante and Pro Realis also ran Time, 1:47 1-5.

Sixth race—Five and a half furlongs, purse $250: T Goulding's ch g Pajaroita II. (4) by Rey del Sierras—Aunt Bird, 113 lbs., (Frach) won driving; Headfort (4) 113, second; Batchler (3), 109, third; Joe Hooker, Syphon Boy, Gertrude B. and Brighouse also ran. Time, 1:07 4-5

Twenty-first Day—Tuesday, September 14.

First race—Six furlongs, selling, purse $250: G. Billerman's b g Diadi (5) by Bowling Green—Lady Dotte, 11 lbs., (Washer) won easily; Old Bob (3), 108, second; Custom House (4), 118, third; Old Coin, Kid Nelson, Mintanka, Wasatch, Electrowan and Rhodes also ran. Time 1:13 4-5.

Second race—Six furlongs, selling, purse $250: A. L Littell's b g Jake Argent (aged) by Jake Sanders—Argentina, 115 lbs., (Nolan) won driving; Miss Folly (4), 115 second; Mary Emily (6), 115, third; Faustina, John Hurie, Jennie Crawford, Canapa and Frazzle also ran. Time, 1:13 4-5.

Third race—Five furlongs, purse $250: F. S. Fountain's b m Zenotek (5) by Peep o' Day—Medica, 108 lbs., (Kirschbaum) won driving; John Spohn (3), 104, second; Miss Clark (5), 111, third; Teeto, Camia, Rag, Bredwell, Mi Alma, Miss Genevieve and Viva also ran. Time, 1:02 1-5.

Fourth race—Seven furlongs, purse $300: Nevada Stock Farm's b m Scarlet Oaks (4) by Dick Welles—Glena, 115 lbs., (Nolan) won driving; Rash (aged), 109, second; Kootenay (aged), 115, third; Be, Chas. W. Hodges and Thistle Belle also ran. Time, 1:27.

Fifth race—Six furlongs, selling, purse $250: J. Randolph's br f Baby Lynch (3) by Leonid—Queen Lithe, 108 lbs., (Nolan) won driving; Ann Tilly (5), 115, second; Tight Boy (4), 123, third; Butter Ball, Louise Paul, Light Knight, The Feller and Vespasian also ran. Time, 1:15.

Sixth race—One mile, selling, purse $250: M. Kennedy & Co.'s ch g Transparent (aged) by Smile—Little Pearl, 111 lbs., (Washer) won driving; Henry Walbank (aged), 111, second; Rey (aged), 111, third; Quick, Helen Hawkins, McAlan, Alda and Marie O'Brien also ran. Time, 1:41 2-5.

Twenty-second Day—Wednesday, September 15.

First race—Five and a half furlongs, selling, purse $250: Freeman & Co.'s bl g Smoky Dan (4) by Otis—Yokohama, 107 lbs., (Hawkins) won driving; Lady James (3), 104, second; Chas. Goetz (aged), 103, third; Ida Pinack, Delaney, Van Horn, Russell McGill and Wynema also ran. Time, 1:07 3-5.

Second race—Five and a half furlongs, selling, purse $250: J. Peter's ch f Ida Cummings (3) by Marta Santa—Francisca, 104 lbs., (Gross) won driving; Arrowshaft (aged), 108, second; Choctaw (5), 108, third; Miss Clark, Mammy, Joe Busher, Make Good and Queen Vergie also ran. Time, 1:07 4-5.

Third race—Five and a half furlongs, army horses, ridden by officers of Army, Navy or Marine Corps, cup to winner: Kindness II. (Capt. McNally) won easily; Joe (Lt. Stevenson) second; Chesspeak (Lt. Watson) third; Nabax, Dago Mike and Jim also ran. Time, 1:14 2-5.

Fourth race—One mile and a sixteenth, purse $300: John Lowe's ch g Brynlimah (5) by Bryn Mawr—Notlimah, 118 lbs., (Nolan) won driving; John Graham (aged), 112, second; Madella (5), 112, third; Star Shooter also ran. Time, 1:47 1-5.

Fifth race—One mile, selling, purse $250: Chicago Stable's br g Cecil (5) by Royal Flush III.—Tarpeia II., 108 lbs., (Gross) won handily; Fairly (4), 108, second; Tom Chapman (5), 109, third; Ceos, Fred T., Henry Walbank, Zamlock, Lillian Ray, Wasatch, Sir Barry and Bob Love also ran. Time, 1:42 2-5.

Sixth race—Six furlongs, selling, purse $300: L. B. Wood's b g Sweetbait (4) by Fisher Boy—Cupboard Love, 118 lbs., (Taplin) won easily; Metropolitan (aged), 121, second; Thistle Belle (aged), 118, third; Minco Jimmie, Headfort, Batchler and Ledettor also ran. Time, 1:13 3-5.

Seventh race—One mile, selling, purse $250: T. Hatfield's ch m Lady Young (6) by Henry Young—Masher, 106 lbs., (Brazal) won handily; Christmas Eve (4), 111, second; Nebraska Lass (aged), 111, third; Stelcliff, L. M. Eckert, Miss Tempo and Tordillo also ran. Time, 1:41.

DAIRY SHOW POSTPONED.

Seattle, Wash., September 9, 1915.

On September the 6th the directors of the Western National Dairy Show met and unanimously passed a resolution postponing the first exhibition to 1916. There were several reasons for so doing:

Few herds will be on the Pacific Coast this year, owing to the uncertainty about the foot and mouth disease; fewer dairy herds owned in the Pacific states will be shown than for some time; a suitable building in Seattle could not be obtained; the commercial bodies of the city had, prior to organization of the dairy show, appropriated all of their 1915 funds for conventions, etc.

Added to this was an apparent depression in the dairy industry.

Secretary Pace recommended the postponement for one year, and the recommendation was adopted, but an order was voted to resume the plans about January first for a larger show in 1916.

The Western National Dairy Show has been incorporated, and the present officers will continue their work, feeling certain that many of the obstacles encountered this year will disappear.

Bonnie Ansel, Teddy Bear and Kid Cupid were all race winners at Baker, Oregon, last week. Baker's meeting was the best in her history.

NOTES and NEWS

Hal Boy 2:02¼.
Peter Mc. 2:06¼.
Directum I. 1:56¾.
Russell Boy 2:02¼.
Deroche (3) 2:08½.
Napoleon Direct 2:01¼.
Walnut Tree (2) 2:12¼.
All winning performances.
Peter Volo (4) 2:02 in a losing trial.
Evidently, Wednesday at Syracuse was one of those kind" of days.

◈◈◈

Don't forget Phoenix—closes Oct. 1.

◈◈◈

Single G. grabbed the 2:07 pace at Syracuse.

◈◈◈

Margaret Druien seems to have a strangle hold on hose fast trotting classes.

◈◈◈

Members of the Sonoma Valley Driving Club will hold a matinee tomorrow at Sonoma, Joe Ryan being he "guiding spirit."

◈◈◈

Mark this one up in the book—Lulu Lumine has won a race for Tommy Murphy. With Peter Scott and Mirthful she is entered in the big trotting stake at the exposition this fall.

◈◈◈

Zomblack, Charley DeRyder's trotter-pacer-trotter —anything to oblige!—was second to The Proof Thursday at Milwaukee over a very heavy track. Wonder how Charley will race him at the exposition?

◈◈◈

The Proof and Geo. N. Patterson were among the money winners at Milwaukee Thursday on a wet track, The Proof being first in the 2:21 trot and the colt taking second in the event for three-year-olds.

◈◈◈

W. P. McNair of Douglas, Arizona, paid a flying visit to the P.-P. I. E. a few days ago, being bound for the northwest to fill a number of engagements as starter on the North Pacific Fair Circuit.

◈◈◈

William annexed another world's record Thursday at Syracuse when Mr. Billings drove him to wagon in 1:59½, the performance supplanting the 2:01½ of Little Boy, made some years ago at Memphis, also driven by Mr. Billings.

◈◈◈

Yes, gentle reader, there were gentle showers on opening day at Syracuse, as per usual. Say, the Grand Circuiters would feel right at home in the Willamette Valley this season, ne c'est pas? The latter phrase is Horse Review for "eh, kid?"

◈◈◈

The halfmile track at Pleasanton will be put in condition for the use of the runners exclusively, and quite a number of thoroughbreds will winter at the MacKenzie plant. Thirty stalls have already been engaged by George Wingfield, who will have them filled up with candidates for next year's stakes, to be handled by Trainer George Strate.

◈◈◈

As a result of a dinner wager, Vera Hal and Happy Dentist met Wednesday morning at the Stadium in a match race, minus hobbles, Harold Cohn and Freddie Lauterwasser being the pilots. The mare won in two well contested heats in which the time was a real surprise—2:10 and 2:10¼. This is better than Happy has been doing wearing 'em.

◈◈◈

Every once in a while someone predicts that the then existing world's record will never be broken. Then about the next week, or the next month, or not later than the next season, that poor old record gets all bent up in a horrible manner. Prophecy, like a little learning, seems to be a very dangerous thing when it comes to this championship record business.

◈◈◈

Horses for the shows at the exposition are beginning to arrive in goodly numbers, and the stables now occupied by the runners will fill right up again with the prize ring champions. The stable of Miss Loula Long of Kansas City is among the most notable of the early arrivals, headed by the unbeaten saddle stallion, My Major Dare.

◈◈◈

S. Christenson has sent his good two-year-old trotter, Natal Day, back to the stable of his former trainer, Colonel Jim Thompson, at Sacramento. Mr. Christenson also shipped to Honolulu this week a number of horses, drafters, thoroughbreds and polo ponies, which he had recently assembled here for friends in the islands.

◈◈◈

Future Tramp continues to occupy the place of honor in the wireless reports from Pleasanton, where he is hanging up some fast time in his work. Recently mention was made of a mile trotted in 2:16¼, the last half being in 1:01¼, and on Friday of last week he went the route in 2:08, with the last half in 1:02. Apparently R. J. MacKenzie meant every word of it last fall when he stated that neither Spriggan nor Future Tramp were being sold for any fault.

Will Green, who went to Sydney with Don Pronto, has been in charge of that aristocratic gentleman ever since he arrived there, and seems well pleased with Australia and her horsemen, as he shows no signs of coming home.

◈◈◈

Secretary Shaughnessy of the Arizona State Fair has been a visitor at various California points this week, en route home from a business trip to the northwest. Mr. Shaughnessy is rustling entries right and left for his speed program, and expects a week of fine sport in spite of the reduction in the appropriation for the speed department. From this city the popular secretary hied himself to Sacramento, where he was sure of a royal welcome from C. W. Paine and other friends, while Los Angeles and San Diego are also included in his itinerary.

◈◈◈

Horsemen who go to Riverside for the fair will have further opportunity for racing immediately thereafter at Santa Ana, where the Orange County Fair will be held October 12-15. Santa Ana has a mile track and half a dozen harness races are carded, open to all, in addition to a couple of events for local horses and a number of runs. Ed R. Smith is the secretary, and as entries close September 25, horsemen who expect to be in that neighborhood in October should write at once for entry blanks and full particulars.

◈◈◈

We have an occasional inquiry as to what horses are eligible to the big stakes at the exposition this fall, and submit the following: For the 2:10 trot, Baby Doll, Tropic Dawn, Virginia Barnette, Peter McCormick, A. R. G., Wilbur Lou, Esperanza, Electric Patch, Spriggan, Miss Perfection, Sea Waif, San Felipe, Axtien, Peter Scott, Lulu Lumine and Mirthful, while for the 2:06 pace there are Loch Lomond, College Gent, White Sox, O. U. C., Hemet, Impetuous Palmer, Princess Patch, Zomblack, Patrick de Oro, The Beaver, Little Bernice, Rose Equity, Hal Boy, Red Rock, Walnut Grove, Major Ong, Peter Farren, Hal S. and Alcy E.

FERNDALE, CAL.

Sept. 7.—Free-for-all:
Emmaline Dillon, br m by Guy Dillon.....1 1 1
Maude McAttee, b m by Cassiar.....2 2 2
Landis B., br g by Timothy D. .....
Time—2:12¾, 2:24, 2:14½.

Two-year-old pace:
Don Remo, b g by Irving Pointer.....2 1 1
Mabel J., ch m by Fred Dillon.....1 2 2
Time—2:30, 2:32½, 2:41¾.

Sept. 8.—2:30 trot and pace:
Bonnie, b m by Bonnie Steinway..... 1 1
Ramona, bl m by Cassiar..... 2 2
Frank Ellery, b g by Cassiar..... 3 3
Time—2:19¼, 2:20.

2:30 trot:
McAdrian, b s by Guy McKinney..... 1 1
Lady Steinmoor, gr m by Bonnie Steinmoor..... 2 2
Helen Ray, b m by Monterey..... 3 3
Mamie K., br m by Crusados..... 4 4
Time—2:35½, 2:26.

Sept. 9.—Three-year-old trot and pace:
Lady Dillon, b m by Frank Dillon.....2 1 1
Eureka Girl, bl m by Nearest McKinney.....1 2 2
Philip Pointer, b g by Irving Pointer.....3 3 3
Time—2:39, 2:35, 2:30.

2:24 pace:
Bonnie, b g by Bonnie Steinway.....2 2 * 1 1 1
Ramona, bl m by Cassiar.....1 1 * 2 2 2
Don Portola, br g by Merry Mack.....3 3 3 3 3 3
Little Light, b m by Nutwood Wilkes.....4 ds
*Dead heat.
Time—2:21½, 2:20, 2:19¾, 2:22, 2:26, 2:35.

Sept. 10.—Free-for-all trot and pace:
Emmaline Dillon, br m by Guy Dillon.....1 1 1
Maude McAttee, b m by Cassiar.....2 2 2
Time—2:13¼, 2:17¾, 2:18.

Consolation trot and pace:
Little Light, b m by Nutwood Wilkes..... 1 1
Maxine K., br m by Crusados..... 2 2
Time—2:47½, 2:45.

LAST DAY AT HARTFORD.

Hartford, Sept. 10.—After taking the program yesterday, Tommy Murphy threatened to repeat the performance again today in the closing card at Charter Oak Park, annexing two firsts and one second out of the three events raced, Walter Cox and the old standby pacer Camelia being the only bars to his ambitions.

What probably pleased Murphy more than anything alse during the week was the winning performance today of the little western trotter Lulu Lumine. Almost two years ago she was purchased by A. B. Çosden of New York at a good stiff price, $12,500, and up until today had never won a race for him. Her first and fastest heat of the race that broke the jinx was in 2:06¼, after which things were easier. Trampright had a straight heat win from Kitty L. Bellini and a number of other fair trotters, and Hal S. forced Camelia to pace in 2:04¾ to beat him. The results:

Hartford, Sept. 10—2:11 trot, purse $2,000:
Lulu Lumine, b m by Orator.....(Murphy) 1 1 1
Earlwood L., b g by Earl of Chatham..(Crozier) 2 2 2
Bronson, br g by Bingen.....(Graves) 3 3 3
Victor Star, Baron Aberdeen, Adbell M., Parcliffe and Nathan Axworthy also started.
Time—2:06¼, 2:07¼, 2:09½.

2:14 pace, purse $2,000:
Camelia, br m by Cummer.....(Cox) 1 1 1
Hal S., ro g by Hal Chaffin.....(Murphy) 2 3 2
Budd Elliott, br g by Prodigal.....(Geers) 5 2 3
Baby Bertha, Altawood and Bingen Pointer also started.
Time—2:04¾, 2:06, 2:07¾.

2:15 trot, purse $1,000:
Trampright, b m by Trampfast.....(Murphy) 1 1 1
Kitty L. Bellini, gr m by Bellini.....(Hinds) 4 2 2
Idora Worthy, b m by Guy Axworthy..(Rodney) 8 5 2
Almah, Audrey Grey, Ginger Boy, Vallette, Princess Nelda, Auslbrook and Lucy Reynolds also started.
Time—2:10¼, 2:09¾, 2:09¾.

BAKER, OREGON.

[Report by Jos. Waddell.]

Baker, Ore., Sept. 11.—While the Baker County Fair which came to a close here today was not a member of the North Pacific Circuit it attracted all the best horses in the northwest and the racing was of a very high order, the meeting being by far the best one ever held here. Lady Hal established a new track record of 2:09¼, and save for unfavorable weather conditions today, caused by a strong, cold wind, the northwestern two-lap records for both trotters and pacers would undoubtedly have been lowered.

But one untoward event occurred during the week. H. Squires of Portland, manager and driver of Oakland Moore, after stating that the horse was all right and ready to race in the 2:12 trot, and without giving other notice to the judges or secretary, took the horse from the grounds and shipped him while the race was in progress. The judges fined him $100 and ordered him suspended for two years. The summaries:

Baker, Ore., Sept. 8.—2:18 pace, purse $400:
Lady Hal, b m by Hal B.....(Hogoboom) 1 1 1
Scarlet Trent, b g by Parovas.....(Brown) 4 2 2
Mack Fitzsimmons, ch g by Bob Fitzsimmons..
.....(Helman) 2 3 4
.....(Squires) 3 4 3
Hal Bear, b g by Hal B.....
St. Elmo (Gholson) 5-5-5, Indian Hal (Truesdale) 8-7-6, Sonoma Maid (Stiman) 7-8-7, Molly (Leggett) 6-6-dr., Rothada (Butcher) 9-ds.
Time—2:09¼, 2:12, 2:12½.

2:25 trot, purse $400:
Floradora Z., b m by Zombro.....(Guion) 1 1 1
Hallie B., b m by Hal B.....(Swisher) 2 2 4
Eloise Dell, br m by Alconda Jay.....(Daniels) 7 7 2
Novela, b m by Letrado.....(Stetson) 3 3 3
Gen. Brightheart (Brady) 4-4-6, Marie Fitzsimmons (Swank) 8-5-6, Arenga (Butcher) 6-5-8, Amy McKinney (Wilbourne) 5-8-7.
Time—2:19½, 2:19½, 2:19¼.

Sept. 9.—2:15 pace, purse $400:
Prince Zolock, bl h by Zolock.....(Helman) 1 2 1
Scarlet Trent, b g by Parovas.....(Brown) 3 1 *
Jennie May, br m by Hal B.....(Squires) 2 4 4
Belle Smith, br m by The Blacksmith(Hogoboom) 5 5 2
Soumise (Leggett) 4-6-3, St. Elmo (Stanford) 6-3-5.
*Accident, placed.
Time—2:12½, 2:13, 2:15.

2:18 trot, purse $400:
Bonnie Ansel, b m by Prince Ansel.....(Spencer) 1 1 1
Hallie B., b m by Hal B.....(Swisher) 2 2 3
Arenga, b g by McV.....(Wilbourne) 3 5 2
Marguerite A., br m by Zombro.....(Guion) 5 3 4
Marie Fitzsimmons (Swank) 5-4-5.
Time—2:18, 2:20, 2:23.

Sept. 10.—2:25 pace, purse $400:
Lady Hal, b m by Hal B.....(Hogoboom) 1 1 1
Mack Fitzsimmons, ch g by Bob Fitzsimmons..
.....(Helman) 2 3 2
.....(Squires) 3 2 3
Hal Bear, b g by Hal B.....(Young) 4 4 4
Nellie J., b m by Zolock.....
Time—2:10, 2:12½, 2:17½.

2:30 trot, purse $400:
Floradora Z., b m by Zombro.....(Guion) 4 1 1
Columbia T., b m by Bon Guy.....(Daniels) 1 2 4
Amy McKinney, bl m by McKinney..(Wilbourne) 5 5 2
Novela, b m by Letrado.....(Stetson) 3 3 3
Perrieo (Squires) 2-4-ds.
Time—2:16¼, 2:18, 2:20½.

Sept. 11.—2:10 pace, purse $500:
Teddy Bear, b h by Del Coronado.....(Daniels) 1 1 1
Harold Welcome, b h by Welcome.....(Butcher) 2 2 2
Allerdaw, br g by Allertonian.....(Hogoboom) 3 3 3
Haltamont, b h by Hal B.....(Todd) 4 4 4
Delmas (Wilbourne) 5-5-dr.
Time—2:12, 2:12, 2:13¾.

2:12 trot, purse $500:
Kid Cupid, ch g by Cupid.....(Daniels) 1 1 1
Dan Matthews, b g by Eagle Blood.....(Brown) 2 3 2
Nuristo, br g by Nushagak.....(Spencer) 3 2 3
Time—2:17¼, 2:15¼, 2:16¼.

DON PRONTO VIEWED AT SYDNEY AS SEASON OPENS.

The new season was opened at Sydney by the Australian Trotting Club auspiciously at Victoria Park last Friday afternoon. The weather conditions were delightful and the attendance was large. Not less than three fresh records were put up for the course (one by Huon Junior's grandson, Rock Boy, who won a double, one by Percy, and the other by a grandson of Ribbonwood, the five-year-old horse Ribbon Boy, in the first event). As the square-gaited trotter Win All, a son of Winn Alto, won the next race in a field of 17, a sister of his sire being second, the opening results of the season were highly pleasing to the Richmond stud owner, Mr. A. D. Playfair.

The fixture will also be memorable, for at it the recently imported unhoppled pacer Don Pronto 2:02¼ made his first appearance on an Australian course. He was paraded in the Birdcage before an admiring crowd, and later on gave an exhibition of pacing, being driven three times up and down the straight on the central grass track by Green, who had charge of him on the voyage from California, and since his arrival in this country. Owners and breeders of trotting horses were much interested in the handsome black, and closely watched him in action. Don Pronto has put on condition since his owner (Mr. R. C. Simpson) has had him at Armidale. Of course he did not show any of his great speed, but the experts were impressed by the manners of the Don and the delight he took in having his few brief spins under conditions which were entirely new to him.To nearly every onlooker it was a revelation to see the black, who closely resembles a thoroughbred, perfectly pacing, without the semblance of a mistake. Mr. A. R. Payten, who judged the trotting classes at Sydney a few days ago, remarked that Don Pronto's general conformation was almost perfect; he had all the good points of the thoroughbred, his shoulders were particularly good, sloping well back, and was well let down in the hocks, with good length from the hips back to the round-bone.—Australian Trotting Record.

THE VALUE OF THE STOCK SHOW.

The growth of the improved live stock industry is an interesting study. During some generations of men this improvement has been made more rapidly than at other times, but at best it has been much too slow for the good of agricultural communities. This was due to the conservatism of many, which made them over-cautious about making changes in their methods of life-work, and to the open doubt and active opposition of some who are never ready for improvement.

From the time when progressive farmers began to breed better live stock the question of showing the public the importance of this improvement became imperative. So the value of advertising was recognized at an early day, and an effective form of it was to exhibit the results of improved blood.

Facts that come to the mind by aid of the eye are more readily accepted than those received through some other channel; hence early breeders resorted to the practical method of exhibiting their improved live stock to prove its superiority to the public.

A history of the inception and growth of stock shows would no doubt be interesting, but it would be too lengthy for an article of this character. Whatever might be said about the improvement of horses in ancient times, it is a matter of history that the exhibition of beef cattle is almost coexistent with the first efforts to improve them.

During the latter part of the eighteenth century Chas. and Robt. Colling called public attention to their Shorthorns and impressed their merit by the exhibition of a fat steer called the Durham Ox and a purebred heifer that is known in history as the "White heifer that traveled," because of her extensive exhibition through several counties of England. That these exhibitions were valuable to the Collings as a means of calling public attention to their cattle is clearly proved by the great crowds that assembled to see them.

The Durham Ox was sold in February, 1801, for £140, to be exhibited with an admission fee, and he proved such an attraction and his exhibition value rose so rapidly that in six months his owner was offered £2,000 ($10,000) for the steer. This was a remarkable record, and while it has something of the sensational about it, yet it shows the value in that early day of exhibitions as a means of impressing the merit of improved live stock. This exhibition was inaugurated by the Collings as a means of educating the farmers and stockmen, but it was changed by Mr. Bulmer into a scheme to make money by showing the sensational steer. Whatever benefit the public may have derived from these exhibitions, they were the harbingers of the modern stock shows. These are now regarded as essential to any progressive agricultural community, and their benefit is not limited to exhibitors who may thereby find a market for surplus stock, but it is largely educational, and is shared by every visitor who is willing to learn better methods, and who will take the time to study the excellent models of live stock form on exhibition.

It is here the farmer who is raising scrubs sees something better, and if he is progressive and ambitious he will invest in improved stock and so become an advocate of the gospel of good blood. The stock show too is where breeders compare standards, and see wherein one has succeeded and another failed. To the exhibitors themselves this comparison of standards, if honestly and unselfishly made, may fully compensate for the loss of prizes. The careful student of animal form will examine very carefully the exhibits of his competitors to see wherein his own stock may be improved. To this extent the shows are educational to exhibitors as well as spectators, and exhibitors who do not receive some such value from these annual comparisons are narrow or self-satisfied, or both.

Some extravagant language has been used to portray the value of some exhibitions of the past, representing them as being able to teach all that is worth knowing about live stock; but with due allowance for exaggerated statements these shows, when well managed, have proved a strong incentive to live stock improvement.

Farmers who are held close to home by the inexorable demand of farm work, with insufficient help, will manage to take a vacation during state fair week, and so see the evidence of improvement in all lines of agriculture. The stock shows stimulate competition among breeds and exhibitors, and so foster improvement in the various classes of stock; they encourage farmers to try improved stock and better methods, and they educate the public to the importance and value of improvement in all lines of agricultural effort.

It is impossible accurately to estimate the real value of the shows to the live stock industry. But while they have been a wonderful stimulus to improvement, there has been a transformation in the shows themselves. In character and management many of them are as unlike their prototypes of twenty years ago as modern prizewinners are different from their ancestors of a few generations ago. It is fortunate therefore that there has been improvement both in stock and stock shows.

Those who can compare the shows of twenty or thirty years ago with those of the present time will have no difficulty in noting the progress that has been made. The improvement is in the equipment of grounds and buildings, the elimination of archaic and unreasonable rules and a more progressive and accommodating management.

At some shows of the past the secretaries seemed to think their duties consisted largely in giving curt answers to perplexed exhibitors and in drawing their salaries, but the modern secretary is expected to conduct the show with ability and promptness and with accommodation and courtesy to patrons. If he fails to do so he will soon be dismissed. One of the unreasonable requirements adopted years ago by many county and some state fairs was a rule requiring two or more entries in order that exhibitors could draw the full amount of prizes. A very successful county fair in Missouri had this requirement, but had such liberal patronage and large entries that there had been no opportunity to enforce it. An exhibitor in an adjoining state who had seen the liberal prizes offered by this fair wrote its secretary asking him if he would enforce the rule requiring competition, stating he did not care to ship his cattle so far if only half the premium was to be paid. The secretary replied that he would have to enforce the rules, but he would guarantee competition. Acting on this guaranty, the cautious exhibitor shipped his cattle to the fair and found such hot competition that his winnings scarcely paid his stall rent.

At an Illinois fair where this rule was in force, an exhibitor of hogs discovered before the exhibition began that he had the only herd of his breed that had been entered. Not wishing to be limited to half the prize money, he persuaded a near-by breeder to ship in his herd in order to furnish competition, promising to pay all entry fees. When the show was over, the herd that came by special invitation to furnish competition had won all the first prizes.

Another unreasonable and unsatisfactory custom of early shows was to defer the selection of judges until the beginning of the fair, and then choose from among men present who could be persuaded to serve. Three men were sent into the ring to award the prizes, working as a committee. In many instances each man selected a different animal, so that an additional judge had to be sent in, and as his vote was not confined to the animals already selected by the other judges he sometimes picked a different one, thus confusing and prolonging the contest. In many instances five or six judges were selected before a decision could be reached. Frequently some of the judges selected were partial to certain exhibitors and more often those chosen were incompetent.

Within my knowledge a show was held where three men were asked to award the prizes on Shorthorns. In the ring for aged bulls two judges voted for one bull and the other cast his ballot for another, but in awarding the second prize he left his first choice bull and voted for a different one for second money.

From Sanders' "Shorthorn Cattle" I have taken an incident that was certainly remarkable and may be of interest in this connection. It shows the absurdity of this system of selecting judges then in vogue. At the United States Cattle Show, held at Springfield, O., in 1857, a prize of $500 was competed for by five herds—two from Ohio, two from Kentucky and one from Indiana, the latter being Gen. Sol Meredith's. There were five judges, and they must have been firm and much averse to compromise, for two of them voted for the Indiana herd, two for an Ohio herd and one for a Kentucky herd. After ballotin for two days without a decision, they unanimousl agreed on the recommendation that no premium b awarded, but that the money be retained by th society. Their recommendation was approved an the herd contest was never decided. Such a pr tracted contest does not necessarily imply incompe tence of the judges, but it does furnish ground fo the belief that their judgment was influenced b personal considerations and that they were exceed ingly obstinate.

A similar experience today would make the show the laughing stock of all exhibitors, but under ou plan of selecting judges such a fiasco is impossible Fair managers now exercise great care in selectin judges, and with few exceptions the men are compe tent, their decisions are correct and their work ha an educational value to spectators; but there is a occasional exception, a mistake on the part of those who choose the judge.

The writer remembers watching the work of one judge who had been imported from over the sea and in awarding the five prizes in a ring of steers the best one in the lot was left out of the money Fortunately such blunders are rare, and an unappre ciated value of the modern stock show is that judges are well qualified and that the animals they select as prizewinners serve as models which stockmen study and by which they estimate the progress that is being made by that breed. But while these decisions are quite helpful to many as a means of determining excellence in animal form, there are some stockmen who seem utterly unable to profit by them, just as there are some boys and young men who go through school without deriving any particular benefit from their association with careful and wise instructors. Men of this class sometimes breed live stock for a lifetime without producing an animal that is a credit to the breed.

A few years ago a man of this class was exhibiting his cattle at a state fair under the decisions of a man whose judgment was highly respected by most exhibitors. As the show progressed, this exhibitor received no prizes except a few minor ones in the class of specials offered by his breed association. He made frequent complaints to the judge, who good-anturedly told him that his cattle had been carefully examined. When the ring for get of sire was shown and this disgruntled exhibitor did not draw a prize he took the judge to task severely, saying, "Can't you see the uniformity of my entry? The calves are just like their sire."

This criticism was more than the little English-American judge could endure, patiently, so he replied with some emphasis:

"Yes, your bull is a scalawag and his calves are all like him."

This is a true narration of the incident, with the omission of some adjectives that were used.

The stock show of today is well-esteemed by farmers and stockmen, who regard it as a school of instruction in the art of better breeding and as a distributor of improved blood; but it will never be appreciated to the full extent of its valuable contribution to improved live stock and better farming.—B. O. Cowan, Breeders' Gazette.

One of the kind to be seen at the P.-P. I. E. shows
NEWAD HILLSIDE
A Shire stallion imported by Henry Wheatley, of Salvador Stock Farm, Napa.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

A SLANDER ON THE LIVES OF ANIMALS.

In the following story—based on the lifetime of hirty-five years of hunting and trapping in the wilder parts of both North and South America, Will Frakes, a writer well known to California sportsmen, shows n an interesting narrative, that many of the statements about the habits and divers other beliefs regarding many species of wild animals, are entirely at variance with the facts:

Some of the beliefs that I am about to declare are absolutely wrong in every particular are so long standing, have been on record so long, and are so thoroughly believed in by humanity all over the world, that I shall only bring censure upon myself by declaring their fallacy. But as I do not have to depend on my pen for a living, and as I have no reputation to lose, I can afford to tell the truth as I have seen and learned it, regardless of all statements to the contrary by whoever made, solely and only for the sake of truth and the slandered animals.

It is a strange fact that whenever any fallacy gets thoroughly implanted in the minds of a great many human beings, no matter how senseless or silly it may be, how contrary to all reason, nor how often visible evidence may give it the lie direct, it is a slow, hard process to eradicate it.

Here and there, the world over, there are a few real hunters and naturalists who start out in life to search for truth for the sake of truth. But the great majority are simply searching for foundations to bolster theories that are as wild, if beautiful, as they are senseless and untrue.

Now what I am about to tell you I cannot, of course (with the vast amount of perfectly reliable long-standing evidence to the contrary), expect you to believe. But I do respectfully ask you to investigate it; and when you find that it is true—for you will never find that it is untrue—give me credit.

I think it is better that I begin with the milder beliefs that are thought by the general public to be positive and undeniable facts, and gradually lead up to the greater ones. For if I stated the greater ones first, you might be so disgusted that you would not read any further, and I rather wish that you would finish the story, just to see how bad it really is.

Now I do not suppose there are any of you but what have read hunting stories; and a few of you have probably written them; but did you ever read one in your life, or ever write one, but what in the story somewhere, some of the boys dropped an animal in its tracks with a bullet through its heart?

Now all through the complexity of nature there are exceptions and variations that can not always be understood nor accounted for; but in the instances that I am about to mention they will not happen once in a hundred times. And, barring these rare exceptions, I declare that all such statements are misstatements; that no animal drops dead in its tracks when it has been shot through the heart. Furthermore, I say that a shot through the heart will not knock the animal down; more than that, I insist that although his heart might be shot to fragments it would not even stagger him, unless at the same time he has been shot through one of the shoulders.

An animal shot through the heart will always jump and run with all the might there is in it till it bleeds to death. It will run, according to its speed, from 50 to 100 yards, before it falls. A shot through the big part of the lungs is just as deadly and will kill as quickly as a shot through the heart. In my life I think I have shot as many as one hundred of the larger animals through the heart, but never in any instance did they fail to run some distance before they died. And in all my wanderings I have never met any real true hunter whose experience does not confirm mine. But there is no lack of evidence but what it can be done any day in the week in a downtown office with a typewriter.

But although it is an "established fact" that every animal drops dead in its tracks when it is shot through the heart, there is one that does not: the grizzly bear. "Shooting him through the heart does not hurt him very much, at any rate it does not kill him for a good while." All such statements are so silly and senseless that it is a wonder that any editor would ever publish such bosh. A grizzly bear shot through the heart will live about as long as any other animal would with a similar shot; two or three minutes, not longer. But if a man was within 25 or 30 yards of a grizzly, and shot the bear's heart to rags, it would not disable him in the least, and the bear would have plenty of time and life to get the man and tear him to pieces before he died himself.

If you ever find yourself in close quarters with a very dangerous animal—if you have any time to choose—shoot him through the head. If you can not do that, let him have it through the back, hips or neck; or, if you have a very hard-shooting gun, smash him through the shoulders. Any of these shots will "drop him in his tracks," and either kill or disable him so badly that you will have plenty of time to shoot him where you please after that.

Du Chaillu, the famous African hunter, always allowed gorillas and other dangerous animals to come very close to him before he fired, and then dropped them dead in their tracks with a bullet through the heart. So he says! But Du Chaillu was undoubtedly a great hunter, and knew better than this when he wrote it; but he wanted fame, and he wanted money; it sounded good, and this dead-shot-heart-business was so thoroughly believed in by nearly every one, that for him to have denied it would have been to hame stamped himself a faker.

Once, while I was hunting in South Africa, a young Englishman brought in a deer that he had shot through the heart. When I saw that the deer had been shot through the heart, I asked him how far it ran before it fell.

"Why, where were you?" he asked, "I didn't see anything of you out there."

"I was here at the house," said I, "but I know that it ran some with that kind of a shot."

He looked at me in a wild sort of way, and said: "Well, to tell you the truth, the deer did run 60 or 70 yards after I shot it; but it was such an extraordinary occurrence—shot through the heart, don't you know, and should have dropped in its tracks—that I did not dare to mention it for fear of being taken for a faker." Du Chillu had this same weakness.

And now, here is another hunter's pet that I am going to try to smash. Of course I shall not be able to do it, it is far more formidable, terrifying and frightful than any shot through the heart could ever be. There are far more witnesses to substantiate the truth of it, and it has been put on record thousands of times by people so eminently respectable that their words cannot be doubted; and still, I declare that it is untrue.

Now where is there a hunter from British America to Tierra del Fuego, even of limited experience, who has not sat by his campfire in some of the great forests or in some of the rocky mountain ranges, and heard that "wild, weird scream, that sounded as though it might have come from the lips of a dying woman," the scream of the panther? It makes the cold chills run up your back, and however brave you may be you are pretty apt to see that your weapons are in easy reach and in shooting order.

And now, in spite of all this I declare that no one in this world ever heard a panther scream, "holler," roar, or make any noise of that description. By a panther, I mean the "California lion," or "American lion," or "cougar," scientifically known as Felis concolor. Go to any zoological park and you will hear African lions roar, wolves howl, and sometimes a fox will bark; but if you can only live till you can hear an American lion scream, you will never die.

I was born in California and have hunted from here to the Argentine Republic in South America. I hunted for ten years in the Gran Chaco forests of North Argentine, where cougars are very plentiful, and never heard one scream anywhere, at any time in my whole life of wandering. More than that: I never saw any real hunter that ever did.

I was once talking with my friend T. S. Van Dyke, the famous writer of hunting stories, and asked him if he had ever heard an American lion scream.

"No," said he, with a quiet smile, "nor do I suppose any one else ever did."

Now I do not doubt but what there are a great many people who honestly believe they have heard lions scream; and I do not doubt but what they heard something make a noise, but it was not a lion.

The big horned owl does something besides hoot; sometimes he screams in a wild, weird way that can be heard for a long distance; and if he is in the timber, or in some canyon where the sound will be prolonged, it has a terrifying effect, even when you know what it is.

I once read an account of a man that was riding home in the night through the woods, when a panther suddenly screamed up in a tree just over his head. His horse became frantic and ran away with him—he did not say so, but I expect he tried to stop the horse with his whip. When he arrived home, which was only a short distance, he returned to the tree with his gun and dogs, but the lion had come down; still his dogs tracked it up and the man killed it.

Now this is positive evidence that a lion does scream, and it would hold good forever were it not for a class of people like myself, that go nosing around after truth and just ruin some of the finest stories in the world.

But here is just how easy one may be mistaken sometimes: One morning I heard some coyotes not far from my camp, and thinking that I might get a shot at them, picked up my rifle and slipped up onto a little ridge where I thought they were. When it seemed that I must be nearly to them, they stopped their noise but I could not see them anywhere. But from about where they evidently were, two deer ran out of the brush and went tearing off down a canyon.

Now, as far as circumstantial evidence goes, there is just as much reason to believe that those deer were doing that howling, as there is to prove that the noise the man heard was a lion's scream.

And again: Had that lion been in a tree, and had the least intention of attacking the man, it would have been against all laws of animal nature for it to have screamed and frightened him away. If lions hunted in that manner they would soon all starve to death. On the other hand, had the lion feared the man he never would have screamed and so made known his presence to his most dangerous enemy.

Now about the fact of the business was: That some old owl lit in that tree and screamed about the time he was passing under it, stampeded his gun and dogs, and he accidentally came on to and killed some lion that just happened to be there. An American lion is a very sneaking, cowardly animal, and I never knew of one attacking a human being.

And here is another "old gag" that is a great favorite with new hunters. There is a measure of truth in this one, but the truth is invariably gagged to death by the man who peered into the black darkness, and saw two livid balls of fire glaring at him, that he knew to be the eyes of a lion.

Now, as a matter of fact a lion's eyes do not shine in the dark, neither do the eyes of any other animal on earth. If it is dark and you are near a light that shines in the face of the animal, and it is looking at you, its eyes will reflect the light, and they usually appear to be green, or red; but put your light out, and you will find that a lion's eyes will glare with about the lustre of two balls of mud. An animal's eyes simply act as reflectors for the light rays, but do not emit any light of themselves; and all statements that a lion's eyes shine in the darkness are certainly wrong.

The hunter that sees the two balls of fire glaring at him in the darkness, always grabs up his rifle and draws a bead exactly between them—a thing no man ever did, for one of the best reasons in the world: you can not see the front sight when you hold the gun up to shoot in the night, let alone "draw a bead."

There is another thing that old hunters never have any trouble with and which is a great source of excitement to the tyro: the screeching of wildcats. And even the coons will screech for them sometimes.

And another senseless belief is that a rattlesnake can not bite until after it has sounded its rattles. Bosh! You might chop its rattles off, and half the snake along with them, and threw them over the fence, and still the snake could bite, and would do it, too, if anything came near it.

There is no truth in the story that a snake will crawl up and deliberately bite a sleeping person. Misunderstood and despised, many of them harmless and almost helpless, the poor snake has a hard time. Could they only know the scandalous libels that are put upon them they would certainly bite more than they do.

But of all the exaggerated nonsense heaped upon any poor dumb brute, what I am about to tell you now, "takes the cake." I have saved this till the last, for I think that by this time maybe you can stand it. It does seem as though I would hardly dare to tell such horrible truths when I well know that it would be far better for me to tell untruths and stand in with the crowd.

The animal that I now wish to tell you about is the musk-hog, or peccary (Dicotyles torquatus). Now there is not even a school boy but what knows the nature of this fearless and terribly savage beast. Every traveler that ever went to South Africa and hunted any has had narrow escapes, and can vouch from personal experience to the ferocity of these animals, and to the undoubted danger there is in hunting them, or even in hunting in jungles where the peccaries are liable to be met with. Every Natural History tells of the nature of this "terror of the jungles." And still, I declare that a peccary is one of the most cowardly, timid, and inoffensive animals in existence.

Should you ever have the luck to come onto a band of peccaries, the only possible danger that might happen would be that the poor hogs would get out of sight before you could get a shot at them. They would be no more liable to charge on you than a band of deer would be, and they would not be so dangerous if they did.

Now, I lived and hunted in the Gran Chaco forests, in Northern Argentina, South America, for ten years. These forests and jungles are the true home of the peccary, they are there by the hundreds; and if there is a creature on earth that I know anything about, that creature is the musk-hog. I have trailed them through jungles, captured their little ones and made pets of them; and never on any occasion during ten years of almost continual hunting, did I ever know, or ever hear of one attacking a human being.

Peccaries are excellent meat and the boars are as good as the sows. It is not necessary to immediately remove the musk glands from their backs, as is generally believed. They may be left there all night without scenting the meat in the last. I know, for I have done it many a time. I never shot one unless I needed it for meat, for I could feel no pleasure in killing an animal so harmless and inoffensive.

There are three distinct species of musk-hogs to be found in the Gran Chaco forests. The largest kind is a black hog weighing when grown from 150 to 175 pounds live weight. They get very fat, and like all the others are good meat. Then there is the

javaline (Dictotyles labiatus) that will weigh 75 or 80 pounds live weight. They are a grizzly grayish color with very long, soft hair and bristles 7 or 8 inches long. They have very large heads, and long, convex noses. Then there are "the little terrors" weighing 50 or 60 pounds live weight. These are the fellows that put the hunter up a tree and keep him there till he starves to death. Poor hogs! I'll warrant that if ever a man climbed a tree from one, and the hog saw him, that it was out of sight the other way before the man got up the tree very far.

Should the peccary be stopped by the dogs, of course it will fight; so will a rat. But the rat will not come out of his hole to fight a dog. Still, he is just as liable to do it as a peccary is to come out of a jungle to fight a man. Their teeth are not "long and fang-like," but are rather short for hog teeth, being about an inch long. The under tusk does not stick out of the animal's mouth, but fits up under its upper lip and does not show.

Female peccaries do not have teats along their bellies as domestic hogs do, but have an udder and teats like a deer, and there is no gall on the liver. All the species have the musk glands, and all have very short tails about an inch long. The outside dewclaw or little toe on each hind foot is missing, although its corresponding toe on the inside is perfectly developed, as are all the other toes. I have studied and tried to find out why this particular toe was wanting, but have never been able to find any reason whatever to account for it.

In the D. labiatus all the little toes on all the feet appear to be in a rudimentary condition. Occasionally there will be a well developed toe on some of the feet, and sometimes they are absent altogether. I do not believe the large black hog is known to science, as I have never seen an account of it in print. They are not very plentiful, but are found in that part of the Gran Chaco forests lying south of the Bermejo river, and north of the Rio Salado, and east of the Parana.

There is little doubt but what this much abused and slandered animal will go out of existence believed to have been one of the most fearless and ferocious creatures that ever lived on earth.

At the Traps

Gun Club Map of the United States.—The revised gun club map of the United States recently issued by the Du Pont Powder Company, showing the location of towns containing organized clubs, gives the total number of clubs up to November 15, 1914, as 3,221. It is estimated that the average membership of these clubs is fifty, making a total of 161,050 trapshooters belonging to clubs that shoot regularly.

There probably are many more trapshooters not members of organized clubs, mostly in farming sections. The increasing popularity of the hand trap tends to swell the number of unorganized trapshooters.

The total of all classes is estimated at 400,000, probably more actual participants than can be found in any other American sport. Trapshooting is undoubtedly growing rapidly and enthusiasts predict that the next annual map will show more than 4,000 clubs and that for 1915 the total number of trapshooters will grow to 500,000.

* * *

Capitol City Traps.—A feature of the Big Time Gun Club shoot at Sacramento recently was a match between two squads of women scatter-gun enthusiasts. Two of the fair shooters, Miss Edna Baker of Sacramento and Mrs. Nicholls of Nevada City, tied in a 10-bird event, each with 8 clay pigeons. Mrs. Nicholls won the shoot-off in a miss-and-out match, 4 to 3 birds.

Another feature of the day was a "Beginners' Shoot" for Du Pont watch fob trophies. L. C. Smith broke 17 out of 25 and won the watch. Frank Gehring was second with 14 birds. Fifteen tyros at trap shooting lined up in this event. M. Priest of Roseville won the regular 25-bird match with a straight score. A. E. Pearson was runner-up with 21 birds.

The above shoot was intended to be the final meeting for this season. So successful, however, have the club shoots been that a big merchandise shoot will be held later this month.

* * *

Washington Shoots.—At the regular weekly shoot of the Seattle Trapshooters' Association, August 29, Hugh Fleming, who broke 93 out of 100 targets, was high amateur.

In the trophy event, Fleming won Class A medal, Dr. King won Class B medal, H. G. Bostick won Class C medal and R. W. Kinzer won Class D medal.

Following are the scores at 100 targets: D. Rhodes 95, I. M. Fisher 94, Hugh Fleming 93, R. W. Kinzer 82, G. M. Owens 80, C. E. McKelvey 79, H. G. Bostick 76, J. H. Willman 71, C. W. Stimson 66.

At 50 birds: F. Mahan 42, D. Robb 42, Dr. King 41, G. Canuck 41, R. S. Searle 40, Dr. Tom Mesdag 40, J. W. Glascock 39, R. H. Pearce 38, J. S. Scott 35, T. Jenks 35, C. R. Rank 32, D. M. Dirks 30, T. Connors 30, L. Spencer 29, M. Strong 28.

* * *

The Bellingham Gun Club pulled off a lively merchandise shoot August 26. Sixty prizes were distributed to shooters in seven events. Dell Cooper's 91 out of 100 was high amateur score for the day. Geo. Miller and Jim Hurlburt were next up with 90 breaks.

The scores in the team shoot (three-man teams) follow:

Events—	1	2	3	4	5	6	7
Targets—	15	15	20	15	15	20	25
L. H. Reid	15	15	19	15	14	19	25
I. M. Fisher	12	13	17	12	15	19	24
John Kienart	12	12	17	12	13	18	25
J. H. Hurlbut	15	14	18	14	13	16	22
Geo. W. Miller	12	15	19	14	13	17	20
Dr. Spratley	12	13	17	13	13	18	21
James Inks	10	14	17	11	14	16	21
T. H. Wagner	10	10	18	13	13	14	24
Dell Cooper	15	13	18	13	14	18	18
J. Miller	11	9	11	9	9	12	15

* * *

The Tacoma Gun Club shoot on the 6th inst. did not draw as large an attendance as was expected—too many other attractions at the time, writes Secretary Carl Coon. The program called for five 20 and two 25 bird events.

The results at 150 birds were. A. A. Riehl 140, G. W. Miller 135, J. C. Jansen 132, B. C. Donnelly 130, J. A. Dague 126, L. C. Riehl 122. L. H. Reid* 148, F. C. Riehl* 143, I. M. Fisher* 141, G. H. Garrison* 137, J. S. Fanning* 134, G. H. Hambright* 134.

D. W. Fleet, 88 out of 100. At 50 birds: J. Cooper 43, Carl Coon 42, F. L. Baker 42, D. H. Bales 42, G. H. Purdy 41, A. Z. Smith 38, H. A. Sullivan 35, H. F. King 34.

* * *

Beginners' Shoots.—In a communication from Wilmington, Del., dated the 11th inst., Mr. T. E. Doremus requests the announcement "that we will be unable to render a full report on the 'Beginners' Shoots' for some days yet.

We sent out in all 500 watch fobs and considerably over a hundred spoons for the women shooters, and only about 300 clubs have already reported on the results of the Beginners' Shoots, so that until the other 200 make a report we will be unable to determine the winners of the 100 loving cups, which will be given to the 100 clubs having the greatest number of beginners participating in the event."

This publicity is made to advise many gun clubs and shooters who are "on the anxious seat," awaiting returns from the Du Pont Powder Company.

* * *

An Old Friend Back.—Jack Fanning arrived in this city Sunday evening last, coming in via Seattle, Portland and other northern points—he left Chicago after the G. A. H. and made the trip in easy stages for about a two monthss stay here. Jack is the same genial sportsman we knew 20 years ago and he received a royal welcome from many friends here during the week.

The sparrow shooting matches in New Zealand, described in another column, reminds us that Jack won the sparrow championship of the United States, some years ago, by grassing 79 out of 100 "flitter flutters," at 28 yards rise. "Pop" Heikes was runner-up with 74. Ed Fulford also killed 74, but lost on the tie shoot-off; third high gun, 73, was shot by P. Price.

* * *

Golden Gaters.—The Golden Gate Gun Club will wind up the club blue rock season tomorrow at the West Alameda trap ground.

* * *

New Zealand Trap Notes.—Pigeon and sparrow trap shooting has a strong hold on the sportsmen of the antipodes as will be inferred from the following notes taken from the Christchurch Weekly Express:

The New Zealand Gun Clubs' Association's sparrow championship was this year allotted to the Springston Gun Club, and was shot off on the club's ground at Springston, August 4. The weather was beautifully fine, though the light in the afternoon was somewhat changeable. The arrangements were excellently carried out and there was a good attendance. There were 39 competitors and the conditions were 21 birds, seven each at 18, 20 and 23 yards, a competitor to retire after five misses. There was some excellent shooting, but the retirements were more rapid when the longer mark was reached. The winner was L. Hughes, of Auckland, whose only miss was his twelfth bird. His win carried with it the champion gold medal, a gun presented by the Colonial Ammunition Company, and £42 in cash. The runners-up were: W. R. Donald (Irwell), and F. Preece (Christchurch), who each shot 19 birds out of the 21, and they agreed to divide the second and third money, amounting to £28.

The Napier and East Coast Gun Club held a handicap sparrow shoot on Wednesday, July 28, at Petane, for a handsome trophy presented by Mr. R. H. Hunter-Weston. The trophy has to be won twice before becoming the property of the winner. The shooting was excellent, considering the fleetness and size of the birds. Seventeen shootists took part. The conditions were 10 birds with an accompanying sweepstake. T. Parker, shooting off the scratch mark (22 yds.), killed the lot, only using his second barrel once. E. R. Goulter (18 yds.) was runner-up with nine kills, and F. Lopdill (16 yds.) took third prize with eight kills. In a sweepstake that followed Messrs. Goulter and Bell divided first and second money on the fifth round, and Messrs. Bellamy Ransfield, and Hill divided third money.

The Wanganui Gun Club held a patriotic live bird shoot in aid of the patriotic funds at Putiki, on July 29, and from every viewpoint it was a splendid success.

The conditions of the match were: Five traps, handicap marks, 10 birds. Six trophies were competed for, with a special prize for the best first barrel score. The whole of the birds were pooled and sold at the close of the shoot.

Twenty-two shooters went to the mark and some splendid shooting was witnessed, the birds being a particularly fast lot. That doyen of "sports," Mr. C. H. Chavannes, was referee. Mr. T. H. James worked the dogs in a manner that earned him hearty applause, and the popular president of the club, Mr. W. McA. Duncan, generally supervised the shoot. Everything went without a hitch, the arrangements reflecting credit on all concerned.

The winner was Mr. Charles Hair, who shot all his birds in first-class style, and Messrs. N. Scott, Lynn McKelvie, J. A. Casey, H. J. Duigan, and F. Fantham tied for second, and shot off for the balance of the prizes, while Mr. H. J. Duigan won the special prize for the best first barrel score.

Donations of ducks and rabbits were received from Mr. James McKelvie, and hares from Messrs. Casey and Mills, pigeons from Mr. Edwards, mutton per Mr. R. M. Moore, and these, together with the birds, were then put up and sold in lots. Some remarkable bidding was witnessed. The auctioneer (Mr. H. J. Duigan), from £1 bids, gradually worked the "sports" up to £10 bids, and from that he rose them to £50 bids. The climax was reached when a brace of ducks were put up. The bidding started at £10 and rose with great rapidity until £450 was reached, when a bid of £475 from a well-known Rangitikei sport was immediately silenced by £500 from the club's popular president (Mr. Duncan), and he was declared the buyer amidst the cheers of those present.

Finally a leg of mutton had a remarkable career. It was put up and sold firstly to Mrs. J. Duncan (Durie Hill) for £200, and then to Mr. L. Bayly, £15 15s; Arch. Mason, £21; T. H. James, £5; C. H. Chavannes, £5 5s; C. Georgetti, £4 4s; Dr. Earle, L. Strachan, H. N. Harrison, Allan Robinson, J. R. Foster, each £2 2s; and a host of other bids at £1 1s. Eventually it found safe custody in the auctioneer's own bid at 2½ guineas.

The Springston Gun Club held a £50 sparrow-shooting match at which there were thirty-six competitors, and the stake was divided by F. Watson (20 yds.), F. Frampton (19 yds.), A. H. Kimber (20 yds.), E. R. Goulter (18 yds.), and L. Hughes (23 yds.), who each shot 13 out of a possible 15 birds.

A 10s sweepstake was then fired, thirty men competing. W. J. Moir (18 yds.) and A. H. Kimber (21 yds.) each killed 17 birds and divided the stake.

There was a large gathering of shooting men in Timaru, when the Timaru Gun Club held a £100 live-bird handicap the first day, and on the following day conducted the New Zealand live bird championship. The weather on the first day was ideal for shooting, the birds were fast, and some capital performances were registered. There were forty-four competitors, and the following, with thirteen kills each, divided £85: F. W. Whittle 27 yds., L. P. Hughes 26 yds., R. Graham 25 yds, E. R. Goulter 23 yds., W. A. Parsons 22 yds, and R. J. Fleming 21 yds. Eleven shooters brought down 12 birds each, and in the shoot-off for the remaining £15 the following divided the money after bringing down an additional 7 birds each: A. A. Collins 24 yds., F. W. Wain 22 yds., E. H. Eccles 29 yds., J. Skilling 21 yds., and L. Stackhouse, 23 yds.

A sweepstake match followed, and the following divided the stake of £30: H. Collins, J. C. Webb, J. Fleming, W. Small, L. P. Hughes, E. Henzell, and C. E. Brown.

The New Zealand championship attracted forty-two competitors. The weather conditions were again excellent, and with strong, fast birds the event was very keenly contested. Mr. T. A. Bamber, president of the New Zealand Gun Clubs' Association, and Mr. M. F. Ryan, of Springfield, refereed the championship.

The winner of the championship turned up in G. McIlwick, of Timaru, who scored a popular victory. He has on previous occasions shown good form, and last year at Auckland missed the championship by one bird only. The winner received £68 in cash, the handsome championship gold medal given by the Timaru Gun Club, and a hammerless gun presented by the Colonial Ammunition Company. W. A. Parsons, of Rangiora, who registered only one miss, took second prize of £28. At both matches Mr. T. James, of Wanganui, with his two well-trained setters, rendered invaluable service in retrieving the birds.

In the shoot-off for third place, E. H. Eccles won. A sweepstake of £25 was decided after the championship, and L. P. Hughes, E. H. Eccles, and H. Soulter tied and divided the stake.

High professional and high general averages at the Elks tournament, Cedar Point, Ohio, Aug. 17-18, were won by Mr. W. R. Chamberlain with Peters "steel where steel belongs" shells, score 280 ex 300.

At Round Lake, Minn., Aug. 22, Mr. Dave Flannigan, shooting Peters shells, was high professional, score 154 ex 175.

FISH AND GAME RESOURCES.

With true press agent appreciation of the leading ttraction they have to offer the public, the manage- ient of the five-county district fair which opened at ledding has not played up their vast mineral re- ources, the wealth of the grazing lands, the riches f the timbered hills, which wealth is measured in illions; the attractions offered by farm and orchard, ut instead, has seized upon and featured the game f the northern part of the State, says the Sacra- nento Union. And to further impress the unique ttractions of this region the management will give game dinner on one of the closing days of the fair, o which dinner the general public is invited.

One of the advance notices of the fair, is given ver entirely to the game of the region, which in ariety and numbers surpasses any like area to be ound in the United States.

To quote from this booklet:

Siskiyou, Shasta, Modoc, Lassen and Trinity coun- ies have always been noted as the best deer counties n the State. In 1880 38,000 deer hides were shipped rom Redding. Vigirous enforcement of the law pro- ibiting wholesale killing has stopped this practice and increased the supply. During 1911, 1912 and 1913 4,110 deer were reported as being killed in these counties. It is quite probable that fully twice that number would be a nearer figure. Specimens of mule deer weighing 330 pounds have been killed in these counties.

The Redding lodge, B. P. O. E., and Hon. C. C. McCray were instrumental in having brought in from Jackson's Hole, Wyo., the only herd of elk ever im- ported into this State. They were liberated on Pit river, and reports are to the effect that they are rapidly increasing. In the further protection of these noble animals and of our native deer, the State Fish and Game Commission has paid a bounty on mountain lions for several years. From October, 1907, to May, 1915, a total of 622 lions were killed in the five coun- ties. It is estimated that a lion averages one deer per week the year round. On that basis there have been 33,488 deer saved by the bounty paid on lions.

Nowhere in the world is there a larger trout hatch- ery than the one at Sisson. Its output this season is 19,000,000 trout and 29,000,000 salmon, amounting to 200 carloads. The commercial fisheries of the Sac- ramento river, which has its sources in Shasta, Sis- kiyou, Modoc and Lassen counties, have an output running into the millions of dollars annually. The steelhead and salmon runs of the Trinity are second only to this river.

Luck need not be a part of the hunting equipment in the counties of Modoc, Lassen, Trinity, Siskiyou or Shasta, as all the varieties of wild game peculiar to California are found here in abundance. There are bear, deer, antelope and elk; sage hen, grouse, mountain and valley quail and many varieties of lesser birds too numerous to mention. Also honkers, grey geese, brant, swan, sand hill crane, fourteen va- rieties of ducks, plover, snipe and curlew. Then there are mountain lions and cougars, wolves, coy- otes, foxes, martins and other predatory and fur- bearing animals, almost without number. The moun- tain lakes furnish the breeding grounds for myriads of waterfowl.

The complete harmony that existed between the representatives of the people and the Fish and Game Commission was so apparent at this session of the legislature that it augurs well for the future protec- tion and preservation of one of California's greatest assets.

It was an evidence that the people of this paradise of fish and game had at last broken away from the old pioneer California idea, that fish and game are a gift of God, to be taken by any one at any time, and in such quantities as he desired."

WARNING.

The California Fish and Game Commission will not recognize any receipt for money paid in lieu of any hunting or fishing license. All persons holding such receipts must procure legal licenses or they will be liable to arrest.

Hunting License Act. Section 1. "Every person in the State of California, who hunts, pursues or kills any of the wild birds or animals, excepting predatory birds or animals, without first procuring a license therefore, as provided by this act, is guilty of a mis- demeanor."

Anglers' License Act. Section 1. "Every person over the age of eighteen years who, in the State of California, takes, catches, or kills any game fish for any purpose other than for profit, without first pro- curing a license therefor, as provided in this act, is guilty of a misdemeanor."

Section 431 of the Penal Code provides: "Every person who uses or gives any receipt, except that prescribed by law, as evidence of the payment of any poll tax, road tax, or license of any kind, or who re- ceives payment of such tax or license without deliv- ering the receipt prescribed by law, or who inserts the name of more than one person therein, is guilty of a misdemeanor."

The foregoing is a copy of a notice that the Com- mission's agents are posting throughout the State. The condition which the Commission hopes to rem- edy is of such importance that all publicity possible is requested.

Drink Jackson's Napa Soda.

GOSSIP FOR SPORTSMEN.

Local deer hunters are advised that the open season for bucks, in State game districts Nos. 2 and 3, closed Wednesday, September 15. The territory embraced in the two districts extends from Mendo- cino down to and including all of the Coast counties to San Luis Obispo, as well as the bay counties region and the western parts of the lower Sacramento valley and also the San Joaquin valley. The season in the Sierra mountain ranges will remain open until October 15. Deer hunting in district No. 4 will close October 1.

During October the animals are in prime condition in the mountain country, a fact which is appreciated by experienced deer hunters. Fresno sportsmen are particularly pleased in that respect with the deer laws now in force—a time of the year when a hunt- ing trip is most enjoyable.

Dr. W. O. Ogle, Floyde Spence and Al Christenson left last week for a month's motor run through Las- sen county, thence to the Truckee, via Sierra valley, then on to Lake Tahoe, winding up with Yosemite valley—a trip that will offer trout fishing in many waters, deer and mountain quail hunting as well.

The Mount Hamilton range, in the vicinity of Gil- roy Hot Springs, has proved a fine deer hunting ter- ritory this season. Nine big bucks were brought in to Billy McDonald's the first week of the season, nor did a fair weekly tally cease during the season.

Floyd Judah's seven-day outing at Klamath Hot Springs was in a region where he bagged a fine forked horn buck and shot several mountain quail limits. The quail are very plentiful in that section this season.

Tehama county hunters state that there is appar- ently no diminution in the numbers of deer in that county. Calaveras county hunters are also getting many bucks; does are reported very scarce, which looks bad for next season's crop, and gray squirrels are very plentiful. From Taylorville, in Plumas county, comes the report that doves are very numer- ous and deer hunting is improving.

From Susanville, in Lassen county, advices are that ducks and geese are plentiful at Honey and other lakes of that region—where aquatic fowl breed plen- tifully every year. Mountain quail are numerous near Gazelle, but the dry season has driven the deer to better feeding grounds.

In the higher altitudes of El Dorado and Amador counties—7000 to 8000 feet—deer are scarce, but fairly numerous between 4000 and 6000 feet.

The Los Banos country will be pretty well drained by the time the fall duck shooting season opens, which means the closing out of every gun club but the Raisin City, of Fresno, and the Field and Tule, composed of local sportsmen. A ray of duck shooting sunshine, however, comes in the report that the Lone Willow territory beyond Firebaugh will all be flooded over—as a means of drowning out the Texas tick, which insect has done much damage to stock in that region. The flooding over expedient will draw thou- sands of birds to that section.

A midweek report from Sacramento states that, although fairly warm weather conditions prevailed, doves have begun to scatter. Returning hunters state that in some sections the evening flight is now a thing of the past. In the Coon creek district, near Lincoln, hunters who waited until evening on Labor day were disappointed in the expectation of finding the birds moving. Among the gunners in that sec- tion on Labor Day the individual bags ranged from 9 to 12 birds each.

Along the Cosumnes river, from the region around the Marysville buttes and from points where can- yons in the foothills open out into the Sacramento valley, a few flocks are reported, but nothing in numbers like in past seasons. In Santa Cruz county the birds are reported to be plentiful this year. Mon- terey hunters have also had fairly good sport with doves since the season opened on the 1st inst.

Dove shooting, however, in the vicinity of Oakdale, near Stockton, has given a number of hunters limit sport. Rube Haas, J. T. Connelley, Joseph Cowing and Louis Raisen of this city had that experience only last week—Raisen had forgotten to bring along his hunting license. His companions framed up a practical joke on him by having a supposed rural constable take him in custody for hunting without a license. He finally managed to square the matter with a five-spot—which coin was immediately put to use in an irrigation scheme. Raisen did not know it, however, until the fest was concluded.

GUIDES TO DESERT WATERING PLACES.

There are ten reports covering parts of Washing- ton and Oregon, 13 covering parts of New Mexico and Arizona, and 20 covering parts of California, and oth- ers in preparation. Reports have also been published on small parts of western Utah, and on small parts of Nevada, Idaho, and Montana. Guides to desert watering places have been published for southern California, southern Nevada, western Utah, and cen- tral New Mexico.

The water-supply papers that are still in stock can be obtained by addressing the Director, United States Geological Survey, Washington, D. C. Many of them are now out of stock at the Survey, but most of these can be purchased at cost from the Superintendent of Documents, Government Printing Office, Washington, D. C. A complete list of the publications of the Sur- vey can be obtained by anyone on application.

FISH LINES.

Steelhead trout anglers have recently overlooked a bet. San Gregorio lagoon, down the San Mateo shore, has been well filled with nice-sized steelhead trout. Charles Isaacs, Mo Uuri and other members of the California Anglers' Association have had rare sport during the recent holiday period. Not only that, but up-stream a bit, the creek is alive with crayfish--you pay a good price for these dainty crus- taceans when you order "ecrivisse" in the downtown restaurants. The trick of catching them is an easy one.

The Big and Little Stoney, near Fouts Springs, is well worth a visit now. Arthur Brand, M. Jabey Becker and Milton Frankenburg gave the creeks a three-day trial and picked up daily limits of ten-inch to one and a half pound trout.

Jennie, Fall and Shovel creeks, branches of Klam- ath river, are in prime conditions now for fly rod recreation. Limits of ten to twelve-inch trout can be taken readily. Floyd Judah brought a limit bas- ket down last Tuesday that excited the envy of sev- eral ardent anglers he showed the trout to.

* * *

P. F. Martin, Fred Dassonville and George F. Rob- erts were the prize winners Wednesday evening at the semi-monthly whist party of the California Ang- lers' Association. At a meeting of the Board of Di- rectors twenty-five new members were elected. A large delegation of the club members attended the Walter Pomeroy testimonial September 12 at the Alameda beach.

* * *

Fish planting is being conducted along extensive lines in the streams and lakes of the Sierra Nevada mountains by Deputy Fish and Game Commissioner Andy Ferguson of Fresno. A week ago 26,000 rain- bow trout fry were liberated in the north fork of the San Joaquin river, leading into Bass lake. The cans of troutlets were taken by train to Triant, transferred to motors and then on pack animals—quite an under- taking, but one that will receive the praise of many rodsters. Over 25,000 fry will be planted in Shaver lake, and Huntington lake will also soon receive a big consignment of baby trout.

* * *

Striped bass fishing in San Antone slough has im- proved somewhat recently. A week ago there was a large crowd of jolly anglers at the arks and boat- houses anchored on the creek near the railroad trestle. Almost without exception everybody caught bass, mostly all of small size, from one to two pounds. Arthur Burlingame landed the largest fish taken on the creek Monday, a twelve-pounder.

FIXTURES.

Registered Tournaments — Pacific States and Territories:

September 13, 14—Omaha Gun Club, R. D. Vaught, Secretary-Manager, Omaha, Neb.

September 24—Medford Gun Club, Dr. E. R. Seely, President, Medford, Ore.

September 27—Portland Gun Club, J. A. Addleman, Secretary, Portland, Oregon.

October 4, 5—Roswell Gun Club, E. P. Malone, Secretary, Roswell, New Mexico.

November 2—Williams Gun Club, F. E. Lowe, Secretary, Williams, Ariz.

November 5, 6, 7—Arizona State Tournament, under the auspices of the Tucson Blue Rock Gun Club, W. A. Julian, President, Tucson, Ariz.

Rem-UMC Notes.

W. D. Runnells, of Staunton, won the State cham- pionship at the annual tournament of the Virginia Tray Shooters' Association, by breaking 98 out of a possible 100 birds. He shot the perfect shooting combination of Remington Pump gun and Nitro Club shells throughout the tournament. G. O. Lee took second honors with the tally of 97, while Dr. Rich- ards, last year's champion, scored 94x100 in the classic.

C. L. Waggoner, of Dillon, Neb., won high amateur average at a shoot of the Hooper (Neb.) Gun Club recently, shooting Arrow shells. He scored 145x150.

Forty-five shooters faced the traps of the Antigo (Wis.) Gun Club recently. H. G. McCrossen, shoot- ing Nitro Club shells, won the event with a score of 142x150.

With a Remington pump gun and Arrow shells, J. M. Barrett won a registered shoot at the Gate City Gun Club, of Atlanta, Ga. He scored 191x200, while John Choffer, also shooting a Remington pump gun, came in a close second with 190x200.

Peters Points.

Mr. A. L. Ivins won high amateur average at Bridgeport, Conn., Aug. 14, 145 ex 150, and Mr. L. C. Wilson tied for second, 144, both using Peters shells.

At Stanton, Neb., Aug. 12, Mr. Geo. L. Carter of Lincoln won high professional average, 144 ex 145, using Peters shells.

Messrs. J. E. Dickey, H. C. Hirschy and C. E. Robbins, all using Peters shells at the Eau Claire, Wis., shoot, August 15, gave a demonstration of shooting quality, Mr. Dickey breaking 98 and Messrs. Hirschy and Robbins tied 97 ex 100, winning first and second professional averages.

High professional and high general averages at Toledo, Ohio, Aug. 15, were won by Mr. W. R. Cham- berlain, 196 ex 200, while Mr. C. Brailey was high amateur, 191, and Mr. A. Madison second amateur, 190, all using the "P" brand.

Great Time for Children as Fair Closes

Every boy and girl in the United States is invited by the management of the Panama-Pacific International Exposition at San Francisco to prepare for an event of tremendous interest to boys and girls, which will mark the closing days of the exposition.

This is a competition in children's pets.

From the morning of Wednesday, December 1, to Friday evening of December 3, the pets of a hundred thousand American children will be on exhibition out at the Live Stock section of the exposition.

The pets will be received on Tuesday, November 30, and D. O. Lively, Chief of the Department of Live Stock, to whom all inquiries must be addressed, has promised that each of the pets—and it matters not whether it be a bird, fish, quadruped or reptile—will receive the best attention and not a single penny will be charged for this.

In order that your pet may be entered at the world's greatest exposition, please write as follows today to:

Mr. D. O. Lively,
Chief, Department of Live Stock,
Panama-Pacific International Exposition,
San Francisco, California.

Dear Sir:

Please send me today full particulars as offered about the children's pet stock show at the Panama-Pacific International Exposition, December 1-3. Please enclose entry blanks so that I may enter my pet.

Name.....
Street.....
City.....
State.....

When the three days affair has been concluded, there will be prizes galore—and then hundreds of proud little boys and girls will have in their possession the ribbon of prize winners, bestowed upon their precious pet.

However, before we talk about the prizes, it would be well perhaps to begin at the beginning and let the boys and girls of America know all about it. Now, children, read this carefully and then get ready to make entries.

As you know, all the exhibits at the exposition are competitive. Prizes of awards are bestowed for the most successful exhibits and most of the exhibitors come to the exposition in the hope of receiving the highest awards.

So after some discussion it was decided that the exposition must not be allowed to terminate without imprinting a lesson upon the children that would endure.

This lesson could best be based upon the universal nature existing in every child as depicted in his or her love for certain living things.

Therefore it was determined that the children would be requested to bring their precious pets to the exposition. Competent grown-ups would then make careful comparison and decide which of the pets are entitled to wear the blue or other color of ribbon or receive other tokens of honor.

Nothing is more interesting to the juvenile mind than the study of natural history. Animal and bird pets with ownership develop all that is best in a child—the father of men. Captain Scott, the hero of the ill-fated South Pole Expedition, recognized this, for upon his dead body was found a letter to Barrie the dramatist, referring to the explorer's son, saying: "Make the boy interested in natural history if you can, for it is better than games."

The keeping and study of pets teaches natural history.

December 2nd and 3rd will be "pets" day for the children and every school in San Francisco and the bay cities will be closed in order to give every child an opportunity to be at the exposition.

The mothers of the children immediately became interested, and the result was the Woman's Board of the exposition fostered the Pets Exhibition and decided to make the affair the great event of the exposition.

But how many children will be represented?

We cannot tell. It is impossible even to conjecture, but we are certain the exhibit will be a big one.

Children, you will find that there is no limit.

Suppose you have the best canary bird—or you believe it is the best in the world. Why, write for an entry blank and just enter it and at the right time—November 15—see that it is sent or brought in by November 30th or December 1st, and your dear little songster may become the proud recipient of a blue ribbon.

It is possible that you have a mule bird. If so, send it along. In fact you may enter any kind of a bird and you will have a splendid opportunity of becoming a prize winner.

And rabbits! Well, if you have a nice rabbit, be sure and enter it. There may be others, but yours may be the one that will attract the right sort of attention from the committee on award.

Again, there are many of you children who are fond of mice—the nice white ones and also another kind—and these are also to be considered. The same may be said of Guinea pigs, ducks, pheasants, geese, chickens and pigeons.

The tortoise is said to be a slow animal. Now you never can tell. It is quite possible that the old tortoise pet may be the one who will speed the judgment of the committee into giving it a prize. The same may be said of the frog or the lizard. At any rate here is the classification as prepared by the officials:

Canary, mule bird, small foreign bird, parrakeet, lory, hanging parrot, macaw, cockatoo, guinea-pig, common rabbit, squirrel, chipmunk, goldfish, chickens, pheasants, ducks, geese and pigeons.

As you read the above list you will note that there will be a wide variety to the number of pets that may be exhibited. At first, it was decided to bar Mr. Snake. Upon investigation it was learned that scores of children residing in the southern states, and especially in the rural mountain districts, were the owners of pet snakes.

"Then by all means let us include snakes," decided the chairman of the committee. "I used to have a pet snake myself, when I was a kiddie. It was of the common garden variety and we had many good times together, but Mr. Snake and I parted company one day following an exciting episode in a little country school."

To the parents we would say, "Take the bridle off your imagination—give it full play,—you will then grasp the significance of the movement that is represented in the children's pets exhibition at the exposition.

There is much to be done in order to make this exhibition as successful as we desire, and the added sympathy of every adult is necessary if our expectations are to be realized.

No commercial exploitation is mixed in this plan. Every man and every woman who loves children and who understands them will sympathize with the purpose of this exhibition.

There is need for some work for the public schools, but this will not interfere with the studies of the children or the duties of the teachers.

Then there is the great pleasure that will be accorded the children whose pets prove the winner of the official ribbon and special prizes of award to be given by the exposition officials and friends of the movement.

If you are interested as a child participant, or in the role of friend, guardian or parent of a child who possesses a pet that comes under requirements of this exhibition, write a letter to Mr. D. O. Lively, Chief of the Live Stock Division, Panama-Pacific International Exposition, San Francisco.

Mr. Lively will respond by furnishing complete details and data of the event which promises to constitute one of the most remarkable features of the exposition.

PERTINENT COMMENT FROM THE HORSE WORLD.

New York as a Grand Circuit Town.

It will be interesting to note the impressions of a New York writer, one familiar with the conditions surrounding harness racing sentiment in the metropolis, in what he has to say about the Grand Circuit meeting held at Empire City track last week and its bearing on the future of the sport in the city which furnishes the greatest market for fast trotters. Here is how the meeting and what it portends for the future was reviewed at its conclusion, by Gurney A. Grue, the man who writes the harness racing news for the New York Herald:

"Opening with an attendance exceeding all expectations, the Grand Circuit meeting just ended at Empire City Park demonstrated once more that under reasonably favorable conditions high-class harness racing can be counted on to draw as well in New York as in any other city of the United States. Estimates of the attendance on Tuesday ran as high as five thousand, and this in the face of all the false reports published in New York and sent out over the country, right on the eve of the meeting, saying it would be stopped by injunction if the promoters did not abandon it after owners of horses had been warned to keep away from the track on account of the danger of glanders and other contagious diseases alleged to be rampant there. So persistently were these stories circulated that well informed horsemen were kept in doubt right up to the day of the races, and it is quite certain that large numbers of persons not so well posted remained at home rather than risk a fruitless trip to the Yonkers track on Tuesday.

"The character of the crowd was in itself ample proof of the strong hold which harness racing still has in the city where it originated. In no other city could such an assemblage of prominent breeders, owners and admirers of the trotting horse be drawn together by the pure love of the sport, without a chance to bet a dollar in auction pools, pari-mutuels or books. Given a liberal law like that of Kentucky, or a dead letter law like the one which permits poolselling, bookmaking and pari-mutuels on the Grand Circuit races at Cleveland and Columbus, those successful meetings, as well as the one at Lexington, might be rivaled if not excelled by one right here in New York. But without either form of public betting it would be comparatively easy to attract paying crowds if high class racing could be presented on a fast track.

"A slow track almost ruined last week's meeting just as a lack of sufficient races to make a good programme injured the Grand Circuit meeting five years ago. In each case there was a big crowd on the opening day, 7,000 having been the estimated attendance in 1910, but disappointing races cut it down materially as the meetings progressed. People do not care to see horses like Lee Axworthy, that have shown their ability to trot in 2:03, floundering about and getting beaten in 2:10, because of poor footing. Extreme speed is of the essence of high class harness racing, and without it there is no use in expecting people to attend a meeting in New York That the once fast Empire track will never do for another Grand Circuit meeting until it has been resoiled was the opinion of nearly all horsemen who examined the sandy, cuppy turns and stretches last week. That it might have been much improved by scraping an inch or two off the surface at the pole, where the sand had washed down from the high ground, was the opinion of a good many experts, but what is needed is half a foot or more of fresh loam. The track has never been resoiled since it was built more than 50 years ago."

Judging from the above, there are enough harness racing enthusiasts in the metropolis to give support to a Grand Circuit meeting there under favorable conditions to keep the city in the chain of big race meetings. It is to be hoped that the favorable conditions will be forthcoming, for it means much to harness racing interests to have New York in the big line.

How the War Has Affected the Horse, Saddlery and Feed Interests in This Country.

One has only to read the recent report of the Bureau of Foreign and Domestic Commerce which show that exports of American horses and mules since the breaking out of the war in Europe have reached the enormous total of 400,000 head, worth approximately $88,000,000, to see the effects of the bloody struggle on the horse interests of this country. Shipments of horses for the 11 months ending June 30, were 288,413 head, worth, in round numbers, $64,000,000. In the last two months they have been going over at the rate of 40,000 a month, which would make the present total upward of 328,000 head, worth about $72,000,000. This count does not include the thousands of mules which have gone over and which both the French and the British are buying in ever increasing numbers, as their superiority over horses for the severe ordeal of the army transport service is demonstrated in the field. Up to July 1, the number of mules exported since the war began was 65,544, and their value was officially estimated at $12,700,000. The present totals are upward of 80,000 head, worth approximately $16,500,000. Exports of harness and saddles are running into huge figures since the war began. For the 11 months ended July 1, the value of such equipment sent to Europe was $17,460,000. This is at a rate of $1,600,000 a month, so that the present total is doubtless well above $20,000,000. Wagons and carriages make up another substantial item, 9,056 horse drawn vehicles, valued at $1,190,939, having been exported between August 1, 1914, and July 1, 1915. Assuming that shipments continued at the same rate in July and August, the totals are now about 12,000 vehicles, worth more than $1,500,000. More than 30,000,000 horseshoes, valued at more than $2,500,000, have been purchased here to equip the millions of horses in the armies of the Allies. The totals for the first 11 months of the war were 29,157,243 shoes, worth $2,01,258.

Mountains of baled hay and the shiploads of oats are going over each month to feed the equine armies of the Allies, the expenditures of France, England and Italy for American horses, equipment and provender having reached truly enormous figures during the first year of the war. That these countries are feeding American oats and hay to practically all the horses they are using in the war is indicated by the sensational jump in exports since the great war machines went into action. The greatest single advance in grain exports has been made by oats, according to the government records. The records show that in the year ended June 30, 1914, the value of oats exported was $757,527, while in the 12 months ending June 30, 1915, the total reached $57,479,964. Shipments during June alone were worth eight times as much as the entire exports of the year before the war. Their value is officially estimated at $5,769,068. Exports of hay amounted to 84,653 tons in the 12 months ending June 30, 1915. For this the foreign governments paid $1,980,297, according to the official records. The total is now well above 100,000 tons, worth upward of $2,000,000. All these figures and their bearing on the horse breeding interests of this country have but one meaning, and that is that never before have the farmers and horse breeders of this country had a greater opportunity to make this branch of breeding pay as well as it will pay during the next decade.

Mr. M. E. Pye, the judge of the West Australian Trotting Association, has returned to Melbourne after a six months' holiday in America. Mr. Pye spent a good deal of time at the Panama Exposition and witnessed the big trotting events held there. During his stay, which was a highly enjoyable one, he had the pleasure of meeting a number of relatives, 26 of whom sat down to dinner with him one evening before he left. Mr. Pye holds that the government of race meetings in Australia is quite as efficient as that of the States.—Australian Trotting Record.

THE FARM

MARKETING METHODS.

The present abundance of fresh vegetables and fruits brings with it the perennial necessity for their rapid, economical distribution and for encouraging a generous and steady consumption. The machinery for moving these food products is complex, and retail dealers are often accused of not following closely the wholesale market quotations; that in times of glutted markets they do not cut prices severely and aid in a rapid movement from producer to consumer. But the responsibility for slow and uneconomic movement into consumptive channels is difficult to trace. The large class of food distributors known as "middlemen" are often accused of levying, arbitrarily, a heavy tribute on all foodstuffs passing from the producer to the consumer. The attention of the public has been frequently directed to increased costs of products rather than service rendered. The new department bulletin, No. 267, Methods of Wholesale Distribution of Fruits and Vegetables on Large Markets, does not indict the "middlemen" as a class, although it points out some of the abuses of the trade. As a matter of fact, say the department's specialists, when discussing the present marketing organization, economic laws would not permit the long-continued existence of a marketing agency which was solely a parasite.

Several important factors have contributed to the establishment of many middlemen as necessary agents in the present system of marketing. Production during the last decade has increased greatly, and improved methods and facilities for handling the increase have been introduced. Keeping pace with increased production has come the demand of consumers for more elaborate and efficient service. Seldom is the fact considered that service can become a very expensive luxury. With the widening of the distance between the city and the sources of its fruit and vegetable supplies there has risen the necessity for special agencies to meet the changed conditions.

The present distributive machinery, with all its strong points and its weaknesses, has been created of necessity, and it has weathered the storm of much adverse criticism. Every part of the country is now enjoying the perishable products of the most remote districts. Any readjustment of present market practices must be based upon the fact that some agency must continue to perform the functions of the present-day middleman.

The problems involved in handling goods through a large market differ greatly from those of production. Usually one man or one firm can not handle both production and distribution and succeed at both. The vast volume of business transacted at large market centers makes necessary some special agencies which can devote all their energies to distribution. Especially does the machinery for efficient marketing become necessary when perishable goods are to be handled. Commodities of this sort must be moved rapidly, must be distributed evenly, and from their very nature permit of no weakness in a distributive machinery, if they are to be sold at a profit.

With the perishable nature of a large part of the fruits and vegetables marketed there must be some loss. This often totals higher than the farmer realizes. For instance, according to the department's market specialists, the loss on such commodities as strawberries, peaches, and grapes cometimes amounts to 30 or 40 per cent before they reach the hands of the retail trade. Losses due to spoiling may be the result of the shipper's sending over-ripe or diseased fruit, or failing to give proper attention to packing, to loading, or to bracing the packages in the car. Sometimes the railroad is at fault. Delay in transit, improper ventilation or refrigeration, or unnecessarily rough handling of cars may contribute to rapid deterioration of the shipment on arrival.

The lack of proper refrigeration facilities at distributing centers is a cause of much loss. When produce moves slowly there is often much spoilage before complete sales can be made. Rough handling during unloading or carting is another important cause of loss. As a matter of fact, the opportunities for losses due to the spoiling of commodities are so manifold that it is impossible to enter into a complete discussion of them.

It is always well to bear in mind the really serious side of losses and of wastes. The spoiling of a dozen canteloupes, a basket of grapes, or a crate of strawberries represents an absolute loss to the community. No benefit accrues to producer, distributor, or consumer from such a condition. The loss occurring at this point must be borne by both producer and consumer, and in a great many cases the distributor must bear his part of the burden. The department's specialists think in many cases losses and wastes are entirely too heavy a tax on food distribution, and that the elimination of unnecessary wastes would do as much toward effecting permanent, substantial economies in marketing and distributing as any readjustment of present marketing methods could do. The fact that a large percentage of these losses can be avoided by proper grading, and shipping, together with more prompt, efficient handling while the goods are in process of distribution, makes it imperative that this subject be given special consideration by those interested in the efficient marketing of farm crops.

A better understanding by the farmer of the complex marketing machinery would enable him to intelligently choose between the many channels through which his fruits and vegetables might be marketed. The new bulletin aims to make clear to the layman the rather intricate machinery of the market and deals with methods of receiving, inspection, rejections, terminal distribution, and sales methods, the broker, auction sales, carlot wholesalers, commission merchants, jobbing sales, public markets, etc. This bulletin may be had free upon application by those interested.

CONCRETE ROADS.

The mileage of concrete pavements in the United States has increased rapidly, and it is likely to continue to increase, according to a new bulletin of the department. This bulletin gives the estimated amount of concrete pavement in the United States in 1914 as 19,200,000 square yards; in 1909 it was only 364,000 square yards.

The principal advantages of concrete pavements which have led to this increase in popularity are said to be:

(1) Durability under ordinary traffic conditions.

(2) A smooth, even surface, offering little resistance.

(3) Absence of dust and ease with which it may be cleaned.

(4) Comparatively small cost of maintenance until renewals are necessary.

(5) Availability as a base for another type of surface if desirable.

(5) Attractive appearance.

In commenting upon these advantages the bulletin states that the durability of concrete roads has not yet been proved by actual practice, because there are no very old pavements as yet in existence, but from the condition of those which have undergone several years' service it seems probable that they will be found to wear well.

The disadvantages of concrete as a road surface are:

(1) Its noise under horse traffic.

(2) The wearing of the necessary joints in the pavement, and the tendency to crack, with its consequent rapid deterioration.

(3) The difficulty of repairs when these become necessary.

In the past efforts have frequently been made to overcome these objections to a certain degree by covering the concrete pavement with a bituminous wearing surface. At the present time, the specialists in the department hold that this can not be economically justified, although it is possible that future investigation may change the situation in this respect. In the present state of road science, however, it seems that where traffic conditions are such that a bituminous surface on a concrete road is practicable a bituminous-surface macadam road would be equally practicable and certainly cheaper. Where traffic is too heavy for macadam road the bituminous surface is likely to give way and the uneven manner in which it fails tends to produce excessive wear on portions of the concrete.

For a successful concrete road, hardness, toughness, and uniformity are the most essential qualities. These can be secured to a great extent by care in the selection of the constituent materials and the proportions in which they are mixed. Sample specifications are included in the bulletin, No. 249, Portland Cement Concrete Pavements for Country Roads. These specifications are believed to typify the best engineering practice as it has been developed up to this time. They cover such points as materials, grading, subgrade, and construction.

The cement, it is said, should always conform to some standard specifications for Portland cement, such as those issued by the United States Bureau of Standards or the American Society for Testing Materials. The sand should not contain more than 3 per cent of foreign material, and sand with more coarse than fine grains is to be preferred. The coarse aggregate may consist of either crushed stone or gravel. In either case it is very desirable that the coarse aggregate be well graded in size between proper limits.

The proportion of cement to the sand and coarse aggregate combined should not be less than about 1 to 5, and the proportion of sand to coarse aggregate not less than 1½ to 3, nor greater than 2 to 3. A usual formula when gravel is used as coarse aggregate is 1 part of cement to 1½ parts of sand to 3 parts of gravel. When crushed stone is used, 1¾ parts of sand may be substituted in place of 1½ parts.

In addition to discussing the engineering details of construction, the bulletin already mentioned calls attention to the fact that ordinarily from one-third to one-half of the total cost of constructing a concrete pavement is for labor after the materials are delivered. This emphasizes the importance of efficient organization and of proper equipment. Failure to take these factors into consideration frequently results, it is said, in adding from 10 to 20 per cent to the cost of a concrete pavement.

and pigs farrowed April 21, at the Department of Live Stock.

LITTER MATES.

A southern sow had eight pigs and could only nourish seven of them at a time. Rather than let the odd pig starve, it was given to a little girl, who raised it by hand. She joined the Decatur County Pig Club as a ham and bacon member, and kept close record of the feed given and weights of her pig, which was not a pure bred.

When the pig was 10 months old, it was killed according to the instructions sent her. It weighed 225 pounds net when dressed as meat and yielded also a 50-pound can of lard. The pig cost less than 5 bushels of corn to produce, as it was raised on kitchen waste in addition to the corn.

The other seven pigs raised by the mother and left to rustle with her were killed at the same time and averaged only 87 pounds net when dressed as meat.

The instance shows how liberally the pig will repay proper care and feed by gaining rapidly in weight.

3. 2:09 Trot	1,000	8. 2:07 Pace	1,000
4. 2:07 Trot	1,000	9. 2:04 Pace	1,000
5. F. F. A. Trot	1,000	10. F. F. A. Pace	1,000

CONDITIONS

1. Enter any time. Records after entry no bar. Ten to enter, four to start. or race may be called off.
   Entries close October 1st, 1915.
2. Three per cent to enter. Seven per cent from first money winners; 6% from second; 5% from third; 4% from fourth. Payments $15, at time of entry and $15 November 15th, 1915. No entry accepted until first payment is made.
3. One horse may enter in two classes and be held for but one entry fee unless two starts are made. Two horses may enter one class and be held for the entry of the horse that starts.
4. Three Heats. Combination Plan. Heat purses $300. Money divided at the end of each heat, 50, 25, 15 and 10%. Total purse $1,000. The extra $100 goes to the horse standing best in the summary at the end of the race. A horse winning the first two heats and being distanced or drawn in the third heat shall retain its place in the summary.
5. A horse distancing the field or any part thereof will be entitled to one money only. A distanced horse in any heat will be entitled to the money already won. There will be no more moneys than there are starters.
6. In determining the eligibility of horses to compete, only records made by winners of races shall be considered. Rules of the American Trotting Association shall govern all races.
7. Both the American Trotting Association and the National Trotting Association, in which we have membership, have ruled that under the above conditions only the horse that stands best in the final summary will "obtain a record," the other heat winners acquiring "a breeder's record" only.
8. Rights reserved to declare off any race that does not fill satisfactorily or change program if necessary. In case class in which horse is entered does not fill, entry will be transferred to another class in which horse is eligible, subject to the approval of the owner. Any race not finished on last day of the meeting may be declared ended and the money divided according to the summary.
9. Free stall rent given during the meet and first bedding is provided free of charge as a courtesy to our horsemen guests.
10. No place in the U. S. equals the Arizona State Fair Grounds as a winter training place. SUNSHINE EVERY DAY. No fog. No rainy season. Green feed. A-1 Stables, the best of tracks. Horsemen expecting to race at the fall meeting of the P.-P. I. E. at San Francisco cannot afford to overlook Phoenix on their way east.

GUNCRAFT

By W. A Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

MODERN BREAKING

By W. A. BRUETTE

A revised edition of the latest Treatise on the Training of Setters and Pointers.

THIS book enables anyone to do his own training and fully explains the methods employed by the most successful trainers in developing the setter and pointer. The important lessons are illustrated by photographs from life; nothing is left to guesswork. The entire subject is covered, from the selection, raising and development of puppies to the conditioning of dogs and their handling in the field. The amateur is told, in lucid language, how to make a dog a high-headed, stylish worker, stanch on his points, steady to shot and wing, and a prompt, tender retriever; all of this is accomplished by simple methods, some of them never before given to the public. The instructions for correcting the faults of bird dogs and keeping them up to their training are concise and easily understood. Every man who owns a bird dog or shoots in the field should read this book.

1915 WINRACE

—and—

ELIGIBILITY BOOK

The National Trotting Association Winrace and Eligibility Book for 1915 is now ready for delivery. It is a work of 858 pages, bound in cloth and contains official reports of all races and time record meetings held by members of the National and American Trotting Associations as well as copies of all special reports received by the two Associations, and all reports of non-association meetings which appeared in the columns of the turf and daily papers in 1914 as well as an index giving the starts made by each horse. In addition to this, it also contains an Eligibility List which presents the names of all live horses that acquired records or winraces in 1912, 1913 and 1914. When a winrace was made over a mile track it is designated by the letter (m) and if a horse also has a winrace over a half mile track within the four seconds limit fixed by the rule, it is also given and marked (½m).

Last year after the new eligibility rule was adopted, the National Trotting Association issued a Winrace and Eligibility Book, which covered 1912 and 1913. It assisted materially in the application of the new rule, but members and horse owners were frequently in doubt as to whether a horse was entitled to a time allowance. This resulted in a very voluminous correspondence and in order to obviate it in 1915, the present book has been compiled and issued as approved by the President under an order of the Board of Review.

In the matter of time allowance, a horse with a winrace is allowed one second for each year, if raced, in which he fails to equal or reduce his record or win a race, providing same is claimed by the nominator when making the entry. If a horse was not raced in 1914, he is not entitled to a time allowance and a reference to the index in this book will show whether he was raced or not, while by referring to the summaries, it can be determined whether he equaled or reduced his record or won a race. Also in order to give all the information possible, the reports of meetings contain all races at half mile heats as well as at mile.

This book presents reports of 1,400 meetings at which 12,673 horses started in 8,730 races and 939 performances against time, for which the premiums amounted to $3,228,617.82, while the Eligibility List presents the names of over 14,000 horses.

The 1915 Winrace and Eligibility Book will be sent postage prepaid to any address for $2.00 by

Third Edition Within One Year of Publication.

CARE AND TRAINING OF TROTTERS AND PACERS

NEVER before in the history of the publishing world has a horse book gone into a third edition within one year of publication. Yet the explanation is simple—the book fills a long-felt want. Never before has this subject been treated in a distinct manner. It has been handled in connection with autobiographies of trainers, but such works are out of print or out of date, for they were published 20 years or more ago. Conditions and methods have changed since then, and former treatises are just as much out of date as the high-wheel sulkies then in vogue.

"Care and Training of Trotters and Pacers" is as modern as a 42-centimeter gun. It does not contain the ideas of one man, but of 100 of the leading horsemen of the day, including Thomas W. Murphy, Walter R. Cox, and Edward F. Geers. These ideas were converted into book form by two prominent American turf journalists.

This book enables anyone to do his own caretaking and training until it is time to send the colt to a professional trainer, or the owner can train and race the colt himself. The treatise covers the details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented. Nothing is left to guess work. The language is lucid. Both theoretical and practical views are outlined and compared. The instructions are concise and easily understood. The work contains no advertisements—it is not a catch-penny publication that looks big in the advertisement but proves disappointing when received.

Many professional trainers have purchased the book and have found it interesting. Despite the war, over 300 copies have been sold in Europe and Australia.

Price $1.00 postpaid. Cloth, illustrated, 176 pages, 5x7 inches,

WINCHESTER

SELF-LOADING RIFLE, .401 CALIBER

IT GIVES A STREAM OF SMASHING BLOWS

No need to fear the most powerful or most dangerous animal, if equipped with the .401 Winchester. It can deliver five smashing, one-ton blows in a few seconds, with aim. This rifle is a self-loader, and it is only necessary to pull the trigger for each shot. It shoots cartridges small in size but powerful in execution loaded with either 200-grain or 250-grain bullets. It beats any other rifle of this type for power and is the most effective hunting rifle made. Your first hunt will prove every word we say.

THE GRAND PRIX—The highest honor—was awarded to Winchester Guns and Ammunition at the Panama-Pacific International Exposition.

REMINGTON UMC

MODERN

The Superior Jury at San Francisco delved deeply into firearms and ammunition history, statistics and both trade and consumer conditions before using that word MODERN in connection with this award. There are many reasons why—here are a few:

BECAUSE:

1. The first hammerless solid breech repeating shotgun.
2. The first hammerless solid breech autoloading shotgun.
3. The first successful high power slide action repeating rifle.
4. The first lock-breech autoloading rifle.
5. The first paper shot shell and first metallic cartridges successfully manufactured in the United States.

THE REMINGTON-UMC FACTORIES PRODUCED

6. The first perfected steel lined shot shell.
7. The first primer adapted to smokeless powder.
8. The first battery cup for quality paper shot shells.
9. The first cartridges for automatic pistols.
10. The first standard high power smokeless cartridges for big game autoloading rifles.

TEN MODERNIZED REMINGTON-UMC OFFERINGS THAT SPORTSMEN THE WORLD OVER ENJOY TODAY.

THOROUGHBRED MEETING COMES TO CLOSE

With a card of eight races as a compliment to its regular attendants and its numerous lady guests, the Golden Gate Thoroughbred Breeders' Association brought its initial meeting to a close last Saturday afternoon, the sun being well on its way beneath the Presidio hills before the numbers were run up that proclaimed the winners of the last race. The crowd on hand to witness the "obsequies" was of record proportions and few there were among the spectators who relinquished their places in the grand stand until everything was over.

The weather, the attendance and the character of the day's sport were all fitting tribute to the gentlemen who are devoting their energies to the revival of thoroughbred breeding and racing here in California, and no day of the entire twenty-five was more thoroughly enjoyable. "Getaway day" as exemplified in the past has been described by Charley Van Loan as a day when the general spirit displayed by owners, jocks, hustlers, touts, bookies, et al., is on the order of "shoot 'em in the back and run," but Saturday wasn't one of those kind. The racing was sharp, well contested and "formful," the winners having been duly licensed for their positions by recent past performances.

The inaugural meeting of the new association has been very much more of a success than was anticipated in many quarters, and proved plainly that Californians are eager to fall in line with other sections of the country where racing is brought back on a new basis. Many predictions were made that the meeting would never run a fortnight, but the full twenty-five days were raced out unmarred save by annoying incidents of a minor nature. Many of the horses present possessed only fair qualifications and ivory could be extracted painlessly and successfully from the skulls of a number of the boys in the silk, but for a "catch as catch can" meeting it met with wonderful success and popularity. There were any number of excellent contests, the words "won driving" appearing much oftener in the charts than did the words "won easily," and there were a certain number of horses and riders present whom it was a genuine pleasure to observe.

The reception accorded the thoroughbred after his long banishment leaves no room for doubt as to the hold he has upon the affections of a very large percentage of the people of the coast country, and thanks are due to the members of the new association to whose love for the horse the enterprise owed its inception and by whose enthusiasm and activities it was carried to a successful culmination. Most especially is the debt owed to President C. W. Clark and Secretary J. J. Nealon, who shouldered the main burdens of financial responsibility and hard labor, assisted though they were by other able gentlemen whose names are too numerous for mention here. While certain positions had to be filled by salaried officials, the members of the association who served in any capacity made that service a "labor of love," as no member received remuneration from the association save in a case or so where traveling expenses incurred on business trips were refunded. The purpose for which the organization was effected is to re-establish thoroughbred racing and thus revive thoroughbred breeding, and they feel that their time and labors will be amply rewarded in years to come if their present endeavors prove to have been the means of starting the general movement that shall bring these things about.

While the meeting closed on Saturday and the horses and horsemen immediately wended their way to other points, the final curtain was not lowered until Wednesday, when the finishing touches were effected at a luncheon at the St. Francis at which Chas. W. Clark, "supported" by J. J. Nealon, J. Cheever Cowdin and Captain W. H. McKittrick, was host on behalf of the G. G. T. B. A. to a goodly gathering of newspaper men of this city and Oakland. The press and the association have been in harmony throughout all proceedings, not only before but during and after the meeting, and the luncheon was not only a testimonial to this pleasant relationship, but afforded an excellent opportunity for the outlining of the course to be pursued in the future. The association's aim is simple and straightforward—the re-establishment of the thoroughbred through the enactment of legislation creating racing under the control of a state commission, with legalized speculative investment through the medium of the pari-mutuel machine. This is the system that is a welcome success in other enlightened communities of the country, and in their efforts to bring about this end the gentlemen composing the Golden Gate Thoroughbred Breeders' Association are deserving of public support from every quarter.

The racing of the closing days of the meeting just passed resulted as follows:

Twenty-third Day—Thursday, September 16.

First race—Five and a half furlongs, selling, purse $250: DeBolt & Eagleston's b g Light Knight (aged) by Free Knight—Elite III., 109 lbs., (Kirschbaum) won handily; Dr. Neufer (6), 108, second; Mandadero (6), 108, third; John Spohn, Kitty Stanfield, Lady James, Ida and Mi Alma also ran. Time, 1:08 1-5.

Second race—Five and a half furlongs, selling, purse $250: C. E. Fountain's b g Roscas (4) by Castine—Rose of May, 108 lbs., (Washer) won handily; Teeto (5), 108, second; Charity Ward (3), 99, third; Sweetdale, Aunt Elsie, Loan Shark, Rooster, Orba Smile, Camia, La Cazadora and Ed Fitzgerald also ran. Time, 1:08 1-5.

Third race—Five furlongs. Panama-Pacific Exposition Handicap, two-year-olds, purse $470: El Palomar Stable's ch f Rose Marian by General Roberts—Rose Cherry, 118 lbs., (Washer) won easily; Carl Roberts, 115, second; Ed Cudihee, 116, third. Time, 1:01 4-5.

Fourth race—Five and a half furlongs, McKittrick Handicap, purse $300: Daniels & Hodges' ch g Loftus (5) by Dick Welles—Edna Shannon, 111 lbs., (Palms) won driving; Seneca (aged), 113, second; Scarlet Oaks (4), 118, third; Joe Hooker, Kootenay, Eureka, Orange Blossoms and Pajaroita II. also ran. Time, 1:06 4-5.

Fifth race—One mile, selling, purse $250: Texas Stable's ch g Augustus Heinze (4) by Caesarion—Sweet Eileen, 108 lbs., (Washer) won easily; Helen Hawkins (aged), 108, second; Canapa (aged), 108, third; Southern Gold, Acumen, Mary Emily, Rey, Quick, McAlan and Eastman also ran. Time, 1:41 4-5.

Sixth race—Five furlongs, selling, two-year-olds, purse $250: J. Randolph's br f Laughing Water by Rapid Water—Litholin, 104 lbs., (Nolan) won driving; Toastmaster, 109, second; Frank Patterson, 105, third; Bas Blancs, Brooks and Lola also ran. Time, 1:02 2-5.

Twenty-fourth Day—Friday, September 17.

First race—Five and a half furlongs, selling, purse $250: J. H. Walker's b g Lofty Heywood (aged) by Heywood—Febette, 108 lbs., (Palms) won driving; Teeto (5), 108, second; Barbarita (3), 104, third; Arrowshaft, Rag, Chas. Goetz, Kitty Stanfield, Miss Genevieve, B. C. Winston, Sonoma and Make Good also ran. Time, 1:07 4-5.

Second race—Five furlongs, maiden two-year-olds, purse $250: J. Pelter's b f She'll Do by Waldo—Rose Pompon, 109 lbs., (Kirschbaum) won easily; Robert Lee, 112, second; Ojita, 109, third; Von Lady, Cuyama, Leah Cochran and Asama also ran. Time, 1:02.

Third race—Three furlongs, polo ponies, ridden by officers of the Army, Navy or Marine Corps, cup to winner: Canela (Capt. Lee) won easily; Dago Mike (Lt. Sands) second; Joker II. (Capt. McNally) third; Happy Hooligan II. also ran. Time, not taken.

Fourth race—One mile, selling, purse $300: W. C. Weant's b g Brando (6) by Orlando—Alice Brand, 111 lbs., (Taylor) won driving; Zoroaster (aged), 107, second; Lady Young (6), 106, third; Christmas Eve, Transparent, Electrowan and Vireo also ran. Time, 1:41.

Fifth race—One mile, selling, purse $250: A. Neal's b m Far Cathay (5) byBox—Two Lick, 108 lbs., (Nolan) won handily; Bredwell (6), 108, second; Fred T. (3), 99, third; Fort Johnson, Hannis, John Louis, Rhodes, Rey Shannon II., Emelda, Effie May and Lone Star also ran. Time, 1:42 2-5.

Sixth race—Five and a half furlongs, selling, purse $250: Davies & Sieman's bl h Custom House (4) by Joe Carey—Ellen Atkin, 110 lbs., (Washer) won driving; Jake Argent (aged), 108, second; Darkey (5), 108, third; Briton, Azurea, Carondelet, Smoky Dan, The Feller, Faustina, Tordillo, Frances G. and Angelus also ran. Time, 1:07 2-5.

Seventh race—One mile, selling, purse $250: A. Dunlap's b c Stolen Ante (3) by Dorante—Stolen Moments, 104 lbs., (O'Mahoney) won easily; Commendation (aged), 108, second; Fairly (4), 108, third; Tom Chapman, Hardy, Superl, Henry Walbank, Ceos and Choctaw also ran. Time, 1:41 4-5.

Twenty-fifth Day—Saturday, September 18.

First race—Five and a half furlongs, selling, purse $250: W. A. Watkin's bl m Arrowshaft (aged) by Ogden—Quiver, 108 lbs., (Gross) won driving; Van Horn (6), 108, second; Mandadero (6), 108, third; John Spohn, Igloo, Camia, Ida Pinack, Doc Stanley and Make Good also ran. Time, 1:08 2-5.

Second race—Five and a half furlongs, selling, purse $250: Mrs. M. V. Parker's b g Charity Ward (3) by Luck and Charity—Ollie Ward, 99 lbs., (Brazal) won driving; Dr. Neufer (6), 108, second; Miss Genevieve (6), 110, third; Finnigan, La Cazadora, Norford Rose, Lady James, Joe Busher, Rooster and Ed Fitzgerald also ran. Time, 1:08 2-5.

Third race—One mile and a sixteenth, selling, purse $250: Cooney & Co.'s b g Tom Chapman (5) by Conjuror—Lucky Star II., 108 lbs., (Guy) won easily; Ceos (4), 113, second; Henry Walbank (aged), third; Renwar, Superl, Nannie McDee and John Louis also ran. Time, 1:49.

Fourth race—Army horses, ridden by officers of the Army, Navy or Marine Corps, six furlongs, cup to winner: Satisfax (Lt. Sands) won easily; Kindness II (Lt. Stevenson) second; Chesspeak (Lt. Watson) third; Vive le Roy also ran. Time, 1:19 1-5.

Fifth race—One mile, San Francisco Handicap, purse $900: Nevada Stock Farm's b m Celesta (5) by Sempronius—Rezia, 125 lbs., (Washer) won in a canter; Brynlimah (5), 122, second; Madelle (5), 104, third; Rash and John Graham also ran. Time, 1:39 2-5.

Sixth race—Five and a half furlongs, Rossiter Handicap, purse $300: Nevada Stable's ch h Joe Hooker (4) by Rey del Sierras—Sainperia, 104 lbs., (Gross) won driving; Seneca (aged), 113, second; Eureka (aged), 104, third; Kootenay, Loftus, Scarlet Oaks, Orange Blossom, Sweetbait and Headfort also ran. Time, 1:06 2-5.

Seventh race—Six furlongs, selling, purse $300: J. McCarthy's br h Metropolitan (aged) by Filigrane—Annie Thompson, 115 lbs., (Gross) won easily; Diadi (4), 112, second; Ann Tilly (5), 121, third; Miss Folly, Old Bob and Tight Boy also ran. Time, 1:14 1-5.

Eighth race—One mile, selling, purse $300: T. Hatfield's ch m Lady Young (6) by Henry Young—Masker, 103 lbs., (Brazal) won handily; Conflagration (6), 103, second; Brando (6), 108, third; Cecil, Rey and Transparent also ran. Time, 1:40 4-5.

BIG FEATURES FOR RIVERSIDE FAIR.

Just one more week and then the Riverside District Fair will be going full blast, and, if great exhibits, keen racing and free attractions of thrilling, startling feats ever draw a crowd this year's fair will be a record breaker.

Twice daily Dr. Carver's great high diving sensations will entertain the multitudes, just as they are doing this month at Idora Park in Oakland and have done every September for the past five years. The Los Angeles Times says, "No million dollar show ever visited Los Angeles that had a sensation to compare with the forty-foot plunge on horseback by the 'Girl in Red.'"

In addition to Dr. Carver's high diving horses, men and women, Foley & Burke have been secured to bring the latest attractions and their shows will be a great factor in entertaining the crowds. There will be a big captive balloon on the grounds, the basket of which will carry passengers into the air for a bird'seye view of the city. From the sides of the balloon two parachutes will drop each day.

These are but a few of the special features being planned to amuse the 50,000 people who will enter the gates between the 5th and 9th of October. Already wonderful displays are assured, and in the trotting and pacing events there are sixty-nine entrants, four of the horses having been starters in the great $20,000 stakes at San Francisco. You cannot afford to miss the fair at Riverside this year—October 5 to 9, inclusive.

WOODLAND MARES AND COLTS AT AUCTION.

On October 25, the first day of the week witnessing the opening of the fall race meeting here at the exposition, a sale of trotting stock will be held at Woodland Stock Farm at which the offerings will include the choicest mares and youngsters from the Consdine establishment. Manager Dowling writes that everything on the place is for sale at either private or public venue, which means that great-bred colts, well developed youngsters and producing matrons of championship calibre may change owners. The date chosen is a good one, as horsemen and breeders from many parts of the country will be here for the exposition races, and will no doubt take advantage of the opportunity to pick up something to their liking. The bulk of the offerings will be the farm's own individuals, but persons wishing to make consignments to the sale are invited to do so, addressing Mr. Dowling at once. A complete announcement and review of the horses to be sold will appear later in this publication, and you will do well to watch for it.

DO NOT FORGET that entries to the ten one-thousand-dollar open events at the Arizona State Fair, immediately following the fall meeting at the P.-P. I. E., close with Secretary Shaughnessy on October first—next Friday. If you have not already secured an entry blank, do not risk sending for one at this late date but make your entries according to the program and conditions appearing elsewhere in this paper.

Thoroughbreds and their Racing in California

Long before the tide of western immigration had brought to the Golden Slope the hordes of sturdy Anglo-Saxon pioneers whose faith and industry were to place her among the "wonder states" of a wonderful land, the Spaniards, who for generations gone had ranged their countless herds of cattle from one end of her confines to the other, from the rolling hills where swept the restless tides of the Pacific far inland to the arid plains and the deserts, had proven one of her greatest gifts beyond all possibility of doubt, towit, that her grass-clad slopes and valleys carpeted with the richest of natural forage formed a veritable paradise for the production of the horse. It is to the Spaniard that we owe the introduction of the equine family to the American continent, and be it said that he was ever a horseman of parts—the best was none too good for him. Here the noblest of the four-footed friends of man thrived as he had done in no other sections of the vast domains over which the dusky dons held sway, and here the Spanish horse was brought to his highest point of development.

Then, as the years rolled on, there came the discovery of gold in the race at Sutter's Mill and its attendant rush from the east to the west of countless thousands of eager seekers after the hidden treasure, the warm blooded "American" of some generations of establishment on the soil of the western hemisphere predominating. By land and sea they came, and the sturdiest, the hardiest, and the most truly "American" of the pioneers were those who came by land. To these, good horseflesh was not merely a convenience, but a necessity of the greatest import. Not merely comfort and satisfaction enroute depended upon the quality of the horseflesh at their service, but in countless instances the issue of life and death hung in the balance. Many were the nameless graves and tragic piles of wolf-gnawed bones scattered here and there along the trails to mark the place where man or beast or both had lost in an unequal struggle—and not always was the battle waged with a red-skinned foe. Nature herself, most relentless of opponents when she so elects, played no small part in the decimation of the ranks of the argonauts. True, the Indians took their toll of the weak or the poorly mounted, but many a life was snuffed out because the livestock in use by those unfortunate souls did not possess the stamina required to make the number of desert miles and "dry camps" that would have won the way to the life-giving waters of the scattered springs and streams.

On the other hand, many of those who survived the rigors of the long-drawn journey owed their safety of life and limb to the excellence of their teams and saddle horses. Even as there is no royal road to knowledge, so was there no royal road to California, and those who traveled the road that was available were those who could successfully make the dash for life from the hostiles, or whose livestock, no matter what their travail, possessed the spark of fire that comes only from excellence of breeding that enabled them to drag out the weary miles from water hole to water hole.

Small wonder, then, that among the early Californians of our own race the horse of quality was held in high esteem. To him they owed practically everything, and to him they paid the tribute of genuine love and affection, and, once established in the new land, set about not only his perpetuation, but his improvement. With the knowledge that they had found a land of gold and a paradise for varied agricultural pursuits, there came very shortly the realization of the fact that the Spaniards had so long before found almost self-evident, that this California of theirs—and of ours—was unsurpassed for the development of the horse to his highest degree of excellence. Like the Spaniard, again, they found only the best good enough to fill their wants, and the world was combed for stallions and mares of a quality that came up to or approached their ideals, and in the course of a very few years, comparatively, thousands of dollars' worth of California gold went to the older settled sections of the land where the horse was king in exchange for the choicest of his kind.

Just what was the really first genuine thoroughbred brought to the Golden Slope, or the exact date of his arrival, is not known to the writer, but it has been well established that the first of the family foaled on California soil was Langford, the son of Williamson's Belmont and Liz Givens by imp. Langford that first saw the light of day in the spring of 1855, on Rock Creek in Colusa county, and from both Langford and his sire many of the excellent campaigners of California are descended.

So far as the sport of racing is concerned, it runs back far beyond the memory of man. The dons had their fiestas and gala days at which the horse always played a prominent part, and many an early pioneer had more than one race that was "hair raising" in a figurative manner of speech, and which would have been of the hair raising kind of a surety if he had lost it. Many were the impromptu contests for individual wagers in the prodigal days following the release of the first tides of the golden flood of wealth that was won from the bosom of good old Mother Earth by the pick, pan and rocker route, and real racing was not many moons delayed in making its appearance.

It has been said by some that a duly organized meeting was held in the fall of '50 at Sacramento, but San Francisco is generally credited with having given the first "really and truly" racing of a formal nature. Hardly San Francisco, either, to get right down to a point of hair-splitting accuracy, for the contests took place at "The Pioneer Race Course, of G. Treat, Esquire, at Mission Dolores, near San Francisco"—according to the best advices that have come down to us from that long distant day. The meeting began on the 24th day of March, 1851, and the first race was a sweepstake event, fifteen dollars each and $250 added by the citizens of San Francisco.

So much for the beginning of both breeding and racing.

What we are most truly interested in is what is to be, rather than what has been, but in planning the future a glance over the past is never out of place, for it is by experience that we learn, and California, so far as breeding and racing is concerned, is long on experience.

Like all other infant industries, both breeding and racing had many difficulties to surmount before they were permanently established on the Golden Slope, but the time came when the production of horses, the trotter as well as the thoroughbred, assumed a very high position among the leading industries of the state, taking rank only below mining and agriculture. The names of the men who were identified with horsebreeding in California are the names of those who hold high place in her history as doers of great deeds, builders of an empire. Not by single figures but by tens and scores can be counted the "sitters in the seats of the mighty" among our pioneers who were ardent lovers of the horse and who maintained establishments of from hundreds to thousands of acres for the perpetuation and improvement of the breed. The investment in horseflesh and stock farms ran high in the millions, and the investments in training and racing plants represented additional hundreds of thousands. Payrolls were generous, as was public patronage, and the amount of money kept in constant circulation through the combined industries, which go hand in hand if true success is to be the lot of either, was incalculable—and you will please bear in mind the self-evident fact that the circulating dollar is the "sign manual" of prosperity.

Before going any further in either a review of what has been or a sketch of what may be, we wish to lay especial stress upon a clause in the preceding paragraph that may have escaped your notice, the one to the effect that the industries of breeding and racing must go hand in hand if either is to achieve the fullest measure of success. In our estimation, one of the greatest single factors contributing to the downfall of both is the fact that they were under separate control, that the parties vitally interested in the one were not the parties in control of the other. The men who bred and raced horses were actual producers of wealth, while in too many cases those who conducted the racing amassed wealth through exploitation and speculation—and the result in the horse business was exactly that of numerous other large emprises. When the bubble was pricked the exploiters and speculators were the first to get out from under, and the real investors and producers were the goats. Legislation that was framed to eliminate the objectionable features of racing went further and with one sweep wiped from the actual assets of the state the millions of dollars invested in and derived from the breeding of horses.

It was a most beautiful example of one of those cases in which the operation was highly successful, but the patient died!

Now such a method of treatment is, of course, rather tough on the party most vitally concerned, but from such operations there usually comes this gain to humanity in general—the doctors learn how to avoid making such a fatal error the next time a similar subject comes under their observation, and learn also how the cure may be effected. If the sponsors of horse racing can profit to the same extent and apply their knowledge in a practicable way to their own particular line of endeavor, the former severe illness and subsequent death of the "dear departed" will not have been so much a real misfortune as a blessing in disguise.

Horseracing, through a combination of far-reaching powers, reached a point some years ago, not only here in California but in every racing center in the United States, where its position was wholly indefensible, absolutely untenable. There were many reasons such a condition of affairs could be brought

First of the "Native Sons" of the Thoroughbreds
LANGFORD
Foaled 1855 in Colusa county—Reproduction from a picture in the collection of Boutwell Dunlap.

out, one of the chief among them being that racing, in many of the most prominent cities, was promoted almost entirely by the gambling element and not by horsemen. Many racing promoters never owned a race horse, but many of the layers of odds forced horses that usually "ran for the book," and in too many instances the "king of sports" descended to the level of the loaded dice games and the double headed faro box with a pinhole deck, well sanded. Meetings were too numerous and too long, becoming too great a drain upon the public purse. Under such conditions—all of them of its own making—racing practically affixed the signature to its own death warrant. The re-establishment of racing has been a hard proposition, but it is coming back strongly in numerous sections where it flourished in the days gone by—but it is not coming back on the old basis. In the east and south, business men and bona fide horsemen are co-operating with gratifying results. In some states, legislation has been enacted legalizing the pari-mutuel system of speculation and creating state racing commissions composed of horsemen to have full control of the sport. The racing commission and the machine form the most nearly ideal system yet evolved in this country, and we would add but one other feature—that racing plants be owned and operated and that racing be promoted by associations composed exclusively of horsemen or business men, two classes of people who have every incentive for the establishment and maintenance of racing upon a firm and enduring basis.

Under such conditions, horse racing can be kept a true sport, a source of unalloyed pleasure to the general public, of moderate profits to the promoters and participants, and of communal prosperity throughout the sections in which it flourishes or in which the race horse is produced.

Whether or not Californians want thoroughbred racing back again, permanently, on such a basis, is no longer a question. The recent meeting of the Golden Gate Thoroughbred Breeders' Association settled all argument on that score. We want it.

Speed the day when we may have it!

BRADMONT DOWNED BY HAPPY DENTIST.

With the free-for-all pacers either laid away in the straw or shipped south to get ready for the races at Riverside, Happy Dentist and Bradmont, in a match race, furnished the chief drawing power in last Sunday's matinee at the Stadium. Some weeks ago they met in a mile dash at the exposition track, piloted by amateur skinners, and ever since then there has been talk of another meeting. The race Sunday was for blood, with experienced teamsters up, but the result was the same—Happy an impressive winner in 2:10½ and back in the same notch, Bradmont's defeat bringing a welcome "alibi" to Fred Purner, the Chronicle's "wizard of the reins," who was forced to take Happy's dust in the first meeting.

While some of the regulars were absent, a welcome visitor was present in the person of J. E. Strain of Marysville, who drove the contending horse in two of the afternoon's events. Lucia S., with Strain up, took the opening heat of the 2:18 pace in 2:14 and forced Senator H. to pace the second in 2:15 to beat her, the third and final mile also falling to the Senator. Mabel Dillon dropped the first heat of the 2:15 pace to King Pointer, who was closely followed by Emma M., but settled to her work in the next two heats to win both in handy fashion.

The free-for-all trot developed a brand new winner for the matinee season, the big brown mare Ella M. R. of the Giannini stable. Sandy Smith got her going and "threatened" with her at the time of her last appearance, and Sunday she was right, trotting two winning miles in 2:16, driven out alternately by Frances S. and Birdeye.

During the afternoon Mr. Strain exhibited the stallion King S. by Silver King, the showy chestnut fellow being much admired by the spectators. King S. is the sire of the "S" family from which the Strains have derived so much pleasure and considerable profit, Maurice S. 2:06 having been the coast's leading money winning pacer in Dick Wilson's hands in 1912. The summaries:

First race—2:18 pace:

Senator H.	(Joe Kidd)	5	1	1
Lucia S.	(J. E. Strain)	1	2	3
Jack	(McCDonnell & Conlan)	3	3	2
Victor Pointer	(Dan Keating)	2	5	5
Zorankin	(F. Callea)	4	4	w

Time—2:14, 2:15, 2:18.

Second race—2:15 pace:

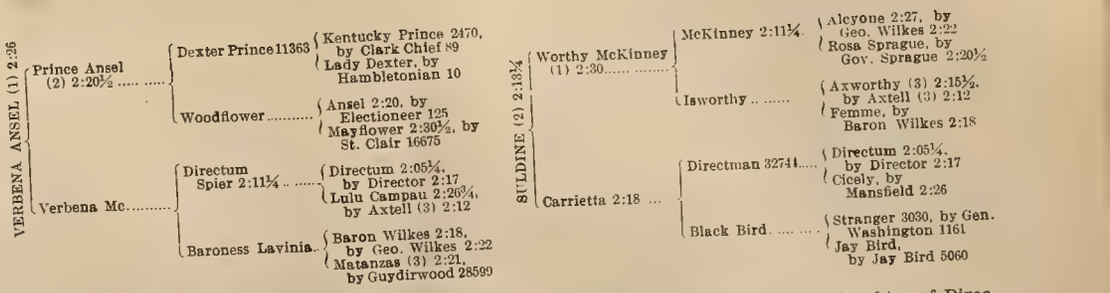
Mabel Dillon	(B. Cohen)	3	1	1
King Pointer	(H. Campodonico)	1	3	2
Emma M.	(William Malough)	2	2	4
Hamburg Belle	(J. Ginocchio)	4	4	3

Time—2:13, 2:12, 2:14½.

Third race—2:12 pace:

Happy Dentist	(J. J. Ryan)	1	1
Bradmont	(G. J. Giannini)	2	2

Time—2:10½, 2:10½.



Fourth race—Free-for-all trot:

Ella M. R.	(G. J. Giannini)	1	1	
Francis S.	(J. E. Strain)	2	3	
Birdeye	(A. Combatalade)	3	2	
Muggins	(H. Cohen)	4	4	

Time—2:16, 2:16.

More Champions for J. W. Considine

HALF MILE TRACK RECORDS.

Two weeks ago, readers of the Breeder and Sportsman were pleased to learn that a brand new trotting championship had fallen to the yearling gelding Anselot (1) 2:28½ from the stable of Woodland Stock Farm at Lexington. Mr. Moody, at the time of the Lexington record meeting, had no hesitation in predicting further early honors for some of the youngsters in his care, and on last Thursday at Louisville made good his claims by annexing two more championships, this time of the halfmile track brand.

Very late last fall, on November 14, the yearling trotting filly, Bessie Admiral, turned the two-lap course at Washington, Pa., in the then record time of 2:28. Last week over a similar course at Louisville Verbena Ansel trotted in 2:26, thereby taking over that particular championship and equaling her own mile track performance of some two weeks before at Lexington. As stated previously, Verbena Ansel was bred at Woodland Stock Farm and is the first performer to be credited to a daughter of Directum Spier 2:11¼.

The other championship at Louisville fell to Suldine, through the trotting of a mile in 2:13¼, which is the fastest time made over a two-lap track by a two-year-old trotter of any sex. Nowaday Girl, whose record of 2:16¼ was made in 1912 in a race, formerly held this distinction, while the stallion record for the age, 2:18¼, was made against time in 1914 by Don Marque, so that the reductions made by Suldine are considerable. The son of Worthy McKinney and Carrietta, who was a champion yearling last season, was bred by J. D. Grover of Georgetown, Kentucky, but was foaled the property of Mr. Considine and received all his education at the hands of Hunter Moody. Prince Ansel now has two yearling champions among his list of performers, and Mr. Considine's course in sending a number of his youngsters to Kentucky to show eastern people that Woodland Stock Farm "has the goods" has been amply justified.

LAST DAY AT SYRACUSE.

Syracuse, Sept. 17.—After a week of the most successful and interesting racing in the history of the local track, the Grand Circuit meeting held in conjunction with the New York state fair came to a close today, a number of fast amateur races to wagon rounding out the program of professional events. Lizzie Brown, who upset the expert calculations at some of the earlier meetings, was the real surprise of the day, taking the 2:09 trot in excellent style after dropping the first heat to Mirthful. Cleverly handled by Lon McDonald, Ames Albingen disposed of the 2:16 trotters without much trouble, while Queen Abbess, with Ben White up, got away with the lion's share of the money in the 2:10 pace after a four heat argument with Lustrous McKinney and Ashlook. The The summary:

Syracuse, Sept. 17.—2:09 trot, purse $1,200:

Lizzie Brown, br m by The Bondsman	(Valentine)	6	1	1
Mirthful, b m by The Star of Patchen	(Murphy)	1	2	2
Harry J. S., bl h by Admiral Dewey	(Tyson)	2	4	4

Hazel Laing, Adbell M., Nata Prime, Lady Grattan, Guy Nella and Parcliffe also started.
Time—2:08½, 2:06¼, 2:06¼, 2:06½.

2:16 trot, purse $1,200:

Ames Albingen, b h by Albingen	(McDonald)	1	1	1
Ginger Boy, b g	(Garrison)	2	2	6
Woodlawn Girl, b m by Erino	(Jones)	6	3	2

Red Gift, Jeannette Speed, Todd McGregor and King Bellini also started.
Time—2:11¼, 2:10¾, 2:10½.

2:10 pace, purse $1,000:

Queen Abbess, b m by The Abbe	(White)	2	1	1
Lustrous McKinney, b h by McKinney	(Rodney)	1	3	3
Ashlook, ch h by Ashland A.	(Crossman)	6	4	2

Jean, Fern Hal, Al Direct, Budd Elliott, Cora Walker and Baby Bertha also started.
Time—2:05¼, 2:05¼, 2:06½, 2:05¼.

AUSPICIOUS OPENING AT COLUMBUS.

Columbus, O., Sept. 20.—With the Grand Circuit season of 1915 entering upon its last month, the annual fall meeting at the local course began today under pleasing conditions, everything pointing to a most successful meeting providing the weather man is willing. The track was not absolutely "on edge," but there was some excellent time made and the fields were large.

Vaster, the twelve-year-old gray gelding from the Ragsdale string, sprung the surprise of the day in the opening event for 2:11 trotters. Alonzo McDonald and the roan mare Duchess headed the field of nineteen to the wire in the first heat in the respectable time of 2:08, with Vaster well back in ninth position. Int the second, however, the aged gelding came to life and proceeded to trim the roan mare in two fast heats, after which the going in the fourth was easier.

The juvenile trotters had an inning today in the two-year-old division of the Horse Review futurity, Volga setting a new mark for the age and gait for the present season by winning in straight heats in 2:11¾ and 2:09¾, White occupying the sulky in place of Billy Andrews. Bingen Silk was second in the first heat, but it was John E. Madden's Siliko filly, Walnut Tree, that forced the sister to Peter Volo to trot below 2:10 in the second mile.

Russell Boy and Marse Edward Geers are still the rulers of the stake pacers, demonstrating their superiority today by reeling off three merry miles in 2:03 or better. Our Colonel, Single G. and Beth Clark took turns in driving out the winner, but none of them could show the way to the wire. The 2:14 pace was carried over after Bessie R. had taken two heats and Camelia one, to be concluded tomorrow. The details:

Columbus, Sept. 20.—2:11 trot, purse $1,200:

Vaster, gr g by Vasteen	(Ragsdale)	9	1	1
Duchess, ro m by Allerteen	(McDonald)	1	2	2
Evelyn D., ch m by Sidney Dillon	(Hall)	2	6	4

Abu Taleb, Jack K., Tommy de Forrest, F. A. L., Sadie Penn, Dick Watts, Nata Prime, Strafford, Oro Society, Lottie Simmons, Willgo, Guy Nella, Barney Gibbs, Zombro Belle, Lucille Spier and Bon Guy also started.
Time—2:08, 2:07¼, 2:07½, 2:10¼.

Horse Review Futurity, two-year-old trotters, purse $3,000:

Volga, ch f by Peter the Great	(White)	1	1
*Bingen Silk, b c by Bingen	(Chandler)	2	4
*Walnut Tree, b f by Siliko	(Murphy)	4	2

Atlantika, Nelly the Great and Suldine also started.
*Divide second and third money.
Time—2:11¾, 2:09¾.

King Stake, 2:06 pace, purse $3,000:

Russell Boy, b h by Rustic Patenter	(Geers)	1	1	1
Single G., b h by Anderson Wilkes	(Gosnell)	3	2	3
Our Colonel, b h by Colonel Cochran	(F. Childs)	2	7	4

Beth Clark, Lelia Patchen, Major Ong, Harry the Ghost, Baron A., The Beaver and Nutmoor also started.
Time—2:03, 2:02¾, 2:03.

2:14 pace, purse $1,200 (unfinished):

Bessie R., b m by Captain H.	(Robinson)	1	1	4
Camelia, b m by Cummer	(Cox)	3	6	1
Patrick M., bl g by Norbells	(Stokes)	2	2	3

Dwight Logan, Margie Hal, Joe Ashland, Thistle Patch, Tango and Kitty Bannerliss also started.
Time—2:05¼, 2:07¾, 2:07¾.

Second Day at Columbus.

Columbus, Sept. 21.—The largest field of three-year-old trotters that ever faced a starter over the Columbus track came out early this afternoon to race for the eight thousand dollars that composed the Horse Review futurity's offering for the age and gait, seventeen good juveniles taking the word in the first heat. Deroche, from the Geers stable, ruled favorite over the big field, but the money went to the outsider Mary Putney, recently purchased from Walter Cox by Chauncey Sears of Fall River, Mass., and piloted today by Dick McMahon. Challenged in the first heat by Deroche and in the second by Colorado Range, the daughter of San Francisco proved her superiority over both by winning in the excellent time of 2:08¼. Murphy, with the fast filly Bondella, finished well back in the bunch, but evened up for the day by driving Peter Scott to an easy win in the big stake for aged trotters.

Camelia had things her own way in the final heats of the 2:14 pace, carried over from yesterday, Dwight Logan being the nearest contender. The 2:11 pace developed into a merry four-heater, the pantalooned pacer Fred Russell spearing the last three after finishing next to last in the first one, which went to the Canadian pacer Billy Brino. Billy faded after his win, the Hersey entry being driven out each time by Margot Hal, who went a very nice race after once squaring away. The summary:

Columbus, Sept. 21.—2:14 pace, three heats Sept. 20 (above), purse $1,200:

Camelia, b m by Cummer	(Cox)	1	1
Bessie R., b m by Captain H.	(Geers)	6	3
Dwight Logan, br h by Bert Logan	(Valentine)	2	2

Patrick M., Joe Ashland, Tango, Margie Hal, Thistle

Patch, Kitty Bannerliss and Goldie C. also started.
Time—2:08, 2:09.

Horse Review Futurity, three-year-old trotters, purse $8,000:
Mary Putney, b f by San Francisco.....(McMahon) 1 1
Colorado Range, b c by Colorado E.....(McDonald) 4 2
Deroche, ch c by John A. McKerron.....(Geers) 2 5
Humfast, Native Spirit, The Colorado Belle, Onward Forbes, Allie Watts, Bondella, Clenathan, Harry Todd, Binland, The Royal Knight, Isworthy McKinney, Florence White, Peter Chenault and Don Marque also started.
Time—2:08¼, 2:08¼.

Hoster-Columbus Breweries Stake, 2:14 trot, purse $10,000:
Peter Scott, b h by Peter the Great....(Murphy) 1 1 1
Mabel Trask, ch m by Peter the Great.....(Cox) 2 2 7
Lettie Lee, b m by Moko.....(White) 4 3 2
Slippast, Sadie S., McCloskey, Todd Temple, The Guide and Miss Directed also started.
Time—2:07, 2:08¾, 2:08.

2:08 pace, purse $1,200:
Fred Russell, b g by Little Frank....(Hersey) 11 1 1 1
Billy Brino, b h by Wild Brino Jr (V. Fleming) 1 5 9 5
Margot Hal, b m by Argot Hal....(McDonald) 7 2 2 2
Auto Zombro, Fleeta Dillon, Ben Locanda, Lustrous McKinney, Peter Chimes, May E. Pick, Altawood and Grace D. also started.
Time—2:06¼, 2:05¼, 2:07¼, 2:07½.

Third Day at Columbus.

Columbus, Sept. 22:—Seventeen heats were raced here this afternoon but the time, with but one exception, was very moderate and hard fought, closely contested finishes were lacking in any number. The best race of the day was between George Todd and Miss Harris M. in the three-year-old pacing division of the Horse Review futurity, the champion having to pace his second mile within half a second of his own world's record to stave off the rush of Miss Harris M., who was the contender in the record performance at Indianapolis.

Hal Boy has finally won a race, but not a great one, as nothing in the field could force him to pace faster than 2:07. Margaret Druien took the special trot as she pleased, the contest being between Star Winter and Joan for place, the former having the most whizz in the stretch in two of the three heats.

The 2:15 trot was split to two races for purses of $800 each, both being raced in about the same time. Seneca Boy, after winning two straight in his division, had to give way to Roy Miller, a second choice, while Rose D., from the Hoosier twice arounds, handled her field nicely after the first heat. The results in detail:

Columbus, Sept. 22.—2:15 trot, first division, purse $800:
Roy Miller, b h by Bingara.....(Grady) 7 2 1 1 1
Seneca Boy, ch g by King Entertainer....
.....(W. Fleming) 1 1 4 7 3
Alice McGregor, b m by Jay McGregor....
..... (McAllister) 2 6 3 2 2
Farmer Gentry, Par McKerron, Herbert, Cozine, Parcliffe and Jeannette Speed also started.
Time—2:11¾, 2:10¼, 2:11¾, 2:11¼, 2:13½.

Horse Review Futurity, three-year-old pace, purse $3,000:
General Todd, b c by George Todd.....(Rea) 1 1
Miss Harris M., b f by Peter the Great..(McDonald) 2 2
Lady Aubrey, br f by Captain Aubrey.....(Tyson) 3 3
Sad Thoughts also started.
Time—2:06¼, 2:04¾.

Hotel Hartman Stake, 2:13 pacers, purse $5,000:
Hal Boy, b g by Hal B.....(McMahon) 1 1 1
Judge Ormonde, bl h by Ormonde...(Valentine) 4 2 2
Aconite, b h by Aquilin.....(Cox) 2 3 3
Fred Mack and Peter Farren also started.
Time—2:09, 2:07½, 2:07.

2:15 trot, second division, purse $800:
Rose D., ch m by Sidney Dillon.....(Fodall) 7 1 1 1
Fair Virginia, bl m by Zombro.....(Cox) 1 3 3 6
Judge Jones, b g by Prodigal...(F. G. Jones) 2 2 4 5
Oro Society, Willow Mack, The Katydid, King Charlie, Bida and Aulsbrook also started.
Time—2:10¼, 2:11¼, 2:10¼, 2:13¾.

Special trot, purse $1,200:
Margaret Druien, b m by Peter the Great (Cox) 1 1 1
Star Winter, b g by Ed Winter.....(McDonald) 2 3 2
Joan, br m by Directum Spier.....(McDevitt) 3 2 3
Time—2:07¼, 2:06¼, 2:08¼.

Fourth Day at Columbus.

Columbus, Sept. 23.—Favorites ruled the entire card today and in most cases won handily and without serious challenge, as not a real stretch drive developed during the afternoon, though the time was better than on previous days, but one heat being slower than 2:10. A stiff wind cut the time of the final quarters in almost every instance, facing it at utmost speed being a task too great to ask of a horse, no matter how good. Etawah, starting to reduce his former record of 2:03¼, clipped the fraction from it in spite of the wind he had to buck, and looks able to dent the stallion record before the season closes. Geers also had a winning ride behind Napoleon Direct, Earl Jr. carrying him two heats close to 2:02, after which things eased up considerably. Anna Bradford "threatened" for a time in the first heat, but a break retired her from the contention.

Lizzie Brown and Queen Abbess both went excellent races, while Ames Albingen had the edge over his field at practically all points during the contest. The summary:

Columbus, Sept. 23. 2:10 pace, purse $1,200:
Queen Abbess, b m by The Abbe.....(White) 1 1 1
Joan, b m by Flosko.....(Murphy) 2 3 2
Lustrous McKinney, b g by McKinney..(Rodney) 6 2 4
Fern Hal, Ross Keith, Texas Jim, Kate McKinney, Hal Mapes, Tommy Direct, Lord Seymour, All Direct and Clara Walker also started.
Time—2:07, 2:04¾, 2:04½.

Capital City Stake, 2:08 trot, purse $3,000:
Lizzie Brown, b m by The Bondsman (Valentine) 1 1 1
Lucille Spier, b m by Directum Spier (Slaughter) 2 2 2
Lulu Lunnine, b m by Orator.....(Murphy) 3 3 6
Duchess, Willko Lady Grattan and Bonington also started.
Time 2:06½, 2:06½, 2:07.

Free-for-all pace, purse $1,200:
Napoleon Direct, ch h by Walter Direct..(Geers) 1 1 1
Earl Jr., gr h by The Earl.....(Cox) 2 2 4
R. H. Brett, b g by Waponce.....(Grady) 3 3 2
Walter Cochato and Anna Bradford also started.
Time—2:02½, 2:02¼, 2:05½.

2:19 trot, purse $1,200:
Ames Albingen, b h by Albingen.....(McDonald) 1 1 1
Durin, b g by The Director General.....(Marsh) 4 2 2
Tommy Todd, b g by Todd Mac.....(Snow) 2 8 3
Idora Worthy, Pony Express, Princess Margrave, Audrey Grey, Harry Potter, Miss Cresceus, Zulu Maid and Regardless also started.
Time—2:09¼, 2:09¼, 2:10¼.

To beat 2:03¼ trotting:
Etawah, b h by Al Stanley.....(Geers) won
Time—:30, :59¾, 1:30¼, 2:03.

RUSSELL BOY 2:02¼, THE STAKE PACER.

When Frank Bogash Jr. 1:59¼, son of a hoppled pacer of the long ago, came out of the Canadian bushes a few seasons back and in one campaign on the Grand Circuit reduced his record from 2:12¼ to 2:01¾, winning a series of brilliant victories, it was discovered that, while his pedigree was not what would be termed fashionable, it nevertheless was of the sort that is best described by the word "sterling," and that its blood elements carried the strains that had produced the best families of the present day.

Exactly the same state of facts is found when the pedigree of Russell Boy 2:02¼, one of the really sensational pacers of 1915, is analyzed, and the combination of strains that did yeoman service in the upbuilding of the American harness horse is even more marked than in the case of Frank Bogash Jr.

Briefly stated, the pedigree of Russell Boy reads: By Rustic Patenter, dam Maud F., by Vatican 7906 (son of Acolyte 2:21, dam Santa Claus, a triple producer); grandam, Ella M., by Amboy (grandson of Green's Bashaw 50). Green's Bashaw was a grandson of Vermont Black Hawk, he a grandson of Justin Morgan, and the second dam of Green's Bashaw was the Charles Kent Mare, famous as the dam of Hambletonian 10, the greatest progenitor of trotters. The stallion, Amboy, which got the second dam of Russell Boy, was a son of Amboy 769, and he carried a double cross of the Vermont Black Hawk 5 strain, since his sire was a great grandson of that horse, while his second dam was by Bell Morgan, grandson of Vermont Black Hawk 5.

Rustic Patenter, sire of Russell Boy, is by Rustic Wood, dam Alpha Patenter, by Patenter; grandam, Molly White, by Nihilist. Rustic Wood was by Guydirwood (son of Nutwood, dam by Guy Wilkes, grandam by Director), and his dam was by Allie Russell (son of Mambrino Russell, dam Alley, dam of Wilton 2:19¼, a famous sire by Hambletonian 10). Mambrino Russell was by Woodford Mambrino 2:21½, dam Miss Russell, greatest of broodmares(by Pilot Jr. Woodford Mambrino was by Mambrino Chief, and, in addition to being a high-class race horse trotter, he got thirteen trotters, while twenty-five of his sons have sired 145 trotters and twenty-five pacers, and twenty-sixe of his daughters have produced forty-three trotters and one pacer. Pancoast (sire of Prodigal, Patron and Patronage) is a son of Woodford Mambrino. Princeps (sire of Trinket 2:14, the first four-year-old trotter to beat 2:20) is another, and Mambrino Russell is a third.

Patenter, sire of the dam of Rustic Patenter (sire of Russell Boy), likewise runs in the male line to Woodford Mambrino, his sire being Pancoast and his dam Tot, by Dictator; grandam, Annie, by Cottrill Morgan, son of Vermont Black Hawk 24. Annie became a notable many years ago as the dam of the pacer Westmont 2:13¾, who startled the turf world by doing a mile with running mate in 2:01¾ the very first time he was tried at that hitch. Peter V. Johnston, who later broke Peter the Great 2:07¼, as a yearling, and drove him to victory in the Kentucky Futurity at three, was the man who sat behind Westmont when that record-breaking mile was put on the books. That was at the Garfield Park track, Chicago, in 1884, and, as a well-known driver used to say when referring to horses and their records, "I seen him when he done it." But never again could Westmont be induced to pace any such mile with a runner to drag him, wherefore a number of exhibitions hastily arranged were abandoned after the initial fiasco, which took place at Pittsburgh.

Nihilist, sire of the second dam of Rustic Patenter, was a very highly bred horse, he being by Strathmore, dam of Almont; grandam by Mambrino Chief.

Down in the corn belt of Illinois where Russell Boy was bred by Ellis Frank, who still owns him, there was a tremendous interest in the trotting horse way back at the time of the Civil War. Green's Bashaw, foaled in Orange county, N. Y., went to Muscatine, Ia., at an early day and his sons and grandsons soon were plentiful in Illinois. Hazlett's Amboy (sire of the second dam of Russell Boy(was a son of Amboy 769 (foaled 1866), better known as Corbin's Amboy, as, although bred in Iowa, he was owned most of his life by "Wash" Corbin of Quincy, Ill., and in 1878, two years before his death, he was mated with Hazlett Queen, a daughter of Singleton's Silverheels, so called from his ownership by General Singleton, of Quincy, a power in early-day Illinois politics. The dam of Hazlett Queen was a daughter of Bell Morgan, grandson of Vermont Black Hawk 5. Bell Morgan was by Cottrill Morgan, which horse figures twice in the pedigree of Russell Boy, as Annie (dam of the pacer Westmont, alluded to above) was by Cottrill Morgan.

Both Green's Bashaw and Amboy died in 1880, and today's interest in those fine representatives of the one-time famous Morgan breed of horses centers in Russell Boy, whose work this season has been of a spectacular character. Only last week he fought t a winning finish a desperate six-heat battle over th Hartford track, the fastest heat of the six bein 2:04½, and the slowest 2:06¼, with Russell Boy firs or second at the end of every one of those miles And the previous week, at the Empire City trac (which was two or three seconds slower than Nort Randall or Lexington at its best), Russell Boy wo the third and fourth heats of another victorious cor test in 2:04¼ each.

At Detroit he won a fifth heat in 2:04¾, and i should not be forgotten that in all his fast miles th route from wire to wire taken by Russell Boy ha been the long one, Mr. Geers driving him very wid around the first turn and never trying to step hin any in that part of the heat. Could Russell Boy b "zinged" away from the wire, as may be done witl most fast pacers, a mile around the 2:00 mark seem ingly would be easy for him. He has shown beyonc cavil that, when he goes on the pace all the way, he can take the overland route and trim his fields, or—sticking to the pole—lay far back of the others unti the halfmile pole is reached, and then come home ir less than a minute.

"What is Rustic Patenter, the sire of this here flying machine?" I heard an excited gent with a fog horn voice demand to be informed at Cleveland afte young Franks, son of the Illinois farmer who bred and still owns Russell Boy, had won a heat in 2:03¾ pacing on the outside rim of the track most of the way.

I felt a good deal that way myself, not having had Rustic Patenter or "the flying machine" called to my attention previous to that race, and decided to look into the matter at the first opportunity. Looking, I delved, and found what has been sketched above. And after the delving and the chronicling I am obliged to rate Russell Boy as a bred-in-the-purple pacer as well as a sensationally fast one. Nutwood 2:18¾, Guy Wilkes 2:15¼, Director 2:17, and a few other sires in the male line, Miss Russell and all sorts of top class breeding in the female line, ending with the Morgan strain through Green's Bashaw, all combine to make the pacer from the Illinois corn belt a regular little giant in the pedigree line, while his speed is of the phenomenal sort, and his gameness reminds one of the gamecocks the boys around "Peory" used to fight—and, perhaps, still do.—H. T. White, Horse Breeder.

LOVELAND, COLORADO.

Loveland, Col., Aug. 31.—3:00 pace, purse $300:

A FERTILE MARE MULE.

According to the Sacramento Union, a genuine freak of nature, a mule that is not barren, is possessed by Dan Sullivan, a farmer who resides five miles north of Weed in Siskiyou county, this mule having given birth to a colt during the month of May. Attorney Phillip S. Driver, who lately returned from a vacation trip to Siskiyou county, brought back pictures of the mule and the colt. He says that the offspring would be taken for a horse colt, which is not surprising as it is three-quarters horse. Its ears are no larger than those of an ordinary colt, the mule in it showing in the hairy condition of the inside of the ears and in the pointed hoofs.

Drink Jackson's Napa Soda.

NOTES and NEWS

Verbena Mc (1) 2:26.
Suldine (2) 2:13¼.
Both halfmile track records.
Thus do Woodland Stock Farm and J. W. Consi-ne gather unto themselves two more champion-ips.

◈◈◈

Don't fail to look up the Phoenix program if you ve not already made your entries. All events close tober first.

◈◈◈

College Gent and Starve Rock had a hot one Wed-sday at Springfield, dividing first and second money the end of five heats, the fastest of which was ced in 2:08¼.

◈◈◈

That sale at Woodland is going to give some one excellent opportunity to get some great mares and ungsters at their own prices. Don't overlook the nouncement.

◈◈◈

Ed Strain of Marysville brought down a few horses om home late last week and made himself the belle of the ball" at Sunday's matinee at the Sta-ium.

◈◈◈

Dicto was a winner again this week for Will DeRy-er, taking the 2:25 pace at Springfield. He is a etter horse than generally given credit for on his ast performances here at home.

◈◈◈

The Grand Circuit is entering upon its last month f activity for the season, Lexington following Co-mbus and "telling the tale." Then—westward ho, or the P.-P. I. E. and Phoenix.

◈◈◈

Miss Perfection was beaten Tuesday at Springfield y the Illinois trotter Axtien, the best time being :09¾ over a bad track. They are due to meet again ere in the big stake if all goes well with them.

◈◈◈

Riverside has a first rate entry list and the racing here promises to be the best pulled off on a half-mile track in California in years. The complete pro-gram and list of entries will be published next week.

◈◈◈

Baron Todd, the brown horse that was under the weather while here this spring in Lon McDonald's stable, sprung a surprise at Indianapolis by "cop-ping" in straight heats, though he failed to break into the 2:10 list.

◈◈◈

The Beaver, out of commission all season from an accidentally shattered hoof, got back in the game again at Columbus and will probably be in good rac-ing shape by the time the bell rings at the exposition track the last of October.

◈◈◈

Bertha Carey and George N. Patterson both did all a good horse needs to do this week at Springfield—annexed first money for Charley DeRyder and Homer Rutherford. This Rutherford gentleman looks able to bother someone mightily in the local futurities in November.

◈◈◈

Stake and purse offerings for the meeting at Lexington which commences October fourth total the neat little sum of eighty-five thousand dollars. Five hundred and one horses are eligible to the late closers, while the futurities have fields that promise excellent sport.

◈◈◈

Fleeta Dillon and Lawrence Shuler, who made a surprisingly good team here at the exposition meeting, had troubles of their own after going east but squared away in great shape at the Indiana State Fair, winning the 2:07 pace in time that gave the two-year-old champ a winrace record of 2:08¼.

◈◈◈

Next week witnesses the opening of the exposition horse shows for the breeding classes, Thursday, Friday, Saturday and the following Monday being devoted to the horse. The various classes will be exhibited in the forum in the livestock department, beginning at 9 o'clock each morning.

◈◈◈

Life on the big line is just one durn thing after another. Russell Boy and Pop Geers didn't have Hal Boy to contend with Monday at Columbus, but Our Colonel, Single G. and Beth Clark took turns in "trying," with the result that Marse Ed had to skin his "Illinoy" bird over a fair track three times in 2:03 or better.

◈◈◈

The Oregon State Fair commences Monday at Salem to continue throughout the week, with promise of the best of success. Secretary W. Al Jones and his associates have worked early and late on every department, with the result that the stock pens and speed barns, as well as the other exhibit buildings, have been severely taxed to accommodate all comers. It is the last race meeting of pretention prior to the fall meeting here, and most of the California contingent will ship at once to local tracks for the final prep for the big fray.

Friday, October first, at five o'clock p. m., has been designated by Secretary J. I. Thompson as the time for the next annual meeting of the California Draft Horse Breeders' Association, the members to gather at the convention hall in the livestock department at the P.-P. I. E., as most of them will be in attendance at the exposition shows at that time.

◈◈◈

We wish to break this to you easy, folks, and if time and financial resources permitted we would notify you on a postal card, enclosed in an envelope—Hal Boy has won a race! However, do not grow excited, as it was scarcely a "race." Russell Boy and Single G. were absent, and Judge Ormonde, in his home town, couldn't or wouldn't make the pony pacer beat 2:07.

◈◈◈

Runnymede, the famous son of Voter and Running Stream, will be installed as premier stallion at Napa Stock Farm, the thoroughbred speed nursery of A. B. Spreckels. Napa has weathered the storm better than any of the old farms, and its output has been in demand under the most adverse circumstances, so that with the running game "looking up" and a new infusion of the best blood obtainable the future of the famous old place promises well.

◈◈◈

One thing that is far from being a drug on the California live stock market at present is a good young Holstein bull. At the Weldon dispersal on Sept. 16 at Hanford, Prince Gelsche Walker Kerndyke brought $4,000 and Juliana DeKol King Segis was knocked down at $1,800. Both animals were bred at the ranch of A. W. Morris & Sons at Woodland, and the Prince, purchased by Fred Keisel of Sacramento, is the highest priced native on record.

◈◈◈

The Twelfth Annual Alberta Fair, which embraces the fat stock, dairy, seed and poultry shows, will be held December 14 to 17 at Victoria Park, Calgary. Secretary E. L. Richardson is already distributing the prize lists for the fat stock department, and the complete programs for the poultry and seed shows are in course of preparation and will be sent out by Messrs. W. N. Gibson and James D. Smith some thirty days prior to the opening of the events.

◈◈◈

Through an error in our correspondent's figures McAdrian's time in the 2:30 trot at Ferndale was given as 2:35½ in the first heat, when it should have been 2:25½—a difference that much improves the appearance of the race on paper. Humboldt county horsemen evidently have taken a fancy to McAdrian, as E. D. Diggs, his owner, writes that the son of Guy McKinney will remain in that vicinity and make a stud season there in 1916.

◈◈◈

Colonel O. P. Updegraff and Magnus Flaws staged their celebrated "sister act" at the Minnesota State Fair, their performance as starter and presiding judge, respectively, meeting with such general approbation that there were no calls for "the hook." They have other joint engagements to keep them occupied until the time comes to reserve an upper for San Francisco, where their season will probably close. At that, they might be put on successfully at Phoenix, and we offer the suggestion to Secretary Shaughnessy without charge.

◈◈◈

In a mixup between Strathtell and Charton Boy early in the week at the Illinois State Fair the popular Canadian teamster, Barney Barnes, the "red pheasant of the north," was thrown from his seat and painfully injured. Telegraphic advices do not state the extent of his injuries, but it is to be hoped that they are of a minor nature that will not prevent his appearance here in November, for we would miss Barney sadly. Whether the judges exercised any disciplininary powers is doubtful, but as "introduced pheasant" in Illinois is on the protected list until 1923 it seems that the jock behind Charton Boy might be "handled" under the game laws.

◈◈◈

General Todd and Miss Harris M. indulged in another duello at Columbus with the colt again the best, the filly again forcing him to pace the second heat below 2:05. Immediately after the race announcement was made that Eugene Mettler had sold Miss Harris M. to his fellow townsman, Stoughton A. Fletcher, owner of Hal Boy and a number of other high class campaigners. As Mr. Fletcher is one of Alonzo McDonald's staunch friends and constant patrons the speedy lass will probably remain in Lon's stable, and it is certainly to be hoped that owner and trainer meet with better fortune than was theirs in the case of Squantum.

◈◈◈

Walter Cox, the vender of Peter Scott and Lee Axworthy, has "done gone an' done it again." Two weeks or so ago he sold to Chauncey Sears of Fall River, Mass., the three-year-old trotting filly Mary Putney by San Francisco. Her new owner turned her over to Dick McMahon and in this wily gentleman's hands Mary didn't do a thing but upset all the dope by taking the senior division of the Horse Review futurity in straight heats. Her record of 2:08¼ stamps San Francisco as a double sire of 2:10 speed at the trot, St. Frisco having preceded her into the charmed circle by some days. California has a right to feel a proprietary interest in the young lady, as her sire and dam are both Californians, Mendocino and Esther (dam of Expressive, etc.) by Express.

WILL CANADIAN NON-RECORD RULE HOLD GOOD?

Our contemporary, The Canadian Sportsman, calls the attention of horsemen in a recent issue, to an inducement offered by the newly organized Canadian National Trotting and Pacing Horse Association, to increase its membership by inserting a rule in its book, not giving bars to horses that race at its betless meetings, even if purses are raced for.

The authority for this liberality is given in Rule 49, paragraph 2, which states:

"In determining the eligibility of horses to compete in public races, only the records made by the winners of races shall be considered. Records made in performance against time and in trials of speed at agricultural fairs and at other meetings where no public betting is allowed, shall constitute a breeder's record, and shall not be considered a bar to eligibility to race, provided that such agricultural associations are members of the Canadian National Trotting and Pacing Harness Horse Association."

Now, this rule is a very good one, if the horses that compete are raced only in Canada, and on tracks in membership with this association, but even in Canada, the membership is small as yet and owners who want to take advantage of this liberality would have a very short racing season. As soon as they left the tracks in membership with the C. N. T. P. H.. A. they would be compelled to enter in classes suitable to the time they had performed in on the new association's tracks and the benefit would be lost.

The question arises as to what the two larger racing associations in the United States will do to combat this rule. Both the American Trotting Association and the National Trotting Association will be vitally interested in the rules of this new Canadian association and especially the one quoted above. It is a foregone conclusion that they will make rules to combat it, for tracks in their membership, and if they should take such a step there is no doubt that any rule they will make would be drastic.

It has been strongly hinted that a rule might be made which will compel all horses racing over the tracks in membership with the Canadian association, to only be eligible to the free-for-all classes on tracks of the members of the two parent bodies. A rule of this kind would work many hardships on horses and owners that compete in Canada over these betless tracks, because, even if a horse only won a purse race in 2:24¼, he would be compelled to start in the free-for-all class in the United States and also on some of the Canadian tracks. There would be no incentive to breed or race green horses, as once they won a race under the new Canadian rules, they would be free-for-all horses, and their money value decreased, as the ban, once on, would be on forever.

Canadian tracks that have not yet joined the new association will hesitate to become members until they see what action the two parent bodies take at their next biennial meetings, which are due within a short time. The rule was embodied in the racing conditions of the new Canadian association to encourage racing in its own territory, but it will not meet with the favor that was expected.

Canada can not do without American owned horses racing over its tracks and neither can Canadian owned horses depend on home tracks to support them all. Some few horses can be confined to racing over Canadian tracks only, but there are many of the best and highest priced horses that must be raced over the large tracks in the United States to make the stables pay, and once any of these horses have won a race over a betless meeting track in Canada, in membership with the new association, their value as stake horses in the United States is ruined, providing the A. T. A. or N. T. A. takes action on the matter—Horseman.

FUTURITY ENTRANTS AT SALEM.

The Oregon Futurity No. 5 for three-year-old trotters and pacers will be contested during the Oregon State Fair at Salem, which commences next Monday and continues throughout the week. Final payments have been made as follows:

Trotting division, purse $2,000, Tuesday, Sept. 28: Ruth Ansel by Prince Ansel—Lottie Whippleton by San Diego, Woodland Stock Farm; Helen Belle by Carlokin—Carolyn C. by Axtell, and Nicola B. by Carlokin—Atherine by Patron, W. G. Durfee; Coos Bay by McAlzo—Velma Z. by Zombro, Geo. L. Swisher; Sela Cruzados by Cruzados—Sela Nun by Sela Boy, Fred Merrill, Agt.

Pacing division, purse $1,500, Wednesday, Sept. 29: Janice L. P. by Hal B.—Pundeta, G. L. Parker; Rayon de Oro by Copa de Oro—Easter D. by Diablo, J. S. Nickerson; May Day Hal by Hal B.—Altalena by Altamont, Henry Weiss; Bondalean by The Bondsman—Katalina by Tom Smith, C. F. Silva.

The gala day and draft horse show at Rio Vista formed an attraction that drew many people to the river town, which for years has been the center of a community noted for the excellence of its horseflesh. A four horse team of ton Percherons, purebreds, from the stables of McNab & Smith, San Francisco, attracted a great deal of attention. The awards were made as follows: Best stallion, Boro Wedger, owned by Neil Anderson; best foal, irrespective of breeding, E. W. Westgate; best draft gelding over 1700 pounds in weight, Rock, owned by Tom McCormick; best mare, irrespective of breeding, E. W. Westgate.

THE PASSING OF THE ELMENDORF STUD.

The racing season of 1915 will be marked by the disappearance from the breeding industry of America of the thoroughbred stud of the late James Ben Ali Haggin. On the 28th of this coming October the last of the stallions and mares got together by the last of the picturesque forty-niners in the evening of his long and active life will be knocked down to the highest bidders, breeders of thoroughbreds from all parts of the Western hemisphere and from the far East. The great establishment made famous by the exploits on the race tracks of three continents of such horses as Watercolor and Waterboy, Africander, Golden Maxim, Briar Sweet, Tradition, Rubio, Hamburg Belle, Hessian and Yellow Tail will become a memory. The stallions Ballot, Sain and Hessian with sixty-eight brood mares and thirty-one weanlings are the lot advertised to go under the hammer and it will require a full day to dispose of them.

The Powers-Hunter Company, of New York, will conduct the sales at Elmendorf Farm, a superb 8,000 acre blue grass estate just outside Lexington, Ky., which with its half a million dollar mansion is valued at $3,000,000 or thereabouts, that Mr. Haggin purchased, piece by piece, after he decided to give up breeding race horses in California. It will be an old-fashioned sale with all the picturesque features that pertain to such an event and it will attract to Lexington the greatest crowd of horse folk the Blue Grass capital has been called upon to entertain in a quarter of a century.

It is the intention of Mr. Hagin's heirs, it is said, to make a clean sweep at Elmendorf. After the thoroughbreds are sold the other live stock will be disposed of and the sale of the sheep, cattle and hogs will be followed by the sale of the farm itself if a purchaser can be found for an estate so vast. Mr. Haggin left many millions when he died last September but no heir of his own blood seems sufficiently interested in thoroughbreds to keep his famous nursery going.

The passing of the Haggin stud will be epochal in the history of the thoroughbred industry and of racing in the United States, for from the early nineties until 1910 and 1911, Mr. Haggin was the greatest breeder of thoroughbreds in the world. He imported from England and the antipodes the celebrated stallions Watercress, Goldfinch, Darebin, Sir Modred, Golden Garter, Star Ruby, Prestonpans, Toddington, Dieudonne, Greenan, Rapallo, Bassetlaw, St. Andrew, etc., etc., and scores of highly bred mares and from these and from horses of purely American breeding, he developed and marketed more racehorses than all the other breeders of his time combined. Moreover, he sent his stock to every country in which horse racing finds favor to spread the renown of the American thoroughbred.

Between 1894 and 1905 Mr. Haggin maintained from six hundred to one thousand stallions and mares at a thirty thousand acre ranch in California, known as the Rancho del Paso Stud, and from 1897 to 1912 there were from one hundred and fifty to three hundred stallions and mares at Elmendorf, which he began to organize in 1897 by purchasing the old Swigert farm at which the famous Salvator and Firenze were bred. During the last six years of the existence of the Rancho del Paso Stud, he annually marketed through the sales companies of New York some three hundred or three hundred and fifty yearlings, while many more of his horses were disposed of by private deals. It used to take that accomplished auctioneer the late William Easton three "sales days" to knock down the budding racers of Rancho del Paso and Elmendorf at the Sheepshead Bay sales paddocks.

Rncho del Paso was abandoned in 1905 when Lloyd Tevis, Haggin's partner in its ownership, died, and the stallions and mares which constituted the breeding stud were sold at auction, Mr. Haggin purchasing the most desirable for service at Elmendorf.

There were upward of two hundred and fifty mares and fifty or more stallions at Elmendorf when Governor Hughes put through his anti-racing laws in 1908 and 1910, and Mr. Haggin, realizing that it would be impossible to market in this country the produce of a stud so considerable, without racing about New York to maintain the demand for young stock, began to ship his thoroughbreds to other countries. He sent his yearlings to England and France for seven seasons, stallions and mares to the Argentine Republic and mares to France, England and Germany. The Argentine secured the famous stallions Kinley Mack, winner of the Brooklyn and Suburban Handicaps of 1900; Africander, the greatest three-year-old of his time; McChesney, Gerolstein, First Water, Reliable, Dieudonne and two or three others, while England, France and the central empires of Europe got some of their best producing mares from Elmendorf.

But while they were cutting the thoroughbred stud at Elmendorf down to sizable proportions, Mr. Haggin and his advisers, John Mackey and Charley H. Berryman, were careful to reserve the stoutest stock against a time when it would be worth while to breed great race horses again in this country. And it is this selected stock that will go under the hammer in October. Mr. Haggin bought Ballot three years ago when it became evident that sanity had resumed her sway in the Empire State to take the place of Watercress and Goldfinch, and Sain to take the place of Waterboy, Watercress having succumbed to the infirmities of age after a career of exceptional brilliancy and Waterboy having died suddenly after giving promise of quality as a breeder that made him worthy to succeed his sire.

To obtain Ballot Mr. Haggin had to put up the biggest price given for an American thoroughbred stallion since Louis Winans paid $75,000 for Sir Martin in 1908. But he got the greatest of the sons of Voter and a better horse than Voter was himself. For Ballot won eighteen races with a total of $154,602 in the course of his four years' experience as a race horse in this country and in Great Britain, the Great Republic, Advance, Equality and Century Stakes (the last named race twice), and the Suburban Handicap among them. He covered a mile and five-sixteenths in 2:09 3-5 when he won the Advance at Sheepshead Bay in 1908, and a mile and a half in 2:30 3-5 on the occasion of his second victory in the Century. Ballot has already had some stud success although nothing by him has come to the races from Elmendorf. His three two-year-olds of 1914—Capra, Militant and Trust Me—are all winners, Capra being one of the smartest three-year-old fillies of the current season.

Sain is famous as the sire of Jack Atkin, Nealon and Guy Fisher, and Hessian is a young son of Watercress out of Colonial, a daughter of the line of the Australian Musket from which Carbine and Spearmint sprung. Among the sixty-eight broodmares that will have new homes after the sale of the 28th of October are Colonial, the dam of Hessian; Gold, sister of Golden Maxim and dam of Rhine Maiden; Gracilla, sister to De Mund; Graziosa, dam of Ella Bryson; Hamburg Belle, Futurity winner of 1903; Tradition, the smartest filly after Artful of 1904; Lina Holladay; Mrs. Delaney, dam of Right Royal; Sweet Lavender, herself a first rate race mare and the dam of Rancher; and Captivity, dam of Double Eagle. Also there is Clara J., a full sister to Waterboy.

These and the other mares to be sold were bred last spring to Sain, Ballot, Uncle, Hessian and The Manager, the last named being the best Voter barring Ballot that has come to the races. The weanlings are sons and daughters of Ballot, The Manager, Sain, Uncle and Hessian. No yearlings will be offered. The last of the Haggin yearlings were sold this summer and with them the handsome two-year-old Watercress II., which Mr. Haggin, with an optimism that scorned the burden of ninety years, had bought in at his yearling sale of 1914 to race under his silks and ultimately return to Elmendorf for stud duty. For Watercress II. was a son of the original Watercress, his most successful English horse, and Pearl V., she a daughter of his beloved Salvator and his equally beloved Firenze.

James Ben Ali Haggin was best known to the living generation of horse lovers as a great breeder. His colors have not been as prominent in the last fifteen or twenty years as have those of his contemporaries August Belmont, the late James R. Keene, Harry Payne Whitney and the late General Stephen Sanford. But horse folk, who go back twenty-five or thirty years, remember him as the owner of Tyrant, winner of the Withers Stake at old Jerome Park in 1885; of Ben Ali, winner of the Kentucky Derby of 1886; of Hidalgo, one of the three heroes of the first Brooklyn Handicap which was run in 1887; and of Salvator and Firenze, the first-named having defeated the famous swayback Tenny in the Suburban Handicap of 1890, and later on in a match race that grew out of a dispute as to the reliability of the Suburban as a test of the merits of these two horses.

Ben Ali, the horse, was named for a son who, if he had survived his venerable father, would undoubtedly have elected to keep the Elmendorf Stud intact. The last great horses that bore Mr. Haggin's silks on American tracks were Watercolor, the black whirlwind of Commando and The Parade's time, and Waterboy, champion handicap horse of 1903, in which year he won the Suburban Renewal, Brighton and Saratago Handicaps and the Century Stakes.

Wtercolor is now the property of the Breeding Bureau of New York, Mr. Haggin having presented him to that institution seven or eight years ago to help improve the breed of horses in the Empire State. Waterboy he kept for service at Elmendorf and the big brown horse demonstrated that he was worthy to take the place of Watercress by getting Bonnie Kelso, Waterbass and Waterblossom in the first few seasons of his stud service.—Thoroughbred Record.

HORSE STILL ATTRACTS ATTENTION.

Up Grand avenue at sundown last night came the sharp, quick patter of a thinly shod horse. Here he came, tugging at the bit, his black and white spotted neck bowed like that of a chiseled chessman. He pranced, rather than trotted. He had what horsemen call style. And the girl in the neat runabout looked out over his back proudly.

Down Grand avenue came the steady, clear, powerful chug of a six-cylinder motor car, its pennants flying.

The girl at the lines seemed not to see the motor party, but the driver of the car shoved on the brake and the big car squeaked and stopped. As the patter of the stylish horse with the spotted neck was lost in the noise of traffic the occupants of the motor car turned in their seats and gazed admiringly—not at the girl, attractive though she was—but at the horse.

The commonplace of yesterday had become the novelty of today, and vice versa.—Kansas City Star.

Drink Jackson's Napa Soda.

HAMLINE MINNESOTA.

Time—2:13½, 2:16¾.

Joe Jones and Fred Ward got away with almost half of the program at Loveland, Colorado. Waynetta and Leata J. met again and the Stockton mare cut the state pacing record for halfmile tracks to 2:09½. She hasn't anything on the Denver mare at that, as the latter cut the fraction a little deeper in a subsequent performance.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

THE RUBAIYAT OF OMAR THE HUNTER.

When old Boreas opes his frosty gate
And tender flow'rets mourn their sorry fate;
When Autumn shivers 'mid the swirling leaves,
Ah! then 'tis time to take your whisky straight.

Avaunt! thou poet, with thy jug of wine,
Thy loaf of bread grown stale and song of vine;
A tent, a pot of coffee on the fire,
Some bacon and a flap-jack, please, for mine.

What of this piping, of the potter's clay?
No flagon for my bones when through, I pray;
Rather into clay pipes please model me
And warm me up some dozen times a day.

And why these questions of the now and then?
Why hash thy troubles o'er and o'er again?
Come, poet, get thy gun and don thy boots—
A rifle is far mightier than the pen.

Place in thy hunting coat thy flask of rye;
A jolt or two and soon thou shalt espy
The joy of living, gamboling 'neath the trees,
Nor wilt thou ask the wherefore nor the why.

Thy friendly pipe hold close between thy teeth,
Joy lingers in each puff and snowy wreath,
Save when the mixture is too vile a brand,
Grown mayhaps on the Duke of Durham's heath.

Oh, poet, let us find thy wilderness
Where game is plenty, and there is no press
Of many Nimrods; there we'll find the bliss
Of hungry hunters o'er a bounteous mess.

When the bright firelight gleams on ghostly trees,
And howls of night things all thy slumbers tease,
Content thyself, and smoke thy evening pipe,
And pass the flask, and let thy conscience ease.

—Thomas Maitland Marshall.

GUANACO HUNTING IN ARGENTINA.

In South America the guanaco, or wild llama, either roams in large herds over the pampas of Patagonia, or in lesser numbers on the numerous ranges of mountains which lie in the northwest of the Argentine, forming part of the immense dividing range of Las Cordilleras between the Argentine and Chili. One of these ranges separates the province of Tucuman from Catamarca, and is known as the Aconquija branch, the highest peak of which has an altitude of 18,600 feet, and it was round this peak the shooting trip described below took place.

On Sunday, December 21, my friend arrived from Buenos Aires at midday. The afternoon was spent in strenuous packing, as we hoped to make an early start on Monday. The choice of suitable clothing to take is always a difficulty, space being limited, and although we should probably have it very hot for the first two days, later, upon reaching the shooting ground at the height of 14,000 feet or 15,000 feet, the nights become very cold; also, December is a treacherous month for storms, especially in the mountains. Monday morning found us early astir, but our idea of an early start was soon knocked on the head, as it commenced to rain soon after 6 a. m. and rained hard, as it generally does in Tucuman; however, at midday it began to clear and we packed our mules. The first day's packing is a tedious affair, as all the pack saddles have to be arranged to suit the mules; we were taking three men with us and five pack mules, so it was quite an imposing cavalcade. Two of the mules carried our four "petacas," which are strong rawhide trunks, and the only things to stand the rough going which all the packs get on a trip like this; two more carried the tents and various small parcels, while the fifth was taken loose as a spare one, in case one should get lost or sick. We hoped that this mule would return loaded with skins. With the pack went the bell mare, without which the catching in the mornings and securing at nights generally causes a lot of trouble, besides the risk of being in the mountains with nothing better than your feet to get about on, the mules being quite capable of clearing out for home any night the fancy takes them. The first afternoon was only a short journey of about twelve and one-half miles, partly to allow the packs to shake down, and also for our own comfort, as the first day's ride on a mule is not at all the pleasantest thing in life.

On Tuesday morning we were off early, the pack being fixed much quicker than the first time; still, the outlook was not encouraging, as the mountains were completely hidden by clouds, and the local prophets are not noted for their optimism. Our road again was an easy one, as we followed the national road to Catamarca till midday, when we left it and struck down through the woods to a "puesto," where we were to spend the night. A puesto house in this case was a roof supported on four uprights, with no sides at all. Soon after we arrived it started to rain, and continued all night. The roof had certainly seen better days and was far from waterproof, so that we spent the greater part of the time till daybreak moving our camp beds trying to escape the drippings, which seemed to be uncannily clever in always dropping on our noses. Next morning it was still raining hard and a start was anything but cheerful, but we hoped to leave the rain behind us, as all day was a steady climb up to our first real camp, where the guanaco are, at a height of 14,000 feet. The traveling through the wet forest all the morning was a dismal affair, although my partner shot a "guan," which made excellent eating. The day wore on, and as we left the trees behind us and came out upon the bare mountain side (about 10,000 feet) our hopes of a fine afternoon, which had steadily been dwindling, vanished altogether, as the higher we went the heavier the rain came on; and it did not cheer us when one of the mules with the petacas fell, and rolled down the mountain side, luckily being brought up by a small hollow before falling very far. After lunch the clouds cleared a moment and we saw a fine buck standing out on a pinnacle of rocks, but had no time for a shot before the clouds came down again; and although we waited in the hopes of it clearing, we had to resume our journey without seeing him again, as we were already late owing to the delay of the mule falling and our slow progress on account of the thick mist and rain. At 4 p. m. it began to hail, and when we arrived at our camping place we had to pitch our tent and light a fire in a steady fall of snow. For firewood, we used a dead and dried-up cactus plant, which is the only thing except small plants that grows so high up. Here we had Christmas Eve in all the correct setting, snow and bitter cold; but with, thank heaven! a flask of V. O. Poona or mountain sickness is common on this range, but luckily none of us were troubled much with it, except that running was out of the question, and careful aim also difficult to take, owing to one's heart knocking like a steam hammer. We woke up on Christmas morning in lovely weather and to a view which would be hard to beat anywhere; we were right amongst the mountains, and looking up the valleys, the sides of which were covered with snow, the effect being magnificent. During breakfast a male guanaco was standing on the top of a high ridge on our left looking down at us, and making that extraordinary sound, half neigh, half sarcastic laugh, which the sentinel of the troop always uses as his danger signal. After a consultation we decided that my partner should go up the valley, with one peon, and place himself on a little knoll covered with loose boulders, while the other peon and myself went back to get behind the ridge on which the guanaco was, and where the troop would be, to try and drive them across the valley. Riding down the valley we crossed the ridge below the guanaco, and started to work up the far side. As soon as they saw us the troop galloped off, five of them, but luckily for me the sentinel lagged behind, "haciendo burro" (literally, "making donkey," as the peons call it), neighing and continually turning round to look at us; as soon as he had crossed the ridge and was out of sight, we hurried on, and when near the top dismounted and walked to the edge. As we expected, he was still neighing and in no hurry to go away. The first shot at about three hundred yards was a miss, but my luck was in that morning, for instead of rushing away down hill, he started to gallop along the side, and so crossed us at about two hundred yards. The second shot took him fair in the neck, a deadly spot with guanaco, and he rolled over like a shot rabbit. After skinning him and cutting off the choicest bits of meat, we went down to where my partner was. The troop had passed him, but far off, and his shots had not brought any down. We joined forces and went higher up the valley, bagging one more male, which behaved in the same manner as the last, and so paid the penalty for his contempt. We arrived at the camp again just before another snowstorm came on, and had a Christmas dinner of fried guanaco's kidneys, and guanaco "asado"; the latter dish being steaks roasted on a stick turned over and over above the red ashes, and if tender are distinctly preferable, to my mind, to the terrible Christmas dinner which is the unfortunate sojourner's lot in the tropics.

Next morning we were hurriedly awakened by the peons, and rushed out to shoot at a troop of guanaco which were unconcernedly passing within 200 yards of the tent. We bagged two, and later on in the morning another two. On the following day we broke camp and moved higher up, to Campo Don Agusto, under the actual peak of Aconquija, my partner being very keen on climbing up to the top. I had been up once before, in the preceding February, but was quite ready to go again. On Sunday we gave our mules a rest, as we hoped on Monday to go up to the top, so riding some of the cargo mules instead we went separate ways, and after a long day I returned with four skins, to find my partner had just arrived, also with four. This was our most successful day.

That night a tropical thunderstorm was going on below us and the lightning playing about our feet, as it were, was a fine sight and one not easily forgotten. To our horror, in the morning all the world was white with snow. The peons always say that "the widow has come out for a walk," when it snows, the "widow" being the "patrona" of the mountains. Snow fell all the morning, but cleared off somewhat in the afternoon, although it stayed very cold. To attempt to climb Aconquija was impossible so soon after the snow, so we spent Tuesday shooting again. In the evening I had an extraordinary stroke of luck; when about dark, coming back to camp, I saw a troop of five guanaco in a bunch watching us, and hoping by a shot to send them over the hill to where my partner was, I let drive, and, to my surprise and the peon's delight, dropped a guanaco dead, out of the middle of the troop. It was a great fluke, as I had even to polish my foresight before I could see it against the guanaco, and the shot was a long one to take even in daytime.

On New Year's Day we broke camp again and went down to La Paiqua, where there are generally a few deer to be found. These are getting less in number every year; they live lower down than the guanaco, and the people are able to get them more easily, chasing them with dogs and shooting at them with any old gun they possess. We reached La Paiqua at midday, but could do hardly any stalking in the afternoon as a heavy thunderstorm came on early. It snowed higher up, although we only had hail, and we were glad we had come down in time, as our camp of the night before was evidently in the thick of the storm. The next day, riding from 8 a. m., we arrived at the bridge on the national road over the Rio Cuchurs at 8:30 p. m., where we spent the night. Once again we had the doubtful pleasure of mosquitoes, after having escaped this pest for nearly a fortnight. On Saturday morning we made a late start, but were home by the afternoon.

On fact in connection with the trip which remains in my memory is the numbers of condors which we saw. These huge birds seldom appear until a guanaco is shot, when they can be seen soaring high up in the air, and not alighting until the carcass is left. I have seen as many as six feeding at the same time on a dead guanaco. A spread of wing of ten feet is not uncommon for these birds, and they never seem to move their wings while flying.

IN THE COUNTRY OF THE BIG BEAR.

The Pacific Coast country between the north of Vancouver Island and Alaska is essentially a bear country. Everywhere the hills and valleys are wooded except here and there where the rocks are so bare that not even a cedar or hemlock can take root. Sometimes, especially of late years, the carelessness of a white camper has started a fire which has burned both the trees and the thin layer of soil which filled the crevices and provided the necessary nourishment for them, thus leaving the mountain an immense bare rock.

There are plenty of deer in the woods as well as bear, but nobody thinks of going that far to shoot deer. There are plenty of blacktails anywhere along the coast. On Vancouver Island, even within a few miles of the city of Victoria, deer were up to a few years ago so plentiful that any hunter who could shoot and who had any knowledge of woodcraft could bring home one hundred pounds of venison after a short hunt. The deer are, however, considered useful to provide food for the bear hunter, miner, or trapper during the winter season when other kinds of food are scarce.

It is customary when going into that country to try for a grizzly, to engage one or two Indians to pole up the rivers. They charge all sorts of prices for this service, for the Indian is never a cheap man, always wanting the highest price that is going. When they think they can get it they charge five dollars a day each and seventy-five cents a day for the canoe. Besides they will ask five dollars apiece for every black or brown bear killed and ten dollars for each grizzly. It is not usually necessary to pay anything like that much, though. Some Indians will do the same work for half the price rather than miss the job, and even then they are well paid.

The better way, perhaps, is to engage a white trapper if one can be secured. The white man is more sociable, understands the habits of the big game just as well, often better, but he can not use a pole like the Indian when going up a river against a swift current.

At one time in a newspaper article I advised hunting bear in the autumn; I was soon told by many who professed to know that the spring was the best season for the sport, as the pelts are better then and the bears are easier to kill. The pelts are certainly more woolly and the hair longer in the spring, and at that time of the year the bear are out on the slides just below the snow line; but in the autumn, about the end of October, the hides are pretty good and the bears may then be shot from a canoe as they are feeding on the salmon that have gone up the streams to spawn and died there. That is the only way in which an Indian will tackle a grizzly. He is afraid to go very near him on land.

Grizzlies are very plentiful everywhere, but their pelts are not anything like as good as those of the interior. They are very large and have fine heads but the rugs are not thick. There are also a few of the inland white bears (Ursus kermodei) but curiously enough they are usually found on the small islands along the coast. In 1907 one was found on Gribble Island and the skin is now in the possession of Mr. Francis Kermode, curator of the Victoria museum. This bear is rather smaller than the black bear and of a creamy white color. There are four specimens mounted in the Victoria museum.

An illustration of the kind of story one hears in traveling along the coasts is that of a young Englishman who had been some time in the country and was a pretty good shot, but who so far had failed to kill one of the big grizzlies. He wanted to take a pelt home with him to show the people back there the kind of game that is found in that region. He was working, or supposed to be working, in a lumber camp. None of his fellows would leave their work to go with him on the morning in question, so he shouldered his "thirty-thirty" and climbed the mountain back of the camp. When near the top he came out on to a swamp, and there right in front of him were siz big grazzlies, enough surely for one hunt.

Six grizzlies to one man seemed hardly a fair contest, but he had come out for bear and here they were. It would be poor sportsmanship to return home to camp without so much as a shot. Steadying himself for a few minutes to get his nerves under control, he took steady aim and the first and biggest of the bunch fell dead with a bullet through his brain. The other five charged and now was the time the nerve was needed. One after another the big fellows were dropped and the last one fell when only five yards distant from the man.

He then went to his fellow workmen to help get the bears to camp. They would not believe his story until they saw the half dozen carcasses. Then they voted him a good fellow and the king of trumps.

It is customary every year during July and August for a large number of the Indian tribes to go away to Rivers Inlet or one of the other fishing grounds to fish and work in the canneries. At some of the villages they leave en masse and nothing is left but the dogs. These dogs have to look after themselves for the two months. They now and then catch a small animal or bird, enough to keep them alive, but they become very thin and emaciated. At a village that I visited one July at the mouth of the Kemano river, ten dogs came out to meet me. They were thin and hungry and gave every expression of delight at the approach of the boat. Evidently they had been out porcupine hunting, for one, a half-bred bull terrier, had his nose stuck full of quills. The poor creature would not let us pull them out so the only alternative was to put him out of his misery. He must have died anyway before the return of the Indians, so my companion brained him with a blow of the axe. Only one of the other dogs had quills in his nose and that one had but two. The brave terrier had killed the game and taken the punishment while the others shared the feast.

The only game birds that I saw up there were a few grouse, several varieties of ducks, and a few geese. Guillemots and grebes are very common in the water, especially the former. Overhead the bald eagle is very much in evidence. Sometimes he is seen perching in a lofty spruce or hemlock near the water's edge accompanied by his mate, or he is soaring in search of food. The nests are usually in the tops of tall and inaccessible trees close to the water. Sometimes two nests were seen close together, but one may have been an old one. There did not seem to be any ospreys up there so the eagles are compelled to catch their own food.

The commonest of all the small birds was the little northern wren which seemed to be everywhere. No matter if it was morning, noon, or night, we had never been ashore more than five minutes before we were greeted by this cheery little songster who with both head and tail erect poured forth with all his might the song of welcome. This wren seems to never tire of singing. Whether he sings all the time I cannot say, but he always sings when anyone is around. The other birds in evidence were the water ousels, Alaska yellow warblers, humming birds, a few crows, and the ever-present ravens that croaked around the camp mornings and evenings. Once, too, I saw a large pine grosbeak.

As one passes over the beaches in that part of the country there is no scrambling beneath the rocks by the noisy crabs. There seemed to be none of these creatures there and only once I noticed a starfish. Probably the water is too cold for them. There were plenty of barnacles below tide water, just as there are to the south.

The timber of the country is mostly cedar, hemlock, spruce, and a few firs, but the most striking plant to anyone who essays to find a new trail through the woods is the "devil's club." Both leaves and branches of this shrub are covered with prickles that pierce the skin and remain in the flesh. They do not feel very painful until the day after the battle. Then the poison has done its work and the person who has fought with them is glad to sit down and extract the thorns. It is not an uncommon thing when climbing through the woods to begin to slide down a hillside or into a creek. There is a bough within reach with which to save oneself. The first time the climber seizes the bough and then swears. On the next occasion he slides downward instead and takes his chances of breaking his neck. The latter is preferable to tackling a "devil's club."

Throughout all this country there is no spot that compares for picturesque scenery with Gardner's canal, an inlet which runs forty miles between snow-capped mountains yet is seldom more than two miles in width, often not more than half that distance. Cataracts and cascades vie with each other for beauty and grandeur. Some of them fall hundreds of feet from the foot of ghostly glaciers, while others rush between the rugged sides of deep canyons with the roar of thunder as irresistible as the coming of night. The time will come when tourists will visit this favored spot by the hundred. It will always be a wild place, for there is nothing there to attract the speculator, except perchance there be precious metal in the rocks. A thousand feet and more above the sea the goats browse on the mountain crags, safe because of the inaccessibility of their retreat.

The person who would really enjoy this country must leave the route of the steamers, and with a launch or sloop, and a guide who knows the country, take his time meandering among the inlets and rivers. Everywhere he will find something new and delightful. The mineral springs which abound (having an average temperature of 120 degrees), the scenery, the natives, the animal and bird life, all are delightful and novel to the city dweller of the south.

At the Traps

California Shooters' Averages.—Recent data given out from Pittsburg shows the averages for 1915 given below for a number of California shooters.

Mrs. Ada Schilling stands in second place nationally among women shooters. Her percentage of 87.18 is based on 2200 shots, while Mrs. L. G. Vogel of Detroit, who heads the list, shot but 1460 times, averaging 88.22. Hence the San Jose woman's score is based on a greater and more thorough trial. At that, there is only 1 per cent difference between the standing of the two. The next nearest competitor in the women's ranks has only 80.19.

O. N. Ford of San Jose tops the list for the State of California, including both professionals and amateurs. His average is 95.11.

Partial list for 1915:

O. N. Ford, San Jose, Cal.	95.11	2600—2473
H. Pfirrmann, Los Angeles	95.11	2600—2473
A. G. Flickinger, Vallejo	94.52	1450—1372
R. H. Bungay, Ocean Park	94.09	1150—1082
J. F. Couts, J., San Diego	94.06	1800—1693
Toney Prior, San Francisco	93.27	2200—2052
Dr. R. N. Fuller, Tulare	92.58	1200—1111
H. Ogelvie, Lindsay	92.04	2300—2117
J. Plaskett, Modesto	91.74	1150—1055
C. H. Nash, San Jose	91.62	1350—1237
B. H. Worthen, San Francisco	91.40	1000— 914
J. T. Downs, San Jose	90.50	1400—1267
H. Garrison, Modesto	90.50	1000— 905
J. F. Dodds, San Diego	90.26	2700—2437
T. Wilkes, San Francisco	89.68	1900—1704
A. Ervast, San Diego	89.33	1200—1072
George H. Anderson, San Jose	89.10	1000— 891
N. A. Howard, San Francisco	88.74	950— 843
W. J. Eilert, Fresno	87.76	1250—1097
A. G. Wilkes, San Francisco	87.64	1700—1490
H. Havens, Piedmont	87.00	1000— 870
C. Hagerman, Los Angeles	86.76	1110— 963
F. K. Burnham, Martinez	85.72	2080—1783
C. E. Groat, Los Angeles	84.56	1250—1057
H. R. Phinney, Berkeley	94.56	1250—1057

Women's averages (over 1000 shots):

Mrs. L. G. Vogel, Detroit, Mich.	88.22	1460—1288
Mrs. Ada Schilling, San Jose	87.18	2200—1918
Mrs. A. Harrison, Rochester, N. Y.	80.19	1080— 866

F. Willett, San Francisco	90.40	2000—1808
C. A. Haight, San Francisco	83.57	1450—1212

* * *

Golden Gaters Finish Season.—The Golden Gate Gun Club closed the regular club blue-rock season at the West Alameda trap ground last Sunday with the largest attendance of smokeless powder burners competing at any local club trap shoot this season; 12 squads were on the firing line during the day.

When the total scores were figured up for seven monthly shoots, the winners in the gold medal contests were:

Champion class—A. G. Wilkes first, Toney Prior second, Tom Wilkes third, A. G. Flickinger fourth.

First class—H. R. Phinney first, T. D. Riley second, W. H. Price third.

Second class—Frank Webster first, R. E. McGill second, G. W. Thomas third, P. Swenson fourth.

Third class—R. S. Avery first, C. A. Merrill second, L. Pickersgill third, Dr. E. Topham fourth.

Challenge trophy cup winners, champion class, Barney Worthen. First class, W. H. Price. Second class, R. E. McGill. Third class, C. A. Merrill.

Mrs. A. G. Wilkes won the Du Pont silver trophy for "greatest improvement during the season."

Barney Worthen's run of 81 won a "night sight" revolver put up by Fred Webster for the shooter scoring the longest run during the season.

Captain C. H. Knight's six quad team won the 10-bird event over Captain C. A. Haight's battalion. The score was 224 to 221. N. A. Howard of Oakland was high gun for the day, with a straight run of 50 birds.

During the afternoon Jack Fanning gave a demonstration of the clever work in throwing targets that can be done with a hand trap. This device can be used anywhere and will puzzle the most expert trap shot.

Daniel Donnelly of Chicago, a noted Middle West shot, was a visitor and shot through the club program.

The club program consisted of three events: 1—Medal shoot, 20 birds. 2—Challenge trophy race, 20 birds. 3—"grub' 'shoot, 10 birds per man. The 20 bird matches were shot in 10-bird sections:

Events—	1		2		3	Tt
N. A. Howard	10	10 20	10	10 20		10 50

Citrus Belt Notes.—Thirty-five trap shooters suffered themselves to be led into camp by J. D. Dierdoff in the first shoot of the Vernon Gun Club for the Stanton A. Bruner trophy. Mr. Dierdoff, who hails from Texas, had the proper dope on the clays and broke a total of 48 out of 50, which gave him first place. A. N. Van Nest and the veteran Charlie Hagerman hung up 47 each and copped second place, seven other shooters tied for third with 46 apiece.

The Los Angeles shooters are taking hold of the new club in fine style and a field of thirty entries is sure on the Sunday club days. Tomorrow the second leg on the trophy will be shot. The handicap will again be on the added bird plan. To shoot for the cup will now call for a 50-cent entrance. This entrance will be divided by giving the present holder, Mr. Dierdoff, 50 per cent, and the balance given 30 per cent and 20 per cent to the high guns. This added bird system makes it so that a D class shooter has an equal chance with the Class A man. The scores in the trophy event at 50 birds follow:

Dr. L. M. Packard 46, William Pugh 46, Harry Hoyt 41, George Oliver 42, R. L. Hall 46, R. Bowers 43, F. Socin 43, R. L. Caldwell 44, S. A. Bruner 44, Jessen 46, B. A. French 44, J. D. Dierdoff 48, W. Wilshire 46, George Melford 46, C. E. Groat 46, Hill 45, C. D. Hagerman 47, George Cline 45, A. W. Bruner 43.

Practice scores: Packard shot at 25, broke 22; Pugh 50—38, Hoyt 50—42, Oliver 50—38, Hall 100—78, Davis 50—28, Huntoon 50—19, Edminson 50—22, Van Nest 75—59, Jones 50—35, French 25—19, Delabar 50—14, Groat 100—87, Hagerman 25—25, Cline 25—18, Marsch 25—11, Frank 50—23, Bruner 50—17, Bowers 50—17, Socin 25—10, Caldwell 50—25, Elders 50—30, Munger 25—15, S. A. Bruner 125—107, Jessen 25—11, Brown 50—37, Dierdoff 50—43, Perk 50—26, Melford 100—88, Hill 75—64, Black 25—17, Trout 25—23, Kimble 25—16.

* * *

Beginners' Shoot.—The Golden Gate Gun Club will hold a "Beginners' Day" shoot at the club grounds, West Alameda, Sunday, October 3.

The Du Pont Powder Company offers for this occasion a bronze watch fob for the gentleman making the highest score in the contest at 25 targets. Only those who have never shot at bluerocks will be eligible to compete for the trophy.

A special Du Pont trophy event will be scheduled for ladies only, in which those who have previously shot at targets will be handicapped against the beginners.

Entries for both events received between 10 a. m. and 2 p. m.

* * *

The Topps Are Coming.—On October 24, Mr. and Mrs. Ed Topperwein will be at the San Jose Blue Rock Club to give shooting exhibitions with shotgun, rifle and revolver. Mrs. Topperwein is the world's greatest woman professional shooter. Her record is above that of the best of the men shooters in this State. She has made a record of 96.10 per cent out of 1540 shots.

Turkey Shoot.—The Exposition City Gun Club invites trap shooters to the Easton grounds, in San Mateo county, tomorrow. The attraction will be one turkey for every five entries. There will be five 20-bird events shot. The entrance will be $1.00, targets included. The shoot starts at 10:30 a. m.

* * *

A Century Run.—"Cap." W. A. Simonton recently ran 100 straight on the Wilmington grounds of the Du Pont Trapshooting Club. He tied with Alden B. Richardson and J. B. McHugh in a 25 bird event. Simonton and Richardson tied in the shoot-off. Cap. won out in the next tie, 25 to 24, and then ran off another 25 straight.

* * *

Big Chief Coming.—Tom Marshall, known far and wide as the Big Chief of the trap shooting tribes, is due here about October 1, after attending the Medford shoot on the 24th inst. Needless to say the local talent will give him a royal welcome.

GOSSIP FOR SPORTSMEN.

Although the deer hunting season in game districts No. 2 and No. 3 is now closed, there is ample opportunity to bag fat bucks in game districts No. 1 and No. 23. The open territory covers a wide range, embracing the best deer country in the State—Humboldt, Trinity, Tehama, and the counties to the north; the Sierra and valley country east of the Sacramento and San Joaquin, down to the boundary lines of Kern and Inyo counties (with district No. 4 included until October 1.) There is a fly in the ointment, however. A hunter, nor anybody else, can legally bring fresh venison into a closed district from open hunting ground. The State Fish and Game Commission officials will, however, issue a permit to retain the head and skin of a buck or two bucks in closed territory.

* * *

Trout anglers find conditions, here and there, for week-end trips fairly good. The big fish and limit creels require a long distance trip at this time of the season. Truckee river fishing, so far this month, has averaged fairly good for the fly fisherman. With cooler weather coming on it is expected that fly fishing will improve.

Up the coast, near Crescent City, Redwood creek, Big lagoon and Stone lagoon are well worth the attention of any angler going that way.

A recent trip through the northern part of this State and Oregon is described here by Sam Wells and will no doubt be read with interest by anglers who contemplate an extended trip to regions where trout are plentiful and scenic conditions beautiful:

"I will briefly give you a few items descriptive of my recent trip through the California and Oregon country. I submit the following:

Graham Ridley and myself left San Francisco in my machine, which was fully equipped for a general fishing and camping trip. Our first stop was at the headwaters of the North Fork of the Feather river in the Big Meadow country, where we spent two days at Gould's and Warner creek. We caught many trout at both places up to two pounds weight. From there we went north to the headwaters of the Fall river, making camp at the extreme headwaters where the fish were very numerous—in fact, in the evening the water was simply alive with trout of all sizes, up to 2½ pounds.

We had the pleasure of catching many of them, just retaining enough for our own use, and letting the others go. We then started for the Williamson river, passing large lakes on the way, which we reached in a one-day trip. We made camp on the banks of the Williamson, back of Goldie's, Mr. Silver's daughter, making this our headquarters and using the machine to visit Crooked river and Wood river in the Klamath Agency. Crooked river produced some elegant trout which we found much gamier than those in the Williamson, more like those in Spring creek.

After a trip to Crater lake we journeyed to Crescent, Ore., on the east side of the Cascades and 18 miles from there we found two beautiful lakes, Odell and Crescent. I would advise anybody visiting this locality not to overlook Lake Odell; it is a beautiful body of water and is full of the most gamy rainbows. They rise beautifully to a floating fly. Crescent lake is about four miles from Odell lake, which is the headwaters of the Des Chutes river.

We also had some nice dove shooting in the northern part of the State.

From Odell lake to Ben'd Or, and then over the McKenzie pass, by the Three Sisters (names of mountains), we reached the McKenzie river and fished from the McKenzie Bridge, near by Eugene. The fish here are known as red-sides, but they are no doubt the same trout as our California rainbow, the rainbow stripe being more pronounced than on trout in our waters.

We found the flies that had been recommended for that country would take trout, but after studying conditions the floating fly of other patterns would kill two to one. The trout here are good scrappers but very wary and require a very light cast. We were very much pleased with our stay here, having good sport.

Then we motored down the west side of the mountains to Medford, and then east to Trail on the Rogue river. We were a little early here, but in our four days' trip we caught some nice steelhead, the largest I landed weighed 9 pounds, caught on a No. 8 fly. She was a beauty, leaving the water eleven times. I had the pleasure of landing her on a 4 13-16 oz. rod and 9-foot tapered leader. We returned all of our fish to the river as we had been living on trout for days.

After four days of great sport we left the Rogue and motored over the Siskiyous to Yreka and fished Scott river, Weaverville and Fortuna, trying out the Eel, which was not ripe at this time, and we concluded to come back home after one of the most delightful angling trips a devotee of rod sport could make. Our fishing was done with a fly exclusively and I picked up many pointers for the angling fraternity who may contemplate a trip to any of the above splendid trout streams. I fished many other small streams and lakes with more or less success, we being in a position with our sleeping bags and fine commissary to stop anywhere."

Fish and Game Commission officials have recently prospected over Sonoma trout streams, with the end in view of establishing a hatchery in the county.

The upper waters of Paper Mill creek have not been fished out yet, for Harry Gosliner whipped out a fine lot of trout from the Lagunitas down to San Geronimo recently.

San Gregorio lagoon, down the San Mateo shore, is still in fishable shape. Some good catches were made during the past week of trout seven to ten inches in size. A delegation of the California Anglers' Association last Sunday tried that water.

Near Johnsville, in Plumas county, several mountain lakes are ripe for the fly fisherman just now, according to glowing reports given out by H. C. Peet, George Klarmann and Arthur Lathrop, who returned from a ten days' outing in that region. Fishing in Grass, Jamieson, Eureka, Rock and Wade lakes is now "at its height." Near Magee's camp is Salmon lake, where the sport is good. In Deer lake, nearby, rainbow trout from a pound to two and one-half pounds in weight are ready for the angler.

Reports from the Big Meadows fishing sections are that splendid sport can now be had. On the Feather river, near Big Bar, good fishing is now available.

* * *

Black bass fishing in Middle river, near the Santa Fe railroad crossing, has been fairly good. Bob Murdoch and L. Bemis landed eight large-sized bass a week ago. Ed. Schultz, Jack Karney, H. Ootman and other local anglers made fair catches last Sunday.

* * *

Good catches of salmon have been taken for the past week outside the heads by the trolling launches. A number of salmon have also been caught in Raccoon strait, and off California City.

Possibly the most unusual catch ever made outside was when Jack Duckell hooked two salmon on one spoon. The spoon used was a No. 6 K-S rigged with two hooks—ice tongs, as the fishermen call them. One fish was a thirty-pounder, the other a bit over twenty pounds in weight. Just how such an odd capture occurred—one contrary to all salmon angling precedent—is a puzzle not yet solved. True it is that with such a rig a fish caught on one hook, the other slamming about could easily take care of another fish. Both fish were landed, however. At one time on the same trip the party had three salmon hooked at the same time. Then there was some manoeuvering to avoid fouling the lines. On another trip Martin King caught his first salmon, a forty-pounder.

Harry Kelley's forty-pound salmon was taken in Raccoon straits last Saturday and played for an hour before taken inboard. The fish had been hooked through an eye and consequently was not disabled enough to prevent a hard fight before giving up. Dr. Washington Dodge's trip in the straits was rewarded with three fish averaging thirty pounds in weight, a pleasing experience for an initial try at salmon in the bay. Dr. Redmond Payne's Wednesday catch was a forty-two-pound quinnat. Al Wilson landed five one day, one over forty pounds in weight.

Although salmon can be taken all the year round with hook and line, or spear, the netting season is now closed from September 25 until November 14. The daily limit during this period is three fish.

Maternal Instinct.—A remarkable instance of maternal affection on the part of a dog comes from Beaumont, in the province of Saone et Loire. One day the dog's owner went out of the town into the forest to gather firewood. He took with him his dog, which he left to guard his coat and basket of food while he gathered wood. When he came back some time later he found that the dog had given birth to three puppies, and when he started home he forgot to place the puppies in the cart with the dam. During the night the dog jumped over a fence, and ran the whole distance, some ten miles, to the spot where her puppies had been left, and brought one back in her mouth. Then she made two more journeys to the spot in order to bring back the other two. Altogether she covered a distance of about 60 miles in a night, and in her weakened condition it killed her.

FIXTURES.

Registered Tournaments—Pacific States and Territories:

September 24—Medford Gun Club, Dr. E. R. Seely, President, Medford, Ore.

September 27—Portland Gun Club, J. A. Addleman, Secretary, Portland, Oregon.

October 4, 5—Roswell Gun Club, E. P. Malone, Secretary, Roswell, New Mexico.

November 2—Williams Gun Club, F. E. Lowe, Secretary, Williams, Ariz.

SAN FRANCISCO FLY-CASTING CLUB.

Walter D. Mansfield was in grand form last Sunday when he tied the world's record in the salmon fly distance cast, 162 feet, which distance was cast by Fred N. Peet of Chicago recently at the international casting contests. He also cracked the light tackle distance fly record of 116 feet made by Harry Golcher at the recent tournament, when he put out his line and leader 121 feet.

The scores in both light tackle and salmon fly casting, for both Saturday and Sunday, show excellent averages. E. A. Rogers is a contending candidate for record honors; he was close up with 154 with the salmon tackle, just a bit less than his previous score of 157 feet.

Some good scores were made in the "in and out" event, viz: Webster 24 points, Burgin 6, 5, 1; Davis 6, 1; Thomsen 2, 2; Forbes 1; Gardner 1; Mansfield 1; Springer 3.

The results in the tables following are: Event 1—Light tackle accuracy percentage. Event 2—Dry fly accuracy percentage. Event 3—¼ ounce lure accuracy percentage. Event 4—¼ ounce lure average distance. Event 5—¼ ounce lure slam cast. Event 6—Light tackle distance. Event 7—Salmon fly distance.

Saturday Contest No. 8. Stow lake, September 18, 1915. Wind, southwest. Weather, fair.

THE LATE JAMES L. MORTIMER.

James L. Mortimer, Dean of the Old Guard in the kennel world of America, passed away this week at his home in Hempstead, L. I. News of his demise will be sadly received by the Coast fanciers, for Jim Mortimer was personally known to and exceedingly popular with doggy circles of the Pacific Slope for the past two decades.

He attended the Toronto show, with Dr. Henry Jarrett, two weeks ago. He was not in the best of health when he started. Next morning he almost collapsed in the show and had to be given medical assistance at his hotel, where he stayed until Dr. Jarrett was through judging his classes. He returned to his home in charge of Dr. Jarrett and was in a very bad way. It was believed for a time that he would recover, but the final summons came this week.

As judge, show manager, show critic, and all round friend of the fancy his position for over thirty years has been most prominent. His last appearance in San Francisco was in Dreamland Rink three years ago at the Golden Gate Kennel Club show.

Rem-UMC Notes

The Memphis (Tenn.) Gun Club celebrated Labor Day by staging one of the most successful shoots of the season. Harry Bellinger, shooting a Remington pump gun and Arrow shells, was high gun, with a total of 94 birds, his nearest rivals being Geo. Schmidt and W. H. Joyner, who broke 92 and 90 respectively.

J. W. Loctell won the monthly trophy offered by the Sunset Hill Country Club, of St. Louis, Mo., with a score of 48x50, while Bart P. Williams at the same shoot won the season handicap trophy with 240x250 and the championship scratch trophy with 239x250. They both shot Remington pump guns and Nitro Club shells. J. W. Bell, also shooting the "Speed Shells," was high gun for the day, scoring 98x100.

The Westy Hogan amateur championship of 100 targets, held in connection with their ninth annual tournament, at Atlantic City, was won by Henry Powers, shooting Nitro club shells.

Drink Jackson's Napa Soda.

HOW TO GET MORE COLTS.

More productive mares should be the slogan of every farmer. Mares that do not produce colts are worth no more than geldings. The farmer who does not make every effort to have every mare on the farm produce a colt is not doing all that he can to make the horse side of the farm business pay. Mares properly handled are one of the most profitable kinds of animals to own on a farm. Their ability to reproduce their kind makes their worth double-fold. The worth of a good mare on a farm is sometimes almost incalculable. The writer's father owns a medium-sized draft mare that is twenty years old and she has produced a colt every year but three since she was three years old. Most of her colts were mules, several of which sold for $75 to$100 at weaning time. She has worked practically every day that any horse has worked on the farm, and she has never missed a meal. Her worth in dollars and cents can hardly be estimated. Mares of this sort mated to the right kind of stallions will return greater profit per dollar invested than any other kind of live stock. They must, however, be fed and worked with judgment to do so.

It is not always the mare's fault that she is not a regular producer. Mares like any other of our domestic animals must be in a healthy condition and bred at the proper time to a reasonably sure stallion or jack if the offspring is to be expected with any degree of regularity. Partial sterility of mares is probably more frequent than in any other class of farm animals. Much of this non-productivity can be traced to the negligence of the farmer. His ram and ewes usually run together during the breeding season. He turns his boar out with his sows. On the other hand he keeps his stallion, if he has one, in a dark stall and breeds his mares—in many instances—when he finds time to do so. If he has no stallion he takes his mares to a stallion many times when he can not work in the field or after a hard day's work. Stallioners will agree when I say that it is not an uncommon thing to see mares brought to the stallion wet with sweat because of a long, hard drive. Their owners want to breed them at once, and will then drive them back home and put them through a hard day's work in the fields. Such men wonder why they do not get colts and of course blame the stallion.

The mare owner, however, is not always to be blamed. Many a stallion is kept in a dark stall from one year's end to the other with perhaps a small dirty paddock as his only place for exercise. He is fed corn with timothy as a roughage. A feed like this in time would ruin a healthy work horse that gets plenty of exercise, and would do far worse to the stallion confined in a stall. Such practices are especially bad for draft stallions, as they are not inclined to take much exercise. Stallioners are beginning to get away from the old-time customs. They see that stallions which are sure foal-getters must have an abundance of exercise and must be fed less of fat-producing feeds.

A very good plan that has been followed by Shire and Clydesdale breeders in Britain for many years is now being used in this country with very favorable results. The stallion is traveled over a definite route each week, starting out Monday morning and returning Saturday evening. This provides plenty of exercise for the stallion and enables him to reach more mares. During the breeding season many farmers are so busy that they will not take the trouble to go several miles to a stallion, whereas they would be glad to breed their mares if the stallion came to their barnyard.

Without a doubt a very much larger percentage of colts would produced every year if mare owners would try their mares oftener. Some mares seem to require several services before they settle. Others will oftentimes catch with one service. It takes careful attention on the part of the mare owners during the breeding season to get results. A jack owner had stood a valuable jack for several years, and when the colts began to develop into good prospects he found that he could not accommodate all of the mares. He had been standing the jack at $10 for a colt to stand and suck, but he decided that he would take $6 cash at time of service. The mare owner could then run his own chance of getting a colt. Much to his surprise the owner of the jack got all the business that he could handle, and the following spring there were twice as many colts from that year's work as he has ever had before. This success was due to the fact that the mares were tried oftener and were better cared for during the period of pregnancy. The mare owners knew that they had paid for their colts and if they died the money was lost. If the service fee had not been due until the colt was able to stand and suck, the owners would not have been nearly as careful with their mares. The experience of this jack owner is good for thought and can be recommended to mare owner and stallioner alike.

The importance of breeding mares at the proper time cannot be overestimated. Springtime is the natural breeding season for mares and most of them will show signs when in heat at this time of the year. It is the late summer months when mares should be closely watched. They are not likely to show much sign of being in heat during the hot months. Here is where many farmers make a serious error. They will watch their mares carefully while they are putting in the crops and will then turn them out to pasture, without trying them again unless they see signs of the mares being in heat. Mares should be tried at least twice per week if one expects to get good results. I know that it is a good deal of trouble but it is the only safe method to follow.

Where a large band of mares is kept, it is a big job to catch every one and test her twice a week. For many this would be impracticable. It would also be almost impossible for the farmer who has no stallion of his own to take his mare several miles to a stallion to try her. It is also quite unsatisfactory to lead a stallion out into a lot where there are several mares and try to locate any that are in heat. Sometimes this works but many times it does not. Where there are several mares together those that are not in heat will want to fight and get away and usually the young timid mare will follow the others so that one is unable to tell which mares are in heat. A few men have been successful in turning the stallion out with the mares. Here one must be very careful, for if a stallion gets out on the public road or into another man's field and does any damage his owner will be held accountable. Well-fenced fields away from the road and from the neighbor's pasture should be selected. If there are any horses in the adjoining field trouble will almost invariably be the result. Although it is sometimes difficult, it is wise to select a field that has cornfields on at least three sides. A well known Percheron breeder who has been extremely successful getting his mares in foal keeps them close to the barn and tries them twice a week until July 1. Then he turns his stallion out with his mares until fall. He fastens a light log chain about seven or eight feet in length to one of the stallion's forefeet. This keeps the stallion from running and is better than a short chain which would whip the front legs severely and likely do serious damage. By shifting the log chain from one front foot to the other, it is claimed that the horse never suffers from any strains. It is much easier to keep a stallion content in his own pasture when he is handicapped in this manner. On the farm where this scheme was used, this man had seventeen purebred Percheron mares last season and this summer every one of these mares has a colt at her side but one and this mare's colt died. Such a record, however, is exceptional. The practice of turning out the stallion can not be generally recommended, but it is found very satisfactory in some instances.

The breeding of purebred horses and draft horses in particular has suffered from a good deal of criticism on account of non-productive mares. It is true that we have many non-productive purebred mares but there is no logical reason why a purebred mare should be less productive than a grade of the same size and temperament. Non-productivity can in many instances be traced to improper care. In the past people often looked upon a purebred mare as being an animal that should not be worked. Here many breeders have experienced a serious error in the breeding of purebred draft horses. The horse is a beast of burden created for active work. When it is no longer used for this purpose its reproductive organs are among the first to be affected. Mares that are not worked and are well fed soon become too fat and with an excess of flesh they are likely to be barren. Purebred draft mares judiciously worked and well fed are in a much healthier condition and will produce better foals than those that are let run idle. The breeder with a large band of mares oftentimes cannot work all of his mares and care for them properly. As a result he does not get as high a percentage of colts as he should. The farmer with only a few mares can give each one his individual attention and thereby make them more regular producers.

Some stallioners believe that the only way of getting barren mares in foal is to serve them twice a day while they are in heat. Of course one service is all that is necessary, but with two services per day, one is more likely to catch the mare at the proper time. This seems to be most essential in many cases.

The use of good brood mares makes for a more profitable agriculture. Their work pays for their yearly keep and their colts are largely profit. He who appreciates the importance of the right kind of a brood mare in a farming system and uses her wisely has a great opportunity at his command.—Breeder's Gazette.

A GREAT BROOD MARE.

Anna B., the daughter of John Burdine and Daisy by Col. Hambrick, becomes through the performance of The Eno (4) 2:08¼ at Detroit and Grand Rapids one of but five matrons to produce a trio of 2:10 trotters. This great matron's list now consists of the following:

1907—Dictator Todd, blk h (5) by Todd 2:14¾.....2:08¼ (Sire)

1911—The Eno, ch c (4) by The Native 2:10½.....2:08¼

1892—Dolly Bidwell, br m (10) by Inglewood 2:24..2:08½ (Dam of 4—1 sire of 11.)

1908—Dorothy Bidwell, blk f by Cochato (3) 2:11½..2:26¼

1901—Betty B. H., b f (3) by King Larue.....2:29 (Dam of Geo. Todd 2:07¾, etc.—1 sire.)

As the dam of five trotters, three with records better than 2:10; the grandam of six in 2:30, including George Todd 2:07¾, Senator Hale 2:10¼, etc., it proves conclusively that Anna B. is a matron extraordinary and one which has produced a family which is breeding on very successfully. The Eno (4) 2:08¼, her latest addition to the Select Circle, is indeed an exceptionally fast trotting colt, one which unquestionably should ultimately secure a record of 2:05 if his great speed possessions coul be properly utilized.

As a three-year-old, he raced quite successfully i the south and in consequence was purchased by C. Floyd, for his patron Mr. Wathan, a Louisville, Ky distiller, at a price reported as $3,500. Before com ing north this spring, he worked in 2:10 and in h first start—Cranwood Park—would in all probabilit have won but for the fact that he became uncon trollable following a break, and choked down. A Youngstown, O., he worked a heat in 2:11½, whic is indeed most commendable over a two-lap ring, an in another mile at the same point stepped a las quarter a shade better than :32, and the final eight in 15 seconds. In his initial Grand Circuit appea ance—The Tavern Steak—he led his large field ove to the half in 1:01¼, but when rounding the turn jumped and after running a short distance, fell, a at Cranwood. "He can trot a half in a minute, remarked Floyd to us after the heat, when we wer extending our sympathies, "and if I get him over hi fault of pulling so much when he makes a mistake he will win some races."

The Eno (4) 2:08¼ is a rather small individual i height, but long bodied, heavily muscled, carries lot of meat, and is the fastest big gaited horse fo his size we ever looked at. In view of the face tha Floyd's good money earner, Omar 2:05¼, is on th shelf, the many followers of the game are particularl anxious to see The Eno (4) 2:08¼ race satisfactoril as "Kaintuck" is a deserving member of the profes sion and his presence on the circuit tends to enliven matters considerably.—American Sportsman.

THOSE BABY PACERS AT INDIANAPOLIS.

The racing program at the Indiana State Fair las week was productive of several performances o more than ordinary note, the feature being the rac paced by the good Pittsburgh colt, General Todd, i the pacing division of the Western Horseman Stake which was raced off on Wednesday. In pacing th second heat in this event in 2:04¼, the youngste from the Smoky City set a new world's record fo three-year-old pacing colts. His two heats in 2:05½ and 2:04¼ were the two fastest heats ever paced by a three-year-old pacing colt, and the 2:04¼ mile is a new record for the stake, the former record of 2:06¼ being established by Maggie Winder in 1910.

Taking into consideration that the track, whic had been drenched by the heavy rain on Tuesday was not in condition for record breaking, the per formance of the young son of George Todd 2:07¾ was truly remarkable. Not only did the youngste show that he is sensationally fast, but he also proved that he is a race colt of the highest type. In the local filly, Miss Harris M., General Todd had a tough opponent, but he was able to meet her in an even break, and beat her at every stage of the game. The two raced out by themselves and the filly had every chance possible to show her real calibre, but she was unable to get her nose in front of the colt once that they were on their way.

General Todd is owned by Henry B. Rea, of Pittsburgh, and was driven by Guy Rea, son of the owner, who has given the colt all of his schooling and who piloted the youngster in a masterful manner here. Rea is one of the younger generation of drivers and has made good in the sulky right from the start. Last season he won nine straight races over the half-mile tracks with the good trotter, Junior Watts 2:11¼, and also did well with the other members of his stable. His only other start of the present season with General Todd was in the Matron Stake at Grand Rapids. In this event he won in straight heats, the time in each of the heats being 2:06. Miss Harris M. was the contender in this race also. General Todd starts in the Review and Kentucky futurities, and if the Columbus and Lexington tracks are in their best condition when the colt from Pittsburgh starts, I look for him to pace to a record of 2:03 or better.

Miss Harris M. paced a brilliant race and her defeat in the big race on Wednesday is no disgrace to the grand-looking young daughter of Peter the Great 2:07¼. She simply met a pacer that had more speed than she possessed and was unable to beat him. Each heat she tried every inch of the way and never stopped trying until the wire was reached. She was driven by the Terre Haute teamster, Everett Osborn, Lon McDonald being unable to get here from Hartford to do the piloting, and the young man from the city where Donn Roberts once reigned did an extremely neat piece of teaming. Miss Harris M. is owned by Eugene Mettler, of this city, and if she has no setback, will be ready to pace a mile in better than 2:04 at Columbus, where she makes her next start in The Review Futurity.

Arkancello, the General Watts colt trained by Fred Edman, made his initial bow on a mile track, when he went up against General Todd 2:04¼, and Miss Harris M. 2:07¼, in the pacing division of The Western Horseman Stake, and paced a wonderful race, in view of the fact that he had never known what it meant to go just once around. He was timed separately in 2 08 and 2:07¼, in the two heats won by General Todd, and I believe that he will be able to go a couple of trips around 2:06 at Lexington, where he starts in the Kentucky Futurity.—Western Horseman.

Again we remind you that entries at Phoenix close on October first.

THE FARM

ADVANTAGES IN HAVING COWS FRESHEN IN THE FALL.

In many sections most of the cows freshen in the spring. The more observing and careful dairymen, however, having found that winter dairying has many advantages, are breeding their cows to drop the calves in the fall. The following are some of the advantages of winter dairying:

First, higher prices are obtained for milk and cream. As the usual season for cows to freshen is the spring, milk has always been plentiful during the early summer and scarce and higher during the winter.

Second, milk and cream can be handled in cold weather with less danger of souring, so there is little loss on account of milk returned from the creamery.

Third, the amount of labor on the farm is better distributed throughout the year. If the cows freshen in the spring, they are in full flow of milk and need the best care when work in the fields is most pressing. On the other hand, if the cows calve in the fall and are milked during the winter, the farmer can give them close attention, has more time to study the problem of feeding, and can give his men employment all the year and in that way get better help.

Fourth, the lactation period is lengthened and the amount of milk given during the year increased. Cows that freshen in the spring milk heavily while grass is good, but as the pastures dry up the flow of milk falls off and with the approach of winter the cows are nearly dry. If they freshen in the fall, they should at once be started on a good winter ration, and when they have been milked six months it is time to turn them to pasture and for a time the flow of milk will be nearly as great as that from fresh cows. Recent investigations by experiment stations verify this observation.

Fifth, fall calves can be raised better than those born in the spring. Young calves should be fed on milk for several months, after which they must be weaned and fed on solid food. —Rural World.

The Chayote is sometimes called a vegetable pear and is a sub-tropical plant that seems certain to prove of much value over most of California. In nature and use it resembles a summer squash, but belongs to a different family. The vine is very vigorous and productive, and each "fruit" contains one large seed.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio

FARMERS' MONTH AT PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

October has been officially designated as "Farmers' Month" at the Panama-Pacific International Exposition, not only because, generally speaking, that is the month most suitable and convenient for farmers to visit the celebration of the completion of the Panama canal, but because during October there will be live stock shows held by the exposition at San Francisco that will be of peculiar interest and value to farmers.

These will be the shows of horses, mules, jacks and jennets, from September 30 to October 13, and of beef and dairy cattle, from October 18 to November 1. In these, picked pure-bred animals of all the recognized breeding classes will be on exhibition and will compete for cash prizes and trophies presented by the exposition, by a large number of breed record associations and by various state commissions to the exposition. In all, nearly $125,000 has been appropriated for the horse show and an approximately equal amount for the cattle show.

Of special interest in this connection is the opportunity offered by the exposition by reason of its geographic location for being a medium for reaching the new markets opened in South and Central America, the Orient and the Pacific islands, following the completion of the Panama canal and the consequent changing of trade routes.

Throughout the exposition period, there has been a continuous exhibition of agricultural instruments of many kinds, devices in great variety for the use of farmers, and improved methods of agriculture.

When entries closed on September 1, for the Horse Show, it was found that the applications were so numerous that the live stock accommodations of the exposition will be taxed to the utmost to provide for them. There will not be an empty stall.

During October, too, there will be a series of conventions at the exposition of special interest to farmers. Among them will be those of the California Draft Horse Breeds' Association, the American Association of Importers and Breeders of Belgian Draft Horses, the American Shire Horse Association, the California Conference of Boys' and Girls' Agricultural Clubs, the Ayrshire Breeders' Association, the American Galloway Breeders' Association, the the American Shorthorn Breeders' Association, the American Aberdeen Angus Association, the State Humane Association of California, the Red Polled Cattle Club, the Polled Durham Breeders' Association and the California Creamery Operators' Association.

All interested may attend these conventions and profit by the discussions.

UNDERGROUND WATER FOR IRRIGATION.

That the great deposits of rock waste underlying the deserts of Nevada constitute huge underground reservoirs in which are hidden large potential supplies of irrigation water is stated in a preliminary report by O. E. Meinzer, of the United States Geological Survey, on Big Smoky Valley—a typical desert valley of the Great Basin.

The demand for farm homes is so great, the reports states, that strenuous efforts will be made to utilize by irrigation every existing water supply, and the news of a single flowing well or the skillful advertisements of a promoter may at any time start a stream of home seekers, ignorant of the actual conditions and difficulties, into almost any of the desert valleys of the West. It is very desirable that the possibilities of these valleys should be thoroughly investigated before they are invaded by home seekers, for the ordinary settler is helpless when he confronts the unfamiliar and inherently difficult problems of irrigation with ground water.

As the ground water is hidden beneath the surface there is necessarily much uncertainty as to its ocurrence, and therefore corresponding caution should be observed in regard to ground water projects. Much can be determined as to the ground waters of desert valleys, however, even where no wells have been sunk, provided the proper observations are made and the proper criteria applied. It is generally possible to ascertain definitely where the ground water is near the surface, to outline the shallow-water areas, and to make an intelligent forecast of the depth to water in other parts of the valley. If sufficient observations are made it is also generally possible to form a rough estimate of the quantity of water that is annually available and to predict to some extent the capacity of wells, the quality of the water, and the cost of its recovery. To begin to develop the ground-water supply of a valley without first investigating its ground-water conditions is as unwise as it would be to start to build a railroad without first having the route surveyed, and the financial results are likely to be no less disastrous.

Even where a satisfactory supply of ground water is assured irrigation may be impracticable because of the high cost of recovering the water or the unfavorable climatic, soil, or market conditions. The problem of cost must be attacked from two principal directions: (1) Means must be devised for recovering the water at the least possible expense, and (2) crops must be found, methods of irrigation and cultivation devised, and markets developed which will result in the largest possible returns from each unit of water used. In many cases different crops and different methods of irrigation and cultivation will be required with ground-water than with surface-water supplies, and for this reason the ground-water investigations of the Geological Survey should be supplemented by correlative agricultural investigations by the experiment stations.

Conditions in Big Smoky Valley

The maps accompanying the report show that Big Smoky Valley, which is situated in the south-central part of the State, contains two areas of 30,000 and 100,000 acres, respectively, in which the water table is within 10 feet of the surface and in which water from the underground reservoir is discharged into the atmosphere by evaporation from soil and plants. It is estimated that in the larger of these areas the discharge of ground water averages between 50,000 and 100,000 acre-feet a year. The maps also show that the valley contains about 110,000 acres in which the depth to the water table is between 10 to 50 feet. Within the shallow-water areas the soil is generally alkaline, but it is estimated that there are about 65,000 acres of good soil in which the depth to water is less than 50 feet.

Pronounced differences were discovered in the water-bearing capacities, water levels, artesian prospects, quality of water, and feasibility of irrigation in different parts of the valley, all of which are briefly described in the preliminary report. There is also a discussion of the methods of drilling best adapted to the various conditions.

Conclusions as to Irrigation.

The conclusions as to irrigation with ground water are in part as follows:

Several tens of thousands of acre-feet of ground water is probably annually available for irrigation in Big Smoky Valley. The water is in general of satisfactory quality for irrigation, nearly all of the poor water being in the southwestern part of the lower valley, where there is practically no prospect for irrigation. A small part of the ground water supply can be recovered by means of flowing wells, but full use of the supply can be obtained only by pumping. In the areas in which the depth to the water table is less than 50 feet there is enough good soil to utilize all the ground water supply.

GRAIN SORGHUMS FOR FEEDING POULTRY.

The sorghum grains, especially the Blackhull kaffir, are excellently adapted for poultry feed, according to Farmers' Bulletin No. 686, Uses of Sorghum Grain, which will be issued shortly. In size these grains are small enough so that they are readily fed without any cracking or crushing.

An investigation made in 1908 showed more than 100 firms engaged in the manufacture of over 200 brands of poultry feed. Figures furnished at that time by 33 of these firms showed an annual output of about 30,000 tons of these products. Approximately one-third of this quantity, or 10,000 tons, consisted of the seed of Blackhull kaffir. This was used mostly in mixture with other grains, such as corn, wheat, screenings, etc. It probably is a safe estimate that kaffir or other grain-sorghum seed forms fully 25 per cent of the prepared poultry feed sold in this country.

There is a steady demand for these grains in the manufacture of poultry feed. When the crop in this country has been short, similar varieties have been imported from as far away as India and China. Such importations occurred four years ago as a result of the short crop of 1909. The poultry industry is steadily increasing in this country. It is probable that kaffir grain would form a still larger proportion of the total poultry feed manufactured if it were always available at satisfactory prices. This avenue for extending the use of these grains should not be neglected.

STOCK HOGS ON SEPTEMBER 1.

The estimated number of stock hogs in the United States on September 1 is about 107.2 per cent of the number on same date last year, that is, an increase of 7.2 per cent, according to reports made to the Bureau of Crop Estimates of the United States Department of 9griculture. The percentage numbers this year as compared with last year, September 1, in important States are: Pennsylvania 103, Virginia 105, North Carolina 104, Georgia 110, Ohio 104, Indiana 107, Illinois 107, Michigan 106, Wisconsin 103, Minnesota 108, Iowa 110, Missouri 104, North Dakota 115, South Dakota 110, Nebraska 110, Kansas 114, Kentucky 107, Tennessee 105, Alabama 108, Mississippi 105, Texas 110, Oklahoma 106, Arkansas 109, United States 107.2.

SAVE-THE-HORSE
(Trade Mark Registered)

HAS STOOD ALONE AND UNIQUE AMONG VETERINARY REMEDIES FOR OVER 19 YEARS.

Mr. Glen Owen, Wellington, Kansas, writes: My mare got caught in railroad and nearly pulled off her foot. Leg swelled twice its natural size. It was awful. I enclose picture to see if you can tell which leg it was. It is now two years, and she has never taken a lame step since Save-The-Horse got in its work.

No blistering or loss of hair. Horse works as usual.

$5. Every bottle sold with Signed Contract Bond to return money if remedy fails on Ringbone—Thoropin—SPAVIN—or ANY Shoulder, Knee, Ankle, Hoof or Tendon Disease.

Book, Sample Contract and Advice.

Address

TROY CHEMICAL CO., Binghamton, N. Y.

Druggists and dealers everywhere sell Save-The-Horse With Contract, or we send by Parcel Post or Express paid.

D. E. NEWELL, Agent, 80 Bayo Vista Ave., OAKLAND, CAL.

ABSORBINE STOPS LAMENESS

from a Bone Spavin, Ring Bone, Splint, Curb, Side Bone, or similar trouble and gets horse going sound. Does not blister or remove the hair and horse can be worked. Page 17 in pamphlet with each bottle tells how. $2.00 a bottle delivered.

Horse Book 9 K free.

ABSORBINE, JR., antiseptic liniment for mankind. Reduces Painful Swellings, Enlarged Glands, Goitre, Wens, Bruises, Varicose Veins, Varicosities, heals Old Sores. Allays Pain. Will tell you more if you write. $1 and $2 a bottle at dealers or delivered. Book "Evidence" free. Manufactured only by W. F. YOUNG, P. D. F., 54 Temple St., Springfield, Mass.

For sale by Langley & Michaels, San Francisco, Calif.; Woodward, Clark & Co., Portland, Ore.; Cal. Drug & Chem. Co., Brunswig Drug Co., Western Wholesale Drug Co., Los Angeles, Calif. ENTER ANY TIME — RECORD AFTER ENTRY NO BAR

TROTS		PACES	
1. 2:18 Trot	$1,000	6. 2:15 Pace	$1,000
2. 2:12 Trot	1,000	7. 2:10 Pace	1,000
3. 2:09 Trot	1,000	8. 2:07 Pace	1,000
4. 2:07 Trot	1,000	9. 2:04 Pace	1,000
5. F. F. A. Trot	1,000	10. F. F. A. Pace	1,000

CONDITIONS

1. Enter any time. Records after entry no bar. Ten to enter, four to start, or race may be called off.
   Entries close October 1st, 1915.
2. Three per cent to enter. Seven per cent from first money winners; 6% from second; 5% from third; 4% from fourth. Payments $15, at time of entry and $15 November 15th, 1915. No entry accepted until first payment is made.
3. One horse may enter in two classes and be held for but one entry fee unless two starts are made. Two horses may enter one class and be held for the entry of the horse that starts.
4. Three Heats. Combination Plan. Heat purses $300. Money divided at the end of each heat, 50, 25, 15 and 10%. Total purse $1,000. The extra $100 goes to the horse standing best in the summary at the end of the race. A horse winning the first two heats and being distanced or drawn in the third heat shall retain its place in the summary.
5. A horse distancing the field or any part thereof will be entitled to one money only. A distanced horse in any heat will be entitled to the money already won. There will be no more moneys than there are starters.
6. In determining the eligibility of horses to compete, only records made by winners of races shall be considered. Rules of the American Trotting Association shall govern all races.
7. Both the American Trotting Association and the National Trotting Association, in which we have membership, have ruled that under the above conditions only the horse that stands best in the final summary will "obtain a record," the other heat winners acquiring "a breeder's record" only.
8. Rights reserved to declare off any race that does not fill satisfactorily or change program if necessary. In case class in which horse is entered does not fill, entry will be transferred to another class in which horse is eligible, subject to the approval of the owner. Any race not finished on last day of the meeting may be declared ended and the money divided according to the summary.
9. Free stall rent given during the meet and first bedding is provided free of charge as a courtesy to our horsemen guests.
10. No place in the U. S. equals the Arizona State Fair Grounds as a winter training place. SUNSHINE EVERY DAY. No fog. No rainy season. Green feed. A-1 Stables, the best of tracks. Horsemen expecting to race at the fall meeting of the P.-P. I. E. at San Francisco cannot afford to overlook Phoenix on their way east.

"VACATION 1915"

THE GUIDE TO

Summer Outing Places

Tributary to the

Northwestern Pacific Railroad

Make your vacation plans beforehand by consulting its pages. Profuse illustration and reliable descriptive text afford an instructive and reliable guide to this inviting VACATIONLAND, lying in Marin, Sonoma, Mendocino, Lake and Humboldt counties. It contains a complete list of Hotels, Town and Rural Homes and Camp Resorts.

Copies of "VACATION" may be had free at 874 Market street (Flood building), Sausalito Ferry Ticket Office, or on application to J. J. GEARY, G. P. & F. A., 808 Phelan Bldg., San Francisco, Cal.

MODERN BREAKING

By W. A. BRUETTE

A revised edition of the latest Treatise on the Training of Setters and Pointers.

Price: Paper $1.00, Cloth $1.50. Sent Postpaid

THIS book enables anyone to do his own training and fully explains the methods employed by the most successful trainers in developing the setter and pointer. The important lessons are illustrated by photographs from life; nothing is left to guesswork. The entire subject is covered, from the selection, raising and development of puppies to the conditioning of dogs and their handling in the field. The amateur is told, in lucid language, how to make a dog a high-headed, stylish worker, stanch on his points, steady to shot and wing, and a prompt, tender retriever; all of this is accomplished by simple methods, some of them never before given to the public. The instructions for correcting the faults of bird dogs and keeping them up to their training are concise and easily understood. Every man who owns a bird dog or shoots in the field should read this book.

1915 WINRACE —and— ELIGIBILITY BOOK

The National Trotting Association Winrace and Eligibility Book for 1915 is now ready for delivery. It is a work of 858 pages, bound in cloth and contains official reports of all races and time record meetings held by members of the National and American Trotting Associations as well as copies of all special reports received by the two Associations, and all reports of non-association meetings which appeared in the columns of the turf and daily papers in 1914 as well as an index giving the starts made by each horse. In addition to this, it also contains an Eligibility List which presents the names of all live horses that acquired records or winraces in 1912, 1913 and 1914. When a winrace was made over a mile track it is designated by the letter (m) and if a horse also has a winrace over a half mile track within the four seconds limit fixed by the rule, it is also given and marked (½m).

Last year after the new eligibility rule was adopted, the National Trotting Association issued a Winrace and Eligibility Book, which covered 1912 and 1913. It assisted materially in the application of the new rule, but members and horse owners were frequently in doubt as to whether a horse was entitled to a time allowance. This resulted in a very voluminous correspondence and in order to obviate it in 1915, the present book has been compiled and issued as approved by the President under an order of the Board of Review.

In the matter of time allowance, a horse with a winrace is allowed one second for each year, if raced, in which he fails to equal or reduce his record or win a race, providing same is claimed by the nominator when making the entry. If a horse was not raced in 1914, he is not entitled to a time allowance and a reference to the index in this book will show whether he was raced or not, while by referring to the summaries, it can be determined whether he equaled or reduced his record or won a race. Also in order to give all the information possible, the reports of meetings contain all races at half mile heats as well as at mile.

This book presents reports of 1,400 meetings at which 12,673 horses started in 8,730 races and 939 performances against time, for which the premiums amounted to $3,228,617.82, while the Eligibility List presents the names of over 14,009 horses.

The 1915 Winrace and Eligibility Book will be sent postage prepaid to any address for $2.00 by

Third Edition Within One Year of Publication.

CARE AND TRAINING OF TROTTERS AND PACERS

NEVER before in the history of the publishing world has a horse book gone into a third edition within one year of publication. Yet the explanation is simple—the book fills a long-felt want. Never before has this subject been treated in a distinct manner. It has been handled in connection with autobiographies of trainers, but such works are out of print or out of date, for they were published 20 years or more ago. Conditions and methods have changed since then, and former treatises are just as much out of date as the high-wheel sulkies then in vogue.

"Care and Training of Trotters and Pacers" is as modern as a 42-centimeter gun. It does not contain the ideas of one man, but of 100 of the leading horsemen of the day, including Thomas W. Murphy, Walter R. Cox, and Edward F. Geers. These ideas were converted into book form by two prominent American turf journalists.

This book enables anyone to do his own caretaking and training until it is time to send the colt to a professional trainer, or the owner can train and race the colt himself. The treatise covers the details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented. Nothing is left to guess work. The language is lucid. Both theoretical and practical views are outlined and compared. The instructions are concise and easily understood. The work contains no advertisements—it is not a catch-penny publication that looks big in the advertisement but proves disappointing when received.

Many professional trainers have purchased the book and have found it interesting. Despite the war, over 300 copies have been sold in Europe and Australia.

Price $1.00 postpaid. Cloth, illustrated, 176 pages, 5x7 inches,

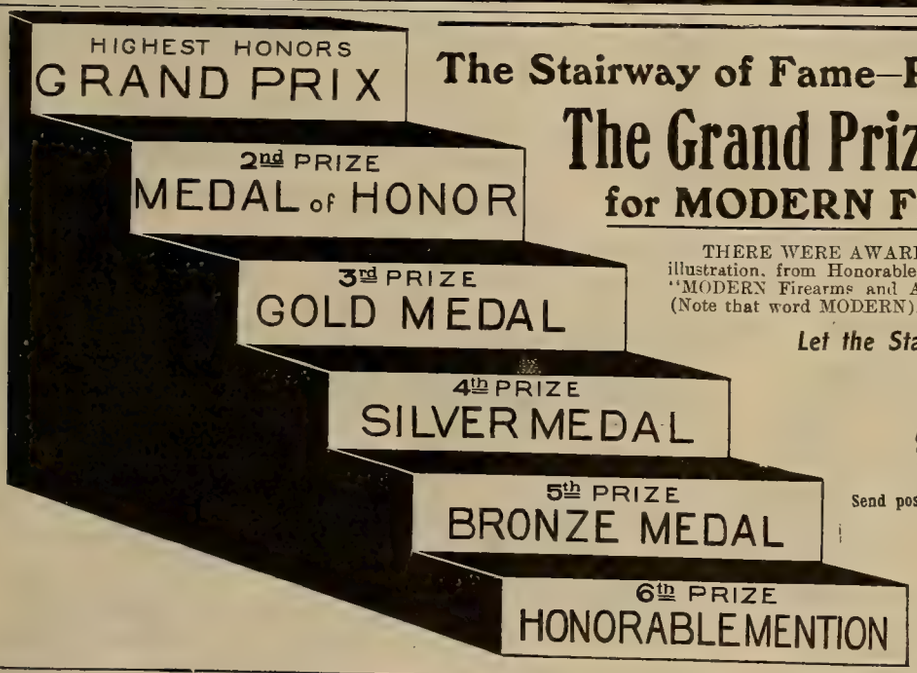
WINCHESTER



SELF-LOADING RIFLE, .401 CALIBER

IT GIVES A STREAM OF SMASHING BLOWS

No need to fear the most powerful or most dangerous animal, if equipped with the .401 Winchester. It can deliver five smashing, one-ton blows in a few seconds, with aim. This rifle is a self-loader, and it is only necessary to pull the trigger for each shot. It shoots cartridges small in size but powerful in execution loaded with either 200-grain or 250-grain bullets. It beats any other rifle of this type for power and is the most effective hunting rifle made. Your first hunt will prove every word we say.

OVERTISING AND AES-AES-(SAME WORD WE USED BEFORE) AGAIN.

The following editorial spasm appeared some weeks ıce in our sole surviving Chicago contemporary, e Review, and was put in type at the time, it being r intention to reproduce it that our readers might arn just how highly we are regarded in certain tarters, but for some reason we overlooked it until is week when the lino plugger wanted to know hynell it didn't go in so he could turn it in on his ring for settlement. The machine operator in uestion being much more feared when he is "riled" ıan is the editor of our s. s. C. c. (see above), we asten to include the same in our makeup in order ıat he may receive the proper credit and, ultimately, ıe customary financial remuneration, for the same:

'Way back in the winter we happened to drop a areless word or two regarding the climatic advanages of Chicago, Ill. The editor of our San Franisco contemporary, the "Breeder and Sportsman," ook this very hard. He seemed to apprehend upon ur part an indisposition to advertise the idyllic tmosphere of California. Apparently we had sinned ore grievously even than the historic individual ho "spoke disrespectfully of the equator." We were wee bit surprised, but still more amused — and uite willing to sick him on if thereby farther conributions to the general gaiety could be elicited. We asten to say that they were—for each of our innoent sallies was good for an increasingly large mount of editorial space in the "B. and S." Heavens—how serious it all seemed to that exponent f the climatic glories of the Pacific slope! In fact, t developed into an ingrowing case—almost psychoathis, one would be tempted to think—of which the esult has been such a "grouch" upon the part of the San Francisco editor as appears to be reaching the limensions of a mania.

Well—so far as that goes, we hold with the philosopher who enunciated that memorable maxim, "Every knock is a boost." So our equanimity is undisturbed. But some of our critic's animadversions are certainly weird. For instance: Some time ago we suggested that it would not be a bad thing if American track managers would name some of their fixed events after famous trotters of the past—historic horses whose names were worthy of such monuments; this practice having attracted our attention upon the European turf and seeming to us one fittingly to be emulated. But, lo and behold! From our Athenian contemporary, the "Horse Breeder," of Bosting (and all places in the world whence such a protest should proceed!) was forthcoming at once the severe criticism that we were chasing aesthetic rainbows and neglecting the box office; that it was absurd to advocate such a practice, because of the fact that the fixed events of the American trotting turf were subsidized for advertising purposes by hotels, breweries, patent medicine vendors, etc., etc., and that without such "angelic" assistance, their accustomed places upon Grand Circuit programs would know them no more—with other observations to the like effect. To which we replied that the advertising adjunct might have its own proper place in stake promotion, but that when everything else must be made subservient thereto, it was placing things upon a very sordid and "corned beef-and-cabbage" basis, from which the turf, more than anything else, needed a let-up.

All of which has stirred up the "B. and S." editor to fresh spasms, their crux being that we are the last source whence such an argument should emanate, seeing that we promote, and for a quarter of a century past have promoted, a futurity which is known as the Horse Review Futurity, and does not bear the name of a historic horse!

Gadzooks!—has our California critic, in his anxiety to "knock," discarded altogether logic and common sense? It would appear so. If the Review had wished to get an advertising subsidy for its futurities by utilizing their names as stalking horses for patent medicines or beers, hobbles or hotels, it could have enriched itself to the tune of many thousands of dollars during the period alluded to. But the idea never occurred to us and, if suggested, would have been declined with thanks. Any other name than that of this paper would have been excrescent for the futurities which it has promoted. It is not only strictly germane to them—it is also strictly within the line of demarcation between what is allowable and in good taste and what is the reverse. The Horse Review futurities were created by the Horse Review wholly and absolutely. It conceived their original idea, promoted them each and every one, guaranteed their payment, and made good the guarantees upon its own responsibility and without any "angelic" assistance of any sort whatever. There is about as much similarity between these events and that sort of stakes to which a pill-factory or a distillery graciously offers to add a little money, or donate a piece of tin-ware to the winner in return for having its name branded thereupon, as there is between Niagara Falls and the North Pole.

If the "B. and S." can't see this, if it is unable to "tell a hawk from a handsaw"—and we have a suspicion that it can't—we have no farther mission to enlighten it, except to say that while it seems to labor under the illusion that we are "having a fight," we have just been amusing ourselves!

Having thus squared ourselves with the "copy" hog, we will again take up the pleasing pastime of continuing the argument which was, through our carelessness, so rudely interrupted. We enjoy these little digressions from the daily routine, not only for purely personal reasons, but also from a business standpoint. We recall a famous race track official whose motto was "Publicity—for me or against me, but—publicity," and we confess to a fondness for the free advertising accorded to us by the Review's editorial page in preference to that we might gain from the patronage of its business pages at so much per pat. This is, of course, due in a large measure to our well known modesty, as we are nothing if not a self-effacing, retiring little cuss, and we would hesitate to promulgate over our own signature at so much per sig. the fulsome compliments and glowing encomiums so profusely and gratuitously showered upon us by the editorial page of our s. s. C. c. (as before).

Exactly as we had anticipated at the time when we penned the little inquiry which the Review construed, quite erroneously, as a knock, the editor of our s. s. C. c. (same thing) has taken the stand that whatever the Review does is all right purely and simply because it is the Review that does it. Of course, there is precedent for such action, but precedent is not always a safe thing to follow. We recall that back in the good old days of the Roman empire—and we do not mean the empire at the ball game at Rome, Georgia, who was beaned with a pop bottle—the leaders of the younger married set were a certain Mr. and Mrs. Cæsar. Now the younger married set in those days when the city by the Tiber was the center of civilization and social activity of the known world was much like the younger married set of our own day, and then, as now, scandal was an ever present menace to certain members of the said y. m. s. As we recall the situation, Col. Cæsar's time was well taken up by affairs of state and finance, and as is yet not unusual in such cases, Mrs. Cæsar, whose maiden name has for the moment escaped us, numbered among her entourage (with apologies to the Review for infringing upon its French copyright) certain gentlemen friends whose attentions were more remarkable for their warmth than for their discretion. Alas, too true!

As is as yet the case, messieurs and mes- (excuse us while the operator waits for another letter in the "s" channel—ah, yes, here it is) dames, kind friends did not hesitate to apprise the Colonel of the fact that there were masculine hoofprints in the flower beds under a certain window of his suburban villa, and then it was that Cæsar proved himself, in the public eye at least, one of nature's noblemen. Did he go on the warpath with a sawed-off shotgun or a mercury tablet, or say "Woman, go your-r-r way-y!" or any such undignified and hasty thing as that? Nix.

What he did was to draw himself up to his full height, drape the tails of his mother hubbard—or toga, as they called the masculine kimono of those days—over his left arm, and with a sweeping gesture of his old right soupbone affirm his belief that Cæsar's wife was above suspicion because she was Cæsar's wife!

Loud applause!

He made it stick, too, so strongly that a lot of feeble-minded simps take comfort from the theory advanced to this day, but we have always had a persistent idea as to what the public really thought, and, also, anent the Colonel's private opinions in the matter, and incline to the belief that only the fact that the good old U. S. A. was as yet unknown by several centuries prevented the appearance of his name, unattended, upon the register of a certain popular Nevada hostelry (name upon application, as we get a commission on guests we send 'em), and the subsequent "Renoing" of the lady aforesaid with the customary neatness and dispatch.

Nor will it appear either to ourselves, whose thick-wittedness is, for the sake of the argument, admitted, or to many others in the horse world whose intelligence is not so readily assailable, that the Review's course in bestowing its name upon a futurity is so purely æsthetic and so absolutely devoid of base commercialism or "corned-beef-and-cabbageness" as its editor would have it believed. The industry of racing and racegiving is maintained not as a philanthropy but as a business from which one anticipates the return of "a living" and some measure of profit, direct, indirect, or both. Futurity stakes in some instances have not proved productive of direct profit, though such disasters are not traceable to the "intentions" of their promoters. A turf journal endows a stake in the hope of direct profit, and assured of the indirect profit gained through it as an advertising medium and as a stepping stone to prestige. How glowingly does the editor of our e. s. s. C. c. (we put the "e" there out of editorial courtesy) dwell upon "making good the guarantee upon its own responsibility." What a noisy silence he preserves concerning those years when the stake paid a direct profit on the responsibility of its patrons! How masterfully does he ignore the indirect profit from publicity and prestige gained that has been of untold service in assisting the Review to the commanding position it now occupies in the field of turf journalism!

We do not now, nor did we at any time during the present controversy, offer any defense of the practice of subsidizing trotting stakes by booze emporiums or quack medicine houses, those interests being the ones to bear the brunt of the Review's attacks. Our contention is that the ends sought by those concerns are identical with those sought by the Review—some measure of return for the money. We do hold that there are many of the "allied industries" whose interests in the light harness horse world are so close, so real, and so extensive that they could subsidize an event or endow a stake with the same propriety with which the horse journals promote their futurities. Horsemen, as a rule, are not æsthetes; nor are they, as a class, overly fond of corned beef and cabbage as a regular diet, but in a long career both as host and guest we have found blamed few of them who would shy from a middle course as exemplified by a good sound piece of steak and the usual substantial and savory "trimmings."

Perhaps the latter course, figuratively speaking, would be a fairly acceptable one for the trotting horse world as a whole to adopt.

But, the Review errs in its insinuation that we threw a fit because its futurity failed to bear the name of a famous horse. In our suggestions we made mention of no horse. Nay, nay, Pauline, not so. Look again.

And ere we close: "Every knock is a boost!"

Did you get it? All of it? And he says he believes it!

If he does, and of course he said he did, all is explained. How he must love us—and our California! We almost love him for the love he bears us, for love, Mabel, unrequited love, is an awful thing! However, be the dish æsthetic, corned-beef-and-cabbageish, or steak and potatoish, a grain of salt is not merely relished but necessary—and we take a little of the same with this statement. As the immortal bard so aptly remarked:

"Last night I slept in an editor's bed,
Though no editor was nigh,
And I thought as I drowsed in that editor's bed:
'How easily editors lie!'"

Racing at Washington State Fair

[Report by Anozira.]

North Yakima, Sept. 20.—Beautiful weather graced the opening of the Washington State Fair today, and while the attendance was not what it should have been the big show is in every way more distinctive than its predecessors of recent seasons, the initial efforts of Frank Meredith as secretary and manager promising much for the future.

The racing today was brisk and entertaining, the Californians taking the honors in each event, the performance of Potrero Boy being especially pleasing. Prince Zolock, who was heralded as the boss of the 2:12 pacers, caught cold during the ship from Walla Walla and was unable to start, Henry Hellman having a very sick horse on hand when that race was called. The summary:

Sept. 20.—2:30 trot, purse $500:
Bonnie Ansel, b m by Prince Ansel....(Spencer) 1 1 1
Amy McKinney, bl m by McKinney...(Wilbourne) 2 2 2
Columbia T., b m by Bon Guy.....(Daniels) 3 3 3
Sedge Sparrow, b m by Spokane.....(Angel) 4 4 4
Time—2:15¾, 2:13¼, 2:18¼.

2:12 pace, purse $750:
Potrero Boy, b g by Demonio.....(Daniels) 1 1 1
Hal Edo, b m by Hal B.....(Archer) 2 2 2
Harold Welcome, b h by Welcome.....(Butcher) 3 3 3
William G., ch g by Clarence Wilkes...(Duncan) 4 4 4
Time—2:07¼, 2:09, 2:11.

Sept. 22.—This was the third day of the Washington State Fair but the first one in which the attendance was anywhere near what it should have been. Some five thousand people were in evidence but in view of the fact that it was "North Yakima Day" the display of patriotism might have been more pronounced.

The racing is on the "three heat, every heat a race" plan and was snappy and pleasing to the crowd that witnessed it. The scoring was kept to the minimum and as the horses were on the ground promptly Starter McNair's schedule was finished on time, the last heat being called at 3:30. The people like this, too, for it enables them to make holiday appointments—and then keep them. Floradora Z. and Lady Hal, both consistent performers this season on the North Pacific circuit, accounted for the winner's portion of their respective races, the details being as follows:

North Yakima, Sept. 22.—2:25 trot, purse $600:
Floradora Z., b m by Zombro.....(Guion) 1 1 1
Hallie B., b m by Hal B.....(Swisher) 3 2 2
Amy McKinney, bl m by McKinney (Wilbourne) 2 4 4
Columbia T., b m by Bon Guy.....(Daniels) 4 3 3
Lathrop, b g by Evergets.....(Carr) 5 5 5
Time—2:14¼, 2:14¼, 2:14¼.

2:25 pace, purse $500:
Lady Hal, b m by Hal B.....(Hogoboom) 1 1 1
Nigger Boy, bl g by Oregon Patch.....(Lance) 2 2 3
High Ho, b h by Keeler.....(Cooper) 4 3 2
Elfreda D., b m by Diablo.....(Mrs. Herman) 3 4 4
Time—2:13, 2:13½, 2:11.

Sept. 23.—"Governor's Day" dawned clear and beautifully, but just as the first race was called a windstorm broke and lasted about ten minutes, followed by about five minutes of light rain. No damage resulted and after the elements had settled again, everything progressed famously. Governor Lister appeared about three o'clock and was heartily welcomed by the big crowd of ten thousand loyal Washingtonians, who enthusiastically cheered his very excellent speech, during the course of which he expressed his belief in the success of this and all future state fairs.

California horses cleaned up the program in straight heats and good time, Bonnie Ansel trotting her third heat in 2:11¼, while Teddy Bear, in the final mile in the pace, put up the first 2:10 performance of the meeting. The racing was on the same sharp, clean-cut order that ruled yesterday and was finished at four o'clock, when the big million-dollar stock parade was formed in front of the grandstand.

The summaries:

Sept. 23.—2:12 trot, purse $750:
Bonnie Ansel, b m by Prince Ansel.....(Spencer) 1 1 1
Dan Matthews, b g by Eagle Blood.....(Brown) 2 2 2
Starost, ch h by The King Red....(Gunderson) 3 4 3
Sargo, b g by Keeler..... 4 3 4
Time—2:13½, 2:12¼, 2:11¼.

Free-for-all pace, purse $750:
Teddy Bear, b h by Del Coronado.....(Daniels) 1 1 1
Allerdaw, b g by Allertonian.....(Hogoboom) 2 2 2
Haltamont, b h by Hal B.....(Todd) 3 3 3
Time—2:11¼, 2:11½, 2:10.

Sept. 24.—This was "Elks' Day" at the Washington State Fair, and "Old Sol," as if in recognition of the Best People on Earth, gave us a delightfully pleasant afternoon. The crowd was not quite so large as that of yesterday, but the program was more extensive and the racing of a really higher order.

Charley Guion, evidently figuring that this is going to be a long, hard winter, went after the big end of the 2:20 trot and secured it, too, but not until Hallie B. had forced Floradora Z. to trot a winrace record of 2:11½, the time being nearly three seconds faster than that displayed by the same pair on Wednesday. The money in the other events was rounded up principally by the Californians, the 2:20 pace being the best event of the week, though practically a two-horse race between Potrero Boy and Mack Fitzsimmons. The Demonio gelding paced the first heat in 2:06½, with Fitzsimmons second and Elfreda D., driven by her owner, Mrs. Herman, a nice third. The second went to Fitzsimmons in 2:11¼ owing to a bit of unsteadiness on Potrero Boy's part, but the latter lad showed his real class by coming back in 2:06¼ in the third, with Helman's entry right after him. Daniels also took two heats of the special mixed event with Kid Cupid, the third going to Will Duncan's William G., with Nuristo third—the three all hailing from the Sacramento valley. The afternoon in detail:

Sept. 24.—2:25 trot, purse $600:
Floradora Z., b m by Zombro.....(Guion) 1 1 1
Hallie B., b m by Hal B.....(Spencer) 2 2 2
Eloise Dell, br m by Alconda Jay.....(Daniels) 4 3 3
The Frisco, ch g by Caution.....(Lance) 3 4 4
Time—2:13¼, 2:11½, 2:13.

2:20 pace, purse $600:
Potrero Boy, b g by Demonio.....(Daniels) 1 2 1
Mack Fitzsimmons, ch g by Bob Fitzsimmons...
.....(Helman) 2 1 2
Elfreda D., b m by Diablo.....(Mrs. Herman) 3 ds
Belle Smith, br m by The Blacksmith (Hogoboom) ds
Time—2:06½, 2:11½, 2:06¼.

Special Class, mixed, purse $300:
Kid Cupid, ch g by Cupid.....(Daniels) 1 1 2
William G., ch g by Clarence Wilkes....(Duncan) 2 2 1
Nuristo, b g by Nushagak.....(Spencer) 3 3 3
Viva Hal, br m by Hal B.....(Kenney) 4 4 4
Time—2:14¼, 2:14½, 2:12½.

Sept. 25.—This is getaway day at the Washington State Fair. The crowd numbers about 1500 whereas it should be as many thousands. The people have not patronized this fair as they should have done. Every department was one of merit and reflected credit upon the exhibitors and the management of the fair. To Secretary Meredith, Dr. Prior and Dr. H. T. Graves, the Commissioner of Agriculture, belongs the praise for giving the state of Washington the best State Fair ever held within its borders. They were here, there and everywhere and although Secretary Meredith is a new man here, the people recognize his worth as an executive and general fair official. With the support he deserves, Washington will in a few years have one of the great fairs of the country.

The race program of the week was high class. The fields were not large but the finishes in nearly every event were the kind which sends thrills through the grandstand as well as every part of the ground from which they could be seen. That of today was no exception, the rule seeming to be to go as fast as possible in every heat. This meeting being conducted under the "every heat a race" plan, several of the horses had opportunities to make an earning which would not have been possible under the old three in five plan. The "every heat a race" seems to be popular with the horsemen of the northwest.

Today three horses were started to beat 2:25¼ pacing. They were all daughters of Hal B. and as usual had no trouble in taking the mark. The only one near failure was the eight-year-old mare Lady Hal. Owner Davis worked her a mile in 2:20 and immediately turned her for the word. It was asking a mighty sight of the mare and it would have been no discredit had she failed in the attempt. Nearly all horsemen are agreed that had Mr. Davis given her the proper chance she would have beaten 2:20 easily.

For the 2:18 pace Driver Helman started the good horse Prince Zolock, which in a former letter was reported to be very sick. This big fellow marched an easy mile, finishing "pulled up" in 2:06½, and an examination by the "vet" after the heat demonstrated it to be unwise, in fact, dangerous to start him back and he was consequently excused. Charley Spencer seems to have found the key to Glenrose's erraticness and stepped her the last mile in the special pace in 2:07¼, the last quarter in 29¾ seconds. This mare has not done well in the past and owner Roberts was right at the discouraged point. He has taken new heart and hopes to find he not only has a fast animal but a good racing tool.

The work of Starter McNair was one of the features of the meeting. He did good work here last year but this year's work was a shade better. He got his 41 heats off with 68 scores, an average of 1.66 to the heat, and the average time for the meeting was 2:11¾. The local people swear by "Mack," as he certainly takes care of the occupants of the grandstand and permits no imposition of any sort by the venders of lemonade, cigars, etc. Today's summaries:

Sept. 25.—2:18 pace, purse $600:
Lady Hal, b m by Hal B.....(Hogoboom) 3 1 1
Hal Edo, b m by Hal B.....(Archer) 2 2 3
Scarlet Trent, b g by Parovas.....(Brown) 4 3 2
Nigger Boy, bl g by Oregon Patch.....(Lance) 5 4 4
Prince Zolock, bl h by Zolock.....(Hellman) 1 dr
Time—2:06½, 2:09½, 2:09½.

Special class, purse $200:
Delmas, ch g by Dialect.....(Wilbourne) 1 1 2
Glenrose, bl m by Beaumont.....(Spencer) 2 3 1
Elfreda D., b m by Diablo.....(Melman) 3 2 3
Frank Zolock, ch g by Zolock.....(Lance) 4 4 4
Time—2:09¾, 2:10, 2:07¼.

To beat 2:25¼ pacing:
Viva Hal, (6) b m by Hal B.....(Kenney) 2:12
Daisy D., (5) by Hal B.....(Kenney) 2:20½
Lady Hal, (8) by Hal B.....(Davis) 2:24¼

E. L. Peck, general superintendent of the Baltimore & Ohio Railroad, who makes Southern California his home for a considerable portion of each year, is so well pleased with the training facilities afforded by the plant of the Riverside District Fair Association that he is having one or two of his favorite three-year-old trotters brought from the east to Riverside for speed development. Quite a little colony of horsemen will winter there, from present indications.

FIFTH DAY AT COLUMBUS.

Columbus, Sept. 24.—While straight heats were th order of the day yesterday, today's program was c from a piece of goods with a more varied patter splits developing in each of the three events co tested, one of which was unfinished and was carrie over until tomorrow. Rastus, favorite for the 2:(pace, brought on a slight attack of palpitation of th heart to his numerous backers when outfooted in th first heat by John D. in 2:04¾, but came bac stronger than the Indiana sidewheeler and won o out in handy fashion. John D. drove him out in tw heats right at 2:05 before giving up, Bingen Pointe taking the place in the final brush.

The 2:09 trot went six rounds before a decisio was reached, Tommy Murphy's Mirthful having th best lasting speed of the bunch. Vaster, the old gra veteran who routed the dopesters on Monday whe he romped away with the 2:11 trot, won the firs heat in 2:08¼ and was then relegated to the ruck the race developing into a duel between Mirthful an St. Frisco, the latter horse the favored one in th betting. Mirthful took the second heat, lost the thir by a costly break and was out-trotted in the fourth Here her staying qualities served her well and sh took the fifth handily and after going to the half i 1:03 in the sixth would have distanced both St. Frisc and Vaster had Murphy not taken her home on a jog

Virginia Brooks was the original choice for th 2:08 pace, but failed to figure seriously in the even as far as it had gone when carried over. Budd El liott and Marse Edward Geers rode in front for th first heat, which was marred by an accident. Miss Rejected fell, throwing Yates from his seat and causing a number of horses to be interfered with, all being placed by the judges. Yates was stunned, but not seriously injured. In the second heat Thistle Patch and Billy Snow jumped the time a full three seconds and in the third one Red Mike and J. O. McAllister went to the front, Budd Elliott being well back each time. The summary:

Columbus, Sept. 24.—2:06 pace, purse $1,200:
Rastus, br g by Liberty Boy.....(McDonald) 2 1 1 1
John D., b g by Gamrose..(Osborne-Rhoades) 1 2 2 4
Bingen Pointer, b h by Bingen.....(Snow) 3 3 3 2
Our Colonel, Frank Patch, The Assessor and Ben Lo-canda also started.
Time—2:04¾, 2:05½, 2:05¼, 2:06¼.

2:09 trot, purse $1,200:
Mirthful, b m by The Star of Patchen..
.....(Murphy) 5 1 4 2 1 1
St. Frisco, b h by San Francisco (Geers) 3 4 1 1 2 2
Vaster, gr g by Vasteen.....(Ragsdale) 1 5 5 4 4 3
Laramie Lad, Harry J. S. and Hazel Laing also started.
Time—2:08¼, 2:06¼, 2:07¼, 2:07¼, 2:08¼, 2:11¼.

2:08 pace, purse $1,200 (unfinished):
Thistle Patch, bl h by Joe Patchen.....(Snow) 4 1 2
Red Mike, ch g by Ananias.....(McAllister) 8 2 1
Budd Elliott, br g by Prodigal.....(Geers) 1 8 6
Spring Maid, Virginia Brooks, Goldie C., Prince Jolla, Miss Rejected and Hedgewood Patchen also started.
Time—2:09¼, 2:06¼, 2:09¼.

Sixth Day at Columbus.

Columbus, Sept. 25.—No races were scheduled for today on the original program, but to provide an opportunity to finish the 2:18 pace and to give non-winners a chance at a bit of money, Secretary Sheppard arranged a card that pleased a good crowd of spectators. In that portion of the 2:18 pace raced yesterday Budd Elliott, Thistle Patch and Red Mike were the heat winners, the latter horse being a heavily backed second choice. However, "the more the merrier," remarked Johnny Rhodes as he scored down today with Goldie C., and there was absolutely "nothing to it" for three in a row save the daughter of Wiltranby, never better than fourth in yesterday's competition. Red Mike left his feet in the first heat this afternoon and saw the flag fall without the necessity of looking backward, while Thistle Patch spoiled his chances on two separate occasions by breaks made after passing the distance.

The special trot went in straight heats to Nata Prime in a rather featureless contest, but the pacing race developed more interest. Fleeta Dillon, the uncertain proposition with which Lawrence Shuler has made a fair showing this season, considering her former "rep," equaled her Indianapolis record by taking the first heat in 2:08¼, coming back strong for the second in 2:06¼, driven out by Ross Keith and the Canadian-owned pacer Texas Jack. The latter horse was going better all the time and put a crimp in the bunch with a third heat in 2:04½, after which they were satisfied to slow up about nine seconds, though the fifth heat was back in the same notch as the first. The summaries:

Columbus, Sept. 25.—2:18 pace (first three heats Sept. 24), purse $1,200:
Goldie C., b m by Wiltranby.....(Rhodes) 1 1 1
Thistle Patch, bl h by Joe Patchen.....(Snow) 2 4 2
Budd Elliott, br g by Prodigal..(Geers-Benison) 4 3 3
Spring Maid, Virginia Brooks, Red Mike, Prince Jolla, Miss Rejected and Hedgewood Patchen also started.
Time—2:07¾, 2:09¾, 2:08½.

Special trot, purse $400:
Nata Prime, br m by John Bascomb....(Wright) 1 1 1
Allerta, ch m by Directum Kelly.....(Snedeker) 2 2 4
Parcliff, b g by Stormcliff.....(McCarthy) 4 4 2
Willow Mack, Grand Chimes and Jeannette Speed also started.
Time—2:10¾, 2:11¾, 2:10¼.

Special pace, purse $400:
Texas Jim, ch g by Texas Jack.....
.....(Roche-V. Fleming) 4 3 1 1 1
Fleeta Dillon, b m by Sidney Dillon.....
.....(L. Shuler) 1 1 3 4 3
Ross Keith, b g by Waltz.....(Berry) 3 2 2 3 2
Red Rice and Fern Hal also started.
Time—2:08¼, 2:06¼, 2:04½, 2:13¼, 2:08¼.

Seventh Day at Columbus.

Columbus, Sept. 28.—Rains on Sunday and again Monday morning interrupted the sport at the Grand

Vera Hal Sets New Stadium Record

Sunday last, though ushered in with fog and an overcast sky, developed into one of the finest days for racing that has graced the entire season, warm and sunshiny, with almost no breeze, and members of the San Francisco-California Driving Club celebrated the occasion fittingly by hanging up a new race record for the fun track at the Stadium.

Five races were on the card, with the free-for-all pace the feature event, as usual. The free-for-allers have been on the upgrade for some time, steadily improving in form as the season lengthened, and the crowd in attendance was confident that Sunday's race would bring out some fast work, as the horses were not only "good" but rivalry between their owners ran pretty high. Jimmy Ryan did the starting and sent the four headliners away to a good start, Vera Hal assuming the lead before reaching the quarter and maintaining it throughout the mile, Dick W. furnishing the best of competition with Little Bernice and Happy Dentist not far away. The time, 2:07¾, was only a quarter of a second removed from that of the first mile of the race on September 4th when Cohen and his game little mare established a new two-heat record for the course, and as the mare was right and the conditions good the pair set sail in the second heat for another record, winning by three lengths in the fast time of 2:06¾, Little Bernice taking the place by a good stretch drive. Happy Dentist, who was last, was timed separately in 2:08½, so no one was loafing on the job. Vera Hal's performance gives her two records for the Stadium track—the fastest mile and also the fastest two miles. The new Stadium queen has been a familiar figure on California tracks, having been in the 2:10 list for the past five years. She was bred by A. Estrom of Oakland and is by Expressive Mac 2:25½, out of the double producer Carmen by Newsboy. For the last two or three years she has been owned and driven by her present owner, Harold Cohen of this city.

Ed Strain of Marysville prolonged his visit to take part in Sunday's fray and had a very pleasant afternoon, thank you, winning the 2:18 pace with Lucia S. in two nice heats. Ed was also trying all the time with Francis S. in the free-for-all trot, but while Birdeye and Ella M. R. were "his meat," the Ottinger combination of Agnes Carter and Al Schwartz proved more than he could handle, Agnes lining out a pair of miles in 2:17 and 2:15.

Bradmont, back among the 2:15 pacers, delivered the goods in time that he can be depended upon to show regularly, and the mixed class was a toss-up between Lassie M., Ateka and Cookey, each winning a heat with the first named having the best of the summary at the finish. The summary:

Lucia S.	(J. E. Strain)	1	1
Victor Pointer	(Dan Keating)	2	4
Jack	(McDonnell & Conlan)	6	2
Hamburg Belle	(J. Ginocchio)	3	3
G. J. P.	(R. Consani)	4	5
Zorankin	(F. Callea)	5	6

Time—2:14¾, 2:15.

2:15 pace:

Bradmont	(G. J. Giannini)	1	1
Mabel Dillon	(B. Cohen)	2	2
Emma M.	(William Malough)	3	3
Senator H.	(Joe Kidd)	4	4

Time—2:13, 2:11.

Free-for-all pace:

Vera Hal	(H. Cohen)	1	1
Dick W.	(A. Ottinger)	2	3
Little Bernice	(J. C. Welsh)	3	2
Happy Deitist	(J. J. Ryan)	4	4

Time—2:07¾, 2:06¾.

Free-for-all trot:

Agnes Carter	(A. Ottinger)	1	1
Francis S.	(J. E. Strain)	2	2
Birdeye	(A. Combatalade)	3	3
Ella M. R.	(G. J. Giannini)	4	4

Time—2:17, 2:15

2:20, mixed:

Lassie M.	(M. M. Bates)	1	2	2
Ateka	(B. Cohen)	2	1	3
Cookey	(J. Vermet)	3	3	1

Time—2:21½, 2:22, 2:21.

Circuit meeting that has been in progress here since September 20, and when racing was resumed today the track was cuppy and slow, the time made under the existing conditions being very good indeed.

Bessie R., first choice for the 2:15 pace, made a game effort to make good for her backers in a five heat contest in which she was but once worse than second. Margie Hal took the opener in 2:09¼ from Bessie, the latter coming back to win the second heat in time two seconds faster, whereupon Tom Berry and Mary Coastman, eleventh and seventh in the first and second heats, came out for three in a row in good time.

The 2:09 trot also went five rounds to a decision, Lizzie Brown, the favorite, winning in good shape after losing the first and third heats through breaks at the stretch. Lady Grattan and Peter McCormick traced each other for place, the Cox mare having one position the best of Shuler's big trotter when the summary was cast. The latter horse has been laying up at Indianapolis with an injured leg since the Grand Circuit shifted from Michigan to eastern points, and "came back" well today.

Volga, winner of the Horse Review futurity last week, repeated today in the junior division of the horseman stake, Ben White again handling the reins. She trotted the last halves of her two heats in 1:03 and 1:04, coming from behind and winning as she pleased from Bingen Silk, who in turn outrushed Walnut Tree and Suldine. The 2:18 trot was cut into two races, Onward Forbes taking the first division in straight heats from Trusada, Princess Margrave and half a dozen others. The judges called the derrick into commission twice during the afternoon, supplanting drivers Marsh and Egan without affecting any momentous improvements in the performance of their mounts. The summary:

Columbus, Sept. 28.—2:15 pace, purse $1,200:

Mary Coastman, b m by Coastman (Berry)	11	7	1	1	1
Bessie R., b m by Captain H.... (Robinson)	2	1	2	3	2
Margie Hal., b m by Devil Hal..... (Rea)	1	5	6	9	3
Tango, Madam Mac, Joe Ashland, Dexter Direct, Joe Boggs, Patrick M., Clara Walker and Peter Oakland also started.					

Time—2:09¼, 2:07¼, 2:07¼, 2:08¾, 2:09½.

Chamber of Commerce, 2:09 trot, purse $3,000:

Lizzie Brown, b m by The Bondsman..... (Valentine)	5	1	4	1	1
Lady Grattan, ch m by Joe Grattan... (Cox)	1	2	2	3	3
Peter McCormick, bl h by Peter the Great.. (Shuler)	3	4	1	2	2
Lulu Lumine and Par McKerron also started.					

Time—2:10½, 2:08¾, 2:09½, 2:09¼, 2:08¾.

Horseman Futurity, two-year-old trotters, purse $3,000:

Volga, ch f by Peter the Great..... (White)	1	1	
Bingen Silk, b c by Bingen..... (Chandler)	2	2	
Walnut Tree, b f by Siliko..... (Murphy)	4	3	
Suldine, Atlantika and Adele Block also started.			

Time—2:12¾, 2:12½.

2:18 trot, purse $800, first division:

Onward Forbes, b h by J. Malcolm Forbes (Shank)	1	1	1
Trusada, b m by Moko..... (Cox)	3	3	2
Princess Margrave, ro m by Margrave (McMahon)	4	2	3
Idora Worthy, Pony Express, Miss Cresceus, Durin, Oro Society and Zomblack also started.			

Time—2:10¾, 2:09¾, 2:09½.

Eighth Day at Columbus.

Columbus, Sept. 29.—A rather chilly north wind was the only detrimental feature here today, but the footing was good and the time in all events excellent. Eight trotters made up the second division of the 2:18 trot and Ames Albingen was the public's choice to head the summary, the bay horse making good eventually. Breaks in the first and second heats when he appeared to have the situation well in hand only served to delay rather than alter the result, as in the final miles he trotted steadily and won in nice shape.

Mary Putney, winner of the Review futurity last week, annexed another bunch of Windy City bills by taking first place in the Horseman futurity this afternoon, first money in the two events paying a good profit on the purchase price of $5,000 paid to Walter Cox by her new owner, Chauncey Sears. She had a "narrow squeak" in the first heat, going to a break just after getting the word and failing to settle until the field had passed her, going on and trotting the last half in 1:02½ to finish sixth. Keeping to a trot thereafter she won impressively, reducing her former mark to 2:07¾.

The Arch City stake was not finished, and as far as it went was one real horse race. Russell Boy was an odds-on favorite, with Hal Boy the second choice, the latter taking the first heat by out-brushing the Illinois horse in the final sprint. Judge Ormonde, riding comfortably in seventh place in the first heat, cut into the game in the second, winning with ease after carrying Russell Boy to a break in the stretch, also taking the third in the hardest kind of a drive, Russell Boy nosing out Hal Boy and The Beaver for place in one of the best contests ever witnessed here. In the fourth, Valentine's black weakened at the end and Russell Boy won by half a length.

Valentine also has the winner of the 2:13 pace as far as it has gone, Dwight Logan having lined out the two miles raced in 2:06¼ and 2:05½, driven out alternately by Grace D. and Tramp a Bit. Neither Peter Volo nor Etawah were sent for records as originally planned, but Margaret Druien, starting to beat 2:04¼, trotted an excellent mile in 2:03½. The summaries:

Columbus, Sept. 29.—2:18 trot, second division, purse $800:

Ames Albingen, b h by Albingen (McDonald)	8	6	1	1	1
King Charley, b g by King Electric (Reaves)	1	1	4	6	2
Audrey Grey, br m by Moko..... (Cox)	5	5	2	2	3
Tommy Todd, Judge Jones, Harry Porter, Myra Mc-					

[Concluded on page 6.]

RIVERSIDE PROMISES GOOD SPORT.

This has been a long dry summer in California for horsemen and for the folks who like to see trotting and pacing races, but it looks like the drought might be "busted with a bump" next week at Riverside when the speed program of the Riverside District Fair Association is staged. The track is one of the fastest bits of dirt in the west, and the excellence of the footing coupled with the quality of the fields makes it appear that the racing will be of the genuine "Sun-kist" variety. Sixty-nine entries were received for eight races, the list including a number of those taking part in the big meeting here in June, including Hemet Stock Farm's good three-year-olds, Allie Lou and Oro Lou, and Will Durfee's topliners, White Sox and Virginia Barnette. San Jacinto, holder of the Riverside track record is another entrant, as is Vera Hal, holder of the local matinee record here in San Francisco. Altogether it looks like a big week, well worthy of generous patronage. The entries in the various classes are as follows:

2:30 Trot.

Annie Conn, b m by Onn Conn, Axel Nelson; Levia W., ch m by Peacock, Geo. E. Bunnell; Dark Streak, b g by Raymond, H. E. Webster; Caroline, b m by Robin, Leona Williams; Don de Lopez, b c by Kinney de Lopez, Hemet Stock Farm; Luana, b m by Kinney Lou, L. B. Taylor; Zombroso, br h by Zombro, Marsh Thompson; Guy Boy, br g by Guy Bellou, Mrs. Jas. Stewart; Larry K., b g by Larry Kinney, C. B. Courtwright; Maggie M., br m by Carlokin, C. H. Morgan; Oldfolks, b g by Del Coronado, W. G. Durfee & Co.

2:23 Pace.

Maud Wilkes, ch m by Stanton Wilkes, M. I. Wheeler; Fritz the Dutch, b h by Worthwhile, C. R. June; Dolly Zombro, b m by Zombro, W. W. Whitney; Oro Lou, ch g by Kinney Lou, Hemet Stock Farm; Baxter Lou, ch g by Kinney Lou, L. B. Taylor; Santa Paula, b m by Silver Coin, Jas. Gill; Avetator, br h by Zombro, Marsh Thompson; Humpa Hill, b g by F. S. Turner, Jas. Stewart; Santa Fe, s g by Zolock, E. B. Courtwright.

2:09 Pace.

Walter C., b h by Carpus, Bert Reno; San Jacinto, b g by Geo. W. McKinney, G. D. Armstead; Della H., br m by Hal B., H. G. Smith; Vera Hal, b m by Expressive Mac, H. Cohen; White Sox, b m by Del Coronado, W. G. Durfee & Co.

2:14 Trot.

Annie Conn, b m by On Conn, Axel Nelson; Levia W., ch m by Peacock, Geo. E. Bunnell; Allie Lou, br f by Kinney Lou, Hemet Stock Farm; Danube, br g by Direcho, T. N. Goldsmith; Zolock Zar, br g by Zolock, Marsh Thompson; Guy Boy, br g by Guy Bellou, Mrs. Jas. Stewart; Larry K., b g by Larry Kinney, E. B. Courtwright; Virginia Barnette, b m Moko, W. G. Durfee & Co.

2:30 Trot.

Annie Conn, b m by On Conn, Axel Nelson; Levia W., s m by Peacock, Geo. E. Bunnell; Dark Streak, b g by Raymond, H. E. Webster; Caroline, b m by Robin, Leona Williams; Don de Lopez, b c by Kinney de Lopez, Hemet Stock Farm; Luana, b m by Kinney Lou, L. B. Taylor; Zombroso, br h by Larry Kinney, C. B. Courtwright; Guy Boy, br g by Guy Bellou, Mrs. Jas. Stewart; Larry K., b g by Guy Bellou, Mrs. Jas. Stewart; Maggie M., br m by Carlokin, C. H. Morgan; Oldfolks, b g by Del Coronado, W. G. Durfee & Co.; Allie Lou, br f by Kinney Lou, Hemet Stock Farm.

2:18 Pace.

Fritz the Dutch, b h by Worthwhile, C. R. June; Petty McKinney, b m by Petigru, G. D. Armstead; Alton S., ch g by Alton, H. G. Smith; Dolly Zombro, b m by Zombro, W. W. Whitney; Oro Lou, ch g by Kinney Lou, Hemet Stock Farm; Walter C., b h by Carpus, Bert Reno; Baxter Lou, ch g by Kinney Lou, L. B. Taylor; Santa Paula, b m by Silver Coin, Jas. Gill; Sunshine, b m by Longworth, A. J. Donnelly; Avetator, br h by Zombro, Marsh Thompson; Humpa Hill, b g by F. S. Turner, Jas. Stewart; Santa Fe, ch g by Zolock, E. B. Courtwright.

2:14 Pace.

Fritz the Dutch, b h by Worthwhile, C. R. June; Petty McKinney, b m by Petigru, G. D. Armstead; Alton S., s g by Alton, H. G. Smith; Dolly Zombro, b m by Zombro, W. W. Whitney; Sunshine, b m by Longworth, A. J. Donnelly; Walter C., b h by Carpus, Bert Reno.

2:10 Trot.

Danube, br g by Direcho, T. N. Goldsmith; Levia W., s m by Peacock, Geo. E. Bunnell; Allie Lou, br f by Kinney Lou, Hemet Stock Farm; Zolock Zar, br g by Zolock, Marsh Thompson; Larry K., b g by Larry Kinney, E. B. Courtwright; Virginia Barnette, b m by Moko, W. G. Durfee & Co.

ELIGIBLES IN LEXINGTON'S STAKES.

The Kentucky Futurity, for Three-year-old Trotters—Golden Axworthy, Allie Watts, Humfast, Bondella, Petress Burton, Native Spirit, Mary Putney, The Colorado Belle, The Exposer, Colorado Range, Sherley DeForest, Onward Forbes, The Royal Knight, Harvette, Don Marque, Peter Chenault, Henry Todd, Eudora Spier, Britton Forbes, Prinelda, Clenathan, Lady McKee, Rusticoat, Bacelli, Binland, Rose Watts and Deroche.

The Pacing Futrity, for Three-year-olds.—Arkancello, Sad Thoughts, Dorothy DeForest, Edith the Great, Miss Harris M., Richman, General Todd, Junior DeForest, Peter Worthy, and Lady Aubrey.

The Kentucky, for Three-year-old Trotters.—Captain Volo, Humfast, Allie Watts, Lillian the Great, General French, Peter Potemkin, Native Spirit, Northspur, Mary Putney, The Pierette, Bondella, Petress Burton, The Sunshine Girl, The Exposer, Isworthy McKinney, Ann Cecil, Colorado Range, Sherley DeForest, Deroche, The Royal Knight, Onward Forbes, Harlem Express, Harvette, Peter Belmont, Don Marque, Peter Chenault, Henry Todd, Eudora Spier, Prince Todd, Prinelda, Samoor, Luka A., Lady McKee, Clenathan, Rusticoat, Bacelli, George N. Patterson, Binland, Straight Sail, Lord Stout, Rose Watts.

The Futurity, for Two-year-old Trotters.—Nelly the Great, Directum Bingen, Suldine, Leading Spirit, Ollie Watts, David Rankin, Meja, Atlantika, BinaB., Walnut Tree, Helen E., Bingen Silk, Anvilite, Volga, and General Yorke.

The Lexington, for Two-year-old Trotters.—Good Gracious, Harrods Creek, Hermione B., Directum Bingen, Native Judge, Nelly the Great, Leading Spirit, Ollie Watts, Willow Tree, Oak Tree, David Rankin, Lady of the Clan, Meja, Atlantika, Helen Alicia, Mighty Robert, Revelry, Walnut Tree, Anvilite, Bingen Silk, Adele Block, Jack Mooney, Mike Axworthy, King Neb, Sis Bingen, Ashland Worthy, and Volga.

The Transylvania, 2:08 class, trotting.—Nominators (starters to be named Sept. 15), Beau Ideal Stock Farm, J. Crouch & Son, J. W. Davis, Agt., Deep Run Stock Farm, E. F. Geers, Hillanddale Farm, Samuel Harris, Dick McMahon, Thos. W. Murphy, Pastime Stable, V. L. Shuler, and E. J. Tranter.

The Castleton Cup, free-for-all class, trotting.—Joan, Margaret Druien, Etawah, Peter Volo, Peter Scott, Star Winter, May Mack, Lee Axworthy, Rhythmell and Ross B.

The Walnut Hall Cup, 2:12 class, trotting.—Belzona, Mawitza, Montferris, Linda Wrona, Worthy Prince, Alerta, The Guide, St. Frisco, Evelyn D., Axtien, Peter Scott, Sadie S., Great Isle, Mirthful, Adbell M., McCloskey, Princess Welcome, Loe Blossom, Nathan Axworthy, Dick Watts, Seneca Boy, Lou Jennings, Todd Temple and Lettie Lee.

The Ashland, 2:19 class, trotting.—Georgia's Prodigal, Lou Guy, Bora, Bida, Linda Wrona, Al Mack, Rala Hall, Willow Mack, Alerta, The Eno, The Guide, St. Frisco, Clifton, Lucy Reynolds, Bonnie Setzer, Peter Scott, Mary Guy, Laramie Lad, Ames Albington, Slip Past, Loe Blossom, Peter Vaughn, Tropic Dawn, Todd McGregor, Red Silk, Princess Margrace, Tommy Todd, Star Tramp and Harry Hamilton.

The Cumberland, 2:05 class, pacing.—Single G., Little Prince, Columbia Fire, Baron A., Del Rey, Ray Richmond, Our Colonel, Major Ong, Hal S., The Assessor, Jay Stone, Walnut Grove, Lelia Patchen, Beth Clark, Twinkling Dan, and Queen Abbess.

The Blue Grass, 2:10 class, pacing.—Homer Baughman, Lillian T., Camelia, Aconite, Russell Boy, Hal Conner, Presolite, Major Ong, Hal S., Peter Farren, Patrick M., Zanzibar, Pointer Patch, Miss Miriam, Hal Boy, Walnut Grove, The Beaver, Lustrous McKinney, The Importer, Graceful Ongale, Billy Law, Thistle Patch, Dwight Logan, Judge Ormonde, Altawood, Fred Mac, and Queen Abbess.

Oregon State Fair

Salem, Sept. 27.—Good weather and good attendance were features of opening day at the Oregon State Fair, though the racing was not fast or exceptionally sharp, as the track was not on edge by several seconds. Sea Waif annexed the slow trot without being forced to beat 2:30, and Delmas took the 2:10 pace in straight heats and slow time, the summaries being as follows:

Salem, Sept. 27.—3:00 trot, purse $300:

Sea Waif, b m by The King Red.....(McManus)	1	1	1
Edyth M., b m by R. Ambush.....(Keyt)	3	2	3
Salem Boy, b h by Zom Norte.....(Mauzey)	4	3	2
Honest Boy, b g by Palo King...(H. Hogoboom)	2	4	5
Zombronun, b m by Zombro.....(Merrill)	5	5	4

Time—2:31½, 2:32½, 2:36.

2:10 pace, purse $700:

Delmas, ch g by Dialect.....(Fidler)	1	1	1
Red Hal, b g by Hal B.....(Merrill)	2	2	2
Allerdaw, b g by Allertonian.....(W. Hogoboom)	4	4	3
Oro Mo, ch g by Demonio.....(Daniels)	3	3	ds

Time—2:19½, 2:22, 2:23½.

Sept. 28.—Things were a little merrier today at the fair grounds track, the 2:18 pacers getting organized to ramble miles under 2:10, the contest being a very pretty one. Potrero Boy, the big bay gelding that was the star of the North Yakima meeting, took the event in straight heats, driven out in the first by the other California entry, Contention B., and in the second and third by the Oregon mares, Lady Hal and Hal Edo, both by Hal B. Bonnie Ansel, with Charley Spencer up, straight-heated the 2:15 trotters in comfortable style, and Will Durfee's Helen Belle by Carlokin had small difficulty in winning the trotting division of the Oregon futurity, Ruth Ansel and Coos Bay dividing second and third money. The summary:

Sept. 28.—Oregon Futurity, three-year-old trotters, purse $2,000:

Helen Belle, b f by Carlokin.....(Durfee)	1	1	1
Ruth Ansel, b f by Prince Ansel.....(Dowling)	2	3	
Coos Bay, by McAlzo.....(Swisher)	3	2	

Time—2:27, 2:28.

2:15 trot, purse $700:

Bonnie Ansel, b m by Prince Ansel....(Spencer)	1	1	1
Oaklandmore, b h by Oakland Baron..(Lindsay)	3	3	2
Sargo, b g by Keeler.....(W. Hogoboom)	6	2	3
Wild Girl, b m by Wilt Nutling.....(Keyt)	2	6	6
Eloise Dell, br m by Alconda Jay.....(Daniels)	5	4	4
Prince Seattle, br g by Stam B.....(Woodcock)	4	5	5

Time—2:15, 2:16, 2:16¼.

2:18 pace, purse $600:

Potrero Boy, b g by Demonio.....(Daniels)	1	1	1
Contention B., b g by Copa de Oro.....(Durfee)	2	4	3
Lady Hal, b m by Hal B.....(W. Hogoboom)	4	2	4
Hal Edo, b m by Hal B.....(Archer)	6	5	2
Hal Bear, b h by Hal B.....(Lindsay)	3	3	5

Time—2:09¼, 2:09¾, 3:11¼.

Sept. 29.—That Potrero Boy is one of the best pacers that has hit the northwest in a long, long time was pretty conclusively proven here today when, after having won a straight-heat race yesterday in excellent time, he repeated the performance today in time still faster, approaching within a second of the track record that has stood for several years. The average time for the two races is just slower than 2:08½, which is more than creditable. Glenrose, the bay mare that Charley Spencer leveled with at North Yakima for a mile close to 2:07, drove him out in 2:06¼, after which Henry Helman assumed the contender's place with Mack Fitzsimmons, carrying him the final miles in 2:07 and 2:08.

The pacing futurity also went to Daniels with the good colt Bondalean, but not without a struggle. Will Durfee took the first heat with the Copa de Oro colt, Rayon de Oro, in 2:09¾, and was a hot contender in the other two. Two new 2:10 pacers is a record for the stake, and the time was very much faster than usual.

Charley Guion and Floradora Z. headed the summary in the 2:30 trot, as has become a habit with them, but the Zombro mare didn't get all the winner's money, Novela, from the Stetson stable, taking the final heat in handy style. The details:

September 29.—Oregon Futurity, three-year-old pacers, purse $1,500:

Bondalean, b c by The Bondsman.....(Daniels)	2	1	1
Rayon de Oro, b c by Copa de Oro.....(Durfee)	1	2	2
Janice L. P., br f by Hal B.....(Kirkland)	3	3	3

Time—2:09¾, 2:10, 2:12¾.

2:30 trot, purse $500:

Floradora Z., b m by Zombro.....(Guion)	1	1	4
Novela, b m by Letrado.....(Stetson)	2	3	1
Perrico, b g by Shepherd Laddie.....(Lindsay)	3	4	2
Columbia T., b m by Bon Guy.....(Daniels)	4	2	3
The Bulletin, ch h by Palo King..(H. Hogoboom)	5	5	5

Time—2:15, 2:15, 2:16¾.

2:08 pace, purse $2,000:

Potrero Boy, b g by Demonio.....(Daniels)	1	1	1
Mack Fitzsimmons, ch g by Bob Fitzsimmons...			
.....(Helman)	3	2	2
Glenrose, b m by Beaumont.....(Lang)	2	3	5
Francis J., b h by The Patchen Boy.....(Grant)	4	5	3
Delmas, ch g by Dialect.....(Wilbourne)	5	7	4

Scarlet Trent and Haltamont also started.

Time—2:06¼, 2:07, 2:08.

DEATH OF HAMBURG.

News was received in Lexington last Saturday of the death of Hamburg, the peerless racehorse and sire, at Brookdale Farm, near Red Bank, N. J. In the passing of Hamburg, the breeding interest of America loses a sire of rare value and quality, for although he was twenty years old, it had been hoped that he might live to further enrich the thoroughbred strains of this country for several years to come.

His fame as a racehorse in his day was world-wide, and since his retirement to the stud he has produced not only good racehorses, but some of the most highly prized matrons of the turf.

Mr. W. L. Powers, who purchased Hamburg from Mr. John E. Madden in 1897 for $40,000 for the late Mr. Marcus Daly, pays Hamburg the following tribute in a letter to The Record:

New York, Sept. 11, 1915.

Editor Thoroughbred Record:

The announcement in today's papers of the death of Hamburg at the Brookdale Stud in New Jersey will be read with interest everywhere as he was one of the greatest racehorses the world has ever known, and so a few facts concerning him may not be amiss.

Hamburg was bred by the late James E. Kittson, who subsequently sold the mare Lady Reel to C. J. Enright, and it was on his Elmendorf Farm that the famous brown colt by Hanover first saw the light on April 19, 1895. Mr. Enright kept him until the autumn of that year when he was a weanling and then sold him to John E. Madden, through his friend the late Gus Straus, for about $800. Hamburg was broken before he was a year old and was trained by Charlie Patterson until the end of his brilliant two-year-old form, when in December, 1897, the writer, acting for the late Marcus Daly, purchased him from Mr. Madden for $40,000 and sent Billy Lakeland to Louisville to get the horse and bring him back to his training establishment at Brighton Beach. It was in the following year, 1898, that he won the Realization and the Brighton Cup in Mr. Daly's colors and in August of that year he was sent to Montana and retired to the stud, making his first season in 1899.

The unfortunate death of Mr. Daly in November, 1900, caused the dispersal of his Bitter Root Stud, the best in America, and on January 30, 1901, Hamburg was sold to the late William C. Whitney, Mr. Madden acting for Mr. Whitney at the time of the sale, the late James B. Haggin being the last contending bidder. It was on this same night that a cable order to buy him for $50,000 was received from Sir Ernest Cassel, which shows that the horse was wanted in England at that time. He was then sent to the La Belle Stud in Kentucky, where he remained until after the death of Mr. Whitney in 1904, an, on October 10th of that year, he was again sold in the Madison Square Garden for $70,000 by the estate, to Harry Payne Whitney, whose property he remained until the time of his death.

Miss Hamburg, the dam of Emden, was his first-born, and Mamari his first winner. Biturica, the dam of Maskette, was also of this same year.

The next season came Inflexible, Leonidas and Hamburg Belle, and the following year the peerless Artful forever made him famous as a sire. Later on came Burgomaster and Borrow, but like Lexington, it is through his daughters that Hamburg is destined to be best known.

Many are still familiar with his racing career and it is a matter of record that he could carry weight and run any distance. It is sufficient to say that he had few equals and no superiors, and, as he was a horse of great constitution and fine temper, it is probable that his fame will survive so long as the American Stud Book is published.

W. L. POWERS.

The following, in a nutshell, is the turf record of Hamburg, winner of the Great Trial, Double Event, Great Eastern Handicap, Realization Stakes, Brighton Cup, etc.:

Age.	Starts.	Wins.	2d.	3d.	Unp.	Amt.
2	16	12	3	1	0	$42,100
3	5	4	0	1	0	22,425
Total—	21	16	3	2	0	$64,525

Hamburg is a descendant in the male line of Herod. His sire, Hanover, was the champion of his day, winner of thirty-two races up to five years of age of the value of $120,912. Hanover was the premier sire of America for four years—1895, '96, '97 and '98—having 179 winners of 573 races, worth $434,725, in the above mentioned years.

In the female line Hamburg belongs to the great Dance family. His dam, Lady Reel (half-sister to Domina), is by the high-class race horse Fellowcraft, the first to lower the four-mile record of Lexington, which had stood unapproached for many years.

Hamburg's tabulated pedigree follows:

Hamburg, Br h, 1895:
- Hanover
  - Hindoo
    - Virgil
    - Florence
  - Bourbon Belle
    - Bonnie Scotland
    - Ella D.
- Lady Reel
  - Fellowcraft
    - Australian
    - Aerolite
  - Mannie Grey
    - Enquirer
    - Lizzy G.

Lady Reel (Hamburg's dam) was purchased by Col. Milton Young as soon as her racing days were over, and on January 6, 1894, she was sold to J. E. Kittson (who rented Fairlawn Farm near Lexington) along with thirteen other mares and three yearlings for $14,000. A consideration of the sale was that Mr. Young was to allow Mr. Kittson to breed the coming season to any of his stallions should any of these mares prove not in foal or have a dead foal. Lady Reel that year had a dead foal, so Mr. Kittson sent her to Hanover, the result of the mating being Hamburg.

Mr. Kittson sold the mare, in foal, to C. J. Enright, then proprietor of Elmendorf Stock Farm, and here Hamburg was foaled as the property of Mr. Enright. Mr. Enright later sold Lady Reel to Captain Sam Brown, of Christiansburg, Ky., who in turn sold he to Marcus Daly.

Hamburg was the premier sire of America in 19(with thirty winners of sixty races, worth $158,16. This year, up to the end of August, he is well up o the leading stallion list with thirteen winners of si teen races and $30,982.

The racing seasons of 1914 and 1915 have bee marked by the astonishing success of the produce c mares by Hamburg. Regret, the smartest two-yea old of last season and the winner of the Kentuck Derby this year, and Thunderer, winner of the Futu rity the other day, are from the Hamburg mare Je sey Lightning. Jersey Lightning's dam was Dais F., a daughter of Modesty. Chicle, winner of th Champagne Stakes, is a son of Spearmint (an Eng lish Derby winner) and Lady Hamburg II., a daugh ter of Hamburg and Lady Frivoles, she a daughter o St. Simon. Chicle was bred in England. His dam Lady Hamburg II., raced successfully under Mr Whitney's colors as the "Hamburg—Lady Frivole filly."

Emden, which Mr. Whitney declares is the fastes two-year-old he brought up from Brookdale in the spring, is a son of Broomstick and the Hamburg mare Miss Hamburg. Miss Hamburg was a daughte of Hamburg and The Task. The Task, a daughter o Barcaldine, was the mother of Sain, sire of Jack At kin and Nealon. Emden struck an ankle and lame himself in a race at Aqueduct and is out of the run ning until next season. But Mr. Whitney predicts that he will train on into a first-class distance run ning three-year-old.

Adroit is a daughter of Broomstick and Artful, she a daughter of Hamburg and Martha II. Artful was probably the greatest race mare the American turf has seen. She defeated Tradition and Sysonby in the Futurity of 1904, and afterward stepped three quarters of a mile over the Morris Park straightaway in the amazing time of 1:08 flat under the staggering burden of 130 pounds. Sam Slick and Paintbrush were Artful's most creditable contributions to racing ahead of Adroit. Adroit seems to be her best yet. She is a beautifully turned filly, and she galloped three-quarters of a mile in 1:09 recently. That is the best time made over the Belmont Park straightaway this season, and only a second slower than Artful's Morris Park record.

One of the cleverest two-year-olds in Canada last season was King Hamburg, a son of Hamburg Belle, a Futurity winner. Barnegat, another horse, better known in Canada than in the United States, is another son of the prolific Jersey Lightning. Queen of Hearts, a full sister of Artful, had Tarts and Trumps racing for her last season and the season before.

Gifford Cochran has still another corking good Hamburg mare in Adriana. She, a daughter of the Darebin mare Kildeer, which came into prominence last year as the dam of Coquette. Coquette was a first rate filly in a season that will long be remembered for its good fillies.

This year, Adriana is creditably represented by Celandria, a stake winner and as good a filly at least as Coquette. Celandria, which is most stoutly built, was right there in the Futurity. Cochran bought Adriana from A. B. Hancock.

It is probable that in the crops of two-year-olds yet to come from Brookdale there may be another great Hamburg horse or so. Mr. Whitney bred his best English mares to this son of Hanover this year, last year and the year before.—Thoroughbred Record.

Eighth Day at Columbus.

[Concluded from page 5.]

Gregor and Wilkes Brewer also started.

Time—2:10¼, 2:12¼, 2:08½, 2:10¼, 2:12¼.

Horseman Futurity, three-year-old trotters, purse $10,000:

Mary Putney, b f by San Francisco..(McMahon)	6	1	1
Humfast, b f by Trampfast.....(Murphy)	1	2	7
Colorado Range, b c by Colorado E..(McDonald)	2	5	2

Native Spirit, Bacelli, Allie Watts, Henry Todd, Bondella, Florence White, The Colorado Belle, The Royal Knight and Prinelda also started.

Time—2:09¾, 2:07¾, 2:08½.

Arch City, 2:10 pace, purse $3,000 (unfinished):

Judge Ormonde, bl h by Ormonde (Valentine)	7	1	1	2
Russell Boy, b h by Rustic Patenter...(Geers)	2	4	2	1
Hal Boy, b g by Hal B.....(McMahon)	1	2	3	6

The Beaver, Queen Abbess and Peter Farren also started.

Time—2:03½, 2:03¼, 2:02½, 2:04¾.

2:13 pace, purse $1,200 (unfinished):

Dwight Logan, br h by Bert Logan....(Valentine)	1	1	
Grace D., ch m by Anderson Wilkes.....(Lane)	2	6	
Tramp a Bit, ro h by Trampfast.....(Jamison)	7	2	

Ross Keith, Camelia, Pauline Hilda, Gilbert M. and Admiral Dewey II. also started.

Time—2:06¼, 2:05½.

To beat 2:04¼ trotting:

Margaret Druien, b m by Peter the Great....(Cox) won

Time—:30¼, 1:01¼, 1:32, 2:03½.

"MORE NECESSARY THAN OATS."

Mr. L. B. Wadleigh of Pierre, S. Dak., writes on March 8, 1915: "I am quite extensively engaged in raising horses, having at the present time over two hundred and for this class of horses, were I obliged to discontinue the use of oats, for which I can easily find a substitute, or the use of Absorbine, for which with twenty years' experience I have been unable to find a substitute, I most certainly would discard the former and retain the latter."

ABSORBINE is economical, as only a few drops are required at an application. Does not blister or remove the hair and horse can be used.

ABSORBINE is used by horse owners and trainers the world over. For puffs, swellings, thoroughpins, strains, shoe boils and all blemishes, it cannot be beat.

ABSORBINE, $2 a bottle, at druggists or postpaid.

W. F. Young, P.D.F., 54 Temple St., Springfield, Mass.

NOTES and NEWS

Bondalean (3) 2:10.
Rayon de Oro (3) 2:09¾.
Both records in the same race.
These are new figures for the Oregon Futurity.
Looks like the colt pacers at the exposition would be great contests.

◈◈◈

The Oregon State Fair is in full blast.

◈◈◈

Riverside occupies the limelight next week with her district fair.

◈◈◈

The Proof, driven by Henry Thomas, was once second and once third during the week at Sedalia, Mo.

◈◈◈

Mary Putney "did it again" this week at Columbus, this time in the Horseman stake, reducing her record to 2:07¾.

◈◈◈

Don't forget that Woodland Sale. A number of aristocratic matrons will be added to the offerings in next week's announcement.

◈◈◈

Bonnie Ansel, the big Prince Ansel mare in Charley Spencer's string, has been performing nicely up north and crowed the ten mark at North Yakima.

◈◈◈

In six days the Grand Circuiters made hay while the sun shone at Columbus, and on the seventh—what's the use. You guessed right the first time.

◈◈◈

Bonnie Ansel, Teddy Bear, Potrero Boy, Delmas and Floradora Z., all consistent performers on the North Pacific circuit, have been winners this week at Salem.

◈◈◈

Potrero Boy now carries a winrace record of 2:06¾. Potrero Girl is a real producer of pacing speed, as Airlie Demonio and Potrero Boy are both better than 2:05 performers.

◈◈◈

Teddy Bear put the track record at Walla Walla at 2:09¼, two seconds faster than the old figure, doing the task so nicely that some of those present think him up to a mile in 2:05 before the season closes.

◈◈◈

Clarence Wilkes 2:28¼ secures his first performer this year—William G. 2:12½, the chestnut gelding trained and raced by Will Duncan of Colusa. The record is not a winrace, and the horse is better than a 2:10 pacer by a good margin.

◈◈◈

The California stables haven't been at all backward about winning money on the North Pacific circuit, but they don't get all of it by any means. Some of those northwestern cayuses are wolves in their own right and do not hesitate to howl.

◈◈◈

As per usual, William Gee Durfee speared the trotting division of the Oregon futurity, this time with another Carlokin, Ruth Ansel by Prince Ansel dividing second and third money with the Oregon youngster, Coos Bay, in George Swisher's stable.

◈◈◈

Walla Walla got the best of the "break" from Spokane in the matter of horses for the fair races, the swifter birds patronizing the former city. Could they have avoided the same week for their events, both would have benefitted greatly, as practically all stables would have made both points.

◈◈◈

Jack Dinue arrived back in San Francisco this week after a trip north, having gone to Spokane to fulfill his old position as starter for the running races at the interstate fair, where he has been a "fixture" for several years. Jack reports good racing at the inland empire city and a successful fair, with promise of future improvement, which is welcome news.

◈◈◈

A message from C. L. DeRyder states that the Pleasanton futurities will be raced at Pleasanton Driving Park During the week following the Arizona State Fair, which would place the date sometime between November 22 and 27, the exact time to be announced shortly. As all the other colt stakes customarily given at different points in California are scheduled to take place during the exposition meeting, the plan adopted for staging the Pleasanton stake will give the horsemen a chance to freshen up their youngsters, as well as to take in the Phoenix meeting with their older campaigners.

◈◈◈

Henry Helman had a jolt of hard luck when Prince Zolock was taken sick enroute from Walla Walla to North Yakima, the fast son of Zolock not being able to start in his early engagements. On getaway day Henry turned him around in the first heat of the 2:18 pace for a good mile in 2:06½, but on the advice of a number of vets the judges allowed the horse to be drawn. As the races were on the every heat a race system, Henry drew down shipping money whereas under the old plan he would have had no money from the purse—nothing but a record. Had the horse been O. K. the race would have been "pickings" for him, from all appearances.

The exposition horse shows began Thursday.

◈◈◈

The dopesters have figured out that Ed Geers, in the course of his career in the sulky, has won over a million dollars in stakes and purses. The only regrettable feature is that a crooked banker cost Ed the major portion of the several thousand dollars that represented the savings from his personal share of his winnings. At that, the G. O. M. seems perfectly competent to lay up another stake before he quits riding behind 'em.

◈◈◈

Will DeRyder did not go to Columbus, but expected to start for home today from Peoria. Dicto and Spriggan have both been in excellent form for some weeks and as the latter is entered in the big trotting stake here next month William decided to call a good thing plenty and come on back to Pleasanton and get shaped up for the season's closing days. Several other horses will probably make the trip with his shipment.

◈◈◈

White Sox and Virginia Barnette, the stars of the Durfee stable, appear in company next week at Riverside for the first time since the close of the spring meeting at the exposition. The management at Riverside is certainly to be congratulated on securing W. G.'s presence with his stable, as the gate receipts will be swelled noticeably thereby. The race between White Sox, San Jacinto and Vera Hal ought to be worth a long journey to see, and all the events promise fine sport.

◈◈◈

Walter B. Jennings, for many years one of California's most devoted followers of thoroughbred racing and a winner on almost every track of prominence in this country, has decided to get back in the game actively and with the intention of getting the best youngsters possible to re-introduce his colors is enroute to England to attend the yearling sales at Newmarket. He not only expects to procure some future winners for himself but also carries "open orders" for the purchase of a number for other western breeders.

◈◈◈

Walter Palmer, one of the best known horsemen in the country, arrived in the city this week to assume his duties as judge at the P.-P. I. E. horse shows, which began Thursday under most pleasing circumstances. Entries in the standard bred class were light in number, but Mr. Palmer expressed gratification over the individual qualities of the contesting animals, as well as over the excellence of their blood lines. Owing to the fact that our forms are largely made up by Thursday evening the list of awards and account of the show were of necessity carried over until next week.

◈◈◈

Horsemen who have surplus stock to sell or who wish to add to their present holdings will be greatly interested in the announcement appearing on our first advertising page, to the effect that Charles L. DeRyder will hold his fall sale in this city during the time in which the exposition race meeting is in progress, the exact date and location of the event to be made known shortly through this paper. Mr. DeRyder has for the several seasons last passed conducted the most successful sales of light harness horses held in California, and has taken advantage of an exceptionally favorable opportunity for the staging of this one. As a rule, only our "home buyers" have been patrons of our trotting sales of late, but horsemen from far and near will be gathered here during the P.-P. I. E. meeting, so that bidders should be much more numerous than usual. The sale will be headed by extensive offerings from the MacKenzie establishment, all of exceptional quality, and high class consignments are solicited from all quarters subject to Mr. DeRyder's customary terms and guarantees of service. Persons wishing to send horses to this sale should act promptly in order to secure full advantage of advertising, and while Mr. DeRyder will not arrive home from the big line for a few days, all communications addressed to him at Pleasanton will receive prompt attention.

KEEPING UP WITH LIZZIE.

Time was when the farmer's girl and the farmer's wife were supposed to do the cooking, tend to the house and do the milking and the washing and mending, and this was their daily grind three hundred and sixty-five days in the year. With the organization of canning clubs, hog and poultry clubs and the work of the girls' industrial colleges life on the farm for women folks, and especially for the girls, is becoming more profitable and pleasant. Discussing the new country girl, Farming Business has this to say:

The country girl has arrived. She is the new woman on the farm, and she is putting new life into the farm. It was the boys' and girls' clubs that brought her out. There was a day when Lizzie was a pale, spindling affair that sat in the hammock and read Laura Jean Libby and pined for the hero to arrive in the shape of a prince. She din't bother with the dishes and the chickens, because mother wanted her to have opportunities that she had not enjoyed and that neighboring girls would not get. Lizzie was a little bit better than the rest of the family, and she was early groomed for her place in society that she was to inherit when the prince claimed his own. The clodhopper boys of the neighborhood were shooed away from the fair one, because she was not for such a boy as they. Father mortgaged the farm and gave up the idea of buying shoats with family trees when mother decided to ship the child to Boston for a finishing. It was mother's finish when the news leaked out that Elizabeth had crossed her wires and eloped with a soda fountain assistant. Lizzie's training wasn't there when it came to doing the dishes and mixing biscuits.

The new Lizzie that has come onto the scene with the boys' and girls' clubs has put some snap into the old farm. She has taken a little patch of dirt in the corner of the garden and fed the family and made over a hundred dollars for herself in one season simply by reading three or four dingy little bulletins from Uncle Sam and running around to canning bees with the other girls. She has started mother to putting up more fruit in an easy way and so she can give the family better food with smaller grocery bills and a desire to do something bigger themselves. She has put business in the kitchen and shown her mother how to make the garden go farther by following science, sowing pure bred seed of standard varieties and keeping books. She won trips to Washington where she met congressmen and the president. Besides, she won numerous cash and utility prizes. She didn't wheedle father out of pin money to buy pink parasols; she got out in the garden and fought the rag weeds and the cutworms to a standstill with a checkered sunbonnet to ward off the rays of the sun, and she earned money enough to go to college. Lizzie isn't picking out any finishing schools either. She is going to the state agricultural college as soon as she can get through high school, and she intends to finish making over the farm into a business proposition when she gets back and gets her brothers and sisters imbued with the idea of business on the farm. Lizzie is a business proposition these days, and she is sticking to the farm and picking out the kind of a hero that will be able to help make good on a quarter section when she decides to break home ties.—Texas Stockman and Farmer.

SADDLE HORSE QUALITIES AS VIEWED BY MR. RAILEY.

Charles Elmer Railey of Lexington, Ky., who is the judge of saddle horses at the horse show of the Panama-Pacific International Exposition now in progress, is recognized as being one of the ablest experts on saddle horses in America. A resident of Kentucky, the state famed for its fine horses, he has been brought up from childhood among some of the finest riding animals in the country.

He has ideas of his own regarding the merits or demerits of a horse, and regarding the proper means of judging them.

In a recent announcement made by him to the exhibitors and riders at the exposition show, after urging harmony between the exhibitors, riders and judge, he said, in part:

"Personally, I do not think the speed of the show horse need be limited, provided he is not forced to such speed as will cause the performer to hop, pace behind or in any way lose the purity of his gaits.

"The majority of riders are prone to play to the gallery, to get the applause of the multitude—in which not one in a thousand knows what the class calls for or whether the horse is performing correctly or incorrectly. They see the horse tearing around the ring at a great rate of speed and it thrills them. They do not see the unsteadiness, the faulty, unbalanced gaits, the pulling and the hogging on the bit. Then, when the judge turns down this champion of the crowd, he is severely criticized. So, after all, the American Saddle Breders' Association rule of twelve miles an hour is a good one and if adhered to there would be less of incorrect, impure gaits in the five-gaited saddle horse.

" However, if any entry comes before me with absolutely pure gaits, he will receive credit for speed, if that speed does not cause a faulty performance.

"The American saddle horse is a distinct breed, and has beauty, intelligence, usefulness and similarity of type. While he is useful in various ways, he is primarily a saddle horse, a pleasure horse, a tonic for brain and body. He must have beauty, carry himself in a proud way, must have a light mouth and pure gaits and a certain amount of speed.

"Failing in these requisites, you will find that he bores or pulls on the bit, which will make him unsteady, unbalanced, strung out, and hop or pace or all. Such a horse will receive no consideration.

"I wish to impress on you that the awards will be made absolutely on the performance at the time. If the winner should meet the contenders again, I will judge him as though I had never seen him before and he must fairly beat his field again.

"Past performances, reputations from press or high prices paid, or the applause of the crowd will have no bearing on my decision.

"My usual method of judging is to allow the exhibitors, when they first come into the ring, to go as they please for a few minutes, or until their mounts have settled and are over the excitement of entering the arena. Then a line up and an individual test.

"Your mounts will receive credit for purity of gaits, for speed, for form, for brilliancy, for balance, for lightness of the mouth, for beauty, for manners, for soundness. The saddle horse is not a racing horse. Speed is all right if you can combine it with form and purity of gaits.

"You will get a fair deal and I hope you will help me in every way possible."

"JOE" WING CROSSES THE LAST DIVIDE.

Into thousands of farms and ranches in this country as well as abroad the news of the recent death of "Joe" Wing of the Breeder's Gazette was received as would have been the tidings of the death of a close and valued friend, for few if any writers upon agriculture and stock raising enjoyed a wider personal acquaintance or were held in higher esteem. His opinion on any subject bore weight, for he knew what he was talking about every time he had an utterance to make. He was intensely "human," an almost ideal American, optimistic, enthusiastic, and always practical. His teachings have meant money and more of it in the lines to the uplifting and furthering of which his life was devoted, and the scope of his knowledge was world-wide. The following sketch is taken from the current number of the journal which he served so faithfully and well:

"Joseph E. Wing was born in Hinsdale, N. Y., Sept. 14, 1861, and was buried the day before he was 54 years old. His parents brought him to Mechanicsburg, O., when he was six years old, and his father located on the land which Mr. Wing subsequently brought to international fame under the name of Woodland Farm. He was educated in the local country school and the village high school, and later in an academy in New York state. He worked on his father's farm, except for about one year which he spent in northern Florida, until in March, 1886, when he went west and worked for a time in the mines of Utah and California. Then he sought employment on the Range Valley Ranch in Utah, of which he finally became foreman and part owner.

"In 1889 he was requested by his father to return home and help with the conduct of the old farm. From that time he has been associated with his brothers Willis O. and Charles B. in the management of the original Wing farm, which has been materially enlarged in acreage and has won national renown in its production of alfalfa and seed grains, and in the feeding of lambs.

"As a boy Mr. Wing manifested a decided literary gift, inherited from his mother, who survives him at the age of eighty years, but in such feeble health that the fact of her son's death was not made known to her. This literary gift young "Joe" early exercised through the local papers, with a strong tinge of the humorous. Later he became a correspondent of farm papers, and his communications appear in "The Country Gentleman" and "The Ohio Farmer" of more than 20 years ago. Mr. Wing's connection with The Gazette dates back to June 10, 1896, when his first communication appeared on the subject of alfalfa in Ohio. He developed such a genius in presenting the facts of farm life, and was so earnest and successful in his advocacy of alfalfa culture, that he was encouraged in his work for this journal. Some time later he was invited to enter into an arrangement whereby his writings would appear exclusively in The Gazette, and this engagement continued until his death. Later Mr. Wing began visiting farms in different sections throughout the country as the traveling correspondent of The Gazette and for a while before his death he bore the relation of the editorial correspondent to this journal.

"In its service he has made two journeys abroad, studying foreign agriculture and stock-breeding. Later he spent some months in South America gathering facts and figures of the wool industry for the tariff commission appointed by President Taft.

"Mr. Wing was a voluminous writer, displaying a wide range of information and a versatility of style which has commanded for him the admiration and affection of many thousands of farmers. In addition to his contributions, answers to inquiries, stories and editorials in this journal, he wrote for The Gazette press the following books: "Sheep Farming in America,' 'Alfalfa in America,' 'Meadows and Pastures,' and 'In Foreign Fields.'

"In Utah Mr. Wing became acquainted with the value of the alfalfa plant, and introduced it successfully in Ohio. He was the foremost advocate of alfalfa growing in America and its closest student. Through this journal and his book he contributed more than any other agency to the development of this profitable farm crop. His barn-building and farm-building work was among the most valuable of his services to agriculture. The joist frame form of barn construction was brought into such favor by his advocacy of it that it is widely termed the Wing joist-frame barn. His study of the use of cement on the farm led him into counsels which have added much in the cause of permanent farm equipment. His advocacy of lime for the sweetening of acid soils helped materially in the quiet revolution in American agriculture which has brought lime back to its proper place in farm practice.

"While devoting much of his genius as a teacher to the material affairs of the farm, Mr. Wing was ever mindful of the higher plane on which human life should rest. A poet by nature, he was yet a builder. He built the material and also the immaterial, contributing largely to that uplift which has raised modern farm life to a higher level than ever before attained. The things worth while in life were ever in mind, and he was eager to give others the glimpses of the higher life which he caught from the mountain tops. He was an optimist by nature, and preached the gospel of sunshine. Under his magic pen the common affairs of farm life took on a touch of the romantic. He was a nature-lover, and taught his love persuasively and successfully.

"In addition to Mr. Wing's work for The Gazette he had two distinct lines of personal employment wholly independent of this journal. He was in wide demand of late years as a lecturer at farmers' institutes and conventions and at agricultural colleges, and he devoted much of his time and strength to platform work. For some years also Mr. Wing was called to many sections by individuals, land-developing syndicates and railroads as an expert adviser in soils and the development of farm lands, especially as regards alfalfa culture. The extensive opportunity for observation and study gained in work for this journal qualified him for service in this capacity, and he won a fine reputation as an adviser.

"Mr. Wing's death was believed to be caused by that mysterious southern-country disease known as pellagra. He may have contracted it when in South America, or on one of his numerous southern trips in this country. For some years he believed himself tuberculous. His initial move to Utah was with a view to combating that condition. Of recent years when in failing health he thought that disease had claimed him as a victim. At a famous sanitarium, where he sought treatment last year, pellagra was diagnosed as the possible trouble, but so little is known of that disease in this country that only at the last were the symptoms such as to lead to a diagnosis which the doctors thought conclusive. Even then one important symptom of the disease was lacking."

MILWAUKEE, WISCONSIN.

SPOKANE INTERSTATE FAIR.

Spokane, Sept. 18.—With paid admissions for the week aggregating nearly $35,000, the Interstate Fair which closed today proved not only self-sustaining but slightly profitable, in welcome contrast to the situation developing last season when a large deficit had to be made good. The exhibits in all departments were generous in number and exceptionally high in quality, the Inland Empire being unsurpassed by any section of the northwest in the excellence of its live-stock and the products of its fields and orchards. Special features added to the attractiveness of the daily programs, and good crowds found their way into the grandstand to applaud the races, both to harness and under saddle, the latter being the most numerous. The harness races were sharp and in one or two instances fairly fast, Bitter Root Rose trotting within a quarter of a second of the track record for that gait. The summaries follow:

Spokane, Sept. 16.—2:25 trot, purse $750:
Floradora Z., b m by Zombro.....(Guion) 1 1 2
Hallie B., b m by Hal B.....(Swisher) 2 3 1
Amy McKinney, bl m by McKinney..(Wilbourne) 3 2 3
Time—2:21¼, 2:19¾, 2:17.

2:18 pace, purse $750:
Scarlet Trent, b g by Parovas.....(Brown) 1 1 1
Hal Edo, b m by Hal B.....(Archer) 2 3 2
Sister Norte, b m by Del Norte.....(Maxwell) 3 2 3
Molly, b m by Knox.....(Leggett) 5 4 4
Truxton King, ch h by Idol Chimes....(Stanford) 4 5 5
Chestnut Hal, 6-dis.; Lottie Dishman, dis.
Time—2:14¾, 2:13½, 2:16½.

Sept. 17.—2:25 pace, purse $750:
Nelly J., b m by Zolock.....(Archer) 1 3 2
T. R. McGregor .....(Shaw) 2 1 6
Nigger Boy, bl g by Oregon Patch.....(Lance) 4 5 1
Maude DeFine, br m by Prolong.....(Guion) 5 2 5
Teddy Ham, 3-4-3; Gazelle Deer, 6-6-4; High Ho, ds.
Time—2:16, 2:18¾, 2:19.

Sept. 18.—2:15 trot, purse $750:
Bitter Root Purse, bl m by Evergets.....(Young) 3 1 1
The Frisco, ch g by Caution.....(Lance) 1 3 4
Nuristo, br g by Nushagak.....(Spencer) 2 2 3
Dan Matthews, b g by Eagle Blood.....(Brown) 4 4 2
Time—2:16¼, 2:17¼, 2:15¼.

2:11 pace, purse $750:
Ed Karnack, ch g by Bob Fitzsimmons..(Young) 1 1 1
Soumise, b m by Billy Dunlap.....(Leggett) 2 3 3
Hal Edo, b m by Hal B.....(Archer) 3 4 2
Big Squaw, bl m by Kewanee Boy.....(Payne) 4 2 4
Glen Rose, 5-5-5; Parkwood, 6-dr.
Time—2:12¼, 2:11¼, 2:13¼.

WALLA WALLA, WASHINGTON.

Walla Walla, Sept. 15.—While the publicity department of the Walla Walla County Fair devoted most of its activities to boosting the "Frontier Day" feature, the harness racing at the first three days of the fair drew pretty well purely on its merits, and those in attendance had the pleasure of witnessing the best racing that has ever been given here. Recent rains made the track slow and heavy for Monday's events, but on Tuesday and Wednesday the footing was good and the time fast. The races on Wednesday were all sharp contests and the former track record of 2:11¼ was considerably "manhandled." Lady Hal in the slow class paced within a half-mile of it, Delmas in the free-for-all equaled it, and Teddy Bear in the 2:11 class beat it every heat, establishing the new mark of 2:09¼. The summaries:

Walla Walla, Sept. 13.—2:25 trot, purse $750:
Floradora Z., b m by Zombro.....1 1 1
Columbia T., b m by Bon Guy.....2 2 3
Hallie B., b m by Hal B.....3 3 2
Amy McKinney, bl m by McKinney.....4 4 4
Monte Carlyle, ds.; Bonnie Ansel, ds.
Time—2:18¼, 2:20¾, 2:18½.

2:18 pace, purse $750:
Hal Edo, b m by Hal B.....2 1 1
Potrero Boy, b g by Demonio.....1 4 3
Prince Zolock, bl h by Zolock.....3 2 2
St. Elmo, b g by King Alexis.....5 3 5
Scarlet Trent, 4-5-4; Belle Smith, 7-6-6; Indian Hal, 6-7-8; Nigger Boy, 8-7-7; Truxton King, 9-ds.
Time—2:12¼, 2:13¾, 2:14¾.

Sept. 14.—2:18 trot, purse $750:
The Frisco, ch g by Caution.....1 1 1
Eloise Dell, br m by Alconda Jay.....2 3 2
Sargo, b g by Keeler.....3 2 3
Marguerita A., b m by Zombro.....4 4 4
Time—2:18½, 2:19¾, 2:19¼.

2:25 pace, purse $750:
Lady Hal, b m by Hal B.....1 1 1
Mack Fitzsimmons, ch g by Bob Fitzsimmons.....2 2 2
Nelly J., b m by Zolock.....4 3 3
Tillamook Maid, 6-5-4; Maude DeFine, 5-ds.
Time—2:13¼, 2:11¾, 2:12¼.

Sept. 15.—2:11 pace, purse $750:
Teddy Bear, b h by Del Coronado.....1 1 1
Harold Welcome, b h by Welcome.....2 3 2
Prince Zolock, bl g by Zolock.....3 2 3
Indian Hal, b h by Hal B.....4 4 4
St. Elmo, 5-5-ds.
Time—2:09¼, 2:10¼, 2:09¾.

Delmas, ch g by Dialect.....1 1 1
Allerdaw, br g by Allertonian.....2 2 2
Haltamont, b h by Hal B.....3 3 3
Potrero Boy, b g by Demonio.....4 4 4
Time—2:12¾, 2:11¼, 2:13½.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

NEW STATE GAME LAWS ENACTED IN 1915.

More than 240 new game laws were enacted during 915—a larger number than in any previous year ex- ept 1911, according to Farmers' Bulletin 692, "Game aws for 1915." Forty-three States held regular leg- slative sessions, and in all of these States except rizona, Georgia, and Nebraska some changes were ade in the statutes protecting game. The largest umber of new game laws passed in any one State vas 61, in North Carolina; but in California, Con- ecticut, Maine, New Jersey, Oregon, Pennsylvania, nd Wisconsin the number reached 10 or more. Sev- ral measures were vetoed, including a general game und bill in Idaho, the first bill appropriating the unting-license fund in Pennsylvania, a bill protect- ng bears in California, and three sections of the ame bill in Washington. A number of bills were ntroduced for the purpose of harmonizing the State aws on migratory birds with the Federal regulations.

In at least nine States changes were made which brought the seasons into substantial agreement, viz., California, Connecticut, Maine, Michigan, New Hamp- shire, Tennessee, and West Virginia. In Illinois the seasons for all migratory birds except coot (mud- hens) and waterfowl, and in Washington for the smaller shore birds, were made to conform with the regulations under the Federal law. Uniformity was also secured by provisions in the laws of Connecti- cut, Maine, New Mexico, North Dakota, Washington, and Wisconsin, prohibiting hunting between sunset and sunrise. On the other hand, Delaware adopted a resolution opposing the migratory1bird law, and Ohio and Rhode Island, which had harmonized their seasons in 1914, changed the seasons on waterfowl this year.

As a result of the decision of the Supreme Court of the United States on January 19, 1914, sustaining the alien hunting law of Pennsylvania, legislation prohibiting aliens from hunting or owning shotguns or rifles was enacted in at least four States—Massa- chusetts, New Jersey, North Dakota, and West Vir- ginia—but certain exceptions based on property qualifications were made in Massachusetts and New Jersey.

Close seasons extending for several years were provided for certain kinds of big game and also for game birds. Hunting mountain sheep was suspend- ed in Idaho, Montana, and Washington, and goats were protected until 1918 in Montana. Moose were protected for four years in Maine, the first absolute close season on this species for 35 years—since the suspension of hunting from 1878 to 1880. Antelope were given indefinite protection in New Mexico and Montana. In Michigan, New Mexico, and Oklahoma prairie chickens were protected for several years. Michigan extended complete protection also to quail, imported pheasants, grouse, and woodducks for five years. Minnesota protected doves, woodcock, plover, and woodducks until 1918. New Mexico gave protec- tion to pheasants, bobwhites, pigeons, and swans. Oklahoma protected doves, grouse, woodducks, and curlew. Several birds were removed from the game list and protected through the year. Oklahoma gave such protection to pelicans, gulls, and herons. Ten- nessee declared ringneck pheasants, bullbats, robins, and meadowlarks to be nongame birds. In a few cases protection was removed from certain species— notably turkey buzzards in Delaware, Florida, and North Carolina, owls and starlings in New Hamp- shire, and cormorants in Illinois and North Dakota.

For the first time in 12 years moose hunting is permitted in Wyoming, and for the first time since 1907 prairie chicken shooting is permitted in Indiana.

Among the novel features in the laws this year may be mentioned the declaration in the Florida law that ownership of game is vested in the respective coun- ties; the provision in the California law protecting spike bucks, or deer with unbranched horns, instead of deer with horns of a certain length; and the Wy- oming experiment of allowing the killing of 50 bull moose under $100 licenses instead of an indefinite number during a limited season. Methods of hunting were restricted in Michigan by prohibiting the use of automobiles in hunting partidges, and in Indiana by prohibiting the use of searchlights or other artifi- cial lights attached to autos for hunting game on or near a highway. Several new restrictions on ship- ments appeared for the first time: Illinois prohibited importation from points outside the State of any game except deer legally killed. Pennsylvania pro- hibited shipment of game by parcel post, and Wis- consin, shipment under an alias. Connecticut author- ized the commissioners of fisheries and game to grant permits to bring in game lawfully killed outside the State, provided such game is not offered for sale.

Notwithstanding the agitation in favor of protect- ing quail for several years in some sections, no bills of this kind were passed this year, and 39 States still provide quail shooting. The seasons were short- ened six weeks in Oklahoma and two weeks in Ne- vada. Limits were established for the first time in Arkansas and New Hampshire, reduced in Iowa from 25 to 15 per day, in Oklahoma from 25 to 10, in Min- nesota from 15 to 10, and increased in Nevada from 15 to 20. All but 14 of the States which permit quail hunting now have a limit of 20 birds or less per day.

All the States now allow waterfowl hunting, but the woodduck is protected for several years through- out the northern zone and in the southern zone in the States of California, Kansas, and West Virginia. Daily bag limits were established for the first time in Krkansas and Connecticut, reduced in Oklahoma from 25 to 10, and increased in Missouri from 10 to 15. Most of the States now have a limit of 25 or less per day.

Open seasons were lengthened in Montana on elk and deer two weeks; in Florida on deer and birds three weeks; in Minnesota on quail 20 days; and in Nevada on sage hens four and a half months, on grouse one month, and on quail two weeks. New Jer- sey reverted to the former plan of hunting deer on four consecutive Wednesdays instead of five consecu- tive days.

Seasons were shortened in a number of States. In the case of big game the deer season was curtailed in Arkansas three months, in Oregon and Washing- ton two weeks. In New Mexico the seasons were generally shortened and arranged in two districts divided at latitude 35 degrees. In California the dove season was made later and in Minnesota short- ened 20 days; in Oklahoma the quail season was curtailed six weeks, and in Michigan, Nevada (ducks), Tennessee, and Wyoming, spring shooting of waterfowl was abolished.

The more important changes affecting big game included the closing of the season for four years on moose in Maine; authorizations for the killing of 50 bull moose in Wyoming; lengthening the season on elk in Montana two weeks; closing the season on mountain sheep in Montana; changes affecting does in 7 States, including the removal of protection in Florida, Nevada, New Jersey, and Wyoming; estab- lishment of a limit in Arkansas; and decrease in the limits in Alaska, Michigan, Montana, and Nevada.

Under present conditions deer hunting is permitted in 36 States, in about one-third of which the hunter is limited to one deer a season and in most of the others to two. Eighteen States protect them at all seasons and allow only bucks to be killed—namely, Alabama, Arizona, California, Georgia, Idaho, Mis- souri, Mississippi, New Mexico, Nevada, New York, Oklahoma, Oregon, Pennsylvania, Texas, Utah, Ver- mont, West Virginia, and Wisconsin. Pennsylvania requires that deer killed shall have horns two inches above the hair, New York and Vermont at least three inches long, and West Virginia four inches long, while California prohibits entirely the killing of spike bucks.

Three important changes have radically affected traffic in game in the Mississippi Valley during the present year. In February the Supreme Court of Arkansas held that a local law permitting shipment of game from the Chickasawba district of Mississippi county, Ark., was unconstituional, and that the gen- eral law prohibiting shipment of game was in effect in this county as well as in other parts of the State. A little later the legislature of Tennessee prohibited the sale of all protected game taken within the State, thereby cutting off the market for ducks killed on Roolfoot lake. Finally, in June, a new game law was passed in Illinois prohibiting sale of all game, native or imported, except rabbits. For 20 years or more Illinois has permitted the sale at certain sea- sons of game imported from other States. Illinois now not only prohibits the sale but also the export of all protected game except rabbits. Missouri has strengthened its export law by a provision prohib- iting export of quail for any purpose.

A bag-limit law was passed for the first time in Arkansas applicable to deer, bear, turkey, quail, and ducks. Limits were established in Connecticut on squirrels and waterfowl; in New Hampshire on quail, ruffed grouse, and woodcock; and in Pennsylvania on bear. Indiana, which opened the season on prairie chickens for the first time in several years, provided a limit of five birds per day.

Reductions in limits were made on deer in Alaska from 6 to 3, in Montana from 3 to 2, and in Michigan and Nevada from 2 to 1. In the case of birds the more important reductions in daily bag limits were made in Illinois on doves from 15 to 10; in Iowa on quail from 25 to 15, and on prairie chickens from 25 to 8; in Minnesota on all birds except ducks, from 15 to 10; in Oklahoma on quail, plover, snipe, and ducks, from 25 to 10. Only a few increases were provided: In Illinois on shore birds, in Missouri on birdse (except turkeys) from 10 to 15, and in Nevada on quail from 15 to 20.

Resident licenses were provided for the first time in three Southern States—Arkansas, South Carolina, and Tennessee. Arkansas established a $1 license for deer and a $1 license for dogs used in hunting quail; South Carolina a license of $1 for hunting in the county and $3 in the State, but 27 counties were exempt from the operation of the act; and Tennessee a $1 license for the county and $2 for the State. New Mexico and Vermont joined the list of States which now issue combined hunting and fishing licenses. Delaware, following the example of West Virginia in 1913, repealed the resident license provision adopted two years ago, while West Virginia restored the license by issuing free licenses to persons hunting in the county of residence and requiring a fee of $3 to hunt elsewhere in the State. Fees for non-resident licenses were reduced in Illinois from $15 to $10, in Maine from $25 to $10, and for the special elk resi- dent license in Wyoming from $15 to $10. New Hampshire and South Carolina, on the other hand, increased the non-resident fee in each case from $10 to $15, and Manitoba the resident big game license from $2 to $4. Exemptions were provided in a few cases—notably in Illinois, which allows veterans of the civil war to hunt without a license, and in Ore- gon, which issues free licenses to veterans. In the latter State women are now allowed to hunt and fish without license, but in New Mexico similar privileges are not extended. North Dakota allowed actual set- tlers to obtain a resident license, even though they have not acquired residence. In Michigan and Min- nesota all residents are now required to obtain licenses to hunt in the county of residence. In North Dakota and Vermont conviction of violating the game laws not only results in forfeiture of license, but renders the holder ineligible to obtain another for a year, except in Vermont, without the consent of the game commissioner.

GOSSIP FOR SPORTSMEN.

For a week-end trout angling trip the Truckee or upper Sacramento rivers are about the most inviting waters at present. In the Truckee canyon, up to last week, heavy winds have prevailed, which, of course, spoiled diversion with fly lures. Conditions, how- ever, had a more favorable turn, enough to tempt Frank J. Cooper, Dave Sachs, L. L. Gerstle, Mark Gerstle, Walter D. Mansfield, Carter Pomeroy, Hor- ace Orear, Ed Everett and other San Francisco Fly- Casting Club members to whip the river near the club lodge last Sunday. Results, however, were only fair.

As for the upper Sacramento fishing points, good fishing has prevailed nearly all this season and condi- tions should be inviting at this time of the year. Roscoe Havens, who has fished the river near Sims for years past, is at that resort at present, which fact argues that the fish are rising to the fly.

The Merced river and branch creeks flowing through the floor of the Yosemite valley are clear and low enough to offer the usual excellent induce- ments for the September angler. A report last week from Webber lake states that fly-fishing is first class at present.

San Gregorio lagoon seems to be on the fishing list still, for several local anglers picked up nice baskets of steelhead from that water the past week.

* * *

Trolling for quinnat salmon has been the leading salt water fishing attraction for local rodsters for the past fortnight. The fish have averaged much larger in size than when the run started. Nearly every boat party outside the heads recently has returned with more or less fine salmon. The best catches have been made off Gull Rock, near Bolinas bay. Many salmon have also been hooked inside—off the Sausa- lito shores, in Raccoon Straits and along the Marin shores up to Point San Quentin. Hooks baited with Monterey sardines and trolling spoons, usually No. 6, either all brass or brass and silver, have been equally effective lures outside in the ocean currents. Inside success has been achieved with the bright trolling spoon only, for the fish hooked in the bay are through feeding and gradually working up to the headwater spawning grounds of the Sacramento river and main tributaries and also up the San Joaquin river. A number of the fish brought in recently have scaled over fifty pounds, which argues that the fisherman had some sport in bringing the captive alongside the boat where it could be gaffed. Generally weather conditions outside have been favorable. One Sunday, however, while the sport was keen, the big fleet of trolling launches had to make for less turbulent water inside at about 11 o'clock in the forenoon. The run is now about over, so far as the trolling sport is con- cerned.

Although salmon can be taken all the year round with hook and line, or spear, the netting season is now closed from September 25 until November 14. The daily limit during this period is three fish.

* * *

Striped bass fishermen are having various degrees of luck. Good catches have been made recently in the east San Pablo bayside from Pinole up to Port Costa. The Oleum wharf has proved a good fishing place.

Wingo fishing sloughs were on the wrong side of the ledger recently. Heavy and cold northwest winds spoiled the sport for many of the Wingo regulars. Probably Al Lindsay's catch of five bass taken at Appleby Bay is about the best recent showing up to last Sunday, when a large number of bass were caught.

Al Cumming in eleven trips to San Antone slough within a month has landed forty striped bass weigh- ing altogether 165 pounds. The largest was a twenty- one-pounder, which goes to prove that the bass have not yet deserted that favorite fishing water.

Tiburon lagoon is still on the striped bass producing list. Not many nor very large bass have been caught, but enough to warrant a trial now and then.

* * *

Reports from many mountain deer hunting districts indicate that bucks are numerous, and juicy venison steaks are an enjoyable addition to the camp cuisine. Trinity county has the call this year with many hunters, notwithstanding that 66,400 acres is a game refuge in the southwestern part of the county, and all of which tract is included in the forest reserve. The refuge begins one mile west of Hayfork river and extends over the Hayfork Bally mountain to four miles east of the Trinity river beyond North Fork. The southern boundary is Big Creek, in Hayfork, the northern boundary is the ridge back of Corral bottom. The State law establishing this game refuge took effect August 7th.

According to many sportsmen the protection given the animals under the law has caused a big increase of deer during the last few years. In many of the nearby coast ranges there are many more deer than there was ten years ago. Since "spike" bucks are now on the protected list, the deer should increase steadily during the next few years.

Another factor in the deer increase is the large number of California lions killed since a $20 bounty was offered for a varmint scalp. Thirteen mountain lions were accounted for during August and bounties paid to the hunters killing the pests. Madera county furnished four lions. This shows a decided decrease in these marauders as compared with the reports of past years, for the lion hunters are just as keen today as they were ten years ago to get the bounty.

The new auto highway into Trinity county can be reached either via Red Bluff or through Humboldt county, over a good stretch o froad by way of Bridgeville. This trip will introduce an outing party to a newly opened section, said to be wonderful in prolific scenic beauty, well stocked with a variety of wild game—deer, bear, bobcats, grouse and mountain quail—and also trout streams, where four and five-pound fish are plentiful.

The Mad river and Van Duzen country are voted an ideal camping territory by Dr. Henry Abrams, N. H. Leggett, and Dr. H. C. McClanahan, who recently returned after testing the district with rifle, shotgun and rod for three weeks. Camps were pitched at the headwaters of Mad river, the Van Duzen, and then on the south fork of Trinity river. Five bucks was the combined bag of venison secured—two large Pacific bucks, two five-pointers (still in velvet), and a forked horn. One of the five-point stags weighed 243 pounds. Many other deer were seen in that section.

For the information of sportsmen unacquainted with that territory, there need be no doubts felt about finding good camping spots nor getting good sport. The forest rangers up that way are more than obliging in making the outing a pleasant one.

Deer are being shot with systematic regularity in Siskiyou county by ranchers and visiting sportsmen. Fine deer hunting has been found near Riverton, in El Dorado county, where a 180-pound buck was killed a week ago by two Sacramento hunters, Ed Brady and J. Marty. A buck that weighed 208 pounds was killed in that section earlier in the season. Lake county is credited with being a hunters' paradise this season. One party of three hunters made the trip by auto, going in one afternoon and coming out the next day with two large deer. Calaveras county, in the upper mountain region, offers hunting and fishing conditions unusually good. The deer hunting now is said to be the best in years, mountain quail and grouse are very plentiful and gray squirrels abound.

The largest buck killed in Marin county this year weighed 160 pounds and was shot by Dick Baker of this city, Gus Gallon and J. Mast. Deer were very plentiful in that district during the season just closed, from six to a dozen was the daily tally of venison carcasses for the six weeks' hunting season. Most of the bucks were shot on the Bolinas ridge and Lagunitas ranch country.

Mendocino county, not so far away, near the Cotter ranch, twelve miles northwest of Sherwood, on the old stage road from Lakeview, is a section said to be plentifully populated with deer. The Big Meadows and Lassen region have more deer running about waiting for the hunter this year than for many seasons past.

One of the largest bucks killed in the Zyante region in Santa Cruz county, bagged by a hunting party composed of Henry Odenthal, Al Meinhart of this city, L. Bergazzi, L. Castella, A. Lersa, P. Pianti and A. Paneghetti of Los Gatos, weighed 161½ pounds.

At the town banquet in Los Gatos last week six bucks were a part of the viands disposed of by those present.

A five-pointer buck, scaling 157 pounds, was shot by William Beare on the road between Bakersfield and Democrat Springs. The coup was made from the automobile stage on that run.

Calaveras county, in the upper mountain sections, offers the best deer hunting in years, according to D. R. Roberts. Many bucks have already been gathered in by hunters. Mountain quail, grouse and gray squirrels make up a pleasing variety for the camp pot.

Forest Rangers have been busy ever since the various deer seasons opened, posting the boundaries of the two State game refuges.

Doves are beginning to take flight for the lower and warmer parts of the State. Bakersfield sportsmen have shot many limit bags since the season opened. The birds have been plentiful in "all directions." Tulare hunters have also found the birds numerous in that section.

Doves are reported to be very plentiful this year near Brentwood, in San Joaquin county, a favorite dove-hunting section for many seasons.

Great flocks of wild geese are beginning to come into some parts of Butte county, particularly near Chico landing. Ducks have been plentiful in that section for weeks past.

The tule overflow east of Dixon is drying up and the ducks that have bred there are scattering for other feeding grounds. Near Canby, in Modoc county, there are from 50 to 75 per cent more than ever seen in that section before, which means that they will all come south when winter sets in in that region.

Reports from many duck hunting grounds indicate that the webfeet will be plentiful when the season opens—unless there is enough rain to cause the birds to take flight to more southern feeding grounds. Colusa county is reported to be overrun with wild ducks at present. In the Cache slough tule belt of Yolo county the birds are also plentiful. For several weeks past mallard and sprig have been flying about the Suisun marshes in big flocks. The Alameda marshes have also been tenanted by many wild ducks. Most of the birds are home-breds, but many northern ducks have already come in.

From many quail hunting districts reports are favorable for good shooting. Cottontail rabbits are so plentiful in some districts as to be voted a nuisance.

At the Traps

A Webfoot Record.—Peter H. O'Brien, Oregon representative in the Grand American Handicap at Chicago this summer, Monday broke all Pacific Coast long run trapshooting records when he smashed 241 blue rocks during the first annual registered tournament of the Portland Gun Club.

O'Brien broke 150 straight in the regular program, 50 straight in a special event, and in a shoot-off broke 10 without a miss. This with an unfinished run of 31 the day before gave him a Coast record.

H. E. Poston of San Francisco and P. J. Holohan of Portland were tied for second honors, with scores of 147.

* * *

Turkey Shoot.—The Exposition City Gun Club shoot Sunday last at the Easton blue rock range drew a scant attendance of shooters. Five 20-bird events were shot, the contestants being distance handicapped from 16 to 20 yards. In the first event N. A. Howard (20 yards) was high gun with 20 straight. Ed L. Hoag (18 yards) won the second match with 20 straight. Dick Reed (20 yards) and Howard each ran out the full string of 20 clays in the third skirmish. Mrs. A. G. Wilkes (16 yards), with the good score of 19, was one of five 19's in that event. C. H. Knight (20 yards) came out first in event No. 5 with 19 out of 20.

Everybody won a turkey. Heine Stelling emerged from the fray with two national birds as his reward for straight gun pointing.

Events—	1	2	3	4	5—Ttl
Birds—	20	20	20	20	20—100

* * *

Merchandise Shoot.—The Big Time Gun Club merchandise shoot, the last of the season for the Sacramento powder burners, will take place tomorrow. One of the features of the shoot will be a match between women members of the club—20 of the fair sex are on the roll of active membership.

* * *

Try the Try Gun.—Jack Fanning, formerly a prominent member of both the Olympic and Lincoln Gun Clubs, has been showing the boys what the try gun can do to fit a shooter properly.

For years past a hobby of his has been that most shooters use a gun that does not fit. To get around this situation he advocates that a shooter should be measured for a gun, just the same as he would for a suit of clothes—to get a proper fit.

"In trap shooting, or in marsh or upland shooting," he states, "one of the very first and the most essential elements conducive to the pleasure and success of your day's sport is a perfect fitting and well balanced gun. In contrast is the firearm whose long stock and narrow comb—if your face is thin—or shaped so that you cross-fire or over or undershoot, and which ill fitting destroys many trips that might have been a pleasure had the gun been better adapted to the shooter.

"No wonder many, after deciding to take up trap shooting, change their minds and wonder what others see in it. They usually made their debut at the traps with a borrowed gun. The tall, slender m with long arms cannot expect to get good resul with a gun borrowed from his rotund friend, nor c the wife, for that matter, expect to learn to sho with her long-armed husband's gun.

"Frequently a shooter of judgment and a bit mechanical ability will shave down or out, or adju a cheek pad on the ordinary gun stock. Oftentim many stocks went through the dehorning process t fore one was ready to assist the shooter in raisi his score. But now all this worry and fuss over i fitting gun stocks is done away with, for along com the doctor with his 'try gun.'

"This try gun has a stock which can be lengthene or shortened, widened out or brought together l means of bolts and clamps. It can be adjusted to perfectly any face, any peculiarity of vision or ar length of arm. Many trap and field shots today ov their raise in shooting percentages to the new gu built after the measurements were found which we suited to their individual needs. Ladies in particul will find the services of a try gun an invaluable a to better marksmanship."

* * *

Intercollegiate Trapshooting Association.—Princ ton, Dartmouth, Yale, Harvard and Cornell hav formed an Intercollegiate Trapshooting Associatio The purpose of the organization is to "regulate inte collegiate trapshooting competition and increase i terest in trapshooting as a college sport." Stanle F. Withe, Harvard '14, has been elected Secretar Manager of the association. F. C. Huntress, Dar mouth '16, and H. L. Gordon, Jr., Princeton '16, ar members of the executive council which will mak arrangements for the Intercollegiate Championshi shoot to be held at Dartmouth this fall.

The shoot to determine the 1915 intercollegiat trapshooting champions will be held at Dartmout this fall, according to an announcement just issue from the headquarters of the Intercollegiate Tra shooting Association, 403 Evening Bulletin Building Philadelphia. Harvard, Yale, Dartmouth and Prince ton will enter teams in the shoot and there is a po sibility that Cornell, Penn State and Williams wil be represented. There will be five men on eac team, with one substitution allowed; it will be 100-bird program.

Interest in this shoot has been greatly increase by the presentation to the association, by the Du Pont Company, of five solid gold trophies which wil be awarded to the members of the team winning th intercollegiate championship. The trophies are i the form of watch fobs, the pendant of which is solid gold medallion, representing a clay target. Abou the rim is inscribed "1915 Intercollegiate Trapshoot ing Championship," and on the back will be engrave the name of the winner and the scores of the com peting teams. These trophies were designed by Stanley F. Withe, Secretary of the Intercollegiate Trapshooting Association, and have been declared the handsomest trophies ever awarded in an event of this character.

While discussing his plans for the coming inter collegiate shoot, Mr. Withe remarked: "Few realize that in the last few years trapshooting has become established as a regular college sport with interclass, intercollegiate and championship shoots between carefully coaches teams. The fact that trapshooting has won a place for itself among the many activities of the college world is convincing evidence that this sport develops qualities which are not obtained in any other forms of recreation. A steady hand, keen eye, delicate co-ordination between mind and muscle, and ability to act in fractions of a second are qualities resulting from continued practice at the traps which have commended it as an exercise and a recreation for college men."

DOG SHOWING.

In these days of dog evolution, or breeding dogs for prizes and profits on an extensive scale, the "handling" of dogs in the show ring has developed into an art. In this way, it is of paramount importance that fanciers who elect to follow the pursuit of dog showing, whether in a small way or on a large scale, whether as a hobby supplementary to their daily toil or avocation, or whether as a profession, to which dog showing has latterly developed, should post themselves up in the requirements of the show ring which are essential to success. It is not enough to possess a good dog, for it is often the case that a moderate dog, well tutored and "handled," will beat a better dog indifferently shown.

Whatever a dog may be at home or before going into the ring, or when he comes out of it, it is what he looks like at that supreme and critical moment when the judge's eye is on him, and when the judge decides upon the relative merits of the dogs before him, all decisions are, or should be, made comparatively according to the merit of the dogs of the day, and not according to what a dog may have been or may have done in the show ring previously, or may be or do in the future. Just as a jury trying cases in the law courts is advised by the presiding judge to shut out from their minds any knowledge the jurymen may possess of the case or cases they are about to try, and are exhorted to arrive at their decisions purely upon the merits of the cases presented to them in court, so ought dog show judges, when they enter the arena of the show ring, to shut out from their minds any previous knowledge of the performances of particular dogs, and judge accordingly.

THE SUCCESSFUL BREEDER.

The breeding establishment of the dog fancier can well be compared to a factory that turns out a certain class of goods. Its excellent and wide spread renown being in accordince not with quantity, but with quality, states "Scarstream" in Dogdom.

One great dog produced by a kennel, or by its breeder, will live through the years in the constant and ever recurring memory of the fancy, and will be mentioned again and again at almost every show. Whereas a kennel of mediocre specimens very soon becomes a thing forever forgotten. Who, for instance, ever remembers, or, for that matter, has ever heard of a kennel of bulldogs which belonged to Mr. Young, of Sutherland, yet he had well-nigh a hundred bulldogs during his big splash in the game. On the other hand, who does not know of the great and lasting name of Pybus Sellon, Murrell, Marfleet, Ferguson, Williams, Crocker, Marley, Greenhut, Jeffries, and so on in a great chain of fanciers who have succeeded, and their dogs, Prince Albert, Dockleaf, Rodney Stone, Boomerang, Bromley Crib, Bromley Rosa, Felton, Chance It, etc. How many years it took them to win the laurel wreath of fame!

How many, I wonder, understand, even in the very minutest degree, the methods which led to their final victory in the ring? The quiet, unostentatious, plodding, silent way which is typical of the English breeder, both in success and failure, is the answer. It has been observed by the writer that the most successful breeder is always the quietest and most silent among men, while, on the other hand, that flashy type of loud-mouthed vulgarity and swagger which is the twin brother to some of the would-be breeders I have known, never yet met with much attention, save, of course, for the natural following of the class of hanger-on that grovels at the feet of money.

The breeding of a good dog is a silent, deep-thinking job, and what, I ask, is more wonderful, more splendid than to produce and show a real flyer? Who is there who remembers "Sammy" Woodewiss? A small, silent man, no faker, a hater of the lewd, a lover of the beautiful, a breeder of champions—Blackberry, Boaz, Baron Sedgemore. One brood bitch (Ch. Blackberry) alone produced no less than five champions, and it is said, and well said, that every puppy out of her that lived was of championship calibre, while those that died were the same. This only proves that silence and one bitch can do what swagger and loudness coupled with the gang cannot do. Look at Pressgang, a greater bulldog never graced the show ring, yet Harry Gilmore and Harry Leyton, his breeders, were almost unknown, owing to their reticence and silence. Unknown, no! For in the fraternity of old England bulldog men they live as men who have done something.

I do not claim infallibility in this respect, yet I do say that the less a man yelps about this, that and the other, the more he reserves this wasted energy and puts it into the thought of how to do things; the less he talks about the wonder he has down home, and the more he decides to wait in silence until he jumps into the ring to actually show you in the flesh, so much greater is his chance of a glorious success and the prospect of his fellow fanciers' good will and congratulations.

The dog game today is ruined by high-priced swagger—by the unlimited voice that scandalizes, criticises, throwing broadcast doubt, innuendos which impregnate the air of every dog show with worthless and senseless hearsay and concoction. I believe that we can drink to the full the cup that has for its motto, "If speech be silver, silence is golden." It is in the quality, not the quantity of the thing that makes men take notice in the dog game.

Comfort for man and beast is a very great asset toward making a successful kennel. It is not, of course, many kennels that can afford to keep a kennel man, or kennel managers as they are sometimes misnamed. The only real kennel manager is a superintendent who knows how things should be run, and sees that his subordinates do their work, and do it well. He is responsible, of course, except in the show ring. His work should be only brain work. I know of one "managerial" office where there is no help whatsoever save the man himself, which pays $13 per week, and the manager scrubs the floors, boils the food, and does all the dirty work. Anyone can see that such an office is entirely misnamed. The kennel manager proper should have a good salary, a free hand and decent treatment. Of all the fatal things in this world, and especially in the kennel world, is a dissatisfied employee, and still worse is the utter folly of expecting to get good work out of a man by mean tactics and broken promises. Better, by far, throw the sponge in the ring.

The greatest kennel man I ever met was Garrett, a brother-in-law to "Freddie" Brake, my closest friend in bulldogs. It makes my eyes water when I realize that the happy days we spent together can come no more. They were happy, doggy days. Garrett was with Sellon, at Wimbledon, for years and years. He was instrumental in breeding Dockleaf, Denver, Donax, Dairymaid, Dubbo, Detroit, Dandelion, and so many others one can't remember them all. Sellon died at sea, and Garrett died soon after of grief. With them went the kennel—the greatest and most successful kennel of bulldogs that ever existed, and, in my belief, that will ever exist. It had its wonderful day of success, and almost simultaneously it all disappeared.

It was my good fortune to be one of the inner circle of this kennel. The den, as it was called, was an upstairs room over the kennel, and very few people except "Jack's" closest friends ever got past its sacred portals. The walls were covered with pictures of dogs and prizes won. There were big boards, with pictures of the different dogs on the map, and their weak and strong points written against them. All this was studied before the bitches were mated. Inbreeding was indulged in freely when it was considered advisable, and many bitches had been in the kennel for years, and the parents before them for two decades or more. It was scientific work backed by unlimited means. "Billie" Spargue was a big factor in this exclusive circle, and with Fred Brake and G. W. Richards made up the ring.

Dog breeding, to be a success, must be a happy occupation, as it was with "Jack" Sellon. In the years that I knew Sellon, Garrett and Brake, I never saw one of them in an evil look. You must not be led to the idea from this that there was no tough luck at the kennels at Wimbleton. I have seen some of the very best die young, litter and litter go, mature dogs killed by accident, and still the man at the head of it looked the same. He treated success and failure just alike, and remained a man. It took more than this to make such men as they look mean.

I hope these reminiscences may help you who aspire to success in the kennel world. Remember how these other men have won, and follow their example. Let silence and good nature be your motto. Be decent to your kennel-man—such a lot rests with him. You can't get the best out of anything with a kick.

SPORTSMEN ENJOY BUCK BARBECUE.

Fourteen hundred sportsmen were the guests of the North Fork Game Protective Association at the fifth annual barbecue of that organization held Sunday, September 26 at the Auburn race track. Every city in the northern part of the State was represented, and all keenly appreciated every detail of the elaborate program that had been prepared in their honor, states the Sacramento Union.

There were big delegations of guests present from San Francisco, Marysville, Truckee, Reno, Grass Valley, Nevada City, Colusa, Sacramento and other points.

There was not a dull minute from 16 o'clock in the morning, when the visitors started to arrive, until sundown, when the blue rock shoot was completed. Music by the Auburn concert band and the Lincoln concert band- vocal selections by entertainers, two boxing matches, foot races, festivities in the vicinity of "The Spring" and the blue rock shooting provided all the amusement necessary.

It was shortly after noon that Chef Elmer Gum, the president of the North Fork Association, and his aides unearth ten barbecued deer and one bear. Fourteen hundred sportsmen witnessed the ceremony, while Ralph Earl, Pacific Coast representative of the Pathe Motion Picture concern, took the view for his company's weekly.

Beside the ten deer the committee in charge had prepared ten tubs of sweet potatoes and two one-hundred-gallon kettles of Spanish beans. Potato salad, olives, pickles, cranberry sauce, tomatoes, peppers, peaches, pears, grapes, canteloupes, watermelons and liquid refreshments were also on the table.

The guests were seated in the central portion of the race track, beneath a large clug of oak trees. One hundred feet distant from the tables the boxing ring was constructed.

There were two bouts during the day, both of which went the limit of four rounds.

L. Burns, Placer county high school boy, won both the 50 and 100-yard dashes. The others competing in the races were high school students. In the 100-yard dash L. Peart finished second and C. Huntley romped in third. The time was 10.4.

In the 50-yard dash Huntley finished second and Peart third. The time in this race was 5.4. The boys were trained by Earl Crabbe, instructor in the Placer county high school.

At the conclusion of the second boxing bout the blue rock shoot started and continued until sundown. Most of those competing for the merchandise prizes were from Sacramento and Auburn.

Everything on the grounds was free to the guests. Auburn's sportsmen were at their best, and all who attended were unanimous in the opinion that the fifth barbecue was the biggest sporting event ever held in the foothills.

Three hundred automobiles were parked inside the enclosure at the track by noon, some of the machines coming from points as far distant as San Jose and Winnemucca, Nev.

Among the prominent visitors were Clarence A. Haight, George Neale, Frank Newbert, George E. Chambers, Jack Fanning, Sheriff F. Gormley, Ancil Hoffman, P. J. O'Brien, J. A. McGuire and Harold Nelson. Secretary of State Frank Jordan was also present.

President Elmer Gum stated Sunday that the barbecue will be repeated next September.

The officers of the North Fork Game Protective Association are E. H. Gum, president; J. T. Walsh, vice-president; J. J. Reeves, secretary-treasurer. The directors are E. H. Gum, J. T. Walsh, J. J. Reeves, Herbert Morow, L. Armbruster. J. B. Landis is attorney for the association.

The committees responsible for the success of the barbecue follow:

Grounds—L. Armbruster, Mose Predom, A. T. Ralston, Herbert Morrow, J. J. Reeves.

Entertainment—Dave Gordon, O. G. Houchin, Frank L. Tripp, George McAulay.

Invitation—M. Z. Lowell, Guy Lukens, W. B. Lardner, Jr., Charles Dapper, Dave Gordon.

Barbecue—L. A. Duryea, E. H. Gum, Jim Dudley, Marlin Michaels, Arthur Sather, Frank Knowlen.

Police—F. H. Dependener, W. R. Hoffman, Fred Smith, Chester Scroggs.

Spring—James Watters, Fred Hohman, E. J. Kennison, A. M. Hoffman.

Reception—A. J. Marclay, J. T. Walsh, A. C. Lowell, F. E. Brye, A. D. Lininger.

Soliciting—J. T. Walsh, M. J. Nunes, H. M. Cooper.

Publicity—L. A. P. Eichler, W. A. Shepard, C. M. Willis.

Bluerock—Grocer Conroy.

Menu—Laf Houchin, C. R. Purington, J. G. MacKay.

TROUT IN UGANDA.

There is always a fascination about catching trout in countries to which they are not indigenous over and above the charm inseparable from such sport in any circumstances. I venture to predict that the trout imported to the Aberdares, a range of mountains on the eastern frontier of the Rift Valley, will do as well as any others transported south of the equator, with the possible exception of the historic monsters of New Zealand. The trout of the Gura, the only stream so far stocked, were brought out as eyed ova some eight years ago.

The Gura river runs through sloudland, or, in more practical terms, between ten and eleven thousand feet above sea level, and it is best reached on safari from Naivasha station on the Uganda Railway. I have never, in the course of a somewhat long and varied experience of working hard for my sport, taken so much trouble for a couple of days of trout fishing. The expense alone is not inconsiderable, since you have to take not only your tent and stores, but also twelve or fifteen lusty Kikuyu porters, from Nairobi, which means that they have to be paid out and back, including railway fare. A mule can generally be hired at Naivasha, and on it you have to ride not less than thirty-five miles to the river, in the course of which you climb nearly three thousand feet above the level of Naivasha lake, which lies on the floor of the Great Rift Valley. The scenery is intensely interesting to a geologist, though the angler is disappointed on learning that the only inmates of the lake are the hippotamus and a small fish. During the ride over the plateau above the escarpments I came close to zebra and hartebeeste, feeding in large herds among the tall grass, and, as I learned later, several lions were tither trapped or poisoned a week earlier at a spot past which I rode within a few yards. All this, however, is not fishing, but merely the way of getting to it.

At length, on the second day, I camped close to the stream, just where it runs beneath a little bridge. There ought to be many more little bridges, as one constantly wants to fish from the opposite bank; but this was the only one I saw on several miles of the river. The only fish in the river are these imported brown trout, as fortunately the altitude or climate, or both, prevent either eels or crocodiles finding their way up from the warmer, muddier waters of the Tana, into which the Gura flows much farther down. The only natural enemies of the trout are otters and herons, and even the local natives do not care about fish, which is a mercy, as they are very efficient poachers elsewhere.

The trout of the Gura are, as might well be expected of fish that have never yet been fished for by more than half a dozen anglers, half of whom have paid but one visit to the water, easy victims of very moderate skill, and if I were going there again I would just take a whole bookful of coachmen dressed in two or three sizes. Other flies, preferably with white in the wing, would no doubt kill, but as my coachman was only once refused (and then, I suspect, by a big trout that had lost the taste for surface food and taken to frogs and little brothers and sisters), there seems no reason for varying this well-known pattern. They are quicker even than the trout of Usk, and must be hooked on the instant or they are gone. But if the fish are easy the river most certainly is not. It offers few reaches appropriate for down-stream fishing, for in that bright sun you cannot hope to deceive even those uneducated trout if they are staring you in the face. There are miles of dry fly water, but I saw too few rises and too little hatch to be encouraged to try more than a few minutes of experimenting with my crude floating fly.

(To be concluded next week)

FIXTURES.

Registered Tournaments—Pacific States and Territories:

September 24—Medford Gun Club, Dr. E. R. Seely, President, Medford, Ore.

September 27—Portland Gun Club, J. A. Addleman, Secretary, Portland, Oregon.

October 4, 5—Roswell Gun Club, E. P. Malone, Secretary, Roswell, New Mexico.

November 2—Williams Gun Club, F. E. Lowe, Secretary, Williams, Ariz.

November 5, 6, 7—Arizona State Tournament, under the auspices of the Tucson Blue Rock Gun Club, W. A. Julian, President, Tucson, Ariz.

PREMIER RIFLE AND SHOTGUN EXPERTS.

. Mr. and Mrs. Adolph Topperwein will give an exhibition of expert and fancy shooting here, which will be a treat to see.

Adolph Topperwein represents the Winchester Repeating Arms Co., and lives in San Antonio, Texas. His native State has long been noted for its expert shooters and this penchant for shooting among Texans, added to his natural ability, undoubtedly accounts for the wonderful skill he displays. He uses no special equipment, but ordinary Winchester rifles, shooting regular cartridges with solid ball: or, in other words, cartridges such as are sold by all dealers.

In the most remarkable exhibition of rifle shooting ever given, Mr. Topperwein shot for ten days at 72,500 2¼-inch wooden blocks thrown into the air by an assistant, missing only 9 out of the entire lot. During the shooting, he made straight runs of 14,540, 13,599, 13,292, 13,219 and 10,383. He used two Winchester automatic rifles and Winchester cartridges, and the loading of the rifles was done by himself. Considering the almost incredible score and the tremendous strain of such incessant shooting, it is unlikely that this record will ever be beaten.

Other remarkable feats by Mr. Topperwein with the rifle were his scoring of 85 out of 100 2½-inch targets thrown into the air while riding at full speed in an automobile; and the breaking of 3,507 targets without a miss at the World's Fair in St. Louis.

Mrs. Topperwein, who also represents the Winchester Repeating Arms Co., is undoubtedly the premier lady shot of the world. Although she took up shooting only a few years ago, she has startled the shooting world and entertained many thousands of people by her great skill with rifle, shotgun and pistol. Her first public appearance was at the World's Fair in St. Louis, where, with a Winchester automatic rifle, she broke 967 out of 1,000 2½-inch flying targets; and later 1,995 out of 2,000 with a straight run of 1,437.

Besides being a wonderful wing and fancy shot, Mrs. Topperwein is a consistent shooter at the traps and has made a straight run of 226 and won many high averages in open competitions, shooting against the best professional and amateur shots in the world. At San Antonio, Texas, July 18, 1908, she broke 961 out of 1,000 targets thrown at the regulation distance, in 4 hours and 35 minutes.

At the Pacific Coast Handicap, Seattle 1910, Mrs. Topperwein won high general average over a large field of the best shots of the Pacific Coast and Canada. On the first day she made the remarkable score of 195x200, which included 20 doubles, and on the final day she broke the entire program of 100 singles straight. During the year 1913, Mrs. Topperwein shot at 10,000 targets, scoring over 95 per cent. She made straight runs of 100 nine times and one run of 165. Shooting for the Denver Post Trophy in a gale of wind, she scored 94x100 from the 21-yard mark. At the Eastern Handicap she outshot the field of over 250 shooters by scoring 98x100 from 19 yards; and closing her season's work at the State Fair in Phoenix, Ariz., she scored for the three days' shooting the magnificent total of 397x405 targets; and in a special handicap event, standing at the 23-yard mark, she broke 93 targets out of 100. Mrs. Topperwein is the only lady in the world who ever had the honor to qualify as a national marksman in open competition, shooting at 200, 300, and 500 yards with a military rifle.

NEW ZEALAND'S GREATEST MEETING.

The most important program of the year is that of the New Zealand Metropolitan Trotting Club's spring meeting, and all followers of the sport will be keenly interested in that drawn up for this year's gathering, which will be held at Addington on Tuesday, Thursday, and Friday, November 9, 11, and 12. As has already been mentioned, the stake money for the three days has been fixed at £10,000, the same amount as was given last year, and it will be admitted that this is a very generous sum to distribute under war conditions. Although the stakes have not been altered, the limits have been reduced in the majority of the events on the card, and the committee's policy in this respect will insure that the winning of a race at Addington is a test of the merit of the best class performers.

The "star" attraction of the gathering is, of course, the New Zealand Cup, with its stake of 2500 sovs., for which entries have already been taken, but there are many other valuable stakes to be won, and there is no race on the card of less value than 250 sovs., so that the meeting is sure to attract the best performers from all parts of the Dominion, and also, it is to be hoped, from Australia. The Courtenay Handicap, of 500 sovs., is the principal event on the second day's card, and it is for horses that can do 4:40 or better, while the free-for-all of 500 sovs., which is also run on the second day over a mile and a quarter, will bring about a meeting between the most brilliant of our harness horses. The Christchurch Handicap of 750 sovs., on the third day, is confined to horses that have done 4:39 or better, so that the field will be one of the very highest class; and another important event on the last day is the Dominion Trotting Handicap, for unhoppled trotters, that can do 4:46 or better. The mile horses, both harness and saddle, are particularly well catered for with such races as the Hagley Handicap of 250 sovs., Railway Handicap of 250 sovs., Royal Handicap of 300 sovs., Enfield Handicap of 300 sovs., and Recovery Handicap of 300 sovs. These two last-mentioned events are for horses that can do 2:16 or better, so that they will represent a decidedly "hot" proposition. The Victoria Handicap of 250 sovs., two miles and a quarter, will afford an opportunity for the genuine stayers, and the saddle horses have plenty of good stakes offered to them.

The nominations and handicaps to the Cup are as follows:

	Horse.	Fastest time.	Last H'cap. time.	Present H'cap. time.
Scr.	Win Soon	4:31	4:32	4:32
Scr.	Country Belle	4:31	4:32	4:32
1 sec.	Emmeline	4:30	4:34	4:33
1 sec.	Admiral Wood	4:34	4:41	4:33
2 sec.	Our Thorpe	4:34	4:35	4:34
2 sec.	Albert H.	4:33	4:33	4:34
3 sec.	Steel Bell	4:33	4:38	4:35
3 sec.	Adelaide Direct	4:33 2-5	4:35	4:35
3 sec.	St. Ursula	4:33 3-5	4:35	4:35
3 sec.	Jingle	4:33 2-5	4:36	4:35
3 sec.	Frandocia	4:35 1-5	4:36	4:35
3 sec.	Tommy C.	4:35 2-5	4:37	4:35
4 sec.	Eccentric	4:34	4:35	4:36
4 sec.	Calm	4:36	4:37	4:36
4 sec.	Don Caesar	4:36 1-5	4:37	4:36
4 sec.	Wallace Wood	4:36 2-5	4:37	4:36
5 sec.	Adonis	4:36 3-5	4:38	4:37
5 sec.	St. Swithin	4:35 3-5	4:39	4:37
5 sec.	Red Mac	4:36 2-5	4:39	4:37
5 sec.	Muricata	4:36 2-5	4:38	4:37
5 sec.	Manderene	4:37	4:39	4:37

A glance through the handicaps shows that Mr. H. Brinkman has made a much shorter limit than most followers of the sport expected. The scratch mares, Win Soon and Country Belle, are rightly in their places, and being asked to give away 5 seconds must be considered very favorably treated. The former, who won last year off the limit, is still pacing in great style, and has something the best of the back-markers with such a good general behind her as A. Pringle. Country Belle, when seen out at the last August meeting, was far from her best, but should come to hand quickly, as every attention and care have been bestowed on her during the winter. Emmeline has been off the scene for some considerable time now, having been stinted to Wildwood Jr., with no result, hence her return to the race track. As she is getting on in years, together with the fact that she will probably find the journey too far, her prospects cannot be considered bright. On the same mark is the ruling favorite, Admiral Wood, who has been very much in the limelight lately through having been disposed of by Mr. W. Kerr to an Auckland owner at a record price. When last seen in public, in the Courtenay Handicap last November, giving only one second away to Piecework and Brown Bell, he came away at the business end, winning somewhat easily, improving on his time 7 seconds. As he is now only asked to do one second better his connections should have nothing to complain of.

Our Thorpe has been placed one second in front of Admiral Wood, although both have the same time recorded against them. This seems quite justified, as the latter's was a winning performance, and Our Thorpe's a beaten one. Although Albert H. has a Cup to his credit, little can be said of his prospects, as he has been off the scene for many months now, and with such good ones round about him now, he seems harshly treated. Of those on the 3 second mark, Jingle and Adelaide Direct are the most favorably handicapped. It will be remembered that when Admiral Wood won the Courtenay Handicap in 4:34, Jingle and Adelaide Direct filled the places behind him, their time for the two miles being 4:33 2-5. Now this pair have been handicapped on 4:35. In the Courtenay Handicap Adelaide Direct and Jingle were on the 3 second mark, Admiral Wood on the 10 sec.; now Adelaide Direct and Jingle are receiving 2 sec. from Admiral Wood, thereby meeting him on 4 sec. better terms. Steel Bell (5:33) and St. Ursula (4:33 2-5), the North Island representatives, are on the same mark, but neither has done much racing locally. Frandocia (4:35 1-5) and Tommy C. (4:35 2-5) are also on the 3 sec. mark, and Mr. Brinkman has not given the former any the best of it as his time was recorded on a particularly fast track. Tommy C.'s form was so good at the August meeting that there is every likelihood of his further improving before the big event comes off.

Eccentric, Calm, Don Caesar, and Wallace Wood are on 4 sec.: the first-named is a brilliant horse over a short course, but I do not like him over two miles. Calm is considered very unsound, and may not survive a preparation. Don Caesar must have a great chance of winning should he keep sound. Prior to the last New Zealand Trotting Cup, this horse did some exceptionally brilliant work, and had he been a trifle more lucky at the start he would most likely have been in a place. Wallace Wood, since his return from Australia, has been a most consistent horse and if well should have a chance. Adonis, St. Swithin, Red Mac, Muricata, and Manderene are all on the limit, which is 5 sec. Adonis has been a well-handicapped horse for some time. His best record over two miles is 4:36 3-5. At the last Forbury Park meeting he was handicapped on 4:40 and won, the track being heavy, and later on the same day ran second to Goldwood in the mile and a quarter race. —New Zealand Referee.

THE FARM

FORAGE AND PASTURE PROBLEMS THAT SCIENCE MUST SOLVE.

How is the fertility of California to be kept up if instead of using horses and mules on the land the work is mostly done by great robbers of the soil like the huge harvesters and farm tractors?

This is a question that Professor C. B. Kennedy propounds in an article on "Grass" in the September number of the University of California Journal of Agriculture, just issued by the students at Berkeley. Here are some other problems that he says the agricultural scientists are keeping in mind:

How to make two blades of grass grow where one grew before.

How to produce a pound of flesh or milk at less cost than now.

How the food supply for stock is to keep up with the natural increase from one generation to another.

How large tracts in California may be divided up into units large enough to support a family comfortably and how the fertility of these units may be increased and preserved.

"The nations or states," he says, "that have the largest number of farm homes per section scientifically managed will be the ones that will render the greatest benefits to mankind and establish a financial foundation as solid as the rock of Gibraltar. We shall not have fought the good fight if we have not instilled into all those with whom we come into contact the necessity of spreading the gospel of farm homes. There is no state in the union that needs to take this to heart more than California."

Professor Kennedy predicts that the use of concentrated food-stuffs such as cottonseed meal and cereals is destined soon to play a much greater part than ever before in the production of milk and meat in California as they will shorten the time required for finishing an animal for market and thus give California pastures an opportunity to increase their capacity.

As yet California is only on the threshold of investigation and understanding of the real feeding value of the plants growing in the ranges and pastures of the state. The great bulk of the plants growing on the coast ranges and in the interior valleys were introduced here from other lands. Some of the most common are not even natives of North America—of these, for instance, the burr clovers and alfiliarias. Other less welcome immigrants are the weedy bromes and the foxtail.

The University is making a careful study of California forage plants, native and introduced, collecting their seed, and finding out their value as feed.

The grasses of the Coast Ranges and the drier parts of the interior valleys of California are largely made up of introduced plants. In the tule lands are a wide variety of water-loving plants on which thousands of head of stock are pastured, but the comparative economic value of which has not yet been determined.

That the Sierra Nevada is by far the most important grazing area of California, and the one where future expansion must most of all be expected, is declared by Professor Kennedy. He says that the grazing regulations in the Forest Reserves are enabling the community to use these resources and yet to leave them unharmed for future use. These mountain reserves are of great importance as protection against lean years of poor forage in the valley and foothill country. The problem should also be dealt with by the state and the United States of renewing mountain pastures that were depleted or denuded by overfeeding before the present regulations were adopted.

The importance of the wild pasturage problem in California is shown by facts which Professor Kennedy quotes from the report for 1913 of the Statistician of the California State Board of Agriculture. In that year 3,600,000 tons of hay were grown on 2,400,000 acres in California. But the feed requirement for the 6,214,983 animals that were fed that year in California was 18,000,000 tons. That is to say, pasturage, stubble lands, and concentrated foodstuffs between them supplied four times as much feed as the lands that were cut for hay.

Professor Kennedy predicts that California in future will increasingly depend upon and make use of the pasturage that can be fostered on non-arable lands.

DESPISED WEED PROVES BOON TO FARMERS.

Like the ugly duckling in the story which turned out to be a swan, "bitter clover," a despised pest of the grain fields, has now been discovered by the University of California to be an invaluable ally of the farmer, capable of increasing the yield of his land by two-thirds.

"Bitter clover" is a yellow flowering annual which grows wild in Arizona and California and is known also as "yellow-top," "sour clover," "sweet clover," or "Melilotus indica." It has now been proved that if grown to the age of about six months as a "clover crop" and then plowed under, it will increase by two-thirds the yield of certain other crops, planted in succession to it, so greatly does it enrich the soil with nitrogen and humus.

The story of how this unappreciated native "weed" has been found to increase the yield of subsequent crops, following its incorporation into the soil, to a greater extent than any other legume ever tested in California, is told by W. M. Mortz, Superintendent of Cultivations of the Citrus Experiment Station of the University of California at Riverside, California, in a circular on "Melilotus Indica as a Green Manure Crop in Southern California," just published by the University and obtainable free by writing to the College of Agriculture at the University.

Here is related the story of how for many years past the University of California has been testing a wide variety of "cover crops" at Riverside and elsewhere. Various clovers, vetches, and other legumes, as well as rye, barley, etc., have been grown as a winter cover-crop, and then plowed under in the spring, in order, by "green manuring,' 'to introduce nitrogen into the soil, aid the activity of useful soil bacteria, and improve the texture, humus content and general condition of the soil. Then potatoes, corn, sugar-beets, and other crops have been grown on the test plots to find out how much the fertility of the soil has been improved by this treatment.

The resulting increase in fertility has been most gratifying. Land on which common vetch had been plowed under gave an increased yield of 28.7 per cent; burr clover, 30.4 per cent, and Canadian peas 43.4 per cent.

But when "bitter clover" was grown and plowed under, the yield of the test crops following showed an actual average increase of 64.8 per cent.

This is nearly half as great again an increase of yield as it has been possible to obtain by plowing under cover crops of rye or barley and applying also 1092 pounds of nitrate of soda or 1188 pounds of dried blood per acre.

Bitter clover, moreover, is practically immune to injury by that common insect pest, the aphis, and it will stand more frost than either vetch or peac.

For use in a citrus orchard, bitter clover should be planted not later than October 15 in order to make a large growth and be ready to plow under by March. In walnut orchards, however, and in other irrigated deciduous orchards where late spring plowing is possible without injury, bitter clover may be planted as a cover-crop as late as December 15.

It is an interesting example of how science nowadays makes profitable use of what once was regarded as refuse and waste that the seed of bitter clover is now largely a by-product, being separated from the screenings of wheat, in which it is often a prevalent weed. The cost of the twenty-five pounds of good re-cleaned seed per acre needed to plant bitter clover is less than that of the 75 pounds of common vetch seed or 100 pounds of Canadian pea seed needed to plant these two other cover-crops, heretofore the most popular.

Another remarkable merit of this new cover-crop, "bitter clover," is that it is extremely effective in preventing "plow-sole," or irrigation hardpan, an ailment to which a large proportion of irrigated orchard soils in California are liable. Frequent cultivations of dry pulverized soils, together with frequent irrigation, tend to wash down the fine clay particles and deposit them in a dense, hard layer of varying thickness just under the cultivated area, and thus soils become impervious to water. "Bitter clover," however, though an annual plant, in six months sends its roots deep down, often as much as eight feet. This great root-system is extremely useful to the orchardist, keeping the deep layers of the soil in good physical condition and opened up for irrigation.

FENCES: WITH OR WITHOUT THEM?

Fences afford a suggestive commentary on the history and institutions of a country. Originally designed for protection and defense (the word "fence" is only a shortened form of "defense"), the fence came to be a traditional part of the structure of a place, wholly aside from any use that it might serve. Of late years, however, there has been a distinct effort at removal of useless fences, and persons have wondered why the owners clung to them so tenaciously. No doubt much of this tenacity is merely the deep-rooted custom and traditional practice that develops finally into a kind of race instinct, and is all the more difficult to eradicate because no one is consciously aware of its existence. Why do we still wear buttons on the sleeves of our coats? Or would it be an easy matter to have left them off all the garments for the coming year? Considering the history of the fence-idea, it is really surprising how much has been accomplished within 20 years in the removal of fences from city and village lots.

We are now seeing the spread of city ways into the country; but at first many of the country ways were carried into the city, and of these the fence custom was one. It was not so very long ago that cattle were allowed to roam in the village as they were in the country, and fences came with cattle.

But when cattle were removed from the streets, the fence did not go. Persons had come to feel that a fence is as much a part of any place as a walk or a well is. It has come to be bound up with the idea of the home. The removal of stock was not considered a sufficient reason for the removal of the fence. At best, this reason was only negative. The positive reason came in the development of what is really the art-idea in the outward character of the home—with the grading and parking of streets, and the feeling that the breadth of setting for the house can be increased by extending the lawn to the actual roadway. We have now learned that a fence is no necessary part of the plan of a place, that it really does not add to the completeness of the establishment, and, moreover, that it even may introduce a discord with the architecture. The development of the modern city or town residence street requires the removal of front fences.

All this does not mean that fences are everywhere out of place about a home, even if they do not serve as a protection against chickens and children and cattle. The large individual establishment may need fences as part of its structural design, or it may not, depending wholly on what the place is. But the mere street fence of the old time is gone, and the presumption is against the fence rather than for it. Very likely we have gone too far in the obliteration of fences, throwing our home grounds open to unseemly publicity; but this is a subject which concerns our point of view toward the type of living and toward the rights of the public, more than with fences themselves.

In the open country a different class of problems arises. Here the fence is distinctively useful; and yet, how many of the fences on most old eastern farms are really needed? The extent of fencing in any country is governed to a large degree by the amount of native material available for fence construction; and yet the eastern farms were fenced beyond all relationship to mere cheapness of materials. The fencing on many an old farm was worth as much in original cost and effort as the buildings. Now in very many cases these fences are being removed. This marks the passing of the old style of architecture. The small "mowing" and "plowings" and permanent fields are giving way to larger pasture ranges, or to soiling systems, or to rotations, or to other features of a rapidly changing industry. The relative absence of fences in the Middle West is due not only to the scarcity of stone and timber, but also to a different theory of farming.

The amount of land occupied by the fence system of the farms is also significant of the style of farming. It would seem to be a general rule that the less productive the land the less the care in cumbering it with fences, whereas one would expect the reverse of this to be the case. At all events, the relative amount of capital that can be put in fences is now a subject of careful consideration in all advanced teaching of farm economy; and the general tendency is to reduce it, not only from the point of view of cost of fence, but of the area of land that is occupied. In many parts of the country there is a growing tendency toward untidy fence-areas, due to the scarcity of labor; and the reduction of the fences has a distinct bearing on the cleanliness of the farm. In this regard, the wire fence marks a distinct advance.

The observant traveler can find few more interesting subjects of observation than the kind and the relative abundance of fences in the various parts of the country. The stone wall, which often literally dilapidates into a stone pile, the stump fencefi the rail fence, the wire fence—these all suggest the general character of the region and something of the type of its farming industries. The picket-inclosed garden is often a relic of the old idea of a garden as a precious bit of "beds" and plots where accessory and incidental things are grown. Nowadays we have come to think of a garden as a straight-away, resourceful and regular part of a complete farm enterprise. And the different styles of fences—what do they not suggest of the stage of mechanical ingenuity of the community or of customs that have become traditional?. Surely, the fence is significant.—Rural World.

THE BEST LINIMENT

MODERN BREAKING

By W. A. BRUETTE

A revised edition of the latest Treatise on the Training of Setters and Pointers.

THIS book enables anyone to do his own training and fully explains the methods employed by the most successful trainers in developing the setter and pointer. The important lessons are illustrated by photographs from life; nothing is left to guesswork. The entire subject is covered, from the selection, raising and development of puppies to the conditioning of dogs and their handling in the field. The amateur is told, in lucid language, how to make a dog a high-headed, stylish worker, stanch on his points, steady to shot and wing, and a prompt, tender retriever; all of this is accomplished by simple methods, some of them never before given to the public. The instructions for correcting the faults of bird dogs and keeping them up to their training are concise and easily understood. Every man who owns a bird dog or shoots in the field should read this book.

Harpers Weekly and The Breeder and Sportsman

$5.50 worth for $3.00

Breeder and Sportsman

One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly

Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

Pacific Bldg., Cor. Market and Fourth Sts.

Third Edition Within One Year of Publication.

CARE AND TRAINING OF TROTTERS AND PACERS

NEVER before in the history of the publishing world has a horse book gone into a third edition within one year of publication. Yet the explanation is simple—the book fills a long-felt want.

Never before has this subject been treated in a distinct manner. It has been handled in connection with autobiographies of trainers, but such works are out of print or out of date, for they were published 20 years or more ago. Conditions and methods have changed since then, and former treatises are just as much out of date as the high-wheel sulkies then in vogue.

"Care and Training of Trotters and Pacers" is as modern as a 42-centimeter gun. It does not contain the ideas of one man, but of 100 of the leading horsemen of the day, including Thomas W. Murphy, Walter R. Cox, and Edward F. Geers. These ideas were converted into book form by two prominent American turf journalists.

This book enables anyone to do his own caretaking and training until it is time to send the colt to a professional trainer, or the owner can train and race the colt himself. The treatise covers the details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented. Nothing is left to guess work. The language is lucid. Both theoretical and practical views are outlined and compared. The instructions are concise and easily understood. The work contains no advertisements—it is not a catch-penny publication that looks big in the advertisement but proves disappointing when received.

Many professional trainers have purchased the book and have found it interesting. Despite the war, over 300 copies have been sold in Europe and Australia.

Price $1.00 postpaid. Cloth, illustrated, 176 pages, 5x7 inches.

A Practical Treatise on the Training of Hounds

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types or English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

WINCHESTER

SELF-LOADING RIFLE, .401 CALIBER

IT GIVES A STREAM OF SMASHING BLOWS

No need to fear the most powerful or most dangerous animal, if equipped with the .401 Winchester. It can deliver five smashing, one-ton blows in a few seconds, with aim. This rifle is a self-loader, and it is only necessary to pull the trigger for each shot. It shoots cartridges small in size but powerful in execution loaded with either 200-grain or 250-grain bullets. It beats any other rifle of this type for power and is the most effective hunting rifle made. Your first hunt will prove every word we say.

THE GRAND PRIX—The highest honor—was awarded to Winchester Guns and Ammunition at the Panama-Pacific International Exposition.

Chas. L. DeRyder's Fall Sale

—of—

Trotting and Pacing Horses

Will Be Held

During the Exposition Race Meeting November 1 to 13, in San Francisco

the exact dates and location of the sale, at the most advantageous place in the city, to be announced shortly.

Here are some of the early consignments:

From PLEASANTON DRIVING PARK:

The Earnest, bay gelding, trial trotting 2:07, by The Exponent 2:11¾, dam Mardella (dam of 3) by Del Mar 2:16¾.

Bay gelding, (4) trial (3) 2:12, by Vernon McKinney 2:01½.

Baroness Psyche, roan mare, trial (2) 2:14, by Baron Review 2:21¼, dam Durnella 2:29¾ (dam of 4) by Axtell (3) 2:12.

Mildred Togo, chestnut mare (2) 2:16½, (3) 2:11½, trial 2:08¼, by Togo 2:27, dam Lady May (dam of 9) by Port Leonard 12953.

Bay mare, (5) trial 2:08¼ by The Harvester 2:01.

Prince Del Monte, trial 2:16½, by Kinney Lou 2:07¾.

Gray mare by Kinney Lou 2:07¾; (Mrs. MacKenzie's driving mare) especially gentle and safe for a lady.

Bay colt, (2) by Copa de Oro 2:01; nicely broken.

This is only a portion of the consignment from Pleasanton Driving Park; watch for the balance.

From JERRY DORAN, Oakland:

Bay gelding, two-year-old, by The Bondsman; good conformation and bred to make speed early. Will be broken to harness before sale day.

From MRS. C. L. JONES, Modesto:

Johnny, bay gelding by Prince Ansel (2) 2:20½; a nice young pacer that looks like a real good prospect.

From P. H. SMITH, Los Angeles:

El Volante S., four-year-old stallion by El Volante (3) 2:13¼ one of the handsomest horses in California and with a trial below 2:20 trotting with limited training as a colt.

Three-year-old filly by Zombro 2:11 dam Katherine A. by Diablo 2:09¾ showed fast as a two-year-old, not trained since.

Two-year-old filly by The Bondsman dam Rosemary 2:25 by Raymon 2:27¼ nicely broken as a yearling, since when she has been on pasture.

Blanca S. (5) by Red McK. 43766, dam Katherine A. by Diablo 2:09¼; a show mare, never trained for speed.

Katherine A., brood mare by Diablo 2:09¼, dam by A. W. Richmond.

Rosemary 2:25, brood mare, by Raymon 2:27¼, dam Black Bess by Guide 2:16¼.

From R. A. STEVENSON, San Antonio, Texas:

Dr. Dawson, bay gelding, pacer, trial 2:11¼, by Del Coronado 2:09½; never raced, but has the speed to win; one to buy to race next year; level headed and free legged.

Black mare, five-year-old, by Oh So 2:25½, and two of her produce, an unbroken two-year-old by Directly 2:03¼ and a weanling by Vernon McKinney 2:01½. Right all around.

Buyers from all over the country will be in attendance at the Exposition races, and California horsemen have never had a finer opportunity to dispose of their surplus. ***Consignments are solicited*** on my usual terms and guarantee—the best advertising, the best service in every way, the highest market price. List consignments early to get full benefit of advertising.

WOODLAND STOCK FARM

(Incorporated)

"Where the Champions Come From"

announces that on

MONDAY, OCTOBER 25, 1915

there will be offered at PUBLIC AUCTION, at the farm, an exceptionally choice lot of brood mares, some with foal at foot and all thought to be again in foal, a number of well developed yearlings and other speed prospects, all right in every way, the offerings including the following:

Weanling filly by Peter the Great 2:07¼, dam Carrietta 2:18, leading dam of yearling trotters, and dam of Suldine (2) 2:12, holder of the world's record for two-year-old trotters on a halfmile track.

Ruby Crellin, by C. the Limit 2:03¼, dam La Moscovita (dam of Bon Guy (3) 2:11¾, etc.) by Guy Wilkes 2:15¼, and filly foal by Robert Bingen 2:11¼; in foal to Robert Bingen.

Maggie Hall by Moko, dam Maggie Yeazer (dam of Walnut Hall 2:08¼, etc.) by Red Wilkes; in foal to Robert Bingen.

Lottie Whippleton 2:15 (dam of the world's champion yearling trotting gelding Anselot (1) 2:28½; Prince Lot 2:07¾, Lottie Ansel (2) 2:14½ and Ruth Ansel (3) 2:21; in foal to Robert Bingen.

Nosegay B. (dam of Aristo 2:08¼ and Nuristo 2:10½) by Langton 17536; in foal to True Kinney 2:12¼.

Brown colt, yearling, by Prince Ansel (2) 2:20½, dam Silver Haw (dam of Helen Stiles 2:06¼, etc.) by Silver Bow 2:16; can trot quarter in forty seconds.

Bay filly, yearling, by Prince Ansel, dam Eocita by Moko; can trot a forty gait now.

Bay gelding, yearling, by Bonaday 2:11¼, dam Oniska (dam of San Francisco 2:07¾, etc.) by Nutwood Wilkes 2:16½.

Peter's Queen, b m (4) by Peter the Great 2:07¼, dam Sonoma Queen 2:25, trial 2:10½ (full sister to Sonoma Girl 2:04¼); this mare can show half in 1:06 now, quarter in :32, and will trot in 2:10 this fall; she is one to buy to race and breed.

Princess Josie by Prince Ansel, dam Josie D. (dam of Joseph Ansel (3) 2:12¾, etc.,) by Nutwood Wilkes 2:16½.

Decoratio by Prince Ansel, dam Magella B. (dam of 3) by Nushagak.

Princess Viola by Prince Ansel, dam Viola by Gen. Benton.

Silver Haw (dam of Helen Stiles 2:06¼) by Silver Bow; colt at foot by True Kinney 2:12¼.

Woodland Bonnie Derby (dam of Bonnie Ansel 2:11¼, Bonnie Princess, trial 2:07¼, etc.) by Chas. Derby 2:20, dam Bonnie Red by Red Wilkes.

Josie D. (dam of Joseph Ansel (3) 2:12¾, etc.) by Nutwood Wilkes, dam Everette (dam of Wesos 2:12¼, etc.) by Nephew; colt at foot by True Kinney 2:12¼.

The Attraction by Peter the Great 2:07¼; filly at foot by True Kinney 2:12¼.

Aleema by Nutwood Wilkes 2:16½, dam Malverna by McKinney 2:11¼.

Prince Magella (3) ch g, pacer, by Prince Ansel, dam Magella B. (dam of 3) by Nushagak.

These are merely random selections from the great array to be sold. Watch this space for future announcements and send for catalog. Consignments are solicited subject to approval and consignors are assured of the very best kind of a deal in every way. Address for all particulars

ANOTHER BATCH OF SPRIGGANS.

The biggest bargain that has gone through a sale ring in many a day is the bay gelding Spriggan 2:08¼, which went through Charley DeRyder's last fall sale at seven hundred dollars. Various circumstances made him the "find" of the season, with his sale mate, Future Tramp, who sold for even less money, showing an even greater flight of speed and promising at present to be a stake horse of quality for 1916. The sales previously conducted by Mr. DeRyder have been the means of putting buyers and sellers in touch under conditions mutually profitable, and the sale of the present season bids fair to surpass all of its predecessors.

Quality of consignments counts for little at a sale unless the buyers are in evidence, and on the other hand the presence of buyers means nothing unless there is quality offered them as an inducement for bidding, and at the DeRyder sales these two important factors are always well balanced, as the promoter knows how to secure the presence of each. He certainly has hit upon a most opportune moment for the staging of the coming event, as is readily apparent to persons conversant with the general conditions existing on the coast.

While California has cut down the number of light harness horses she produces annually, quality has not been impaired, but improved, for the present crop of trotters and pacers in the hands of her breeders and campaigning owners is the peer or superior of any she has ever brought forth. The depressing feature of the situation lies in the fact that the present curtailing of racing here at home deprives them of their proper earning capacities, so that it is a case of "hit the trail for the outside" if much racing is to be done. As much of the pleasure of owning horses depends on seeing them race, the home demand is a light one.

The two weeks of racing early in November at the exposition, however, will bring to this city a great number of horsemen from the sections of the country where a high priced horse has a chance to win himself out in good shape, and Mr. DeRyder has chosen this time to bring together the California "quality" of horseflesh, and the visiting buyers who are justified by conditions in their localities in paying good prices for good horses. There are always a certain number of our own patrons of the sport who, even under adverse conditions, will go to a good figure for something that suits them, and when these gentlemen meet, the right horse will undoubtedly bring a few dollars more.

In order that the most people may be accommodated, the sale will be held at an advantageous point in this city, probably the riding school on Seventh Avenue, during the course of the trotting meeting, Nov. 1 to 13, inclusive, exact arrangements having not as yet been made. From the announcements of the early consignments there will be plenty of high class racing material to select from, any amount of it of genuine stake calibre, while the breeding stock offered will be of the giltedged variety. Consignments are solicited under Mr. DeRyder's usual terms and guarantees, and persons wishing to patronize the sale will find it mutually advantageous to list their horses at a very early date, thus getting the fullest benefit of the advertising always accorded the event. Mr. DeRyder should be addressed, as usual, at Pleasanton.

STARTING PAYMENTS IN COLT STAKES DUE FRIDAY, OCT. 22.

Friday, October 22, is the day designated as the date for the payment of starting fees for the various divisions of the colt stakes to be raced during the exposition meeting, November 1 to 13, the Occident alone excepted, payments therein having already been made. The stakes included are the Breeders' Futurity, the State Fair Futurity and the Stanford, remittances in the first named to be made to F. W. Kelley, Sec. P. C. T. H. B. A., 366 Pacific Building, San Francisco, while for the others the fees will be collected by Chas. W. Paine, Sec. California State Agricultural Society, Sacramento.

The schedule of events, date of contest as at present arranged, amount of starting payment, etc., is as follows:

Pacific Breeders' Futurity Stake No. 12, three-year-olds, foals of 1912—Trotting division, purse $2,800, Saturday, Nov. 13, $50; pacing division, purse $1,800, Saturday, Nov. 6, $35.

Pacific Breeders' Futurity Stake No. 13, two-year-olds, foals of 1913—Trotting division, purse $1,450, Thursday, Nov. 4, $35; pacing division, purse $1,200, Thursday, Nov. 11, $25.

Stanford Stake for 1915, three-year-old trotters, foals of 1912—Purse $1,200, Monday, Nov. 8, $20.

State Fair Futurity Stake No. 4, three-year-olds, foals of 1912—Trotting division, purse $2,000, Friday, Nov. 5, $50; pacing division, purse $1,500, Friday, Nov. 12, $35.

State Fair Futurity No. 5, two-year-olds, foals of 1913—Trotting division, purse $600, Tuesday, Nov. 9, $25; pacing division, purse $400, Wednesday, Nov. 10, $15.

"SAMPLING" THE WOODLAND CONSIGNMENT.

Not in recent years on the Pacific Coast has there been an offering of trotting stock at auction of the richness that characterizes, as a whole, the listings for the Woodland Stock Farm Sale which is to be held on Monday, October 25, at the farm at Woodland. Practically everything on the place is for sale, and only a very superficial scrutiny of the offerings is enough to reveal the fact that at this event, J. W. Considine is marketing animals, both old and young, that are of the kind not readily obtainable.

A review of every individual offered is impracticable at this moment, but it is a real pleasure to take the time and space for giving the "once over" to a few of the most striking examples of general desirability. Glance, for instance, at this one:

Bay filly, yearling, by Prince Ansel (2) 2:20½, dam Eocita by Moko; grandam Mendocita by Mendocino; great grandam Esther by Express. Can trot a forty gait.

Also, while we are letting this skeleton of a pedigree "soak in," here is another that can most readily be reviewed by coupling it with the foregoing:

Bay gelding, yearling by Bonaday 2:11½, dam Oniska by Nutwood Wilkes; grandam Bay Line by Direct Line. Trotter.

One of the fairy tales of the trotting turf at present is the story that goes with Mary Putney (3) 2:05½, winner of the senior trotting divisions of the Horseman, Horse Review and Kentucky futurities and holder of the world's record for her kind. We have in type to appear next week, a history of her ancestry as viewed by Volunteer, of the Horse Review, and it is well worth looking for. Suffice it for the time to say that in the yearlings listed above, western buyers have a chance to secure a pair of youngsters very closely related to the great futurity trotter, as Oniska is the dam of San Francisco 2:07¾, sire of the new champion, while Eocita and Mary Putney are half sisters. Both yearlings are trotters, and bear in mind also that Bonaday is siring speed and that yearlings by Prince Ansel have, in the last few weeks, gained two places among the world's champion trotters.

Another offering that brings world's champions to mind is this one:

Chestnut filly, weanling, by Peter the Great 2:07¼, dam Carrietta 2:18 (dam of four standard yearling trotters, including Suldine (1) 2:24¾, (2) 2:12, also holder of world's record, 2:13¼, for two-year-old trotters on a half-mile track) by Directman.

What a world of readable matter could be written about this filly, whose sire and dam each occupy a unique position among their kind. Peter the Great leads all stallions, living or dead, as a sire of extreme trotting speed, and his progeny have won more money on the turf this season than that of any other stallion. Year after year his worth is emphasized by great performances by trotters of all ages and sexes. Carrietta, for her part, is not only an excellent type of a matron from the standpoint of individuality, but is the world's leading producer of standard yearlings. Certainly a more pleasing "nick" could not be asked for than is exemplified by the blood lines of this aristocratic little lady.

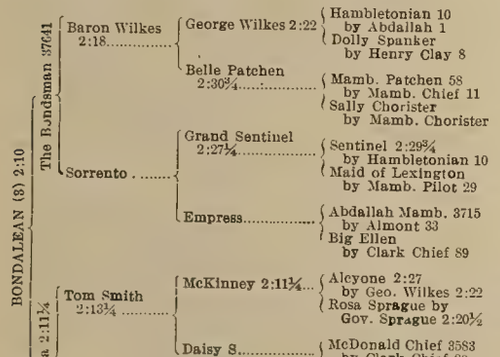
So much for the youngsters for the present, though there are numerous other babies of exceptional quality, for here is one that will interest horsemen who wish something to take to the races next season:

Peter's Queen, bay mare (4) by Peter the Great 2:07¼, dam Sonoma Queen 2:25, trial 2:10½ (sister to Sonoma Girl 2:04¼).

More breeding of the kind to cause the pedigree student a thrill, and the pedigree has performance to go along with it. Mr. Dowling has this mare in training at present and states that she will beat 2:10 this fall, as she is ready now for halves better than a 2:10 gait, and quarters yet faster. Certainly she should make a trotter fast, game and lasting, one of the kind needed to go up against the game with in these days of two-minute performers.

The Woodland offering is a comprehensive one, running the scale from aged brood mares to foals of 1915, with futurity prospects and racing material galore. All the youngsters have stake engagements, and all the matrons to be sold were bred this season to one of the trio of stallions in service at the farm—Prince Ansel (2) 2:20½, a sire of champions; Robert Bingen 2:11¼, one of the best bred of his family, or True Kinney 2:12¼, one of the most promising young sires of his generation of the great house of McKinney.

The quality and number of the farm's consignment will attract many buyers to the sale, and outside parties wishing to take advantage of this opportunity to market their surplus should get into communication with Mr. Dowling at once.



THOROUGHBRED SALES IN KENTUCKY.

Thoroughbred fanciers in the west who are recruiting their stables for future campaigns are reminded of the great array of youngsters, brood mares and stallions to be sold on Thursday, October 28, by the Powers-Hunter Company at Elmendorf Farm, Lexington, there being two separate lots to go under the hammer—the remainder of the thoroughbreds at Elmendorf and the entire holdings of Clay Brothers, Paris, Ky. From Elmendorf there is to go forth a famous band of stallions and mares and a goodly number of weanlings, the get of Uncle, The Manager, Sain, Hessian and Ballot, the get of the latter sire having been much sought after at recent sales. During the past season at the five sales held in New York, Saratoga and Lexington, twenty-one yearlings by Ballot brought $33,675, or an average of $1,603, which is a most excellent showing for this son of Voter and Cerito. The Clay consignment includes the stallion Magneto, by Star Shoot—Marie Frances, nearly a score of select matrons and over a dozen choice weanlings. The catalogs await your request and will be found valuable not only as a means of familiarizing yourself with the offerings, but for reference in the future.

Bondalean (3) 2:10 *and* Rayo de Oro (3) 2:09¾

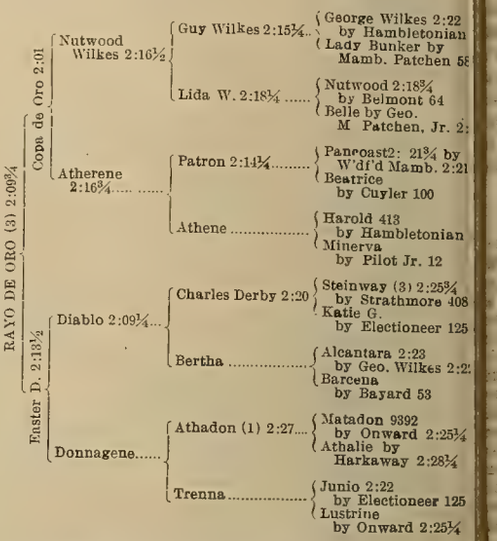
The pacing division of Oregon Futurity Number Five, which was contested during the recent Oregon State Fair at Salem, occupies a distinctive position in that series of colt stakes, in that it was raced in record time for the event and place, and witnessed the achievement of 2:10 honors by both the winner and the contending entry, this being the first time that the charmed circle has ever been approached by a three-year-old pacer in the northwestern classic. Some years ago, before the futurity was established, the California colt Ray o' Light paced two heats over the Salem course in 2:09¼ and 2:10¼ in a three-year-old class race, but the futurity has been less blessed with fast performances. In 1911 Ruby Light won the first of the series in 2:16 and 2:16¾, the time of her first heat standing as the stake record until this season.

Weather conditions have been responsible to a large degree for the moderate time usually evidenced in both divisions of the colt events at Salem in recent years, and the pacers this season had a much better track to race over than did the trotters. Rayo de Oro took the first heat in 2:09¾, after which Bondalean went to the front for two heats in 2:10 and 2:12¼, with Rayo de Oro the contender in each mile. As they are both Californians and are due to meet again in the local stakes in November they are a very interesting pair of youngsters at the present moment. The tabulation of the winner's pedigree is as follows:

5th dam Carmel by Duvall's Mambrino.

Bondalean was bred by the late W. J. Miller of Chico, whose modest operations as a breeder of light harness horses met with an exceptional degree of success, and is without doubt one of the best colt pacers that California, the home of numerous colt champions at the lateral gait, has yet produced. He is the first of the get of The Bondsman bred on the coast to enter the 2:10 list, and his blood inheritance through his dam is of a quality amply in keeping with that imparted to him by his sire, for Katalina was not only a stoutly bred mare, as a glance at the accompanying tabulation reveals, but a rugged campaigner as well. As a two-year-old (1907) she won each of her three trotting engagements, including the Breeders' futurity, taking a record of 2:22½. The next season she made a more extensive campaign, being first in the events for trotters of her age at Salem, Portland, Spokane and North Yakima, as well as first in the Stanford stake here at home, second in the Occident and third in the Breeders' futurity, reducing her record to 2:15¼. She raced successfully for two more years on the local circuit, taking her present mark of 2:11¼ as a four-year-old at Chico. Kate Lumry, her dam, before being retired to the brood mare rank where she achieved fame as the dam of Baby Doll 2:10¼, Katalina 2:11¼, Ella Mac 2:11¼ and Eddie G. (2) 2:30, was also raced with a fair measure of success by J. W. Zibbell, achieving a record of 2:20½. Her dam, C. C. L. by Combat, while not a campaigner, was a producer of proven excellence, being the dam also of Sateen Onward 2:19¼ and the speed sire Montrose L.

Before turning from the consideration of ancestry to that of performance, it is interesting to note that Bondalean, his dam and his grandam have all won races over the course at Salem.



Bondalean, in the contest with Rayo de Oro, had the advantage of having had quite a bit of previous experience at the races, he having acquired the brackets last season as a two-year-old. He was then the property of his breeder, and as Mr. Miller's usual racing partner, Loren Daniels, was in the northwest, he was a member of the stable of Elmo Montgomery, who bobs up annually with a pacer or two of excellent quality. The colt developed a peculiar and puzzling trouble in his front feet which was not overcome until late in the season and which retarded his development considerably. At that he was second in the pacing division of the Breeders' futurity, winning one heat and going the entire race on his nerve, and at Pleasanton won the stake for the age and gait promoted by R. J. MacKenzie, his fastest time being 2:20½. He remained in Montgomery's charge until after the death of Mr. Miller, subsequently being sold to the canny Sacramento sportsman C. F. Silva, who preferred him to the one-time world's champion John Malcolm, also the property of the Miller estate. Before passing from Elmo's string, the latter gentleman had grown to consider him as a very likely candidate for championship honors, basing his opinion upon the comparison of development shown by this colt and that of the former three-year-old champ, Jim Logan 2:05½, who was educated and is still owned by Mr. Montgomery.

In the Silva stable, where he continued his education in the competent hands of his owner and Loren Daniels, Bondalean showed race horse qualities of an order that caused him to be entered in the 2:20 pace for amateur drivers at the June meeting of the P.-P. I. E., in which there were ten starters. In the first heat in 2:12¼ he was fourth to W. J. K., Frank Perry and Trix McAdrian owing to a break in the stretch under a drive, but he was the best of the lot in the succeeding miles, Mr. Silva putting him down in front in 2:12½ and 2:11¼. During the summer Mr. Silva has given him racing experience in the matinees in Sacramento and here in this city, his performances in both cities being of the notable kind. On August 1 at Sacramento he forced W. J. K. to pace in 2:07½ to win the first heat by a very narrow margin, then won the second in 2:10½ and was beaten by a neck in the third in the same notch. On August 22, over the three-quarter mile course in Golden Gate park, this city, he was not on edge but was second to Dick W. in 2:09¾ and 2:10½, while on the following Sunday he trimmed the local free-for-allers with a second heat in 2:08 and a third in 2:10½ after having been fourth the first time out in 2:12, an early break having cost him ground that his owner-driver did not ask him to make up.

Following this performance, his last before the Salem race, he was taken home and Mr. Silva offered to drive him in 2:05 on any kind of a wager, and it is the belief of many local horsemen and race followers, including the writer, that the colt was capable of such a performance. At any rate, Mr. Silva had no takers, and as his bank account could be invaded for a sum that would be mighty handy to plenty of horsemen during this off year, there must have been a very evident reason for the eloquent silence preserved by the "talent" subsequent to the issuing of Silva's "defi." Bondalean is a bay colt (some would call him brown) of good size and conformation, sound, and a great prospect for a successor to Teddy Bear 2:05 in Mr. Silva's esteem as well as for numerous future honors on the track. Had the customary racing been given this season on California tracks the writer thinks it highly probable that the youngster would have lowered William's three-year-old record of 2:05.

Bondalean, while bred in California, is not so thoroughly a "Native Son" as is Rayo de Oro, though perhaps a native son is a native son, no more, no less, under any circumstances. The Bondsman, while in service here, was not owned in the state nor did he come of California ancestry, while Rayo de Oro is distinctly a product of the Golden State, as were also his immediate ancestors, the pedigree appearing herewith having a pronounced California "tang" to even the "lay reader." Copa de Oro, Nutwood Wilkes, Guy Wilkes, Atherene, Diablo, Steinway, Bertha, Athadon, Electioneer and many others among the names in evidence are words that have a familiar ring in the ears of many, many people who are not "horsemen" by any means. The pedigrees are notable for the intensification of the blood of Hamb tonian 10 in each, and the colts that they repres have in common these further prime requisites greatness—each one has a good sire and a good da

Copa de Oro is the first and only two-minute pa bred in California, for though his official record but 2:01 he was deprived of a mark of 1:59 on technicality at the same course where his first 2: performer, Contention B., was hard-lucked out of place in the table of world's champions — Phoen the Arizona capital seeming to have its finge crossed whenever Will Durfee appears on its o skirts. Given due credit for an actual, honest p formance, Copa de Oro ranks fifth among the pace in point of speed, and none have ever gainsaid M Durfee's claim that he is the best bred of the tw minute delegation. An active and successful parti pant in several campaigns, his stud opportuniti were very limited until quite recent years, but of t early crops of foals by him there are known to t writer at least four three-year-olds who have beat 2:10, two of them, Contention B. and Rayo de Or being "in the books," the latter being the first achieve a race record inside that limit.

5th dam Minnie Wren by Challenger 1064
6th dam Valencia by Cassius M. Clay Jr. 22
7th dam by Abdallah 15
8th dam by Coeur de Lion.

Easter D., dam of Rayo de Oro, was bred by Louis Stock of Fresno and was foaled his property in 1906 passing at an early age to James Stewart of Los An geles, whose property she yet remains. The lass was engaged in the Breeders' futurity and was bred to be a fast performer, her sire being Diablo 2:09¼, the best son of Charles Derby 2:20 and the incomparable Bertha, while her dam was Donnagene, by the one-time champion yearling trotter Athadon (1) 2:27. Mr. Stewart fitted the filly as a two-year-old, and at Chico she took the junior pacing division of the Breeders' classic in 2:15¾ and 2:13½, the field defeated including the future great campaigners Jim Logan and Teddy Bear. By a bit of misfortune for her owner, but fortune for some other folks, the speedy young miss was put out of commission before another season rolled around and has never appeared again at the races.

Tough luck though this was, Easter D. wasn't the kind of property that fails to bear interest on the investment, and as a brood mare she has brought some very nice large yellow bills to aid in upholstering the interior fittings of her lengthy owner's pocket book, a number of her foals having been disposed of by him for excellent figures. She was put to breeding early, and produced her first foal in 1910 to the cover of Zolock—a filly which never got to the races. Her next foal was Patrick de Oro (3) 2:22¼, who won two three-year-old races in Canada and worked a Canadian two-lap track at that age in 2:08¼; he was purchased by J. W. McClain of Monarch, Alta., and has remained in Stewart's hands, developing into a fast horse and due to start here in November. Then came Rayo de Oro (3) 2:09¾, purchased by J. S. Nickerson of Los Angeles and turned over to Will Durfee with the results just evidenced; her next foal, full brother to the foregoing pair, went to S. S. Bailey of Pleasanton and is being developed carefully for an aged campaigner, having shown speed to date of a most satisfactory nature. She has been a regular producer to the cover of Copa de Oro, and

There are more of this brand yet to be heard from. On back of the cross to Athadon there are yet some generations of sturdy blood, the dam of Donnabine being Trenna (dam also of Con Brino 2:14½) by Dionio 2:22, the son of Electioneer 125 who sired the dams of George G. 2:05¼, Athasham 2:09¼ and Dunham 2:09¾, Trenna's dam being Lustrine, a triple-producing daughter of the mighty Onward 2:25¼. In their turn come Minnie Wren by Challenge 1064, an excellent son of Almont 33, then Valencia by Casius M. Clay Jr. 22, sire of the dams of Del Norte 2:08 and Chehalis 2:04¼. To this point the dams are standard and registered, and still beyond this comes a daughter of Abdallah 15. Most readers will agree with the writer in his opinion that "there is a reason" for the quality displayed by Bondalean and Bayo de Oro.

Both youngsters are among the eligibles to the pacing divisions of the futurities to be raced here next month, and their next meeting is awaited with much interest. The writer has not as yet had opportunity of viewing the Copa de Oro pacer, but understands from others that he lacks a bit of his opponent's size and conformation. Certain it is that he must be a perfect gentleman in harness if he surpasses him in behavior, and the preponderance of Bondalean's racing experience leads to a bit of "leaning" toward the latter in the writer's favor. Sure it is that they are great colts, nor are they the only ones in sight, and given good luck on weather and fitness of the starters on race days the coast futurities may have a new pacing mark before they are raced to a decision.

BRADMONT PACES IN 2:08¾.

Sunday was another one of "those days" and the stadium fun drivers and their friends appreciated it very much indeed, a good crowd turning out to witness four excellent races and one fair one, eight of the twelve heats being contested in time below 2:15, five of them in 2:12 or better.

"Pitying glances" were the order of the day for Bradmont and Happy Dentist when the spectators saw them pitted against Little Bernice and Dick W. in the free-for-all pace, but as things turned out the crowd was wasting sympathy, as Happy and Braddy were there like wolves. One thing seems very certain, and that is that when Jimmy Ryan sells a horse he includes the recipe with the halter and the bill of sale, as Happy Dentist, just purchased by Freddie Lauterwasser, was fit as could be, going the best race of his career for the three-quarters course. The first heat fell to Happy in 2:10½, with one A. Ottinger a close second with Dick W., Bradmont bringing up the rear guard in safety. Next time out Machado hung close up throughout the mile, and in a clever finish put Bradmont in front at the wire by a small margin in 2:08¾, Happy making a grand effort, with Dick W. and Little Bernice not dangerously close. Just to show that they were really racing, the two aged geldings went at it for blood again in the third, and this time Happy "took his evens" by winning by about the same margin by which he had lost in the second. Little Bernice was unsteady at various points, and Dick W., while never breaking a pace, seemed to lack the customary and necessary sizzle.

Lucia S., the Marysville pacer, showed herself to be up to a nice race in the first event, stepping a bit faster each time out and disposing of her field handily after dropping the first heat to Emma M., Billy Malough's reliable mare. The girls started in at 2:14½, went to 2:12 and wound up in 2:11½—so a couple more would have put 'em in the ten list, perhaps. Victor Pointer and Ateka were straight heat winners, as was Ottinger's bay trotter Agnes Carter, the latter lass trotting the best heat of the season for the Stadium oval—2:13. On a regulation track she looked up to a mile around 2:10, as she was not called on for anything worth mentioning. As per usual, Jimmy Ryan did the starting and lost no time about it. The details:

2:15 pace:
Lucia S. .....(J. E. Strain) 3 1 1
Emma M. .....(Wm. Malough) 1 2 2
King Pointer .....(H. Campodonico) 2 4 3
Senator H. .....(J. Kidd) 4 5 4
Mabel Dillon .....(B. Cohen) 5 3 5
Time—2:14½, 2:12, 2:11½.

2:18 pace:
Victor Pointer .....(D. W. Keating) 1 1
G. J. P. .....(R. Consani) 2 2
Rosey O. .....(J. J. Ryan) 3 3
Time—2:19, 2:15½.

Free-for-all pace:
Happy Dentist .....(Fred Lauterwasser, Jr.) 1 2 1
Bradmont .....(G. J. Giannini) 4 1 2
Dick W. .....(A. Ottinger) 2 3 3
Little Bernice .....(J. C. Welsh) 3 4 4
Time—2:10½, 2:08¾, 2:09½.

Free-for-all trot:
Agnes Carter .....(A. Ottinger) 1 1
Matawan .....(H. Cohen) 2 2
Francis S. .....(J. E. Strain) 3 4
Birdeye .....(A. Combatalade) 4 3
Time—2:13, 2:14.

2:20 mixed:
Ateka .....(B. Cohen) 1 1
Lassie M. .....(M. M. Bates) 2 2
Time—2:22½, 2:19.

Drink Jackson's Napa Soda.

NINTH DAY AT COLUMBUS.

Columbus, Sept. 30.—The Arch City stake for 2:10 pacers, four heats of which were contested yesterday and two today, was not only one of the greatest contests ever witnessed here, but its decision brought forth some new world's records. The time for yesterday's heats was 2:03½, 2:03¼, 2:02½ and 2:04¼, and the heat winners of yesterday came back strong today, Russell Boy winning the fifth lap by a very narrow margin from plucky little Hal Boy in 2:03¼, clipping a quarter of a second from the fifth heat record of 2:03½ established two years ago at Lexington by Frank Bogash Jr. The sixth heat also went to Geers' mount in 2:03¼, equaling R. H. Brett's Detroit record, while the race in its entirety constitutes a record performance for a six heater by a matter of two and one-half seconds. In the 2:13 pace, also continued from yesterday, the original favorite, Camelia, came to life today and threatened to make good for a time, but couldn't beat Dwight Logan in the long run, the local horse's victory being a popular one.

Curt Gosnell and Single G. fortified themselves further against the rigors of an Indiana winter by laying up a little more feed money in the Board of Trade pace, but the pair had competition of a dangerous kind, Beth Clark grabbing the first two heats while the Hoosiers ate a little dust as an appetizer. Our Colonel, with Frank Childs up, went the most consistent race of the three leaders, being the contender in each heat. General Todd, at last getting away from Miss Harris M., had nothing against him in the field for the pacing division of the Horseman futurity to make him display championship form, winning as he pleased in time around 2:10.

Mirthful annexed the 2:08 trot in straight heats, but the 2:09 pace brought out two heat-winners, Fern Hal and Fred Russell, before being postponed until tomorrow. The summaries:

Columbus, Sept. 30.—2:13 pace, purse $1,200 (first two heats Sept. 28):
Dwight Logan, br h by Bert Logan.....
.....(Valentine) 1 1 4 6 1
Camelia, br m by Cummer.....(Cox) 3 5 1 2 2
Tramp a Bit, ro h by Trampfast (Jamison) 7 2 2 1 3
Grace D., Ross Keith, Gilbert M., Pauline Hilda and Admiral Dewey II. also started.
Time—2:06¼, 2:05½, 2:07, 2:08¼, 2:10½.

Arch city, 2:10 pace, purse $3,000 (first four heats Sept. 29):
Russell Boy, b h by Rustic Patenter....
.....(Geers) 2 4 2 1 1 1
Judge Ormonde, bl h by Ormonde.....
.....(Valentine) 7 1 1 2 3 3
Hal Boy, b g by Hal B.....(McMahon) 1 2 3 6 2 2
The Beaver, Queen Abbess, Peter Farren, The Importer and Fred Mack also started.
Time—2:03½, 2:03¼, 2:02½, 2:04¼, 2:03¼, 2:03¾.

Board of Trade, 2:07 pace, purse $3,000:
Single G., b h by Anderson Wilkes (Gosnell) 3 6 1 1 1
Beth Clark, bl m by Joe Patchen(Valentine) 1 1 3 7 3
Our Colonel, b h by Colonel Cochran(Childs) 2 2 2 2 2
Major Ong, Rastus, Tommy D., Aconite and May E. Pick also started.
Time—2:03¼, 2:04¼, 2:03¼, 2:06¼, 2:03½.

Horseman Futurity, three-year-old pacers, purse $2,000:
General Todd, b c by George Todd.....(Rea) 1 1 1
Lady Aubrey, br f by Captain Aubrey..(Snedeker) 2 2 3
Sad Thoughts, b f by Bingen.....(Cox) 4 3 2
Arkancello and Dorothy de Forest also started.
Time—2:09¼, 2:10¾, 2:10¼.

2:08 trot, purse $1,200:
Mirthful, b m by The Star of Patchen..(Murphy) 1 1 1
St. Frisco, b h by San Francisco.....(Geers) 2 2 2
Harry J. S., bl h by Admiral Dewey.....(Tyson) 3 3 6
Willgo, Nata Prime and Hazel Laing also started.
Time—2:08¼, 2:06¼, 2:08½.

2:08 pace, purse $1,200 (unfinished):
Fern Hal, bl m by Gold Hal.....(McPherson) 1 1 4
Fred Russell, b g by Little Frank.....(Hersey) 8 2 1
Jean, b m by Flosko.....(Murphy) 2 3 2
Aretta V., Kate McKinney, Fleeta Dillon, Peter Chimes, Baron A., Altawood and The Climax also started.
Time—2:06¼, 2:05¼, 2:05¼.

Tenth Day at Columbus.

Columbus, Oct. 2.—Rain caused an interruption in the regular program yesterday, and when racing was resumed today it was over a track that was none too fast. Fred Russell from Harry Hersey's string, had small difficulty in winning the 2:09 pace, carried over from Thursday, Fern Hal failing to figure as a contender in today's section of the event. Peter Scott paid another dividend on his thirty-thousand-dollar capitalization by taking the big end of the Buckeye stake in straight heats, with Worthy Prince the contender throughout the race.

Lustrous McKinney, Texas Jim and Wilbur S. indulged in a give and take contest for five heats, with Rodney's pacer having the best of the deal at the end of the fifth heat, when the race was declared finished. Seneca Boy won the first heat of the 2:15 trot, with Trampright next to last, after which the roan son of Trampfast carried Murphy to the front for two wins, the sundown clause bringing the race and the meeting to a close. The details:

Columbus, Oct. 2.—2:09 pace, purse $1,200 (first three heats Sept. 30):
Fred Russell, b g by Little Frank..(Hersey) 8 2 1 1 1
Fern Hal, bl m by Gold Hal..(McPherson) 1 1 3 5 4
Jean, b m by Flosko.....(Murphy) 2 3 2 6 3
Altawood, Aretta V., Kate McKinney, Fleeta Dillon, Peter Chimes, Baron A. and The Climax also started.
Time—2:06¼, 2:05¼, 2:05¼, 2:06¼, 2:06½.

Buckeye Stake, 2:12 trotters, purse $5,000:
Peter Scott, b h by Peter the Great....(Murphy) 1 1 1
Worthy Prince, b h by Prince McKinney....(Cox) 2 2 2
Miss Directed, br m by Directwell..(Valentine) 4 4 3
Lettie Lee, Alice McGregor, Evelyn D. and Sadie S. also started.
Time—2:08¼, 2:09¼, 2:08½.

2:11 pace, purse $1,200:
Lustrous McKinney, b g by McKinney....
.....(Rodney) 1 2 1 2 2
Texas Jim, ch g by Texas Jack(V. Fleming) 2 3 8 1 1
Wilbur S., br g by Anderson Wilkes (Gosnll) 8 1 9 3 3
Wait and See, Lord Seymour, All Direct, Tommy Direct, Spring Maid and Virginia Brooks also started.
Time—2:07¼, 2:06½, 2:07½, 2:07¼, 2:11¼.

2:15 trot, purse $1,200 (declared finished):
Trampright, ro h by Trampfast.....(Murphy) 10 1 1
Seneca Boy, ch g by King Entertainer.....
.....(W. Fleming) 1 3 3
.....(Pierce) 2 2 2
Vanko, b h by Moko.....
Roy Miller, R. F. V., Bertha Carey, Cacus Star, Pittsburg, Willow Mack, Rose D. and Don Blazes also started.
Time—2:10¼, 2:08½, 2:10.

OREGON STATE FAIR.

[Report by Anozira.]

Sept. 30.—This is "Portland Day" and the way the people are crowding each other in the spacious grounds of the Oregon State Fair leads one to think there are as many on the grounds today as were here yesterday. Everybody is wearing a smile today. It is big Thursday and no rain. The wind seems to be shifting southward and the "old-timers" and weather prophets say look "out, rain is in sight." It did not rain today, and "sufficient unto the day," etc., is good enough for anybody.

The racing today was classy, California being represented in the long end of the summaries by Charley Spencer with Bonnie Ansel and Lon Daniels with Teddy Bear.

One of the features of this year's fair is the relay race. In previous years E. A. Armstrong has carried off the honors, but it would seem he has met his Waterloo as George Drumheller is out-changing and out-riding him. What makes this relay most interesting is the fact that all the outfits are composed of thoroughbreds and some very fast half-miles have been run carrying a full sized man and twenty-five pound saddle. The summary:

Sept. 30.—2:20 pace, purse $700:
Jennie May, br m by Hal B.....(Lindsay) 1 1 1
Belle Smith, br m by The Blacksmith.....
.....(W. Hogoboom) 2 2 2
Duke, b g by Admiral W.....(McNair) 3 5 3
Helen Hal, b m by Hal B.....(Smith) 4 3 4
Ruth Hal, b m by Hal B.....(Sawyer) 5 4 5
Marlin b g by Dialect.....(H. Hogoboom) ds
Time——

2:12 trot, purse $2,000:
Bonnie Ansel, b m by Prince Ansel.....(Spencer) 1 1 1
Amy McKinney, bl m by McKinney...(Wilbourne) 2 2 2
Dan Matthews, b g by Eagle Blood.....(Brown) 4 3 3
Sargo, b g by Keeler.....(Swisher) 3 4 4
Time—2:13, 2:13¼, 2:15¼.

Free-for-all trot or pace, purse $——.
Teddy Bear, b h by Del Coronado.....(Silva) 1 1 1
Hal Edo, b m by Hal B.....(Archer) 2 4 2
Allerdaw, br g by Allertonian....(W. Hogoboom) 4 2 3
Hal Bear, b h by Hal B.....(Lindsay) 3 3 4
Time—2:09¼, 2:09¼, 2:12.

Oct. 1.—The weather man maintained his reputation. The 54th Annual Fair was not exempt from rain. It began to rain about midnight and kept it up until about 10:30 this morning with the result, a heavy track and slower time than on preceding days. There was a very fair crowd in the grandstand and every heat was applauded. The time, being slow, gives no indication of the contests. Every heat in both races was fought from wire to wire.

What will be doing tomorrow is problematical as the wind is still in the rainy quarter and the barometer falling gradually. The summaries:

Oct. 1.—2:20 trot, purse $700:
Floradora Z., b m by Zombro.....(Guion) 1 2 1
Novela, b m by Letrado.....(Stetson) 2 1 2
Sea Waif, b m by The King Red.....(McManus) 4 3 3
Eloise Dell, br m by Alconda Jay.....(Daniels) 3 4 4
Zomdell also started.
Time—2:19½, 2:19½, 2:20.

Special pace, purse $——.
Delmas, ch g by Dialect.....(Wilbourne) 1 1 2
William G., ch g by Clarence Wilkes....(Duncan) 2 2 1
Belle Smith, br m by The Blacksmith.....
.....(W. Hogoboom) 3 3 4
Jennie May, br m by Hal B.....(Lindsay) 4 4 3
Ruth Hal also started.
Time—2:18¾, 2:21, 2:21.

Oct. 2.—This is "getaway day." It has rained all night and the track is a regular lob-lolly of mud. True to form, the Oregon State Fair does not let rain interfere with racing. As a consequence two races are carded for today, the 2:25 pace and a special trot, both races for $500 each. It had been hoped the track would be good today as it was slated to start Mr. Silva's colt Bondalean for the Northwest coast record and the 2:25 pace bid fair to be the best race of the season, as this would be the last opportunity for the contenders to try issues this year. But it was another illustration of the truth of Burns' saying, "the best laid plans," etc., and while there was only about 500 in the grandstand and the track a real sea of mud, the audience enjoyed the sport and the deep-sea sailors seemed to enjoy the mud.

This breaks up the 1915 circuit. As arranged this year it was an expensive proposition for the horsemen because the "ships" were so long. If it might be arranged to take in a few more localities and make the shipping shorter and less expensive, the horsemen would appreciate it more and a greater number of starters would appear in every race. There is considerable talk along this line now and it is barely possible that another year may see this accomplished. The work of Judge McNair was up to form and was enjoyed by every one present. The details:

Oct. 2.—2:25 pace, purse $500:
Mack Fitzsimmons, ch g by Bob Fitzsimmons..
.....(Helman) 1 1 1
Lady Hal, b m by Hal B.....(W. Hogoboom) 2 2 2
Contention B., b g by Copa de Oro.....(Daniels) 3 3 3
Hal Bear, b g by Hal B.....(Lindsay) 4 4 ds
Lena Patch and High Ho also started.
Time—2:25, 2:25, 2:28¾.

Special trot, purse $500:
Kid Cupid, ch g by Cupid.....(Daniels) 1 1 1
Nuristo, br g by Nushagak.....(Spencer) 2 2 2
Dan Matthews, b g by Eagle Blood.....(Brown) 3 3 3
Zomdell, b g by Zombro.....(Archer) 4 4 4
Amy McKinney also started.
Time—2:33, 2:40, 2:35.

Horse Show Entertains and Instructs

The long awaited P.-P. I. E. horse show began at nine o'clock on the morning of Thursday, September thirtieth, and has been a daily feature at the exposition, Sundays excepted, continuing to and including Wednesday of next week. Breeding classes were judged in the mornings in the stock stadium in the center of the cluster of barns which house the hundreds of thousands of dollars worth of horseflesh present, and the performance classes have been shown in the specially prepared ring in the infield of the racetrack. The morning affairs have been of an educational nature, while those of the afternoon have not only educated but entertained, the latter events partaking largely of the general characteristics of the accepted form of the "society horse show," with western "trimmings."

The breeding classes of the standard bred trotting division were judged by Walter Palmer on the first morning, and while the quality displayed was of an unusual order, the number of entries was deplorably light, due to a number of reasons. The majority of the breeders of trotters are campaigners as well, and most of the California horsemen who would have been patrons of the show ring if possible, found themselves away at the races. The show classes at our state and county fairs usually surpass those of the P.-P. I. E. in the standard classes, simply because breeders find them convenient for them to take part in, being held during the same dates on which racing is also conducted.

Five entries were made in the class for stallions four-year-old and over, the awards going in the order named to C. W. Winter's Alhambra Prince, L. H. Todhunter's Peter McKlyo, D. E. Hoffman's Tom Smith, John N. Colomb's Onward McGregor, and D. E. Hoffman's Jonesie Mac.

Only one two-year-old stallion was shown in that class, F. S. Turner's Exponent Mac, by The Exponent. Weanling stallions had but one representative, Chas. Butters' foal by The Bondsman out of Lottie Lynwood, sister to Sonoma Girl, and S. Christenson's Minnie Bond had no competition in the class for two-year-old mares. Two other classes had but one exhibitor, S. Christenson with the produce of Perza in the class for produce of single mare, and F. S. Turner with the get of The Exponent in that division.

Yearling stallions were more in evidence, S. H. Cowell's Peter C. being returned the winner over Frank Turner's F. S. Jennings, L. H. Todhunter's McKlyo Boy and Frank Turner's F. S. McGaffery. In the yearling filly class Mr. Todhunter's Charlotte McKlyo was placed over Mr. Cowell's Dora C., thus evening up matters in a friendly showing feud between Harry Cowell and Col. Jim Thompson. Jim was "between the devil and the deep sea," as some seasons back he purchased Peter McKlyo from Patchen Wilkes Farm for Mr. Todhunter, and last fall brought out Peter C. and Dora C. for Harry Cowell, all three of the youngsters named being by Peter the Great. To make the Colonel's predicament more precarious he showed Leavitt Todhunter's horses in person, but Mr. Palmer's awards allowed both the patrons of the judgment of Genial Jeems to be well satisfied.

Among the mares, four-year-olds or over, S. Christenson's Elna was Mr. Palmer's choice, with Mr. Todhunter's Sweet Bow second and Mr. Butters' Lottie Lynwood third. The light harness horses have also fared well in the performance classes in the afternoons and have held up their end of the show in first class style.

While the trotters in evidence were less numerous than was hoped for, the show in every other branch has come up to expectations in a striking manner. The draft horses are there in abundance and of unsurpassed quality, coming not only from the farms of the coast but from the middle west as well. Shetlands, Hungarians and Welsh ponies please the kids and older folks as well, and the park drivers, hackneys, Morgans and gaited saddlers are all profusely represented, the gaited saddlers being especially popular with the visitors. The pick of the land is present, and they are most welcome.

Nor is that other useful animal, the ass, neglected in the exposition's offerings, for big mealey nose fellows with heads, ears and underpinning apparently all out of proportion to their bodies are occupying comfortable stalls and drawing cash and ribbons and the visitors' attention, which is what they came for. The most prominent farms are represented in the exhibits of draft and utility animals and saddle and show horses, and will be given due attention in a special "horse show" number of the Breeder and Sportsman which will be forthcoming in the near future.

While the competitive events are held in the rings under duly prescribed rules and regulations, the "real show" is always open in the barns and always going on. The number of visitors that make the trips up one aisle and down another is amazing, and from morning till night the attendants and owners are busy answering questions and giving information concerning their animals. Out in the show rings the contestants achieve honor and glory—in the stables the owners and exhibitors come face to face with the brother breeder and the prospective customer, while the visitor learns at first hand the true value of "pedigree" in livestock, how this result and that result has been accomplished, and how he himself may best improve his own holdings in horseflesh.

It is a great show, and its results will be far-reaching. By all means see the afternoon performances, and spend what time you can in the barns. You will find yourself rewarded for the trip.

FIRST DAY AT LEXINGTON.

Lexington, Oct. 4.—With the Castleton Cup for free-for-all trotters as the feature of its card, the forty-third annual meeting of the K. T. H. B. A. commenced here this afternoon under pleasing conditions—good weather and good track, a record crowd for opening day in attendance, and some great racing.

Peter Volo, champion trotter for the ages of two, three and four years, took the Castleton Cup in straight heats from a field of five great trotters, and in so doing not only made a material reduction in the best time previously recorded for that event but also hung up a new record for a two heat race by a stallion, which has been held since 1910 by The Harvester. The champion's time for the two miles was 2:04¼, 2:03¼, made at North Randall in an event in which he was driven out in each heat by the California mare, Sonoma Girl, so the record of Peter Volo, 2:02½, 2:02¾, is a decided cut from the old figures. Margaret Druien and Ross B. alternated as the principal contenders, and the time has not been surpassed in a trotting race on the Grand Circuit this season.

Alonzo McDonald and the roan mare Duchess "got together" today for about the first time this season, winning the 2:10 trot in one-two-three order from Exall and Bonington, the latter horse piloted by his old teamster, Johnny Dickerson. Fay Richmond took the 2:07 pacers into camp handily, winning the first heat from the Canadian sidewheeler, Billy Brino, in 2:06¼. The second was not so easy for him, as Frank Childs had the wrinkles ironed out of Our Colonel's hide by that time and forced the Indiana pair to ramble a real mile and cut their winrace record to 2:03¾.

Fred Egan and May Direct topped the summary in the 2:14 pace, but had company all the way, Margie Hal taking the second heat but tiring in the third and fourth. William was on the boards for a spin against his own record to wagon, but the event was carried over by mutual consent. The summaries:

Lexington, Oct. 4.—2:10 trot, purse $1,000:
Duchess, ro m by Allerteen.....(McDonald) 1 1 1
Exall, br h by Exalted.....(Pearse) 2 2 5
Bonington, ch h by Bellini.....(Dickerson) 3 9 2
Nata Prime, Todd Temple, Willgo, Lady Grattan, Bertha Carey, Nathan Axworthy and Signal Boy also started.
Time—2:07¾, 2:07¼, 2:08.

2:07 pace, purse $1,000:
Fay Richmond, gr g by New Richmond.....(Jones) 1 1
Billy Brino, b g by Wildbrino.....(V. Fleming) 2 6
Our Colonel, b h by Colonel Cochran.....(F. Childs) 8 2
Rastus, Auto Zombro, Lillian T., The Assessor, Princess Margaret, Polly Ann and Homer Baughman also started.
Time—2:06¼, 2:03¾.

The Castleton Cup, free-for-all trot, purse $3,000:
Peter Volo, br h by Peter the Great.....(Murphy) 1 1
Margaret Druien, b m by Peter the Great....(Cox) 2 3
Ross B., b g by Petronius.....(Wright) 5 2
Joan and Maymack also started.
Time—2:02½, 2:02¾.

2:14 pace, purse $1,000:
May Direct, b m by Very Direct.....(Egan) 1 5 1 1
Margie Hal, b m by Devil Hal.....(Rea) 2 1 3 2
Tango, br h by Directly.....(Todd) 5 2 7 4
Budd Elliott, Lady Venus, Rockline, Colonel Ellsworth and Lady J. also started.
Time—2:06¾, 2:08½, 2:07¼, 2:09½.

Second Day at Lexington.

Lexington, Oct. 5.—Mary Putney, the really and truly "sensation" of the season in trotting circles, added $8,500 to her bank account here today by taking the senior trotting division of the Kentucky futurity in straight heats. While the great daughter of San Francisco and Mendocita was never fully extended and had command of the situation at all times, the contest was in keeping with other famous events of the same series, and added one more world's record to those already credited to the stake, as Mary Putney's second mile has not only never been beaten but twice in the futurity, but constitutes a new mark for fillies of the age and gait, the former figures of 2:06½ having been established five years ago over the local track by Native Belle in a performance against time, the comparison of the conditions making Mary Putney's achievement just so much more impressive. Humfast and Colorado Range both trotted good races and were second and third, respectively, in each heat.

That Charley DeRyder secured a real good sort of a trotter in Governor Mason was pretty well evidenced this afternoon when the California teamster won his first Grand Circuit event for the season with the Kansas lad—a five timer at that. Eleven horses took the word in the first heat and the Governor rapidly fixed himself up for a win in 2:08¼, though Peter Billiken gave him a stout challenge in the stretch. The Governor again went to the front in the second but dropped back when collared at the head of the stretch, finishing in fifth position, while the third heat found him clear at the tail end of things, both miles going to Valentine's entry with Abu Taleb second. The Governor was right a ready from then on and handled his field as he pleas for the fourth and fifth.

Earl Jr., ten years old and with most of those t years spent in harness, gave a real demonstration quality by taking the 2:04 pacers into camp in t fast miles, the first one equaling his record perfor ance of 1912 at Columbus. Cox trailed R. H. Br and Single G. well into the stretch and then took c to win from Brett by half a length, the time bei :31, 1:00½, 1:31 and 2:01½. Similar tactics prevail in the second, with Single G. the contender. Gra was fined $100 for taking out on the upper turn a allowing Single G. to come through on the po Savoy won the first two heats of the 2:20 pace fro Peter Worthy, Presolite and Silver Brush, aft which the event was caried over. William made a unsuccessful attempt to lower his wagon record 1:59½, pacing the route at that hitch in 1:59¾, a will try it again later in the week. The day detail:

Lexington, Oct. 5.—2:13 trot, purse $1,000:
Governor Mason, b h by Colonel Mason....
.....(DeRyder) 1 5 10 1
Peter Billiken, ch h by Peter the Great....
.....(Valentine) 2 1 1 4
Abu Taleb, br g by Geo. A. Fuller..(Loomis) 3 2 2 10
Audrey Grey, Strafford, Jack K., Alice McGregor, Ros D., Minnie Burns, Lottie Simmons and Ben Gregor als started.
Time—2:08¼, 2:08¼, 2:10¾, 2:10¼, 2:12½.

2:04 pace, purse $1,000:
Earl Jr., gr h by The Earl.....(Cox) 1
Single G., b h by Anderson Wilkes.....(Gosnell) 3
R. H. Brett, b g by Waponee.....(Grady) 2
Little Prince, Sayde Densmore, Fred Russell and Leli Patchen also started.
Time—2:01½, 2:03¾.

Kentucky Futurity, three-year-old trotters, purse $14,000:
Mary Putney, b f by San Francisco.....(McMahon) 1
Humfast, b f by Trampfast.....(Murphy) 2
Colorado Range, b c by Colorado E.....(McDonald) 3
Bacelli, Native Spirit, Deroche, Onward Forbes an Petress Burton also started.
Time—2:08¼, 2:06¼.

2:20 pace, purse $1,000 (unfinished):
Savoy, br g by Charley Hayt.....(Van Valkenburg) 1
Peter Worthy, b c by Guy Axworthy.....(Murphy) 2
Presolite, bl m by Don Varick.....(Geers) 4
Silver Brush, gr g by Bobby Burns.....(Stout) 3

Third Day at Lexington.

Lexington, Oct. 6.—Volga, the two-year-old siste to Peter Bolo, with whom the Pastime Stable ha made a clean sweep of the trotting futurities i which she was entered, continued her winning habi today in the junior division of the Kentucky futurity her miles in 2:07¾ and 2:09¾, setting a new world's record for a two-heat race by a filly of the age and gait. Walnut Tree was the closest contender but the chestnut prodigy was never in difficulty.

Savoy came back strong in the unfinished 2:20 pace and proved up on his claim to first money by beating his field in 2:07½, two and one-half seconds faster than his best time yesterday. Ames Albingen and Alonzo McDonald were invincible in the 2:21 trot and won in straight heats and good time, the bay horse displaying none of the unsteadiness that has delayed the result in a few other engagements.

Napoleon Direct and Peter Stevens had two apiece when the Tennessee was postponed, with "Nap" the popular horse of the contest. The son of Walter Direct annexed the first heat in handy fashion in 2:02, but Braden Direct pushed him out a bit faster in the second. In the third he broke coming into the stretch, but settled for a fast brush that landed him at the wire only a nose behind Peter Stevens, the crowd's cheers for Marse Edward showing that he was thought by the public to have won the heat. The fourth heat was a hardluck one, Nap and Braden Direct locking sulky wheels in front of the stand; Egan was thrown from his seat but unhurt. The judges levied an assessment of one hundred bucks on Ben Whitehead's roll for laying up the first heat with Flower Direct. Four heat winners in as many heats caused the 2:09 pace to be carried over. A bad mixup in the second heat resulted in nothing more serious than a few bruises and scratches. The summary:

Lexington, Oct. 6.—2:20 pace, purse $1,000 (first two heats Oct. 5):
Savoy, br g by Charley Hayt...(Van Valkenburg) 1 1 1
Peter Worthy, b c by Guy Axworthy....(Murphy) 2 3 2
Presolite, bl m by Don Varick.....(Geers) 4 2 3
Silver Brush, gr g by Bobby Burns.....(Stout) 3 4 4
Time—2:10, 2:11¾, 2:07½.

2:21 trot, purse $1,000:
Ames Albingen, b h by Albingen....(McDonald) 1 1 1
Judge Jones, br g by Prodigal.....(Geers) 2 2 2
Idora Worthy, b m by Guy Axworthy..(Rodney) 3 5 3
Tommy Todd, Ruby Watts, Harry Horner, Great Governor, Kathryn Collette, Durin, Sarah Douglas, Ella Tregantle and Florence White also started.
Time—2:08, 2:08¾, 2:08¾.

Kentucky Futurity, two-year-old trotters, purse $5,000:
Volga, ch f by Peter the Great.....(White) 1 1
Walnut Tree, b f by Siliko.....(Murphy) 2 2
Bingen Silk, b c by Bingen.....(Chandler) 3 3
Suldine, b c by Worthy McKinney.....(Geers) 4 4
Time—2:07¾, 2:09¾.

The Tennessee, free-for-all pace, purse $2,000 (unfinished):
Napoleon Direct, ch h by Walter Direct(Geers) 1 1 2 4
Peter Stevens, b h by Peter the Great(Snedeker)3 4 1 1
Walter Cochato, bl h by Cochato.....(Legg) 2 3 3 2
Braden Direct and Flower Direct also started.
Time—2:02, 2:01¾, 2:03½, 2:05¼.

2:09 pace, purse $1,000 (unfinished):
Aretta V., ch m by Constenaro.....(Jamison) 2 1 2 2
Barlight, b h by Halburk.....(Mann) 1 2 4 8
Fern Hal, bl m by Gold Hal.....(McPherson) 4 9 3 1
Frank Patch, Fred Mac, Birdonna, Hal Mapes, Bingen Pointer, Ben Locanda, Elmer Dickson and Fleeta Dillon also started.
Time—2:06, 2:05½, 2:08, 2:07½.

As per usual, they had a few gentle showers at Salem before the fair ended.

NOTES and NEWS

Mary Putney (3) 2:05½.
She was bred in old Kentucky, but—
She is a double-barreled Californian in ancestry.
Three in a row and a world's championship.
Incidentally, add Senor Ricardo McMahon's name to the roster of drivers of Kentucky futurity winners.

◈◈◈

They're racing at Riverside this week.

◈◈◈

The Grand Circuit of 1915 is now in its last fortnight.

◈◈◈

Peter Volo now holds the two heat record for trotting stallions by reason of his miles in 2:02½ and 2:02¾ in the Castleton Cup.

◈◈◈

The Californians that made the North Pacific circuit are all back in their old stamping grounds, most of them preparing for next month's fray at the exposition.

◈◈◈

Virginia Barnette won the 2:14 trot at Riverside in straight heats, trotting the two lap track in 2:15¾, 2:15 and 2:14¼. The aged gelding Danube by Direcho was second.

◈◈◈

Pleasanton's winter colony is beginning to assemble, after having been widely scattered since the season opened. Between the trotters and runners together the stabling capacity at the MacKenzie track will be pretty well taxed, from present indications.

◈◈◈

Verbena Ansel, the precocious California trotter that has been progressing so famously for Hunter Moody down in the blue grass, hung up a season record of 2:22 for yearling trotting fillies at the recent record meeting at Lexington. The lass evidently enjoys this trotting business.

◈◈◈

What a good old piece of hand forged hardware Earl Jr. is. For eight seasons he has gone to the races and took 'em as they came; for six years he has been better than a 2:05 pacer; three years ago he raced to a record of 2:01½ and on Tuesday at Lexington he again came home in the same time. They don't come like him very often.

◈◈◈

Reports from eye witnesses at Los Angeles stamp White Sox as a two-minute pacer, the daughter of Del Coronado having worked perilously close to that figure just before Will Durfee went to Salem. The eastern dopesters have already paid Hal Boy the money in the big exposition pace, but there will be some other birds in the argument.

◈◈◈

J. David West, whose establishment at 1265-1267 Golden Gate avenue has long served the needs of horsemen, has just opened a new store at 1018 Fillmore street where a similar line of goods will be found. Everything for track, road and farm in the way of horse and stable accessories will be found in stock, as well as a large assortment of leather goods and novelties of a general nature.

◈◈◈

Will DeRyder came into Pleasanton one day lately with those good campaigners Spriggan and Dicto and is getting himself fixed up for another whirl for ten thousand whole iron men on November second. Spriggan has been a most consistent trotter around 2:08 all season, and if all goes well William thinks he will have a license to afford a little competition to even Peter Scott. Here's hoping.

◈◈◈

Wow! what a race that was at Riverside when Vera Hal and White Sox went to a clinch over the halfmile track there. White Sox took the first heat in 2:07 and then Vera came back at her in 2:06¾ and another one in 2:07. The little Stadium queen is some pacer and Harold Cohen must have done some real teaming to stall off the Durfee pair. The only other starter was San Jacinto, who was third in each heat.

◈◈◈

Arthur C. Thomas, who resigned from the editorship of the Horseman shortly before that good old wagon went the route of its ill-starred predecessor, the "one-hoss shay," has become identified with the Houghton Sulky Company as general sales manager, so that his new address is Marion, Ohio. The Houghton people and "A. C." are all of the up-and-coming kind, and some new policies and innovations in sulky manufacture and marketing may be looked for from the new combination.

◈◈◈

Marysville has been the center of the operations of a band of horse thieves of late, and one night recently the raiders got away with the great old pacer Sir John S. 2:04¼, the son of Diablo 2:09¼ and Elisa S. 2:16½ that was a familiar figure on California tracks some years ago. The horse was the property of the Stevenson estate, whose managers had not long before refused a good price for him, and was taken from the stables at the race track.

Don't forget your futurity starting fees.

◈◈◈

Walter Palmer remarked at the exposition a few mornings ago that in Governor Mason, the Kansas trotter, Charley DeRyder had secured one of the best horses in the middle west, and the Governor backed up Mr. Palmer's opinion by winning a stiff five heat affair Tuesday at Lexington, taking a winrace record of 2:08¼. It was Charley's first victory this season on the big line, which he didn't strike until the Columbus meeting.

◈◈◈

W. P. McNair, who officiated as starter at the Washington and Oregon state fairs and a number of minor meetings in the northwest, tarried in San Francisco enroute home long enough to take in a bit of the horse show at the exposition and say hello to local friends. "Mack" reports great fairs at North Yakima and Salem, with attendance and interest especially good at the latter place, regardless of the weather.

◈◈◈

One of the best pleased participants in the exposition horse show is Charles Winter of Alhambra, who is exhibiting the good young stallion Alhambra Prince (3) 2:27, by Redlac 2:07½, dam Patti Mack by Geo. W. McKinney 2:14½. To date, the Prince has been awarded first as a roadster, first in the standard stallion class for four-year-olds or over, the senior championship for standard trotter, three-year-olds or over, and the grand championship for standard trotter, any age. He is a hard one to beat.

◈◈◈

"Authorities differ" in their reports of the record meeting of Sept. 24 at Lexington, some giving Senator O'Brien as trotting in 2:22, while others make no mention of the political gentleman's performance. If the youngster did trot to a standard record he is a new yearling for J. W. Considine's famous matron Carrietta 2:18, being by Peter the Great and out of that daughter of Directman. A weanling full sister to him heads the offerings of the Woodland Stock Farm sale on October 25th at Woodland.

◈◈◈

Down east there are two kinds of Irish racing horses, lucky and unlucky, as exemplified by the cases of Dick McMahon and Nick Grady. At North Randall Dick drove wide "to avoid a collision," thereby carrying out Peter McCormick and allowing Peter Scott to come through on the pole and win—and he got away with it when haled before the judges. At Lexington, Nick drove wide with R. H. Brett and Single G. came through on the pole. The result of the race was not affected, as Earl Jr. won anyway, but the judges soaked Nick one hundred iron men. Evidently, when Bret Harte penned those immortal lines about the heathen Chinee, he had no knowledge of the mental processes of the occupants of the judges' stands at trotting meetings. What would have happened to Dick if the Lexington officials had been in service at Cleveland?

CATTLE SHOW AT THE P.-P. I. E.

The fear felt several months ago that the reappearance of foot and mouth disease in several localities would threaten the success of the cattle show this autumn at the Panama-Pacific International Exposition at San Francisco has been dispelled by the abatement of the outbreak, the easing of the quarantine nearly everywhere and the resumption of shipments. The California state veterinarian has not relaxed his vigilance and will take no chances that might result in the introduction of the scourge into California, but there is enough free territory to guarantee a great show. The number of entries received by the exposition department of live stock gives assurance of a large and varied exhibition of both beef and dairy cattle from October 18 to November 1, the cattle show period.

Already several interesting herds are on the grounds, including Shorthorns, Guernseys, Herefords and Holstein-Friesians. Others that will arrive before the show opens will be Aberdeen-Angus, Galloways, Polled Durham, Red Polled and Devons in the beef classes, and Jerseys, Ayrshires, Dutch Belted, Brown Swiss, French Canadian, Simenthal, Kerry and Dexter in the dairy classes.

The judges have been selected with great care. Thomas Dempsey, Westerville, Ohio, will judge Jerseys; Elliott Davis, Lincoln, Neb., Red Polled; Judge Calvin Ewing, Youngstown, Ohio, Galloways; Charles L. Hill, Rosedale, Wisconsin, Guernseys; M. A. Judy, West Lebanon, Indiana, Aberdeen-Angus; Phil C. Lee, San Angelo, Texas, Herefords; Hugh Van Pelt, Waterloo, Iowa, Ayrshires; W. H. Standish, Lyons, Ohio, Holsteins; Captain T. E. Robson, London, Ontario, Shorthorns.

Program and Entries for Exposition Trots

Knowing that nothing is more interesting to coast horsemen just now than the fall meeting to be held during the fore part of November at the Panama-Pacific International Exposition, we present herewith the daily program with the horses eligible to start in the various events, original entries which were declared out August first, as well as original stake nominations for which substitutions have been made, being eliminated in order that patrons of the meeting may see just what is left for them to race against. Owing to the fact that starting payments in the colt stakes are not yet made the entries for those events cannot be given with any degree of certainty at this time, but entries will be published just as soon as the information required is available.

Owing to a number of circumstances, chief among them being the fact that a few races failed to fill, the program has been rearranged so that racing will commence Monday, November 1, instead of Saturday, October 30, the new schedule giving a full daily program for eleven days from events already closed, while a special will be put on to round out the twelfth day's card. Under these conditions, it is advisable to discard former programs and the entry list as published in this paper last spring, preserving this one for your guidance.

Monday, November 1st.

First Race—2:20 Class Trotting—$2,000.

Matawan, br g by Athadon—Cora Wickersham by Junio. H. C. Ahlers, San Francisco.
Major's By Guy, br h by Major Dillon—By Guy by Guy Wilkes. I. L. Borden, San Francisco.
Bonnie Ansel, b m by Prince Ansel—Woodland Bonnie Derby by Chas. Derby. Alex Brown, Walnut Grove.
Major By By, ch g by Major Dillon—By By by Nutwood. Marvin Childs, Pleasanton.
Spriggan, b g by Baron McKinney—Helen Simmons by Simmons. V. K. Dunne, San Francisco.
Bertha Pointer, b m by Del Coronado—Belle Pointer by Sky Pointer. W. G. Durfee, Los Angeles.
Virginia Barnette, b m by Moko—Zephyr by Zombro. W. G. Durfee, Los Angeles.
Policia, ch m by Best Policy—Alta Almont by Prince Almont. Mrs. I. M. Lipson, Tulare.
Sutter Girl, b m by Sir John S.—Babe by Lynmont. G. H. Magruder, Yuba City.
Pronto J., bl g by Strathway. R. D. Morrison, Hemet.
Mary E. Patch, b m by Dan Patch—Prelissa by The Prelate. International 1:55 Horse Farm.
Agnes Carter, b m by Nutwood Wilkes—Excella by Monbells. Al Schwartz, Pleasanton.
Robert Bingen, b h by Bingen—Episode by Ambassador. Woodland Stock Farm, Woodland.
Linwood Mack, ch g by Sir John—Linwood Bell by Lynwood W. Geo. G. Smith, Logan, Utah.
Peter Scott, b h by Peter the Great—Jenny Scott by Bryson. Thos. W. Murphy, Poughkeepsie.
Margaret Parrish, b m by Vice Commodore—Lady Leyburn by Arion. Thos. W. Murphy, Poughkeepsie.
Helen Worthy, b m by Barongale—Lulu Worthy by Axworthy. Thos W. Murphy, Poughkeepsie.

Second Race—2:09 Class Pacing—$2,500.

O. U. C., b g by C. The Limit—Rosie Woodburn by Easter Wilkes. S. S. Bailey, Pleasanton.
Athol R., gr g by Athablo—Edith by Milton R. Jas. L. Bullock, Hanford.
Don Conamore, b g by Don Densmore—Francona by Greystone. D. A. Dinnie, Minot, N. D.
Soumise, b m by Billy Dunlap—Cricket Basler by Robert Basler. R. L. Friend, Porterville.
Patrick de Oro, b h by Copa de Oro—Easter D. by Diablo. J. W. McClain, Los Angeles.
Donald, b g by Golden Baron—Kitty by Knight. D. D. McDonald, Sacramento.
Dan Logan, b h by Chas. Derby—Effie Logan by Durfee. Warren Pugh, Davis.
Walnut Grove, bl h by Constantine—Lindis by Jackdaw. J. A. Young, Port Arthur, Texas.
John Malcolm, br g by Dan Logan—Susie Miller by Prince Ansel. C. F. Silva, Sacramento.
Conqueror, br g by Direct Heir—La Belle by Sidney. Valencia Farm, San Bernardino.
Dazzle Patch, br h by Dan Patch—Renline by Online. International 1:55 Horse Farm.
The Beaver, br h by Searchlight—Ripple by Glenbrook. E. J. Rochon, Winnipeg, Can.
Major Ong, b g by Major Gantz—Bessie J. by Iowa Sentinel. Thos. W. Murphy, Poughkeepsie.
Dustless McKinney, b h by McKinney—Dustless Queen by Mambrino King. Thos. W. Murphy, Poughkeepsie.
Derby Custer, ch h by Ed. Custer—Princess Derby by Chas. Derby. Thos. W. Murphy, Poughkeepsie.

Third Race—2:15 Class Trotting—$2,000.

Matawan, br g by Athadon—Cora Wickersham by Junio. H. C. Ahlers, San Francisco.
Irving Heart, b h by Great Heart—Crawford Mare by Piloteer. H. W. Buckbee, Rockford, Ill.
Bon Courage, ch g by Bon McKinney—Helen Keyes by Sidney Dillon. W. A. Clark, Jr., Los Angeles.
The Proof, br h by The Exponent—Chord by Wilkes Boy. M. C. Keefer, Pleasanton.
Mabel, b m by Sir John S.—Babe by Lynmont. G. H. Magruder, Yuba City.
Miss Johnson, b m by Happy Treasure—Maud Johnson by Happy Heir. A. F. Ruthven, Kansas City.
Lottie Ansel, b m by Prince Ansel—Lottie Whippleton by San Diego. Woodland Stock Farm, Woodland.
Seneca Boy, ch g by King Entertainer—Seneca Maid by John Adams. E. J. Rochon.
Sadie S., b m by Archdale—Catherine S. by Patronage. Thos. W. Murphy, Poughkeepsie.
Mirthful, b m by The Star of Patchen—Lizzie Belle Smith by Geo. Simmons. Thos. W. Murphy, Poughkeepsie.

Tuesday, November 2nd

First Race—Occident Stake, 3-Y. O. Trotters—$2,500.

Starters to be named later.

Second Race—2:10 Class Trotting—$20,000.

Baby Doll, b m by Tom Smith—Kate Lumry by Shadeland Onward. I. L. Borden, San Francisco
Tropic Dawn, b m by Symboleer—by Allerton. W. J. Cowan, Cannington, Ont.
Virginia Barnette, b m by Moko—Zephyr by Zombro. W. G. Durfee, Los Angeles.
A. R. G., b h by Gumaer Hal—Claudia Chimes by Chimes. A. R. Gumaer, Florence, Colo.
Wilbur Lou, ch h by Kinney Lou—Louise Carter by Chestnut Tom. Hemet Stock Farm, Hemet.
Electric Patch, bl h by Dan Patch—Zella Directum by Directum. International 1:55 Horse Farm.
Sea Waif, br m by The King Red—Sea Queen by Vice Regent. Hugo Schmidt, Spokane.
San Felipe, b g by Zombro—Ella J. by Bob Mason. W. T. Sesnon, San Francisco.
Axtien, ch h by Axworthy—Protien by Glenwold. Samuel Harris, Plymouth, Ill.
Peter McCormick, br h by Peter the Great—Pearl Cecil by Cecil W. W. O. Foote, Bonham, Tex.
Esperanza, b m by Carlokin—My Irene S. by Petigru. Sterling R. Holt, Indianapolis.
Spriggan, b g by Baron McKinney—Helen Simmons by Simmons. Gus Macey, Lexington.
Miss Perfection, b m by Gen. Watts—Sue Fletcher by Tregantle. R. J. MacKenzie, Pleasanton.
Peter Scott, b h by Peter the Great—Jenny Scott by Bryson. Thos. W. Murphy, Poughkeepsie.
Lulu Lumine, b m by Orator—Lumine by Stately. Thos. W. Murphy, Poughkeepsie.
Mirthful, b m by The Star of Patchen—Lizzie Bell Smith by Geo. Simmons. Thos. W. Murphy, Poughkeepsie.

Third Race—2:12 Class Pacing—$2,000.

Pointer's Daughter, b m by Star Pointer—Banker's Daughter by Arthur Wilkes. G. L. Blosser, Santa Maria.
Don C., ch g by Mexican Chief—Molly by Hedgewood Boy. H. W. Buckbee, Rockford, Ill.
Trix McAdrian, br m by McAdrian—Mountain Lass by Mountain Boy. P. J. Chalmers, Stockton.
Imbro, br h by Zombro—Athelene by Coeur d'Alene. F. M. Anderson, Portland, Ore.
Don B., br g by Don Densmore—Mary B. by Mexicanno. D. A. Dinnie, Minot, S. D.
William G., ch g by Clarence Wilkes—Wax by Senator Boggs. Wm. Duncan, Agt., Colusa.
Hamburg Belle, b m by Stillwell—Lucy by Memphis, John Ginocchio, San Francisco.
Monk, b g by Saraway—Daisy H. by Clark Chief Jr. A. R. Gumaer, Florence, Colo.
F. H. Holloway, ch g by Geo. W. McKinney—Lady Zombro by Zombro. R. D. Morrison, Hemet.
Zomblack, bl h by Zombro—Madeline Marshall by Demonio. R. J. MacKenzie, Pleasanton.
Red Rock, ch g by Louis Wilkes—Red Bird by E. S. J. F. McGuire, Denver.
Hal Boy, b g by Hal B.—Altalena by Altamont. Edward Peterson, Omaha.
Princess Patch, b m by Dan Patch—International Queen by Tom Exum. International 1:55 Horse Farm.
Potrero Boy, b g by Demonio—Potrero Girl by Prince Airlie. C. F. Silva, Sacramento.
Dustless McKinney, b h by McKinney—Dustless Queen by Mambrino King. Thos. W. Murphy, Poughkeepsie.
Derby Custer, ch. h by Ed. Custer—Princess Derby by Chas. Derby. Thos. W. Murphy, Poughkeepsie.

Wednesday, November 3rd

First Race—2:30 Class Trotting—$2,000.

Golden State, b g by Stam B.—Zaya by Bay Bird. Blackwell & Hendrickson, Rocklin.
Major's By Guy, br h by Major Dillon—By Guy by Guy Wilkes. I. L. Borden, San Francisco.
Bonnie Ansel, b m by Prince Ansel—Woodland Bonnie Derby by Chas. Derby. Alex Brown, Walnut Grove.
Bon Cres, bl h by Bon Voyage—Kate Kopje by Cresceus. J. J. Campbell, Pasadena.
Lauretta Todd, b m by Sorrento Todd—Silver Tier by Ashton W. D. A. Dinnie, Minot, N. D.
Spriggan, b g by Baron McKinney—Helen Simmons by Simmons. V. K. Dunne, San Francisco.
Bertha Pointer, b m by Del Coronado—Belle Pointer by Sky Pointer. W. G. Durfee, Los Angeles.
Virginia Barnette, b m by Moko—Zephyr by Zombro. W. G. Durfee, Los Angeles.
A. R. G., b h by Gumaer Hal—Claudia Chimes by Chimes. A. R. Gumaer, Florence, Colo.
Pronto J., bl g by Strathway. R. D. Morrison, Hemet.
Miss Perfection, br m by Gen. Watts—Sue Fletcher by Tregantle. R. J. MacKenzie, Pleasanton.
Little Grove, br h by Walnut Grove—May Day by Roy Wood. A. F. Ruthven, Kansas City.
Robert Bingen, b h by Bingen—Episode by Ambassador. Woodland Stock Farm, Woodland.
Peter Scott, b h by Peter the Great—Jenny Scott by Bryson. Thos. W. Murphy, Poughkeepsie.
Margaret Parrish, b m by Vice Commodore—Lady Leyburn by Arion. Thos. W. Murphy, Poughkeepsie.

Second Race—2:15 Class Pacing—$2,000.

A. B. C., bl h by Young Monterey—Rosalie by Dudley. W. B. Alford, Ferndale.
Lizzie Dillon, br m by Sidney Dillon—Angela S. by Silent Chimes. C. E. Bowman, Walla Walla.
Sirius Pointer, b h by Star Pointer—Trix Marshall by Nutwood Wilkes. H. H. Boomer, Spokane.
Lillian Green, br m by Col. Green—Lillian Zolock by Zolock. D. A. Dinnie, Minot, N. D.
Dicto, b g by Dictatus Medium—Letter B. Jr. by Benton Boy. J. F. Dunne, Gilroy.
Baby Gommet, b m by Prince McKinney—Arawanna B. by Sidney Dillon. F. Gommet, San Francisco.
Prince Zolock, bl h by Zolock—Princess Direct by Teddy A. H. A. Gardner, Walla Walla.
Marlin, b g by Dialect-Clarence Wilkes. H. S. Hogoboom, Woodland.
Pointer Belle, b m by Star Pointer—Dictatus Belle by Dictatus. J. M. Kidd, San Francisco.
Maxine, b m by Jim Logan—Triby Maid by Black Ralph Jr. Miss Maxine Montgomery, Davis.
Direct Line, b h by Baron Direct—Woodland Echo by Woodline. J. F. McGuire, Denver.
Buzz Patch, bl m by Dan Patch—Heloise Grattan by Grattan. International 1:55 Horse Farm.
Oro Mo, ch g by Demonio—Hanora by Oro Wilkes. C. F. Silva, Sacramento.
Ben Corbett Jr., b g by Ben Corbett—Miss Thompson by Thompson. W. L. Young, Santa Maria.
Strathtell, b h by Motell—Ruth Strathberry by Strathberry. Jos. Carson, Winnipeg, Can.
Hal S., rn g by Hal Chaffin—Bessie Hal by Red Hal. Thos. W. Murphy, Poughkeepsie.
Jean, b m by Flosko. Thos. W. Murphy, Poughkeepsie.
Peter Farren, b h by Peter the Great—Nelly Farren by Jay Bird. Thos. W. Murphy, Poughkeepsie.

Third Race—Free-for-all Pacing, Driving Club—$2,000.

White Sox, b m by Del Coronado—Subito by Steinway. W. G. Durfee, Los Angeles.
Leata J., b m by Royal McKinney—Geraldine by Mount Vernon. J. N. Jones, Stockton.
W. J. K., b g by Dexter Prince—Psyche. W. J. Kenney, San Francisco.
Homer Mac, b h by Petigru—Eagletta by Ketchum. J. W. McClain, Los Angeles.
Dick W., b g by Athadon. Al Schwartz, Pleasanton.
Teddy Bear, b h by Del Coronado—Queen S. by Sable Wilkes. C. F. Silva, Sacramento.
Little Bernice, b m by Del Coronado—Pearl Pointer by Sky Pointer. Sam Watkins, Los Angeles.

Thursday, Nov. 4th

First Race—2:17 Class Trotting—$2,000.

Matawan, br g by Athadon—Cora Wickersham by Junio. H. C. Ahlers, San Francisco.
Loe Blossom, ch m by Lepide—Lillian W. by Harry Hontas. Frank Childs, Pleasanton.
Major By By, ch g by Major Dillon—By By by Nutwood. Marvin Childs, Pleasanton.
Old Folks, br g by Del Coronado—Iran Belle by Iran Alto. W. G. Durfee, Los Angeles.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

QUAIL.

Softly! See, far ahead, across our way,
Those silent forms pass swiftly out of sight,
So noiseless that the breezes seem affright,
Breathless a moment ere the leaves they sway.
In all their war-paint's glorious array,
With feathered head-dress nodding in the light,
They glide before us like a vision bright,
And as a vision swiftly are away.
But now and then among the vines and brush
A dusky form seems darting to and fro.
Was that a waving scalp-lock on the rush?
What is it stirs beside that bush, there, low?
Then lightning-like and thunder-loud, and, oh!—
The heart stands still—ah!—valley quail at flush.

THE ALAMEDA SALT MARSHES.

The eastern shore of the greatest seaport in which Pacific waters ebb and flow, south from where the transcontinental railroads end, is low and marshy. There the even curves of the rolling hills become straight as they approach the broad bay, and a wide belt of dark grey salt marsh, miles long and containing thousands of flat acres, separates the land proper from the unbroken waters. This marshland is laced with winding, shimmering sloughs that lead into and through it, from the bay—some large and deep enough to accommodate a puffing launch at the lowest ebb, and others so small and shallow that only the highest tides cover the blue mud of their bottoms. Along these winding salt streams grow water oats, and sometimes on the higher marsh the dodder flames, and here and there, away in at the base of the brown hills where some freshwater stream makes its way to oblivion in the wide marsh, tall cat-tails flourish and straight tules grow, rank on rank. And sometimes out on the bay side of the marsh, when the wind and waves have heaped the sand into low, yellow dunes, small, tough, dwarfed bushes are found.

And this marsh is not the dead moor, to be regarded with awe, that many people deem any marsh—there is animal and vegetable life there the year around, and the moving life is the most interesting. The great brown rats, that can swim as well as they can run, are always there, and the little busy marsh wrens; and a small throttled, brown sparrow, that is a sociable, but rather a quiet fellow. And at low tide numberless little crabs, the largest the size of your hand, scurry over the smooth mud flats, or crawl this way and that, sidewise, in search of food—leaving little trails in the ooze.

Always there may be found animal life there in that great marsh, but it is when the uplands have taken on the dead tones of winter, when the southeast wind sweeps the swirling rainstorms over lowland and hills, that it is most plentiful. Then the waterfowl haunt the sloughs, and the waders dot its flats, and from the grasses the rail calls. Canvasbacks, spoonbill, mallard, teal, spriqtail, now and then a widgeon, golden eye, ruddy ducks (spatties), bluebill, willets, jack-snipe, rail, plover, curlew, phalaropes—all may be found there of a short winter day. True, in some portions of this great marsh they may be found in greater profusion—for some of this lowland is patrician, and some is plebeian, and some is leased to gun clubs and some is open ground, and on this open land is the winter life the scarcest.

Nevertheless, there it is that many men betake themselves in these latter years when they feel that the ducking pictures their minds have conjured up after the opening day must be verified—and this is of when I was of these many.

I remember how cold it was early that morning as we stood on the little landing built of odds and ends and waited for the keeper to bring us our skiff and wooden decoys. There were some thirty of the wooden cheats and they completely filled three old, muddy sacks in the bow of the boat. The sky was overcast with a fairy filament of mist that hardly obscured the light of the stars, and when we started on our two-mile pull to the reed blind on the open slough there were no signs of dawn over the eastern hills.

The first mile of our row was across a shallow bay, and for ten minutes the only sounds were those of the rusty oarlocks, the dip of the oars, and the soft dripping of the water from them. Then a great splashing and whistling broke the stillness ahead. We had run into a flock of canvasback, and although we could not see them we stopped and listened to the whish-whishing of their wings until it died away in the distance. Then we rowed on as the sky in the east paled.

Soon in the dim half-light ahead we could see the low, dark outline of the marsh. It became clearer as we approached, and we headed for a break in the low wall where we knew a large slough entered the bay. The tide was ebbing, and in the brightening light we could see smooth, sloping, dark-grey mud flats stretching along the shore—and ahead of us a little band of willets arose from the mud, calling. Then we were in the slough, the mud banks on either hand, and one almost continually in front as well, for the slough twisted hither and thither with seldom more than fifty yards of straightness in it.

Just as the east was beginning to glow we heard the low calls of some ruddy ducks around a bend ahead, and as I dropped in the bottom of the boat in readiness my companion left off his rowing and started to scull. When we swung around the little point of blue mud at the bend we came onto the ducks, and as I arose two golden eye started up. They afforded an excellent chance for a pretty double, which was scored. The ruddy ducks, bewildered, did not rise until I had fired my second barrel. There were four of them and three skimmed directly away, affording my companion no chance for a shot, but the fourth turned and swung past the boat. At the report of the gun the little brown ball whirled over, quite dead, and when we picked it up the pure white patch by its eye had become red, explaining why the bird had whirled so suddenly.

We continued on our way to the blind, and fired our guns but once again—at a high-flying band of spoonbills—until we arrived. The blind was built of broken reeds and dead grasses, and was situated on the south bank of the slough midway on a stretch of some two hundred yards of open water. The decoys were all set, the boat hidden, and we ourselves snugly ensconced in the blind before sunup.

We had been down perhaps five long minutes when the first shot came. It was a lone canvasback and he was in sight for three hundred yards as he came directly toward the wooden lures. Something scared him as he was curving directly over us and he started to soar, but at the second shot he crumpled up, and the best bird of the whole day was bagged. A short while after two teal whistled by, and one stopped, and then it was a full half hour before our guns were raised again, but when we did sight along their barrels it was at the most exciting moment of the day.

We both saw them at once—eight golden eye—as they swung low down the slough. We crouched, and it seemed an age before we saw them through the reeds putting their feet out to stop in the decoys. They did not seem to see us as we rose and my first barrel stopped two. When the fusillade ended three birds were dead in the decoys and my partner was jumping up and down on the bank yelling to look out for a cripple. Just then directly in front of him the supposed cripple came up and rose out of the water with an alacrity that denied the presence of shot beneath its feathers. It surprised him into a clean miss for the first barrel, but the second told, and our ninth bird was down.

At intervals the birds continued to come for an hour—some more golden eye, a brace of spoonbills, a skimming score of ruddy ducks, half a dozen canvasback, and a lordly drake mallard. And then there was nothing to do for a long time but nap, and rest, and watch the little crabs in the mud, and the brown rats—until the evening flight.

When the evening flight was finished and the darkness was fast settling we counted our birds—twenty-six—and then started down the winding slough homeward; satisfied with our modest day's sport, tired and hungry, and hoping that in the years to come we may enjoy sport as good on the salt marsh.

MOUNTAIN QUAIL HUNTING IN SHASTA.

The manzanita, that had closely bordered the road for the last mile, gave way and we drove into an open swale of perhaps two acres—all green with the lush new grass and studded with grey rocks a foot or so in height. A jack rabbit hopped into the chaparal at the farther edge and my eye, awakened by the movement, discerned our first bevy of quail.

There were about a dozen—much larger than our cheery valley friend, and the markings on their coats showed more plainly. As we alighted one of them gave a warning whistle, and the bevy started running for shelter. Knowing their aversion to flight we ran briskly across the swale after them, but before we were in range they had disappeared into the brush and we could hear their whistling farther up the hillside.

Two of us started up through the stiff chaparral. We knew from experience that these little feathered followers of Pan were not to be hunted with dogs, for they seldom lie, and though they may be numerous, one must keep in steady pursuit to obtain a good bag.

The brush soon became so thick that I was reduced to crawling, and totally lost my companion. At frequent intervals I could still hear the quail whistling, but apparently another bevy, for the sound came from farther to the left, from a sparsely wooded bluff. I made my way as quickly as possible over the rough rocks toward the whistling and started a bevy of perhaps half a hundred running nimbly over the ground and jumping from rock to rock before me. Here my day's sport began.

Following this bevy along the bluff, getting a shot now and then, I started others and soon had one or two hundred birds ahead of me in the brush. The birds persistently refused to fly, running with remarkable speed whenever I appeared within range, and placing every rock and bush possible between themselves and my gun. The man who declares as a pot-hunter anyone who would shoot any game bird on the ground has not hunted our wily mountain quail. I have always found that it is as difficult to hit him running at full speed over rough ground, as it is to stop one of his valley brethren in his swift flight over an open field. Further, the hunter of the upland bird is usually winded from his pursuit and not in fit condition for accurate work.

I remember well, when following the birds ahead of me, I suddenly came to a rocky open place and saw a bird swiftly running ahead. I fired twice, but each time he was safely behind a rock, and before I could reload had disappeared in the brush. More than once during the morning my shot struck stone and wood instead of feathers and flesh, and by noon I was so thoroughly tired that I found it quite convenient to clamber down the bluff to a little stream and rest there for an hour while I ate my lunch.

On count my bag numbered twelve birds, three of which were valley quail that had strayed to the higher ground.

On my way back to the road and the team I easily rounded out the limit then in vogue, and although every vestige of the birds I shot that day has long since disappeared, the memory of that enjoyable morning when I pursued the Upland King is with me yet; to afford me pleasure in my idle moments, and to cause me to hope that some time my clear winter morning in the Sierra foothills will be repeated.

TROUT IN UGANDA.

(Concluded from last week)

The only plan seems to be up-stream wet fishing and keeping the fly working, more after the fashion of a salmon fly, all the way back to your feet. If it be allowed to rest still for an instant all the trout within reach seem to realize that it is a fraud, and no amount of working will take them in. Very thick weed covers the bed of the river in parts, and if a trout once gets under this there is nothing for it but to send the gillie in with a landing net. Fortunately this can be done without risk, as there are no crocodiles. For one thing it is woefully overhung, and one of the first improvements called for will be judicious thinning out of the bushes. For another, the banks are both steep and slippery, full of holes and pitfalls that, concealed by the long grass, catch your feet at every turn. The climbs at some of the waterfalls are terrific, and the pools, apart from the haunting beauty inseparable from such spots, were at the time of my visit hardly worth the trouble of getting to.

The worst thing about the Gura, however, is the super-abundance of its trout. This seems a curious criticism to make on the part of one fresh from understocked streams at home, but it is a fact, nevertheless, as will perhaps be better appreciated when I mention that a trout of 19 inches, which looked a noble fish enough before I got him into the lnading net, weighed but 2 lb. 2 oz., and was a wretchedly lean-looking individual. So, indeed, were nearly all the trout I caught in the course of my two days on the river, somewhere between twenty-five and thirty, and very few of them under the statutory 12-inch limit. Yet, with the solitary exception of the big fellow, of which I wanted a photograph, back into the river they all went. I should perhaps have rendered better service if I had left them to die on the bank, for the Gura is overcrowded, and the authorities will soon have either to provide abundance of food to make up for the natural lack of it, or, better still, to take out quite half of the big fish and transplant them to other rivers in the neighborhood, several of which are as well suited to the needs of trout as the Gura. As a matter of fact, this work will in all probability be begun at an early date, and then the Gura, relieved of its too heavy burden, will probably be the finest trout stream in Africa. There is no close time, for the simple reason that, in view of the trout spawning promiscuously in any and every month of the year, it would be very difficult to establish one, but it will always be incumbent on sportsmen to return fish that are out of condition. Only fly, spoon, and minnow are allowed and the two latter are surely unnecessary where the fly takes so well. The size limit has already been mentioned, and the bag is restricted to three brace a day. This will almost certainly be a wise and necessary check in the near future, but at present, pending the much needed thinning out of the head of fish, the authorities might do worse than remove it. Quality rather than quantity is what is needed in this beautiful mountain stream that flows not far from snow-covered Kenia.—The Asian.

Marauding Eagle Killed.—Charles Linebaugh killed a bald headed eagle this week which long had been preying upon chickens and young lambs on the Abraham Linebaugh ranch, in Sonoma county, near Santa Rosa. The bird measured seven feet from tip to tip.

Drink Jackson's Napa Soda.

GOSSIP FOR SPORTSMEN.

Trout fishing at different Feather river points has been excellent recently. At Smith's Point, between Rich and Belden, J. W. Fricke and Tracy Cummings of this city enjoyed a few days' sport—several trout weighing two and a half pounds were taken. The improved governor was the killing fly lure.

At Spring Garden, farther up the river, "the fishing has been wonderful," is the report of anglers who spent an outing there.

Near Blairsden fishing in the mountain lakes at present is fair. In the main river and nearby creeks the sport is very good. The weather has been clear and warm. Dark and medium colored flies have been effective. At Big Bar the river was low and clear and fair baskets of trout have been taken. Around Keddie there have been but few baskets of trout caught; the outlook for the balance of the season is indifferent.

Round about Belden both fly and bait fishing in the small streams is very good. Gray and brown hackle flies do the trick in whipping the creeks with a fly hook. Grashoppers are the favorite baits used. Limit baskets have been taken recently by different anglers. The water in the creeks is low and clear. Fishing in the main river has been spoiled by bad water conditions.

At Sims good trout fishing has been experienced by different local anglers who have whipped the Upper Sacramento river during the past fortnight. John Filmer and J. Lyons will spend a week at Sims. Roscoe Havens and Walter Matthews have whipped the river daily for the past week, with great success.

The McCloud river has been in grand fishing condition for the past month. Colonel William Ellery, Dr. A. J. Wiborn, Harry Blatchley and other anglers were on the river a week ago. J. A. Hatter, W. A. Hatter and E. G. McDonnell were in camp on the McCloud for ten days and tested the fine trout fishing conditions thoroughly. The trout run to large sizes.

Fall river, in the northeastern part of Shasta county, and a tributary of Pitt river, is reported by Charlie Breidenstein to offer the best of trout fishing just now.

The Yosemite valley streams were stocked recently with many thousands of trout fry. Fishing conditions in Merced river and the tributary creeks in the valley are reported to be excellent at the present time.

* * *

About this time of the year the striped bass anglers are on the qui vive for large fish. An indication of a run of striped bass in the Wingo sloughs and creeks 10 days ago, was the taking of a 42-pound bass by one of the regular visitors of that district, known as "Chicken Sam." Two other anglers also landed several large bass. Charles Urfer made a good catch fishing in Appleby bay. A number of bass were taken also in Napa creek, near the drawbridge.

Last Sunday, however, there seemed to be a slump in the bass production.

San Antone slough also produced several nice catches of the striped fish. Charles Bond and two friends landed seven bass in two days' fishing, the heaviest scaled 15 pounds. Steve Simmons' largest bass weighed eight pounds. Al Cumming also had exceptionally good luck.

* * *

The approach of the fall hunting season, which opens October 15, makes it desirable to bring to the attention of sportsmen the fact that where State laws do not agree with the regulations under the Federal migratory bird law, the Federal regulations are paramount and should be observed.

Under the new Federal law it is unlawful at all times to hunt or kill robins. It is unlawful at any time before September 1, 1918, to kill band-tailed pigeons, cranes, swans, curlew, and any of the small snipe or shore birds, a provision in the Federal law that is in the main entirely unnecessary and has spoiled the sport of many gunners. Band-tail pigeon, curlew and shore birds are plentiful.

The Federal statute makes it illegal to hunt or shoot migratory game (and insectivorous) birds before sunrise or after sunset. The State law prohibits the shooting of "resident game" between one-half hour before sunrise and one-half hour after sunset, or to shoot migratory game between sunrise and sunset. Which all means that aquatic wild fowl shooting is controlled by the United States law. Quail, rabbits, deer, etc., may be hunted and shot half an hour before sunrise or half an hour after sunset.

The open duck hunting season is but six days away, and barring heavy rains, which would scatter the birds far and wide, the opening days are full of promise for limit bags at all the bay counties shooting resorts.

Mallard and sprig have been plentiful for several weeks past. During the recent calm weather, big rafts of wild ducks have been seen loafing out on the ocean near the Farallones. Most of those birds were home-bred. Quite a number of flocks of northern birds have been noticed, however.

In the Alameda marshes ducks are already numerous. Along the Redwood and San Mateo shores sprig and mallard are more plentiful than for many years past.

The Los Banos country is pretty dry, and will not get any water this season, except the usual rainfall. This means the passing of what was one of the best duck-shooting grounds in the San Joaquin valley, and numerous gun clubs are now without a shooting ground. The Field and Tule Gun Club has pulled up stakes and located near Gridley on a 600 acre preserve.

* * *

Hunting near Belden has been very good this season. A number of large bucks have been recently shot near there, small game is plentiful, and a chance may be had to bag a bear. J. A. Hatter, W. A. Hatter and E. G. McDonnell spent ten days in the McCloud river country. Deer seem to be plentiful in that district this season, three bucks being killed within two hours, the first morning out. Five bears were seen at different times. Bruin is not in good condition at this time of the year, either for pelt or table. Everybody in that district is out after deer, and there were many hunters, too, who got a deer limit this year.

Art Young, C. H. Allen, Fred Marston, R. O. Young and D. W. Cooke tried the northern part of Lake county for a ten-day camping trip. The party found deer were numerous in that region. Art Young killed two mountain lions shortly after they had attacked and eaten a deer.

"There is lots of deer this season, but they are high up and you have to climb up to them," say G. A. McRae and E. Brainard, who returned Sunday from a hunting trip near Belden. They report quail plentiful in the vicinity of the Feather river canyon and lots of trout. They got three large bucks in five days. On their trip they met a number of San Francisco and Oakland hunters.

* * *

The wife of Dr. John Clark of Gilroy recently bagged a big mountain lion near Gilroy Hot Springs and the modern Diana is naturally proud of her success. With Dr. Clark and Jim Fitzgerald, the party was out for a deer hunt and camped near Big Gulch, three and a half miles from the springs. On Monday a fortnight ago Dr. Clark and Fitzgerald left for an early hunt. Mrs. Clark decided to remain in camp. At 7 o'clock she was startled by seeing a mountain lion near the camp. Running to her tent she grabbed a high-power rifle and although the first shot brought the animal down, she kept on shooting. The lion measured seven feet seven inches and weighed 148 pounds. The party also bagged two fine bucks.

* * *

Hunting has been good in Siskiyou county, according to R. J. Perrin, of Santa Rosa, who has returned from a vacation outing in that locality. Perrin has to his credit two deer, a forked-horn buck and a three-pointer, and a big brown bear.

Another bear story is told by J. D. MacGaughey, who has just returned from a fishing trip on the American river. He took his 30-30 rifle with him and when he got into the mountains he met a Frenchman at a little camp. The mountaineer told him that he had trapped a large bear but had only a shotgun and did not want to attempt to kill it with that. MacGaughey consented to get bruin with his rifle. He found the bear caught in the trap. One shot between the eyes brought down the 600-pound beast.

* * *

As a hunter of big game Millie Clerkin of Pike, in Sierra county, states the Sacramento Union, has no superior among either sex in California. She does not stop at deer or wildcat, but enjoys a hunt for the big brown bears that were formerly numerous in this county, but which are rapidly disappearing.

Sunday afternoon at the Gale ranch Miss Clerkin brought down a big bear that weighed between 500 and 600 pounds. Miss Clerkin is not the type of girl that one would expect to find in a big game hunter. She is slight, of a nervous temperament, a great reader and keeps abreast of the times in every particular.

SAN FRANCISCO FLY-CASTING CLUB.

The San Francisco Fly-Casting contests set for Sunday, October 3, were postponed—a gusty and shifting north wind interfered with the efforts of the contestants to put out their lines.

The Saturday scores are given below: Event 1—light tackle accuracy percentage. Event 2—dry fly accuracy percentage. Event 3—¼ ounce lure accuracy percentage. Event 4—¼ ounce lure distance, feet. Event 5—¼ ounce lure "slam" cast. Event 6—light tackle distance. Event 7—salmon fly distance.

The following points were made in the "in-and-out" event: Burgin 17, 3; Kewell, 6, 5; Springer, 5, Davis 1, Thomsen 2, Forbes 2.

Saturday Contest No. 9, Stow lake, October 2, 1915. Wind, southwest. Weather, fair.

Judges, H. A. Thomsen, Chas. H. Kewell, Joe Springer. Referee, W. J. Davis, Jr. Clerk, Chas. E. Hills, Jr.

At the Traps

Beginners' Shoot.—The Beginners' day shoot of the Golden Gate Gun Club, scheduled for October 3, was postponed until tomorrow.

There will be one bulkhead ready for beginners—both men and women. Guns will be furnished those who are without a shooting-iron.

Professional instruction and advice will be at the disposal of the "beginners."

Another bulkhead will be at the service of the regulars.

A feature of the shoot will be the appearance of Mr. and Mrs. Ad Topperwein who will demonstrate fancy, trick and expert shooting with shotgun, rifle and revolver—a free exhibition at that and one worth going miles to see.

* * *

Vernon Traps.—A regular tournament crowd, forty-three shooters in all, turned out Sunday, October 3, at the Vernon Gun Club to compete for the Stanton A. Bruner challenge trophy and the four silver blackbird watch fob trophies. Les J. McMurray annexed a leg on the trophy by shattering 49 birds out of the 50 shot at.

McMurray started out like a whirlwind, but missed his thirty-fifth bird, making a high run of thirty-four.

The shooters lined up at noon to begin the trophy event at 16 yards in two events of 25 birds.

The first squad up consisted of A. W. Bruner, R. L. Hall, S. A. Bruner, Dave Llewellyn and Hercules George Oliver. Second place in the trophy contest was captured by R. L. Hall with 48 dead birds out of the 50. Third place contest ended in a tie. Kenney, Blanchard, Llewellyn and Wiltshire were even with 47 breaks.

The fobs were contested for for the first time. The 50 birds in the trophy shoot also counted on the fobs. The shooters were divided into four classes though, giving each and every shooter a c hance to win. Added bird handicaps were given shooters in both events.

These fobs will be shot for until January 1. Then the scores in each class will be carefully gone over and the best shooter in each class will receive a fob as his permanent property.

H. D. Blanchard led the Class A Sunday with 47. McMurray was high in the B division with his 49 score. Kenney topped the C boys with 47 shattered targets and Van Nest and Lindman were even for first place in the D class, each with a 46x50 score.

A number of the shooters from the Los Angeles Athletic Club turned out to see how things were run in Vernon, among them being Harry Cline and Dr. Charles Richards. The scores follow:

Bruner Challenge Trophy—50 birds: Les J. McMurray49 R. L. Hall 48, Kenney 47, H. D. Blanchard 47, Dave Llewellyn 47, W. H. Wilshire 47, Guy Holohan 46, George Oliver 44, S. A. Bruner 39, J. E. Davis 28, S. C. Miller 22, William Pugh 41, C. E. Groat 37, Van Nest 26, Charles Norton 35, Hill 35, Orvie Overall 19, Charles Richards 25, Harry Cline 37, Ernie Werdin 29, George Cline 37, Dr. Cooper 24, Fullerton 34.

Practice shooting: A. W. Bruner shot at 150, broke 120; R. L. Hall 25—18, S. A. Bruner 50—41, Dave Llewellyn 75—57, George Oliver 75—60, Bert Perk 75—34, J. E. Davis 75—47, S. C. Miller 25—13, William Pugh 25—21, C. E. Groat 100—71, Van Nest 25—12, Charles Norton 25—18, Jessen 25—21, B. A. French 25—21, J. E. Jones 25—14.

* * *

Live Bird Outing.—An outing and live bird shoot took place at Reclamation, in Sonoma county, Sunday, September 26. Messrs. Billeter, Bacigalupi, Devine and Kettleson had their initial experience at pigeon traps and made some excellent scores. Billeter used Clarence Nauman's "long Tom" Parker and grassed 27 birds before losing one. Captain Du Bray used a 28 gauge, shooting from the 28 yard peg. The birds trapped were an unusally strong lot. The scores follow:

Capt. Du Bray	1121	2212	1110	—11
Eugene Forster	2121	1021	1111	—11
Nauman	2121	0111	1111	—11
P. Bacigalupi	1101	2112	1011	—10
Billeter	1121	1120	2100	— 9
Billeter	1011	1121	1111	—11
Nauman	1121	1110	1111	—11
P. Bacigalupi	2112	1111	0111	—11
Devine	1012	1111	2111	—11
Eugene Forster	2102	2121	1121	—11
Capt. Du Bray	1011	1210	1111	—10
Billeter	1121	1112	2111	—12
Capt. Du Bray	2110	2122	1211	—11
E. Kettleson	1121	0121	1112	—11
Nauman	1111	1110	0211	—10
P. Bacigalupi	1011	2221	1120	—10
Devine	1111	2001	2212	—10
Eugene Forster	1211	0121	2220	—10
Edgar Forster	1112	1111	2111	—12
Nauman	2111	1011	1211	—11
Devine	1121	2021	1121	—11
Billeter	1112	1011	1111	—11
E. Kettleson	0110	2111	1121	—10

* * *

Moraga Gun Club.—Two squads were at the club shoot last Sunday. Barney Worthen was the winner of a silver cup.

San Jose Shoot.—The Garden City Blue Rock Club had a shoot at its grounds Sunday, October 3, to let several new members try a round at blue rocks. These new shooters were used to shooting at wild game, but saw the difference when they started to shoot clay pigeons. They were all very much surprised when they saw August Richter, a 15-year-old boy, break 47 out of a possible 50.

Many present who tried found it very difficult, but by practicing a little will yet become very good shooters and have decided to stay with it till they do.

The other scores for the day were as follows: O. N. Ford, 46 out of 50; William McKagney, 42 out of 50; R. Schilling, 19 out of 25; H. Richter, 17 out of 25; T. Medici, 31 out of 50.

* * *

Capitol City Wind-Up.—Members of the Big Time Gun Club last Sunday held their concluding shoot for the year at their range on the Schenck ranch, on the Fruit Ridge road. The club members took part in a merchandise 20-bird shoot. A number of visitors were in attendance, and several of them shattered a few birds each. The women members of the club were out in force.

The remainder of the year will be spent in hunting by the Big Timers. Honker time is nearing, and several bangstick artists are showing symptoms of mallard fever.

The club ended the season with a membership of 120. They expect to double the number next year.

WILL SUPPORT THE FEDERAL GAME LAW.

Evidence that the people of the country irrespective of section or occupation are deeply interested in the forthcoming test of the constitutionality of the Federal law for the protection of migratory birds, is furnished in the list of representative organizations of farmers, stock breeders, forest conservationists, sportsmen and others that have joined with the American Game Protective Association in the brief that its counsel, William S. Haskell, will ask leave to file in the defense of the law when the case is called before the United States Supreme Court on October 12.

The case comes up on appeal from the United States Court of the Eastern District of Arkansas in which, on May 13, 1914, the law was held unconstitutional.

The brief referred to constitutes impressive evidence of the widespread belief on the part of the people of the country that its continued economic welfare is closely related to the sustaining of the measure that provides absolute protection the year round for the large majority of birds that war on the insects which cause annual damage to the nation's crops alone, estimated by the United States Department of Agriculture at one billion, two hundred million dollars.

Thirty-eight states are represented in the organization signing the brief.

Following is a recapitulation of the signers:

State Conservation Commissions	26
State Agricultural Stations	3
National Agricultural Organizations	4
National Live Stock Breeders' Associations	3
Forestry Organizations	2
National Conservation Organizations	3
Sportsmen's Organizations—Local, State and National	45
Miscellaneous	5

Of the above mentioned such representative organizations as the Farmers' National Congress, U. S. A., of Omaha; Farmers' National Congress of the United States, Kendalia, W. Va.; National Association of Gardeners, American Cranberry Growers' Association, National Association of Exhibitors of Live Stock; American Academy of Arborists, and many others equally prominent.

The brief holds that the Federal Government has a right to assume control of birds which by nature migrate from State to State, because—

1. The interests of the people require such a law.
2. It is impossible for the several States to enforce their joint rights.
3. Migratory birds are of great assistance in destroying the insect foes of crops and forests.
4. Congress has the power to protect the agency which preserves the property of the United States from damage and destruction.
5. Migratory birds are the property of the nation.

The law whose constitutionality is called into question was passed March 4, 1913, and became effective October 1 of the same year. Its passage was brought about in large measure as the result of a campaign of the sportsmen of the country, conducted through their national organization, the American Game Protective Association.

A New Champion Here.—Housed in the finest quarters maintained for aristocratic canine visitors on the roof of the St. Francis has been, since coming here, Failsworth White Knight, Mrs. Anita Baldwin's imported English bulldog, which is shown for the first time in this country at the San Jose bench show this week, and will be seen later at the Exposition show.

Failsworth White Knight was bought from Sam Crabtree of Failsworth, England, for $2,000, it is reported. Crabtree did not want the dog to go to an American owner, so Mrs. Baldwin obtained the English champion for her Anoakia kennels through a woman friend in England.

The imported dog is an undefeated champion in England, winning first prize in every show since he made his puppyhood bow to the public.

PACIFIC COAST TRIALS.

The thirty-third annual field trials of the Pacific Coast Field Trials Club will take place in December instead of January, as has been the custom for many years past. The advance in dates was caused by the change in our game laws which closes the open season on quail January 1. The dates set are the 17th, 18th, 19th and 20th. The trials will start with the Derby stake, the Members' stake will follow, and the All-Age event will wind up the meeting on Sunday and Monday. John H. Schumacher of Los Angeles will be the presiding judge.

The sections of land in the vicinity of Gosford, where previous trials have been run, will be the scene of the coming trials. The grounds will be patroled and shooting prohibited. Birds are reported to be plentiful this year. E. C. Dodge, in charge of the Tevis kennels at Stockdale, has several likely Derby candidates in training. W. B. Coutts, the veteran trainer, will have his string of dogs at the Ashe ranch within a short time.

The officers of the club are: John W. Considine, president; Jack Flynn, first vice-president; J. Walter Scott, second vice-president; S. Christenson, secretary-treasurer; J. S. French, A. G. Wilkes, Phil M. Wand, Jos. Chanslor, and J. E. Terry, field trials committee.

GUN SHY DOGS.

Because young hunting dogs of certain strains are occasionally discovered to be gun shy it often is thought that this fault is congenital, but such is not the case, although the timidity which leads to gun shyness may be inherited, says a practical Eastern writer. This defect almost without exception is the result of too suddenly springing a gun upon a youngster of a naturally timid disposition. If we are to be guided by old sporting literature gun shyness is a fault trainers of dogs have had to contend with from time immemorial, but it undoubtedly has been more prevalent of late.

Most gun shyness is the result of careless handling and would never develop were each puppy taken in hand with due regard to its peculiar temperament. To ascertain if it is likely to be gun shy should be the first duty of the trainer, and steps must be taken to eradicate its fear before an attempt is made to break the youngster. Should gun shyness on the part of a dog not be discovered until the training has made progress it is a certain thing that all it has learned will be lost before the fault can be corrected.

A gun shy dog is thought by some to be incurable, but there is no bigger mistake than this, as the most obstinate cases have been known to yield to proper treatment. However, before giving the measures which should be taken to cure a dog it will be wise to describe how to prevent the development of such a defect. Trainers are inclined to despise a puppy which manifests a timid disposition, but this too is an error, for the shyest youngsters often become the best workers.

With the idea of ascertaining if a youngster is inclined to be gun shy it is an excellent plan to put it in an open yard and get a friend to fire a gun a hundred yards or so away. Undetected by the dog its owner should watch its actions on hearing the report. If the dog rushes for shelter in abject terror or seeks to hide itself in a corner the greatest care should be observed as regards future procedure. On the other hand, should it display interest and seek to get a sight of what is going on the firing may be brought nearer till at the end of ten days or so it may take place in the yard with the dog. If the youngster exhibits alarm on hearing the report its trainer should appear instantly, soothe the dog, and give it a tidbit to eat. Do not fire again till the incident has been forgotten, and then let it occur at a greater distance. The sound of the gun should again be the signal for the dog's owner to enter the kennel and feed it and it soon will be noticed that the dog will know that the sound of the gun is connected with the appearance of food.

Then the gun may be used to announce the feeding hour, and it should be fired each time nearer the kennel. Soon it will be noticed that the dog does not display the least fear. Another great step is made by placing an old gun on the ground and letting the dog inspect it thoroughly in his own way; this should always be done if it is seen that the dogs know that the gun is the author of the dreaded report. Trainers often turn a young dog that is known to be gun shy into a kennel where there are dogs that do not possess this defect. In five cases out of six the gun shy dog will pick up courage quickly from his companions.

However, as young dogs are impressionable, fear is contagious and care must be taken that the actions of the scared dog do not affect the entire lot. A young dog should not be shut up by himself during a heavy thunderstorm, as many dogs that have not been in the least gun shy have been known to develop the fault after being scared by a hard thunderstorm. The company of other dogs is welcome to a young dog during a heavy storm. Never take a dog that is suepected of being gun shy out with a large party or its distraction will be increased by the presence of strange men and strange dogs, and all the turmoil inseparable from a big day's shooting. Take the dog out alone or in the company of one steady old dog, the example of which under fire should have a beneficial effect upon the young dog.

Make it a strict rule never to hit a gun shy dog, but do everything to gain his confidence, as affection for his master will go a long way toward enabling the animal to master its fears. Do your best to kill game for the dog and to let it see the game fall, and also avoid double shots as they are certain to be very disconcerting. Once a young dog has begun to connect the report of a gun with the fall of game and has had an opportunity to retrieve, a great advantage will have been made. As before remarked, whatever training has been instilled into the dog must be sacrificed with the intention of curing it of gun shyness, and liberties may be allowed which would earn it many a thrashing under ordinary circumstances.

THE ORIGIN OF THE POINTER.

A writer in a kennel magazine, in referring to the English pointer states:

"The English pointer, which is almost in universal use today, was probably brought to perfection about 150 years ago, and is the result of a cross between the Spanish pointers of those days and the English foxhound, or even the Talbot hound of the same period. There were also pointers in France and Portugal, and perhaps Italy, before they were in England. It is curiously on record that about the first, if not the first, "Spanish" pointer was introduced into Britain by a merchant trading with Portugal. This sportsman, who resided in Norfolk, England, was so advanced in the art of fowling and firearms that he could kill game on the wing. This points to the first use of pellets of lead, now called shot. So the first pointer to arrive in England from Portugal was the one imported by the Norfolk merchant about 1730.

It was found that the double-nosed Spanish pointer was not at all good tempered, and the English did not like him for this reason. Indeed, he was not to be compared with their own fawning setter, which did exactly the same work as the newly imported pointer, save that the former "set" on his haunches or lay on his belly when he got close to the game, whereas the latter stood boldly up and "pointed." Hence the names of the setter and pointer.

But to return to the variety from Spain or Portugal, which it was thought well to cross with the foxfound. There was a celebrated sportsman of the latter part of the eighteenth century, Colonel Thornton by name. It was said that the Yorkshire gentleman was the first to use the strange blood, but whether he did or not, he possessed some wonderful dogs early in 1800.

There was one particularly good dog by the name of Dash. He was produced by a cross of the foxhound with a high-bred pointer bitch, this bitch being probably a descendant of the old and early cross between the Spanish breed and the English hound."

While it has been denied that the pointer contained a foxhound cross, every indication points to the truth of the above. To anyone familiar with the type of the Spanish pointer nothing looks more reasonable than that the present so-called English pointer is the result of a hound cross on the Spanish breed.

This is especially apparent in the differentiation in skull, muzzle and ears. The mark of the hound is often seen in the eyes, and in the comparatively long hair on the under side of the tail. That very few of the existing breeds of dogs are original species and that most of the breeds we have today are the result of innumerable crosses, cannot be denied. For all time the dog has been the close companion of man and the real origin of the various breeds will ever remain as great a mystery as that of the several races of men.

FIXTURES.

Registered Tournaments—Pacific States and Territories:

November 2—Williams Gun Club, F. E. Lowe, Secretary, Williams, Ariz.

November 5, 6, 7—Arizona State Tournament, under the auspices of the Tucson Blue Rock Gun Club, W. A. Julian, President, Tucson, Ariz.

Peters Points.

High general and high professional averages at Lincoln, Ill., Sept. 15-16, were won by Mr. Art Killam, 294 ex 300, using Peters factory loaded shells. Second and third amateur averages were won by Messrs Sheets and Gayle of Lincoln, Ill., with 287 and 285 respectively, both with Peters shells.

At Monticello, Ill., Sept. 17, high general average was won by Mr. H. W. Cadwallader, 119 ex 125, with the "P" brand.

At Belleville, Ill., Messrs. S. E. McGeehon and E. J. Linde, both of O'Fallon, tied for high amateur average, 94 ex 100, with Peters factory loaded shells.

Rem-UMC Notes.

Portland, Ore., has good cause to be proud of P. H. O'Brien's recent trapshooting achievement at a tournament in that city. Not satisfied with a perfect score of 200 x 200, Mr. O'Brien kept up his good work, breaking 240 targets straight—the Pacific Coast record.

Rush Razee has of late been doing some remarkable work with his Remington Pump gun and Nitro Club shells. In Iowa, recently he made straight runs of 94, 269, and 94 on three consecutive days, thus making a long run of 338. During this year he has shot at 2,665 targets, his average being 96.34%. His list of long runs consists of 137 straight at the North Dakota State shoot, 146 at Laport and Nevada, Ia., five runs of between 75 and 100, and 7 over 50.

PROGRAM AND ENTRIES FOR THE EXPOSITION TROTS.

[Continued from page 8.]

Rose Equity, b m by Equity—Anna Rose by Orphan Knight. A. F. Ruthven, Kansas City.
College Gent, bl h by Kentucky Patterson—Belle H. by Senator Crisp. Jos. Carson, Winnipeg, Man.
Teddy Bear, br h by Del Coronado—Queen S. by Sable Wilkes. Chasil F. Silva, Sacramento.
Major Ong, b g by Major Gantz—Bessie J. by Iowa Sentinel. Thos. W. Murphy, Poughkeepsie.
Peter Farren, b h by Peter the Great—Nelly Farren by Jay Bird. Thos. W. Murphy, Poughkeepsie.
Hal S., rn g by Hal Chaffin—Bessie Hal by Red Hal. Thos. W. Murphy, Poughkeepsie.

Third Race—2:08 Class Trotting—$5,000.

Albaloma, b g by Almaden D.—Loma B. by Stam B. I. L. Borden, San Francisco.
Esperanza, b m by Carlokin—My Irene S. by Petigru. W. G. Durfee, Los Angeles.
Virginia Barnette, b m by Moko—Zephyr by Zombro. W. G. Durfee, Los Angeles.
Axtien, ch h by Axworthy—Protien by Glenwold. S. Harris, Plymouth, Ill.
Gold Dollar, ch g by Pulsus—Daisy Golddust by Emerson Golddust. Gus Macey, Huntsville, Ala.
Dean Swift, b g by Almaden D.—Fashion by Kentucky. D. D. McDonald, Sacramento.
Electric Patch, bl h by Dan Patch—Zella Directum by Directum. International 1:55 Horse Farm.
Pass All, bl h by Crystallion—Miss Daisy Deane by Guardsman. E. A. Colburn, Denver.
Peter McCormick, br h by Peter the Great—Pearl Cecil by Cecil W. V. L. Shuler, Pleasanton.
Vallejo King, bl h by Gen. J. B. Frisbie—Reinette by Dexter Prince. Thomas Smith, Vallejo.
Lulu Lumine, b m by Orator—Lumine by Stately. Thos. W. Murphy, Poughkeepsie.
Bright Axworthy, b g by Axworthy—Honor Bright by Antonio. Thos. W. Murphy, Poughkeepsie.
Peter Scott, b h by Peter the Great—Jenny Scott by Bryson. Thos. W. Murphy, Poughkeepsie.

Monday, Nov. 8th

First Race—2:16 Class Trotting—$2,000.

Matawan, br g by Athadon—Cora Wickersham by Junio. H. C. Ahlers, San Francisco.
Bonnie Ansel, b m by Prince Ansel—Woodland Bonnie Derby by Chas. Derby. Alex. Brown, Walnut Grove.
Irving Heart, b h by Great Heart—Crawford Mare by Piloteer. H. W. Buckbee, Rockport, Ill.
Loe Blossom, ch m by Lepide—Lillian W. by Harry Hontas. Frank Childs, Pleasanton.
Bon Courage, ch g by Bon McKinney—Helen Keyes by Sidney Dillon. W. A. Clark, Jr., Los Angeles.
Mabel, b m by Sir John S.—Babe by Lynmont. G. H. Magruder, Yuba City.
Miss Johnson, b m by Happy Treasure—Maud Johnson by Happy Heir. A. F. Ruthven, Kansas City.
Copper the Ore, bl m by Direct Heir—May Kinney by Silkwood. Al Schwartz, Pleasanton.
Columbia T., b m by Bon Guy—May T. by Monterey. C. F. Silva, Sacramento.
Lottie Ansel, br m by Prince Ansel—Lottie Whippleton by San Diego. Woodland Stock Farm, Woodland.
Seneca Boy, ch g by King Entertainer—Seneca Maid by John Adams. E. J. Rochon, Winnipeg.
Mirthful, b m by The Star of Patchen—Lizzie Belle Smith by Geo. Simmons. Thos. W. Murphy, Poughkeepsie.
Barbara Overton, b m by Sahib—Mabel Swope by Ashland Wilkes. Thos. W. Murphy, Poughkeepsie.

Second Race—2:24 Class Trotting—$2,000.

Golden State, b g by Stam B.—Zaya by Bay Bird. Blackwell & Hendrickson, Rocklin.
Major's By Guy, br h by Major Dillon—Ry Guy by Guy Wilkes. I. L. Borden, San Francisco.
Bon Cres, bl h by Bon Voyage—Kate Kopje by Cresceus. J. J. Campbell, Pasadena.
Lauretta Todd, b m by Sorrento Todd—Silver Tier by Ashton W. D. A. Dinnie, Minot, N. D.
Spriggan, b g by Baron McKinney—Helen Simmons by Simmons. V. K. Dunne, San Francisco.
A. R. G., b h by Gumaer Hal—Claudia Chimes by Chimes. A. R. Gumaer, Florence, Colo.
The Proof, br h by The Exponent—Chord by Wilkes Boy. M. C. Keefer, Pleasanton.
Sutter Girl, b m by Sir John S.—Babe by Lynmont. G. H. Magruder, Yuba City.
Miss Perfection, br m by Gen. Watts—Sue Fletcher by Tregantle. R. J. MacKenzie, Pleasanton.
Little Grove, br h by Walnut Grove—May Day by Roy Wood. A. F. Ruthven, Kansas City.
Mary E. Patch, b m by Dan Patch—Prelissa by The Prelate. International 1:55 Horse Farm.
Robert Bingen, b h by Bingen—Episode by Ambassador. Woodland Stock Farm, Woodland.
Peter Scott, b h by Peter the Great—Jenny Scott by Bryson. Thos. W. Murphy, Poughkeepsie.
Margaret Parrish, b m by Vice Commodore—Lady Leyburn by Arion. Thos. W. Murphy, Poughkeepsie.
Helen Worthy, b m by Barondale—Lulu Worthy by Axworthy. Thos. W. Murphy, Poughkeepsie.

Third Race—Stanford Stake, 3-Y. O. Trotters—$1,200.

Starters to be named later.

Tuesday, Nov. 9th

First Race—State Fair Futurity, 2-Y. O. Trotters—$600.

Starters to be named later.

Second Race—2:09 Class Trotting—$2,500.

Albaloma, b g by Almaden D.—Loma B. by Stam B. I. L. Borden, San Francisco.
Esperanza, b m by Carlokin—My Irene S. by Petigru. W. G. Durfee, Los Angeles.
Axtien, ch h by Axworthy—Protien by Glenwold. Samuel Harris, Plymouth, Ill.
Gold Dollar, ch g by Pulsus—Daisy Golddust by Emerson Golddust. Gus Macey, Huntsville, Ala.
Jean Arion, b m by Arion—Sarah Shelton by Bedford. International 1:55 Horse Farm.
Peter McCormick, br h by Peter the Great—Pearl Cecil by Cecil W. V. L. Shuler, Pleasanton.
Kid Cupid, ch g by Cupid—Zarina by Dexter Prince. L. B. Daniels, Sacramento.
Vallejo King, bl h by Gen. J. B. Frisbie—Reinette by Dexter Prince. Thomas Smith, Vallejo.
Miss Densmore, ch m by Vyzant—Nina Densmore by Hamdallah. F. L. Wacholtz, Los Angeles.
Lulu Lumine, b m by Orator—Lumine by Stately. Thos. W. Murphy, Poughkeepsie.
Bright Axworthy, b g by Axworthy—Honor Bright by Antonio. Thos. W. Murphy, Poughkeepsie.

Third Race—2:11 Class Pacing—$2,000.

O. U. C., b g by C. The Limit—Rosie Woodburn by Easter Wilkes. S. S. Bailey, Pleasanton.
Pointer's Daughter, b m by Star Pointer—Banker's Daughter by Arthur Wilkes. G. L. Blosser, Santa Maria.
Don C., ch g by Mexican Chief—Molly by Hedgewood Boy. H. W. Buckbee, Rockford, Ill.
Zorene, ch m by Zolock—My Irene S. by Petigru. P. J. Chalmers, Stockton.
Imbro, br h by Zombro—Athelene by Coeur d'Alene. F. M. Anderson, Portland, Ore.
Don Conamore, b g by Don Densmore—Francona by Greystone. D. A. Dinnie, Minot, N. D.
Contention B., b g by Copa de Oro—Bonnie Ailsie by Faustino. W. G. Durfee, Los Angeles.
Soumise, b m by Billy Dunlap—Cricket Basler by Robert Basler. R. L. Friend, Porterville.
Maxine, b m by Jim Logan—Trilby Maid by Black Ralph Jr. Miss Maxine Montgomery, Davis.
Red Rock, ch g by Louis Wilkes—Red Bird by E. S. J. F. Maguire, Denver.
Hal Boy, b g by Hal B.—Altalena by Altamont. Edw. Peterson, Omaha.
Princess Patch, b m by Dan Patch—International Queen by Tom Exum. International 1:55 Horse Farm.
John Malcolm, br g by Dan Logan—Susie Miller by Prince Ansel. C. F. Silva, Sacramento.
Conqueror, b g by Direct Heir—La Belle by Sidney. Valencia Stock Farm, San Bernardino.

Wednesday, Nov. 10th

First Race—State Fair Futurity, 2-Y. O. Pacers—$400.

Starters to be named later.

Second Race—2:20 Class Pacing—$2,000.

A. B. C., bl h by Young Monterey—Rosalie by Dudley. W. B. Alford, Ferndale.
Sadie Densmore, ch m by Don Densmore—Florence D. by Col. McCoy. D. A. Dinnie, Minot, N. D.
Dicto, b g by Dictatus Medium—Letter B. Jr. by Benton Boy. J. F. Dunne, Gilroy.
Baby Gommet, b m by Prince McKinney—Arawanna B. by Sidney Dillon. F. Gommet, San Francisco.
Monk, b g by Saraway—Daisy H. by Clark Chief Jr. A. R. Gumaer, Florence, Colo.
Mack Fitzsimmons, ch g by Bob Fitzsimmons—Jennie High Noon by High Noon. B. F. Jaggar, Portland, Ore.
Marlin, b g by Dialect—by Clarence Wilkes. H. S. Hogoboom, Woodland.
Trilby, b m by Sir John S.—Babe by Lynmont. G. H. Magruder, Yuba City.
Zomblack, bl h by Zombro—Madeline Marshall by Demonio. R. J. MacKenzie, Pleasanton.
Donald, b g by Golden Baron—Kitty by Knight. D. D. McDonald, Sacramento.

San Jacinto, b g by Geo. W. McKinney—Dot by Del Norte. Jas. McGuire, Riverside.
Alcy E., b m by Alcymont—Equity Madam by Equitywood. Geo. B. Dryden, Chicago.
White Sox, b m by Del Coronado—Subito by Steinway. W. G. Durfee, Los Angeles.

REMEMBER THE CALIFORNIA SALES.

All horsemen who are headed toward San Francisco for the P.-P. I. E. meeting are reminded of the exceptional opportunities for profit afforded both sellers and buyers by the two sales that are to be held in a few weeks—that of Woodland Stock Farm on Monday, October 25, at the farm, and that of Chas. L. DeRyder to be held in this city while the meeting is in progress. Interested parties should lose no time in getting into communication with Messrs. Harry Dowling and C. L. DeRyder, managers of the events, addressing the former at Woodland and the latter at Pleasanton.

THE FARM

BITTER SLOVER AS A GREEN MANURE CROP IN SOUTHERN CALIFORNIA.

[By W. M. Mertz]

Melilotus indica, or bitter clover, also known in some sections as yellow top, will make a satisfactory development during the cool winter months of southern California.

It has outyielded common vetch and Canadian field peas, the two legumes most generally used in the past.

It has increased the yield of the crops following its incorporation in the soil, to a greater extent than any of the other legumes tested.

It is practically immune to aphis injury and will stand more frost than either vetch or peas.

It starts slowly and must be planted not later than October fifteenth if it is to be plowed under by March.

The seed of this clover is now largely a by-product, being separated from the screenings of wheat in which it is often a prevalent weed. It is a heavy seed producer, and should the supply from the above mentioned source be insufficient, it could be grown as a seed crop at a cost much below that of most other clovers.

At the present writing, good recleaned seed can be obtained at from 7 to 10 cents per pound. This makes the seed cost less per acre than vetch or peas.

Per Acre:

25 lbs., M. indica, at 10c.....	$2.50
75 lbs., Common vetch, at 4c	3.00
100 lbs., Canadian peas, at 4c	4.00

In the southwest, especially in Arizona and California, a yellow flowering annual species of Melilotus is found growing wild under widely differing climatic and soil environments. This species, Melilotus indica, has been looked upon as a pest in many sections where it is a prevalent week in grain fields. Recently, however, this crop has proved to be well adapted for growing in the winter as a green-manuring crop and has been used to a limited extent in the citrus orchards both in California and Arizona.

Melilotus indica is the only one of the three common species of Melilotus that will make a satisfactory winter growth under California conditions. M. alba, or sweet clover, makes a good summer growth and under conditions where the growing of a summer green manure crop is feasible this sweet clover seems to be superior to cow peas, buckwheat, or soja beans.

During the past winter, 1914-15, M. ilndica was grown to a considerable extent in practically all of the citrus sections of California. Reports have been received from all parts of the state telling of success with this new cover crop, and the writer has seen heavy tonnages of it produced on most of the soil types common to southern California, from the cobble stone soil of canyon washes to the stiffest of clay adobes.

For the past five years, M. indica has been tested as a green manure crop at the Citrus Experiment Station and has uniformly given very satisfactory results. From the start this crop gave good tonnages of organic material, and in the yields of the crops following it, marked increases were obtained. In this series of experiments, tenth acre plats were used, there being a total of seventeen plats. On nine plats different legumes were used as winter cover crops. On every alternate plat a non-legume, rye or barley, was used as a winter cover crop, these being check plats in comparison with the legumes. All of the green manure crops are sown during September and turned under early in the spring, either in February or March. Irrigations at monthly intervals are given these crops until the winter rains begin. After plowing under the winter cover crops on the different plats, various field crops, as potatoes, corn, or sugar beets, are planted over the area as indicators of the comparative value of the different cover crops as green manures. An equal-sized plat of these field crops are harvested, and accurate weighings made of the yields of each plat. In a comparison of these nine legume plats with the cereal plats, the effects on the crop following the incorporation of these green manures were quite varied.

In every case, the crops, following the incorporation of the legumes, gave yields much in excess of those grown after a cereal crop had been turned under. There was also a considerable difference in the effect of the various legumes. The common vetch, Vicia sativa, which has been more extensively used for green manuring than any other legume, gave a much less marked increase in yield in the test crops following it than several of the other less common legumes. Taking the non-legume plats as checks, Melilotus indica, as a green manure, resulted in an average increase in yield of the test crops following it of 64.8 per cent, while common vetch, V. sativa, gave only 28.7 per cent, bur clover, Medicago denticulata, 30.4 per cent, and Canadian peas, Pistum arvense, 43.3 per cent.

In this experiment four of the eight cereal plats had applied to them different amounts of nitrogenous fertilizers in the form of nitrate of soda or dried blood. In one case the application was at the rate of 1092 pounds of nitrate of soda or 1188 pounds of dried blood per acre. The effect of this addition of nitrogen was very noticeable with all the field crops. Even after applying this heavy application of nitrogen in addition to the green manure crop of rye or barley, the average percentage of increase in the field crops following was only 45.6 per cent or fully one-third less than that obtained from the use of a green manure crop of Melilotus indica without further nitrogen additions of any sort.

The average tonnage of green tops produced by this melilotus clover has always compared favorably with any of the other crops grown, either legumes or cereals. The root system of this plant, however, is much larger than that of the vetches or peas. A deep tap-root is characteristic of all melilotus clovers, and although this species is an annual, it is no exception in this regard. In fact, six-months-old plants have shown tap-roots penetrating to a depth of eight feet under ordinary orchard conditions.

Most of the orchard soils in southern California have a tendency to form a plow sole or irrigation hardpan. This is commonly considered to be caused in large measure by the frequent cultivations and irrigations. The frequent stirring of the dry pulverized soil, together with frequent applications of water, tends to sift out and wash down the finer clay particles and deposit them in a dense hard layer of varying thickness, just under the cultivated area. Cultivating the soil when it is too wet or too dry tends to change the physical condition of the clay and make this hardpan condition worse. Much can be done toward bettering this condition through proper methods of the cultivations, but even under the best of conditions many of our soils become more or less impervious to water if something is not done to open up this compact layer. Nothing seems to do this as satisfactorily as do roots of rapid-growing, deep-rooted plants. Our experience has shown that the difference in the time necessary to wet the soil to a depth of four feet is very marked between plats having no green-manure crop and those growing each winter a crop of M. indica or vetch. For this purpose, M. indica is superior to any of the other winter-growing legumes now available.

Under orchard conditions in the citrus sections where it is ordinarily thought highly advisable to plow early, that is, during February and March, it is necessary to sow M. indica not later than the middle of October if a satisfactory growth is to be had by plowing time. In walnuts and other irrigated, deciduous orchards, where it is considered possible to plow later without injury, the planting of this bitter clover as late as December 15th has given very satisfactory results. The rate of seeding depends upon two factors—the actual area of land planted and the quality of the seed sown.

At present ,the seed of M. indica is largely obtained from the screenings of wheat, and unless thoroughly recleaned is apt to contain much weed seed and considerable immature seed. Many samples of this seed also show from 5 to 20 per cent of hard seeds which do not germinate the first season. For these reasons the quantity of seed recommended is greater than would be necessary with seed of high quality. The best results have usually followed the sowing of from 20 to 35 pounds of seed per acre, when practically all the land is planted, the amount per acre to be reduced as the trees take up appreciable space. Experience has shown that in most cases much better results are obtained when the seed is sown on the dry-mulch before irrigating rather than in the moist soil just after irrigation, as is the common practice with vetches and peas.

The seed is very small and under orchard conditions should be sown broadcast and then lightly cultivated or harrowed into the soil. The irrigation furrows should then be made close enough together to permit of as complete a wetting of the surface as possible. This is necessary if a uniform stand is to be obtained over all the land. Otherwise, much of the seed will not germinate until the rains begin. On very fine sandy soil good results have followed sowing the seed after an irrigation and then cultivating it in while the surface soil is still quite moist. On all other types of soil this method has never given good results.

All legumes have the power of taking nitrogen from the air indirectly through the bacteria which are naturally present in the nodules on the roots of this group of plants. Under cultivation, however, many such plants are sown on soil new to the plant and in which the necessary species of bacteria may be absent. Most legumes will develop to a fair degree without the assistance of the bacteria, but all grow better with the added supply of nitrogen which these tiny organisms make available to them. When legumes are used as soiling crops, it is necessary to have good inoculation of the plant roots if any considerable amount of nitrogen is to be added to the soil through the decay of these crops. Melilotus indica grows wild over much of the state and is in this wild condition naturally well inoculated.

The bacteria that are found in the nodules on the roots of the common bur clover, Medicago denticulata, are the same species as that which inoculates the sweet clovers and alfalfa. For this reason, many of our soils do not need further inoculation to grow Melilotus indica, and to insure the addition of the maximum amount of nitrogen from the air. There are, however, many orchard soils that have been clean cultivated for so long a time that these organisms may not be present in sufficient numbers. On such soils inoculation is desirable.

Directions for inexpensive inoculation are given in Circular No. 87 of the University of California Experiment Station, on "Alfalfa."

COLTS FROM WORK MARES.

Some buyers found a cornbelt breeder of Percherons in the midst of his haying. He was just a small breeder on an average-size farm, and his half-dozen gray mares were all in the harness. The day was hot and they were wet with sweat. Their great frames carried no surplus of fat, but displayed powerful knotted muscles. One could see at a glance that the three pairs of mares were paying their way in the ordinary everyday work of the farm. A wagon was just unloaded and the mares hitched to it backed it swiftly and steadily out of the old-fashioned central driveway of the barn, down the incline and out to one side with scarcely a word from the driver. Another pair stood hitched to a big load of hay, and at the word they stepped smartly forward and did not even falter as the first front wheels and then the hind ones jolted heavily against the abrupt ascent onto the barn floor. The third pair, hitched to the fork rope, sprang forward so eagerly at a call from the barn that the boy driver had to saw stoutly on the reins, while about one-fourth of the wagonload was ripped loose from the rest and swung up into the loft like a feather.

The owner went with the visitors to show five young stallions, all sound, shapely and active. Then some one asked if he had no foals this year. In answer he swung open the door to a big dark boxstall and five youngsters within came to their feet. Their owner patted them one at a time and explained their respective relationships to the yearlings and two-year-old stallions he had just shown. As they talked about the merits and probable development of these foals noontime drew on and the mares came around to the stable where each foal picked its dam and took its milk. Then the foals tudned to the oats in little feed-boxes beside their dams.

Here was convincing proof that a pedigree draft mare need not be babied or kept in idleness. It was also evident that the foals suffered little if any setback because the mares worked. The youngsters had early learned to eat oats and hay during the day at the barn. They ran and played and cropped the grass in the pasture at night with the mares. They suffered almost no injury from flies. They grew contentedly, rapidly and economically. Certainly one is assured that mares so handled will breed and work at the same time. Presumably their offspring will do likewise. They fill the requirements for profitable farm horses.—Breeders' Gazette.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

SAVE-THE-HORSE ® TRADE MARK REG'T.

If there was ever a year when Save-the-Horse has demonstrated its efficiency and value this has been the year.

We know of no business where success depended more on eternal vigilance and judicious investments and economy the past year, which was so rife with disturbing factors and changes, than in the horse business.

It is a significant and glowing tribute to the powerful efficiency and success of this remedy that those who kept informed stuck closer than ever to Save-the-Horse. They let the "other fellow" do the experimenting. They have seen and know that in the final analysis—the safe cure—the sure cure—and the permanent cure—is brought about with Save-the-Horse; that the remedy which cures when all others fail is the most economical remedy to depend upon first and always.

Undeniable proof is on every hand. Just get with any group of horsemen and trainers, mention Save-the-Horse and you will then realize its all-powerful effectiveness to cure—and to cure sure and permanently—is without a peer.

Save-the-Horse Does Not Blister, Does Not Discolor or Destroy the Hair Nor Leave a Scar. Horse Works as Usual.

Every bottle is sold with a binding contract to refund money or cure any case of BONE AND BOG SPAVIN, THOROUGHPIN, RINGBONE (except low), CURB, SPLINT, CAPPED HOCK, WIND PUFF, SHOE BOIL, BROKEN DOWN, INJURED TENDONS AND ALL OTHER LAMENESS.

Harpers Weekly and The Breeder and Sportsman

$5.50 worth for $3.00

Breeder and Sportsman

One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly

Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

Third Edition Within One Year of Publication.

CARE AND TRAINING OF TROTTERS AND PACERS

NEVER before in the history of the publishing world has a horse book gone into a third edition within one year of publication. Yet the explanation is simple—the book fills a long-felt want. Never before has this subject been treated in a distinct manner. It has been handled in connection with autobiographies of trainers, but such works are out of print or out of date, for they were published 20 years or more ago. Conditions and methods have changed since then, and former treatises are just as much out of date as the high-wheel sulkies then in vogue.

"Care and Training of Trotters and Pacers" is as modern as a 42-centimeter gun. It does not contain the ideas of one man, but of 100 of the leading horsemen of the day, including Thomas W. Murphy, Walter R. Cox, and Edward F. Geers. These ideas were converted into book form by two prominent American turf journalists.

This book enables anyone to do his own caretaking and training until it is time to send the colt to a professional trainer, or the owner can train and race the colt himself. The treatise covers the details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented. Nothing is left to guess work. The language is lucid. Both theoretical and practical views are outlined and compared. The instructions are concise and easily understood. The work contains no advertisements—it is not a catch-penny publication that looks big in the advertisement but proves disappointing when received.

Many professional trainers have purchased the book and have found it interesting. Despite the war, over 300 copies have been sold in Europe and Australia.

Price $1.00 postpaid. Cloth, illustrated, 176 pages, 5x7 inches.

A Practical Treatise on the Training of Hounds

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

WINCHESTER

SELF-LOADING RIFLE, .401 CALIBER

IT GIVES A STREAM OF SMASHING BLOWS

No need to fear the most powerful or most dangerous animal, if equipped with the .401 Winchester. It can deliver five smashing, one-ton blows in a few seconds, with aim. This rifle is a self-loader, and it is only necessary to pull the trigger for each shot. It shoots cartridges small in size but powerful in execution loaded with either 200-grain or 250-grain bullets. It beats any other rifle of this type for power and is the most effective hunting rifle made. Your first hunt will prove every word we say.

THE GRAND PRIX—The highest honor—was awarded to Winchester Guns and Ammunition at the Panama-Pacific International Exposition.

VOL. LXVII. No. 16. SAN FRANCISCO, SATURDAY, OCTOBER 16, 1915. Subscription—$3.00 Per Year

Chas. W. Winter's Great Show Horse
ALHAMBRA PRINCE (3) 2:27.
The son of Redlac 2:07½ and Patti Mack has won all his shows in Southern California and was invincible at the Exposition Horse Show, which closed Wednesday.

JUST A MOMENT, MR. HORSEMAN: Read this short dispatch from the Blue Grass:

"Marvin, trainer of William 1:58½, paid $610, top price of sale for Verbena Ansel (1) 2:22; Anselot (1) 2:28½ brought $535; Edna Ansel $235; Prince Ansel yearlings outsold all other horses in Lexington sale."

LET THESE FACTS AND FIGURES "SINK IN," AND REMEMBER THAT

WOODLAND STOCK FARM

(Incorporated)

"Where the Champions Come From"

WILL HOLD A GREAT SALE OF TROTTING HORSES ON

MONDAY, OCTOBER 25, 1915

at the farm, offering a grand array of matchless stock, of all ages and sexes—colts, fillies, campaigners, futurity prospects and brood mares, some with foal at foot and all bred this season.

A WORLD'S CHAMPIONSHIP FLAVOR TO THESE:

BAY FILLY, yearling, by PRINCE ANSEL (2) 2:20½, dam EOCITA by Moko; grandam Mendocita (dam of MARY PUTNEY (3) 2:05½, world's champion three-year-old trotting filly) by Mendocino 2:19½. This filly is a great prospect and can trot a forty gait now. Every right to be a future champion.

CHESTNUT FILLY, weanling, by PETER THE GREAT 2:07¼, leading sire of trotting speed, dam CARRIETTA 2:18, world's greatest producer of yearling trotters, and dam of SULDINE (2) 2:12, holder of world's record for two-year-old trotters on halfmile track.

BAY GELDING, yearling, by BONADAY 2:11¼, dam ONISKA (dam of San Francisco 2:07¾, sire of MARY PUTNEY (3) 2:05½, world's champion three-year-old trotting filly) by Nutwood Wilkes 2:16½. This is a snappy, nervy youngster and a trotter.

LOTTIE WHIPPLETON 2:15 (dam of the world's champion yearling trotting gelding Anselot (1) 2:28½; Prince Lot 2:07¾, Lottie Ansel (2) 2:14¼ and Ruth Ansel (3) 2:21; in foal to Robert Bingen. This is one of the grandest matrons in the land.

AND THESE RANDOM SELECTIONS ARE OF EQUAL QUALITY:

Nosegay B. (dam of Aristo 2:08¼ and Nuristo 2:10½) by Langton 17536; in foal to True Kinney 2:12¼.

Brown colt, yearling, by Prince Ansel (2) 2:20½, dam Silver Haw (dam of Helen Stiles 2:06¼, etc.) by Silver Bow 2:16; can trot quarter in forty seconds.

Ruby Crellin, by C. the Limit 2:03¼, dam La Moscovita (dam of Bon Guy (3) 2:11¾, etc.) by Guy Wilkes 2:15¼, and filly foal by Robert Bingen 2:11¼; in foal to Robert Bingen.

Maggie Hall by Moko, dam Maggie Yeazer (dam of Walnut Hall 2:08¼, etc.) by Red Wilkes; in foal to Robert Bingen.

Peter's Queen, b m (4) by Peter the Great 2:07¼, dam Sonoma Queen 2:25, trial 2:10½ (full sister to Sonoma Girl 2:04¼); this mare can show half in 1:06 now, quarter in :32, and will trot in 2:10 this fall; she is one to buy to race and breed.

Decoratio by Prince Ansel, dam Magella B. (dam of 3) by Nushagak.

Princess Josie by Prince Ansel, dam Josie D. (dam of Joseph Ansel (3) 2:12¾, etc.,) by Nutwood Wilkes 2:16½.

Princess Viola by Prince Ansel, dam Viola by Gen. Benton.

Silver Haw (dam of Helen Stiles 2:06¼) by Silver Bow; colt at foot by True Kinney 2:12¼.

Woodland Bonnie Derby (dam of Bonnie Ansel 2:11¼, Bonnie Princess, trial 2:07¼, etc.) by Chas. Derby 2:20, dam Bonnie Red by Red Wilkes.

Josie D. (dam of Joseph Ansel (3) 2:12¾, etc.) by Nutwood Wilkes, dam Everette (dam of Wesos 2:12¼, etc.) by Nephew; colt at foot by True Kinney 2:12¼.

The Attraction by Peter the Great 2:07¼; filly at foot by True Kinney 2:12¼.

Aleema by Nutwood Wilkes 2:16½, dam Malverna by McKinney 2:11¾.

Prince Magella (3) ch g, pacer, by Prince Ansel, dam Magella B. (dam of 3) by Nushagak.

These are by no means all of the royally bred individuals to be offered. Woodland Stock Farm horses are in greater demand than ever, and from the catalog you can pick something to your liking. Send at once for full list of horses to be sold, addressing

WM. HIGGINBOTTOM, Auctioneer, San Francisco.

HARRY DOWLING, Mgr., Woodland, Cal.

MONEY DIVIDED AS FOLLOWS:

$2100 for Three-Year-Old Trotters.

100 to the Nominator of the Dam on whose Original Entry is named the winner of the Three-Year-Old Trot.

800 for Two-Year-Old Trotters.

50 to the Nominator of the Dam on whose Original Entry is named the Winner of the Two-Year-Old Trot.

50 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when mare was bred.

$1200 for Three-Year-Old Pacers.

100 to the Nominator of the Dam on whose Original Entry is named the Winner of the Three-Year-Old Pace.

500 for Two-Year-Old Pacers.

50 to the Nominator of the Dam on whose Original Entry is named the Winner of the Two-Year-Old Pace.

50 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when mare was bred.

$150 in Special Prizes was paid to Stallion Owners in December, 1914.

ENTRANCE AND PAYMENTS—$2 to nominate mare on December 1, 1914, when name, color, description of mare and stallion bred to must be given; $5 March 1, 1915; $5 November 1, 1915; $10 on Yearlings May 1, 1916; $10 on Two-Year-Olds February 1, 1917; $10 on Three-Year-Olds February 1, 1918.

STARTING PAYMENTS—$25 to start in the Two-Year-Old Pace; $35 to start in the Two-Year-Old Trot; $35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start as Two-Year-Olds are not barred from starting again in the Three-Year-Old divisions.

SUBSTITUTIONS.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before May 1, 1916, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment nor will any entry be liable for more than amount paid in or contracted for.

E. P. HEALD, President.

F. W. KELLEY, Secretary, Post Office Drawer 447, San Francisco, Cal..

DeRyder's Fall Sale

at San Francisco—During the P.-P. I. E. Trots

is attracting consignments of the highest class in every way. Glance at these "for a starter":

BARGAINS LIKE SPRIGGAN 2:08¼ FROM PLEASANTON DRIVING PARK

Astro Harvest, b m (5) trotter by The Harvester 2:01; dam Grace Rysdyk by Judge Rysdyk 4525; 2nd dam Fanny Sheridan by Phil Sheridan 630. She is a beautiful bay mare with black points and has shown beyond a doubt that she is the real thing in the speed line. Her trial in 2:09¼ with a last half in 1:02¾ and a quarter in 30 seconds stamps her as a real trotter. That she should inherit this remarkable turn of speed from her famous world champion sire, The Harvester 2:01, is natural, and in careful hands she should equal her illustrious sire's mark. On her dam's side she comes from the famous Rysdyk Hambletonian family, noted for their stamina. She was bred by the late August Uhlein, of Milwaukee, and registered in Vol. XXI.

Bay Gelding (4) by Vernon McKinney 2:01½; dam by Diablo 2:09¼; 2nd dam Geraldine 2:16¾ (dam of Leata J. 2:03, etc.) As a three-year-old he worked in 2:12 with half in 1:02½ and quarter in 30 seconds. He is a nice, young, level headed pacer, does not wear the straps and is sound. He had no futurity engagements, hence was never given a real "searching," but he has the speed of his sire, Vernon McKinney, and with his maternal blood that made Leata J. famous he is fit for any company.

The Earnest (3) 2:21¼, trial 2:07¾, by The Exponent 2:11½; dam Mardella (dam of 3) by Del Mar 2:16¾. The Earnest has shown that in the right hands he is a two minute trotter as he trotted a half on the Pleasanton track in 1 minute on the end of a slow mile. He has been turned out in pasture during the greater part of 1915 and is now ready to be trained for 1916.

Prince Del Monte, ch g, trotter, foaled 1906 (tr. 2:15½), by Kinney Lou 2:07¾. Prince Del Monte is a full brother to Della Lou 2:15¾. He is handsome enough for a show horse and gentle enough for a lady to ride or drive. Sound in every respect and is sold to settle an account.

Leola Lou, gr m, trotter, by Kinney Lou 2:07¾; dam Princess Leola by Lionel K., son of Bay Rose 2:20½; 2nd dam Lady Menlo by Menlo 13028 by Nutwood 600. She is a fine, large road mare, gentle for a lady to drive and has been used exclusively by Mrs. MacKenzie. She is sold for no fault.

Baroness Psyche, roan mare, trial (2) 2:14, by Baron Review 2:21¼, dam Durnella 2:29¾ (dam of 4) by Axtell (3) 2:12.

Mildred Togo, chestnut mare (2) 2:16½, (3) 2:11½, trial 2:08¼, by Togo 2:27, dam Lady May (dam of 9) by Port Leonard 12953.

Bay colt, (2) by Copa de Oro 2:01; nicely broken.

This is only a portion of the consignment from Pleasanton Driving Park; watch for the balance.

CHOICE CONSIGNMENTS FROM VARIOUS OWNERS

From P. H. SMITH, Los Angeles:

El Volante S., b h, (5) by El Volante (3) 2:13¼, dam Seville by Strathway; 2nd dam by Simmons; 3rd dam by Baron Wilkes; 4th dam by Mambrino Patchen. One of the handsomest horses in California and with limited training as a three-year-old showed a mile better than 2:20. Stright and sound every way and a pick-up for any one wanting a fine, well-bred young stallion.

Bay Filly, (2), trotter, by Zombro 2:11; dam Katherine A. by Diablo 2:09¼. With a very limited training as a two-year-old showed a quarter in 36 seconds. Has never been trained since and is sound and straight every way. Full sister to Zomerine S. (3), trial 2:16.

Two-year-old filly by The Bondsman, dam Rosemary 2:25 by Raymon 2:27¼; nicely broken as a yearling, since when she has been on pasture.

Blanca S. (5) by Red McK. 43766, dam Katherine A. by Diablo 2:09¼; a show mare, never trained for speed.

Katherine A., brood mare by Diablo 2:09¼, dam by A. W. Richmond.

Rosemary 2:25, brood mare, by Raymon 2:27¼, dam Black Bess by Guide 2:16¼.

From JERRY DORAN, Oakland:

Bay gelding, two-year-old, by The Bondsman; good conformation and bred to make speed early. Will be broken to harness before sale day.

From MRS. C. L. JONES, Modesto:

Johnny, bay gelding by Prince Ansel (2) 2:20½; a nice young pacer that looks like a real good prospect.

From BUDD DAVIS, Caldwell, Idaho:

McGregor Bond, 60149, b g by The Bondsman; dam Gregan by Steinway 2:25¾; 2nd dam Maggie McGregor by Robert McGregor 2:17½, etc. He is a nice, fine looking two-year-old, just nicely broken but has never been trained. A better bred or finer looking colt does not live, and with just a little training will show enough to make him worth while.

Brown Filly (2), trotter, by The Bondsman, dam Ava J. 2:28 by Zombro 2:11; 2nd dam Ventura by Secretary. She is a little beauty and is sure to make a trotter. She is by The Bondsman and her dam is by Zombro 2:11, McKinney's best son.

Belle Demonio, b m, foaled 1911, by Demonio Wilkes 2:09¼; dam Jessie M., tr. 2:22½ (dam of Hal J. 2:09¼ and Della H. 2:10) by Del Norte 12895. This filly was cut on the wire fence, otherwise she was as promising as her full sister and brother Della H. and Hal J. Any one wanting a nice young broodmare should find himself well suited with this one.

From R. A. STEVENSON, San Antonio, Texas:

Dr. Dawson, bay gelding, pacer, trial 2:11¼, by Del Coronado 2:09½; never raced, but has the speed to win; one to buy to race next year; level headed and free legged.

Black mare, five-year-old, by Oh So 2:25½, and two of her produce, an unbroken two-year-old by Directly 2:03¼ and a weanling by Vernon McKinney 2:01½. Right all around.

Remember this about DeRyder's Sales: THEY GET THE HORSES—THEY BRING THE BUYERS. This one, with horsemen from all over the country in attendance at the exposition trots, should be "the best ever." Patronage solicited on usual terms and guarantees of service. Remember, early consignors get most benefit of advertising. Address for full particulars,

PHOENIX (Arizona State Fair).....Nov. 15-20

MARY PUTNEY'S CALIFORNIA ANCESTRY.

World's champion trotters, their breeding and their performance, always furnish welcome topics for discussion by lovers of the horse, among both professional followers of the breeding and racing industry and among very many of the horse-loving public. A new record holder is always warmly welcomed and much talked of, and none have had a more meteoric brief career than the three-year-old filly Mary Putney (3) 2:05½, who in the hands of Dick McMahon has made a clean sweep of the Horse Review, Horseman and Kentucky futurities. She is of exceptional interest to coast horsemen at this time, not merely because she is a champion, but because of her California ancestry and of the relationship borne to her by a trio of horses included in the Woodland Stock Farm sale which takes place on the farm October 25—Eocita, Anselita and Bonoska.

Eocita, now a four-year-old with one foal to her credit, is a daughter of Moko and Mendocita, dam of Mary Putney, and was bred at the famous Walnut Hall Farm in Kentucky, being a member of the farm's consignment to the Fasig-Tipton sales in New York as a two-year-old. Messrs. Considine and Harrison were patrons of the sale, and the latter became very much attracted by the filly and bid her in for Woodland Stock Farm. She suited Mr. Harrison "down to the ground" on breeding, individuality and soundness, while her trotting inclinations were especially impressive, her purchaser remarking at the time that she was the one and only individual shown by Al Thomas that absolutely refused to do anything but trot during the time she was being "chased around the Garden."

In her California home the aristocratic young mare was mated with Prince Ansel (2) 2:20½ and in due time gave birth to the bay filly Anselita, now a yearling and a most promising trotting prospect. Bonoska, the third of the trio mentioned above, is a snappy yearling who gets the relationship to the new champion through his dam, being out of Oniska, the dam of San Francisco 2:07¾. Eocita is again heavy with foal, and with the yearlings is included in the farm's offerings at the coming sale, where they should be the cause of some spirited bidding.

Just after her victory in the Horse Review stake and prior to her even greater performances in the Horseman and Kentucky futurities, Volunteer, of the Horse Review, prepared and published the following comprehensive story of the ancestry of the new phenomenon:

Mary Putney was bred at that greatest of American speed nurseries, Walnut Hall Farm, Donerail, Ky. She is the fourth three-year-old Review futurity winner that it has sent out, the three preceding having been Mobel 2:10¼, The Harvester 2:01 and Native Belle 2:06½, winners, respectively, in 1900, 1908 and 1910. In addition, Susie N. 2:09¼, winner in 1905, while not bred at Walnut Hall, was sired by its premier, Moko—making, all in all, a record such as no other establishment can rival. Mobel and Native Belle, like Susie N., were by Moko; The Harvester, by Walnut Hall 2:08¼. Mary Putney represents another family, for she is by San Francisco 2:07¾, a stallion that was added to the farm staff only a few years ago.

One always feels a particular warmth of interest in anything for which, in advance, he has taken the risk of prophesying success—a species of prophecy particularly risky in racing affairs. In the case of Mary Putney I can enter a legitimate plea of vindicated judgment. In former years I repeatedly urged Eastern breeders who chanced to confer with me regarding the purchase of a first-class trotting sire, to go to California and buy McKinney 2:11¼, a horse for whom I always cherished a very high regard. Several of them did make offers for him, but none of them succeeded in buying him—and as I wish no misconstructions, I will add that when Mr. Henry B. Gentry finally did secure him for the large price of $25,000, that gentleman was not one of those to whom I refer, for I never met him until after his purchase was made. Later on, under similar circumstances, I repeatedly urged the purchase of McKinney's great son, Zombro 2:11; again several breeders to whom I warmly recommended him endeavored to buy him and again they failed. His breeder and owner, Mr. George T. Beckers, held him at a prohibitive price, and Zombro died his property. San Francisco is a son of Zombro. I first saw him upon the occasion of his starting in the $50,000 American Trotting Derby, at Readville, Mass., in 1908. He was then suffering under a painful physical ailment that would have put nine out of ten race horses out of commission, but despite it he gave a superb exhibition of speed and purest gameness, as he not only qualified in the preliminary in which he started, but in the final won third money, to the majority of the spectators really appearing to finish second to Allen Winter. At this time San Francisco was a green horse, with no public record, but behind him finished a whole mob of famous trotters. His performance impressed me deeply; and I was particularly taken with the absolute purity of his gait, in which respect he seemed to me one of the most nearly perfect trotting stallions I had ever seen.

Later that fall San Francisco took a winning race record of 2:07¾ at Columbus, O. He was trained and driven by his owner and breeder, Mr. P. W. Hodges of Pleasanton, Cal., who, it is my recollection, wintered him in the east and made a stud season with him the next spring in Michigan, some parties in Detroit having become financially interested in the horse. It was not expected that he would be ready to race early in 1909, but he created a sensation at the North Randall inaugural by trotting second to the peerless Uhlan when the son of Bingen equaled the then world's race record for trotting geldings, 2:03¾, held by Highball. In this great heat, of which my recollection is vivid, San Francisco finished almost at Uhlan's wheel, his separate official time being 2:04½. In the first heat he had finished lapped on Uhlan in 2:06¼, himself trotting the last quarter in 30 seconds. This was Tuesday. On Friday Mr. Hodges had Mr. Geers drive San Francisco an exhibition mile, he being started against the world's stallion record, then 2:02¼, by Cresceus, in order to make the performance a losing one and no record or bar be secured. Mr. Geers took San Francisco over to the half in 1:04 and from there he came home in 1:00¾, completing the mile in 2:04¾, with the last quarter in 29¾ seconds. This performance is recorded in the Year Book, Vol. 25, but is not, of course, a record—it is unfortunate that the "breeders' record" rule was not then in force, or cannot be construed retroactively so that San Francisco can receive the benefit from it to which justly he is entitled. His campaign the rest of the season was a chequered one. He was not really ready for such efforts as these when they were made, and he seemed to train off afterward and did little good until late, but at Columbus, in the fall, when Paderewski set a world's record for a three-heat race by a gelding that still stands—2:05¼, 2:06¾, 2:05¼—San Francisco was right at him all the way in every heat. I did not witness this race, but in the Review's report of it, which was written by Walter Moore, I find this closing remark: "San Francisco trotted a very great race for a lame horse." At this time Mr. Hodges, unfortunately had become financially entangled and the sale of the stallion was soon after virtually forced. He then became the property of Walnut Hall, Superintendent Harry Burgoyne's keen eye having singled him out for a great future sire.

I had conceived so great an admiration for San Francisco that as soon as I received the news of the purchase, I could not resist sitting down and writing Mr. Burgoyne a letter of congratulation, telling him my opinion of the horse, and prophesying great success for him at Walnut Hall—and I have ever since been a firm believer in him. San Francisco's first season at Walnut Hall was made in 1910, and his first foals bred there came in 1911, hence are now only four-year-olds. One of these is that rare good racing colt owned by Frank Jones of Memphis, St. Frisco 2:07¼, who has, to this writing, started at every Grand Circuit meeting of the season and been either first or second in every start, establishing for himself an enviable record for gameness and consistency, as well as speed. His get are beginning to be heard from in all sections, and aside from Mary Putney he has at least one other three-year-old of 2:10 caliber, Lady Anne 2:12½, bred and owned by Jere Tarleton, of Lexington. She is almost sure to beat 2:10 before the season closes, if asked to do it. At the New York sales, both this year and last, the San Franciscos averaged higher, under the hammer, when the Walnut Hall yearlings were sold, than did those by either Moko or Walnut Hall—a fact which aroused much comment, but the reason for which is now becoming somewhat plainer.

I have consumed more space in writing of the sire of Mary Putney than I had intended, but the story of San Francisco seemed to me worth telling at this time. However, the facts about the filly's dam are of equal, and in some ways, even greater interest. While bred at Walnut Hall, she is by ancestry a double Californian, for both her sire and dam are California bred, and were brought east and mated in Kentucky to produce her.

Mendocita, dam of Mary Putney, is a bay mare foaled in 1899, and was bred at Palo Alto Farm. Her sire was Mendocino 2:19½, the son of Electioneer and Mano, by Piedmont 2:17¼, son of Almont 33—Mendocino (first known as Monaco), being also the sire of the sensational gelding Monte Carlo 2:07¼, and Idolita 2:09⅛, one of the most notable of Review futurity winners and since the leading sire of Germany, whither he was exported. Mendocino individually resembled his sire, Electioneer, more closely than any other son of the "monarch of Palo Alto," and he was a personal favorite, on this account, not only with Senator Stanford, but also with the late Frank Covey, who, after the Senator's death, became superintendent of the farm and remained so until its stud was dispersed. Upon this dispersal, also, Mendocino was not sold, but retained by Mr. Stanford until his death in 1907, when he was buried in the famous "equine cemetery" at Palo Alto. His opportunities in the stud were not large, for he did not reach maturity until after the death of his breeder and the curtailment of the Stanford breeding operations. Frank Covey, who was a warm friend of mine—I wish that he might be alive now to know about Mary Putney!—had a genuine affection for Mendocino and often expressed to me a very high opinion of him.

The Palo Alto stud was dispersed in the east in a series of consignments to the auctions, and at one of these Mendocita was purchased by the late John H. Shults and added to his brood mare band. He kept her a few seasons and then, at the "Old Glory" sale of 1903, sent her back into the ring. She was No. 315 of the catalogue, and the "Owner's Statement" regarding her was : "Mendocita has been used as a brood mare during present ownership. She is a handsome, stylish mare. Since we began driving her this fall she is making speed fast and can now trot close to a 2:20 gait. Her half-sister, Expressive (3) 2:12½, was the greatest racing three-year-old of her day, and Mendocita is just as good gaited, and will, with training, be fast. Had a foal this year." She was then four, and as no mention is made of her being with foal, or having been bred that spring, the inference is that it had been intended to develop her speed, but Mr. Shults took one of his periodical notions to sell. He received for her exactly the same price that he had paid when he bought her as a two-year-old at Cleveland, O. , May sale of 1901—namely, $450. Her buyer is given as W. G. Simpson, the well-known trainer of Lexington, who was, presumably, acting for Walnut Hall Farm, as she was placed in the harem there, was bred to Moko the following spring of 1904, and produced a bay colt by him in 1905. She has done well as a matron, being, beside Mary Putney (3) 2:08¼, by San Francisco, the dam of Montalvo (2) 2:25¼ (2:13¼, pacing), and Cecella (dam of Bingola (3) 2:21¼), both by Moko; also of Cita Hall (5) 2:27¼, by Walnut Hall.

With the dam of Mendocita, and grandam of Mary Putney, we reach one of the most arresting figures in the whole ancestry—for she was no less a mare than the celebrated Esther, registered as thoroughbred, by Express, also the dam of Expressive (3) 2:12½ (dam of Atlantic Express (3) 2:08¼, Esther Bells 2:08¼ and four other standard trotters, of two producing sons and one producing daughter, the dam of four performers); of Monesta, the dam of Marta Bellini 2:05½, in addition to others of note.

Esther was one of that historic band of running mares that Senator Stanford purchased in Kentucky, in the fall of 1879, to use as the material in the making if his great experiment of breeding trotters by crossing running mares upon Electioneer and other trotting sires. These mares were selected by the late Harrison R. Covey (father of Frank Covey), at that time the Palo Alto superintendent, who made a trip from California to "the Blue Grass" especially for the purpose. In selecting them Mr. Covey made a close study of individuality, searching out specimens of the running breed that had conformation desirable from a harness standpoint, with good temper, and action at the trot. The correctness of his judgment was demonstrated by the results attained, for among the lot were Dame Winnie, who became the dam of Palo Alto 2:08¾; Lizzie Whips, who became the dam of Whips 2:27½(sire of Azote 2:04¾, and the dam of Maymack 2:04¼); and others of distinguished reputation. But of them all it now appears possible that the blood of Esther may exert the most enduring influence.

Esther was a 16-hand bay mare, with a star and some white on the off hind foot, foaled 1877, and bred by S. B. Wallace, Midway, Ky. In making his selections of thoroughbred mares for trotting matrons, Mr. Covey paid little attention to their qualifications as runners, per se, nor was he fastidious regarding their blood lines from a thoroughbred standpoint. He did not insist upon mares that had been winners or belonging to families sensationally successful as such, but those carrying strains that had shown a tendency to miv practically with trotting blood. Esther, then a two-year-old filly, was of this description. She was anything but fashionably bred

in running lines, although acceptably well bred. Her sire, Express, was chiefly known as a half-brother of the mighty Longfellow, being out of that horse's dam, Nantura (also the grandam of Ten Broeck), by Brawner's Eclipse; his sire being Endorser, son of Wagner. Express had been a good, though not a very successful, race horse. He was noted as the winner of the Viley stake at Lexington in 1871, in which Salina (who afterward became the dam of the immortal Salvator) won the first heat in 1:43—then the world's record for a mile; Ginger took the second in 1:43¾, and Express the third and fourth (he had been 2-4 in the first two), in 1:46¼, 1:47. This race created a sensation, and its winning gave Express considerable eclat, but it was the only one of account that he ever won—and as a sire his success was very small. The dam of Esther was a mare named Colisseum (a queer name for a mare!), by Colossus, who was a son of imp, Sovereign and a mare by imp. Glencoe. The grandam of Esther was Capitola, by Vandal (son of imp. Glencoe); next dam by imp. Margrave, then the line running to Mistletoe, by Cherokee (son of Sir Archey); Blackeyed Susan, by Tiger (son of Blackburn's Whip); and then unnamed mares by Albert, Algerine and Gray Alfred, after which it closes, so far as known elements are concerned, with "a mare purchased in Virginia by Capt. George Burbridge for breeding, but whose pedigree is now lost." I have spent a good deal of research in trying to cerify and bring into credible order the crosses and dates (where any are given) in this pedigree, and found it practically a hopeless task. It "runs to the woods" collaterally, as well as in the final direct line, in repeated instances and contains many a "cold" element. None of the dams produced any foals of outstanding fame as thoroughbred race horses. What we may accept about it, however, is the fact that Esther carried the blood of a number of running horses that blent well with trotting blood, most notably that of Wagner, American Eclipse, imp. Sovereign, imp. Glencoe and imp. Margrave. To me the most interesting point in her genealogy, by far, is the dame of her paternal grandsire, Endorser, the sire of Express, who begot her. Endorser was out of Fanny G., by imp. Margrave—and Fanny G. was not only the grandam of Dame Winnie, dam of Palo Alto 2:08¾, the champion "half-bred" trotter and a world's champion trotting stallion in his day—she was also the grandam of the renowned Alma Mater, the foundress of one of the pre-eminent maternal families in the Trotting Register.

As above-said, Esther became a member of the Palo Alto harem in 1879, and was first bred there in 1880. The following is a complete list of her produce:

1881—Extra, b m by Electioneer 125. Dam of Ellalee 2:15¼ and Esparto Rex 2:25¼ (sire of 4).
1882—Express 2:21, b g by Electioneer 125.
1883—Barren.
1884—Del Norte, b c by Flood (thoroughbred).
1885—Oscar Wilde, b c by Don Victor (thoroughbred).
1886—Essie, b m by Clay 2:25.
1887—Effie, b m by Piedmont 2:17¼. Dam of Endrino 2:25 (sire of 5), Efuso 2:29¼ and Caleta (dam of Miss Caleta 2:29¾, she the dam of 5, including Axworth (3) 2:10, and of 2 producing dams).
1888—Experta, b m by Electioneer 125.
1889—Kelley 2:27, b h by Electioneer 125. Sire of 4.
1890—Elwina (2) 2:27, b m by Electioneer 125.
1891—Expressive (3) 2:12½, by Electioneer 125. Dam of Atlantic Express (3) 2:08¾ (sire of 10); Esther Bells 2:08¼; Expressive Mac 2:25¼ (sire of Clara Mac p. 2:04¼, Vera Hal p. 2:05, etc.);Elsa Bellini 2:25¾; John Bellini 2:28¾; Evan Bellini 2:30; Excella (dam of 2); Beautiful Bird (dam of 1); also of Eva Bellini, second as a two-year-old to Native Belle in 2:07¾.
1892—Albatross, b m by Alban 2:24.
1893—Etta, ch m by Advertiser 2:15¼.
1894—Expressor, b h by Norris 2:24¼.
1895—Epreso, br h by Advertiser 2:15¼. Sire of 2.
1896—Ellerton, ch g by Advertiser 2:15¼.
1897—Monesta, b m by Mendocino 2:19½. Dam of Marta Bellini 2:05¼ (she the dam of Maiti (2) 2:28½); Heathcote 2:27¾; Una Bellini (3) 2:28¼; Red Montie (3) 2:29¾.
1898—Malaska, ch m by Mendocino 2:19½.
1899—Mendocita, b m by Mendocino 2:19½. Dam of Mary Putney (3) 2:08¼; Montalvo (2) 2:25¼ (pacing, 2:13¼); Cita Hall 2:27¼; Cecelia (dam of Bingola (3) 2:21¼).
1900—Exquisite 2:17½, ch g by Mendocino 2:19½.

Esther was a very fecund mare. From 1881 to 1900, when she became permanently barren at the age of twenty-three, she failed in but one season to produce a living foal: the net showing is nineteen foals (two of which were by thoroughbred sires) in twenty years. These include five standard-record trotters, two producing sons and five producing daughters. Of her seventeen foals by trotting sires, ten have performed or produced, while seven are, thus far, "blanks." In Expressive she produced one of the greatest racing three-year-old trotters of all time, and now a wonderful speed producer; and in her, Monesta and Mendocita, she is the dam—and the only dam thus far known—of three different daughters that have each produced a 2:10 trotter.

In conclusion I would call attention to the fact that Esther, aside from being the grandam of Mary Putney, winner of the three-year-old Review futurity, is also the grandam of Atlantic Express, sire of Atlantika, winner of fourth money in the two-year-old division.—Volunteer, in the Horse Review.

———o———

Again we remind you that starting payments in the Stanford stake for three-year-old trotters and in all divisions of the State Fair and Breeders' futurities which are to be raced here in November are due on Friday, October 22—next Friday. Don't overlook a bet and allow some good money to get away owing to your own carelessness.

Awards in Breeding Classes

P.-P. I. E. HORSE SHOW

Never before has there been gathered on the Pacific coast such a great array of purebred utility and pleasure horses as was housed in the livestock department at the Panama-Pacific International Exposition during the horse show, which has just come to a close. From all over the west and central west breeders sent the pick of their stables to take part in the competitive classes here, and so uniformly high was the quality of the individuals shown that in many classes the judges were called upon to exercise their knowledge to the utmost in determining the animal that could most truly be called "best." The premiums were widely distributed, and so comprehensive were the classes provided that every exhibitor was well repaid for the expense of the journey to the big show.

Of the various breeds of horses for which provision was made in the program of the show, but one failed to have representatives present, the Suffolk Punch. All others, from the tiniest of Shetlands to the most ponderous of drafters, had their interests cared for by their very best members, winners, in numerous instances, of international renown. The story of the show is best told by the official awards, and in this issue we present the results of the work of the judges in the breeding classes of the Standard Trotters, Thoroughbreds, Arabians, Morgans, Percherons, Jacks and Jennets, Hackneys, and Welsh and Shetland Ponies, the other classes, Clydesdales, Shires, Belgians and Saddle Horses to appear in the following number.

STANDARD TROTTERS.

Exhibitors—C. W. Winter, Alhambra, Cal.; L. H. Todhunter, Sacramento; S. H. Cowell, Santa Cruz; J. N. Colomb, San Francisco; Frank S. Turner, Santa Rosa; D. E. Hoffman, San Francisco; S. Christenson, San Francisco; Charles Butters, Oakland.

Section 1—Stallion, four years old or over: (1) Alhambra Prince, C. W. Winter; (2) Peter McKlyo, L. H. Todhunter; (3) Tom Smith, D. E. Hoffman; (4) Onward McGregor, J. N. Colomb; (5) Jonesie Mac, D. E. Hoffman.

Section 3—Stallion, two years old and under three: (1) Exponent Mac, Frank S. Turner.

Section 4—Stallion, one year old and under two: (1) Peter C, S. H. Cowell; (2) F. S. Jennings, Frank S. Turner; (3) McKlyo Boy, L. H. Todhunter; (4) F. S. Montgomery, Frank S. Turner.

Section 5—Stallion Foal: (1) Charlie Butters, Chas. Butters.

Section 6—Mares, four years old and over: (1) Elna, S. Christenson; (2) Sweet Bow, L. H. Todhunter; (3) Lottie Lynwood, Chas. Butters.

Section 8—Mare, two years old and under three: (1) Minnie Bond, S. Christenson.

Section 9—Mare, one year old and under two: (1) Charlotte McKlyo, L. H. Todhunter; (2) Dora C., S. H. Cowell.

Section 23—Get of one sire: (1) Get of The Exponent (Exponent Mac, F. S. Jennings, F. S. Montgomery), Frank S. Turner.

Section 24—Produce of one dam: (1) Product of Perza (Elna, Esther Bond), S. Christenson.

Section 11—Senior Champion Stallion: (1) Alhambra Prince, C. W. Winter.

Section 12—Reserve Senior Champion Stallion: (1) Peter McKlyo, L. H. Todhunter.

Section 13—Junior Champion Stallion: (1) Exponent Mac by The Exponent, Frank S. Turner.

Section 15—Senior Champion Mare: Elna, S. Christenson.

Section 16—Reserve Senior Champion Mare: Sweet Bow, L. H. Todhunter.

Section 17—Junior Champion Mare: Charlotte McKlyo, L. H. Todhunter.

Section 18—Reserve Junior Champion Mare: Minnie Bond, S. Christenson.

Section 19—Grand Champion Stallion: Alhambra Prince, C. W. Winter.

Section 20—Reserve Grand Champion Stallion: Peter McKlyo, L. H. Todhunter.

Section 21—Grand Champion Mare: Elna, S. Christenson.

Section 22—Reserve Grand Champion Mare: Charlotte McKlyo, L. H. Todhunter.

Section 27—Premier Championship for Breeder: Prize awarded to S. Christenson.

Section 28—Premier Championship for Exhibitor: Prize awarded to S. Christenson.

THOROUGHBREDS.

Exhibitors—Anita M. Baldwin, Los Angeles; Charles Butters, Oakland; Bugeia Bros., Novato; Edw. de L. Cebrian, San Francisco; Chas. L. Stevenson, San Francisco; Allen Caven, Concord; R. E. D. Hoyle, San Francisco.

Section 1—Stallion, four years old or over: (1) Rel El Santa Anita, Anita M. Baldwin; (2) Kenilworth, Bugeia Bros.; (3) East Or, Charles Butters; (4) Norito, (5) Adalid, Anita M. Baldwin.

Section 3—Stallion, two years and under three: (1) Cuyama, Edw. de L. Cebrian.

Section 6—Mare, four years old or over: (1) Maddelle, Chas. L. Stevenson; (2) Orange Blossom, Allen Caven; (3) Castelita, Charles Butters; (4) Reina de Los Angeles, Anita M. Baldwin; (5) Satisfax, R. E. D. Hoyle.

Section 9—Mare, one year old and under two: (1) Reina de Santa Anita, Anita M. Baldwin.

Section 11—Senior Champion Stallion: Rey El Santa Anita, Anita M. Baldwin.

Section 12—Reserve Senior Champion Stallion: Kenilworth, Bugeia Bros.

Section 13—Junior Champion Stallion: Cuyama, Edw. de L. Cebrian.

Section 19—Grand Champion Stallion: Rey El Santa Anita, Anita M. Baldwin.

Section 20—Reserve Grand Champion Stallion, any age: Kenilworth, Bugeia Bros.

Section 15—Senior Champion Mare: Maddelle, Chas. L. Stevenson.

Section 16—Reserve Senior Champion Mare: Orange Blossom, Allen Caven.

Section 17—Junior Champion Mare: Reina de Santa Anita, Anita M. Baldwin.

Section 21—Grand Champion Mare: Maddelle, Chas. L. Stevenson.

Section 22—Reserve Grand Champion Mare, any age: Reina de Santa Anita, Anita M. Baldwin.

ARABIANS.

Exhibitors—Anita M. Baldwin, Los Angeles; Lt. H. L. Watson, San Francisco.

Section 1—Stallion, four years old or over: (1) I Mahruss, Anita M. Baldwin; (2) Chanim, Lieut. H. Watson.

Section 2—Stallion, three years and under four yea (1) Cibolo, (2) Nedjrez, Anita M. Baldwin.

Section 6—Mare, four years old or over: (1) Nedjr III., Anita M. Baldwin.

Section 9—Mare, one year old and under two: (1) Sh reen. Anita M. Baldwin.

Section 11—Champion Stallion: Cibolo, Anita M. Bal win.

Section 12—Reserve Champion Stallion: Ibn Mahrus Anita M. Baldwin.

Section 13—Champion Mare, any age: Nedjme II Anita M. Baldwin.

Section 14—Reserve Champion Mare: Shireen, Anita M Baldwin.

Section 16—Produce of one dam: (1) Produce of Nedjm III (Medjrez, Shireen), Anita M. Baldwin.

MORGANS.

Exhibitor—Morgan Horse Farm, Plainfield, Iowa. (Note There being no exhibitor save Morgan Horse Farm, th following awards were made on the horses from the establishment):

Section 1—Stallion, four years old and over: (1) Dar (2) Montgomery, (3) Tom Kelly.

Section 3—Stallion, two years old and under three: (1 Tommy Dean.

Section 4—Stallion, one year old and under: (1) Archy

Section 6—Mare, four years old and over: (1) Ruperta

Section 7—Mare, three years old and under four: (1 Mable.

Section 8—Mare, two years old and under three: (1 Lucy B.

Section 9—Mare, one year old and under two: (1) Poll Taylor.

Section 11—Senior Champion Stallion: Dart.

Section 12—Reserve Senior Champion Stallion: Mont gomery.

Section 13—Junior Champion Stallion: Archy L.

Section 14—Reserve Junior Champion Stallion: Tommy Dean.

Section 15—Senior Champion Mare: Ruperta.

Section 16—Reserve Senior Champion Mare: Mable.

Section 17—Junior Champion Mare: Polly Taylor.

Section 18—Reserve Junior Champion Mare: Lucy B.

Section 19—Grand Champion Stallion: Dart.

Section 20—Reserve Grand Champion Stallion: Mont gomery.

Section 21—Grand Champion Mare: Ruperta.

Section 22—Reserve Grand Champion Mare: Polly Taylor.

Section 23—Get of one sire: (1) Get of Dart (Tom Dean, Polly Taylor, Tom Kelly); (2) Get of Dart (Mable, Archy L, Montgomery).

Section 24—Produce of one dam: (1) Produce of Minnie Dean (Polly Taylor, Tommy Dean); (2) Produce of Lady L. (Montgomery, Archy L.).

Section 25—Stallion and three mares, any age: (1) Dart, Ruperta, Polly Taylor, Mable.

Prize for Premier Championship for Breeder.

Prize for Premier Championship for Exhibitor.

Special Prize for Morgan Horses—Awarded by the Morgan Club to Dart.

PERCHERONS.

Exhibitors—Anita M. Baldwin, Los Angeles; C. W. Bowers, Davis; A. C. Ruby, Gresham, Ore.; Singmaster & Sons, Keota, Iowa; Dunham-McLaughlin Co., Wayne, Ill.; M. Bassett, Hanford; T. D. McLaughlin Imp. Co., Oakland; W. S. Corsa, White Hall, Ill.; James Edson, Carlton, Ore.; E. B. White, Oakland; H. G. Learned, Stockton; Truman's Pioneer Stud Farm, Bushnell, Ill.; John Secrest, Stockton.

Section 1—Stallions, four years old and over: (1) Lagos, Singmaster & Sons; (2) Londrecitos, Durham-McLaughlin Co.; (3) Jalap, Singmaster & Sons; (4) Jusque, Anita M. Baldwin; (5) Ithos, M. Bassett; (6) Benn, A. C. Ruby; (7) Justel, T. D. McLaughlin Imp. Co.

Section 2—Stallions, three years and under four: (1) Matineux, Dunham-McLaughlin Co.; (2) Majorat, Singmaster & Sons; (3) Mordu, T. D. McLaughlin Imp. Co.; (4) Moscou, (5) Woodrow, (6) Monsieur, Dunham-McLaughlin Co.; (7) Carlotheon, W. S. Corsa.

Section 3—Stallion, two years and under three: (1) Mouton, T. D. McLaughlin Imp. Co.; (2) Nobob, (3) Althacra, Dunham-McLaughlin; (4) Nandon, (5) Nadir, Singmaster & Sons; (6) Bud, James Edson; (7) Major, Dunham-McLaughlin.

Section 4—Stallions, one year old and under two: (1) Kota Jalap, Singmaster & Sons; (2) Carnarad, W. S. Corsa; (3) Elwood, A. C. Ruby; (4) Drangiana, E. B. White; (5) Carhall, W. S. Corsa; (6) Superior, A. C. Ruby; (7) Bay Boy, H. G. Learned.

Section 5—Stallion foals: (1) Diligent, A. C. Ruby.

Section 6—Mares, four years old and over: (1) Joie, Truman's Pioneer Stud Farm; (2) Oaklawn Queen, Anita M. Baldwin; (3) Mabel, James Edson; (4) Italienne, Singmaster & Sons; (5) Livie, (6) Kambree, Anita M. Baldwin; (7) Vermouthette, A. C. Ruby.

Section 7—Mares, three years old and under four: (1) Manon, Anita M. Baldwin; (2) Carnoress, W. S. Corsa; (3) Meridionale, (4), Meninge, Singmaster & Sons; (5) Minerve, Anita M. Baldwin; (6) Manche, (7) Medire, James Edson.

Section 8—Mares, two years and under three: (1) Maplegrove Snowball, Singmaster & Sons; (2) Cicely, Anita M. Baldwin; (3) Folito II., W. S. Corsa; (4) Incomparable, Anita M. Baldwin; (5) Black Bess, Dunham-McLaughlin; (6) Carante, W. S. Corsa; (7) Mabel E., James Edson.

Section 9—Mares, one year and under two: (1) Carjante, W. S. Corsa; (2) Maplegrove Ethel, Singmaster & Sons; (3) Carne, W. S. Corsa; (4) Labelle, Dunham-McLaughlin Co.; (5) Carnona II., W. S. Corsa; (6) Kantry, Anita M. Baldwin; (7) Carlottie, W. S. Corsa.

Section 10—Filly Foals: (1) Cora S., John Secrest; (2) Bess, H. G. Learned.

Section 11—Senior Champion Stallion: Largos, Singmaster & Sons.

Section 12—Reserve Senior Champion Stallion: Matineaux, Dunham-McLaughlin Co.

Section 13—Junior Champion Stallion: Mouton, T. D. McLaughlin Imp. Co.

Section 14—Reserve Junior Champion Stallion: Nobob, Dunham-McLaughlin.

Section 19—Grand Champion Stallion: Labos, Singmaster & Sons.

Section 20—Reserve Grand Champion Stallion: Mouton, T. D. McLaughlin Imp. Co.

Section 31—Champion American-bred Stallion: Mouton, T. D. McLaughlin Imp. Co.

Section 32—Reserve Champion American-bred Stallion: Nobob, Dunham-McLaughlin Co.

Section 33—Champion Stallion Bred by Exhibitor: Keota Jalap, Singmaster & Sons.

Section 34—Reserve Champion Stallion Bred by Exhibitor: Carnarad, W. S. Corsa.

Section 15—Senior Champion Mare, three years old or over: Manon, Anita M. Baldwin.

Section 16—Reserve Senior Champion Mare: Joie, Truman's Pioneer Stud Farm.
Section 17—Junior Champion Mare, under three years: Maplegrove Snowball, Singmaster & Sons.
Section 18—Junior Reserve Champion Mare: Cicely, Anita M. Baldwin.
Section 21—Grand Champion Mare, any age: Maplegrove Snowball, Singmaster & Sons.
Section 22—Reserve Grand Champion Mare: Manon, Anita M. Baldwin.
Section 23—Get of one sire: (1) Get of Jalap (Maplegrove Snowball, Maplegrove Ethel, Keota Jalap), Singmaster & Sons; (2) Get of Carnot (Carnoress, Folito II., Carjante), W. S. Corsa; (3) Get of Fernand (Perseus of Paicines, Perfection of Paicines, Paladin of Paicines), J. D. McLaughlin Imp. Co.; (4) Get of Carnot (Carlothan, Carhall, Carnarad), W. S. Corsa; (5) Get of Godillot Chancellor, Elwood, Superior), A. C. Ruby; (6) Get of Carnot (Carie, Carnona II., Carma), W. S. Corsa; (7) Get of Grondeur (Marie, Como, Comet), C. W. Bowers.
Section 24—Produce of one dam: (1) Produce of Jante Carjante, Carmante), W. S. Corsa; (2) Produce of Fedora (Drusus, Drangiana), E. B. White; (3) Produce of Picot of Paicines (Perseus of Paicines, Perfection of Paicines), J. D. McLaughlin Imp. Co.; (4) Produce of Senora (Como, Comet), C. W. Bowers; (5) Produce of Lancette (Julia, Lola), (6), Produce of Cerise (Thelma, Diligent), A. C. Ruby; (7) Produce of Kate (Patti, Bay Boy), H. G. Learned.
Section 25—Stud (stallion and three mares): (1) Susque, Manon, Oaklawn Queen, Cicely, Anita M. Baldwin; (2) Lagos, Maplegrove Snowball, Meridionale, Menge, Singmaster & Sons; (3) Camarad, Carnoress, Folite II., Carjante, W. S. Corsa; (4) Lucamon, Mabel, Manche, Mediro, (5) Bud, Mancenilla, Mona Maid, Mabel E., James Edson; (6) Benn, Vermouthette, Thelma, Lola, A. C. Ruby; (7) Nero, Comet, Como, Marie, C. W. Bowers.
Section 26—Stud (stallion and three mares, two years old or over, bred by exhibitor): (1) Carlothean, Carness, Folito II., Carnante, W. S. Corsa; (2) Gorner G., Sarah S., Daisy S., Gretchen, John Secrest.
Section 26½—Stud (stallion and three mares, under two years old, bred by exhibitor): (1) Carhall, Carjante, Carnie, Carnona II., W. S. Corsa.
Section 27—Best Five Stallions, any age, owned by exhibitor: (1) Londrecitos, Matineaux, Moscou, Althazar, Nobob, Dunham-McLaughlin Co.; (2) Lagos, Jalap, Majorat, Keota Jalap, Nandou, Singmaster & Sons; (3) Kromwel, Mordu, Perfection of Paicines, Perseus of Paicines, Mouton, T. D. McLaughlin Imp. Co.; (4) Benn, Ingrat, Royal Gray, Elwood, Governor, A. C. Ruby.
Section 28—Best Three Mares, any age, owned by exhibitor: (1) Oaklawn Queen, Manon, Cicely, Anita M. Baldwin; (2) Carneress, Folito II., Carjante, W. S. Corsa; (3) Meridionale, Meringe, Maplegrove Snowball, Singmaster & Sons; (4) Mabel, Manche, Medire, James Edson; (5) Carnona II., Carnie, Carlottie, W. S. Corsa; (6) Comet, Como, Marie, C. W. Bowers; (7) Vermouthette, Lola, Thelma, A. C. Ruby.

JACKS AND JENNETS.

Exhibitors—L. M. Monsees & Sons, Limestone Valley Farm, Smithton, Mo.; H. T. Hineman, Dighton, Kas.; C. W. Blevins, Williams; M. A. Merrill, Willows; Anita M. Baldwin, Los Angeles; Eaton & Hughes, Santa Rosa.

Section 1—Jacks, four years old or over: (1) Kansas Chief, H. T. Hineman; (2) Limestone Monarch, L. M. Monsees & Sons; (3) Jumbo, C. W. Blevins; (4) Frenchy, M. A. Merrill; (5) Johnnie, L. M. Monsees & Sons; (6) Buck II., (7) St. Patrick, H. T. Hineman.

Section 2—Jacks, three years old and under four: (1) Belle Boy of the Grand Champion, (2) Limestone Good Boy, L. M. Monsees & Sons; (3) Klondike, C. W. Blevins.

Section 3—Jacks, two years old and under: (1) Silvertone Mammoth, L. M. Monsees & Sons.

Section 4—Jacks, one year old and under: (1) Sampson, C. W. Blevins; (2) Jordan, H. T. Hineman; (3) Diggs, M. A. Merrill.

Section 5—Jack Foals: (1) Herod, H. T. Hineman.

Section 6—Jennet, four years old and over: (1) Belle of the Grand Champion, (2) Belle of Limestone, L. M. Monsees & Sons; (3) Jennie Flood Jr., M. A. Merrill; (4) Chreepo, C. W. Blevins; (5) Rita Payne, Anita M. Baldwin; (6) Pay Girl, H. T. Hineman; (7) Black Belle, Jr., M. A. Merrill.

Section 7—Jennet, three years old and under four: (1) Gray Nell, C. W. Blevins; (2) Leona, H. T. Hineman; (3) Lady Glen, L. M. Monsees & Sons.

Section 8—Jennet, two years old and under three: (1) Lady Kauffman II., L. M. Monsees & Sons; (2) Black Diana, (3) May, M. A. Merrill; (4) Lady R. II., L. M. Monsees & Sons; (5) Alice, (6) Mary, M. A. Merrill.

Section 9—Jennet, one year old and under two: (1) Lady Penquito, (2) Wonder Girl, L. M. Monsees & Sons; (3) Kansas Queen, (4) Pay Girl II., H. T. Hineman; (5) Starlight Queen III., L. M. Monsees & Sons.

Section 10—Jennet Foals: (1) Princess Yagor, Eaton & Hughes.

Section 11—Senior Champion Jack: Kansas Chief, H. T. Hineman.

Section 12—Reserve Senior Champion Jack: Belle Boy of the Grand Champion, L. M. Monsees & Sons.

Section 13—Junior Champion Jack: Silvertone Mammoth, L. M. Monsees & Sons.

Section 14—Reserve Junior Champion Jack: Sampson, C. W. Blevins.

Section 15—Senior Champion Jennet: Belle of the Grand Champion, L. M. Monsees & Sons.

Section 16—Reserve Senior Champion Jennet: Belle of Limestone, L. M. Monsees & Sons.

Section 17—Junior Champion Jennet: Lady Penquito, L. M. Monsees & Sons.

Section 18—Reserve Junior Champion Jennet: Lady Kauffman II., L. M. Monsees & Sons.

Section 19—Grand Champion Jack: Kansas Chief, H. T. Hineman.

Section 20—Reserve Grand Champion Jack: Silvertone Mammoth, L. M. Monsees & Sons.

Section 21—Grand Champion Jennet: Belle of the Grand Champion, L. M. Monsees & Sons.

Section 22—Reserve Grand Champion Jennet: Lady Penquite, L. M. Monsees & Sons.

Section 23—Get of One Sire: (1) Get of Orphan Boy, Group A (Belle Boy of the Grand Champion, Limestone Good Boy, Belle of the Grand Champion), L. M. Monsees & Sons; (2) Get of Limestone Mammoth (Limestone Monarch, Belle of Limestone, Lady Leo II.), L. M. Monsees & Sons; (3) Get of Frenchy (Jennie Flood, Black Belle Jr., Johnnie), M. A. Merrill; (4) Get of Orphan Boy, Group B (Silvertone Mammoth, Lady Penquite, Lady Kauffman II.), L. M. Monsees & Sons; (5) Get of Pharaoh (Leona, Jordan, Herod), H. T. Hineman; (6) Get of Jumbo (Black Kitt, Diggs, True Rod), C. W. Blevins; (7) Get of Orphan Boy, Group C (Wonder Girl, Lady R. II., Starlight Queen III.), L. M. Monsees & Sons.

Section 24—Produce of one dam: (1) Produce of Belle of Limestone (Belle Boy of the Grand Champion, Belle of the Grand Champion), L. M. Monsees & Sons; (2) Produce of Chreepe (Grey Nell, Sampson), C. W. Blevins; (3) Produce of Starlight Queen (Limestone Good Boy, Starlight Queen II.), L. M. Monsees & Sons; (4) Produce of Jean (Johnnie, Mary), M. A. Merrill; (5) Produce of Pay Girl (Pay Girl II., Herod), H. T. Hineman.

Section 25—Stud (Jack and three Jennets): (1) Belle Boy of the Grand Champion, Belle of Grand Champion II., Belle of Limestone, Lady Penquite, L. M. Monsees & Sons; (2) Kansas Chief, Pay Girl, Leona, Lady Lane, H. T. Hineman; (3) Limestone Monarch, Lady Leo II., Lady Kauffman II., Wonder Girl, L. M. Monsees & Sons; (4) Johnnie, Jennie Flood, Jr., Black Belle, Spot, M. A. Merrill; (5) Limestone Good Boy, Lady Glenn, Starlight Queen II., Lady R. II., L. M. Monsees & Sons.

Section 26—Stud (Jack and three Jennets, all two years old and over, bred by exhibitor): (1) Belle Boy of the Grand Champion, Belle of Grand Champion, Belle of Limestone, Lady Leo II., L. M. Monsees & Sons; (2) Spot, Black Belle, Jennie Flood, Johnnie, M. A. Merrill.

HACKNEYS.

Exhibitors—Woodland Hackney Stud, San Francisco; Chas. E. Bunn, Peoria, Ill.; James Turner, Willow Park, Victoria, B. C.; W. B. Sealey, San Mateo; Geo. A. Heyl, Washington, Ill.

Section 1—Stallion, four years and over: (1) Nipper Jr., Chas. E. Bunn; (2) Feronius, James Turner; (3) Fire Lad, Chas. E. Bunn; (4) Lord Lovelace, Woodland Hackney Stud; (5) Baywood Rufus, W. B. Sealy.

Section 2—Stallion, three years and under four: (1) Delight, Chas. E. Bunn.

Section 4—Mare, four years old or over: (1) Julep, Woodland Hackney Stud; (2) Dinarth Gem, Geo. A. Heyl; (3) Quarina, Chas. E. Bunn; (4) Dinarth Dot, Geo. A. Heyl.

Section 5—Mare, three years and under four: (1) Dinarth Magic, Geo. A. Heyl; (2) Brown Bill, Chas. E. Bunn.

Section 6—Mare, two years and under three: (1) Trillo Magic, Geo. A. Heyl.

Section 7—Champion Stallion: Nipper Jr., Chas. E. Bunn.

Section 8—Reserve Champion Stallion: Delight, Chas. E. Bunn.

Section 9—Champion Mare: Julep, Woodland Hackney Stud.

Great Racing as Grand Circuit Closes

FOURTH DAY AT LEXINGTON.

Lexington, Oct. 7.—Another world's record came home to roost on the fence of Lexington's "billiard table" track at the conclusion of the Tennessee, four heats of which were raced yesterday in 2:02, 2:01¾, 2:03½ and 2:05¼. Napoleon Direct came back today as fresh as a daisy and ended the argument as to which was the best horse of the bunch by lining out a fifth heat in the record time of 2:01½, Walter Cochato being a strong contender and outfooting Peter Stevens. The aggregate time for the five heats eclipsed any previous like performance by a matter of nearly a second, and the reception accorded Geers and his entry was a royal one.

The 2:09 pace, also carried over from yesterday's card, required seven heats in all before Barlight was finally returned the winner. Four horses headed the field to the wire at different times during the event and competition throughout was of a very warm nature, the winner having a tough time today in shaking off Arretta V., Fern Hal and Frank Patch, the Canadian mare being especially troublesome for him in the final heats. The 2:12 pacers caught the fever, also, and Dwight Logan, J. L. Mc. and May Direct indulged in a six-heater before the former could get the decision.

Straight heats were the order of the other events, Peter Scott continuing to trot in the manner that has made him a good investment at thirty thousand dollars, Worthy Prince and Lizzie Brown being the best of the remainder of the field. Mirthful and Lettie Lee took it time about in chasing Ross B. to the wire in the fast trot, but neither of the girls could outfoot him in the stretch. General Todd found the pacing division of the Kentucky futurity a ready money affair, having to go but one heat faster than 2:10. The summary:

Lexington, Oct. 7.—The Tennessee, free-for-all pace, purse $2,000 (first four heats Oct. 6):
Napoleon Direct, ch h by Walter Direct.... (Geers) 1 1 2 4 1
Peter Stevens, b h by Peter the Great.. (Snedeker) 3 4 1 1 3
Walter Cochato, bl h by Cochato.... (Legg) 2 3 3 2 2
Braden Direct and Flower Direct also started.
Time—2:02, 2:01¾, 2:03½, 2:05¼, 2:01½.

2:09 pace, purse $1,000 (four heats Oct. 6):
Barlight, br g by Halburk..... (Mann) 1 2 4 8 2 1 1
Arreta V., ch m by Constenaro..... (Jamison) 2 1 2 2 1 3 4
Fern Hal, bl m by Gold Hal..... (McPherson) 4 9 3 1 3 2 2
Frank Patch, Fred Mac, Birdonna, Hal Mapes, Bingen Pointer, Ben Locanda, Elmer Dickson and Fleeta Dillon also started.
Time—2:06, 2:05½, 2:08, 2:07½, 2:08½, 2:09¼, 2:07¾.

2:12 pace, purse $1,000:
Dwight Logan, br h by Bert Logan.... (Valentine) 8 1 2 6 1 1
J. L. Mc., b g by E. J..... (Wilson) 5 6 1 1 3 2
May Direct, b m by Very Direct..... (Taylor-Fogarty) 1 3 4 5 4 3
Bessie R., Dexter Direct, Lord Seymour, Patrick M., Lady Venus and Red Mike also started.
Time—2:11¼, 2:07½, 2:07, 2:07¾, 2:07¼, 2:08½.

The Transylvania, 2:08 trot, purse $5,000:
Peter Scott, b h by Peter the Great..(Murphy) 1 1 1
Worthy Prince, b h by Prince McKinney (Cox) 2 2 7
Lizzie Brown, b m by The Bondsman..(Valentine) 3 5 2
Peter McCormick, Axtien, St. Frisco, Miss Directed, Lucille Spier, Lou Jennings and Evelyn D. also started.
Time—2:06½, 2:05¼, 2:06¾.

2:07 trot, purse $1,000:
Ross B., b g by Petronius..... (Wright) 1 1
Mirthful, b m by The Star of Patchen.....(Murphy) 3 2
Lettie Lee, b m by Moko..... (White) 2 4
Exall, Hazel Laing, Star Winter, Hyper and Harry J. S. also started.
Time—2:05¾, 2:05¼.

Kentucky Futurity, three-year-old pacers, purse $2,000:
General Todd, b c by George Todd..... (Rea) 1 1
Lady Aubrey, br f by Captain Aubrey..(Snedeker) 2 2
Sad Thoughts, ch f by Bingen..... (Cox) 3 3
Arkancello also started.
Time—2:08, 2:10.

Fifth Day at Lexington.

Lexington, Oct. 8.—Nothing out of the ordinary developed here today, save that the Blue Grass stake was raced in record time for the event, Russell Boy's first heat in 2:03¾ supplanting the 2:04¼ of Frank Bogash Jr. which previously stood as the best performance for the fixture, now in its fourth year. Altawood drove him out in the first mile, before turning over the contender's position to Queen Abbess.

The Colorado Belle disposed of Samoor handily in the Turkey Trot, but the 2:11 trotters put up more of a contest. His Honor, Mayor Shank, and the Prodigal gelding Barney Gibbs took the first two heats like everything was over save spending the money, but ran into a mess of trouble in the third in the shape of the western trotter M. L. J., formerly a member of Walter Breitenfield's stable. Murphy had the mount behind the son of Red Will and after finishing 7-2 sent him to the front for the next three-with Jack K. a consistent second each time. Fair Virginia took the opener in the 2:15 trot but was outfooted and outmannered in the next three by R. F. V., Bertha Carey taking third money over Senaca Boy, while the 2:16 pace was carried over after Charlie C. and Peter Worthy had taken a heat each. The afternoon in detail:

Lexington, Oct. 8.—"Turkey Trot," three-year-old trotters, purse $2,000:
The Colorado Belle, b f by Colorado E....(Serrill) 1 1
Samoor, br c by Sahib..... (Murphy) 2 2
Time—2:19¼, 2:22¾.

Blue grass, 2:10 pace, purse $2,000:
Russell Boy, b h by Rustic Patenter.....(Geers) 1 1 1
Queen Abbess, br m by The Abbe.....(White) 6 2 2
Altawood, gr m by Altonwood.....(Valentine) 2 3 3
Major Ong, The Beaver, Lillian T., Lustrous McKinney, Aconite and The Importer also started.
Time—2:03¾, 2:05¼, 2:04¼.

2:11 trot, purse $1,000:
M. L. J., b g by Red Will.....(Murphy) 7 2 1 1 1
Barney Gibbs, br g by Prodigal....(Shank) 1 1 3 6 4
Jack K., ch g by Silverfinch.....(Gray) 8 6 2 2 2
Lady Grattan, Nancy McGregor, Guy Nella, Nata Prime, F. A. L., Vaster and Sadie Penn also started.
Time—2:10½, 2:09¾, 2:09¾, 2:09¾, 2:10.

2:15 trot, purse $1,000:
R. F. V., br m by Jay McGregor....(Burney) 7 1 1 1
Fair Virginia, bl m by Zombro.....(Cox) 1 8 2 5
Bertha Carey, br m by Zombro.....(DeRyder) 3 6 5 2
Seneca Boy, Victor Star, Strafford, Roy Miller, Tommy DeForest, Ben Gregory and High Cliff also started.
Time—2:10¼, 2:10½, 2:10, 2:10.

2:16 pace, purse $1,000 (unfinished):
Charley C., b g by Coastman.....(Gaston) 1 6
Peter Worthy, b h by Guy Axworthy.....(McGeath) 2 4
Rockline, br g by Inline.....
Admiral Dewey II., Budd Elliott and Clara Walker also started.
Time—2:10¾, 2:10¾.

Sixth Day at Lexington.

Lexington, Oct. 9.—The first week of the closing meeting of the Grand Circuit enjoyed an unbroken run of fair weather, though today was rather cool for record breaking efforts, so cool that Peter Volo's scheduled flight against his record of 2:02 was postponed until a more auspicious occasion. The Dinner Stakes went to Sunloch, the affair being featured only by the slowness of the time, while Peter Worthy annexed first money in the 2:16 pace which was carried over from yesterday.

Earl Jr. gave evidence of his good qualities for the second time this week by taking three in a row in the 2:05 pace after being beaten by Fred Russell in the first heat, the four heats being raced right in the same notch, from 2:04 to 2:04½. Our Colonel was slow to get squared away but was racing well in the latter half of the affair.

Ben White, behind Bacelli, got in a pocket in the first heat of the Kentucky stake for three-year-old trotters and could not get through, Colorado Range winning in 2:08½. In the following miles the Pastime Stable entry kept in the clear and won rather easily in slower time. Alonzo McDonald and Ames Albingen, making their second bow to a blue grass audience, for the present meeting, straight-heated the 2:18 trotters without fracturing their former winrace record. The summary:

Lexington, Oct. 9.—Dinner Stakes, two-year-old trotters, sweepstakes $3,000:
Sunloch, b c by Sahib.....(Murphy) 1 1
Ettie Dillon, ch f by Dillon Axworthy.....(Terrell) 2 2
Time—2:30½, 2:31½.

2:16 pace, purse $1,000 (first two heats Oct. 8):
Peter Worthy, b h by Guy Axworthy..(Murphy) 5 1 1
Charlie C., b g by Coastman.....(Gaston) 1 5 2
Admiral Dewey II., bl h by Admiral Dewey (Wilson) 4 2 3
Rockline, Budd Elliott and Clara Walker also started.
Time—2:10¾, 2:10¾, 2:09¾.

2:05 pace, purse $1,000:
Earl Jr., gr g by The Earl.....(Cox) 2 1 1 1
Fred Russell, b g by Little Frank.....(Harsey) 1 3 8 7
Our Colonel, ch h by Colonel Cochran (Childs) 9 8 2 2
R. H. Brett, Rastus, Columbia Fire, Little Prince, Polly and Peter Nash also started.
Time—2:04, 2:04½, 2:04, 2:04½.

The Kentucky, three-year-old trotters, purse $2,000:
Bacelli, b c by Bertini.....(White) 4 1 1
Colorado Range, b c by Colorado E...(McDonald) 1 3 3
Deroche, ch c by John A. McKerron.....(Geers) 2 4 2
Allie Watts, Native Spirit, Bondella, The Royal Knight, The Exposer, Peter Belmont, Geo. N. Patterson and Petress Burton also started.
Time—2:08½, 2:10¼, 2:11.

2:18 trot, purse $1,000:
Ames Albingen, b h by Albingen....(McDonald) 1 1 1
Judge Jones, br g by Prodigal.....(Geers) 2 3 2
Ruby Watts, b h by General Watts.....(Wright) 3 2 4
Wilkes Brewer, Jeannette Speed and Durin also started.
Time—2:09½, 2:10½, 2:10.

Seventh Day at Lexington.

Lexington, Oct. 11.—For the first time in some weeks Peter Scott dropped a heat here today, Axtien leading the field in the opening heat of the Walnut Hall cup.. The performance merely delayed the result, however, as Murphy's big trotter came back to

win on out without interruption, Axtien trotting an excellent second throughout the last three heats. With Volga in the barn, "Chan" and Bingen Silk made quick work of the two-year-old trotters in the Lexington stake, Harrods Creek and Adele Block trotting second and third, respectively, in each heat. The time was not fast, but creditable.

The 2:08 pacers furnished the most speed of the day, lining out four heats from 2:04¼ to 2:05¾, with Auto Zombro going the most consistent race and having the best of the final argument. Both Lustrous McKinney and Billy Brino showed plenty of speed, but lacked the steady consistency that won for the Zombro horse.

"Zombros" were again in evidence in the 2:14 trot when Bertha Carey and Fair Virginia trotted one-two throughout the race, the former cutting her winrace record to 2:07¾. The MacKenzie mare has not been at her best this season but has rounded into excellent shape at present. Peter Volo made an unsuccessful attempt to lower his record, his mile being on the wrong side of the mark by three-quarters of a second. The summary:

Lexington, Oct. 11.—The Lexington, two-year-old trotters, purse $2,000:

Bingen Silk, b c by Bingen.....(Chandler)	1	1		
Harrods Creek, ch c by Gen. Watts.....(Engleman)	2	2		
Adele Block, br f by J. Malcolm Forbes..(McDonald)	3	3		

Time—2:14¾, 2:14½.

2:08 pace, purse $1,000:

Auto Zombro, b h by Zombro.....(Loomis)	1	2	1	1
Lustrous McKinney, b g by McKinney(Rodney)	7	1	4	4
Billy Brino, b h by Wildbrino.....(V. Fleming)	2	3	7	2

Princess Margaret, Baron A., Margot Hal, Fern Hal, Tommy D., Madam Mac, Homer Baughman, Birdonna and Fleeta Dillon also started.

Time—2:04¼, 2:04¼, 2:04¾, 2:05¾.

Walnut Hall Cup, 2:12 trot, purse $3,000:

Peter Scott, b h by Peter the Great (Murphy)	4	1	1	1
Axtien, ch h by Axworthy.....(Harris)	1	2	2	2
Lettie Lee, br m by Moko.....(White)	2	3	7	7

Worthy Prince, Evelyn D., McCloskey, Lou Jennings, Nathan Axworthy and Sadie S. also started.

Time—2:06¼, 2:05¾, 2:06¾, 2:07¼.

2:14 trot, purse $1,000:

Bertha Carey, br m by Zombro.....(DeRyder)	1	1	1	
Fair Virginia, bl m by Zombro.....(Cox)	2	2	2	
Roy Miller, b h by Bingara.....(Grady)	3	3	3	

Para Belle, Tommy DeForrest and Rose D. also started.

Time—2:08¾, 2:07¾, 2:10¾.

Eighth Day at Lexington.

Lexington, Oct. 12.—When Rodney J. MacKenzie dropped into the visitors list at Columbus after several strenuous months in the Canadian Northern's territory across the border he very promptly began "stirring up something," the original cause of the ensuing hostilities being a harmless and innocent remark to the effect that in his judgment Hal Boy would beat Judge Ormonde in a two-horse race. This opinion was reiterated in the presence of Benton Pardee, owner of the black stallion, and as Mr. Pardee and Charley Valentine were contrary minded a weighty discussion ensued. Stoughton Fletcher, who is anything but a spoil sport, turned Hal Boy and Richard McMahon over to Mr. MacKenzie with permission to go as far as he liked. Then ensued a continuation of the preliminary skirmish, the results being that Messrs. MacKenzie and Pardee posted $200 each forfeit money for a match between Hal Boy and Judge Ormonde to take place at Lexington, later placing $5,000 each in the hands of Frank G. Jones of Stockton, as stakeholder.

Tonight the Hal Boy forces are celebrating and everyone in attendance at today's races is thanking Messrs. MacKenzie, Fletcher, Pardee, McMahon and Valentine for providing one of the best contests ever staged here—a two horse match that was a race from start to finish. Hal Boy went out to win the first heat in 2:01¼ by a length but in the second Valentine sent the Judge to the front to the final eighth, where Hal Boy collared him and beat him by a head. In the third the whirlwind finish was so close that only the judges were in position to determine the winner, the black horse being their choice. The Judge opened up an early lead of two lengths in the fourth heat and maintained it into the stretch, where Hay Boy began creeping up. At the distance the pair were on even terms, and under the whip, answering the demands made upon them like the true gamecocks they are, they came head-on to the wire, Hal Boy winning by a scant margin.

Valentine rode in front in the 2:08 trot in one-two-three order with Lizzie Brown, the good daughter of The Bondsman trotting to a new record of 2:05¾ in the second heat, repeating impressively in the third. Ed Geers, suddenly remembering the near approach of winter, became very saving and won the balance of the day's offerings in straight heats, the 2:12 trot with St. Frisco, the three-year-old trot with Deroche, and the 2:01 pace with Napoleon Direct, the chestnut fellow stepping both miles in 2:00¾. The glad hand given him by today's crowd will linger long in Marse Ed's memory, as everyone was for him, apparently.

Sayde Densmore broke the tie for championship honors among the four-year-old pacing fillies by cutting a new set of figures in the Lexington track fence, 2:02, which is some distance removed from 2:05¾. The details:

Lexington, Oct. 12.—Special pace, match, $10,000 ($5,000 a side):

Hal Boy, b g by Hal B.....(McMahon)	1	1	2	1
Judge Ormonde, bl h by Ormonde..(Valentine)	2	2	1	2

Time—2:01¼, 2:02¾, 2:04¼, 2:04.

The Walnut Hall, 2:12 trot, purse $2,000:

St. Frisco, b h by San Francisco.....(Geers)	1	1	1	
Lassmore Lad, b g by Master Bo.....(McDonald)	3	2	2	
Slip Past, b m by E. M. R.....(Taylor)	2	3	3	

Lee Blossom, Princess Margrave, Todd McGregor, Tommy Todd, Bida and Alert also started.

Time—2:08, 2:08¼, 2:07¾.

2:08 trot, purse $1,000:

Lizzie Brown, b m by The Bondsman (Valentine)	1	1	1	
Harry J. S., bl h by Admiral Dewey.....(Tyson)	2	2	3	
Duchess, ro m by Allerteen.....(McDonald)	3	4	2	

Exall, The Guide, Wilgo and Hazel Laing also started.

Time—2:07¾, 2:05¾, 2:05¾.

2:01 pace, purse $1,200:

Napoleon Direct, ch h by Walter Direct.....(Geers)	1	1	
Peter Stevens, b h by Peter the Great..(Snedeker)	2	2	
Braden Direct, bl h by Baron Direct.....(Egan)	3	3	
Walter Cochato, bl h by Cochato.....(Legg)	4	4	

Time—2:00¾, 2:00¾.

Three-year-old trot, purse $1,000:

Deroche, ch c by John A. McKerron.....(Geers)	1	1	
Native Spirit, b f by Native King.....(Cox)	2	2	
The Colorado Belle, b f by Colorado E.....(Serrill)	4	3	

Allie Watts, The Exposer, Florence White and George N. Patterson also started.

Time—2:08¾, 2:08¾.

Ninth Day at Lexington.

Lexington, Oct. 13.—Single G., the Hoosier sidewheeler owned by Dr. W. G. Barefoot of Cambridge City and campaigned by Curt Gosnell, annexed the feature race of today's card at the Kentucky Trots, the Cumberland stake for 2:05 pacers of June first. Fay Richmond, teamed by Gosnell's friend and neighbor, Harrie Jones of Rushville, forced the Chamber of Commerce winner to pace to a new record of 2:02¾ in the first heat, while Queen Abbess drove him out in the next two in 2:03½ and 2:03, the contest being a good one throughout.

Ames Albingen, whose habit of winning has become very discouraging to some folks, retired the 2:20 trotters in short order, Truesada and Idora Worthy dividing the next moneys on a tie. Vance Nuckols teamed two winners, the chestnut horse Peter Billiken and the two-year-old colt General Yorke, the latter being the only one to let a heat get away from him. Suldine, driven by Ed Geers, took the first heat of the baby event in 2:13, with the General Watts colt third, the Considine youngsters driving out Nuckols' mount in 2:11½ in the second. The summaries:

Lexington, Oct. 13.—Cumberland Stake, 2:05 pace, purse $2,000:

Single G., b h by Anderson Wilkes.....(Gosnell)	1	1	1	
Queen Abbess, b m by The Abbe.....(White)	3	2	2	
Fay Richmond, gr g by New Richmond...(Jones)	2	4	3	

Columbia Fire, Our Colonel, Major Ong, Beth Clark and Jaystone also started.

Time—2:02¾, 2:03½, 2:03.

2:20 trot, purse $1,000:

Ames Albingen, b h by Albingen.....(McDonald)	1	1	1	
*Truesada, b m by Moko.....(Cox)	4	3	2	
*Idora Worthy, b m by Guy Axworthy...(Rodney)	3	2	4	

Great Governor, Ruby Watts, Harry Porter and Durin also started.

*Divided second and third moneys.

Time—2:07¾, 2:09¼, 2:09½.

2:12 trot, purse $1,000:

Peter Billiken, ch h by Peter the Great (Nuckols)	1	1	1	
Lottie Simmons, br m by George Simmons (Toll)	6	3	2	
Bertha Carey, br m by Zombro.....(DeRyder)	8	2	3	

Barney Gibbs, F. A. L., Fair Virginia, Victor Star and Alice McGregor also started.

Time—2:07¾, 2:07¼, 2:07½.

Two-year-old trot:

General Yorke, b c by General Watts..(Nuckols)	3	1	1	
Suldine, b c by Worthy McKinney.....(Geers)	1	2	3	
Forest B., b c.....(Rutterbach)	2	3	2	

Time—2:13, 2:11½, 2:13½.

Tenth Day at Lexington.

Lexington, Oct. 14.—Margaret Druien, who has been the boss of the fast trotting classes this season, was given a taste of defeat today when she met Ross B., the gelded son of Petronius winning the second and third heats handily after Margaret had taken the opener. Axtien, Sam Harris' good stallion that is booked for the trip to the exposition trots and Phoenix, showed good form in his event, trotting three winning heats in nice time over Guy Nella and Abu Taleb.

The 2:10 pace was split into two divisions, of which only the first was finished, six heats being required for a decision. Barlight took the first pair and then gave way to Fred Mack, who lasted just long enough to win the third round. In the meantime, Loomis and Hal Mapes had been "finding themselves" and came to the front for the next three, Barlight making a game but unsuccessful struggle in the final heats. In the second division May Direct and Patrick M. had a heat each when the race was carried over.

J. B. Chandler drove Bingen Silk to the season record of 2:08¾ for two-year-old trotting colts, while Walter Cox sent Sad Thoughts out for the season mark of 2:06½ for three-year-old pacing fillies. Peter Volo equaled his former record of 2:02, going to the three-quarters in 1:30¼ but tiring on the way home. The summaries:

Lexington, Oct. 14.—2:12 trot, purse $1,000:

Axtien, ch h by Axworthy.....(Harris)	1	1	1	
Guy Nella, br m by Guy Axworthy.....(Geers)	2	2	2	
Abu Taleb, br g by George A. Fuller.....(Loomis)	4	2	6	

Slip Past, Nancy McGregor, Vaster also started.

Time—2:07¾, 2:09½, 2:07¼.

2:10 pace, purse $1,000, first division:

Hal Mapes, br g by Direct Hal.(Loomis)	7	4	7	1	1	1	
Barlight, br g by Halburk.....(Mann)	1	1	3	7	2	2	
Fred Mack, br g.....(Glasscock)	6	5	1	5	3	3	

Spring Maid, Dexter Direct, Dwight Logan, Aretta V., Homer Baughman also started.

Time—2:07¾, 2:04¾, 2:04¾, 2:07¾, 2:12, 2:13¼.

2:04 trot, purse $1,200:

Ross B., b g by Petronius.....(Wright)	2	1	1
Margaret Druien, b m by Peter the Great..(Cox)	1	3	2
Joan, b m by Directum Spier.....(McDevitt)	3	2	4
Maymack, b m by Arthur Wilkes.....(DeRyder)	4	4	3

Time—2:05¾, 2:04½, 2:05½.

2:10 pace, purse $1,000 (unfinished), second division:

May Direct, b m by Very Direct.....(Taylor)	1	2	
Patrick M., br g by Norbells.....(Valentine)	6	1	
Fern Hal, bl m by Gold Hal.....(McPherson)	2	3	

Bessie R., Goldie C., Comet, Clara Walker, Elmer Dickson, The Importer also started.

Time—2:05½, 2:04¾.

Starting payments in the Occident stake have been made by the owners of half a dozen good young trotters.

LITTLE BERNICE SHOWS EXCELLENT FORM

Vera Hal may have a very dangerous rival for the title of Stadium Queen in the near future if Jack Welsh's brown mare, Little Bernice, continues to improve, as the form displayed Sunday by the daughter of Del Coronado and Pearl Pointer was of a high order, a reminder of the days when she was racing second to William in record time as a three-year-old. She had a tough time as a four-year-old and has been slow in coming into shape, but on Sunday was in form from both standpoints, speed and behavior. Happy Dentist, hero of the fast class at the previous matinee, took the free-for-allers away nicely bunched and led them into the stretch, where Dick W. worked his way to the front in response to a call from Ottinger that promised a win. However, Dick's calculations failed to include Bernice, who kept her feet under stiff drive and breezed under the wire a winner in 2:08½, going on in the second to win all the way in 2:07½. A meeting between Vera Hal and Little Bernice, with both of them "at themselves," would be a good drawing card for the closing days of the matinee season.

Adolph Ottinger, well "fed up" on dust in the fast pace, had things all his own way in the free-for-all trot, Agnes Carter again showing nice trotting qualities by stepping one mile in 2:13. Francis S. had no trouble in outranking Matawan, but neither were able to make Agnes stretch her neck to win. Lucia S., Ed Strain's other matinee mare, was a nice winner in the 2:12 pace, the second heat of which went to the three-year-old filly Greatness, who has been benefitted by a rest and a number of changes in hitch and shoeing and is now being shaped up to fill her November futurity engagements.

Victor Pointer was the boss of the 2:15 pacers and Kinney Lou Jr. took the slow mixed event after dropping the first heat to Ateka, Lassie M. trotting a good second in each heat for M. M. Bates. The summary:

2:15 pace:

Victor Pointer.....(D. W. Keating)	1			
Rosey O.....(J. J. Ryan)	2			
Senator H.....(Joe Kidd)	4			
Cookie.....(J. Vermet)	3			

Time—2:15, 2:18.

2:12 pace:

Lucia S.....(J. E. Strain)	1	4	1	
Greatness.....(E. Cerciat)	4	1		
Emma M.....(William Malough)	2	2		
King Pointer.....(H. Campodonico)	3	3		

Time—2:13, 2:15¼, 2:14.

Free-for-all pace:

Little Bernice.....(J. C. Welsh)	1	1		
Happy Dentist.....(Fred Lauterwasser Jr)	3	2		
Dick W.....(A. Ottinger)	2	3		
Bradmont.....(G. J. Giannini)	4	4		

Time—2:08½, 2:07½.

Free-for-all trot:

Agnes Carter.....(A. Ottinger)	1	1		
Francis S.....(J. E. Strain)	2	2		
Matawan.....(H. Cohen)	3	3		

Time—2:13, 2:15.

2:20 mixed:

Kinney Lou, Jr.....(Frank Burton)	3	1	1	
Ateka.....(B. Cohen)	1	3	3	
Lassie M.....(M. M. Bates)	2	2	2	

Time—2:22, 2:20, 2:18½.

DEATH CLAIMS OLIVER J. MISNER.

Horsemen throughout the Pacific coast states will will learn with regret of the death of Oliver J. Misner, which occurred some days ago in this city. Mr. Misner was a young man well and favorably known in trotting horse circles, and was the son of the veteran trainer and campaigner, Daniel R. Misner, who has been a familiar figure on coast tracks many years. Oliver was likeable and capable, quiet and unassuming, and an excellent man with a horse, having been his father's right hand man in recent training operations. He is missed by a wide circle of friends, whose warmest sympathies are extended to the surviving members of the family.

FUN DRIVERS AT PETALUMA TOMORROW.

There will be no matinee at the Stadium tomorrow afternoon, as the amateur teamsters are combining to give Petaluma horse lovers a chance to see some nice racing, a card of five events being prepared to be contested in the chicken city Sunday afternoon under the auspices of the San Francisco-California Driving Club. Quite a number of the local speeders will be present, and for company will have good performers from Petaluma, Santa Rosa and Marysville. J. J. Ryan has been chosen to do the starting, the fields being made up as follows:

2:18 pace: Sara C., Sam Norris; Victor Pointer, D. W. Keating; Greatness, E. Cerciat; King Pointer, H. Campodonico; Mabel Dillon, B. Cohen; Nutwood Demonio, John Grimes; Tom Murphy, George Silva; Jack, McDonnell & Conlan.

Free-for-all trot: Birdeye, A. Combatalade; Pfester's Linwood, J. Compton; St. Patrick, J. Holland; Kinney Lou Jr., Frank Burton; Francis S., J. E. Strain.

Free-for-all pace: Lucia S., J. E. Strain; Happy Dentist, F. P. Lauterwasser Jr.; W. J. K., W. J. Kenny; Little Bernice, J. C. Welsh; Dick W., A. Ottinger.

2:20 mixed: Linnie C., J. Compton; Tramp, John Grimes; Rose O., J. J. Ryan; Cookey, Joe Vermet; Peaches, Dan McGovern; The Potrero, Tobe Mitchel; Ateka, B. Cohen.

Special for Petaluma road horses: Ike M., Dan McGovern; Springtime, Jack Grimes; Alameda Maiden, A. Dolcini; Billy, T. R. Healey; Silver Logan, Dan Healey.

NOTES and NEWS

Hal Boy 2:01¼.
St. Frisco 2:07¾.
Sayde Densmore (4) 2:02.
Lizzie Brown 2:05¾—twice.
Napoleon Direct 2:00¾—also twice.
Tuesday must have been an off day at Lexington.
Ed Geers had more bad luck that very afternoon.
The best he could do was to win three races out of the four he had entries in.

◈◈◈

Napoleon Direct's fifth heat in 2:01½ makes Russell Boy's like mile in 2:03¼ look like a nice buggy ride for an elderly lady enroute home with a "settin" of eggs.

◈◈◈

Charley DeRyder, Homer Rutherford, the Shulers, father and son, Tommy Murphy, Samuel Harris, Will Fleming and a number of others are expected to register at Pleasanton in the immediate future.

◈◈◈

The Riverside fair was a success from every standpoint, much to the gratification of its promoters, its patrons, and its visitors. California could use about fifteen or twenty like it to most excellent advantage.

◈◈◈

Peter Scott dropped the first heat of the Walnut Hall cup to Axtien and then put it over him three in a row. They meet again here in November, and the Axworthy horse is also entered at Phoenix.

◈◈◈

The Zombro family was very much in evidence Monday at Lexington, Bertha Carey and Fair Virginia trotting first and second in the 2:14 trot and Auto Zombro taking the 2:08 pace in fast time.

◈◈◈

The Grand Circuit curtain is being rung down for the season this afternoon at Lexington and the boys are loading out for San Francisco at once. The returning home folks and the visitors will all be accorded hearty welcomes.

◈◈◈

October 22—next Friday—is the day for making starting payments in all divisions of the colt stakes, save the Occident, that are to be raced here in November. Don't overlook your entries, as carelessness might cost you money.

◈◈◈

The Baileys arrived home at Pleasanton last week, healthy and happy after a session with the Grand Circuiters down east, having had a pleasant summer in spite of the fact that the horses ran into a bunch of bad luck.

◈◈◈

Luana 2:16¼ trotting and Baxter Lou 2:14¼ pacing are a nice pair of new performers by Kinney Lou 2:07¾. They are the property of Lou Taylor, now living at Hemet, and were developed by him from infancy. Both were good winners at Riverside last week.

◈◈◈

Vera Hal 2:05, halfmile track record 2:06¾, is some wolf on the twice arounds, as only a high class mare could do what she did last week—administer two trimmings to White Sox and pace five winning heats from 2:06¾ to 2:07¾. Beating a combination like Sox and W. G. Durfee and incidentally equaling world's records in so doing are not stunts to be achieved by anything but a real racehorse.

◈◈◈

John W. Considine has spent several days of late at Woodland Stock Farm and here in San Francisco, transacting various business matters and receiving congratulations concerning the great showing made by the Prince Ansel yearlings in Kentucky. He wears a smile that tells its own story—that he is well pleased and that he also has more of the same kind at the farm.

◈◈◈

Lon McDonald, driver of Colorado Range 2:09½, that finished third in the Horseman Futurity at Columbus last week, has protested the payment of second money to Humfast on the ground that Thos. W. Murphy, who drove the filly, controlled two horses in the race, which is forbidden by the rules. Bondella, that finished out of the money, is a member of the Murphy stable and Humfast was purchased on Tuesday. The amount involved is $2,900, and the money will be tied up until the board of review meeting in December.—Horse World.

◈◈◈

Budd Davis of Caldwell, Idaho, is the latest addition to the list of consignors to the DeRyder sale, to be held here in San Francisco during the fall meeting at the exposition, Mr. Davis sending three nice young things from producing lines of breeding. Glancing over the MacKenzie consignment makes one think that "Spriggan bargains" will be in evidence all right, as there are some very high class prospects included in that offering—especially the mare by The Harvester 2:01 and the bey gelding The Earnest The owner's statement concerning them is similar to the one that went with Spriggan 2:08¼—and you know how well that one has been substantiated by subsequent events. Watch for the announcement of the date and location of sale, and keep posted on the offerings through the ad.

Bertha Carey 2:07¾.
Governor Mason 2:08¼.
Both winrace records at Lexington.
The former has a chance to win some more coin for Charley DeRyder at the exposition trots.

◈◈◈

Yes, eastern folks must like the Prince Ansels, from the way they sold at Lexington.

◈◈◈

Quite a number of California stables will take in the fair at Phoenix after the P.-P. I. E. meeting closes, Charley DeRyder being about the only one of the regular visitors who failed to make entries there.

◈◈◈

The catalog for the Woodland Stock Farm sale, Oct. 25, is in the hands of the printer and will be ready for mailing early next week. Get your application in early, to the farm, this office, or Auctioneer Wm. Higginbottom, this city.

◈◈◈

Bob Smith is arranging to visit the Chicago Horse Sale, December 13 to 18, with a goodly representation of California trotters and pacers, and is getting quite a number ready for the ring at Los Angeles. Another shipment will be assembled here in San Francisco, and Mr. Smith, whose address is 1216 Dewey Avenue, Los Angeles, will be pleased to hear from any and all horsemen who have the right kind of surplus stock to dispose of and wish to patronize the Chicago sale. No advance money is required for shipment, and the eastern market for really high class horses is in a healthy condition.

◈◈◈

The former California record for pacers on halfmile track—2:08¼—was treated very disrespectfully at Riverside by White Sox and Vera Hal in both their meetings. Sox set a new record of 2:07 in the first heat of the first meeting, then Vera clipped a quarter-second from it and came back in 2:07, equaling the world's record for a third heat by a pacing mare on a halfmile track, made some years ago at Streator, Illinois, by The Broncho. The aggregate time of the two races are also the same, with the difference that The Broncho won all three heats. In the second meeting between Sox and Vera the latter won in straight heats in 2:07¾, 2:07¼, 2:07¼.

◈◈◈

The Indianapolis trotter, Peter McCormick 2:05½, owned by V. L. Shuler of the Indiana capital, trotted a remarkable race in the $3,000 stake for 2:09 trotters on Tuesday afternoon, considering that he had not been a mile better than 2:15 since the Grand Circuit meeting at Grank Rapids. The big son of Peter the Great 2:07¼ went a bit wrong at the meeting at the Furniture City and was shipped home. Shuler has been bringing him along slowly and when he shipped to Columbus, did not figure that Peter would be up to any such race as he trotted. Lawrence Shuler, for the first time behind Peter McCormick in a race, piloted the big trotter in a masterful manner. In all of the five heats, Peter was right in the thickest of the fray, and in the third round headed the bunch to the wire in 2:09½.—Western Horseman.

◈◈◈

The late Major DuBois used to say that the drivers are the men who alone give added values to race horses and make them worth while for breeding purposes. It is said Hamburg Belle cost John E. Madden $5,000, but Andrews made her worth $50,000. The late August Uhlein paid $9,000 for The Harvester, but Ed Geers made the horse worth $50,000. What Tommy Murphy did with Peter Volo is on record and had it not been for Walter Cox, the owner of Peter Scott would not get $30,000 for his horse; nor the owner of Allen Winter $50,000 had not McDonald handled him and won $30,000 in the Readville handicap. Dexter sold for $400 in Orange county, New York, but Budd Doble made him worth $33,000 to Robert Bonner and had it not been for the same driver, Goldsmith Maid would not have won $365,000. It was Johnny Splan who made the off-bred gelding Rarus a $30,000 horse. The trouble is the driver is hardly ever considered and if a race horse proves to be a plug and cannot win, it has a bad driver, but if it develops into a champion all honors go to the breeder and wealthy owner.—Field and Farm.

PRINCE ANSEL YEARLINGS SELL WELL AT LEXINGTON.

Telegraphic advices from Lexington bear the welcome news that California bred yearlings from Woodland Stock Farm, all by Prince Ansel, were the stellar attractions at the sales of harness horses held during the progress of the present Grand Circuit meeting. Billy Marvin, of William 1:58½ fame, paid $610, the top price of the sale, for the filly Verbena Ansel (1) 2:22, whose recent performances of a championship nature have been widely heralded, while the other yearling champ, Anselot (1) 2:28½, the first yearling gelding to achieve a standard record, brought $535. Edna Ansel, out of Edna Saunders by Axworthy (3) 2:15½, sold for $235, so the eastern folks evidently have a well developed respect for the Woodland babies.

The sales are of especial interest at this moment, as horse fanciers will have an opportunity to bid on Prince Ansels of equal quality at the forthcoming sale at the Considine establishment on Monday, October 25. The dams of these youngsters are in the sale, one with a Prince Ansel foal at foot, along with many others. The catalog will be ready next week and can be had for the asking.

STARTERS FOR THE OCCIDENT STAKES.

The first of the events for three-year-old trotters to be raced at the exposition meeting is the Occident Stake, which will be contested on San Francisco day, Nov. 2, along with the big $20,000 stake for 2:10 trotters and the $2,000 class race for 2:12 pacers. Some spirited contests have marked the racing of the Occident in former years, and no doubt this number of the same will be of a similar character. Starting payments fell due some days ago and Secretary C. W. Paine has issued the following roster of those eligible to start, an even half-dozen:

Zomvellyn B., b c by El Zombro—Evelyn B. by Prince Ansel; Miss Elizabeth King Livermore, San Francisco.

Helen Belle, b f by Carlokin—Carolyn C. by Axtell; W. G. Durfee, Los Angeles.

Allie Lou, br f by Kinney Lou—Lady Zombro by Zombro; Hemet Stock Farm, Hemet.

Carl, bl c by Carlokin—My Irene S. by Petigru C. J. Berry, San Francisco.

May Alto, b f by Alto Express—Maymonio by Demonio; Rodman & Hoy, Woodland.

Byron, bl c by Tom Moko—Reta H. by McKinney Wm. Loftus, Whittier.

NEW AYRSHIRE CHAMPION.

Lily of Willowmoor 22269, bred and owned by J. W. Clise, Redmond, Washington, has just finished her fifth consecutive official record for advanced registry, making a cumulative record of 84,991 lbs. of milk, and 3,362.35 lbs. of fat with 3.84% fat average for the five years, making her the five-year champion of the breed.

This record is worthy of study, in that it shows to a remarkable degree the staying quality of the Ayrshire cow, giving an average of 16,991 lbs. of milk and 672.47 lbs. of fat for five years. She now stands in first place as a long term cow.

She is due to freshen October 12th, and had she not been bred to calve within the cumulative requirement she would undoubtedly have again led the world's Ayrshire record for a single year, as her record under these conditions is only 426 lbs. of milk less than the present record of the world's champion Ayrshire for milk and is 37.96 lbs. more fat.

The record is valuable as showing the constitution necessary to give a remarkable milk and butter-fat record, with a calf each year for five consecutive years.

To give that amount of milk annually and raise a calf each year, a cow must have constitution, which is characteristic of the Ayrshire breed.

DAVID WEST IN NEW LOCATION.

For the last several days J. David West, the horse haberdasher, has been greeting old customers in a new store, the location of the business having been transferred from the old stand on Golden Gate avenue to 1018 Fillmore street, in the same neighborhood. "Sell" horse goods and other standard lines of horse and stable accessories and the best proven veterinary remedies are on hand in full stocks, as well as a wide assortment of other leather goods and novelties. Don't forget the new address.

CATTLE SHOW AFFECTED BY QUARANTINE.

The cattle show to be held by the Panama-Pacific International Exposition at San Francisco will be a distictively western cattle show. There will be no animals exhibited from any of the states east of the Mississippi river.

This condition is the result of the fear on the part of the California State Veterinarian that the recurrence of the foot and mouth disease in Illinois might spread to other states. As a consequence, the State Veterinarian has placed a quarantine on all cattle from states east of the Mississippi and also from Minnesota, Iowa, Missouri, Kansas and Montana. But this will leave the cattle herds of Arizona, New Mexica, Colorado, Nebraska, Washington, Oregon, Oklahoma, Texas, Nevada, California, the Dakotas, Idaho and Wyoming from which to draw, and the accommodations of the exposition's live stock department will be fairly filled even with the loss due to the quarantine. The beef cattle show will be small but the dairy cattle display will be commensurate with a world's exposition.

The show will be held from October 18 to November 1, stock being received October 15. In spite of the quarantine, which nullified a large number of entries, there remain from free territory 162 beef and 592 dairy cattle, a total of 754, of the original entries, to which new entries from western breeders, to whom the date of closing entries was extended, have been added. The total cattle entries before the quarantine was put into effect was 1,668 head.

American thoroughbred fanciers who wish to take advantage of the depression in English racing circles to recruit their stables will find all information concerning British bloodstock gladly furnished them upon application to the Irish Bloodstock Agency, Coyle & Co., Ltd., at 7 Anglesea St., Dublin, Ireland. They are in every way responsible and capable, with a long record to vouch for them, and have at all time listings of the salable material of the leading studs of the empire.

Entries for the Arizona State Fair

While a few of the thousand dollar events at Phoenix failed to fill and have been canceled, the majority of the purses not only filled but filled well, the entrants being sufficient both in quality and number to insure some very good sport during the week of November 15 to 20. The classes failing to receive sufficient patronage to justify them being raced are the 2:07 and 2:10 pace and the 2:07 and free-for-all trot. In the light of the fact that this has been an off year for fairs and racing in this section on account of the exposition, the Arizona association might have fared far worse, and then, too, there were other adverse circumstances that had to be faced. The rearrangement of dates to avoid conflict with the P.-P. I. E. meeting, the defection of Dallas from the Great Western Circuit, the reduction of purses, and most especially the late date at which the Arizona commission made up their minds what to do have all handicapped Secretary Shaughnessy in his efforts to get the horsemen there. Then, too, there are fewer eastern horsemen entered here at the exposition than was anticipatd, and a number from whom entries may have been feared by others were not received, working a double hardship on the Phoenix folks. Tommy Murphy did not enter, but a number of the smaller strings from the east will make Phoenix with some mighty good horses, and the Californians will be on deck as usual, with the exception of Charley DeRyder.

The classes declared filled and the entries therein are as follows:

2:18 Trot, Purse $1,000.00:

Kildare, blk g by Zombro, Dr. J. G. Belt, Phoenix; Highland C. Jr., bl g by Highland C., and Pinewood, b h by Lijero, Pinewood Farm, Flagstaff; Gypsie Boy, b g by Dr. Clark, J. R. Lambert, Phoenix; Naboth Jr., ch g by unknown, E. S. McEuen, Tucson; Zona B., br m by Zolock, Mrs. A. W. Sydnor, Globe; Meridian Jr., bl g by Meridian, Victor Holding, Safford; Sadie View, br m by Direct View, Louis Sands, Glendale; Delfino, blk m by Oh So, Albert Lopez, Sonora; Columbia T., b m by Gon Guy, C. F. Silva, Sacramento; Larry T., b g by Larry Kinney, Mrs. A. F. Pecklo, Corona; The Lark, b m by Carlokin, and Helen Belle, b m by Carlokin, W. G. Durfee, Los Angeles.

2:12 Trot, Purse $1,000.00:

Highland C. Jr., blk g by Highland C., and Pinewood, b h by Lijero, Pinewood Farm, Flagstaff; Bill Jones, b g by Derby Mac, J. N. Jones, Stockton; The Proof, b h by The Exponent, C. A. Spencer, Pleasanton; Aubrey O., b g by Captain Aubrey, Frank J. Butler, Trenton; Zona B., br m by Zolock, A. W. Sydnor, Globe; Sadie View, br m by Direct View, Louis Sands, Glendale; Axtien, ch h by Axworthy, Samuel Harris, Plymouth; Mabel Van, b m by On Stanley, and Larry T., b g by Larry Kinney, Mrs. A. F. Pecklo, Corona; The Lark, b m by Carlokin, Virginia Barnette, b m by Moko, and Sargo, b g by Keeler, W. G. Durfee, Los Angeles; Peter McCormick, br h by Peter the Great, V. L. & Laurence Shuler, Pleasanton; Seneca Boy, ch g by King Entertainer, E. J. Rochon, Winnipeg.

2:09 Trot, Purse $1,000.00:

Bill Jones, b g by Derby Mac, J. N. Jones, Stockton; The Proof, b h by The Exponent, C. A. Spencer, Pleasanton; Aubrey O., b g by Captain Aubrey, Frank J. Butler, Trenton; Zona B., br m by Zolock, A. W. Sydnor, Globe; Sadie View, br m by Direct View, Louis Sands, Glendale; Kid Cupid, ch g by Cupid, C. F. Silva, Sacramento; Axtien, ch h by Axworthy, Samuel Harris, Plymouth; Albaloma, b g by Almaden D., J. P. Quinn, Sacramento; Mabel Van, b m by On Stanley, Mrs. A. F. Pecklo, Corona; Virginia Barnette, b m by Moko, and Esperanza, b m by Carlokin, W. G. Durfee, Los Angeles; Peter McCormick, br h by Peter the Great, V. L. & Lawrence Shuler, Pleasanton; Seneca Boy, ch g by King Entertainer, E. J. Rochon, Winnipeg.

2:15 Pace, Purse $1,000.00:

Zombrino, blk h by Prince Zombro, Dr. J. G. Belt, Phoenix; Gay Tommie, b g by Tom Ferguson, J. R. Lambert, Phoenix; Rayo de Oro, ch g by Copa de Oro, J. S. Nickerson, Los Angeles; Direct So, br h by Direct View, E. S. McEuen, Tucson; Queen T., b m by Oh So, Sam Davis, Tucson; Booker T., b h by Ira Bank, A. S. Murphy; Mack Leland, br g by Leland D., W. L. Selman, Phoenix; Kuropatkin, br h by Gambetta Wilkes, C. H. Barkley, Phoenix; Santa Fe, ch g by Zolock, Mrs. A. F. Pecklo, Corona; Contention B., b g by Copa de Oro, W. G. Durfee, Los Angeles.

2:04 Pace, Purse $1,000.00:

Leata J., b m by Royal McKinney, J. N. Jones, Stockton; Sayde Densmore, ch f by Don Densmore, D. A. Dinnie, Minot; Potrero Boy, b g by Demonio, Teddy Bear, b h by Del Coronado, and Bondalean, b h by The Bondsman, C. F. Silva, Sacramento; White Sox, b m by Del Coronado, and Clara Mac, br m by Expressive Mac, W. G. Durfee, Los Angeles; The Beaver, b h by Searchlight A., E. J. Rochon, Winnipeg; Waynetta, b m by Admiral, J. A. Burnett, Denver; Don Densmore, b h by Pactolus, D. A. Dinnie, Minot.

Free-for-all Pace, Purse $1,000.00:

Leata J., b m by Royal McKinney, J. N. Jones, Stockton; Don Densmore, b h by Pactolus, D. A. Dinnie, Minot; Potrero Boy, b g by Demonio, Bondalean, b h by The Bondsman, and Teddy Bear, b h by Del Coronado, C. F. Silva, Sacramento; Waynetta, b m by Admiral, J. A. Burnett, Denver; Sayde Densmore, ch f by Don Densmore, D. A. Dinnie, Minot; White Sox, b m by Del Coronado, and Clara Mac, br m by Expressive Mac, W. G. Durfee, Los Angeles; The Beaver, br h by Searchlight A., E. J. Rochon, Winnipeg.

2:25 Trot, Purse $1,000.00, Arizona Horses Only:

Kildare, blk g by Zombro, and Lady Leco, blk m by Cochise, Dr. J. G. Belt, Phoenix; Otis Jr., b h by James Otis, L. M. Schenck, Phoenix; Irene Strathmore, ch f by Knight of Strathmore, and Pinewood, b h by Lijero, Pinewood Farm, Flagstaff; Gypsie Boy, b g by Dr. Clark, J. R. Lambert, Phoenix; Naboth Jr., ch g by unknown, E. S. McEuen, Tucson; Zona B., br m by Zolock, Mrs. A. W. Sydnor, Globe; Meridian Jr., blk g by Meridian, Victor Holding, Safford; Sadie View, br m by Direct View, Louis Sands, Glendale; Delfino, blk m by Oh So, Albert Lopez, Sonora.

Two-year-old Trot, Purse $500.00, Arizona Horses Only:

Pineknot, b c by Greco B., and Belzabola, b f by Red Lac, Pinewood Farm, Flagstaff; Navajo, b f by Dr. Clark, and Lady C., b f by Dr. Clark, J. T. Clark, Phoenix; Dr. Davidson, b c by Dr. Clark, Sanderson, Peoria; Jess, ch g by Col. Randolph, W. M. Breckenridge, Tucson; Betsy Directly, b f by Directly, Haze Burch, Phoenix; Slats, b h by Director, Victor Holding, Safford; Della Patch, b m by Patchlock, Dr. A. H. Davidson, Phoenix; Black Colt, blk c by J. J. M. Jr., Albert Lopez, Sonora.

Three-year-old, or Under, Trot, Purse $500.00, Arizona Horses Only:

Baby Joy, ch c by Direct So, Z. C. Prina, Safford; Irene Strathmore, ch f by Knight of Strathmore, Pinewood Farm, Flagstaff; Otis Jr., b c by James Otis, L. M. Schenck, Phoenix; Navajo, b f by Dr. Clark, and Lady C., b f by Dr. Clark, J. T. Clark, Phoenix; Dr. Davidson, b c by Dr. Clark, Sanderson, Peoria; Betsy Directly, b f by Directly, Haze Burch, Phoenix; Slats, b c by Director, Victor Holding, Safford; Miss Emily, b f by Knight of Strathmore, W. L. Selman, Phoenix.

2:20 Pace, Purse $1,000.00, Arizona Horses Only:

Zombrino, blk h by Prince Zombro, Dr. J. G. Belt, Phoenix; May Della, blk f by Lou Kinney, Pinewood Farm, Flagstaff; Gay Tommie, b g by Tom Ferguson, J. R. Lambert, Phoenix; Roxie D., br f by Leland D., W. A. Yore, Phoenix; Direct So, br h by Direct View, E. S. McEuen, Tucson; Queen T., b m by Oh So, Sam Davis, Tucson; Booker T., b h by Ira Band, A. S. Murphy, Phoenix; Mac Leland, br g by Leland D., W. L. Selman, Phoenix; Kuropatkin, br h by Gambetta Wilkes, C. H. Barkley, Phoenix.

Two-year-old Pace, Purse $500.00, Arizona Horses Only:

Marguerite, b f by Airault, W. A. Yore, Phoenix; Vic, b g by Director, Victor Holding, Safford; Lelia Mack, b f by Leland D., W. L. Selman, Phoenix; Dama blk c by Directly, Louis Sands, Glendale; John M., b c by James Otis, W. L. Selman, Phoenix; Deter, blk h by Patchlock, Dr. A. H. Davidson, Phoenix;

Three-year-old Pace, Purse $500.00, Arizona Horses Only:

May Della, blk f by Lou Kinney, Pinewood Farm, Flagstaff; Veinie B., b f by Leland D., Wm. Zeller, Phoenix; Roxie D., br f by Leland D., and Marguerite, b f by Airault, W. A. Yore, Phoenix; Vic, b g by Director, Victor Holding, Safford; Lelia Mack, b f by Leland D., W. L. Selman, Phoenix; Dama, blk c by Directly, Louis Sands, Glendale.

HONEYWOOD COMES TO NEVADA STOCK FARM

Some weeks ago mention was made in this paper of Black Jester, the famous English stallion which George Wingfield's agents expected to secure for Nevada Stock Farm, since which time negotiations tending to the purchase have been abandoned. Mr. Wingfield's representatives have not made the trip in vain, however, as they not only secured a fair amount of excellent racing material, but also bought a most promising stallion to put in service at the Nevada speed nursery, the four-year-old stake winner, Honeywood, concerning whom the noted British authority, Audrax, of Horse and Hounds, makes the following pleasing comment:

As the Cambridgeshire winner, Honeywood, a very nice horse, full of quality, has been purchased for export to the United States for use as a stallion, it may be of interest to many of my readers if I give a brief account of his chief racing performances, together with a few notes on his breeding. Bred by Mr. Sol Joel at his splendid Maiden Erlegh Stud, near Reading, and foaled on May 4th, 1911, Honeywood was sent with Mr. Joel's other yearlings to be placed under Charles Peck's charge at Sefton Lodge, Newmarket. The colt began his running career, when backward, at the Newmarket Craven meeting of 1913, being beaten three-quarters of a length by Pictorial for the Fitzwilliam Stakes, with Carancho a fair third in a huge field. At the Epsom summer meeting Honeywood started favorite for the Catherham Plate, which he won easily by two lengths from King's Scholar, with ten others in the rear; but at Newbury he made one of those Longtown beat for the Berkshire Foal Stakes. At Ascot he was close up third to Land of Song and La Marquise for the Windsor Castle Stakes, among the remaining twenty runners being Torchlight, who was favorite, and it may here be as well to mention that Land of Song the following season won the Irish Derby, after which he was sent to Australia and turned out a really good horse securing several rich events in his adopted country shortly after arriving. Honeywood next finished second to Ambassador in the time-honored July Stakes at Newmarket, and was in a similar position to the speedy Parhelion for the Levant Stakes at Goodwood; but later he cleverly won the Nottinghamshire Breeders' Foal Plate, conceding 12 pounds and a half-length beating to Poet's Licence. After the son of Polymelus had finished once more behind Longtown, in the Manchester Autumn Breeders' Foal Plate, he proved too good for First Spear, Sunny Lake, and Dolly Varden in the Buckenham Stakes at Newmarket, and the following day won the Boscawen Stakes from Ted Smith, the favorite, Brakespeare, being third. In the Leicester County Foal Stakes he naturally found the task of conceding 16 pounds to Torchlight beyond his powers, and he was also behind the same smart filly in the Free Handicap at Newmarket.

Honeywood did not again appear in public until the following April, when, although burdened with 9st 4lb, he was made favorite for the ten-furlong Hastings Plate at Newmarket, wherein he ran third to Scipio, 8st 3lb, and The Gaul, 8st 10lb; after which he took part in the Stewards' Handicap at Epsom, won by Sir Edgar, and the Hurst Park Yearling Plate, which Evansdale secured. In spite of these three failures, Honeywood was greatly fancied for the Royal Hunt Cup, in which he was a good third to Lie-a-Bed and Braxted, and the colt was no doubt feeling the effects of his exertions in this race when two days later he was unplaced to Mount William for the six-furlong Wokingham Stakes. Mr. Joel's colt was next seen out for the important mile and a quarter Eclipse Stakes, worth 8735 sovs, in which he earned 900 sovs by running a good second at level weights—8st 13lb—to Hapsburg, another colt of his own age who had finished second in a field of thirty to the French horse, Durbar II., in the Derby a few weeks previously. Three lengths behind Honeywood came the Two Thousand Guineas winner and favorite, Kenneymore, 3 years, 9st 2 lb, and among the ten remaining runners were the four-year-olds Cantilever and Louvois, each carrying 10st, and respective winners of the Cambridgeshire and Two Thousand Guineas of 1913, while Cantilever had also gained further fame by beating Tracery in the Jockey Club Stakes. For the mile and a quarter Duke of York Stakes at Kempton Honeywood ran behind the four-year-old Nassau, who was only giving him 5lb, and having secured the Non-Stayers' Plate at Lingfield, Mr. S. Joel's colt, carrying 7st 8lb, got the better of a splendid struggle for the nine-furlong Cambridgeshire Stakes, winning by a head from Ambassador, 3 years, 7st 5 lb, who beat Diadumenos, 4 years, 7st 11lb, by the same narrow margin for second place. Among the unplaced ones in this event were such good horses as the St. Leger winner Black Jester, the City and Suburban victor Maiden Erlegh, Nassau, and Santair. Honeywood was ridden by Donoghue, and started a well-fancied candidate at 100 to 7. Although the colt has been out several times this year, he was never really fancied until he took part in the Cambridgeshire Hunt Plate at Newmarket in July, wherein he managed to finish fifth to Young Pegasus after being kicked at the post and getting badly away. We will now look through an extended pedigree of the horse, which reads as follows:—

HONEYWOOD (1911)	POLYMELUS (1902)	CYLLENE (1895)	Bona Vista (1889)	Bend Or (1877)	Doncaster (1870)
					Rouge Rose (1865)
				Vista (1879)	Macaroni (1860)
					Verdure (1867)
			Arcadia (1887)	Isonomy (1875)	Sterling (1868)
					Isola Bella (1868)
				Distant Shore (1880)	Hermit (1864)
					Land's End (1873)
		MAID MARIAN (1886)	Hampton (1872)	Lord Clifden (1860)	Newminster (1848)
					The Slave (1852)
				Lady Langden (1868)	Kettledrum (1858)
					Haricot (1847)
			Quiver (1872)	Toxophilite (1855)	Longbow (1849)
					Legerdemain (1846)
				Mare (1860)	Young Melbourne (1855)
					Brown Bess (1844)
	HONEY BIRD (1896)	FRIAR'S BALSAM (1885)	Hermit (1864)	Newminster (1848)	Touchstone (1831)
					Beeswing (1833)
				Seclusion (1857)	Tadmor (1846)
					Miss Sellon (1851)
			Flower of Dorset (1870)	Breadalbane (1862)	Stockwell (1849)
					Blink Bonny (1854)
				Imperatrice (1859)	Orlando (1841)
					Eulogy (1843)
	WARBLE (1884)		Skylark (1873)	King Tom (1851)	Harkaway (1834)
					Pocahontas (1837)
				Wheat-ear (1867)	Young Melbourne (1855)
					Swallow (1855)
			Coturnix (1871)	Thunderbolt (1857)	Stockwell (1849)
					Cordelia (1851)
				Fravolina (1862)	Orlando (1841)
					Apricot (1844)

A charming horse to look at, and beautifully balanced, I predict a successful stud career for this bay son of Polymelus (by Cyllene, who begot the Derby winners Cicero, Lemberg, Minoru and Tagalie), sire of the St. Leger winner Black Jester, Pommern (the champion three-year-old of this season, and winner of the Two Thousand Guineas, New Derby, and September Stakes), and many other good racers, who

[Continued on page 12.]

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

MY DREAM.

Give me no dream of the city,
The palace, the mill or the mart;
I would rather the call of the open
Rang clear in the depths of my heart.
The rustle of leaf in the forest
The song of the wood and the stream,
The voice of the hill and the valley—
This is my dream—my dream.

Give me no gold of the toiler
Gleaned in his house of clay;
I would rather the peace that lingers
Over each woodland way.
The glint of the sun in the branches,
The night and its stars agleam,
The voice of the breeze in the woodland trees
This is my dream—my dream.

Give me no sound of the traffic
And strife of the city's kind;
I would rather the woodland whispers,
The balm of the forest wind.
The song of the bird in the open,
The lilt of the shaded stream,
And the charm that lies in the open skies—
This is my dream—my dream.

THE LURE OF AUTUMN DAYS.

Spring draws me forth from my rain-bound shelter to view a world of a thousand wonders; to see where the towhee and the horned lark and the shrike and the mockingbird have hid their homes; to hear the love-call of the quail, whistling "sweetheart, sweetheart," through the brush; to feel the sap leaping up the mottled branches of the greening sycamores and beneath the rough bark of the lowland willows; to lie on sprouting sod beneath a branching, heavy-canopied oak whose solemn stolidity is broken by the wandering winds that shake it into laughter above my head.

With the summer comes the infinite mystery of new life: the rabbit with her young in their grassy "form" beneath the willow tangle, the quail with her downy brood scattering to the four winds of heaven at the cry of alarm, the never-silent oriole family, pendant in their woven cradle from the very tip of some sycamore or eucalyptus-branch; and, more than all the rest, the occasional glimpse of things unknown which comes to the wanderer in summer.

But it is autumn that draws my heart! Autumn with her red-hot days, cold nights and sweeping winds that freeze or sear. Then the corn fields, their golden shocks in orderly array, with gleaming pumpkins in between, whisper of cornbred and pumpkin pies—for even in Our Italy the things of the flesh betimes intrude themselves like a spade in four hearts.

Autumn cornfields, however, have another use beside sheltering pumpkins: They shelter unnumbered hordes of doves. Time was when I did not know this, when I passed by the cornfield for the wheat stubble; but now I know different. I don't shoot many doves, albeit I like to eat them, because I cannot bring myself to believe them a game bird; but this is the way I got acquainted with the cornfield and the doves.

All round this cornfield, which did not cover more than ten acres, was wheat and barley stubble. In it guns were popping—half a dozen at every harried dove that drove headlong from its evening watering place to a roost in the oak-grown hills that everywhere lay roundabout. I started through the cornfield, down the track made by a broad bedded wagon into whose maw the farmer had swooped the ripened ears. At the first shock there was the flutter of wings and a dove rose, moved to the third tower of dried stalks and dropped to earth again.

I was surprised; doves are not corn-eaters, but here were doves in the cornfield. There may be "nature-fakers," but there are no natural fakes. Behind every trick in the outdoors there's a reason. The little sixteen slipped over into my right arm, my thumb slid the safety back, and when, at the next corn shock, three doves got up, I dropped one and missed clean with the other barrel.

The shot seemed to stir up a million of the birds. They were everywhere, apparently just resting and hiding out from the hunters who made a fringe around their customary feeding ground. I examined the crops of the six doves which I killed that evening and found not a grain of corn in any one. It was evident they had not been feeding in the cornfield with the black, buckwheat-like seeds of the turkey mullein, the favorite food of mourning doves throughout the southwest.

Suspecting that the birds might be feeding on seeds other than corn, I searched the parts of the plot in which I hunted, finding not even one plant of fireweed nor one of turkey mullein. The birds, then, had gotten "wise" to the schemes of the hunters and had taken to the cornfield, while others, not so skilled in the art of saving their lives, flew overhead to make pot-pies for the hunters.

Undoubtedly these cornfield birds fed at night or in the early forenoon—another trick they must have learned for themselves and a habit totally foreign to the daily life of the dove family. None of the hunters had thought to search for their game in the cornfield, and I stumbled upon a novel phase of bird life all because the autumn had called me, not because I shot doves for pleasure or for meat.

It seems good just to be out. The fringe of green-leaved acacia trees around father's place is heavy with masses of fuzzy golden balls of bloom. In the hills the "Spanish Daggers" are rearing last long shafts of creamy bells to the sun; and where the creek babbles through the willows and water beeches and sycamores, here and there a scarlet bugle splashes the greens and grays with its sudden burst of fire.

The very air of Autumn breathes such magic words as "quail!" and "rabbit!" In the dust of the road you see the queer, scratched hieroglyphs of the cottontail; even in the suburbs of town, where there are plenty of dogs and boys, the script in the dust shows many and many a bunny. In the day-times they hide in the hedges, in the berry vines, in the alfalfa patches and even under the houses.

From the thicket, out of the vacant spaces where one would little dream of their existence, the three-toed tracks of the quail lead up and down and across the road, never seeming to have any business anywhere with anybody, but disappearing a mile or two farther on into the hills when day creeps out to let the world free.

And every time you take a trip down a country road in the autumn you are convinced that the boys of today are not made of the same stuff that you and I and the boys of "our" day were made. If they were, you argue, there wouldn't be so many quail tracks; and there would be a few rabbit snares among the rows of blackberries—a few old-fashioned "figger four" traps down by the sweetcorn patch, and some of those other trifles that we as boys took as a matter of course and to which we as men would give ten years of our lives to return.

Ever shoot cottontails in the California hills in the fall? Just after the first or second rain, I mean, when the grass is up half an inch or so and every rabbit sits up clear against the hill, just out of range of the shotgun, but a fine target for the .22 or the .25-20. There is one of the finest games of the outdoors, one of the prime allurements of the autumn time.

I used to have a dog, little and not much to look at, but a terror to rabbits and ground squirrels. He is gone now—may Cerebus, who guards the Styx, rest his ashes—but in life he was the gamest little thoroughbred that ever lived. His squirrel-record for one day was eleven; his rabbit list, with my puny efforts added, six; and the beauty of him was that he needed no gun.

If he ever spotted a squirrel twenty feet from his hole, that rodent might as well send in his book and bid his friends a last adieu. There was a whirlwind run, a snap of sharp teeth in vice-like little jaws, a squeak, and all was over.

Sometimes he got a rabbit this way; more often we, this dog and I, dug them out of their burrows or pulled them from little caves with long sticks; but whatever we did, we got the rabbits and we usually went after them in the fall, in that California autumn which is just as dear to us who know California as is Thanksgiving time to those who dwell to the east of the great mountains.

FLY CASTING AT STOW LAKE.

The San Francisco Fly Casting Club's postponed medal contest No. 9 came off Sunday forenoon at Stow lake in Golden Gate Park under most pleasant weather auspices. Stanley Forbes led in the light tackle accuracy event No. 1 and also in the ¼-ounce lure distance event, No. 4. Walter Mansfield's 112 and 127 feet were the top scores in the light tackle distance, event No. 5, and salmon fly casting distance, event No. 6. Harry Thomsen's dry fly score, event No. 2, was the leading mark in that contest. J. F. Burgin won the ¼-ounce lure accuracy event, No. 3.

Stanley Forbes' 152 feet "slam" cast with ¼-ounce lure tackle; Davis' 146, Kewell's 135, Davis' 116 and Burgin's 90 feet were the other scores in that event. The "in and out" scores were: Brookes 1, 1; Kewell 2; Young 2; Davis 1. The tabulated scores follow:

Sunday Contest No. 9. Medal Series, Stow Lake, October 10, 1915 (postponed from October 3, 1915). Wind, southwest. Weather, fair.

Judges, H. A. Thomsen, Jr., Joe Springer. Referee, W. J. Davis, Jr. Clerk, Chas. E. Hills, Jr.

THE BANDTAILED PIGEON.

The bandtail pigeon is on the protected list, under the new federal regulations, until September 1, 1918. Sportsmen in this State, familiar with these birds, are of almost unanimous opinion that theis prohibitory statute was entirely unnecessary so far as it applied to the Pacific Coast. In some sections of this State the pigeons are now and have been for years, notwithstanding the hunting prior to two years ago, to be found by the thousands. And this plenitude of the birds by no means could be reduced—as wsa the passenger pigeon—for the simple reason that habitat difficulties and the wariness of the pigeon are in sufficient majority to keep down the toll of the hunter far and away from a supicion of the extermination mark.

Recent reports give out that in the eastern foothill slopes and upper pine regions of the Sacramento and San Joaquin valley ranges bandtail pigeons can be found, as they have been for 50 years past, just as numerous as ever.

The following story by a Southern California sportsman will give a fair idea of the situation and justify the opinion of many California and Coast sportsmen that there was no pressing necessity for the present law—as it pertains to the Pacific Coast.

"One of the least known game birds of California, yet one of the hardest to shoot, and a fairly good variation of the usual game diet of quail and rabbits and deer while one is in the mountains, is the bandtailed pigeon of the higher hills.

To the scattergun man accustomed to stand two or three hours of an afternoon in the shade of a sheltering tree at the edge of a wheat field, bringing down five out of seven of the doves that pass over him on their way to or from their feeding grounds; to the quail enthusiast or the snipe shooter, who with the aid of his wide-ranging dogs can find good sport in almost any mesa or low-lying marsh, the shooting of these mountain pigeons will not appeal. The work of getting them is out of all proportion to the birds obtained, and it is practically impossible to hunt them successfully alone, two great drawbacks to any sort of hunting.

But the bandtail when found, high in the piney slopes of the real mountains or driven down to the oak flats by the constant pressure of deep snows, is one of the finest of birds for the hunter who has the stamina to carry a heavy duck gun through the canyons all day and to shoot three and a half drams of powder under an ounce and a quarter of shot, and do it every time he sees a bird.

Ten of these hill pigeons is a good day's bag for any hunter, I care not how experienced he is or how well he knows the California mountains through which he hunts. And the birds are not disappearing through any inroads hunters are making in their ranks; in fact, there are as many bandtails in the California hills today as there were the first day I ever saw one of the pigeons, many years ago on the northern face of old Mount San Antonio, better known as "Baldy."

First of all, this bird should not be mixed with the common turtle or mourning dove, found in every field of the Southwest. A much larger bird, the prevailing tone of whose plumage is blue, the bandtail is seldom ever seen in the lowlands, and then only when, as rarely happens, it is driven out of the mountains by the cold and heavy snows of winter.

Then it comes down only so far as may be necessary to escape the rigors of its summer home, and returns just as soon as the snow begins to melt with the first warm days of the California spring. In either place the birds are the embodiment of life. Gifted with long, splendidly proportioned wings, and sets of thick, stout muscles across the breast, they can hurl themselves through the air at a speed rivaling that of the famed teal duck.

Half the bandtails shot at on the wing are missed; and three-quarters of this half go scot free, not because the shooter has not estimated his distance correctly, nor allowed enough for their speed, but because the birds unless hit in a vital spot can carry away so much shot. In the Big Tejunga, up above the San Fernando valley, I have seen one of these pigeons, hit in midair with a charge of sixes, turn completely over and keep right on going, being brought down about two hundred yards further up the canyon by another hunter.

For experiment, the carcass of this bird was cut up by myself and another equally curious hunter. In the muscles were lodged twelve of those number six shot, and but for the fact that the thirteenth, presumably fired by the second man, had pierced the bird's heart, he probably would have been going yet.

When there was no law on the bandtails, and the duck season was over and the quail time still to come—I am writing this in May—the big blue fellows filled in an agreeable manner a barren niche in the twelve months' round of sports. To constant residents in the mountains they furnished an unending supply of game, and they can be kept going for years in a locality by careful shooting and the use of good judgment on the part of residents.

They certainly are an attractive addition to the avifauna of California mountains, and are the one bird which, along with the turkey vulture in the lowlands, are in no danger—imminent at least—of extinction. Perched in the branches of a pine or an oak tree they are practically invisible until the hunter passes directly under the tree. Occasionally—two

specific instances of this occurred in my experience—they will walk around a tree trunk much the same way that ruffed grouse are said to do in the East, keeping the trunk between themselves and the hunter, making no noise but refusing to fly.

To hunt such birds as these, of course, a dog is of but little use, unless it be to retrieve dead birds. And you can be assured that when you pull one of these bandtails out of the air with your load of sixes, he is dead enough to lie where he falls for all the rest of time, else he had never come to earth. The best way to hunt these pigeons—and I speak not so much from my own experience, which has been limited to a few weeks with them in all my shooting life, as from that of others whom I have known—is in company. Two can hunt bandtails better than one, and four can have better success than two. Beyond four, however, the party usually becomes unwieldy and the game is not as good as it can be made for the smaller party.

Coming up a canyon in the mountains, or going down some north slope, you will see a pigeon dip into a pine tree; presently you will make out three or four perched in the upper branches of the same tree. Carefully, like as you would stalk a blacktail or a mountain sheep or a feeding sage grouse, you creep up the canyon, keeping in the shelter of the slope or in the shadow of the pines. Not a stone rolls beneath your feet if you are lucky; not a twig cracks in your fingers as you put aside a branch here and there. Suddenly you stand within easy range. Up comes the old 12-bore—for you are after pigeons and a sitting shot is as good as any. Down the midrib you see one of the blue coated fellows sitting up in the bright light of the afternoon sun.

You press the trigger, and as the crack of the nitro rings out through the hills all the way from six to a hundred pigeons burst from the tree. You did not see them, not before you fired at any rate; quite probably they did not see you, but they were there all the same, and the way they got out of that pine tangle would have put a teal or a canvasback to shame in a minute. If your aim has been good, your load heavy enough and the lord of Chance on your side, your bird comes tumbling down out of the pine. Possibly he sticks up there a hundred feet from the ground on a pestiferous little branch no bigger than your finger, and you have to shoot him down or climb the tree, the latter of which is no cinch and generally puts some little crimp in your hunting legs for the remainder of the afternoon.

Flights of these pigeons are few and far between. A few such have come under my notice, however, but for the most part these were across small, low-lying valleys and the birds flew so high that nothing short of a rifle could reach them with killing force. Up around Newhall and over in the Simi valley there was at one time such a flight; whether it still maintains its customary quota of morning and evening bandtails, I do not know. In 1907 the best sport with the big pigeons was down in the San Diego county mountains, particularly around Fallbrook and Escondido.

In Lower California there are more of the bandtails than anywhere else in the world, and their feeding grounds in the interior of the peninsula are said to resemble those of the passenger pigeons in the old days in Minnesota and Ohio. Occasionally a tall, dead tree can be found, barren of leaves and from which can be obtained a view for miles around. Where such a tree stands in the line of flight of the bandtails a good bag generally can be picked from it by a hunter hid in the brush near by. For this sort of shooting, which is the best way for a man hunting alone to adopt, a small bore, .22 or .25-20 caliber, is the best arm to get the best results. The small rifle makes less noise than the shotgun; generally all the hidden hunter's shots will be at sitting birds, and he can make a clean kill practically every time he pulls the trigger.

One such tree at one time stood at the head of what is known as "Indian Canyon" in the San Fernando hills. It was a tall pine, guiltless of branches save for one which sprang from the naked trunk about three feet from the top and a good seventy feet from the ground. At a distance of about one hundred feet from the base of this old skeleton there was good cover on practically all sides. I was encamped with my father at his bee ranch in the bed of the canyon at this time, and I had the best pigeon shooting I have ever seen out of this old tree.

I used a .22 rifle, shooting long rifle cartridges, and any bird squarely hit by one of these little pellets of lead was as good as dead. Now and then one of them would fly a couple of hundred feet down over the canyon and then drop, but they all flew down and out, never up, and all were stone dead when they fell, so that I did not have such a difficult time getting them.

I imagine that the .25-20 rifle, using steel-jacketed bullets only so that they cut a clean hole and went right on through without tearing the bird to pieces, would be even a surer weapon for this game than the .22, but for these pigeons, along with nine-tenths of the other game of that part of the country, the small rifle (Remington or Winchester) is the prime weapon for the man who merely wants to kill enough to supply his needs and then quit, as every shooter should do.

The fear of man is ingrained more deeply in the bandtailed pigeon than in any other bird or mammal of the Southwest. This alone puts them at once in a class of hard creatures to hunt, and the man who can go out into the mountains and pick up a good bag of these birds must be given credit, not alone for knowing his hunting ground, but of being a mighty clever stalker at that.

During the breeding season, which begins late in May and runs through July, the bandtails travel in pairs; at other times of the year, notably after the first snowfall, they are to be found in bands of from half a dozen to several hundred, though flocks of the latter size are very rare. In the nesting season they retire to the higher mountains, frequenting such peaks as Waterman, San Gorgonio, San Bernardino, Wilson's, San Antonio, and Smith mountain in Southern California. Many are said to breed each season on Tehachapi Peak and around the headwaters of the Kern river. They are also numerous in the northern Sierra and Coast counties.

The nest itself is a rude platform of sticks, like that of the mourning dove only larger, and has little or no rim around it. This home is placed on the horizontal limb of a pine or an oak, in a crotch formed by vertical branches where possible. It is lined sparsely with bark fibres and a poorer cradle of finer sticks than those of which the outside is composed.

In this nest are laid two eggs, nearly equal ended and pure white, slightly smaller than those of the domestic pigeon but considerably larger than those of the mourning dove. The period of incubation is between two and three weeks, and the young when newly hatched are the same featherless ugly birdlings as are the young of the mourner. For many days they are fed by the parent birds by regurgitation—that is, the food is first swallowed, and then, when partially digested, is forced out of the mouth of the adults into the throat of the young pigeon. This is the common method of feeding all young pigeons and is as much the habit of the tiny Mexican ground doves as of the huge bandtails with which we are dealing.

Most of the food of these pigeons is made up of acorns; this gives to the flesh, except of the very young birds, a strong flavor, disagreeable to many. The meat itself is dark but fine grained, and when prepared in the ordinary manner is apt to be passed up even by the most enthusiastic hunter after one taste. If, however, the birds when picked and dressed are laid over night in strong brine, flavored with vinegar or lemon juice, they are as good broiled or in a pot as any bird on the hunter's list. Bandtail squabs are delicious, and for those who like squabs (which I class with tripe, kidneys, brains, young veal and other indelicacies of the human table), there is no game like the hunting of the nests of these birds and the taking therefrom of the squabs.

Once robbed the birds usually fall to work on another nest and raise a second brood, even though the young taken were almost grown. This tends to keep the bandtailed population up and to keep the pines and the oaks filled with the big active birds. Their call is deeper and more sonorous than that of the mourning dove, approaching in volume if not equalling that of the tame pigeon, and the hunter who goes to the mountains unacquainted with the bandtails, is apt to think on his first night or two out that he is not so very far from civilization and its attendant barnyards, after all.

With no more apparent reason than the oldtime flights of the passenger pigeon, flights of bandtails occur in certain portions of their range during almost every fall. But there is this difference between these California birds and the famed passengers: the former do not come in such large numbers, and their flights from the mountains to the oak flats and back again are very irregular.

GOOSE SHOOTING.

There is a keen bit of sport in California wild goose shooting that can not be equalled by any other goose shooting section in the country. Up the river near Rio Vista wild geese can be seen by the thousands. But the trick of bagging the wary birds is not an easy one for the ordinary sportsman and is an impossibility, almost, for the novice.

Shooting over live goose decoys and under the guidance of expert callers who are familiar with every angle of the game is indeed wildfowl sport worthy of trying.

The Church-Hanson preserve has a good reputation for this recreation. We call attention to the announcement on page 13 in this respect.

Pretty good results are reported for last Sunday in the Wingo waters. Joe Gabarino and Charley Reynaud picked up some small bass fishing here and there. Hannah and Holland had rather fine luck near Turkey Point, several fish, including a 30-pounder, was the take. "Kid" Berta and Felix Berta caught a limit of 5-pound bass near Rejstrom bay—evidently there was a school of small fish running there. Al Lindsay, Hugh Copeland and other Wingo regulars were also more or less successful.

Outside still fishing in Drakes bay rewarded Al Wilson with a big variety of green cod, capazoni, snappers and a salmon. The outside salmon run is about over, but few of the fish having been taken outside or in the bay the past week.

Drink Jackson's Napa Soda.

At the Traps

Golden Gaters.—Among the participants in the blue rock trap shooting program of the Golden Gate Gun Club yesterday at West Alameda, the fair sex wae represented by shotgun devotees. Miss F. Bryant, shooting at clay birds for the first time, won the "ladies' trophy" offered by the Du Pont Company. Miss B. Rockwell was but three birds behind the winner in a 25-bird race. Mrs. A. Topperwein, the woman champion trap shot of the United States, broke a total of 97 out of 100 birds in the regular 25-bird races. Miss G. J. Meyers and Mrs. A. G. Wilkes smothered 77 and 75 birds, respectively, better scores than several of the sterner sex tallied. Miss Houghawout broke 14 out of 15 birds.

The exhibition of rifle, shotgun and revolver shooting by Mr. and Mrs. Ad. Topperwein was closely followed by over 400 spectators. The skilled twain of trigger-pullers did all sorts of difficult shooting—marbles tossed in the air were split by .22 rifle bullets, and other objects thrown up were demolished with an astonishing accuracy.

Toney Prior, Barney Worthen, Clarence Haight, A. G. Wilkes, Dick Reed, Lon Hawxhurst and other crack shots were put to their best efforts when Jack Fanning got the handtrap at work. Birds were sent at all kinds of angles, high and low, and fooled the best of them.

E. T. Prior, "a chip of the old block," won the men's beginners' trophy with the good score of 20 out of 25. W. Cavanaugh 17, W. Connolly 16, O. Lilleure 15, E. O. Kolt 11, C. J. Norton 10, were the other results in that event.

R. C. Reed missed a century run in the four 25-bird matches by losing one bird. Toney Prior won the Du Pont amateur trophy with the score of 97 out 100. Charley Knight, 96, and Barney Worthen 95, were next men up. H. W. Williams' string of four 23's was not only a bit of good shooting, but very consistent. N. A. Howard's 48 out of 50 was the best shooting in the 50-bird shooters. The summary of scores in four regular 25-bird races follows:

Birds—	25	25	25	25	100
B. H. Worthen	25	25	24	21	95
C. A. Haight*	18	22	22	18	80

Citrus Belt Traps.—The Vernon traps, near Los Angeles, are a drawing card for trigger pullers.

Thirty-eight shooters shot at over 3,000 targets at the regular weekly shoot of the Vernon Gun Club Sunday. The targets received rough treatment from some of the experts and the new beginners showed marked improvement, some of them having a good reason for feeling proud of their efforts. Baron von Ropp, one of the old-time shooting enthusiasts, broke his period of sixteen years' absence from the game and managed forty out of his fifty targets.

Tom Marshall of the Remington U. M. C. Company was a guest at the club, and showed that he was in good form by pulverizing his entire string of fifty clays. Each of his targets was absolutely wiped off the map, an exhibition that was beautiful and entertaining.

Billy Wilshire hung up a score of 49 out of 50 on the Stanton Bruner trophy. This gave him the win without dispute. Several other members, as the score will show, broke 48 out of 50 for second honors. This is the second win on the cup for Wilshire. One more such success and the cup is his.

An added attraction was a beautiful loving cup donated by R. L. Hall. This cup was contested for on the hundred targets of the program and brought out some very keen competition. When the smoke cleared away it was found that three ties was the result, 93 out of 100, the successful ones being L. J. McMurry, W. H. Wilshire and C. D. Hagerman. In the shoot-off it was necessary for Les McMurry to break 50 straight targets to cop the trophy. The scores follow:

	Birds	Bke.	Birds	Bke.	Birds	Bke.
A. W. Bruner	..	..	..	..	100	86

* * *

Postponed Tournament.—Trap shooting tournament that was to be held at Tucson, Ariz., on Nov. 5, 6 and 7 has been changed to Phoenix on the 15th and 16th, during the Arizona State Fair. Practice day on the 14th inst. The merchants of Phoenix have subscribed over $500 for prizes to be shot for at the tournament.

THE FALL HUNTING SEASON OPENS.

With all indications pointing to one of the best hunting seasons in years, smokeless powder burners have been on the alert for that vibrant note in the air "when the goose honks high" and every man Jack of them was showing alarming symptoms of "mallarditis" or "sprigatellis." Decidedly disturbing maladies, if not properly attended to.

It is not an exaggeration to state that quite an army of shotgun enthusiasts, made up of local sportsmen, supplemented by a numerous contingent of fellow sportsmen hailing from the bay counties districts, central California and south of the Tehachapi, were on the anxious seat yesterday morning at sunrise, when the annual fall hunting season opened.

A continuance of favorable weather until the eagerly awaited morning when the marsh resorts of the wild duck and the upland quail coverts were at the option of the hunter, gave promise for great sport and many limit bags.

For weeks past members of hundreds of duck clubs have been preparing the annual welcome for the broadbill family. Clubhouses, shacks and arks have been put in commission, duckboats and skiffs have been overhauled and made water-tight, ponds baited and blinds prepared, decoys leaded and stringed, and a thousand and one things done that are necessary for success in the duck hunter's game.

Safe to say, all things going well, that the toll of wild ducks yesterday, today and tomorrow for central California alone, will total 500,000 if not more, to say nothing of what transpires at the southern coast duck shooting grounds or in Imperial valley—possibly the score may be doubled. When it is taken into consideration that over 160,000 hunting licenses have been taken out in this State and at least 60% of the license buyers will be out, on general average the figures here given are not wild.

From the duck-hunting sections reports are that birds are most plentiful. For several weeks past the advance guard of webfooted migrants have been observed coming down from the north and mingling sociably with the home-bred birds in many of the marsh and tule sections. In the Sacramento valley and in and about Butte, Glenn, Colusa, Yolo and Solano counties, there is plenty of water and feed, and fat ducks were there, waiting for the opening fusillade—in flocks of many thousands. Not only that, but geese have been arriving also in big flocks. Thousands of the cackling birds have recently flocked in the Butte creek hunting districts. They are beginning to show up farther south, too. Frank Merrill, an oldtime trap shot and duck hunter, stated last week that he saw big flocks of geese near Westley in Stanislaus county, which means that San Joaquin valley hunters will have an early crack at the solon family.

The Sacramento valley districts promise to be the main duck-hunting territory of Central California this year. This favored section will be the headquarters of numerous gun clubs this fall. A number of these organizations have only recently acquired hunting ground and arranged for the coming season. Mr. and Mrs. Fred K. Burnham, Mr. and Mrs. A. G. Wilkes, Roy Avery and Tom Wilkes will open the season on their new preserve, so it is reported, near Live Oak, in Colusa county.

During the past summer, most of the duck hunting marsh land within easy reach of this city has been leased to or bought by gun clubs or individual sportsmen. Good shooting resorts have been at a premium and prices have been going up.

For some unknown reason the ducks deserted the lower districts of the Sacramento and San Joaquin tule sections, including Sherman island and that vicinity, up to last week. On Wheeler island, however, mallards have resorted by the thousands on the Sargent tract. A Chinese is the owner of 800 acres there and has been feeding the ducks and keeping the flocks there, awaiting the coming of Captain Jack Cleary and Frank McGrath. Down the San Joaquin valley the outlook is good in places. Birds are numerous where there is any water and feed. The reclaiming and drying up of the West Side country will improve the sport in other districts.

The Suisun marsh gun clubs are in line for phenomenal shooting—sprig, teal and mallard have made the marsh a headquarters for several weeks past. Green Lodge preserve, at Cygnus station, centrally located in the marsh, has a fifty-acre overflow pond that is in the line of flight for "all the sprigs in Christendom." This year, W. W. Richards, George W. Emmons, Horace Orear and Ben Woolner will shoot over the Green Lodge ponds.

The Alameda marsh gun clubs are also in favor for a grand opening shoot. Near Alvarado the fresh water ponds have been literally covered with mallard and sprig. In fact, all of the shooting resorts from Mount Eden down to Alviso are well stocked with birds.

* * *

All of the old-time duck hunters who shot near Newark will remember the Willow Lodge Gun Club preserve—a noted duck shooting ground up to a decade ago. From then until last spring the annual duck crop has been light. Now, however, a change has taken place, something that promises to make the duck shooting fraternity of the coast sit up and take notice.

Charley Shaw, a former member of the California Wing Shooting Club and the Olympic Gun Club, took over the old duck preserve early this year. Furthermore, he has raised a big bunch of wild ducks, successfully and at an expense far less than the same number of tame ducks would cost. To cut a long story short, he has made a study of aquatic wild game farming. Early last May he received a shipment of 100 black duck eggs from a Connecticut establishment. This duck resembles a mallard; in fact, has the same note, is larger and swifter in flight. The black duck is a favorite bird with Eastern sportsmen, who, by the way, get most of their sport on black ducks from birds raised at breeding farms. He put the eggs in an ordinary chicken incubator; 85 eggs hatched out young black ducklings. The young ducks were then placed in a chicken brooder and brought along to sturdy and matured growth. Furthermore, every one of the 85 ducks are on his place at present. He also secured mallard eggs from the East, and had the same success in raising mallards. As a side experiment he raised several broods of bluebills this summer, all of which home-bred ducks are now at the Willow Lodge farm.

Meanwhile he sent for several different plants that wild ducks feed upon—the wapato, nut grass and fresh water eel grass. All this vegetation, under his care and attention, has grown bountifully, producing plenty of natural food for his own birds and visiting wild ducks.

At feeding time the quacking and splashing made by the domesticated wild ducks kicks up a commotion that attracts their roving cousins for miles around. He states that from 8 o'clock Thursday morning, last week, until 5 p. m., there was not a minute's interval between the arrival of single sprig and mallard ducks up to the small bunches or flocks. The ponds were alive with wild ducks that could not be driven away. Attempts to "jump" them only made the visitors take short flight and back in the pond again.

This, however, is merely illustrative. It may be prophesied with a great degree of certainty that within the next five years wild duck farms on a commercial basis will be paying business investments at proper localities in this State. Wild game raised in this manner can be sold under the Bowman act, and most profitably, too—provided one knows how to handle the young birds when hatched, a comparatively easy thing to do.

Wild rice as a duck food has a reputation second to no other vegetation. Many attempts have been made to grow the plant in this State. The matter of transplanting and cultivating wild rice is now no longer in an experimental stage. Shaw has made arrangements to secure a number of plants—plants, mind you—and claims he can grow the rice successfully.

* * *

As for quail hunting, reports from every section are that the game valley quail have not been so plentiful for years. The hills and valleys bordering Livermore valley, for instance, are reported to be alive with the birds. The slopes on Mount Diablo, for the first time in many years, re-echo to the call of many quail. San Benito and Monterey counties are also well stocked with birds. The season has been very favorable, in fact, in almost every part of the State.

* * *

The deer hunting season in this State came to a close Friday, October 15. There is no restriction, however, on bear hunting. Bruin is reported to be fairly plentiful in Shasta and Plumas counties.

* * *

Cottontail rabbits will take the place of bucks from the 15th instant. The bunnies are also reported to be plentiful, particularly in the foothills along the San Mateo shore.

FISH LINES.

The trout angler has had splendid September weather and a kindly October aftermath. Streams have run down and cleared, and for the knowing rodster good fly-fishing sport has been the reward for a jaunt to a favorite fishing water. The Truckee river is still on the angling map; pleasing reports come from Boca, where C. H. Gardiner, Mr. and Mrs. O. O. Orr and other local anglers are at present. Mr. and Mrs. G. B. Osgood and Mrs. Osgood senior returned last week from that point. Mr. Osgood was enthusiastic in recounting the pleasing sport he enjoyed. The morning hours afforded fine fly-fishing. Minnows were the lure for success in evening fishing. The best fly patterns recently have been the willow, stone and beaverkill. Near Union Mill members of the San Francisco Fly Casting Club have also had good luck.

Reports from the McCloud river indicate that good trout angling conditions continue. Carlos G. Young found three-quarter pound and larger trout plentiful during a recent outing. William Ellery, John Ellery, Chris Ellery, Dr. A. J. Wiborn, Harry Blatchley and others are still on the river and getting nice baskets of trout daily.

Eel river offers a bit of inducement for steelhead anglers. Ira Dick sent down from Fernbridge to a friend last week a six-pounder and several smaller trout—samples of what the river is now offering.

Waddell lagoon on the Santa Cruz coast shore has been yielding fine steelhead trout fishing—the gray Palmer was the best killing lure. While many 5-inch or smaller trout were caught last week by Sam Wells and Al Hoffman—and rejected—there was a very acceptable catch of fish averaging 8 or 9 inches. The best time to fish was on a small low tide, in the lagoon below the bridge.

* * *

Striped bass fishermen have been making fine catches recently, fishing from the South Vallejo breakwater. Good takes have also been the luck of anglers near the brick yard, the fish do not run heavier than 5 or 6 pounds, however.

Off the San Pablo shores during the recent pleasant weather many bass have been taken. E. H. Forestier and party one day caught 20, running from 3 to 9 pounds in weight. That stretch of shore is always good for bass when the weather is pleasant. At Rodeo, Friday last week, a number of bass were caught, one fisherman landing a 16 pounder.

The San Antone regulars were out in force a week ago Sunday. Pete Breen, E. Eecret, W. Burlingame, Charles Bond, Hugh Draper and others were more or less lucky.

Wingo visitors last Sunday had a good tide for their striped bass efforts; a 6-foot tide on the flood in the forenoon, slack water, and ebb early in the afternoon. Charles Urfer, George Fonge, Joe Gabarino and others were fairly lucky the previous week.

TRADE NOTES

Winchester Winnings.

Truly a "chip of the old block" is Elwood T. Prior, son of the well-known Toney, for in great style and snap he won the Du Pont Beginners' Trophy at the Golden Gate Gun Club on October 10, by breaking 20 clay pigeons out of 25. The veteran Toney defeated a large field of regulars by scoring 97x100 and also won the handsome trophy donated for high amateur. "Like father like son," both pinned their faith to Winchester factory loaded Leader shells—the "Red W" brand—the kind that won the official grand prize at the Panama-Pacific International Exposition.

There were many lady contestants at the Beginners' shoot and all profited by taking points from the world's champion lady shot, Mrs. Ad. Topperwein of San Antonio, Texas, who gave a wonderful exhibition by breaking 97 blue rocks out of 100. Mrs. Topperwein always uses a Winchester repeating shotgun and Winchester factory loaded shells.

Rem-UMC Notes.

Manning, Ga., was the scene of an interesting shoot recently. Elmer Hoffman, shooting a "perfect shooting combination," a Remington pump gun and Nitro Club shells, was high gun with a score of 183x200, while E. E. Breckenridge and G. A. Roeber, shooting the same brand of shells, tied for second high with scores of 178x200.

Quite a goodly number of shooters turned out for the Memphis (Tenn.) Gun Club shoot and competition was brisk in the trophy event. Geo. Schmidt, shooting Arrow shells, won the Class A cup, scoring 96x100.

C. L. Waggoner won a two day shoot at the Falls City (Nebr.) Gun Club. He shot Arrow shells, and made the excellent score of 386x400.

Chas. Douglas, using a "perfect shooting combination," Remington pump gun and Nitro Club shells, defeated 40 other enthusiasts at the Warsaw (Ind.) Gun Club recently. He broke 47 birds out of a possible 50.

Peters Points.

The 1915 Westy Hogans tournament, like its predecessors, resulted in some notable victories for users of Peters ammunition. Mr. Woolfolk Henderson, known the country over as the winner of the four chief amateur trapshooting events in 1914, was high amateur, breaking 493 ex 500 targets. He also won the John Philip Sousa trophy for high score, 100 straight, on trap No. 1; the Double Target Championship, 86 ex 50 pair; tied for first place in the Westy Hogans Championships, 98 ex 100; second in the Atlantic City Cup race, 147 ex 150.

Mr. Allen Heil of Allentown, Pa., won third amateur average for the entire tournament, 485 ex 500; the Shanley Trophy on trap 2, 99 ex 100; and the Dupont 18 yard championship, 97 ex 100.

HONEYWOOD COMES TO NEVADA STOCK FARM

[Continued from page 8.]

stood at the top of the leading stallions for last year, and will undoubtedly be in a similar position at the close of this season. Honeywood is the last offspring of his dam, Honey Bird, who died the year he was foaled. She was a half-sister to that fine stayer, the 1904 Cesarawitch winner Margrave, as well as to Maid of the Mint, the dam of the 1906 Derby Spearmint, one of the best horses to run in England during this century; while all followers of racing in the eighties remember what a brilliant performer was Friar's Balsam, the sire of Honey Bird, Mother Siegel (dam of the Derby winner Minoru), and many other successful matrons. The Figure System I have no faith in, but for the benefit of those interested therein I may mention that Polymelus comes from No. 3 family and Honey Bird of No. 1 family. I understand that Mr. M. P. Guilliams purchased Honeywood on behalf of Mr. George Wingfield, the proprietor of the Nevada Stock Farm, Reno, Nevada, and that the horse will not be let out. It was Mr. S. Joel's wish that the colt should remain in this country to take part in the Cambridgeshire, for which he offered a contingency on the purchase price; but Mr. Guilliams could not accede to this, as he was anxious to get the horse to his new home as early as possible.

FITTING CATTLE FOR THE SHOWRING.

The showring of our national, state and other important fairs is the greatest opportunity presented to the public to study and compare the capabilities of cattle when developed and brought before them in their finished form.

Encouraged by very complete classifications and liberal prize money and the everlasting inducement of winning the coveted blue and purple ribbon, breeders at the larger shows are now putting up a magnificent exhibit of their chosen breeds. Much credit is due the breed associations, which have materially augmented the prize lists by generous appropriations of money, in order to induce a large and meritorious exhibit and incidentally help pay expenses, which is no small item to the show man.

At this time it may be interesting to offer a few hints, gained by practical experience, in regard to picking out the young calf for showring honors and carrying it on to maturity. Breeders who expect to exhibit their cattle should plan to have the calves born as near Sept. 1 and Jan. 1 as possible because these dates have been adopted on which to base the age of an animal in the younger classes. Those calves born in the fall are best left with their mothers on pasture for the first month or two and then brought up to the barn and the training commenced. By this time the youngsters should have straightened out into shape, and you can do some guessing as to which are going to make winners. Discard those that do not show promise of future excellence and select the calf with level lines, good back and rib, good broad head, legs straight and well set on each corner, mellow hide and good coat of hair, and having the appearance of a good "doer." You can also be somewhat guided by the outcome of former calves from the same dam, although possibly by a different sire.

For the first three months milk should be the main food, developing a stomach that can later on digest the more concentrated foods. Do not get a calf grain-sick at the start, but feed easily, gradually increasing the allowance. Let them learn to nibble at a little grain scattered in a box, ground medium fine, just as soon as they will, and give them a chance at a little clean bright hay. They will soon learn to eat a little and get to chewing the cud, and this will help to develop the stomach. A good digestion is absolutely necessary. Without it the animal will never make a success. It will not stand the crowding and is liable to go back on the feeder just when it should be at its best. Give me the kind that practice "watchful waiting" when the feed pans begin to rattle. They are always ready for the next meal and do not question what the mixture is, just so it is something to eat.

When about 3 months old the calf should be getting all the milk it will suck. If the mother has not sufficient use a nurse cow in addition. Milk is its natural food and the cheapest, and should be continued until it is twelve months old or longer if necessary. However, the older show calves might be weaned after returning home from the fall fairs, as by that time they are well able to eat and digest enough hay and grain and do not miss the milk after a little while. Keep your bull and heifer calves separate after they get to be 3 or 4 months old; they will do better. Do not feed corn too freely. Crushed oats, bran, a little corn chop, oil meal, clover or alfalfa hay, or other good hay and all the milk they want will make a fat calf if it is of the right kind.

Plenty of exercise is important. It creates an appetite and keeps the blood circulating and the system generally in good order. A small paddock for them to run in, handy to the barn, and a little grass to nibble at, is ideal for the calf. Let them run out day and night until the hot weather comes, when they are better in the barn during the day and out at night.

Make friends with your calves and gain their confidence. Never abuse them because they will not suck when you want them to. They will be back on the job at the next opportunity. Suckle twice a day and feed at regular hours and see that the cows are milked out clean if the calves do not take it all.

Break your calves to lead when they are small. It is much easier on the man and better for the calf, so when fair time comes you do not have to break in a lot of big calves, but just put a halter on them and go ahead. It is also advisable to spend a little while before leaving home teaching the calf to stand under halter and to know what is expected of it. A good actor always captures the eye of the judge and may help to steer a blue ribbon in your direction.

Careful feeding is necessary to carry a ripe calf on to maturity or into the yearling class. After the cattle have returned home from the shows the older calves may be weaned and reduced to two feeds a day with more freedom to induce them to exercise and promote growth and muscle, as they must acquire more frame on which to put more fat as they grow older. Feed liberally but avoid crowding at this time or your animal will be done before next fair time comes around. Give them the run of a pasture. The grass will cool out the system and help to counteract any bad effects from previous heavy feeding. During the winter the aim should be to promote weight in growth and not so much fat, and in the spring when you commence to shove them along you will have more size on which to build and your animal will take on condition quickly. A bad feeder is a sore disappointment. Some are naturally so, some made so by overfeeding. When an animal is doing well, let well enough alone and do not be tempted to see how much the animal could eat and thus spoil the whole business. After being overfed once it is an easy matter to get them off again and it takes some time to undo the damage that may have resulted.

Cleanliness about the barn is essential, especially so with the young calves. A good clean straw bed disinfected at least once a week should be provided and a close watch kept for lice and other vermin which will infest a calf in a little while. A washing now and then during the summer with an application of some good dip all over the body will keep the skin and hair in nice shape and kill all lice. This will apply to the older show cattle equally as well as to the calves.

To secure bloom on the cattle, they must first of all be in a thriving healthy condition. The old dead hair must be worked out by washing and currying. This will stimulate the new hair to grow and it will come in soft and thick. Some cattle naturally have heavier coats of hair than others and of better quality, but it is the curly silky thick coat of hair with a mellow hide beneath it that is a delight to the hand of the breeder and judge. Such a combination denotes quality of a high order.

The feet must be well looked after and kept in shape so that the animal can stand squarely on them and not on the heel. The older cattle especially need attention in this respect. Feet allowed to grow out of shape are not only an eye sore but the animal is in more or less pain all the time and cannot walk properly. These points must all be considered before success in the show ring can be assured.

The older members of the show herd should also have a lay off for awhile after returning from the circuit. Cut their feed down gradually to two feeds a day and give them the run of a pasture and some grass. They will be much benefited by the exercise and cooling out. The greatest gains in weight from one year to another is naturally in the younger cattle. After an animal is three or four years old and has been well developed it is near its weight limit and cannot be expected to gain much after that time. The younger cattle, however, may show an increase in weight of from 400 to 800 pounds in one year, governed somewhat by age and sex.

In shipping show cattle do not overload the car. Bed down heavily with straw and allow each animal space enough to lie down comfortably. Feed and water and suckle the calves as regularly as possible. The first shipment is generally the hardest on cattle. After that they become used to traveling. Never get excited loading and unloading, but handle the cattle quietly and do not "cuss" the old nurse cow because "she gets in the way all the time." The old "skate" has considerable to do with her foster sons and daughters winning those ribbons and is entitled to a kind word.

On arriving at your destination get the cattle unloaded and into well bedded stalls as soon as possible. Give them a little hay to nibble at and leave them alone for awhile. They will all lie down and rest. Then offer them water just enough to take the edge off their thirst. They can have more later. Do not attempt to give a full feed right away, such as they were eating before leaving home. Begin with one-half the amount and after they are well rested you can soon get them to eating a full allowance. Make your animals as comfortable as possible in the stalls. Tie them so they can lie out full length if they want to. Exercise them every morning the first thing; it keeps them active on their feet and they enjoy it after being tied up.

Show days are busy ones. Have your candidates looking their best. Dress them up to the best advantage. Go in to the showring determined to win if possible, but if defeated take your medicine like a man. There is another day coming and maybe you will win out next time.—Claude H. Makin in Breeders' Gazette.

Drink Jackson's Napa Soda.

AWARDS IN BREEDING CLASSES.

[Continued from page 5.]

Section 10—Reserve Champion Mare: Dinarth Gem, Geo. A. Heyl.

WELSH PONIES.

Exhibitors—G. A. Heyl, Washington, Ill.; Mrs. Adam Stirling & Son, Des Moines, Iowa; C. E. Bunn, Peoria, Ill.

Section 1—Stallion, four years old or over: (1) Gwindy Duke, G. A. Heyl; (2) Rob Roy, Mrs. Adam Stirling & Son.

Section 2—Stallion, three years old: (1) Gwindy True Blue, G. A. Heyl; (2) Eclipse, Mrs. Adam Stirling & Son.

Section 3—Stallion, two years old and under three: (1) Gwindy Sparkle, G. A. Heyl; (2) Lord Lofty, Mrs. Adam Stirling & Son; (3) Star of Peoria, C. E. Bunn.

Section 4—Stallion Foal: (1) Gwindy's Revelation, G. A. Heyl.

Section 5—Mare, four years old or over: (1) Bess, C. E. Bunn; (2) Llwyn Rosebud, (3) Fickle, Mrs. Adam Stirling & Son; (4) Bird, (5) Lucinda, (6) Nell, C. E. Bunn.

Section 6—Mare, three years old: (1) Gwinygoe Girl, C. E. Bunn; (2) Coquette, Mrs. Adam Stirling & Son.

Section 7—Mare, two years old: (1) Dinarth Fancy, G. A. Heyl; (2) Saffron, C. E. Bunn; (3) Lorena, Mrs. Adam Stirling & Son.

Section 8—Filly Foal: (1) Gwindy's Arbutus, G. A. Heyl.

Section 9—Senior Champion Stallion: Gwindy True Blue, G. A. Heyl.

Section 10—Reserve Senior Champion Stallion: Gwindy Duke, G. A. Heyl.

Section 11—Junior Champion Stallion: Gwindy Sparkle, G. A. Heyl.

Section 12—Reserve Junior Champion Stallion: Gwindy's Revelation, G. A. Heyl.

Section 13—Senior Champion Mare: Bess, C. E. Bunn.

Section 14—Reserve Senior Champion Mare: Gwinygoe Girl, C. E. Bunn.

Section 15—Junior Champion Mare: Dinarth Fancy, G. A. Heyl.

Section 16—Reserve Junior Champion Mare: Gwindy's Arbutus, Geo. A. Heyl.

Section 17—Grand Champion Stallion: Gwindy True Blue, G. A. Heyl.

Section 18—Reserve Grand Champion Stallion: Gwindy Duke, G. A. Heyl.

Section 19—Grand Champion Mare: Dinarth Fancy, G. A. Heyl.

Section 20—Reserve Champion Mare: Bess.

Section 21—Get of one sire: (1) C. E. Bunn for get of Prince Cardill (Bess, Bird, Nell); (2) Mrs. Adam Stirling & Son for get of Criterion (Coquette, Morningstar, Eclipse); (3) G. A. Heyl for get of Gwindy Brennen (Gwindy True Blue, Gwindy's Arbutus, Gwindy's Revelation).

Section 22—Produce of one dam: (1)C. E. Bunn, for produce of Gwindy Wren (Bird, Nell); (2) Mrs. Adam Stirling & Son for produce of Sunshine (Morningstar, Coquette); (3) Mrs. Adam Stirling & Son for produce of Llwyn Robina (Rob Roy, Lorena).

Section 23—Stud (stallion and three mares): (1) Mrs. Adam Stirling & Son for Rob Roy, Fickle, Rosebud, Coquette; (2) C. E. Bunn for Star of Peoria, Bird, Nell, Bess; (3) G. A. Heyl for Gwindy True Blue, Foregate Polly, Dinarth Fancy, Gwindy's Arbutus.

SHETLAND PONIES.

Exhibitors—Geo. A. Heyl, Washington, Ill.; Chas. E. Bunn, Peoria, Ill.; Mrs. Adam Stirling & Son, Des Moines, Iowa; Ina M. Richter, Santa Barbara; T. S. Simpson & Sons, Aurora, Ill.

Section 1—Stallion, four years old or over: (1) King Larigo, Geo. A. Heyl; (2) Louish, (3) Grandee, Chas. E. Bunn; (4) Truant, Mrs. Adam Stirling & Son; (5) Bobby, Ina M. Richter.

Section 2—Stallion, three years old and under four: (1) Sensational Larigo, Geo. A. Heyl; (2) Radiant, (3) Regent, Chas. E. Bunn.

Section 3—Stallion, two years old and under three: (1) Larigo's Perfection, (2) Duke Larigo, Geo. A. Heyl; (3) Sattellite, (4) Spruce, Chas. E. Bunn.

Section 4—Stallion, one year and under two: (1) The Climax, Chas. Bunn; (2) Larigo's Triumph, Geo. A. Heyl.

Section 5—Stallion Foals: (1) Alniqur, Chas. E. Bunn; (2) Larigo's Image, Geo. A. Heyl; (3) Pine Crest Billy, Ina M. Richter.

Section 6—Mares, four years old and over: (1) Princess Larigo, Geo. A. Heyl; (2) Golden Rod Fedalma, Ina M. Richter.

Section 7—Mares, three years old and under four years: (1) Vergie Larigo, Geo. A. Heyl; (2) Quapho, Chas E. Bunn.

Section 8—Mares, two years old and under three: (1) Orvetta Larigo, Geo. A. Heyl; (2) Spring Song, Chas. E. Bunn.

Section 9—Mares, one year and under three: (1) Maple Leaf Larigo, Geo. A. Heyl; (2) Theolita, Chas. E. Bunn.

Section 10—Shetland Filly Foals: (1) Larigo's Primrose, Geo. A. Heyl; (2) Uzell, Chas. E. Bunn; (3) (Foal), Geo. A. Heyl; (4) Bramhope Model, T. S. Simpson & Sons.

Section 11—Senior Champion Stallion: King Larigo, Geo. A. Heyl.

Section 12—Reserve Senior Champion Stallion: Locust, Chas. E. Bunn.

Section 13—Junior Champion Stallion: Perfection Larigo, Geo. A. Heyl.

Section 14—Reserve Junior Champion Stallion: Duke Larigo, Geo. A. Heyl.

Section 19—Grand Champion Stallion: King Larigo, Geo. A. Heyl.

Section 20—Reserve Grand Champion Stallion: Locust, Chas. E. Bunn.

Section 23—Geo of one sire: Get of King Larigo (Perfection Larigo, Duke Larigo, Princess Larigo), Geo. A. Heyl; (2) Get of Prince of Wales (Grandee, Locust, The Climax), Chas. E. Bunn; (3) Get of King Larigo (Sensational Larigo, Vergie Larigo, Orvetta Larigo), Geo. A. Heyl; (4) Get of Grandee (Ovilta, Quapho, Unique), Chas. E. Bunn.

Section 24—Produce of one dam: (1) Produce of Lolita (Ovilta, Theolita), Chas. E. Bunn; (2) Produce of Loleita H. (Larigo's Perfection, Larigo's Tryumph), Geo. A. Heyl; (3) Produce of Lemon Leaf (Vergie Larigo, Maple Leaf Larigo), Geo. A. Heyl; (4) Produce of Nanine (Spring Song, The Climax), Chas. E. Bunn.

Section 25—Stallion and three mares, any age: (1) King Larigo, Princess Larigo, Orvetta Larigo, Pearl, Geo. A. Heyl; (2) Grandee, Ovilta, Quapho, Theolita, Chas. E. Bunn; (3) Perfection Larigo, Vergie Larigo, Maple Leaf Larigo, Larigo's Primrose, Geo. A. Heyl; (4) Locust, Spring Song, Uzell, Bramhope Model, Chas. E. Bunn.

Section 26—Stallion and three mares, all two years old or over, bred by exhibitor: (1) King Larigo, Vergie Larigo, Princess Larigo, Orvetta Larigo, Geo. A. Heyl; (2) Grandee, Ovilta, Quapho, Spring Song, Chas. E. Bunn.

Section 15—Senior Champion Mare: Princess Larigo, Geo. E. Heyl.

Section 16—Reserve Senior Champion Mare: Vergie Larigo, Geo. A. Heyl.

Section 22—Reserve Grand Champion Mare: Orvetta Larigo, Geo. A. Heyl.

THE FARM

WHEAT SMUT CONTROL.

Wheat growers in this country not infrequently experience serious losses caused by preventable diseases. Wheat is preyed upon by a number of parasitic fungi, three of which are classed as smuts. Two of these smuts are common pests in the wheat fields of North America; the other, commonly known as flag smut, is thus far unknown to this continent, though it is fairly common in Australia and certain other parts of the world where wheat culture has been in progress for centuries.

Of the two smuts, bunt or covered smut of wheat, sometimes referred to as stinking smut, is found wherever wheat is grown, sometimes resulting in losses to the farmers of the United States of $20,000,000 or more annually. Not infrequently fields planted to untreated seed and giving promise of yielding 30 or 40 bushels per acre of good wheat will produce a crop of covered smut amounting, in some cases, as as much as 40 to 60 per cent of the crop.

This smut disease is caused by a parasitic fungus which attacks the growing wheat plant before the first leaf appears above ground. Once inside the attacked seedling it continues its growth, and by the time the wheat begins to head the diseased plants produce a crop of smut. If we examine the heads of such a plant we find, instead of normal wheat grains, only a lot of smut balls. In other words, the materials produced by the living plant for the purpose of building up sound wheat grains have been consumed by the parasite in forming its masses of smut spores which finally occupy the exact position in the wheat heads that would have been filled by the kernels had they been allowed to develop. These smut balls consist of nothing but millions of spores inclosed in each case by a thin enveloping membrane. When the smut balls are crushed the spores give off an odor not unlike that of herring brine. The liberated spores become attached to the seed, which, if planted without previous treatment, may produce another crop of smutted wheat.

But or covered smut of wheat is one of the most easily prevented of any of the cereal diseases. The following procedure is recommended: Run all seed wheat through a fanning mill in order to blow out the unbroken smut balls. This being done, the grain should be soaked 10 minutes in a solution consisting of 1 pound of commercial formalin (obtainable at nearly all drug stores) added to 40 gallons of water. The seed thus treated is next allowed to drain and is then piled on the floor and stirred frequently until sufficiently dry to sow. If during the process the kernels have swollen very much, the drill should be set to sow a little thicker, else the quantity sown per acre will be less than was intended.

Recent experiments have shown that in certain sections of the country the soil of a field producing a crop of smutted wheat this year may harbor smut spores to cause the appearance of smut in next year's crop if the field be reseeded to wheat. This sometimes occurs where smut is very bad, in spite of the planting of treated seed, and shows that in such localities crop rotation should be practiced in addition to seed treatment. Bunt or covered smut of wheat attacks no other cereal crop, but other cereals have their own smut diseases.

The other wheat smut occurring in this country, known commonly as loose smut, is not so serious as bunt, although it probably produces an average loss of three-fourths of 1 per cent of the total wheat crop of the country. Loose smut may be prevented by treating the seed by the Jensen hot-water method or some modification of it.

The Jensen method consists in soaking the seed for 10 to 15 minutes in hot water at a temperature of 132 degrees to 133 degrees F. It is highly important that the water shall not rise over 135 or fall below 130 degrees. A temperature below this will not kill the smut, while a temperature too high may affect the germination of the seed. The grain, after treatment, should be immediately spread out to dry. If it can not be spread at once, it should be dipped into cold water to cool and spread as soon as possible.

It is an important function of live stock on the farm to furnish a market for the crops grown, enabling farmers to convert the grasses, forage crops, legumes, and so on, into higher-priced finished products and to return to the soil the plant food taken from it.

Gombault's Caustic Balsam

The Worlds Greatest and Surest

Veterinary Remedy

HAS IMITATORS BUT NO COMPETITORS!

SAFE, SPEEDY AND POSITIVE.

Supersedes All Cautery or Firing. Invaluable as a CURE for
FOUNDER,
WIND PUFFS,
THRUSH,
DIPHTHERIA,
SKIN DISEASES,
RINGBONE,
PINK EYE,
SWEENY,
BONY TUMORS,
LAMENESS FROM SPAVIN,
QUARTER CRACKS,
SCRATCHES,
POLL EVIL,
PARASITES.

REMOVES
BUNCHES or BLEMISHES,
SPLINTS,
CAPPED HOCK,
STRAINED TENDONS.

SAFE FOR ANY ONE TO USE.

We guarantee that one tablespoonful of Caustic Balsam will produce more actual results than a whole bottle of any liniment or spavin mixture ever made. Every bottle sold is warranted to give satisfaction. Write for testimonials showing what the most prominent horsemen say of it. Price, $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use.

The Accepted Standard VETERINARY REMEDY

Always Reliable. Sure in Results.

None genuine without the signature of The Lawrence-Williams Co.

Sole Importers & Proprietors for the U.S. & CANADAS. CLEVELAND, O

NOTHING BUT GOOD RESULTS.

Have used GOMBAULT'S CAUSTIC BALSAM for more than 20 years. It is the best blister I have ever tried. I have used it in hundreds of cases with best results. It is perfectly safe for the most inexperienced person to use. This is the largest breeding establishment of trotting horses in the world, and use your blister often.—W. H. RAYMOND, Prop. Belmont Park Stock Farm, Belmont Park, Mont.

USED 10 YEARS SUCCESSFULLY.

I have used GOMBAULT'S CAUSTIC BALSAM for ten years; have been very successful in curing curb ringbone, capped hock and knee, bad ankles, rheumatism, and almost every cause of lameness in horses. Have a stable of forty head, mostly track and speedway horses, and certainly can recommend it.—C. C. CRAMER, Training Stables, 990 Jennings Street, New York City.

Sole Agents for the United States and Canada.

SAVE-THE-HORSE TRADE MARK REG'T.

If there was ever a year when Save-the-Horse has demonstrated its efficiency and value this has been the year.

We know of no business where success depended more on eternal vigilance and judicious investments and economy the past year, which was so rife with disturbing factors and changes, than in the horse business.

It is a significant and glowing tribute to the powerful efficiency and success of this remedy that those who kept informed stuck closer than ever to Save-the-Horse. They let the "other fellow" do the experimenting. They have seen and know that in the final analysis—the safe cure—the sure cure—and the permanent cure—is brought about with Save-the-Horse; that the remedy which cures when all others fail is the most economical remedy to depend upon first and always.

Undeniable proof is on every hand. Just get with any group of horsemen and trainers, mention Save-the-Horse and you will then realize its all-powerful effectiveness to cure—and to cure sure and permanently—is without a peer.

Save-the-Horse Does Not Blister, Does Not Discolor or Destroy the Hair Nor Leave a Scar. Horse Works as Usual.

$5 Every bottle is sold with a binding contract to refund money or cure any case of BONE AND BOG SPAVIN, THOROUGHPIN, RINGBONE (except low), CURB, SPLINT, CAPPED HOCK, WIND PUFF, SHOE BOIL, BROKEN DOWN, INJURED TENDONS AND ALL OTHER LAMENESS.

Harpers Weekly and The Breeder and Sportsman

$5.50 worth for $3.25

Breeder and Sportsman

One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly

Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

Makes Them Sound **SMITH'S WONDER WORKER** Keeps Them Sound

Allays fever and inflammation at once, this must be done to effect a cure. UNEXCELLED AS A REMEDY for bone and bog spavins, curbs, splints, ringbones, capped hocks, shoe boils, wind puffs, thoroughpins and bunches of all kinds, bowed, strained and ruptured tendons, shoulder, hip and stifle lameness, weak joints, sweeny, cording up, throat trouble and rheumatism. Relieves pains and soreness without loss of hair or a day's let up. As a leg and body wash it has no equal, invigorates and restores the distressed horse between heats and after hard workouts.

Price $2.00 per bottle, prepaid on receipt of price. $16.00 per doz.; $10.00 per gal.

W. E. DETELS, Pleasanton Cal., Distributing Agent, for the Pacific Coast.

W. K. SMITH & CO., Tiffin, Ohio.

TRAINING DISTEMPER.

Ever hear of this? Yes, of course you did, but under different name. You have seen it in cases where the horse was "overtrained," worked a little too fast and regular. The nervous system gets the shock, after the voluntary muscular system has been taxed too heavily. The trouble starts in the mucous surfaces and the digestive apparatus, too, must then be impaired. He begins to cough when the glands are materially affected.

"SPOHNS" is your true salvation. It restores the appetite and normal functions of the whole system. The action in such cases is remarkably rapid and sure for recovery when you use this remedy according to instructions with each bottle. Only 50c and $1 a bottle; $5 and $10 a dozen. Sold by all druggists, horse goods houses, or express prepaid by manufacturers.

WINCHESTER

SELF-LOADING RIFLE, .401 CALIBER

IT GIVES A STREAM OF SMASHING BLOWS

No need to fear the most powerful or most dangerous animal, if equipped with the .401 Winchester. It can deliver five smashing, one-ton blows in a few seconds, with aim. This rifle is a self-loader, and it is only necessary to pull the trigger for each shot. It shoots cartridges small in size but powerful in execution loaded with either 200-grain or 250-grain bullets. It beats any other rifle of this type for power and is the most effective hunting rifle made. Your first hunt will prove every word we say.

THE GRAND PRIX—The highest honor—was awarded to Winchester Guns and Ammunition at the Panama-Pacific International Exposition.

CH. MAJOR DARE, GRAND CHAMPION SADDLE STALLION, P-P. I. E.

JUST A MOMENT, MR. HORSEMAN: Read this short dispatch from the Blue Grass: "Marvin, trainer of William 1:58½, paid $610, top price of sale for Verbena Ansel (1) 2:22; Anselot (1) 2:28½ brought $535; Edna Ansel $235; Prince Ansel yearlings outsold all other horses in Lexington sale."

LET THESE FACTS AND FIGURES "SINK IN," AND REMEMBER THAT

WOODLAND STOCK FARM

(Incorporated)

"Where the Champions Come From"

WILL HOLD A GREAT SALE OF TROTTING HORSES ON

MONDAY, OCTOBER 25, 1915

at the farm, offering a grand array of matchless stock, of all ages and sexes—colts, fillies, campaigners, futurity prospects and brood mares, some with foal at foot and all bred this season.

A WORLD'S CHAMPIONSHIP FLAVOR TO THESE:

BAY FILLY, yearling, by PRINCE ANSEL (2) 2:20½, dam EOCITA by Moko; grandam Mendocita (dam of MARY PUTNEY (3) 2:05½, world's champion three-year-old trotting filly) by Mendocino 2:19½. This filly is a great prospect and can trot a forty gait now. Every right to be a future champion.

CHESTNUT FILLY, weanling, by PETER THE GREAT 2:07¼, leading sire of trotting speed, dam CARRIETTA 2:18, world's greatest producer of yearling trotters, and dam of SULDINE (2) 2:12, holder of world's record for two-year-old trotters on halfmile track.

BAY GELDING, yearling, by BONADAY 2:11¼, dam ONISKA (dam of San Francisco 2:07¾, sire of MARY PUTNEY (3) 2:05½, world's champion three-year-old trotting filly) by Nutwood Wilkes 2:16½. This is a snappy, nervy youngster and a trotter.

LOTTIE WHIPPLETON 2:15 (dam of the world's champion yearling trotting gelding Anselot (1) 2:28½; Prince Lot 2:07¾, Lottie Ansel (2) 2:14¼ and Ruth Ansel (3) 2:21; in foal to Robert Bingen. This is one of the grandest matrons in the land.

AND THESE RANDOM SELECTIONS ARE OF EQUAL QUALITY:

Nosegay B. (dam of Aristo 2:08¼ and Nuristo 2:10½) by Langton 17536; in foal to True Kinney 2:12¼.

Brown colt, yearling, by Prince Ansel (2) 2:20½, dam Silver Haw (dam of Helen Stiles 2:06¼, etc.) by Silver Bow 2:16; can trot quarter in forty seconds.

Ruby Crellin, by C. the Limit 2:03¼, dam La Moscovita (dam of Bon Guy (3) 2:11¾, etc.) by Guy Wilkes 2:15¼, and filly foal by Robert Bingen 2:11¼; in foal to Robert Bingen.

Maggie Hall by Moko, dam Maggie Yeazer (dam of Walnut Hall 2:08¼, etc.) by Red Wilkes; in foal to Robert Bingen.

Peter's Queen, b m (4) by Peter the Great 2:07¼, dam Sonoma Queen 2:25, trial 2:10½ (full sister to Sonoma Girl 2:04¼); this mare can show half in 1:06 now, quarter in :32, and will trot in 2:10 this fall; she is one to buy to race and breed.

Decoratio by Prince Ansel, dam Magella B. (dam of 3) by Nushagak.

Princess Josie by Prince Ansel, dam Josie D. (dam of Joseph Ansel (3) 2:12¾, etc.,) by Nutwood Wilkes 2:16½.

Princess Viola by Prince Ansel, dam Viola by Gen. Benton.

Silver Haw (dam of Helen Stiles 2:06¼) by Silver Bow; colt at foot by True Kinney 2:12¼.

Woodland Bonnie Derby (dam of Bonnie Ansel 2:11¼, Bonnie Princess, trial 2:07¼, etc.) by Chas. Derby 2:20, dam Bonnie Red by Red Wilkes.

Josie D. (dam of Joseph Ansel (3) 2:12¾, etc.) by Nutwood Wilkes, dam Everette (dam of Wesos 2:12¼, etc.) by Nephew; colt at foot by True Kinney 2:12¼.

The Attraction by Peter the Great 2:07¼; filly at foot by True Kinney 2:12¼.

Aleema by Nutwood Wilkes 2:16½, dam Malverna by McKinney 2:11¼, Prince Magella (3) ch g, pacer, by Prince Ansel, dam Magella B. (dam of 3) by Nushagak.

These are by no means all of the royally bred individuals to be offered. Woodland Stock Farm horses are in greater demand than ever, and from the catalog you can pick something to your liking. Send at once for full list of horses to be sold, addressing

WM. HIGGINBOTTOM, Auctioneer, San Francisco.

HARRY DOWLING, Mgr., Woodland, Cal.

$5 DUE ON FOALS BORN 1915

NOVEMBER 1st, 1915

$300 TO NOMINATORS OF DAMS OF WINNERS

MONEY DIVIDED AS FOLLOWS:

$2100 for Three-Year-Old Trotters.

100 to the Nominator of the Dam on whose Original Entry is named the winner of the Three-Year-Old Trot.

800 for Two-Year-Old Trotters.

50 to the Nominator of the Dam on whose Original Entry is named the Winner of the Two-Year-Old Trot.

50 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when mare was bred.

$1200 for Three-Year-Old Pacers.

100 to the Nominator of the Dam on whose Original Entry is named the Winner of the Three-Year-Old Pace.

500 for Two-Year-Old Pacers.

50 to the Nominator of the Dam on whose Original Entry is named the Winner of the Two-Year-Old Pace.

50 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when mare was bred.

$150 in Special Prizes was paid to Stallion Owners in December, 1914.

ENTRANCE AND PAYMENTS—$2 to nominate mare on December 1, 1914, when name, color, description of mare and stallion bred to must be given; $5 March 1, 1915; $5 November 1, 1915; $10 on Yearlings May 1, 1916; $10 on Two-Year-Olds February 1, 1917; $10 on Three-Year-Olds February 1, 1918.

STARTING PAYMENTS—$25 to start in the Two-Year-Old Pace; $35 to start in the Two-Year-Old Trot; $35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start as Two-Year-Olds are not barred from starting again in the Three-Year-Old divisions.

SUBSTITUTIONS.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before May 1, 1916, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment nor will any entry be liable for more than amount paid in or contracted for.

E. P. HEALD, President.

F. W. KELLEY, Secretary, Post Office Drawer 447, San Francisco, Cal..

Where buyers will congregate:

DeRyder's Fall Sale

at San Francisco—During the P.-P. I. E. Trots

is attracting consignments of the highest class in every way. Glance at these "for a starter":

BARGAINS LIKE SPRIGGAN 2:08¼ FROM PLEASANTON DRIVING PARK

Astro Harvest, b m (5) trotter by The Harvester 2:01; dam Grace Rysdyk by Judge Rysdyk 4525; 2nd dam Fanny Sheridan by Phil Sheridan 630. She is a beautiful bay mare with black points and has shown beyond a doubt that she is the real thing in the speed line. Her trial in 2:09¼ with a last half in 1:02¾ and a quarter in 30 seconds stamps her as a real trotter. That she should inherit this remarkable turn of speed from her famous world champion sire, The Harvester 2:01, is natural, and in careful hands she should equal her illustrious sire's mark. On her dam's side she comes from the famous Rysdyk Hambletonian family, noted for their stamina. She was bred by the late August Uhlein, of Milwaukee, and registered in Vol. XXI.

Bay Gelding (4) by Vernon McKinney 2:01½; dam by Diablo 2:09¼; 2nd dam Geraldine 2:16¾ (dam of Leata J. 2:03, etc.) As a three-year-old he worked in 2:12 with half in 1:02½ and quarter in 30 seconds. He is a nice, young, level headed pacer, does not wear the straps and is sound. He had no futurity engagements, hence was never given a real "searching," but he has the speed of his sire, Vernon McKinney, and with his maternal blood that made Leata J. famous he is fit for any company.

The Earnest (3) 2:21¼, trial 2:07¾, by The Exponent 2:11½; dam Mardella (dam of 3) by Del Mar 2:16¾. The Earnest has shown that in the right hands he is a two minute trotter as he trotted a half on the Pleasanton track in 1 minute on the end of a slow mile. He has been turned out in pasture during the greater part of 1915 and is now ready to be trained for 1916.

Prince Del Monte, ch g, trotter, foaled 1906 (tr. 2:15½), by Kinney Lou 2:07¾, Prince Del Monte is a full brother to Della Lou 2:15¾. He is handsome enough for a show horse and gentle enough for a lady to ride or drive. Sound in every respect and is sold to settle an account.

Leola Lou, gr m, trotter, by Kinney Lou 2:07¾; dam Princess Leola by Lionel K., son of Bay Rose 2:20½; 2nd dam Lady Menlo by Menlo 13028 by Nutwood 600. She is a fine, large road mare, gentle for a lady to drive and has been used exclusively by Mrs. MacKenzie. She is sold for no fault.

Baroness Psyche, roan mare, trial (2) 2:14, by Baron Review 2:21¼, dam Durnella 2:29¾ (dam of 4) by Axtell (3) 2:12.

Mildred Togo, chestnut mare (2) 2:16½, (3) 2:11½, trial 2:08¼, by Togo 2:27, dam Lady May (dam of 9) by Port Leonard 12953.

Bay colt, (2) by Copa de Oro 2:01; nicely broken.

This is only a portion of the consignment from Pleasanton Driving Park; watch for the balance.

CHOICE CONSIGNMENTS FROM VARIOUS OWNERS

From P. H. SMITH, Los Angeles:

El Volante S., b h, (5) by El Volante (3) 2:13¼, dam Seville by Strathway; 2nd dam by Simmons; 3rd dam by Baron Wilkes; 4th dam by Mambrino Patchen. One of the handsomest horses in California and with limited training as a three-year-old showed a mile better than 2:20. Stright and sound every way and a pick-up for any one wanting a fine, well-bred young stallion.

Bay Filly, (2), trotter, by Zombro 2:11; dam Katherine A. by Diablo 2:09¼. With a very limited training as a two-year-old showed a quarter in 36 seconds. Has never been trained since and is sound and straight every way. Full sister to Zomerine S. (3). trial 2:16.

Two-year-old filly by The Bondsman, dam Rosemary 2:25 by Raymon 2:27¼; nicely broken as a yearling, since when she has been on pasture.

Blanca S. (5) by Red McK. 43766, dam Katherine A. by Diablo 2:09¼; a show mare, never trained for speed.

Katherine A., brood mare by Diablo 2:09¼, dam by A. W. Richmond.

Rosemary 2:25, brood mare, by Raymon 2:27½, dam Black Bess by Guide 2:16¼.

From JERRY DORAN, Oakland:

Bay gelding, two-year-old, by The Bondsman; good conformation and bred to make speed early. Will be broken to harness before sale day.

From MRS. C. L. JONES, Modesto:

Johnny, a standard bred gelding, has worked in 2:20 pacing, but is now a full fledged saddle horse. He goes that old Kentucky single foot as oily as can be, and will soon show all five gaits. A nice young pleasure horse, one you will enjoy owning.

From R. A. STEVENSON, San Antonio, Texas:

Dr. Dawson, bay gelding, pacer, trial 2:11¼, by Del Coronado 2:09½; never raced, but has the speed to win; one to buy to race next year; level headed and free legged.

Black mare, five-year-old, by Oh So 2:25½, and two of her produce, an unbroken two-year-old by Directly 2:03¾ and a weanling by Vernon McKinney 2:01½. Right all around.

From BUDD DAVIS, Caldwell, Idaho:

McGregor Bond, 60149, b g by The Bondsman; dam Gregan by Steinway 2:25¾; 2nd dam Maggie McGregor by Robert McGregor 2:17½, etc. He is a nice, fine looking two-year-old, just nicely broken but has never been trained. A better bred or finer looking colt does not live, and with just a little training will show enough to make him worth while.

Brown Filly (2), trotter, by The Bondsman, dam Ava J. 2:28 by Zombro 2:11; 2nd dam Ventura by Secretary. She is a little beauty and is sure to make a trotter. She is by The Bondsman and her dam is by Zombro 2:11, McKinney's best son.

Belle Demonio, b m, foaled 1911, by Demonio Wilkes 2:09¼; dam Jessie M., tr. 2:22½ (dam of Hal J. 2:09¼ and Della H. 2:10) by Del Norte 12895. This filly was cut on the wire fence, otherwise she was as promising as her full sister and brother Della H. and Hal J. Any one wanting a nice young broodmare should find himself well suited with this one.

From E. A. SWABY, Dixon:

Roan mare (6) by San Francisco 2:07¾, dam Birdie (dam of Bodaker 2:13) by Jay Bird 5060; grandam Lady Lyle by Geo. Wilkes 2:22. Bred right, handsome, 16 hands, 1100 lbs., a trotter, sound, gentle for road use and broken to ride. You will like her.

From T. D. SEXTON, Oakland:

Lucretia Bond (3), br f by The Bondsman, dam Lucretia 2:13¼ by Nazote 33527 (full brother to Azote 2:04½), grandam Lucyneer by Electioneer 125. Here is a nice filly for someone, a little beauty and making speed every day. It is safe to say that she will show better than a twelve gait by the day of sale. Don't overlook her.

From HENRY B. SMITH, Pleasanton:

Della H. 2:10 by Hal B. 2:04½ (sire of Hay Boy 2:01¼ and many others), dam Jessie M. trial 2:22 by Del Norte 2:08. Della H. is a full sister to Hal J. 2:09¼ and is too well and favorably known to need comment here. Only two years ago she was unbeatable through the California circuit and she is still just as good. Only the lack of local classes for her puts her on the market.

Remember this about DeRyder's Sales: THEY GET THE HORSES—THEY BRING THE BUYERS. This one, with horsemen from all over the country in attendance at the exposition trots, should be "the best ever." Patronage solicited on usual terms and guarantees of service. Remember, early consignors get most benefit of advertising. Address for full particulars,

CHARLES L. DeRYDER, MANAGER PLEASANTON, CALIFORNIA

Horses Wanted for Big Money

I WILL SEND several carloads of High Class Trotters and Pacers to the big Chicago Horse Sale, Dec. 13-18. No advance money required for shipment. Cars will be loaded at San Francisco and Los Angeles. The Easterners pay big prices for California horses, and times are getting better over there, by leaps and bounds. Send them where the buyers are. For particulars:

Robt. A. Smith, 1216 Dewey Ave., Los Angeles, Cal.

PHOENIX (Arizona State Fair).....Nov. 15-20

PACIFIC COAST HORSE SHOWS.

While Madison Square Garden has long been accepted as the real home of the American horse show, and its success and popularity have been active stimulants to the very many shows which have come into flourishing existence in the eastern section of our country, the recent affair at the exposition has proven beyond doubt that there can be built up on this coast a great premier show, with its attendant circle of minor events, that need grant precedence to none in the matter of popularity, the quality of its entrants, or the brilliance of its setting. The east has the best of us in several respects to begin with, owing especially to its more densely populated centers, and to its greater numbers of men and women of wealth and leisure, but it cannot produce better horseflesh or more devoted friends of his equine majesty than do we.

Numbers of successful shows have been held on the coast, either independently or in connection with leading fairs, and an organized effort on the part of show promoters and exhibitors would undoubtedly result in the firm establishment of a series of fixed events, to be held annually. The time is ripe, and the proper concerted action of all interested parties should be taken without delay. The horse show has become one of the leading and most pleasing features of the California state fair; in the Canadian cities of Victoria and Vancouver there is a deep and abiding love for the show horse; Seattle, Tacoma, Portland and Spokane are all "receptive candidates"; Los Angeles would favor an annual show of proper "class" and character; the Tournament of Roses, the one great celebration of the season at Pasadena, has the horse as the foundation upon which its popularity is built; the charity horse show held last winter in this city drew crowds that overran the capacity of the Riding and Driving Academy, and the exposition show was a genuine revelation.

This publication, whose every effort for over thirty years has been devoted to the furtherance of the interests of the horse, pledges its unreserved support to the promotion of a series of horse shows on this coast, whether day or night affairs, society shows or utilitarian exhibits, and will be pleased to have friends of the movement make use of its columns. We ask that horse lovers everywhere use our columns for the presentation of their views, assuring them of our best wishes and heartiest co-operation at any and all times.

LAST CALL FOR WOODLAND SALE.

For the last time we wish to remind breeders and campaigning horsemen of the fall sale at Woodland Stock Farm which is to be held next Monday, October 25, at the farm in Woodland, as the offerings to be made are of a most desirable quality from every standpoint. The farm commends them to the public without reserve, feeling every confidence that each individual sold will prove a source of satisfaction and profit to the new owner.

It is a matter of regret that the present outlook for the future of the trotting horse on this coast is not brighter, for in the Woodland consignment are any number of youngsters, futurity candidates, brood mares of note and some prospects for early racing that under conditions formerly existing here would bring fabulous prices. Think what a wellbred mare ready to trot in 2:10 would bring if things were "right" in the racing business, and then go bid on Peter's Queen, for she looks fit to take east where racing is good. No sire has achieved a success equal to Peter the Great's, and no broodmare has a record like that of Carrietta 2:18, and in the weanling filly resulting from the mating of these two the farm is offering one of the kind that comes only once in a lifetime. She is straight and sound, nicely grown, with extensive engagements both here and in the east, so that her buyer will have "protection" and her earning capacities as a juvenile performer will have fullest play.

Then, too, there are a number of close relationship to Mary Putney (3) 2:05½, the three-year-old sensation of the closing weeks of the present season, and others similar in breeding to Woodland Stock Farm's yearling champions, Verbena Ansel (1) 2:22 and Anselot (1) 2:28½, both of whom sold at Lexington during the trots for excellent prices. Only by a perusal of the catalog can an adequate idea of the various individuals be gained, and this booklet may be obtained upon request to this office, to Auctioneer William Higginbottom, 297 Valencia street, San Francisco, or to Manager Dowling at the farm. Yearlings and developed prospects will be shown in harness so bidders may see for themselves just how they "put 'em down," and every horse, young or old, is guaranteed exactly as represented. The round trip to the sale from bay points may be made in one day without inconvenience, and we most respectfully urge your attendance. Failure to be among those present may cause you future regrets.

THE WESTERN HORSEMAN FUTURITY.

Some years ago The Western Horseman, of Indianapolis, inaugurated a futurity that was "something new" in regard to conditions, the initial number meeting with a gratifying popularity that resulted, eventually, in the permanent establishment of the stake under slightly modified but yet extremely generous conditions. It is for three-year-olds only, the purse being divided eighty-five per cent for trotters and thirty-five per cent for pacers, and its racing forms one of the main attractions of the Indiana State Fair. The present number for foals of mares bred this year (foals of 1916 to race in 1919) has an estimated value of $10,000, and closes on Monday, November first, with an initial payment of only one dollar. Eleven dollars carries entry to the year of the race, and the event, whose detailed conditions appear elsewhere, is in every way worthy the patronage of our western breeders.

RURAL CREDITS SYSTEM ENDORSED.

The Farmers' Protective League of California is urging the adoption of Amendment No. 5, whereby the State is authorized to establish a rural credits system, and is opposing Amendment No. 9, which removes the present constitutional safeguards as to taxation and permits the Legislature to enact tax laws without referring them to the people for a vote.

At the preliminary hearings of the State Rural Credits Commission, recently appointed by the Governor, among the witnesses present were prominent members of the Farmers' Protective League, notably Frank B. McKevitt, who is president of the organization. Others who gave testimony were Geo. S. King, Hon. Alden Anderson, J. L. Nagle, E. A. Gammon, and others, all of whom gave cogent reasons why the state should lend its aid to settlers.

In opposing Amendment No. 9, which is Senate Constitutional Amendment 38 the central organization of the League is responding to the wishes of the various country organizations. Farmers generally do not see the reason for authorizing the abolishment of the existing system in advance of providing another taxation method, especially in view of the fact that Governor Johnson has only recently appointed the Commission to investigate the taxation problems in California. The last legislature appropriated $75,000 for this purpose.

The League submitted Amendment No. 9 to each of the thirty-two local organizations in the state and the decision was overwhelmingly against its adoption.

HORSE BUYERS TO GATHER HERE.

Something tells us—and it wasn't a "little bird" that did it, either—that more horsemen and horse buyers are going to be brought together in this city during the exposition trots than have been assembled at any one point on the Pacific coast for many, many moons, and Charles L. DeRyder has taken advantage of this auspicious circumstance for the staging of his annual fall sale of light harness horses. The Kentucky sales at Lexington during the course of the trots have always been attended with the most abundant success, and as the ranks of home buyers at the forthcoming local sale will be augmented by the presence of many from the central west and east, the prices received should reach a higher level than those attained by any recent western sales.

The feature consignment of the sale will, of course, be that from Pleasanton Driving Park, which will contain a number of most desirable racing prospects. The complete list of offerings from the MacKenzie stable has not as yet been announced, but the advance notices of the same include several that should cause some very spirited competition among bidders in search of something to take to the races and earn some money with. Especially attractive are the pair of trotters presented in Astro Harvest and The Earnest, the former a daughter of the world's champion trotting stallion, The Harvester 2:01, and the latter a gelded son of L. E. Brown's good speed sire, The Exponent. This lad was too full of "pep" as a stallion, and after castration was slow in rounding to, so that no effort was made to prepare him for racing this season. The after effects of his operation have entirely disappeared and he is fit to shape for any company. The Exponent has never sired a faster foal, as he has worked in 2:07¾ and has trotted a half in one minute on the end of a slow mile. He is right on his dam's side, being out of the good producer Mardella by Del Mar. The Harvester mare is a nice big five-year-old, from a stout maternal line, and has given evidence of her quality by negotiating the full route at Pleasanton in 2:09½, with the final fractional parts in 1:02¾ and :30.

Vernon McKinney 2:01½ is not only the fastest of the McKinney family, but those in the know have no hesitation in recommending him as a speed sire, as his youngsters are showing most favorably. The MacKenzie bunch to be sold contains one of his oldest foals, a four-year-old gelding out of a mare by Diablo 2:09¼, grandam Geraldine 2:16¾ (dam of Leata J. 2:03, etc.), that has every appearance of being "the goods." Certainly he is "bred fast," and he is fast, having worked in 2:12, 1:02½, :30 as a three-year-old. Having no futurity engagements he was never strung out in his previous training, and as he is sound and free legged he is a very desirable sort of a pacer. The reliability of Mr. MacKenzie's "owners' statements" has been proven in many ways—by Spriggan 2:08¼, for instance, among others—and these are presented as "right," while numerous other lots from various owners measure high in quality.

Mr. DeRyder is due home this week—has probably arrived before this is in print—and further consignments and the exact location and date of the sale will be announced in our number of October 30.

PAYMENT DUE ON 1915 FOALS.

Breeders who have entries in Pacific Breeders' Futurity Stakes Number Fifteen, for foals of this year, must bear in mind that payment number three, five dollars, becomes due on Monday, November first, and should be made promptly to F. W. Kelley, Sec., P. O. Drawer 447, San Francisco. This number of the series is to be raced in 1917 and 1918 when entrants therein are two and three years of age, portions of the stake being set aside for trotters and pacers of both ages. No colt at present eligible to the event should be allowed to drop out, and brood mare owners who failed to patronize the stake originally and now find themselves possessed of well bred, promising weanlings may provide engagements for the same by taking advantage of the stake's substitution clause. A number of substitutions are available and may be procured through the secretary. The list of entrants is not large, and an investment in a nomination at this time may prove the means of assuring a generous return in the future.

Every season there is fresh and positive demonstration of the value of futurity engagements for trotting bred colts, and when an engagement can be so economically secured as in this stake it becomes merely a business precaution to make entries.

Awards in Breeding Classes

P.-P. I. E. HORSE SHOW

In the Breeder and Sportsman of October 16 there was published the list of awards in the breeding classes of Standard Trotters, Thoroughbreds, Arabians, Morgans, Percherons, Jacks and Jennets, Hackneys and Welsh and Shetland ponies. Herewith we present the awards in the classes for Saddle Horses, Shires, Belgians and Clydesdales, the two numbers together forming a complete record of the results of the judging of the breeding classes.

SADDLE HORSES.

Exhibitors—Miss Loula Long, Kansas City (Longview Farm, Lee's Summit, Mo.); Adelaide S. Gillis, Los Angeles; Revel Lindsay English (Sierra Vista Stock Farm), Chino, Cal.; E. D. Moore, Columbia, Mo.; Bridgford Company, San Francisco, Mrs. E. P. Riggle, El Centro, Cal.; Mrs. Charlotte B. Anderson, Oakland; Martha Freeman, Los Angeles; F. J. Bork, Sawtelle, Cal.; John E. Marble, Los Angeles; Thornberry & Shropshire, Los Angeles; Mrs. W. C. Ralston, San Francisco; Dr. W. J. Smyth, Oakland; John S. Bryan, Hollister, Cal.

Section 1—Stallion, four years old or over: (1) My Major Dare, Miss Loula Long; (2) Don Castano, Adelaide S. Gillis; (3) Imperious King, Miss Loula Long; (4) King of the Highlands, Revel Lindsay English; (5) Majestic McDonald, E. D. Moore; (6) Highland Monarch, Adelaide S. Gillis.

Section 2—Stallion, three years old and under four: (1) Comedian, Revel Lindsay English.

Section 3—Stallion, two years old and under three: (1) LeGrand McDonald, Bridgeford Co.; (2) San Vicente, Adelaide S. Gillis; (3) Midnight Dare, Miss Loula Long; (4) Rigolette, Mrs. E. P. Riggle; (5) Weissinger's Chief, Mrs. Charlotte B. Anderson.

Section 4—Stallion, one year old and under two: (1) Missouri's Premier, Miss Loula Long; (2) California's Best, Bridgford Co.; (3) Monarch Dare, Martha Freeman; (4) Tourist Peavine, Revel Lindsay English; (5) Goldie Rex, F. J. Bork; (6) Cochise, Revel Lindsay English; (7) Pablo, John E. Marble.

Section 5—Stallion Foal: (1) I'll Show U, Miss Loula Long; (2) Gold of Ophir, Mrs. E. P. Riggle; (3) San Marcos, Revel Lindsay English.

Section 6—Mare, four years old or over: (1) My Idol, E. D. Moore; (2) Undine, Adelaide E. Gillis; (3) Hilda, (4) Maurine Fisher, Miss Loula Long; (5) Benita P., John E. Marble; (6) Katherine Grigsby, Miss Loula Long; (7) Helen Idlewood, Revel Lindsay English.

Section 7—Mare, three years old and under four: (1) Mavis, Thornberry & Shropshire; (2) Honda, John E. Marble; (3) Virginia Mayla, Miss Loula Long; (4) Razzle Dazzle, Thornberry & Shropshire; (5) Butterfly Dare, E. D. Moore; (6) Benicia, John E. Marble; (7) Undulata Annie, Mrs. W. C. Ralston.

Section 8—Mare, two years old and under three: (1) Peg O' My Heart, Dr. W. J. Smyth; (2) Alice Queen, Miss Loula Long; (3) Bellmarrillis, (4) Hazel Simmons, Revel Lindsay English.

Section 9—Mare, one year old and under two: (1) Rexie Dare, Miss Loula Long.

Section 10—Filly Foals: (1) Major's Hilda, Miss Loula Long; (2) Santa Monica, Adelaide S. Gillis; (3) Candy Girl, Dr. W. J. Smyth; (4) Lillie Bell, Bridgford Co.; (5) Edith Ames, (6) Glorianna MacDonald, Revel Lindsay English; (7) Santa Ynez, Adelaide S. Gillis.

Section 11—Senior Champion Stallion: My Major Dare, Miss Loula Long.

Section 12—Reserve Senior Champion Stallion, Don Castano, Adelaide S. Gillis.

Section 13—Junior Champion Stallion: Le Grand McDonald, Bridgford Co.

Section 14—Reserve Junior Champion Stallion: San Vicente, Adelaide S. Gillis.

Section 19—Grand Champion Stallion: My Major Dare, Miss Loula Long.

Section 20—Reserve Grand Champion Stallion: Don Castano, Adelaide S. Gillis.

Section 15—Senior Champion Mare: My Idol, E. D. Moore.

Section 16—Reserve Senior Champion Mare: Mavis, Thornberry & Shropshire.

Section 17—Junior Champion Mare: Peg O' My Heart, Dr. W. J. Smyth.

Section 18—Reserve Junior Champion Mare: Major's Hilda, Miss Loula Long.

Section 21—Grand Champion Mare: My Idol, E. D. Moore.

Section 22—Reserve Grand Champion Mare: Mavis, Thornberry & Shropshire.

Section 23—Get of one sire: (1) Get of Prince Arthur (Honda, Benicia, Bonita P.), John E. Marble; (2) Get of Don Castano (California's Best, Santa Ynez, Goldie Rex), Adelaide S. Gillis; (3) Get of Rex McDonald (Helen Idlewood, Comedian, Greyhurst), Revel Lindsay English; (4) Get of My Major Dare (Midnight Dare, Rexie Dare, Major's Hilda), Miss Loula Long; (5) Get of Highland Squirrel King (Edith Adams, Highland Lucia, Cochise), Revel Lindsay English.

Section 24—Produce of one dam: (1) Produce of Pasadena (Bonita P., Benicia), John E. Marble; (2) Produce of Undine (San Vicente, Santa Ynez), Adelaide S. Gillis; (3) Produce of Cracker Jack (Tarna Denmark, Gold of Ophir), Mrs. E. P. Riggle; (4) Produce of Livia (The Marshall, San Marcos), Revel Lindsay English; (5) Produce of Black Belle (Candy Kid), Bridgford Co.; (6) Produce of Black Bess (Cousin Sue, Peter Pan), John S. Bryan.

Section 25—Stud (stallion and three mares): (1) My Major Dare, Hilda, Maurine Fisher, La France, (2) Imperious King, Katherine Grigsby, Virginia Mayla, Alice Queen, Miss Loula Long.

SHIRES.

Exhibitors—Easton & Ward, Burlingame, Cal.; Henry Wheatley, Napa, Cal.; Truman's Pioneer Stud Farm, Bushnell, Ill.; Wm. Crownover, Hudson, Ia.; Jack London, Glen Ellen, Cal.; A. C. Ruby, Gresham, Ore.; A. G. Soderberg, Osco, Ill.; Bridgford Co., San Francisco.

Section 1—Stallion, four years old and over: (1) Boro Blusterer, (2) Stow Royalty, Trumans' Pioneer Stud Farm; (3) Anwick Arthur, Easton & Ward; (4) Dunchurch Baronet, Wm. Crownover; (5) Neuadd Hillside, Jack London; (6) Harboro Combination, Henry Wheatley; (7) Blymhill Forester, Easton & Ward.

Section 2—Stallion, three years and under four: (1) Royal Patch, Trumans' Pioneer Stud Farm; (2) Blackhawk Barn King, Easton & Ward; (3) Nailstone Boxer III., A. C. Ruby; (4) Wrydelands Surprise III., Trumans' Pioneer Stud Farm; (5) Witchford Albert, Easton & Ward; (6) Salvador Forest King, Henry Wheatley; (7) Blackhawk Victor Chief, Easton & Ward.

Section 3—Stallion, two years and und three: (1) Royal Friar II., (2) Royal Moors, Trumans' Pioneer Stud Farm; (3) Columbia Model, A. C. Ruby; (4) Eureka Menestrel, Trumans' Pioneer Stud Farm; (5) Sylvia King, A. G. Soderberg; (6) Paramount Milton, Wm. Crownover.

Section 4—Stallions, one year and under two: (1) Forage Premier, Trumans' Pioneer Stud Farm; (2) George B., A. C. Ruby; (3) Blackhawk Gay Lad, Easton & Ward; (4) Servens' Hengist, Trumans' Pioneer Stud Farm; (5) Blackhawk Minstrel, Easton & Ward; (6) Carranga, A. C. Ruby.

Section 5—Stallion Foals: (1) Salvador Conqueror, Wheatley; (2) Blackhawk Mystery, (3) Blackhawk Rung, O Bells, (4) Blackhawk Rising Star, Easton & Ward; (5) Salvador Banker, Henry Wheatley.

Section 6—Mares, four years and over: (1) Beeby Judy, Trumans' Pioneer Stud Farm; (2) Flowford Daisy III., Easton & Ward; (3) Normandy Sweet Briar, Trumans' Pioneer Stud Farm; (4) Wallington Sunbeam, A. G. Soderberg; (5) Quanea Diamond, Easton & Ward; (6) Lady Redlynch, Henry Wheatley; (7) Pelham Queen II., Bridgeford Co.

Section 77—Mare, three years and under four: (1) Eastern Manners, (2) Eureka Diamond, Trumans' Pioneer Stud Farm; (3) Blackhawk Blossom, Easton & Ward.

Section8—Mare, two years and under three: (1) Hawton Bounce, (2) Blackhawk Beauty, Easton & Ward; (3) Salvador Queen, Henry Wheatley; (4) Wrydeland's Queenie, Trumans' Pioneer Stud Farm; (5) Salvador Champion Princess, Henry Wheatley; (6) Osco Lilly, A. G. Soderberg; (7) Fanny Fern, A. C. Ruby.

Section 9—Mare, one year and under two: (1) Salvador Headlight, Henry Wheatley; (2) Blackhawk Chessie, Easton & Ward; (3) Osco Lady II., A. G. Soderberg.

Section 10—Shire Filly Foals: (1) Wallington Princess, A. G. Soderberg; (2) Victoria Gem, Bridgford Co.; (3) Blackhawk Delphine, Easton & Ward.

Section 11—Senior Champion Stallion Boro Blusterer, Trumans' Pioneer Stud Farm.

Section 12—Reserve Senior Champion Stallion: Royal Patch, Trumans' Pioneer Stud Farm.

Section 13—Junior Champion Stallion: Royal Friar II., Trumans' Pioneer Stud Farm.

Section 14—Reserve Junior Champion Stallion: Forage Premier, Trumans' Pioneer Stud Farm.

Section 15—Senior Champion Mare: Eastern Manners, Trumans' Pioneer Stud Farm.

Section 16—Reserve Senior Champion Mare: Beeby Judy, Trumans' Pioneer Stud Farm.

Section 17—Junior Champion Mare: Hawton Bounce Easton & Ward.

Section 18—Reserve Junior Champion Mare: Blackhawk Beauty, Easton & Ward.

Section 25—Stallion and three mares, any age: (1) Boro Blusterer, Eastern Manners, Beeby Judy, Normanby Swee Briar, Trumans' Pioneer Stud Farm; (2) Anwick Arthur Hawton Bounce, Blackhawk Beauty, Flowford Daisy Easton & Ward; (3) Friar II., Eureka Diamond, Lady Leo, Wrydeland's Queenie, Trumans' Pioneer Stud Farm (4) Blackhawk Barn Beauty, Quanea Princess, Hawtor Felicity, Blackhawk Blossom, Easton & Ward; (5) Sylvia King, Wallington Sunbeam, Osco Lily, Osco Lady II. A. G. Soderberg; (6) Salvador Forest King, Lady Redlynch, Salvador Queen, Salvador Headlight, Henry Wheatley; (7) Blymhill Forester, Rampton Mabel, Lightsome Blackhawk Chessie, Easton & Ward.

Section 26—Stallion and three mares, two years old and over, bred by exhibitor: (1) Sylvia King, Osco Lily, Osco Lady II., Wallington Princess, A. G. Soderberg.

Section 27—Best five stallions of any age: (1) Boro Blusterer, Stow Royalty, Royal Patch, Friar II, Forage Premier, Trumans' Pioneer Stud Farm; (2) Anwick Arthur, Witchford Albert, Blackhawk Victor Chief, Blackhawk Barn King, Blymhill Forester, Easton & Ward; (3) Nailstone Boxer II., Woodrow Wonder, Columbia Model, Carranga, George B., A. C. Ruby.

Section 28—Best three mares, any age, owned by exhibitor: (1) Eastern Manners, Beeby Judy, Normanby Sweet Briar, Trumans' Pioneer Stud Farm.

Section 28A—Reserve best three mares, any age, owned by exhibitor: Hawton Bounce, Blackhawk Beauty, Flowford Daisy, Easton & Ward.

Section 19—Grand Champion Stallion: Boro Blusterer, Trumans' Pioneer Stud Farm.

Section 20—Reserve Grand Champion Stallion: Royal Friar, Trumans' Pioneer Stud Farm.

Section 21—Grand Champion Mare: Eastern Manners, Trumans' Pioneer Stud Farm.

Section 22—Reserve Grand Champion Mare: Hawton Bounce, Easton & Ward.

Section 23—Get of one sire: (1) Get of Anwick Arthur, Group B. (Gay Lad, Blackhawk Beauty, Blackhawk Chessie), Easton & Ward; (2) Get of Nailstone Boxer (Nailstone Boxer II., George B., Fanny Fern), A. C. Ruby; (3) Get of Anwick Arthur, Group A (Blackhawk Mystery, Blackhawk Delphine, Blackhawk Minstrel), Easton & Ward..

Section 24—Produce of one dam: (1) Produce of Hollyhurst Blend (Nailstone Boxer II., George B.), A. C. Ruby; (2) Produce of Maryshall Lady Keith (Eureka Menestrel, Eureka Diamond), Trumans' Pioneer Stud Farm; (3) Produce of Lightsome (Blackhawk Beauty, Blackhawk Mystery), Easton & Ward; (4) Produce of Rampton Mabel (Blackhawk Chessie, Blackhawk Delphine), Easton & Ward; (5) Produce of Hawton Felicity (Blackhawk Blossom, Blackhawk Gay Lad), Easton & Ward; (6) Product of Quanea Diamond (Blackhawk Minstrel, Blackhawk Ring O' Bells, Easton & Ward; (7) Produce of Violet (Salvador Queen, Salvador Banker), Henry Wheatley.

CLYDESDALES

Exhibitors—James Van Etta, Lima Center, Wis.; South Bros., Orion, Ill.; A. G. Soderberg, Osco, Ill.; John Painter, Salem, Ore.; H. Lefebure & Sons, Fairfax, Ia.; Kansas State Agricultural College, Manhattan, Kas.; O. H. Brandt, Shellville, Cal.; W. V. Hixson, Marengo, Ia.; C. W. Bowers, Davis, Cal.; Francis D. Buck, Ripon, Cal.

Section 1—Stallion, four years old and over: (1) Charter Oak, James Van Etta; (2) Osco Captor, South Bros.; (3) Come Again, (4) Butterfield, A. G. Soderberg; (5) Massasoit, John Painter.

Section 2—Stallion, three years old and under four: (1) Enterprise Pride, South Bros.; (2) Scottish Mint III., H. Lefebure & Sons; (3) Bobbie Burns, A. G. Soderberg; (4) Baron Montague, Kansas State Agricultural College; (5) Famous, John Painter.

Section 3—Stallion, two years old and under three: (1) Hope's Pride, A. G. Soderberg; (2) King's Emblem, James Van Etta; (3) William Woodmac, A. G. Soderberg.

Section 4—Stallion, one year old and under two: (1) Baron's Prince, A. G. Soderberg; (2) Alworthy Baron, (3) King's Baron, James Van Etta; (4) Buster, John Painter.

Section 5—Stallion Foals: (1) Merbra, (2) Sir Lovat, O. H. Brandt.

Section 6—Mare, four years old and over: (1) Lady Caliph, James Van Etta; (2) Winsome Princess, A. G. Soderberg; (3) Marjorie, James Van Etta; (4) Jean Morrison, (5) Lady Marcus, O. H. Brandt; (6) Pride of Avalon, James Van Etta.

Section 7—Mare, three years and under four: (1) Lady Stewart, W. V. Hixson; (2) Osco Beauty, A. G. Soderberg; (3) Mona, (4) Una, (5) Madge, John Painter.

Section 8—Mare, two years and under three: (1) Osco Darling, A. G. Soderberg; (2) King Norman's Beauty, South Bros.; (3) Lovely Lass, A. G. Soderberg; (4) Honora, James Van Etta.

Section 9—Mare, one year and under two: (1) Colantha, A. G. Soderberg; (2) The Queen, James Van Etta; (3) Jasamine, A. G. Soderberg; (4) Trilby, C. W. Bowers.

Section 10—Filly Foals: (1) Enterprise Queen, South Bros.

Section 11—Senior Champion Stallion: Charter Oak, James Van Etta.

Section 12—Reserve Senior Champion Stallion: Enterprise Pride, South Bros.

Section 13—Junior Champion Stallion: Baron's Prince, A. G. Soderberg.

Section 14—Reserve Junior Champion Stallion: Hope's Pride, A. G. Soderberg.

Section 15—Senior Champion Mare: Lady Stuart, Francis D. Buck.

Section 16—Reserve Senior Champion Mare: Osco Beauty, A. G. Soderberg.

Section 17—Junior Champion Mare: Osco Darling, A. G. Soderberg.

Section 18—Reserve Junior Champion Mare: King Norman's Beauty, South Bros.

Section 19—Grand Champion Stallion: Charter Oak, James Van Etta.

Section 20—Reserve Grand Champion Stallion: Baron's Prince, A. G. Soderberg.

Section 21—Grand Champion Mare: Lady Stewart, H. V. Hixson.

Section 22—Reserve Grand Champion Mare: Osco Beauty, A. G. Soderberg.

Section 23—Get of one sire: (1) Get of Baron's Hope, Group A (Osco Beauty, Baron's Prince, Osco Darling), (2) Get of Baron's Hope, Group B (Come Again, Bobbie Burns, Hope's Pride), A. G. Soderberg; (3) Get of King Norman (King's Emblem, King's Baron, The Queen), Jas. Van Etta; (4) Get of Rosemac (William Woodmac, Lovely Lass, Colantha), A. G. Soderberg; (5) Get of Massasoit (Famous, Madge, Mona), John Painter.

Section 24—Produce of one dam: (1) Produce of May Palmerston (Lady Caliph, Lady Stewart), W. V. Hixson; (2) Produce of Saucy Kate (Osco Beauty, Baron's Prince), (3) Produce of Dagmar's Lass (Lovely Lass, Majesty's Darling), A. G. Soderberg; (4) Produce of Beauty's Maid (King Norman's Beauty, Enterprise Queen), South Bros.; (5) Produce of Hazel Ingelow (Madge, Juanita), (6) Produce of Pansy Ingelow (Famous, Buster), John Painter.

Section 25—Stud, stallion and three mares, any age: (1) Baron's Prince, Osco Darling, Osco Beauty, Winsome Princess, A. G. Soderberg; (2) Charter Oak, Marjorie, Lady Caliph, Una, James Van Etta; (3) Come again, Lovely Lass, Jasamine, Colantha, A. G. Soderberg; (4) Massasoit, Juanita, Madge, Mona, John Painter.

Section 26—Stud, stallion and three mares, all two years

A GATHERING OF DRAFTERS OF VARIOUS BREEDS IN THE P.-P. I. E. FORUM

ld or over, owned by exhibitor: (1)Baron's Prince, Osco Beauty, Osco Darling, Winsome Princess, A. G. Soderberg; (2) Famous, Juanita, Mona, Madge, John Painter.

Section 27—Group, best five stallions, any age, owned by exhibitor: (1) Come Again, Butterfield, Hope's Pride, William Woodmac, Baron's Prince, A. G. Soderberg; (2) Charter Oak, Scottish Mint III., King's Emblem, Alworthy Baron, King's Baron, James Van Etta.

Section 28—Groups, best three mares, any age, owned by exhibitor: (1) Osco Beauty, Osco Darling, Winsome Princess, A. G. Soderberg; (2) Lady Caliph, Marjorie, Ina, James Van Etta; (3) Juanita, Madge, Mona, John Painter.

BELGIANS.

Exhibitors—Wm. Crownover, Hudson, Iowa; H. Lefebure & Sons, Fairfax, Iowa; C. W. Bowers, Davis, Cal.; A. C. Ruby, Gresham, Ore.; James Edson, Carlton, Ore.

Section 1—Stallion, four years old and over: (1) Farceur (7332), Wm. Crownover; (2) Jules Remi, H. Lefebure & Sons; (3) Monarqile de Heurne, C. W. Bowers; (4) Cesar D'Olsene, A. C. Ruby; (5) Farceur (7906), H. Lefebure & Sons; (6) Clarion, (5) Farceur (7906), H. Lefebure & Sons; (8) Zolla de Mellot, Wm. Crownover.

Section 2—Stallion, three years and under four: (1) Marquis, H. Lefebure & Sons; (2) Imperial, A. C. Ruby.

Section 3—Stallion, two years old and under three: (1) Bethel, Wm. Crownover; (2) Reme de Fosteau, (3) Jules Remi, H. Lefebure & Sons.

Section 4—Stallion, one year old and under two: (1) Stevenot, C. W. Bowers; (2) Harold, A. C. Ruby; (3) Jules Remi, H. Lefebure & Sons; (4) Villa, A. C. Ruby.

Section 5—Stallion Foals: (1) Paramount Rabi, Wm. Crownover; (2) (Foal), H. Lefebure & Sons.

Section 6—Mare, four years old and over: (1) Anna du Balcan, (2) Paula de Lens, H. Lefebure & Sons; (3) Civette, Wm. Crownover; (4) Abbisse, James Edson; (5) Bell, A. C. Ruby.

Section 7—Mare, three years old and under four: (1) Janette, H. Lefebure & Sons; (2) Juno, A. C. Ruby; (3) Anette, H. Lefebure & Sons; (4) Dyle, A. C. Ruby.

Section 8—Mare, two years and under three: (1) Radieuse, H. Lefebure & Sons; (2) Juliet, (3) Mariette, A. C. Ruby.

Section 9—Mare, one year and under two: (1) Lista, (2) Salome, (3) Dinette, (4) Rosette, Wm. Crownover; (5) Radieuse, H. Lefebure & Sons.

Section 10—Filly Foals: (1) Paramont Lola, Wm. Crownover; (2) Nonette, H. Lefebure & Sons.

Section 11—Senior Champion Stallion: Farceur, Wm. Crownover.

Section 12—Reserve Senior Champion Stallion: Jules Remi, H. Lefebure & Sons.

Section 13—Junior Champion Stallion: Bethel, Wm. Crownover.

Section 14—Reserve Junior Champion Stallion: Stevenot, C. W. Bowers.

Section 19—Grand Champion Stallion: Farceur, Wm. Crownover.

Section 20—Reserve Grand Champion Stallion: Jules Remi, H. Lefebure & Sons.

Section 15—Senior Champion Mare, three years old or over: Anna Du Balcan, H. Lefebure & Sons.

Section 16—Reserve Senior Champion Mare: Paula de Lens, H. Lefebure & Sons.

Section 17—Junior Champion Mare: Lista, Wm. Crownover.

Section 18—Reserve Junior Champion Mare: Salome, Wm. Crownover.

Section 21—Grand Champion Mare: Anna Du Balcan, H. Lefebure & Sons.

Section 22—Reserve Grand Champion Mare: Lista, Wm. Crownover.

Section 23—Get of one sire: (1) Get of Farceur (Lista, Salome, Dinette), Wm. Crownover; (2) Get of Marquis de Pouly (Marquie, Janette, Anette), H. Lefebure & Sons; (3) Get of Farceur (Rosette, Paramount Lola, Paramount Bolder), Wm. Crownover; (4) Get of Fortin (Harold, Juno, Juliet), A. C. Ruby; (5) Get of Jules Remi (Remi de Fosteau, Jules II., Radieuse), H. Lefebure & Sons.

Section 24—Produce of one dam: (1) Produce of Quimperlette (Lista, Paramount Bolder), Wm. Crownover; (2) Produce of Radieuse 145 (Radieuse 4, Radieuse 4217), H. Lefebure & Sons; (3) Produce of Civette (Salome, Paramount Lola), Wm. Crownover; (4) Produce of Jeanne de Soheit (Juno, Juliet), A. C. Ruby; (5) Produce of Rosette (Marquis, Gold Coin), H. Lefebure & Sons.

Section 25—Stud (stallion and three mares): (1) Farceur, Liata, Rosette, Salome, Wm. Crownover; (2) Jules Remi, Anna du Balcan, Paula de Lens, Betta, (3) Clarion, Janette, Anette, Radieuse, H. Lefebure & Sons; (4) Cesar D'Olsene, Juliet, Juno, Dyle, A. C. Ruby.

Section 26—Stud (stallion and three mares, all two years old or over, bred by exhibitor): (1) Marquis, Janette, Anette, Radieuse, H. Lefebure & Sons.

Section 27—Best five stallions, any age, owned by exhibitor: (1) Jules Remi, Clarion, Farceur, Charmante, Marquis, H. Lefebure & Sons; (2) Garnament, Cesar D'Olsene, Castor, Imperial, Harold, A. C. Ruby.

Section 28—Best three mares, any age, owned by exhibitor: (1) Anna du Balcan, Paula de Lens, Janette, H. Lefebure & Sons; (2) Lista, Rosette, Salome, Wm. Crownover; (3) Juliet, Juno, Dyle, A. C. Ruby.

FRANK WHISENAND PASSES ON.

Every horseman and caretaker who has wintered or raced at Pleasanton in the course of the last several years, as well as very many other Californians, knew and liked Frank Whisenand and will be pained to know that they will never greet him again, death having claimed him on October 11 in Oakland, to which city he and his family had moved only a short time ago. While he himself was not actively engade in either breeding or racing he was a warm admirer of the trotter and took a great deal of interest in their doings and fraternized with horsemen to a considerable extent. His place of business was headquarters for the Pleasanton colony outside of working hours, and he lent an ever ready ear to a "hardluck story" and a helping hand to its teller. He will be greatly missed from the winter evening gatherings, and the sympathy of a wide circle of men who have known and valued his friendship is extended to his family.

ANSELILA TAKES STANDARD RECORD.

Recent advices from Hunter Moody tell of another good Prince Ansel yearling trotter, Anselila, who was so much liked by all horsemen some time ago and was then retired from training. She rounded to nicely from a slight setback and last Thursday at Lexington, back in training less than thirty days, she took a record of 2:27¾. She is without doubt one of the fastest of all yearling trotters and will be heard from in days to come.

One Big Day at Los Angeles Speedway

Los Angeles, Oct. 19.—Los Angeles may not have many "speed programs" these days, but when she does have one she has a real one. All summer there has been a lot of speed on tap at Exposition Park, and today when a little record meeting was given the boys fairly burned up the track from fence to fence and wire to wire. seven miles being trotted or paced from 2:03½ to 2:10 and a number of youngsters going into the list with a bump, fourteen horses in all acquiring new records. Trainer Railey Macey was the leading speed dispenser of the afternoon and his pupils of the International 1:55 Stable gave ample evidence of the benefit of their summer's schooling. Judith Patch (2), Dazzle Patch's initial performer who won a record of 2:25 in June at the exposition, paced in 2:21¼ and Mary E. Patch trotted in 2:12¾. Macey then began his real rides, marking the three-year-old Agnes Patch, winner of the exposition stake for the age, in 2:09½, Buzz Patch in 2:09½ and another three-year-old, Drift Patch, in 2:10. The star of the day was the bay horse Power Patch, who distinguished himself by pacing in 2:03½, becoming thereby the fastest of the get of Dan Patch 1:55¼. It was a great performance, and the lad is entitled to be great, his dam being the grand old queen of the halfmile tracks, Effie Powers 2:08¼. Macey and his stable have made a world of friends for the Savage Farm during the summer and their performances today were warmly applauded.

William G. Durfee, as per usual, was there with the goods, but confined his activities mostly to young things. The Lark became a new 2:10 performer for Carlokin 2:07½ and Subito by trotting in 2:09½, and two two-year-olds were added to the standard list of the same good sire by the baby trotters Carleta (2) 2:20¾ and Hermes (2) 2:16¼. Manrico's son, Rico, also a two-year-old, paced for Will in 2:12¼ and Miss Bond (2) trotted in 2:17½. The latter is by The Bondsman and out of the blind mare Miss Harris by Sidney Dillon, owned by Ryan & Webster of Pleasanton.

Baronteer Todd added to the laurels of his dead sire by pacing in 2:09¼ for J. H. Torrey, and Ted Hayes had a fine ride in 2:08½ behind that gamecock young trotter, Bon Courage. Zomrest's mile in 2:12¼ at the trot for J. G. Baker brought the day to a close. The judges were Dr. A. D. Hubbell, Wm. Loftus, J. S. Nickerson; timers, Chas. Nickerson, L. E. McLellan and Frank Williams, E. J. Delorey doing the starting. Day and track were ideal and the crowd a generous sized one. The summary:

Los Angeles, Oct. 19—To beat 2:25 pacing:

Judith Patch, b f (2) by Dazzle Patch—Hal Raven by Hal B. ..... (R. W. Macey) 2:21¼

To beat 2:16¼ trotting:

Mary E. Patch, b m (7) by Dan Patch—Prelissa by The Prelate ..... (Macey) 2:12¾

To beat 2:20½ pacing:

Agnes Patch, b f (3) by Dan Patch—Louise Hersey by Arion ..... (Macey) 2:09½

To beat 2:12 pacing:

Buzz Patch, bl m (4) by Dan Patch—Heloise Grattan by Grattan ..... (Macey) 2:09½

To beat 2:09¼ pacing:

Power Patch, b h (5) by Dan Patch—Effie Powers by Anderson Wilkes ..... (Macey) 2:03½

To beat 2:20 pacing:

Drift Patch, b h (3) by Dan Patch—May Drifton by Drifton B. ..... (Macey) 2:10

To beat 2:17½ trotting:

The Lark, b m (4) by Carlokin—Subito by Steinway ..... (W. G. Durfee) 2:09½

To beat 2:30½ trotting:

Carleta, b f (2) by Carlokin—Alexandria by Bon Voyage ..... (Durfee) 2:20¾

Hermes, b c (2) by Carlokin—Miss Quealey by Moko ..... (Durfee) 2:16¼

To beat 2:25¼ pacing:

Rico, ch c (2) by Manrico—Pavlowa B. by Petigru ..... (Durfee) 2:12¼

To beat 2:30¼ trotting:

Miss Bond, b f (2) by The Bondsman—Miss Harris by Sidney Dillon ..... (Durfee) 2:17½

To beat 2:25¼ pacing:

Baronteer Todd, br h (9) by Todd—Bon Bon by Baron Wilkes ..... (J. H. Torrey) 2:09¼

To beat 2:12¾ trotting:

Bon Courage, ch g (4) by Bon McKinney—Helen Keyes by Sidney Dillon ..... (Ted Hayes) 2:08¼

To beat 2:30¼ trotting:

Zomrest, bl h by Zombro—by Direct .. (J. G. Baker) 2:12¼

GOOD SPORT AT PETALUMA.

San Francisco makes frequent shipments of "chicken" horses to Petaluma, but the bunch that paid a flying visit to the egg and squab center last Sunday was of an entirely different kind, as it was composed of the majority of the trotters and pacers that have furnished sport on Sunday afternoons through the summer at the Stadium and exposition tracks. Members of the San Francisco-California Driving Club went up almost to a man, accompanied by a large delegation of friends, and the Petaluma folks paid them the compliment of turning out in large numbers to witness the races. Kenilworth Park was the scene of the inter-city strife, the racing being under the auspices of the club from this city. Santa Rosans failed to materialize, leaving San Francisco, Marysville and Petaluma horses to scrap it out, with the former having the best of the fray.

Happy Dentist was the only warrior able to put it over in straight heats, the old veteran hauling Freddie Lauterwasser two trips in even 2:10 time, Dick W. and Little Bernice taking turns in endeavoring to put salt on his tail. Victor Pointer, King Pointer and Mabel Dillon each found eggs in the nest when they made their rounds, but Victor's culled bunch graded a little better than that gathered by the others, putting him in line for the trophy. Agnes Carter stayed at home, and with her out, St. Patrick annexed the free-for-all trot. Frances S. trotted second in the first heat, won the second, but put both front feet in the egg basket in the third, finishing last.

The 2:20 mixed class was well mixed for heat-winners, Cookey taking the first, Ateka the second and Tramp the third, Ateka standing best by virtue of having been twice second. In the Petaluma road race Richard and Dan Healey indulged in an unbrotherly battle with Billy T. and Silver Logan, the former taking two out of three and the trophy.

The going was none too good and the time made by Happy Dentist stood out as the feature of the day. In the absence of Jimmy Ryan, Bert Edwards manipulated the starter's megaphone in a very pleasing manner. Everybody had a good time but the occasion was marred by one "unfortunate" occurrence. Someone started a dastardly rumor that Petaluma's water was veritably laden with typhus germs, especially deadly to visitors from bay points. This caused considerable anxiety among the strangers and caused the water to be practically barred as a beverage, though useful for other purposes. However no deaths from thirst were reported, as all arrived home safe and sound. The day in detail follows:

2:18 pace:			
Victor Pointer ..... (D. W. Keating)	2	4	1
King Pointer ..... (H. Campodonico)	3	1	4
Mabel Dillon ..... (B. Cohen)	1	5	5
Jack ..... (McDonnell & Conlan)	4	2	2
Nutwood Demonio ..... (John Grimes)	5	3	3
Time—2:16¼, 2:16½, 2:18.			
Free-for-all trot:			
St. Patrick ..... (J. Holland)	1	2	1
Francis S. ..... (J. E. Strain)	2	1	4
Birdeye ..... (A. Combatalade)	3	4	2
Kinney Lou Junior ..... (Frank Burton)	4	3	3
Time—2:21½, 2:21, 2:22.			
Free-for-all pace:			
Happy Dentist ..... (F. Lauterwasser Jr.)	1	1	
Dick W. ..... (A. Ottinger)	2	3	
Little Bernice ..... (Jack Welsh)	3	2	
W. J. K. ..... (W. J. Kenney)	4	4	
Time—2:10, 2:10.			
2:20 mixed:			
Ateka ..... (B. Cohen)	2	1	2
Tramp ..... (John Grimes)	3	2	1
Cookey ..... (Joe Vermet)	1	3	3
Peaches ..... (Dan McGovern)	4	4	4
Time—2:29, 2:24, 2:25.			
Special, Petaluma road horses:			
Billy T. ..... (R. Healey)	1	6	1
Silver Logan ..... (Dan Healey)	3	1	3
Springtime ..... (Jack Grimes)	5	2	2
Ike M. ..... (Dan McGovern)	2	4	5
Alameda Maiden ..... (A. Dolcini)	4	3	4
Time—2:34, 2:28, 2:27½.			

GRAND CIRCUITERS AT PLEASANTON.

A little tired from the long journey that concluded their summer at the races on the Grand and Great Western circuits, Mr. and Mrs. C. L. DeRyder arrived Tuesday at Pleasanton and have been very busy resting (?) and greeting friends ever since, "glad as glad" to be back in that good old Livermore valley. Hard on their trail a few hours later came the advance guard of the big line campaigners that are coming to the exposition meeting which starts November first. The DeRyder car contained a classy lot, as in addition to his racing stable, Maymack, Miss Perfection, Anvilite, Zomblack, Governor Mason and Madam Mac, Charley brought out four weanlings by General Watts and The Northern Man and also Ed Geers' famous trotter, The Anvil 2:02¾, who, presumably, will be in service at Pleasanton. The car also contained Homer Rutherford's good colt trotter, George N. Patterson, and L. C. Kinney's ex-champion pacer, Impetuous Palmer (3) 2:05¼, both staked here in November.

The old "he-wolves" of the pack, however, were in another car in charge of Tommy Murphy's right hand bower, Ned McCarr, the bunch including Hal Boy, The Beaver, Seneca Boy and the Murphy speedsters Peter Scott, Mirthful, Jean, Major Ong and Hal S. The horses all look fine, especially Peter Scott, and stood the ship in grand shape, having good weather and a fast run all the way. Hugh Ross, Murphy's farrier, came with the delegation and our own Watt Cleveland returned to serve the wants of DeRyder and his numerous other patrons.

R. J. MacKenzie and Matthew O'Brien were on hand to see the horses unload and have been spending most of the time since then at the track, where things are booming just now in the good old way. It is a pity that the exposition race meeting could not be staged on a plant as adequately appointed, as climatically blessed, and as efficiently and pleasingly conducted as is the MacKenzie property, Pleasanton Driving Park.

C. A. Harrison has recently sold to the northwestern trainer, George Swisher, the pacing gelding Joseph Ansel (3) 2:12¾, by Prince Ansel (2) 2:20½ out of Josie D. by Nutwood Wilkes 2:16½. Swisher will winter at Salem and fit this lad for next year's races. Mr. Harrison has also sold to F. P. Norton of Marshfield the rugged Brook Nook Ranche gelding Jean Jacques by The King Red, a good sort of a trotter.

SANTA ANITA RANCHO

The popularity of the horse among people of fashion was never more emphatically demonstrated than at the Horse Show just held in connection with the Panama-Pacific International Exposition. While there are those who still doubt that the horse will ever regain his prestige, those who are members of the "inner circle" are more than enthusiastic over the outlook for the future and realize that all indications point to the return of the best of man's four-footed friends to his former proud position in the world of fashion. The horse is now the "hall mark" of aristocracy, whose ownership takes his master out of the merely wealthy class and places him in the position of the man of estates. The possession of a high-class carriage pair, gig horse, saddler or roadster is today a mark of fashion, position and prosperity, an indication that the owner has money, leisure time and social position.

So much for the social side of the question. There is, however, a much more effective and positive energy working for the restoration of the horse to favor — the substantial and extensive interest that is being displayed in him by the women of today. With them the horse is not a fad, but a most serious proposition in behalf of which they are commencing to devote not only a generous portion of their time, but of their money as well. Stronger and stronger is becoming the hold of the horse upon the affection of members of the feminine portion of exclusive circles; horse shows have been more numerous and more popular this season than ever before among metropolitan social circles of the Atlantic seaboard, and California's daughters are more than keeping pace with their eastern sisters as horse owners and breeders.

This was most strikingly illustrated by the participation of Santa Anita Rancho in the recent horse show, and other activities of the department of live stock at the exposition. In quality and range, the display made by Anita M. Baldwin was by far the most interesting of those made especially for the horse show, whil throughout the course of the exposition she has maintained there under the view herd allowances, a stable that has been th chief center of attraction of the department. Very shortly after the exposition was opened the Baldwin quarters were fitted up for continuous occupancy, and no a day has passed that visitors by the hundred have failed to pay their respects to the famous horses gathered there. The equine aristocrats, with their attractive quarters, elaborately fitted up and decorated in the Baldwin colors of red and black, with the famous Maltese cross an ever present symbol, made the Santa Anita exhibit one of the real show places of the exposition. Santa Anita Rancho! Why, those simple, soft-flowing syllables were of themselves a magnet of irresistible drawing power, for with them is interwoven tale upon tale of the doing of heroic deeds upon the turf. Then, too, the story of the rancho itself is a tale of modern wonderment. Established over two-score years ago by the late Elias J. Baldwin, its broad acres stretched out under the smiling southern sun from the Sierra Madres to the Puentes, and from a line just west of the present town of Lamanda Park far to the eastward to the Merced Hills. Then it was merely ranch and range, but today, within its original confines, are prospering farms and orchards and a number of bustling little cities. So passeth the old order, but Santa Anita Rancho, unlike most great ranchos of a bygone day, has maintained its identity throughout the changing days and under the guidance of the daughter promises to achieve a renown even greater than that enjoyed by it under the regime of the father.

MRS. BALDWIN AND IBN MAHRUSS

Santa Anita Rancho! What countless thousands of people there are in this world who have whooped and cheered and pounded each other on the back and thrown hats away and indulged in all the other well known forms of race track hysteria when the black, with the red sash and cap and the red Maltese cross flashed past the stands atop the winner of a hard fought race! Four times were the above colors first at the wire in the classic American Derby, an achievement standing absolutely alone in turf annals, for no other establishment ever had even two winners of the event. Volante, in 1885, first captured it, followed the next season by Silver Cloud. Two years later Emperor of Norfolk became the third winner, the quartette being rounded out in 1894 when Rey el Santa Anita, still hale and hearty and one of the finest specimens of the thoroughbred in America, came down in front in 2:36, the record for the Derby to that time. Long years ago the Derby was discontinued. Washington Park, engulfed in the great "south side" of Chicago, has long been but a memory, but how pleasing it must be to thousands of warm-blooded men and women to know that Rey el Santa Anita has weathered the storms of all these years to become the grand champion stallion among his kind at the Panama-Pacific International Exposition.

REY EL SANTA ANITA

Discouraging as has been the industry of thoroughbred breeding and racing for the several seasons last past, the Santa Anita stud has not been dispersed nor allowed to deteriorate, for among its other winners at the exposition were Reina de Santa Anita, a dainty daughter of Rey, who was adjudged the junior champion mare and the reserve grand champion of any age; Reina de Los Angeles, an aged matron of note as a producer, and the stallions Norito

nd Adalid, sons, respectively, of Emperor of Norfolk nd Amigo. Every season witnesses the foaling of umerous thoroughbreds at the famous old speed ursery, all of which are readily salable even in dull easons, and with a brighter day dawning for the horoughbred there is reason to look forward to the eturn of the black and red to an active participation n turf affairs. Welcome the day!

Famous as are the thoroughbreds of Santa Anita ancho, with friends and admirers by the thousands, here is another band of horses calling the rancho ome who are running them a very close race indeed or popularity in the hearts of both their owner and he public—the Arabians, true sons of the desert of he tribe from which sprang the horses of today of ll nations. Back to the Arab goes the pedigree of very great race horse, some by devious ways, others irectly, and from the section of the east whence ame the Darley Arabian comes Ibn Mahruss, head f the Santa Anita Arabian stud. Dear to the heart f the Arab is his horse, and Ibn Mahruss is of the ind that, in his native home, is so cherished as to e priceless. Only as a gift could he have passed o alien hands, and as such—a token of esteem from Persian Shah to an American artist and true horse over, the late Homer Davenport—he came to enrich he blood of the American horse, eventually passing to Richard Walton Tully and then to Mrs. Baldwin, whose property he will remain ever more. A magnificent individual, beautiful, docile, endowed with many traits as nearly human as one of his kind may have, he has become Mrs. Baldwin's favorite saddle horse, and carries her on many and many a ride, the keen enjoyment of which will linger long in memory.

Ibn Mahruss, accepted as the greatest of Arabians, owns allegiance to that best of all desert families, the Seglawie Jedran, being a son of Mahruss and Bushra, a pair whose praises have been sung in the farthest oases of the lands of the Moslem. With him in the stud is the younger horse Cibolo, foaled 1912, a beautiful dapple gray of the family Hamdani Simri, and Nedjrez, of the same age, of the family Keheilet Ajuz. To Cibolo fell the exposition's award as a champion stallion, while the champion mare was Nedjme III., the dam of Nedjrez. Shireen, the baby of the band, also out of Nedjme III., was the best junior mare, and in fact but one award, and that a second, escaped the Santa Anita Arabians.

Some time ago Mrs. Baldwin announced that it was her desire to make Santa Anita as famous for the production of utility horses as it is as a breeding ground of race winners, and as a basis for her operations along this line "combed the land" for the best available purebred Percherons and a smaller number of prize winning jacks and jennets. "Quality" is the watchword, with price a small consideration, and already she is well on the way to the possession of America's greatest collection of Percherons. Heading the band is Jusque 79515 (85467), an imported son of the incomparable Etudiant, who came to America at a record price and now heads the stud at the Pabst Farm in Wisconsin. Through his dam, Tirelire (59522), Jusque inherits a very intense infusion of the blood of the famous Brilliant, so that in breeding, as well as in all individual points of draft horse excellence, he leaves but little to be desired.

The Percheron mares were selected with the same care as that displayed in the purchase of Jusque, and every one is purebred and registered with the Percheron Society of America. Competition in the Percheron classes was of the keenest kind, the best farms of America being generously represented, and a little glance at the list of awards shows how well the Baldwin horses rank with others of their kind. Numerous honors came to them, notable among them being the following: first for stallion and three mares on Jusque, Manon, Oaklawn Queen and Cicely; first for best three mares owned by exhibitor on Oaklawn Queen, Manon and Cicely, while to Manon was awarded the senior mare championship, the reserve grand championship, and first for mares three years old and under four. She is a wonderful mare, an exemplification of power, intelligence and docility, and will bring much fame to Santa Anita Rancho in the future.

Kentucky, noted above all the states beyond the Rockies for the quality of its horseflesh, is far-famed as the breeding ground of the best native jacks and jennets, and it was from among prize winners of the Blue Grass that Santa Anita's members of this homely but useful tribe were recruited, including the jack King Bersheba and a dozen females. King Bersheba, a fine tempered fellow, heavily boned and well muscled, was a winner of championship honors as a two-year-old in his native home, but unfortunately could not be shown in competition at the exposition, though much admired by visitors to the stable. Shortly before the judging began he developed all the symptoms of arsenical poisoning and for days his life was despaired of, though skill and care finally brought him around to a point where he could be shipped home. He and his harem are the right sort, and their produce will be much in demand.

The livestock at Santa Anita is by no means limited to the kinds mentioned in the foregoing paragraphs, as there are the dogs of the famous Anoakia Kennels, the Holstein-Friesian dairy herd, and the piggery stocked with the best of Poland Chinas, every

KING BERSHEBA

one of these divisions worthy of a story of its own more extensive than this entire article. One small story cannot tell the tale of Santa Anita Rancho, but some day in the future we hope to do proper justice to each individual branch of endeavor touched upon so lightly here. Suffice it to say that in every line only the best of its kind is considered worthy of Santa Anita, and each family is being added to from time to time that the highest standard may be maintained. Of the scenic grandeur of its natural setting, of the efficiency, comfort and beauty of its costly improvements, of its irrigation system, its winery, its orchards and vineyards and broad acres of meadow and field and pasture, dotted here and there by the noblest oaks of the San Gabriel valley, no adequate idea can be gained save through a personal visit thereto, and visitors are warmly welcomed.

Under the aggressive policy adopted by Mrs. Baldwin it would seem that the former fame of Santa Anita Rancho is merely an incident to that to be acquired in the future. Located as it it is but five miles from Pasadena and fourteen miles from Los Angeles, served by three rail lines, it lies directly in the path of the bulk of Southern California tourist travel, and many indeed are the visitors who come to wonder at its thorough greatness and go away to sing its praises in many quarters of the land. Wonderful as it is now, and famous as are its products, the future holds promise of an infinitely greater renown, as Mrs. Baldwin is putting heart and soul and fortune into her work with the one aim of making Santa Anita Rancho the greatest of its kind in the world.

No doubt there are very many people who have an entirely erroneous conception of Santa Anita Rancho as it is today, thinking of it largely, or entirely, as a show place only, the whim and plaything of a woman of wealth. Such a conception is absolutely wrong, for while Mrs. Baldwin has spared no effort or expense to make it surpassingly attractive and comfortable for its residents, both man and beast, the underlying principle that dominates every line of endeavor is "service." First, last and always "service" is the watchword — service to the stock grower in giving him opportunity to purchase, here at home, the very best and purest bred animals of the families in which he specializes; service to the farmer, the orchardist, the vineyardist, in demonstrating how best his ends may be achieved; service to mankind in general by the doing of a great work well. No, Santa Anita is not a plaything. It is a vital, pulsating, thriving affair of modern business a "monument" to a deep and abiding love for all domestic animals and for the products of the soil.

Only a few weeks ago there was published a beautiful, comprehensive and appropriate catalog descriptive of Santa Anita and its various operations, and readers of this brief sketch will derive much pleasure from a perusal of its pages, replete with definite and interesting facts and profusely illustrated with engravings of the various classes of livestock as well as with scenes portraying other industries of the rancho and its natural beauties. Business offices are maintained at 1314 Washington Building, Los Angeles, and a card to that address will bring you the catalog or any information you may desire.

MANON

Longview Farm

Of all the breeds of horses in evidence at the exposition show, none were represented by a larger number of exhibiting owners and breeders than the gaited saddlers, and none took higher rank in popular favor with the spectators, in either the breeding or performance classes. They came from "all over," and much distinction was added to the competitions in their events by the presence of a number of individuals of nation-wide renown, famous winners in many former shows where the company was of the very highest kind. Aside from that of our own California, Missouri's representation was the most extensive and was also the most select, for Missouri is rapidly forging to the lead among all the states as a producer of the saddle horse. Within her borders are located the leading farms of the day, and the exposition was most fortunate in having present, among others, the stable from Longview Farm whose members have achieved such signal honors in recent seasons.

IMPERIOUS KING

This five-year-old son of Bourbon King was a well-liked member of Longview Farm's Stable on its western tour.

Longview Farm, the establishment of R. A. Long of Kansas City, is an extensive estate located in the heart of one of the "show me" state's most beautiful and productive sections, Jackson county, the postal address being Lee's Summit. While lavishly improved and made into a jewel among its kind it is not merely a "show place" but a practical establishment that pays a profit, as its produce have swept the show rings of many fairs and are always in demand among progressive breeders. Mr. Long's personal "stronghold" is Jersey cattle, flanked by a sturdy detachment of Duroc Jersey swine, while the harness and saddle horses are the especial pride of Miss Loula Long, in whose name they are generally entered, and who is well on the way toward becoming America's foremost horsewoman. The Jerseys at Longview, headed by a nine-thousand-dollar sire, are of the very choicest, and at recent Missouri fairs have been awarded firsts and championships in very many classes, Mr. Long's chief competitor being furnished by the Jerseys from the establishment of his fellow-townsman, F. J. Bannister. Had not the quarantine interfered it is probable that the farm would have participated in the cattle show here as well as the horse show.

During the present season Miss Long's stable has enjoyed an enviable measure of success in a number of the leading events of the central west. Under the direction of John T. Hook, who has probably shown more winning saddle horses than any other man west of the Mississippi, her horses were most successful at the shows at Dayton, Ohio, and at the South Shore Country Club in Chicago, at the fairs at Moberly, Columbia and Mexico, and at the day and night horse show at Shelbina, the sweepstakes rings for gaited horses at all the above places being at the mercy of Maurine Fisher, while many awards fell to other members of the string. At Mexico and Shelbina, as well as here at the exposition, the get of My Major Dare were invincible in the kindergarten classes for both sexes, so that in the Major, Longview Farm possesses not only a great show horse in his own right, but a sire of proven and exceptional quality. He has been undefeated in the classes for his sex, his latest laurels being the award of senior and grand champion stallion at the P.-P. I. E. He was the greatest individual attraction of his kind here, and his appearance on any occasion was warmly welcomed. On the closing day of the show, though his competitive classes had all been adjudged previously, so many requests were made for "one more view" that Mr. Hook brought him out under saddle for one final bow to his friends, round after round of applause showing just how he stood with the pleased spectators. He is a magnificent type of the saddle horse, and Californians are much indebted to Miss Long for the pleasure afforded them by his presence, and that of his stable mates, at the local show. At both Sedalia and St. Louis the majority of premier awards in the junior classes fell to colts and fillies by him, being exhibited, during the absence of Mr. Hook, by C. J. Tucker, the farm's general manager.

Conflicting engagements prevented the appearance of the harness horses of Longview Farm in those classes here, much to the regret of the lovers of the horse who admired its saddlers so greatly. That her harness horses may be readily identified by even the occasional show-goer, Miss Long has adopted a uniform terminal for her system of nomenclature, the letters "tion." As usually enunciated, this sounds exactly as "shun," but the "fonetic spelling" has nothing in keeping with the meaning of the word formed by those four letters. Sure it is that Longview's "tions" do not "shun" ribbons or other prize awards as Anticipation, Illumination, Revelation, Realization Hesitation, Concentration, Admiration, Aspiration Animation and other similar names are becoming very familiar to the judges and clerks whose duty it is to determine the best horse in the ring.

While the saddle horses were gaining honors here the harness horse contingent was equally busy at the show held in connection with the American Royal. Miss Long was the leading exhibitor in this class and had the pleasure of annexing a number of the leading awards, while the Farm's Jerseys held their own well in their classes of the same event.

Longview Farm's catalog is a beautiful and entertaining bit of the printer's and compiler's arts, and the supply brought out was depleted almost before the show began. Many requests were made that could not be gratified, and if the disappointed ones, or any others, will mail their addresses to either C. J. Tucker, general manager, or John T. Hook, manager of the saddle horse department, at Lee's Summit, Missouri, their wants will promptly be filled and the booklet will serve to keep its possessors in touch with Longview Farm affairs in the interval until the day California may again have the pleasure of being host to its horses.

ORANGE COUNTY FAIR.
